PROCEEDINGS AND DEBATES OF THE 91st CONGRESS, FIRST SESSION

SENATE—*Friday, December 19, 1969*

The Senate met at 11 o'clock a.m. and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal Father, as we gaze once more upon the manger scene, may the child-heart of simple faith and trust be born in us again. Lead us to the truth which is understood not by logic but by poetry and music and a soul in tune with the infinite and eternal. In the long hours of toil keep us from being pushed or pinched by the day's program, but preserve in us an area of serenity and quiet strength. May we come to that reality of Thy sustaining and abiding presence we have never known before. And may we serve in the spirit of Him who came to be the servant of all. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will read a communication to the Senate.

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., December 19, 1969.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JAMES B. ALLEN, a Senator from the State of Alabama, to perform the duties of the Chair during my absence.

RICHARD B. RUSSELL,
President pro tempore.

Mr. ALLEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Thursday, December 18, 1969, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Labor and Public Welfare and the Committee on Armed Services be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider a nomination on the Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The nomination on the Executive Calendar will be stated.

AMBASSADOR

The assistant legislative clerk read the nomination of Henry J. Tasca to be U.S. Ambassador to Greece.

The ACTING PRESIDENT pro tempore. The question is, Will the Senate advise and consent to the nomination?

Mr. GOODELL. Mr. President, on Tuesday, December 9, I requested Senate Majority Leader MANSFIELD to place a temporary hold upon the consideration of the nomination of Henry J. Tasca to be U.S. Ambassador to Greece.

I did not take this action because I believed the United States should indefinitely postpone sending an ambassador to Greece.

On September 25, the Senate adopted a resolution (S. Res. 205) declaring that when the United States recognizes a foreign government, that action does not in itself imply that we endorse its policies. I agree with the principle set forth in this resolution, and I voted for it. In general, the establishment and maintenance of diplomatic contacts with other nations should reflect the realities of international politics, not our preferences.

Greece now is ruled by a brutal dictatorship that does not hesitate to make systematic use of terror and torture.

The repressive nature of the Greek regime does not, however, justify a permanent refusal to dispatch an ambassador to Athens—any more than Soviet police state methods would justify withdrawing our Ambassador in Moscow.

Nor was my action based on any reservations concerning Mr. Tasca's qualifications. He is, as I have stated previously, a most able diplomat who is fully qualified for this sensitive post.

I requested a temporary hold on consideration of the nomination because I was convinced it was not the propitious moment to approve an ambassador—as the Council of Europe was about to consider the expulsion or suspension of Greece from the Council for violation of the basic human rights of Greek citizens.

I was fearful that the confirmation of a U.S. ambassador a few days before the Council's meeting would be misconstrued in Europe as a gesture of support for the junta and as an attempt to intrude ourselves into a decision that should have been made by Europeans themselves.

The Council's meeting has now taken place. The Greek dictatorship was forced to resign from membership in this body of democratic nations.

The strong stand of the members of the Council is most gratifying. It will be a clear signal to the forces behind the junta that the patience of the European democracies with the Greek junta's cruel and dictatorial methods has run out.

Now that the Council of Europe has met, the dispatch of an ambassador to Athens could no longer be interpreted as a sign that the Senate of the United States opposes strong disciplinary action by the Council against Greece.

Accordingly, I have decided to release the hold I requested on the consideration of Mr. Tasca's nomination. I am hopeful he can be confirmed soon, and I will vote for his confirmation.

While I will not oppose this nomination further, I would like to register my concern over the failure of the United States to make effective use of its diplomatic influence to press for more humane and democratic policies in Greece.

Reform in Greece is needed in the interest of simple humanity and justice. The victims of the Greek dictatorship are human beings. They must not be harassed, terrorized, and tortured. If we show no interest in preventing this sort of suffering, our claims of representing democratic and humanitarian ideals become no more than a mockery.

Reform in Greece is needed to preserve our credibility. We simply cannot afford to profess a double standard of morality—one for Communist nations and one for rightwing dictatorships with which we happen to be allied. No one will believe our protests against repression in Czechoslovakia or Russia if we turn a blind eye to tyranny in Greece.

Finally, reform in Greece is needed to protect our security. Continued repression only increases the chances of a civil war—one which the Greek Communists could exploit to reestablish the influence they lost in the late 1940's.

The men supporting the junta are realists. Faced with strong and insistent demands for reform from the United States and its European allies, these men may well be induced by self-interest to press

for more humane policies. Faced with an ineffectual U.S. response, they will have little incentive for change.

Regrettably, the official reaction of the State Department to the junta's police state practices has been most ineffectual.

Despite indications that the forces in Greece undergirding the junta might press for reforms in response to a strong U.S. stand, the State Department has evinced little more than mild disapproval for the regime's harsh policies. The Department has succeeded in conveying the impression that it is far more concerned about what hypothetically might happen to our military bases in Greece than with what is actually happening to the basic human rights of the Greek people.

A glaring example of this sort of complacency was the Department's stand on the ouster of Greece from the Council of Europe.

The Council is restricted by its charter to those countries that "accept the principles of rule of law" and the enjoyment by all citizens of "human rights and fundamental freedoms." The Greek dictatorship patently fails to meet either of these requirements.

Before the Council met last Friday, the official position of the State Department was "neutrality" on the side of the junta. Persistent reports came from Paris that the State Department was lobbying with European foreign ministries for retention of Greece in the Council.

The basis of the Department's projunta stance was the familiar one of fear of loss of the NATO bases in Greece. The Department was naive enough to believe threats by semiofficial Greek sources that if Greece was ousted from the Council of Europe it might "reconsider" its membership in NATO. It chose to overlook the fact that the Council is a purely advisory body of parliamentary representatives that has never included the authoritarian government that has been associated with NATO and Portugal. It also chose to overlook the fact that the junta has strong security and economic interests in the maintenance of the bases which would make its departure from NATO extremely unlikely.

As events turned out, the Department miscalculated entirely. Its lobbying effort failed, and Greece was forced out of the Council. Not surprisingly, Greece decided to continue its NATO association.

Unfortunately, this was not an isolated incident. It reflects the basic attitude of the State Department at the working level. Department officials profess a desire for reforms by the junta, but they fail to convey any urgency or real determination. They seem more concerned with explaining away the junta's actions than with inducing constructive changes.

I am hopeful that Mr. Tasca's departure for Greece will signal a change of policy. I hope that he will be sent with new instructions for a tough stand toward the Greek regime's police state methods. I hope our State Department will become an effective advocate of reform in Greece.

A crucial test of U.S. intentions will be its decision on resuming regular military aid to Greece. It was most unfortunate that the Senate chose last week to override the ban proposed by the Senate Foreign Relations Committee on military assistance to the junta. The resumption of full military aid at this time would be a clear sign of support for the present regime's policies. Regular arms aid should be withheld until meaningful steps toward democratization are taken.

Our foreign policy must reflect something more than a mere chess game of power politics. It should embody our underlying commitment to humanitarian and democratic ideals.

The fundamental principles upon which our Nation was launched, if they mean anything at all, should be no less fundamental in shaping the relationship of our Government toward other peoples.

Where a great democracy has fallen, as in Greece, we must avoid policies that can be construed as support for those who strangled it.

Morality should not grind to a halt at our borders. We should not park our consciences when we pick up our diplomatic passports.

Mr. President, having said all this, I believe the withholding of approval by the Senate of the nomination of an ambassador to Greece 3 days before the Council of Europe met did avoid involving this country directly in that decision in the Council of Europe. I understand this was read with some meaning by members of the Council of Europe that at least the U.S. Senate was refusing at that time to take action that could be interpreted as support of the Greek junta.

I believe at this point it is in our interest to have an ambassador dealing at the highest level in Greece to present our views forcefully to the Greek junta and other elements or establishments of Greece that we want the Greek Government to move back toward democracy; that we do not attempt to dictate their form of government or attempt to tell them what change should be made, but we do say we will not support a government which engages in widespread violation of basic human rights of people. These violations of basic human rights in Greece by the junta are well documented.

Mr. President, under all these circumstances I withdraw my opposition to the nomination of Henry J. Tasca to be U.S. Ambassador to Greece.

Mr. MOSS. Mr. President, I congratulate the Senator from New York on his statement regarding the nomination of Henry J. Tasca to serve as our Ambassador to Greece. I differ with him somewhat on his conclusion as to the timing on this matter but I agree heartily with what he said about this matter.

I am one of those Senators who had a "hold" against the nomination for the very reasons discussed by the Senator from New York, but I thought the time of the pending action of the Council of Europe would have been most inopportune for the United States to confirm an ambassador to the junta in Greece.

This morning, therefore, I wish to announce I still object to the confirmation of Henry J. Tasca as U.S. Ambassador to Greece at this time because it is still so closely associated with the action that happened in the Council.

I do not oppose Henry J. Tasca because of his lack of qualification for the position. He has already distinguished himself as Ambassador to Morocco and through a fruitful career in the American Foreign Service.

I think he is eminently qualified. I want to underline this point: that I do not question his qualification, or his worthiness in any respect. I oppose the confirmation now, because I feel that for the Senate to act at this time to send an American of ambassadorial rank to Greece would be a blunder in timing.

There are a number of reasons why. I shall mention several.

Earlier this month, the Council of Europe expelled Greece from that organization. I know that the colonels in Greece say they withdrew. But the fact is that the Council voted to expel Greece at the end of this year on the charge that the Greek Government had failed to restore democratic freedoms, and the colonels withdrew rather than face the humiliation of being kicked out.

The Council of Europe is not an economic alliance. It is an association of democratic governments designed expressly to advance democracy and human rights. Their moral disapproval of the regime in Greece shows quite clearly how the people on the other side of the Atlantic feel about the military junta which holds that country in its tyrannical grasp. The Council abhors the present Greek Government. And furthermore, many of them feel that it is only America's apparent friendship for the regime—only our apparent support of the colonels—which keeps them in power.

For the U.S. Senate to confirm an ambassador to Greece hard on the heels of strongly expressed European disapproval of the regime would be little less than a slap in the face to many of our allies.

Second, according to no less an authority than former Greek Minister Constantine Mitsotakis, with whom I conferred recently, the next few months—possibly the next 3 months—offer the last opportunity for a restoration of the Greek democracy without a blood bath. This opinion is also shared by my good friend Elias Demetracopoulos, a distinguished European editor and a leader of the resistance movement against the junta in America, who accompanied Mr. Mitsotakis to my office.

The history and temperament of the Greek people practically assure us there will be an effort sometime in the future to force out the colonel's government—even if it drenches the country in blood.

No other people, on the face of the earth, understand more fully the desire of the Greek people for freedom, than do the people of the United States. Greece may have been the cradle of democracy, but we have made democracy work—and work reasonably well, for almost 200 years. The Greeks feel deeply their bond with us. They are relying on us now in their time of great travail.

Why give them cause to doubt our support—why douse their spirits and quench their thirst for freedom—by accrediting a man with the rank of Am-

bassador to the junta government. It would be an affront to the Greek patriots.

Third, since the Nixon administration has not yet come up with a policy on Greece, why do we need a man of ambassadorial rank there? America's affairs can well be handled by the competent career men already in our Embassy there. Must we fill the rank of ambassador right now?

Mr. President, in the 2½ long years since the military junta took over Greece, there has not been even one small step toward the restoration of a parliamentary government.

We hear stories every day about people being brutalized in courts, and in prisons. Civil liberties are dead. Normality and freedom and liberty and order and security are only words which the colonels use from time to time—they have no real meaning to the people.

I realize that sending an American ambassador to Greece does not necessarily mean that this country approves of the present government. But most certainly if we do not send an ambassador—if the United States would postpone action on confirmation of Ambassador Tasca for some of the reasons I have outlined, it would certainly be construed as an expression of our disapproval of the junta regime.

I suggest confirmation be delayed. It is time to stop showing cordiality and friendship for the colonels, to stop exchanging visits and honors with them, and to start openly showing some sympathy for the people who are striving to restore the democratic freedoms that we hold so dear in our own country.

The U.S. Senate should not at this juncture in history be in the process of confirming a U.S. ambassador to Greece.

Mr. GOODELL. Mr. President, will the Senator from Utah yield?

Mr. MOSS. I am happy to yield to the Senator from New York.

Mr. GOODELL. I want to express my gratification for the very fine statement the Senator has made.

We are in essential agreement. I think the only area where we may differ is on the question of sending an ambassador.

I agree with the Senator's comment that the next 3 months will be critical in Greece, that unless steps are taken to ease the repression there and move toward democracy, Greece may well enter into a blood bath and revolution, one that will be difficult to control, because revolutions never can be controlled.

I think it is imperative, under those circumstances, that we have an ambassador there at the highest level putting the pressure on the Greek junta, talking to the top leaders in Greece, expressing our concern.

I would emphasize that although the Council of Europe has expelled Greece, as the Senator has indicated, the European nations who are members of the Council of Europe have ambassadors to Greece in Athens and they are there, as I hope our Ambassador will be there, to express the deep concern of the peoples they represent over what is happening in Greece.

The record should be made clear, although the Senator and I differ on the timing of this approval, that I certainly, and I think the Senate, in approving the nomination—if that does occur—are not in any way indicating to the Greek junta our approval of their policies.

As a matter of fact, it is precisely the opposite.

I think that our Ambassador should now go there to indicate our disapproval at the highest levels.

The Senator, who has just spoken so eloquently, thinks that we should not send an ambassador because that would be a means to indicate our disapproval.

Thus, our only difference is in the way we express our disapproval of the Greek junta.

I thank the Senator from Utah for yielding to me.

Mr. MOSS. I thank the Senator from New York. He and I are in agreement that U.S. disapproval of the junta should be demonstrated. Our only difference is whether the signal has been adequately given by a rather temporary delay or whether it should be delayed further.

I am perfectly willing to acknowledge that such a signal has been given so that the people of Europe, and the Greek people themselves, understand that there is no degree of approval but, as a matter of fact, high disapproval of the regime of the junta over there, and that now we are sending our representative there to have a spokesman on hand to deal directly with the junta.

As I say, this may possibly be so, but I have felt that it is so close, still, to the action taken by the Council of Europe, that perhaps our disapproval should be underlined even more clearly.

One thing that disturbed me a bit in talking with Mr. Mitsotakis, and with others, is that there is a feeling among some of the Greeks that the United States has some sympathy for the junta; that, in fact, it has been said—rumors spread so easily—that the junta would not stay in power at all were not the Pentagon in league with it.

We know that that is not true, but I am wondering whether we should not send the signal in more clearly than we have, that it is not true that we support the junta in any way.

But in either event, I think having this colloquy on the floor and this expression made in the U.S. Senate is helpful indeed to try to get word to the Greek people that we have great affection and sympathy for the Greek people; we would like to see them have control of their own destiny and have democracy reestablished in their country; and we are hopeful that in some way we can help them back to controlling their own destiny democratically, without having a terrible blood bath, which may be imminent.

Mr. GOODELL. Mr. President, will the Senator yield further?

Mr. MOSS. I yield.

Mr. GOODELL. I think the Senator will agree with me that, in any event, Mr. Tasca should understand that the U.S. Senate wants him to go to Greece as an ambassador—if his nomination is approved—to express, in the strongest terms, our disapproval of the suppression and brutality occurring in Greece under the junta.

I think we can agree that whether the decision to send an ambassador to Greece was wise or not will be judged by the action taken by Mr. Tasca as Ambassador in Athens. If he goes over there and makes our voice stronger and clearer to the junta, then it will have been a valuable contribution in sending the U.S. Ambassador to Greece now.

I think the Senator and I would agree that, assuming the Ambassador goes, that is what we want him to do, and we hope the State Department and the President give him that kind of instruction.

Mr. MOSS. I heartily concur with the Senator and thank him for that expression.

I rather expect that the confirmation of Mr. Tasca will be confirmed. I hope there is not the least shadow of reflection of his ability or integrity coming from my remarks, because I think he is a fine, able man; but I concur with the Senator that, if he goes there, he should go there with a message, as strongly expressed as can be expressed, that we do not sympathize with the actions of the Greek junta; we sympathize with the Greek people and we want freedom and civil rights reestablished in Greece at the earliest possible time and without a blood bath.

Mr. GOODELL. If the Senator will yield, that point, I think, was made unmistakably clear the day the U.S. Senate reversed the decision on military aid to Greece; we immediately thereafter, and unanimously, passed a provision that decried what was going on in Greece and urged the Greek Government to move back to democracy. That was a unanimous action.

Mr. MOSS. Mr. President, I yield the floor.

Mr. BAYH. Mr. President, I listened with a great deal of interest to my colleagues from Utah and New York, and I find myself in complete agreement with their general thoughts. I see, once again, however, that it is possible for reasonable men to pursue the same goal by different means. I find, on weighing all of the facts, that my colleague from Utah, has made an equally persuasive case.

At this time, I, personally, am opposed to Senate consideration of the nomination of Henry J. Tasca as U.S. Ambassador to Greece. But I am inclined to lay aside my personal inclinations in the interest of Senate procedure.

I do not question the qualifications of Ambassador Tasca. It has been pointed out that he has served with distinction as Ambassador to Morocco and has proved his abilities as a diplomat during a long foreign service career. I oppose consideration of his nomination at this time for the same reasons I opposed the amendment of my distinguished colleague, the Senator from Connecticut (Mr. DODD), striking section 508A from the foreign aid authorization bill, as a demonstration to the Greek Government, the Greek people, and the world, that the Congress of the United States does not approve of the prac-

tices of the current military regime in the cradle of democracy.

This regime's policy of torture and denial of constitutional rights has been a matter of deep concern to me, not only as a U.S. Senator, but as a citizen of the United States. In a country where we take for granted those rights, it is difficult for us to imagine a normal political life without them. Yet the Greek people are now suffering from the deliberate denial of basic human and political rights.

I would remind the Senate once again, of the action taken November 18 by the European Commission of Human Rights, when it delivered a scathing report to the Council of Europe detailing its findings that the regime in Greece has allowed torture to be used against its political opponents "as an administrative practice" and that the regime has failed to prove its claim that the suspension of civil liberties had been justified by an internal emergency.

As has also been pointed out, on December 12 Greece withdrew from the Council of Europe but only when it became clear that she would be suspended until democracy and human rights were restored to the Greek people.

As I pointed out a moment or two ago, the only means available to the Senate to express its disapproval is to lay this nomination over for a short period of time. Then when we come back early in January, we could quickly confirm the nomination of this man, who is fully capable of pursuing the course the Senator from New York has suggested he should pursue and that, hopefully, he will. If he was not so inclined, I think, after reading the debate and being informed, he certainly will be. I appreciate, however, the unusual nature of this procedure and so I shall not press the matter.

Mr. President, would it be in order to address a parliamentary inquiry at this time?

The PRESIDING OFFICER. It is in order.

Mr. BAYH. As part of the advice and consent authority that is set forth in the Constitution, is it possible, in confirming the nomination of an ambassador, for the Senate to fix a time certain on which the confirmation of the nomination would take place?

The PRESIDING OFFICER. The Chair would be of the opinion that that would not be within the province of the Senate. The Senate has the duty at this time of passing on the confirmation, yes or no.

Mr. BAYH. May I address a further parliamentary inquiry?

The PRESIDING OFFICER. A parliamentary inquiry is in order.

Mr. BAYH. Is it possible for the Senate to fix any condition, such as a time at which the Ambassador would present his credentials? In other words, would it be possible for us to advise and consent with the stipulation that the credentials would not be presented before January 15, for example, as a display of our displeasure with the Greek regime?

The PRESIDING OFFICER. The Chair is advised that that would not be in order. The Senate has the right to confirm or reject. If it wishes to postpone consideration, it has that authority; but as long as it acts on a confirmation affirmatively, then it is within the province of the State Department to give the nominee his assignment.

Mr. BAYH. I appreciate the Chair's clarifying this point.

I realize that it would be possible for the Senate to move to defer consideration. After listening to the discussion between the Senator from New York and the Senator from Utah, though, the Senator from Indiana is inclined to follow the course of action expressed by the Senator from New York. I do not want it to appear that the Senate is refusing to cooperate with President Nixon in the formulation of his traditional foreign policy prerogatives. I wish it were possible for us to cooperate with the President and still indicate our displeasure with the Greek regime. It is not possible according to the Chair's ruling.

Mr. PELL. Mr. President, it is tragic that on the same day that Greece was forced out of the Council of Europe for its repressive policies and its practice of torture, the Senate voted to continue the authorization of military assistance to that unhappy country.

It was argued here on the Senate floor that we should not interfere in the domestic affairs of a friendly nation—and the definition of not interfering is that we should continue the authorizing of many millions of dollars of military support and weapons for that country.

My definition of not interfering is "doing nothing." But, I guess what we have now is the new Alice in Wonderland look—not to interfere means to have a massive aid program—to interfere is not to have such a massive aid program. Be that as it may, the net result of the actions of the Council of Europe and of our Senate is that the Greek people now realize that the Greek regime is abhorrent to the Western European democracies, but the object of acceptance and support by our own Nation.

From reactions I have already received, I understand that the United States is now, more than ever, identified by the Greek people as a supporter and an advocate of the junta. One immediate result of this action is the statement by Col. George Papadopoulos, the present Greek chief of government, to the effect that no elections will be held in the foreseeable future.

What a slap in the face to the United States is this announcement coming as it does, immediately after our action in the Senate that specifically authorized the continuation of military assistance, by knocking out my provision specifically denying continuation of such assistance in the committee bill. Now let it not be thought that we are turning the other cheek when, in a very few moments, we confirm the nomination of Henry Tasca as our Ambassador to Greece.

I am confident he will make a fine ambassador, but he certainly will have a difficult mission.

The Pentagon approves of the Greek Government as an efficient government and one which provides agreeable ports of call for our military forces. The executive branch of our Government has never vigorously expressed itself; as a whole it really has a "no policy" policy. Our Senate is divided as shown by the 45-to-38 vote last week. And our people as a whole have a justified revulsion to the Greek regime.

In voting for the nomination of Henry Tasca, I wish him luck in an exceedingly difficult position. May he have success in relaying the abhorrence of the American people for the practices of the recalcitrant Greek regime and in nudging it back onto the path of civilization, democracy, and freedom. And may he particularly succeed in reducing or—and this would be truly wonderful—in eliminating the use of torture by the junta as a matter of administrative practice.

Finally, in voting for the confirmation of Henry Tasca's nomination, I am following what I have always believed is the correct policy when it comes to having diplomatic relations with a foreign government: The more abhorent the regime, the more we dislike the regime, the more we disapprove of the regime, the more important it is to have top level representation at that regime's capital.

If we want to tangibly express our disapproval, let us not do so just in word, but let us off our aid, because by doing that, we hurt that regime; but by not having top level representation, we are simply cutting off our nose to spite our face, and I do not think this serves our national interest.

I ask unanimous consent to have printed in the RECORD the news story from Athens, headlined, "Greece's Premier Bars Early Vote: Defies Europeans," written by Alvin Shuster and published in the New York Times of December 16, 1969.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 16, 1969]

GREECE'S PREMIER BARS EARLY VOTE; DEFIES EUROPEANS; HE BRUSHES ASIDE COUNCIL'S CONCERN—SAYS REGIME WILL RULE INDEFINITELY

(By Alvin Shuster)

ATHENS, December 15.—Premier George Papadopoulos tonight ruled out any possibility of early elections in Greece and insisted that the aims of the army-backed Government must be met first.

In an unyielding speech, which made no mention of any new liberalizing measures, the 51-year-old Premier said that the Government would continue indefinitely to exercise all executive and legislative powers of the country. He said this was because "the people will it, because it is in their interest and because it is history's command."

Brushing aside the concern in the Council of Europe about the failure to announce an election date, Mr. Papadopoulos said: "This is a matter that concerns only us because it concerns our life and the life of our nation."

HE WARNS ALLIES

He warned Greece's Western allies to beware of the threat of democracy in their own nations. He said that Greece withdrew from the Council of Europe last Friday rather than be suspended because she could not take orders on how to run her affairs. Greece has become accustomed to bitterness from her allies, he added.

Mr. Papadopoulos, who led the army coup d'état on April 21, 1967, spoke to the nation on radio and television from the chamber once used by Greece's Parliament. It was an emotional address, delivered in high-pitched

tones before an audience of about 500, including Aristotle S. Onassis, the multimillionaire shipowner.

The Premier insisted that Greece now had a form of government that "in substance insures total freedom to the individual, except those working against public order and security." The people gave a mandate to the Government by their approval in September, 1968, of a new Constitution he said.

PREMIER LISTS GOALS

Most of the provisions of the Constitution dealing with civil and personal liberties remain suspended under existing martial law. The Government is now preparing a series of special laws aimed at eventual implementation of the constitutional provisions.

In discussing national elections, Mr. Papadopoulos said the Government would give one year's notice before elections were held to enable new political parties to be formed. He said that national elections would follow local elections, but he offered no timetable for local elections either.

As necessary requirements for elections, the Premier listed a series of goals. Among them was the reorganization of Government machinery, the "cleansing of social institutions" and improvements in the economic, social and political areas.

"Unless these are achieved and the country becomes healthy and capable of accepting the constitutional reforms, we shall not proceed to elections," Mr. Papadopoulos said.

HE TERMS REGIME A SAVIOR

Throughout the speech, Mr. Papadopoulos likened Greece to a ship whose "crew had become cowardly in a storm" and had turned to the armed forces for help. His Government merely wants to lead Greece to a safe harbor, he said.

"Yet some of our friends are treating us like pirates rather than saviors of a ship, either because they want to impose their will or out of solidarity with the old deposed crew," he said. "But the Greek people have always shouted 'hands off us' whenever foreign powers try to impose their will."

The Premier urged Greeks to buy fewer foreign goods in favor of more Greek products "as a sign of faith in your country." He also said that businessmen should be content to hold their prices.

"Public order and security," he said, "shall be preserved at the present level."

Mr. CHURCH. Mr. President, I commend the distinguished Senator from Rhode Island for his remarks. He has expressed my views so much better than I could express them that I simply associate myself with the address he has just made.

Mr. McGOVERN. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending question, in executive session, is whether the Senate shall advise and consent to the nomination of Henry J. Tasca as Ambassador Extraordinary and Plenipotentiary of the United States to Greece.

Mr. McGOVERN. Mr. President, I quite agree with the statement of the Senator from Rhode Island (Mr. PELL) with reference to the qualifications of the nominee, Mr. Tasca. I am sure that he is a man who will bring good qualifications to the appointment. But I should like the Senate to know that I was one of the Senators who joined with the Senator from Utah (Mr. MOSS), the Senator from North Dakota (Mr. BURDICK) and others in asking the leadership to hold up on this nomination for a period of time, not because I was interested in blocking the nomination, but simply to signify to the people of Greece and, indeed, to world public opinion, the concern that many of us have about the Greek military dictatorship that has, at least temporarily, destroyed democracy in Greece.

I think it is a great loss to the cause of freedom around the world that Greece, which has symbolized throughout history so much of the spirit of freedom and human dignity, has fallen under the control of the group of military dictators who brutally seized power some time ago.

I regret very much what I regard as a serious mistake by the Senate, a few days ago, in approving the amendment offered by the senior Senator from Connecticut (Mr. DODD) which in effect lends American approval to this undemocratic military regime in Athens, by extending American military aid. I do not know of anything that we could have done that would have been more unwise than using American military power and the moral endorsement behind that resolution to signify to the world that, somehow, we are interested in preserving this regime that is now in control in Athens.

I very frankly hope that regime will be swiftly replaced, that it will be a short-lived experience for the people of Greece, and that a more democratic system can be restored in that part of the world. It is the sheerest kind of hypocrisy for this great country of ours to talk about advancing the cause of freedom, and then use the tax funds of the people of this country to maintain in power the kind of undemocratic, unfree, and unrepresentative regime that now holds the people of Greece in its grip.

I very earnestly hope that this Ambassador whose nomination we are about to confirm will use whatever influence he has to keep our Government fully informed on the realities of what is taking place in Greek politics today, so that we will not make the kind of tragic errors in the future that we made on this floor a few days ago when we called for the extension of American military support to that kind of a government. What we did is a defeat for freedom; and I vote for this ambassadorial nomination only on the grounds that I hope that by maintaining diplomatic relations we will come to a better understanding of the tragic forces that are now in play in what was once a free nation.

Mr. PELL. Mr. President, will the Senator yield for a question?

Mr. McGOVERN. I yield.

Mr. PELL. Was the Senator as struck as I was, in the course of that short debate, by the weird argument I have just cited, wherein one of our colleagues said we ought to be very reluctant to appear to be dictating to or meddling in the internal affairs of other governments of the world? Apparently his definition of not interfering or meddling is that we should continue this huge military assistance program to Greece.

However, if we stop this military assistance, then we are meddling and interfering. What can we do to let the American people know that we are interfering by sending military assistance?

This is the point that the press and the country has lost sight of, that we have a new Alice in Wonderland definition of interfere. And under this new definition, to interfere is not to send massive support but to let a nation alone, and not to interfere is to send massive support.

Mr. McGOVERN. Mr. President, I could not agree with the Senator more.

It is an indication of how far we have come in assuming that military aid to right-wing governments represents an investment in freedom. It does not represent an investment in freedom. It represents a setback for it.

It does not represent an investment in the cause of self-determination.

The same logic that the Senator has brought out here so well is one of the things that has concerned me for many years about our involvement in Southeast Asia.

We talk about our interference there as advancing the cause of self-determination. The truth of the matter is that the presence of American military might in such overwhelming force in Vietnam is the very factor that is preventing the process of self-determination from asserting itself. It is preventing the local indigenous political force from asserting itself in South Vietnam.

And that is true with reference to the point the Senator makes in Greece. I commend him for making what seems to me to be a valuable contribution to our understanding.

Mr. CHURCH. Mr. President, will the Senator yield?

Mr. McGOVERN. I yield.

Mr. CHURCH. Mr. President, does not the Senator feel that our policy toward Greece is a rather frightening example of how close we are coming to the use of "doublethink" as described in Orwell's "1984." The language we use to label our policies is the very opposite of their reality. This is true of Greece and, as the Senator points out, the same tendency is to be found in our semantic treatment of our massive intervention in Vietnam.

More and more, we use words that are, in fact, the opposite of reality. And this was the very phenomenon forecast by Orwell in projecting the kind of totalitarian state he anticipated would overtake us by 1984.

Sometimes I think we are halfway there, and moving ever more rapidly in that direction.

Mr. McGOVERN. I think the Senator's point is well taken with reference to double thinking.

We have seen the same kind of phenomena with reference to our domestic situation here in terms of national priorities.

The Senator from Rhode Island and the Senator from Idaho know that we have just come from a discussion as to what should be the proper response to the President's statement that he is going to veto the appropriation bill on health, education, and welfare on the ground that it is inflationary.

Congress, as I understand it, has increased by $1.5 billion the amount of appropriations for these various programs that relate to the health, education, and welfare of the American people. And that is said to be inflationary. Yet, when we come to the military sector of the budget, the Congress of the United States has reduced the amount requested by the President by more than $5 billion.

Presumably, that is an anti-inflation-

ary effort on the part of Congress. We have reduced and taken out of circulation some $5 billion that would otherwise have been spent for military purposes. Yet, we are accused of adding to the inflationary pressures in the country because we have added a modest amount to the programs designed to improve the health, education, and welfare of the American people.

This relates directly again to the point that the Senator from Rhode Island and the Senator from Idaho have been making, that we have come to the viewpoint where we think a military investment of any kind, if it is an investment in a military dictatorship that suppresses the freedom of its own people, represents an investment in the cause of freedom and that money spent to improve the quality of our own people is dangerous and inflationary. That is double thinking.

Mr. CHURCH. I concur wholeheartedly.

Mr. PELL. Mr. President, is it not the responsibility of a free press to express clearly what the thought is? And when we use "Alice in Wonderland" looking glass talk, it seems to me that there is an obligation to tell the taxpayers exactly what is meant so that when someone says, "We shall not interfere or meddle in the affairs of another nation," the story should say, "By not interfering is meant sending massive military assistance to that nation."

I think the people as a whole, if they knew the Alice in Wonderland chatter that we sometimes engage in, would laugh at us. And that would bring us back to using the words we should use.

Mr. McGOVERN. Mr. President, that would show that foreign aid is getting "curiouser and curiouser every day."

Mr. PELL. Mr. President, I would make that point that we in public office are opinion formers and that those who interpret our words have a responsibility to clarify some of the doubletalk.

THREATENED VETO OF AN APPROPRIATION BILL

Mr. HARRIS. Mr. President, as in legislative session, I would like to say a few words about the President's threat to veto the HEW appropriation bill and also to veto the tax reform bill.

Mr. DOLE. Mr. President, a parliamentary inquiry.

Mr. HARRIS. Mr. President, I believe I have the floor. I did not yield it for that purpose. If the Senator wants me to yield for a question, I will be glad to do so.

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Kansas for the purpose of making a parliamentary inquiry?

Mr. DOLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOLE. Mr. President, do I understand that we are in executive session?

The PRESIDING OFFICER. We are in executive session. A Senator can speak as in legislative session on request.

Mr. DOLE. Mr. President, may I inquire as to the pending business?

The PRESIDING OFFICER. The pending business is the confirmation of the nomination of Mr. Henry J. Tasca to be Ambassador Extraordinary and Plenipotentiary to Greece.

Mr. HARRIS. Mr. President, the consumer price index for November was just announced. It showed the steepest jump in consumer prices since last June.

The actual increase was 0.5 percent. The seasonally adjusted annual rate for November was 7.2 percent.

Mr. President, the steepest increase was in food. The food increase was 0.7 percent, with particularly high increases in the consumer price index for vegetables, eggs, clothing, homeownership costs, and services.

Also, the wholesale price index has just been announced. And it shows that in the wholesale price index we have just seen the biggest jump in 6 months.

It includes a 3-percent increase in food costs. Eggs, for example, went up 23 percent. Turkeys, just in time for Christmas, went up 6.7 percent. Vegetables went up 34 percent on the wholesale price index.

There is no question that inflation is a tremendous worry for this country. It is one thing which should concern every one of us. However, I do not think that the President of the United States has properly placed the issue before the people of the United States.

The Congress of the United States has been fiscally responsible. It has lowered the total appropriations on all appropriation bills which have been sent to it by more than $5 billion less than the President's budget. More importantly, this Congress has decided to begin to get the priorities of this country straight by reducing by more than $5 billion the amount of money the President asked for military appropriations, and it decided that it wanted to do more for the people of this country in health and education by raising that appropriation by approximately $1.5 billion.

I say that if the President of the United States wants to veto that bill, then Congress ought to override his veto, either now or when we return after the first of the year.

I am proud that the conference committee on the tax bill, according to this morning's report, has that bill about in balance in revenue raised and revenue spent with the bill which came to us from the House of Representatives and to the Senate floor from the Finance Committee, of which I am a member.

I am proud, too, that the conference committee on the tax bill has decided to raise the personal exemption and has decided to raise social security by 15 percent.

In his recent press conference, the President said that if those two items were in the bill, he would veto it. I say it should be sent to him. If he does veto it, that veto should be overriden by Congress.

Mr. President, I hope the President will use the influence of his office, as he has not done up to this moment, in wage and price decisions. I hope he will at long last use the influence of his office to bring down these scandalously high interest rates.

We will have a conference report before us today, handled by the distinguished Senator from Wisconsin (Mr. PROXMIRE), which will provide the President additional power to hold down interest rates—powers similar to those which were given to the President during the Korean war. The President of the United States, unfortunately, has opposed those additional powers for himself. I hope that once we give him those powers, as I think we will do today, he will use them to bring interest rates down—interest rates which have risen to the highest level in 100 years and which themselves are the greatest fuel for the fires of inflation that presently exist.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. HARRIS. I yield.

Mr. DOLE. First, I commend the Senator for recognizing that we do have inflation. We have had it, as the Senator knows, for several years.

Mr. HARRIS. May I say that I have spoken on this issue practically every day, and I am glad that the Senator from Kansas also is concerned about inflation. I do not recall how he voted on every amendment when the tax bill was before the Senate. Most of his colleagues rather overwhelmingly voted against additional tax reforms which would have increased the revenue raised by that bill and for most of the measures which lost revenue and were adopted.

But I am glad to say that it seems from this morning's press reports that the conference has gotten that bill back in about the same kind of revenue spent-revenue lost balance that existed when it came from the Finance Committee.

Mr. DOLE. Let me pursue my question. I recognize that the Senator from Oklahoma may be speaking now as a Senator and also as the chairman of the National Democratic Party. I conclude, therefore, there might be a bit of politics in the statement just made, but since——

Mr. HARRIS. May I say on that point that I would not think there is any more politics in inflation from our side of the aisle than perhaps from the other side of the aisle.

I think that the President has not been fair in what he said about the inflation which presently exists in this country and which he said he was going to do something about, but which to this moment is worse—steep climbs in the Consumer Price Index and the Wholesale Price Index just out, interest rates still up. Not enough being done by the President, that I can see, about those problems, except trying to shift the blame to Congress, which I think cannot be done under the facts, since total cumulative appropriation bills to this date, as has been pointed out on the floor earlier today, are more than $5 billion less than the President asked us to appropriate.

Mr. DOLE. My question, after that statement, is this: Assuming that the Senator recognizes there has been inflation not just since January 20, but for several years and that the President inherited a deficit of about $30 billion in the last couple of years of the Senator's administration, what does he suggest be done to halt inflation besides indicating the President has some omnipotent power with which he can stop inflation? What are the Senator's suggestions?

Mr. HARRIS. I will go back over it for the Senator from Kansas.

Mr. DOLE. I just asked for the Senator's views.

Mr. HARRIS. I will be glad to go back over it.

I invite the Senator's attention to every issue of the RECORD for the last 5 days. For example, the other day I put in the RECORD the reports concerning two members of the Federal Reserve Board which point up that the present policy of the Federal Reserve Board, which has been supported by this administration—the traditional tight money policy, which has raised interest rates to their highest level in a hundred years—is a ruinous policy and is likely to lead us into even more difficult economic times unless it is reversed.

The President of the United States, as so many noted economists have said in recent months, is the place where the public interest must be announced. Even Prof. Milton Friedman, a man who places in my judgment, too much emphasis on monetary policy, feels that this administration must loosen up this tight-money policy or it is going to lead us into much tougher economic times.

A conference report will come to the floor very soon today which will, over the objections of this administration, grant the administration additional power over interest rates. I hope the Senator from Kansas will support that bill and that, with those powers granted, the President will then begin at last to bring down the interest rates.

Furthermore, virtually so many economic experts in this country believe that the President long since helped to increase the inflationary spiral in this country and the inflationary pressures in this country by announcing, before his inauguration and after his election and inauguration, that he would, by and large, pursue a hands-off policy in wage and price decisions. It seems to me that that is a rather incredible position for a man to take who had suggested to the country that he was going to be an activist President. I think we need an activist in this field.

Mr. McGOVERN. Mr. President, will the Senator yield?

Mr. HARRIS. I yield to the Senator from South Dakota.

Mr. McGOVERN. I should like to make this observation. Some suggestion has been made about the Senator from Oklahoma raising this issue in the context of political overtone. The truth of the matter is that the President laid down this issue when he threw down the gauntlet and accused Congress of being indifferent to the problems of inflation.

The truth is that Congress has had one way of dealing with inflationary pressures, which is to reduce excessive military spending by more than $5 billion.

The President has suggested another way to deal with inflation, which is to deal with it by fighting it at the expense of the poor, by fighting it at the expense of education, by fighting it at the expense of health and the problems of the older people in this country.

That is what this issue is all about. It is a question of whether we are going to save $1.5 billion, as the President has suggested, by vetoing a bill that increases the amount he requested for such programs as hospital construction, mental health, combating air pollution, cancer research, heart research, elementary and secondary educational, and vocational education. All those items, which have been approved by Congress, add approximately $1.5 billion above what the President requested.

But I suggest to the Senator that every one of those investments, far from adding to inflation, actually will, in the long run, combat inflation.

For example, I think it was the Senator from Texas (Mr. YARBOROUGH) and the Senator from Washington (Mr. MAGNUSON) who pointed out, in the caucus that has just been held on the majority side of the aisle that one of the reasons why we have inflation in this country today is the swollen cost of medical care. One Senator told about his wife going into the Georgetown Hospital for a checkup for some 2½ days and getting a bill for $661. I understand the reason for that cost is that there is a shortage of hospital space, there is a shortage of doctors, nurses, research personnel, and medical personnel of all kinds.

By cutting back on the investment we are making in breaking that bottleneck of medical shortages, the President, in effect, is asking us to maintain that scarce availability of medical services that is responsible for the inflated costs. I think the investment we are making in medical research and hospital construction, the research to find an answer to some of the terrible diseases, such as cancer and heart disease, is an investment that will reduce the costs the American people are paying.

The same thing is true with respect to our investment in education. It is not inflationary but it will help our people become more productive, more creative, and less dependent on welfare in the long run. I think people of this country should understand very clearly what is at stake.

It is not a question of who is for inflation or who is against inflation. The question is, What is the best way to combat inflation?

I think Congress has taken proper action to scale the excessive and swollen military budget. We have increased the budget in those areas that improve the quality of life for the people of America. As far as I am concerned, I am willing to stand on that issue. I hope this message goes across to the country loud and clear.

Mr. HARRIS. I thank the Senator. I rose for the purpose of commenting on the consumer price index just announced this morning which showed the steepest jump since June. One of the items that showed the highest increase was the cost of services—health services, for example. As the distinguished Senator from South Dakota pointed out, Congress has decided it wants to change the priorities and to do more in the health-manpower field, as the bill would do, which the President threatens to veto.

But I wish to emphasize what the distinguished Senator has just pointed out. Even though we have increased appropriations in this field we have reduced other appropriations, such as more than a $5 billion reduction in the budget in military expenditures, and we have voted reductions of more than $5 billion in total appropriations below what the President asked us to spend.

Mr. McGOVERN. Mr. President, will the Senator yield on that point?

Mr. HARRIS. I yield.

Mr. McGOVERN. One Senator asked the staff of the Committee on Appropriations to figure out the total reduction in all appropriation bills, not just the military bill, but all appropriation bills. How much has the Senate reduced those total appropriation bills below the amount requested by the President? That figure is $5.79 billion. In other words, almost $5.8 billion represents the total reduction in all the appropriations below the President's request. This, it seems to me, is irrefutable proof that Congress has been responsible in facing up to the problems of inflation.

The only question is our judgment about where those cuts should have been made. Frankly, all that $5.7 billion represents cuts in military spending, as the Senator knows, but what is almost another $1 billion was cut from programs other than the Labor-HEW appropriation.

I believe the Senate demonstrated in its overwhelming vote we feel it cannot and should not be cut if we are going to meet our responsibility.

Mr. HARRIS. I agree with the Senator.

Mr. PELL. Mr. President, will the Senator yield?

Mr. HARRIS. I yield to the Senator from Rhode Island.

Mr. PELL. Would it not be correct to say that the rate of inflation in the past month—and inflation is a cruel tax on the unfortunate American people and taxpayers—has been pretty close to twice the monthly average of the 8 years prior to this year.

Mr. HARRIS. The Senator is correct. Prior to the announcement this morning, the preceding Consumer Price Index announcement showed the consumer price index on meat, fish, and poultry, for example, went up in the first 8 months of this year almost as much as in those entire preceding 8 years combined. Now, we have just seen an announcement this morning which shows the latest Consumer Price Index had the steepest climb since June.

Mr. PELL. I thank the Senator for his reply. It is a telling and a very simple statistic. During the last 8 months it has been greater than it has been in any similar period in the previous 8 years.

Mr. HARRIS. Almost as much.

Mr. PELL. Almost.

I wish to make another point. I wonder if the Senator agrees that in fiscal terms or in the financial world one often hears of a prudent man policy. When one is a trustee, the prudent policy is to invest in those forms of economic activity which will have capital growth, as well as immediate return. What we are talking about here is capital investment concerned with human beings as in education and health, which increases production and longevity.

Those are true capital investments, which have more long term returns in capital growth than investments in hardware of one sort or another. An excellent example is the money spent on the GI bill after World War II, which has al-

ready produced more in tax revenue alone because of the increased earnings of those persons who were benefited by the program. I submit a query to the Senator. Is it not the prudent policy to invest in human resources as opposed to hardware?

Mr. HARRIS. I think the Senator put the question very well. Further, the fact that the cost of living has continued to rise is very much bound up with the need for a 15-percent increase in social security. The fact that prices have continued to rise is very much bound up with the need for an increase in the personal exemption. The cost of living has gone up two and a half times since the original $600 exemption was written into the law, and yet the President said he would veto a bill which included both an increase in the personal exemption and a 15-percent increase in the social security. I say let him do so. He said he was going to veto a bill which increases health and education services, antipollution programs, and other social expenditures by about $1.5 billion, but nevertheless is a part of total fiscal action by Congress which reduces the overall total budget by more than $5 billion. I say let him do so. That is an issue which can be joined.

If he does veto those two bills in preference to what we have done—reducing, for example, military expenditures by more than $5 billion, resetting and reorienting the priorities of this country, speaking out for the aged, speaking out for the schoolchildren, speaking out for those involved in health and social security, speaking out against pollution of human environment, and speaking out for the working men and women of this country who need that increase in the personal exemption, I say let him do so, and the Congress should override those vetoes now, or after we come back after the first of the year, and join those issues because I think they are good ones to be joined.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. HARRIS. I yield to the distinguished Senator from Kansas.

Mr. DOLE. Mr. President, I can make a political speech on my own time but do point out the President is making an effort to erase the mistakes of the past 8 years and two previous administrations. It takes some time. The Senator from Oklahoma would like to have seen more done this year, but it may take 11 or 12 months, or perhaps 18 months, 24 months, or 3 years, to undo some of the damage done in 8 years.

Mr. HARRIS. If I may interrupt the distinguished Senator, the Senator keeps saying, "Give us some time; give us some time." I say, "For heavens sake, one-fourth of the term to which this President was elected has now expired, 1 full year."

The other day I had printed in the CONGRESSIONAL RECORD—and I now invite the attention of the Senators to it—a detailed report of the optimistic statements we have had from time to time by Dr. Arthur Burns, Secretary David Kennedy, and other spokesmen for this administration.

It reminds me of saying, "prosperity is just around the corner," when they have been saying, "interest rates are about to go down, that is just around the corner; prices are about to go down, that is just around the corner."

I listed these administration predictions in the CONGRESSIONAL RECORD from an article written by Clayton Fritchey, and I invite the Senator's attention to that listing.

At some point in time, the people of this country are entitled to action from the Chief Executive, and that is what I was calling attention to this morning, as I rose to comment on the Consumer Price Index, just announced, which, rather than showing prices stabilizing, as the administration has continually for the past 6 months predicted, shows, once again, that the Consumer Price Index has gone up—has made its steepest jump since June.

It is time for action. It is not time for raising phony issues, for passing the buck to Congress.

President Harry S. Truman, one of the great Presidents of this country, who grew up and now lives near the home State of the distinguished Senator from Kanass, and mine, had a sign on his desk—as the Senator so well knows—"The buck stops here."

I think that the American people are saying that now to the President of the United States.

Mr. DOLE. Mr. President, will the Senator from Oklahoma yield briefly?

Mr. HARRIS. I yield.

Mr. DOLE. My only point is, let us forget about the partisan overtones and recognize that we have a shared responsibility—the Congress and the executive branch—to do something about inflation, and to recognize it. Everyone in the Senate recognizes or should recognize the problem we have.

It is fine to say that inflation has worsened more in the past 11 months than in the previous 8 years, but that is not accurate nor does it solve the problem.

It is fine to say that there should be an increase in social security. We all want that.

It is fine to say that there should be an increase in personal exemptions—we all desire that.

The point is that, even more important to our senior citizens and all other Americans, regardless of ideology, is to stop inflation because the sacrifices they are making through the inflation route will be more severe than any I know of.

Accordingly, I would only call upon the Senator from Oklahoma to recognize that we cannot have both increased spending and lower taxes.

I certainly commend President Nixon for having courage. He has the hard choice to make. The buck does stop at his desk, as the Senator pointed out.

But when the Senator rises on the floor of the Senate to denounce the President, when he rises on the floor of the Senate to make all sorts of comments and decisions, he does not have to bite the bullet. He does not have to make the tough decision regarding a possible veto.

Thus, I would say again that there should be a recognition by all in the Senate that to compare inflation to last week, last month, last year or 5 years ago is meaningless unless we do something about it. Let us not fault the President because he has the courage to veto a measure in an effort to halt the inflationary spiral. Let us not fault the President for recognizing and standing up to inflation. The Senator from Oklahoma knows that inflation will have greater impact on those living on fixed incomes, especially our senior citizens, than what we may or may not do with reference to any one bill or program.

I say again it is one thing to rise on the floor of the Senate and make a political speech by denouncing the President—whichever administration it may be—but it is quite another to share the responsibility.

I believe that we all have a part of that responsibility as Members of this body.

Mr. HARRIS. Mr. President, the Senator from Kansas is very defensive, and rightly so, it seems to me, about what has been said here about the economy.

I rose simply to call attention to the Consumer Price Index which was announced today, and to indicate my concern about continued inflation despite the regular and optimistic reports and predictions from this administration that we read.

So, I simply would say that each of us in this body has a responsibility in that regard. I think we are exercising it very well with the kind of priorities that Congress has set. I had simply said that. The Senator rose and asked me to say what I thought should be done, and I said what I thought should be done by the Chief Executive in response to the Senator's question.

I say again that if the President makes the choice to go against the old people who need that 15-percent increase in social security, against the workingman who needs that increase in the personal exemption because of increased inflation, to go against the Congress in the way it has reordered priorities by reducing military expenditures by more than $5 billion and increasing expenditures in such vital areas as health, education, antipollution, and so forth, by $1 billion and a half, but still leaving a budget with a net decrease of more than $5 billion below what the President asked—if he decides to make that choice, that is his choice and the issue is joined.

Mr. TYDINGS. Mr. President, will the Senator from Oklahoma yield?

Mr. HARRIS. I yield.

Mr. TYDINGS. Would the Senator not agree that the President and the Vice President made great use of the communications media, particularly television, for the purpose of demonstrating their faith and interest in the so-called silent majority? They have utilized the finest techniques of Madison Avenue to get their so-called message across, that they are interested in the typical American family.

I ask the Senator from Oklahoma whether, when the issue comes to the dollars and cents of tax reform and tax relief to the average American family as opposed to the special interests, when it comes to the issue of some small increase in domestic spending which affects the

average American family, whether the President and the Vice President are not talking, on the one hand, out of one side of their mouths to incur favor, yet, out of the other side, when we get down to tax reform and tax relief and the actual fight against inflation, they are pulling the rug out from under the average American family and turning their backs on them?

They come up and defend on the floor of the Senate the so-called tax reform proposal which elicits 25 percent of a dollar tax relief to those with $20,000 income and above, and then they turn around and fight on the floor of the Senate an increase in the exemption from $600 to $800 which would help every middle-income family in the United States.

They say on the one hand that they will veto a $1 billion-plus increase in the HEW budget because it is inflationary, and yet they give no credit whatsoever to the Senate which has reduced $5 billion from the President's request in defense appropriations.

I ask the Senator from Oklahoma how can they justify to the American people such completely opposite statements on one side and an action on the other?

Mr. HARRIS. I do not think it can be justified. I think the Senator has stated that rather well. I do not believe there would be any major tax reform, nor would there be the kind of overdue tax reduction which has overburdened the lower- and middle-income taxpayers, except that Democrats stood together and demanded there not be an extension of the surtax unless there was also tax reform and tax reduction.

I believe that those are issues which are critical issues for the people of this country, as are the issues of increased social security, the human environment, health, and education, for example.

Mr. TYDINGS. I ask the Senator from Oklahoma, would not the Senator agree with me that so far as coming to grips with the problem of inflation in this country is concerned, we have really nothing but lipservice from the administration, as well as the failure of the administration to exercise leadership either with big business or with big labor in a manner which his three predecessors, Presidents Eisenhower, Kennedy, and Johnson did, the sole reliance being the raising of high interest rates with Fed? Would the Senator not agree that this puts all the burden, or nearly a majority of the burden of trying to curb inflation on the homebuilding industry in the United States and, really, rather than curbing inflation is increasing inflation, and the longer the administration fails to take leadership in this area, the worse the inflation is going to become?

Mr. HARRIS. The Senator is quite right. "Credit crunch" and "tight money" have become words as familiar to the U.S. public as the name of the Vice President. Economists as disparate as Walter Heller and Milton Friedman have warned that the extremely restrictive monetary policies of the Federal Reserve Board, which have reduced the growth of the money supply to zero, should be eased.

Friedman, a leading Nixon economic adviser, is especially pessimistic:

> We are heading for a recession at least as sharp as that in 1960–61. There is more than a 90% chance of that. There is a 40% chance of a really severe recession, such as occurred in 1957–58, when unemployment reached 8%.

The potential home buyer feels the credit crunch when he tries to finance a loan, with mortgage interest rates running about 15 percent higher this year—a high interest rate which the average homeowner will carry until he completes his payments 20 or 30 years from now. And the U.S. Government now finds itself as much a victim of tight money as the buyer of a $25,000 home. This year Congress set a legal allowance of $2 billion for uncontrollable, built-in increases in expenses. Increased interest cost on the public debt alone has mounted by $1.5 billion—using up 75 percent of the limit Congress set. These increased costs will ultimately be borne, of course, by the average U.S. taxpayer. Further, the President himself has pointed out that the Government faces additional costs because of "a potential shortfall in the sale of Government financial assets, due to the persistence of high interest rates."

Despite the administration's stringent monetary control, big banks have found ways to circumvent the restrictions to meet the demands of large corporations which were willing to pay exorbitant interest rates and priced the small borrower, the small businessman, local, State, and even the Federal Government, out of the marketplace.

I wholeheartedly support the action of the House of Representatives in passing interest and credit controls devised by Chairman WRIGHT PATMAN and his Banking and Currency Committee. These Democratic initiatives will help lower interest rates, fight inflation, assist the housing industry and small business, and help provide more jobs. The conference report on the bill will give the President power to authorize controls over extensions of consumer and business credit during times of inflation—controls necessary to relieve the current cruel interest rates. The President has not yet used the full influence of his office in moderating price and wage spirals and has, curiously enough, opposed this bill which will give him greater power to deal with high interest rates. I hope that he will decide to use these legal measures when they are passed by the full Congress.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. HARRIS. I yield.

Mr. DOLE. In these discussions we tend to forget the item of the Vietnam war, which was left on the doorstep of the present President of the United States on January 20, 1969. That has had some impact and it, too, is a household word. This. I might add, is another way President Nixon is exercising his "veto." He is trying to end the war in Vietnam. Under his leadership, we may get that done. When it is done, there may be additional money for the projects the Senator has mentioned and perhaps there will not be further discussion about who is responsible for inflation.

We can select what is favored by one Senator, or one issue, but let us take a look at the No. 1 issue, which is the war in Vietnam. Senators on both sides of the aisle will agree that, by and large, President Nixon has dealt with it very successfully—not always with the cooperation of Senators on both sides of the aisle, I might add—but he has dealt with it successfully thus far.

If we were all to use the same zeal and cooperation, with the support of the American people, on the war on inflation as we have on the war in Vietnam, we might bring it to an end.

It is disturbing and discouraging to this Senator that some conveniently forget the war in Vietnam when talking about inflation and costs. So do not forget the war in Vietnam President Nixon inherited on January 20, 1969.

Mr. HARRIS. Mr. President, I note that the Senator has apparently given up trying to argue about inflation and interest rates and has decided instead to talk about some other subject.

Mr. PELL. I wonder if the Senator would give any thought to really moving from talk to wage and price controls, which none of us want to see, but which may be necessary for the protection of the victims of inflation and might seem to be the solution.

The PRESIDING OFFICER. Does the Senator from Rhode Island wish to seek the floor?

Mr. PELL. I beg the Chair's pardon. Mr. President——

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Would the Senator from Kansas have any reaction to the thought of having wage and price controls as being a means of moving from talk and from various ideas into something that would really stop inflation, which is, as has been pointed out, the cruelest tax that faces our American people?

Mr. DOLE. I think that is something to consider. It is a little alien to those on this side of the aisle. We do not like Federal controls, but I say, in all sincerity, it may come to that.

HENRY J. TASCA

Mr. DOLE. Mr. President, I ask for the yeas and nays on the confirmation of the nomination.

The PRESIDING OFFICER. The yeas and nays have been requested on the confirmation of the nomination of Henry J. Tasca to be Ambassador to Greece.

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The clerk will call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded, so that I may proceed.

Mr. PELL. I withdraw my request.

The PRESIDING OFFICER. Without objection, it is so ordered.

H.R. 11959, VETERANS EDUCATIONAL NEEDS

Mr. CRANSTON. Mr. President, I ask unanimous consent that I may proceed for more than 10 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I would like to speak on a matter directly analogous to the matter that we have just heard discussed on the Senate floor, the threatened cuts in the HEW budget. We face a similar slash in education and health benefits for the men who have fought for our country in Vietnam and elsewhere and are not now being given the level of education and health care that they desperately need. To deprive them of this for the same reason—because we have to make sacrifices to combat inflation—and specifically to ask men who have fought in Vietnam to now make another sacrifice at home in the war against inflation I believe to be heartless, unjust, and unacceptable.

I would like to speak briefly on the exact situation that our country and these veterans are presently facing.

Specifically, I am reporting to my colleagues in relation to H.R. 11959, the House bill covering veterans' educational needs, which was passed by the Senate on October 23 with an extensive substitute amendment.

After the passage of the substitute by the Senate 7 weeks ago, the House yesterday repassed the bill, substituting provisions of House-passed bills for the Senate substitute. It rejected virtually all significant parts of the Senate's special educational package for high school dropout veterans and only slightly increased its 27 percent GI bill rate increase up to 30 percent.

The House also failed to retain Senate retroactivity of rate increases. The House was offered no alternative to this watered-down package.

The chairman of the Senate Committee on Labor and Public Welfare, the distinguished Senator from Texas (Mr. YARBOROUGH), and I yesterday asked the Senate to disagree to the House amendment and appoint conferees. This was done. Then, at once, I went off the floor and called the chairman of the House committee, requesting a conference on Friday or Saturday. The Senate conferees were ready to meet day and night, if necessary, to reach agreement on this vital legislation before our Christmas recess.

But, to my regret, the chairman of the House Veterans' Committee said that the House Members could not meet in a conference now; that we would have to wait until after Congress reconvened on January 19.

Unfortunately, this delay will affect hundreds of thousands of deserving Vietnam veterans, war orphans, and widows trying to pursue GI bill education and training with a grossly outmoded rate structure.

The Senate does not want to accept for them, and I am convinced that they themselves do not want to accept, a poor substitute package which fails to restore comparability to Korean GI bill rates which were available to veterans of that war, and which fails to provide retroactive increases back to the first of the school year, and which fails to propose any substantive programs to attract and assist dropout veterans—almost 25 percent of all separatees—to take advantage of GI benefits.

It is basically the President of the United States, not the House of Representatives or the members of its Veterans' Committee, that is responsible for this delay.

I categorically reject the President's expressed view that the Senate rate increase should be denied because of the war on inflation. The hint of a veto, if we passed a measure restoring aid to the Korean level, like the direct threat of a veto of the analogous HEW appropriation bill made by the President last night, apparently influenced the House's action. I understand the concern of House Members. A veto would mean another, even longer delay, in giving to Vietnam veterans the aid they need to get back to school. However, the President's approach, in effect, asks for double sacrifices from men who have fought our battles abroad.

First they made the sacrifice of fighting in Vietnam. Now that they have come back home, they are asked to make another sacrifice to help stem inflation that comes directly out of that war itself.

I do not believe Congress wants these men sacrificed on the altar of the administration's policies to combat inflation caused directly by the war these men were fighting. That makes sense to none of us.

Finally, let me make abundantly clear that GI bill education costs, like Veterans' Administration hospital and medical care costs, must be counted completely as a cost of waging war.

I do not hear anyone say, "Deny our servicemen the bullets and mortars and armaments they need to wage the war." Yet the administration is willing to pursue policies which discriminate against Vietnam veterans and deprive them of our paying the cost of the war that relates to their educational needs.

Why should we do less? I ask the Senate, why should we do less for Vietnam veterans than we did for Korean veterans? Are we discriminating, for some reason? Because this is an undeclared war? What reason has been advanced? I have heard none. The 46-percent increase the Senate bill provides in GI benefits would mean only that we would provide for Vietnam veterans the exact level of educational aid that we gave to Korean veterans.

Hearings which the Veterans' Affairs Subcommittee is presently holding indicate that not only Vietnam veterans, but all veterans—veterans of World War I, World War II, and the Korean war—are being shortchanged at present on first-rate medical and hospital care in veterans hospitals. This is totally intolerable. It cannot be countenanced.

Chairman TEAGUE in the House of Representatives has waged a superb battle in an effort to close this medical care gap. He has established how great the gap is in many respects.

In our hearings we are now finding some new evidence of incredibly bad situations developing in terms of the medical care we are not providing to men who were badly wounded in Vietnam, or men who were wounded in any of the wars our Nation has fought.

We join with Chairman TEAGUE in this effort. We pledge ourselves to see to it that the Senate is fully informed early next session of exactly what our committee has found, and exactly what VA medical and hospital needs are, after we have established those needs.

Finally, to refer back to the situation relating to GI educational benefits, we conferees on the Senate side are gravely disappointed that our attempts to secure a conference have failed. We look forward to a conference at the earliest possible date selected by the House conferees in charge, and we will then report back to the Senate what can be done to meet the great education and training needs of our Vietnam veterans.

AMBASSADOR

Mr. FULBRIGHT. Mr. President, I was going to speak on the Tasca nomination. Did the Senator from New York intend to address himself to that subject?

I understood we were ready to vote on the matter, and I was going to say a few words. I understand the yeas and nays are ordered.

Mr. JAVITS. May I say to the Senator from Arkansas that my problem is that I have another executive meeting at 2. But I will sit down and wait until he finishes.

Mr. FULBRIGHT. Mr. President, I dislike to inconvenience the Senator, but I was told this was the proper order.

Mr. JAVITS. Mr. President, I ask unanimous consent that upon the completion of the remarks of the Senator from Arkansas, I may proceed for 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Arkansas is recognized.

Mr. FULBRIGHT. Mr. President, the pending business, as I understand it, is the nomination of Mr. Henry Tasca as Ambassador to Greece.

The PRESIDING OFFICER. That is correct.

Mr. FULBRIGHT. I should like to say a word or two by way of background.

Mr. Tasca has been a distinguished representative of the Foreign Service. His nomination was held up in the committee for some time, and I was responsible for holding it up. There were at least two distinct reasons for that.

One was that I thoroughly disapprove of the cruelty and ruthlessness of the military regime in Greece. I think that the treatment the Greek regime gives to so many of the enlightened citizens of that country is intolerable. I did not wish to be a party to an action which might seem to approve of such a regime by quickly and readily approving this appointment.

That was only part of the reason. The other side of the coin was that, at the same time the administration had nominated an ambassador, and a distinguished man, to Greece, it had refused, according to the newspapers, or declined—I do not know exactly what the correct word would be—to name an ambassador to Sweden. The press reports indicated that this was because of administration disapproval of Swedish

policy, particularly with respect to its attitude toward our policy in Vietnam.

Furthermore, and as a related matter, not too long ago the Cranston resolution was considered and agreed to by the Senate. I supported it. That Senate resolution stated a very wise rule; namely, that approval or disapproval of a regime is not indicated by recognition. This resolution was in general terms and certainly was not directed at Greece alone and, in any case, the question of recognition is not technically involved in the appointment of ambassadors either to Greece or Sweden. I make this statement however, because someone has said that holding up the nomination of Mr. Tasca for these few weeks is a violation of the spirit, at least, of the Cranston resolution. I do not think it was. It was not a question, there, of recognition. Also, the delay involved a combination of our Government's refusal to name an Ambassador to Sweden and the rather rapid way in which the administration had designated a new ambassador to Greece.

In any case, after some time, administration spokesmen assured me that they would proceed to nominate and name an ambassador to Sweden. I said with that assurance, I was perfectly willing to proceed. This was never a matter of personality or any criticism of Mr. Tasca himself; it involved our overall policy—and I have no objection to approving the nomination of Mr. Tasca.

But I want to reiterate that I do not approve of the Greek regime. It is not just because of my sympathy and concern for the Greek people, although that is an important reason. I think it is a great tragedy for that country, which in a sense is the birthplace and originator of the whole concept of democracy. We owe more, I expect, to Greece than to any other single country for the basic ideas under which our country has been developed, and particularly our political institutions. In addition, the Greeks are a small and very brave people, and I have great sympathy when I see the tragedy of their being mistreated by their own Government.

In addition, I am very much concerned about an attitude that seems to be growing in this country. Even though it is the Americans, my own constituents, and my own Government, that concern me more than anyone else or anyone else's government, nevertheless it makes me very uncomfortable and unhappy to see how callous our Government seems to have become about military dictatorships which mistreat their own people, and destroy even the basic human qualities of respect for the individual and respect for the dignity of the individual human being. When they engage in torture, as has been reported so often and so freely to be the case in Greece, and especially torture of the leading intellectual people of their country—their great musicians and their great writers are picked out and especially subjected to the most degrading kind of treatment—I hate to see our country become so callous that, for some ulterior political purpose—in this case, it is said, because Greece is an anchor to NATO—we overlook all these things and give them special treatment and active assistance.

I do not advocate that we go in and try to change their regime. That is up to the Greek people. We have had enough of physical intervention, as demonstrated in Vietnam and the Dominican Republic. But we should not give active support, such as we are giving to the Greek colonels. This I object to. It shows, in my view, a lack of appreciation for simple basic human rights and human dignity; and it is disgraceful, in my view, for this country, which professes all this concern for individuals and for human dignity, to engage in it.

This type of thing, it seems to me, cannot help but lead to increasing cynicism on the part of our young people, as well as those of our older people who are at all interested in humanity, because we profess one thing and do another. It is the type of hypocrisy which I think is very damaging to our reputation in the minds of thinking people.

So I regret that our country seems to be put in such a position. I think we should not give this assistance, and very substantial military assistance, to a regime which mistreats its own citizens. I think it is a reflection on our own sense of discrimination and our own principles with regard to human dignity. Therefore, although I strongly deplore what we are doing in supporting Greece with military aid, I shall now support the nomination because I do not regard sending an ambassador, and do not believe it should be regarded, as approval in the least of the regime, and because it is in accord with what I think was the sentiment of the Cranston resolution, which this body approved, not quite unanimously but overwhelmingly.

The political representation of this country is not to be taken as a sign of approval of the policies of the military regime. The sending of an ambassador is simply an essential instrument of international relations—essential to the conduct of our international relations. It should not be interpreted as supporting the regime.

I do not approve of the regime and hope that it will change. Only recently it found itself compelled to resign from the Council of Europe because it was about to be excluded because its policies were rejected by other members of the Council of Europe.

I believe that the Europeans have as much, if not more, interest in NATO than we do. Why sometimes we value the importance of matter to NATO more than they do in Europe is beyond my comprehension.

Mr. President, with these remarks I am ready to vote for the confirmation of the nomination. I want to make it clear that I do not approve of this regime. I also want to make it clear that we ought to send an ambassador to Sweden, a country which is one of the most humane and civilized countries in the world.

I have no criticism of Sweden and its actions with regard to this or any other matter. Sweden is a very advanced country. But they disagree with our policy in Vietnam. And we have therefore failed to name an ambassador to Sweden.

I hope that our Government will promptly name an ambassador to Sweden.

Mr. AIKEN. Mr. President, I feel that the United States has been severely handicapped by not having an ambassador in Athens.

With the loss of our naval bases in North Africa, there are only a few rather tenuous harbors left for our fleet in the Mediterranean. The Russian naval strength in the Mediterranean is now said to be about equal to our own.

One of the places where our Navy is still welcomed, entertained, or able to find a harbor is Greece. I do not believe that confirming the nomination of an ambassador to Greece will in any way obligate us to approve or disapprove the kind of government the Greeks have there.

I feel there are those who do not feel kindly toward approving an ambassador to Greece who would feel very much worse if our fleet were to leave the Mediterranean.

An exchange of ambassadors with another country does not mean that we approve of their form of government.

I call attention to Senate Resolution 205 which was enacted by the Senate not long ago. The resolution was introduced by the junior Senator from California (Mr. CRANSTON). I cosponsored the resolution with him.

The resolution reads:

It is the sense of the Senate that when the United States recognizes a foreign government and exchanges diplomatic representatives with it, this does not of itself imply that the United States approves of the form of ideology or policy of that foreign government.

If the Senate takes the position that it should confirm the nomination of Mr. Tasca to be Ambassador to Greece, it would not mean that we approve of the present form of the Greek Government.

I have no excuse for our failure to send an ambassador to Sweden. There should be one there, and I am advised a selection has already been made.

So I hope we confirm Mr. Tasca's nomination. There is no question of his ability. That point has not been raised at any time during our discussions.

The question was whether we would, in effect, be approving the Greek Government by appointing an ambassador to that country.

We are the ones who are paying the price by not having an ambassador there.

Mr. DODD. Mr. President, I support the nomination of the Honorable Henry J. Tasca as Ambassador of the United States to Greece.

Ambassador Tasca is a career Foreign Service officer with more than two decades of experience in Europe, North Africa, and the Far East.

He is also an economist of note, who has at different times served as U.S. Treasury representative in Rome, as alternate U.S. Executive Director of Monetary Fund, as Deputy Director of the Marshall plan, and as AID Director in Italy.

He also ranks as one of our top experts on NATO affairs, having served as deputy to Ambassador Harriman on the NATO Council from 1958 to 1961.

In his most recent assignment, as U.S. Ambassador to Morocco, he conducted himself, according to all reports, with exceptional distinction.

If there is opposition to Ambassador Tasca, it cannot possibly be on the grounds of qualifications, because the Senate has rarely been called upon to approve a nominee more qualified in terms of both general background and specific exprience in the area to which he is being assigned.

The opposition is based, rather, on the belief that no American Ambassador should be accredited to Athens so long as Greece does not enjoy constitutional government.

It is for this reason that the American ambassadorship in Athens has remained vacant for more than a year now. And it is for this reason that the Senate Foreign Relations Committee took 4 months to act on the nomination of Ambassador Tasca.

Mr. President, I believe that we have been playing a dangerous and strange game with the American ambassadorship to Greece.

Although most of those who oppose the nomination are among the first to protest against any suggestion of intervention in the affairs of other nations, the fact is that our failure to appoint a new American Ambassador to Greece for almost 1 year now does constitute a kind of intervention in the internal affairs of Greece.

I do not say this by way of approving the present military government in Greece. I remind the Senate that only last Friday, when we were discussing military aid to Greece, I introduced a resolution which was unanimously approved, saying that it was the sense of the Senate that the United States should use its influence to bring about the earliest possible return to constitutional rule in Greece.

When we deliberately abstain from appointing an ambassador, however, we are not merely intervening in the affairs of Greece, but to compound the damage, we are depriving ourselves of those normal diplomatic contacts which could and should be used to convey our thoughts and suggestions to our Greek allies.

And to make matters worse, we are undercutting the NATO alliance, because without access to Greek harbors and airfields and anchorages, the position of NATO in the eastern Mediterranean would be critical indeed.

I consider our failure to dispatch an ambassador to Greece strange because it seems to involve a double standard which is applied to the prejudice of our allies and to the advantage of our enemies.

When Moscow invaded Czechoslovakia, with the support of several of its Warsaw Pact quislings, in August of last year, I know of no one among those who today oppose the appointment of an American ambassador to Athens who demanded that we refuse to accredit an American ambassador to Moscow until the Red army vacated Czechoslovakia and restored the Dubcek government.

Mr. President, I earnestly hope that the Senate of the United States will put an end to this dangerous and hypocritical and self-defeating game.

In the present critical situation in the affairs of Greece and of NATO and of the Mideast, it is imperative that America be represented in Athens by an ambassador of qualified background.

Ambassador Tasca has this background.

His nomination should be approved.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Mr. Henry J. Tasca to be Ambassador and Plenipotentiary to Greece. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Georgia (Mr. RUSSELL), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Maryland (Mr. TYDINGS), are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from New Jersey (Mr. CASE), the Senators from Illinois (Mr. PERCY and Mr. SMITH), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Kentucky (Mr. COOPER) is absent because of illness in his family.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Tennessee (Mr. BAKER) and the Senator from Nebraska (Mr. HRUSKA) are detained on official business.

If present and voting, the Senator from Nebraska (Mr. HRUSKA), the Senators from Illinois (Mr. PERCY), and (Mr. SMITH), and the Senator from Texas (Mr. TOWER) would each vote "yea."

The result was announced—yeas 79, nays 4, as follows:

[No. 266 Ex.]

YEAS—79

Aiken	Goodell	Montoya
Allen	Gore	Murphy
Allott	Gravel	Muskie
Bayh	Griffin	Packwood

Case	Inouye	Symington
Cooper	McIntyre	Tower
Eagleton	Mundt	Tydings
Eastland	Percy	

So the nomination was confirmed.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER (Mr. COOK in the chair). Without objection, it is so ordered.

Mr. HARTKE. Mr. President, on the occasion of the Senate's confirmation of Mr. Henry J. Tasca as U.S. Ambassador to Greece, I want to express my deep concern about the continuing deterioration of the political situation in Greece. It is a situation which, if it continues to worsen, could well lead to a new Vietnam—this time in Europe.

I want also to express my dismay at the fact that the present administration is following the same set of policies established by the previous administration that must inevitably lead to disaster, not only for Greece but for long-range American interests in that vital part of the world. The net result of these policies has been that the majority of the Greek and European peoples generally believe that the United States is responsible for bringing the military junta to power in the first place and maintaining it in power since April 21, 1967.

As early as August 10, 1966, 8 months before the colonels destroyed Greek democracy in its own ancient birthplace, I had occasion to refer to the impending disaster in an interview with the political editor of the Athens Daily Post, Mr. Elias P. Demetracopoulos. "If we want," I said, "to avoid more Vietnam and Dominican Republic interventions in other crucial parts of the world, both the White House and Capitol Hill should thoroughly investigate these grave charges voiced in Greece against the United States."

The following year it was my unhappy distinction to be the first Member of this body to visit Athens after the colonels came to power. I had lengthy talks then with their leaders. The impression I gained from those conversations has only been reinforced by events in the interim. And that is why last Friday I voted against granting U.S. military assistance to the present regime. How tragic it is that a majority of the Senate determined otherwise on the very day that member nations of the Council of Europe took the unprecedented action of forcing Greece to resign from the council because of the regime's violation of the human rights of the Greek people and its torturing of political opponents. I might add that the Council took this step in the face of intense lobbying by American spokesmen arguing against it.

Thus the Greek issue has now become a European issue. The action of our allies last week constitutes a sharp diplomatic slap against our policies in that area. We had better heed the warning before it is too late.

The Truman Doctrine of 1947 saved Greece from becoming a satellite of the Soviet Union. The Greek people have been deeply grateful to us for this, but their gratitude is turning now to resentment and worse because of our support of the dictatorship. If we fail to join our European allies in their efforts to restore democracy to Greece, we may soon be faced with developments too terrible to contemplate. And we may end up by hav-

ing to bury, with our own hands, that Truman doctrine which is so proud a milestone in our postwar resistance to tyranny.

Mr. President, these pressing issues have been dealt with in characteristically cogent fashion by Mr. Clayton Fritchey in an article appearing in today's Washington Evening Star. I ask unanimous consent that the article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHY DOES U.S. BACK GREEK REGIME?

(By Clayton Fritchey)

After the military dictatorship that runs Greece hurriedly quit the Council of Europe to avoid being kicked out for violating democratic freedoms, the country's former finance minister, Constantine Mitsotakis, now an opposition leader, said, "The next step is up to the United States." It is indeed but when that step is taken it is not going to please Mitsotakis and his fellow exiles.

While the hopes of the democratic exiles have been raised by the council's indictment of the military junta, these oppositionists know that it is not enough in itself to topple the regime or even generate serious reforms, unless the United States also applies pressure on the generals, for the junta can afford a European boycott as long as it can count on the support of the American government.

Instead of joining in the isolation of the junta, however, the Nixon administration is about to resume full military aid for the regime, and it is also about to send a new U.S. ambassador to Athens as further recognition of the dictatorship.

The Senate Foreign Relations Committee has been doing what it can to delay both actions to indicate its disapproval of the Athens government, but that strategy is about exhausted. Sen. Claiborne Pell, D-R.I., got the committee to amend the foreign aid bill to forbid all arms for Greece, but, with administration blessing, the amendment was defeated a few days ago by the full Senate. The committee has also been holding up the confirmation of Henry Tasca as the new ambassador to Athens, but he will soon be on his way nevertheless.

All this, of course, is going to be dismaying to the democratic exiles. Also, it explains why our European allies are so skeptical about our objectives in Vietnam, especially the Nixon-Johnson protestations that the United States has to fight in Vietnam because it is dedicated to upholding the principle of self-determination.

Even that leading hawk and veteran anti-Communist, Sen. Karl Mundt, R-S.D., finds this line too much to swallow. After hearing Defense Secretary Melvin Laird and Secretary of State William Rogers (in secret session) emphasize "self-determination" as the No. 1 U.S. objective in the war, Mundt felt compelled to say, "I do not think there is self-determination in Greece . . . I do not think they have self-determination in Portugal . . ."

Mundt could have cited 50 other countries where, unlike South Vietnam, the United States has been unmoved by the suppression of self-determination and democracy. In fact, in many instances, such as Taiwan and Thailand, the United States is actively helping the very governments which abolished self-determination.

Mundt thought the administration would be on better ground if it substituted resistance to aggressive communism as its prime objective. But that, too, is subject to glaring inconsistencies. Why, for example, could the United States tolerate a Communist takeover in North Vietnam, but not in South Vietnam? Why is communism acceptable only 90 miles away in Cuba, but not acceptable 10,000 miles away in one small corner of Asia?

The conclusion that our European friends draw from this is that neither our dedication to self-determination nor Communist containment is absolute. When it suits our interest to back democracy or fight communism we sometimes do so. Otherwise, we look the other way, as in Czechoslovakia and Hungary, or Brazil and Argentina.

In the case of Greece, however, the Europeans think we could do much to restore self-determination at no cost and little or no risk. The administration's answer is that it must help the junta because the Greek arm is supposed to be the southern anchor of the North Atlantic Treaty Organization. Our allies point out that NATO is designed to protect Europe, and if the Europeans are not worried about the alleged southern anchor why should the United States be so fearfull?

After all, the United States has been exclusively equipping the Greek army for over 20 years, and so far it has used the arms only to subdue the Greek people. If the security of Western Europe depends on this Fascist force, Europe is in a bad way.

LEGISLATIVE SESSION

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS AND JOINT RESOLUTION

Messages in writing from the President of the United States were communicated to the Senate by Mr. Leonard, one of his secretaries, and he announced that the President has approved and signed the following acts and joint resolution:

On December 15, 1969:

S. 564. An Act for the relief of Mrs. Irene G. Queja; and

S. 2019. An Act for the relief of Dug Foo Wong.

On December 16, 1969:

S.J. Res. 143. Joint Resolution extending the duration of copyright protection in certain cases.

On December 18, 1969:

S. 118. An Act to grant the consent of the Congress to the Tahoe regional planning compact, to authorize the Secretary of the Interior and others to cooperate with the planning agency thereby created, and for other purposes.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the House had passed the bill (H.R. 14944) to authorize an adequate force for the protection of the Executive Mansion and foreign embassies, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled joint resolution (S.J. Res. 54) consenting to an extension and renewal of the interstate compact to conserve oil and gas, and it was signed by the Acting President pro tempore.

HOUSE BILL REFERRED

The bill (H.R. 14944) to authorize an adequate force for the protection of the Executive Mansion and foreign embassies, and for other purposes, was read twice by its title and referred to the Committee on Public Works.

PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BYRD of West Virginia. Mr. President, notwithstanding the fact that the morning hour has expired, I ask unanimous consent that there now be a period for the transaction of routine morning business, with statements limited to 3 minutes, making an exception in the case of the Senator from New York.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senator from New York is recognized.

FIGHTING INFLATION: RECESSION OR STABILITY?

Mr. JAVITS. Mr. President, I rise to voice my serious concern over what appears to be a basic change in the administration's policy for fighting inflation, a change that is relevant to the current debate over whether we are already in—or the 50–50 chance that we will soon be in—a serious recession.

The basic change in policy to which I refer is the abandonment by our monetary authorities of the strategy of orderly monetary restraint which was considered so important by the administration last spring. This strategy was intact last spring, but during the summer and fall we have seen it give way to a system of monetary repression. It is now bringing about a state of affairs causing alarm among prominent economists and which, if allowed to persist, would accelerate the danger of serious recession without bringing a halt to the steep rise in prices.

Since the administration is responsible for this change, it can also be responsible for not allowing it to persist and for reverting again to orderly monetary restraint.

I would also like at this time to outline the steps I think Congress should take to mitigate the suffering which this change will necessarily bring about.

The present administration was brought to power, at least in part, as a result of widespread dissatisfaction among Americans over the "guns and butter" approach of the Johnson administration, a course which involved us heavily in an unpopular war in Southeast Asia and brought on crippling inflation at home. What was obviously needed on the economic front was strong leadership to bring the budget back into balance and to coordinate this fiscal policy with a system of orderly monetary restraint.

As far back as July 1968, presidential candidate Nixon had charged that the

inflation has resulted "primarily from an expanding money supply," which in turn had been fed by the monetization of budget deficits. To correct this condition, Mr. Nixon said, required reversing the irresponsible fiscal policies which produced these deficits.

The President's message to the Congress, in March of this year, on combating inflation, correctly pointed out that "only a combined policy of a strong budget surplus and monetary restraint can now be effective in cooling inflation." This diagnosis echoed public statements of administration economic policymakers, all of whom emphasized the need to get monetary and fiscal policies back on to the proper course of restraint.

What was meant by "restraint" was spelled out by the Chairman of the Council of Economic Advisers last spring. Fiscal policy, he said, would be directed toward achieving a strong budget surplus in 1970. With regard to monetary policy, Dr. McCracken added:

> There is one element here that is very important—that monetary and credit policy remain on a course of relatively slow expansion.

These words were said in March of this year. On May 20, in testimony before the House Banking and Currency Committee, Dr. McCracken repeated this view when he characterized existing monetary policy as, "moving along a course permitting only a slow and cautious expansion of the money supply."

Looking back over the past 10 months, I believe that the administration has made commendable progress in bringing fiscal policy back on the right track, assuming the Congress does not jeopardize this progress by an improvident tax reform bill.

With regard to monetary policy, however, I fail to see the slow expansion of money and credit which Dr. McCracken thought was so very important. The growth of the money supply has been at an absolute standstill since late spring, causing alarm among prominent economists as to the effects of continuing this state of affairs any longer, and the total supply of commercial bank credit has remained virtually unchanged since last April. Is this the relatively slow expansion of money and credit which we were told in March was very important?

In fact, Mr. President, what we have at the moment is not monetary restraint—it is monetary repression—and I submit that the responsibility for this lies not only with the Fed, which formulates monetary policy, but also with the administration, which is on record as supporting it.

Some explanation for this fundamental change in policy can be found by examining policy statements of administration economic advisers over the course of the past several months. What emerges is the distinct impression that the makers of monetary policy have panicked, and have abandoned their previous approach of firm restraint. That approach was originally designed to slow down the economy—to head it back onto a noninflationary path.

The policy of firm restraint—in the words of Secretary Kennedy last February—was to last "until there are unmistakable signs" that we are headed back on this path. But the same Secretary Kennedy in October has been looking for different signs. According to Secretary Kennedy, the administration still wants the signs to be unmistakably clear, but this time he says the signs must also show "that the balance of risk has shifted from inflation to recession."

In other words, the administration and the Fed plan to slam on the brakes, and not to let off until there are unmistakable signs that the brakes may lock.

While the administration does not formulate monetary policy on a day-to-day basis, it does closely coordinate its long-range objectives with those of the Federal Reserve Board and, in the final analysis, bears primary responsibility for the state of the economy.

I urge the administration and the Federal Reserve Board at this time to heed the growing concern of economists and legislators including the Joint Economic Committee itself, and bring monetary policy on to the track of a slow but stable increase in the money supply.

At the same time, so that the administration can realize significant budget surpluses for the near future, I urge that Congress in the House-Senate conference on the tax reform bill reexamine the tax rate reductions in the reform bill now before us, including the very worrisome action which the Senate took in raising the personal exemption to $800. I do not put the self-financed social security increase in the same class; we should not expect the Social Security Trust Fund to finance the Government debt as it is presently doing.

Failure to act in both these policy areas and on both these levels of Government could quickly bring this country into the grim situation of continued price inflation coupled with a mild or not so mild recession.

In some sectors of the economy we have pretty grim conditions right now. If the housing industry, for example, reflected the state of the economy as a whole, we could say we were in the middle of a full-blown recession.

Also, Federal, State, and local government financing has been hard hit by soaring interest rates.

Prices of stocks are at a 3-year low.

We have viewed with alarm the ominous weakening of the employment market this year and November culminated a 4-month slide in industrial production this year.

I believe that two of the most important areas determining the Nation's economy are housing and unemployment.

HOUSING

For two decades the stated objective of Federal housing policy has been to provide every American with "a decent home and a suitable living environment." Only last year this objective was translated into a specific national housing goal of 26-million units in 10 years—or 2.6 million annually.

On the basis of present housing starts we will not even approach that goal. At the beginning of this year, housing production was at 1.9-million units. It now stands at 1.3 million, and by the end of this year it is said that we will be building houses at a rate of only 1 million units a year—well under half the production needed to meet the national goal.

Probably the single most important reason for this failure has been the pattern of rapidly escalating costs in the building industry, in excess of increases in the cost of living. Increases in the cost of money have been most dramatic. Interest rates have gone up so high that the housing industry is today on the verge of a major recession.

The tragic irony of the situation is to be found in the contradictions of Federal policy. In 1 year we enact bold new housing programs and establish national housing goals. Yet, in the next year, the administration supports changes in both tax legislation and monetary policy which could make it impossible to implement the national housing policy which has been authorized.

It would appear that periodic crises in housing are built into our economic system and the present structure of our financial institutions, and that housing will always bear the major burden of tight money.

But this need not be so. I believe that these institutional inadequacies can and must be corrected, so as to attract Government and institutional funds into the mortgage market, and to prevent disintermediation by the smaller investor out of that market. In a word, housing must be sheltered from the full impact of a high interest rate policy.

Among the reforms which I support are the following:

First. Requiring the Federal Reserve to deal in the open market in certain major Government mortgage securities, as a means of implementing monetary policy, and under conditions consistent with orderly markets for these securities. In hearings on this subject in the House Banking and Currency Committee this October, Federal Reserve Chairman Martin conceded that a requirement of this sort which was directed toward improving the market for housing issues along with sound monetary policy was not objectionable. I believe, therefore, that there is a difference between this proposal and any other approach which would merely amount to a "pipeline" from the housing industry to the Fed.

Second. I would urge placing similar requirements—with similar safeguards—on Government trust funds to invest certain percentages of their portfolios in residential mortgage paper.

Third. Two new types of mortgage paper were authorized by the 1968 and 1969 Housing Acts. The first is the federally guaranteed mortgage pool secured obligations authorized under section 804 of the Housing Act of 1968. The second is the "tandem" or "pass-through" approach authorized in the 1969 bill, which has just been sent to the White House, under which Ginny Mae-serviced mortgages can be discounted to Fanny Mae. I recommend full utilization of the mortgage pool authority, and of the tandem approach when enacted.

Fourth. I urge the Treasury Department to pay greater heed to our housing needs in its debt management policies.

I have mentioned the potential of Government trust funds. But I would also urge that the Treasury Department seriously consider raising the minimum denomination on short-term Treasury bills and notes to an amount far greater than the $1,000 minimum now on the market. In its search for lendable money, the Federal Government should compete with, but not be in a position to overwhelm, savings institutions which support the housing market. A raise in this minimum denomination—to $15,000 to $20,000—would discourage disintermediation from such institutions and bring more money into those financial intermediaries which can most actively support the housing market.

In addition to these recommendations, I support actions by both the Labor Department and the building trades unions toward reducing barriers to entry into the building trades. To the extent to which inflation in the housing industry has been caused by a tight labor market, a loosening of this market through reducing these barriers will help solve a social problem, as well as this economic one.

UNEMPLOYMENT

When employers eventually realize that they really cannot see the light at the end of the tunnel of tight money and monetary repression, they will adjust their sales forecasts—and their labor force—accordingly. The results will not be pleasant, for it will mean that no amount of retraining or computerized job banks will prevent a substantially higher rate of unemployment.

Mr. President, the unemployment figures this year should teach us that we cannot be complacent about our efforts to cope effectively with the problems of unutilized and underutilized workers. On a quarter-to-quarter basis, unemployment has been rising since the beginning of the year. In September, it jumped half a percentage point, to 4 percent. The recently published 3.4 percent rate for November has been generally interpreted as less important than other factors which show a weakening of the employment market. For example, unemployment rates for manufacturing and blue collar workers remain high. Most analysts agree that basic pressures in the economy point toward further rises in the unemployment rate.

The administration has assured us all along that its policies for cooling off inflation would not create an unacceptable rise in unemployment. Treasury Secretary Kennedy repeated this pledge shortly after the September unemployment figures were announced. However, the administration has heretofore failed to give us an idea of what constitutes an unacceptable rate. Furthermore, I see no planning on the part of the administration for measures to cope with the kind of unemployment which we are courting with the present state of monetary and fiscal policies.

There may have been a time when a 4½-, a 5- or even a 6-percent unemployment rate was a normal and acceptable thing. However, progress and the achievement of our goals have a way of turning around on us and becoming starting points for nobler attempts. Our consciences require us to keep setting our sights high.

For this reason, I believe that the rise in unemployment rates over the first three quarters of this year, coupled with the ominous signs which I see for this rate in the future are completely unacceptable.

While large-scale unemployment remains only a grim prospect, it is incumbent upon us to step up our thinking now on the extent to which manpower programs can be designed to ameliorate the hardships that unemployment promises.

The administration deserves commendation for recognizing, in its proposed manpower bill, which I introduced on August 12, the need for increasing our manpower effort in the event of an increase in national unemployment to 4½ percent or higher. Title V of that bill, provides an automatic appropriation of additional funds in an amount equal to 10 percent of the sums already appropriated for that year, in the event that the unemployment rates rises above 4½ percent.

The additional funds would be used in financing training and related activities for unemployed individuals, on the implicit theory that unemployment will provide the opportunity for many to participate in training and supportive programs. This is a valid concept.

But, I also believe we must explore the possibilities of expanded public employment. The administration has taken the position that it will not create new public sector jobs for the disadvantaged and unemployed, but that its new public services careers program—JOBS—will try to put the disadvantaged into jobs as they become open by resignation or normal expansion.

The Commission on Technology, Automation, and Economic Progress estimated in 1966 that 5.3 million new jobs could be created through public service employment. An OEO study recently suggested 4.3 million such jobs. And a 1969 study by the Upjohn Institute indicated that the mayors of the 130 largest cities alone could use another 280,000 persons on municipal payrolls immediately.

In citing these statistics, I am not referring to "make-work" jobs, but to positions that would provide communities with needed public services, while providing the opportunities to individuals. These statistics point out a need which is far greater than the administration is apparently prepared to admit.

I will soon introduce amendments to the manpower training bill to develop the public sector jobs concept so as to meet this need.

CONCLUSION

The fact that a speech about monetary and fiscal policy must necessarily encompass an examination of housing and unemployment suggests that further work needs to be done about refining the decisionmaking process in the Government. The Federal Reserve System controls monetary policy, but it is not charged with insuring the stability of the housing industry which it so greatly affects. The Treasury Department already has the authority to carry out some of my recommendations, but it is admittedly not the Treasury's job to define our national housing or manpower goals and capabilities.

Informed public opinion now demands a greater effort on the part of government to subject its decisions to the test of our social priorities. Nevertheless, there is no organized mechanism within the Congress or the executive for accomplishing this task.

This year I cosponsored a bill which would take a significant step in this direction, and on Tuesday I offered an amendment which would further refine its effect. These proposals would establish a Council of Social Advisers within the executive and an Office of Goals and Priorities Analysis within the Congress. Recommendations of these bodies would come under congressional and public scrutiny in open hearings. The debate over national priorities, now carried out in diverse and diffuse forums could, through such a proposal, find an efficient channel for constructive and informed action.

Our economy stands at a fork in the road. Faded maps and dark skies make the journey dangerous. One road leads to slow economic stabilization, the other to a turndown or even a recession. Neither road can guarantee safety from the risk of inflation. Whether we choose one road or the other we must not forget the reason we have set forth on the journey at all; that is, the relief of human suffering and the improvement of the human condition.

I hope the administration will give heed to these words and to these suggestions.

THE MYLAI MASSACRE

Mr. CHURCH. Mr. President, we have all been shocked at the unfolding news of the tragedy at Mylai.

Numerous newspapers in my State—both daily and weekly—have commented editorially. In sum, these editorials, I think, represent much of the reaction of my constituents to this tale of horror.

I ask unanimous consent to have printed in the RECORD the following editorials:

An editorial entitled "Not the Way To Fight a War," published in the Idaho Statesman of November 22, 1969.

An editorial entitled "The News About Mylai," published in the Idaho Statesman of December 4, 1969.

An editorial entitled "At Mylai, Punish the Truth," published in the Post-Register of Idaho Falls, Idaho.

An editorial entitled "Stream of Thought," published in the North Idaho Press, of Wallace, Idaho, November 28, 1969.

An editorial entitled "Possible Precedent at Mylai," published in the Lewiston Morning Tribune, and reprinted in the Idaho State Journal of December 8, 1969.

An editorial entitled "Taking the Nazi Route," published in the News-Tribune of Caldwell, Idaho, November 23, 1969.

An editorial entitled "In Spite of Atrocities," published in the Blackfoot News, Blackfoot, Idaho, December 3, 1969.

An editorial entitled "A Stench in Viet-

nam," published in the Idaho State Journal of November 26, 1969.

An editorial entitled "A New Burden in Vietnam," published in the Intermountain Observer, of Boise, Idaho, November 29, 1969.

An editorial entitled "'Irreversible' Withdrawal," published in the Rexburg Standard, Rexburg, Idaho, December 2, 1969.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Idaho Statesman (Boise), Nov. 22, 1969]

NOT THE WAY TO FIGHT A WAR

War is brutal, frustrating and maddening. So if a few U.S. soldiers massacre Vietnamese civilians in a village it can be put down as evidence of the horrors of war.

But it is shocking and depressing and a blow to the assumption that all righteousness is on the U.S. side in this struggle. Americans don't believe in fighting that way.

Now the other side—which has been guilty of numerous massacres—can say that the Americans do it, too.

There is a difference. When the other side kills innocent people, it is apparently a matter of deliberate policy, accepted in Hanoi.

The U.S. Army officially rejects the idea of cold blooded murder. Hence the charges against the eight Green Berets in the death of a South Vietnamese civilian, and now the charges against a lieutenant in My Lai killings.

It isn't surprising that there is shock and surprise in the U.S., or that there are voices in Congress asking for an investigation. It would be more shocking if Americans weren't concerned.

In the case of the Green Berets the murdered man was apparently an agent, a participant in the war. Accounts of the My Lai killings indicate that innocent civilians were massacred en masse, similar to the way the Communists massacred civilians at Hue.

The Communist propagandists will suggest that this is common U.S. practice, with official sanction—in the same style that some critics of anti-war protest here brand all protesters as traitors.

How sorry are Americans about this incident? The degree of sorrow would be a good measurement of our genuine concern about the fate of the people of Vietnam.

[From the Boise (Idaho) Statesman, Dec. 4, 1969]

THE NEWS ABOUT MYLAI

News reports on interviews with men who were at My Lai have become a matter of controversy. But the U.S. Court of Military Appeals declined to accept a request to ban them.

The question before the court was whether it felt the news reports would interfere with Lt. William Calley's right to a fair trial. It said that insuring a fair trial was the responsibility of the military judge.

Another matter is involved, of course. Some people don't believe the press should report the interviews because it is disagreeable to read or hear them. Still others find them agreeable, because they tend to reinforce an impression that U.S. involvement is wrong.

Gov. Ronald Reagan complained about the My Lai news stories on grounds that they might prejudice a trial. He didn't feel any constraint, however, about offering his own comments. He said if events happened as described then "I think anyone has to realistically accept that in war and in the heat of combat these things have happened as long as there have been wars."

He also said the U.S. was probably the only country to consistently look with abhorrence on such acts.

That is one way to look at it. But because such instances may occur in wars doesn't excuse them any more than it could excuse the North Vietnamese massacre of civilians at Hue. It is questionable whether the United States is the only nation that consistently abhors such acts, alhough it may be comforting to make such a self-righteous assumption.

It is difficult to separate feelings and attitudes about the war in Vietnam from My Lai. One good example is the South Vietnamese government which denied that there was any massacre at My Lai and then sent an investigating team to find out what happened.

Do we indeed sincerely abhor what we have been told happened at My Lai? Or do we abhor more than the deaths of the Vietnamese the fact that our assumption that Americans could never do such a thing is challenged?

Is publicity about My Lai resented because it might impair Lt. Calley's right to a fair trial, or because we don't like to hear about it?

There is another question. How can we, if we are not greatly disturbed by the deaths at My Lai, be sincere in our support of a war on behalf of the people of South Vietnam? We either care about those people and their fate or we do not.

My Lai in itself, if the charges are correct, does not prove U.S. policy in Vietnam is wrong. An entire nation can't be blamed for the actions of a few. But if many of us are not really disturbed about loss of life at My Lai it could help explain what we have been told happened there.

[From the Idaho Falls (Idaho) Post-Register]

AT MAILAI, PUNISH THE TRUTH

On December 19, 1675, a thousand armed men from four New England colonies carried out a search-and-destroy mission. Their target was the Rhode Island encampment of neutral Indians harboring refugees from the tribe of the warring Indian leader called King Philip.

The colonists had suffered much from the depredations of the savages and were not in a mood for temporizing or discriminating between friend and foe, combatant and noncombatant.

In what has gone down as "The Great Swamp Fight," they attacked the Indian village, set fire to 600 wigwams and caused, directly and indirectly, the deaths of some 300 old men, women and children while suffering only 60 deaths among their own force.

A respectable "kill ratio" even by today's standards.

In January, 1879, the long struggle to pacify a hostile continent, if not to win the hearts and minds of its aboriginal inhabitants, was virtually concluded at Fort Robinson, Nebr., with the massacre by the U.S. Cavalry of the remnant of rebellious Cheyennes, whose only crime was that they insisted on occupying ancestral lands coveted by the white man.

Between these two events lie 200 years of broken treaties, bloodshed and atrocities, on large scale and small, committed by both white men and red.

This is not to dredge up the old charge that "violence is as American as apple pie," which is no more nor less true than that compassion for the underdog is a traditional American characteristic.

It is to suggest, however, that in all times and in all wars certain circumstances and conditions have brought out the worst in the best of men.

As cruelty toward their enemies was the norm among the Indians, so is it among the Viet Cong and North Vietnamese and as so-called civilized Europeans often dealt back to the Indian measure for measure, so have a few American boys matched the savagery of the foe in Vietnam.

"The only good Indian is a dead Indian," said the Indian fighters, and meant it. A similar feeling seems to be in Vietnam that, "The only gook you can be sure isn't a Viet Cong is a dead gook." . . . but, again, among a few.

Women and children in Vietnam have lobbed grenades at Americans, planted booby traps, lured them into ambushes. In this war, the basic rule of survival has been to shoot first and ask questions afterward.

But never before in this war have American fighting men been accused of wantonly and coldbloodedly slaughtering women, children and even babies.

Americans have recoiled in horror and disbelief as details have unfolded in recent days. There is, to be sure, no incontrovertible proof that GIs deliberately gunned down civilians. Pictures of piled-up bodies do not show how or by whose hand they were killed.

But the charges are too grave and too horrible and corroboration is coming from too many sources to be swept aside.

The Army's investigation into the matter must be pushed until all the facts are known and published to the world, not because it matters what the world thinks of us, which it does, but because it matters more what we think of ourselves. By all means, the Senate should initiate its own investigation as several of its members have demanded.

The ugly truth of what can happen when civilized standards of behavior are put aside for one instant must be faced, lest in attempting to save a nation from communism we place ourselves in danger of losing something infinitely more valuable—our own decency, humanity and self-respect.

But, above all, let us keep it in perspective. A fraction of U.S. soldiery was involved. And let us keep in mind that every day—every day, we repeat—of the war, the Viet Cong have kidnaped and murdered village leaders and mere village members just because they have consorted with the South Vietnamese and their allies. It is so easy to conjure up comparisons with the Nurenburg trials for example, as some columnists have. There is no comparison with the Nuremberg trials and the long Nazi flight from reason. Atrocity was a policy with the Nazis, government-sanctioned and was widely known and accepted. It is decidedly never sanctioned by U.S. Policy. It was a strange abberation of a few in a strange war undoubtedly who had been repeatedly the target of Viet Cong men, women and even children.

[From the Wallace (Idaho) North Idaho Press, Nov. 28, 1969]

STREAM OF THOUGHT

(By R.J.B.)

It is true, of course, that the alleged massacre of South Vietnamese civilians by Army men is "abhorrent to the conscience of all the American people", as a spokesman for President Nixon said Wednesday.

But there are other aspects of the case that deserve more soul searching by the American people than this rather obvious comment.

One is the rather flagrant attempt to make it a political matter by declaring that the alleged incident occurred 10 months before the Nixon administration took over. The alleged massacre is not a political matter—if it were then perhaps the Army investigators should learn whether the officer charged in the affair, Lt. William L. Calley, Jr., is a Republican or a Democrat.

The issue is not one of politics, nor a question of whether the alleged massacre occurred under Democratic or Republican administrations. The issue is one of Army attitude toward situations of this kind in relation to the fact that the men who are fighting in Vietnam are civilians drafted for

the job of fighting a war that has become perhaps the most unpopular conflict this nation has ever fought.

It is important that we keep in mind this is not a professional army that is doing the fighting—but young men taken from civilian life or studies and made to serve one year of their service life in Vietnam. After their "hitch" they return to civilian life or studies.

With that thought in mind, it is relevant to ask why, if this incident did occur, did it take letters from a discharged soldier to bring it to light? It is relevant to ask why the alleged incident did not reach the attention of the Secretary of Defense until April, this year although it occurred on March 16, 1968. It is relevant to ask whether it would have come to his attention at all, if Ronald L. Ridenhour, an ex-GI, had not sent copies of a 2000 word letter to 30 congressmen, government executives and Army officials last March relating details of the story. It is relevant to ask why, in view of these letters sent in March, the affair did not come to the attention of the Secretary of the Army until April.

It also is relevant to ask if other such incidents have occurred, as alleged, and if they will come to light only if ex-GI's make the facts known.

These questions are relevant because they concern Army policy—not Republican or Democratic politics—and because the Army is responsible for the minds, and consciences, and morals, as well as the physical lives, of the one and a quarter million young Americans—most of them draftees—who have fought in South Vietnam.

The presidential spokesman Wednesday said the incident should not be permitted to reflect on these young Americans.

Of course it doesn't. It reflects on Army officials who obviously, from the facts established, either condone, permit, overlook or encourage such incidents. If they didn't the investigation of an incident that allegedly occurred in March 1968, would have been completed before November, 1969. One is led to wonder whether there would have been an investigation at all, if it were not for Ridenhour's letter.

The incident does not reflect on the million and a quarter young Americans who have served in South Vietnam.

It does reflect on those civilians in this country who have written Ridenhour criticizing him for what he did. He is quoted as saying "People are saying, 'what's his angle? What prompted him to do this? Money' "

As Ridenhour said:

"It's not that I was so right, but that so many people were wrong."

This is the fact that should be abhorrent to the American conscience.

Is honesty, morality, conscience so suspect in this nation that a man must "have an angle" if he lives by these rules?

[From the Lewiston (Idaho) Morning Tribune, Dec. 8, 1969]

POSSIBLE PRECEDENT AT MYLAI

Are we going to take every helicopter pilot and B52 pilot who makes a mistake and call him a murderer?—Sen. Ernest F. Hollings.

Senator Hollings was equating the possibility that children were murdered at point-blank range at My Lai with the inadvertent liquidation of innocents from 50,000 feet.

The children are dead either way, so maybe it makes no difference. But it does make a difference with the other victims of the war—the once civilized men who are brutalized by the experience of pulling the trigger.

Both the bombing deaths and the suspected My Lai murders are reprehensible, but for two very different reasons. The flaw in bombing villages you cannot see is that it is such an indiscriminate weapon. Even a man who wanted to avoid killing children could not. The My Lai incident, if it happened, involved weapons that permit the utmost discrimination. If the charges are true, men who could easily have avoided killing innocents did so anyway.

It is different in war to determine where conventional killing of the enemy leaves off and outright atrocity begins. That is even more true in a guerrilla war where it is often impossible to distinguish between combatants and noncombatants.

But lining up people and shooting them, whether they are enemy soldiers who could be captured instead, or civilians, as in the case of My Lai and Hue, is clearly an atrocity and a crime in war or peace.

The Hue massacre is somehow less shocking because it was committed by those on the other side, whom we are told, are capable of such acts. The My Lai case is another matter. Those being charged with the crime are our own countrymen, who are supposed to know better.

It might not be so surprising if one psychopath had cropped up among the thousands of officers in Vietnam and given such an order. What is difficult to accept is that anyone would follow such an order. Such questions were at the heart of the Nuremberg war trials.

There is, however, one faint silver lining to this tarnished cloud. Atrocities were an official government policy with the Nazis. Atrocities are against the policy of this government, and American soldiers are being brought to trial by the American government, charged in effect with war crimes.

[From the Caldwell (Idaho) News-Tribune, Nov. 27, 1969]

TAKING THE NAZI ROUTE

(By Pete Hackworth)

It is amazing to us that the American people are taking the Nazi Germany route while there live so many individuals who personally remember the road signs along that highway toward totalitarianism.

As President Nixon is fond of saying we want to make it clear that we are not saying the United States is in any imminent danger of falling under a dictatorship, or that our national character will be changed over night.

However, dictatorships and national character aren't sudden things. Sometimes they appear to be sudden, but they're not.

Many of us taking an attitude on the Agnew press attack and the Song My massacre that reflects the attitude of millions of Germans relative to Hitler (no comparison to Agnew—please) and his minions.

A great many intelligent and concerned U.S. citizens are saying of Agnew's official implied threat against the networks and disparagement of the printed media that he's right . . . the press (especially the biggies) should be put in its place, toned down, made to present a "balanced" news picture.

We submit that that is one of the road signs mentioned above.

On the subject of the Song My massacre, many concerned U.S. citizens are saying that the press should lay off, let the officials do the investigating, make the announcement. A great many are saying the press should flat out shut up—"this is WAR!" Still others are saying, "They were just following orders."

Do those road signs seem familiar to you?

If they don't, they should.

The American public not only is entitled to ALL of the details that can be dredged up by the press and officialdom, but it is necessary that nothing be placed in the way of the press presenting every scrap of information obtainable having to do with the disgraceful affair.

The Song My thing is out of character—the national character. We the People can't afford this divestment.

"Some civilians are killed by American troops and look at all the fuss. But the Communists can kill them by the thousands, and nothing is ever said."

That's another criticism of the American press.

And it's not true.

This newspaper and hundreds of other U.S. newspapers have carried stories and photos by the dozens of Communist atrocities. It's just that we expect such rotten behavior from a dictatorship-directed military operation. We see the pictures, we read the stories, and it registers as just another one of those deplorable things.

But when the press rightly takes up the hue and cry against such an outrage committed by American troops, the people—in their shame—retreat behind one of the totalitarian road signs and say, in effect, "Let the officials take care of it," The press is told to stop washing our bloody linen in public—it hurts our conscience.

When a totalitarian-directed Viet Cong guts a village chief and leaves his body hanging in a tree to stink up the place, it is a terrible thing.

When an American soldier does it—or its equivalent—it is infinitely worse.

[From the Blackfoot (Idaho) News, Dec. 3, 1969]

IN SPITE OF ATROCITIES

The thought of young American men committing war crimes is a foreign thought, something previously attributed to Nazis and Arabs.

And yet, young American men are currently accused of atrocious behavior in Vietnam and the accusations are not surprising. Whether or not the men involved are found guilty by courts martial, the thought will still remain that atrocities committed by American soldiers are a possibility.

The capability of atrocity is perhaps a new concept in the continuing Vietnam war, but it is not a surprising concept because there is a war in Vietnam. War itself is atrocious, and so-called atrocities have little shock value any longer.

When Idaho Atty. Gen. Robert Robson was in Blackfoot a while back, he said, in effect, war between peoples is inevitable. "We are witnessing again the song of the dove of peace," he said, then set himself the task of showing the futility of the dove.

Robson said he didn't believe God intended man to be an animal of peace. And, he said, if man wasn't by nature dissatisfied, he'd accomplish nothing.

Perhaps Robson is correct. Man's dissatisfaction with man is doomed to manifest itself in war of one kind or another, in violent death of some kind, in eternal opposing forces of totalitarianism.

It is beginning to appear likely that President Nixon will follow the Johnson footsteps in Vietnam. Perhaps Mr. Nixon won't "escalate," but keeping American troops and equipment there is in itself a form of escalation.

The assassination deaths of John and Robert Kennedy and Martin Luther King demonstrate that the atrocious is now commonplace, acceptable. If that's hard to swallow, think back on how many times you heard the comment, "Good, the so-and-so deserved it."

President Nixon pooh-poohs the peace marchers and lauds the telegram senders and thereby burns in our minds the fact the U.S. is a warlike country.

We are warlike, Robson seemed to be saying, so it follows that we may as well be good at waging war. That thought is similar to a quote from a mythical U.S. Army general to the effect, "Vietnam may not be the best war, but it's the only one we've got."

Some peace seekers see the alleged U.S. atrocities in Vietnam as some kind of coagulant or turning point in opinion at home.

At this point, that could be called a false hope.

Maybe admitting we are a warlike people is the first step toward changing ourselves into a peace loving people. Through all our wars we have claimed we were fighting for peace, a gross contradiction in terms.

Perhaps instead of marching on Washington each month, the peace seekers could send telegrams. This seems to be a more effective way of touching the President. It is more impersonal, takes less trouble and is less human, but telegrams carry more weight than actual human bodies.

Finally, peace seekers should expect no policy change because of any alleged atrocities. The intensity of the peace effort must continue in spite of that.

[From the Pocatello (Idaho) State Journal, Nov. 26, 1969]

A STENCH IN VIETNAM

To those Americans who thought the abortive murder case involving eight Green Berets smelled strongly, the current revelations unfolding around the alleged massacres of South Vietnam civilians are enough to make one's gorge rise.

The Army so far has officially charged only two persons with complicity in the alleged murder of 109 civilians in the 1968 raid on the village of My Lai. But there are voices being raised from all corners, spilling tales that will implicate many more.

If American soldiers, as it has been reported, moved into the village and simply gunned down unarmed civilians including women and children, then the white hat is off forever. Never mind that it is the nature of this dirty war that the enemy may be one of those ragged civilians by day, and a pajama-clad Viet Cong by night.

How do you round up people, and shoot them like cattle? Even if they were uniformed enemy soldiers—not women and little children?

Not all Americans, or even many, are guilty of such atrocities. And the enemy, even while trumpeting propaganda to the world over this alleged incident, is a hundred times more guilty. He slaughtered thousands at Hue, and he makes terror his principal weapon.

But to millions of Americans, this is the latest chapter in the saga of how a noble campaign on behalf of a small and weak nation degenerated into a military misadventure with consequences that threaten to be disastrous.

There will be a new hue and cry for an immediate pullout, and it will be more difficult for the President to stand firm unless he is reassured that most Americans still support him in his announced plan for disengagement.

We think most persons do, and we urge the President to be resolute in his planned system of withdrawals while strengthening the South Vietnamese. In the meantime, we hope the Army's belated investigation of the massacre incident is now swift and thorough. A breath of fresh air is badly needed there.

[From the Boise (Idaho) Intermountain Observer, Nov. 29, 1969]

A NEW BURDEN IN VIETNAM

Reports filtering out of Washington, Saigon and the village of Song My appear to indicate that the acknowledgement of an atrocity, committed by American soldiers, will soon be added to the weight the country already bears from its involvement in the Vietnam war.

The needless killing of women and children, captured prisoners and others who get in the way is a part of any war. There is no such thing as a humane war, and no military force which ever took the field—ours included—can lay claim to having acted more compassionately than another.

Seldom, however, is the brutal nature of warfare brought home to a country in such a way as to cause it to question the justice of the cause. That is because the war itself serves as justification for the things which are done in its name.

But Vietnam is no ordinary war. The fact that it is unpopular and that, after five years, no end is in sight, robs many Americans of the opportunity for rationalization. As a consequence, such incidents as the massacre at Song My, hideous and brutal as it appears to have been, are likely to have grave impact on public opinion despite the Army's efforts to bring the perpetrators to an accounting.

Were it true, as President Nixon would have us believe, that a formula has been devised for bringing an end to American involvement in the war in the foreseeable future, then perhaps it would be possible to dismiss this latest incident as a closing episode of a chapter which is now largely behind us. After all, it occurred more than 18 months ago.

But, unhappily, there are scant grounds for placing confidence in the President's assurances. The limited troop withdrawal plan now in effect is not so much a formula for getting the United States out of the war as it is a formula for keeping the United States in it.

The plan is no more than a tactical shift designed to replace American combat forces with the combat forces of the Saigon government—a tactic which has been tried repeatedly and unsuccessfully in the past. The United States commitment to maintain the Saigon government in power by any means and at whatever cost apparently remains unchanged.

So long as the commitment remains, and so long as any American troops remain in South Vietnam to back it up, the war can be counted on to continue indefinitely. The Viet Cong and the North Vietnamese have made it plain they do not intend to settle for a political compromise on our terms. We have made it plain we do not intend to impose such a settlement by knocking them out militarily, even if that were possible. The Saigon government has made it plain—even though the Pentagon and the Nixon Administration do not publicly acknowledge it—that it lacks the popular support necessary to preserve itself without our military intervention.

As the war drags on, as the inadequacy of the Nixon plan becomes more apparent, and as the frustrations mount at home, Americans are going to find new burdens such as the Song My massacre increasingly difficult to bear.

[From the Rexburg (Idaho) Standard, Dec. 2, 1969]

"IRREVERSIBLE" WITHDRAWAL

The Slaughter at My Lai, and hints of other similar episodes in Vietnam, give further impetus to the rising popular desire in the United States to get out of this terrible war. There is more and more reason for devoutly desiring an end to the fighting, and to the cost that this conflict imposes on our society.

In such a situation, one looks for reassurance that the administration is attuned to this widespread feeling—that it is determined to extricate us from the morass of Vietnam as quickly as possible. Such assurance has been given by President Nixon. Now, encouragingly it has been reaffirmed in even more direct terms by Secretary of State William P. Rogers.

The secretary said in an interview for the National Educational Television network that the present course of withdrawing our forces, while at the same time shifting the burden of defense to the South Vietnamese, is "irreversible." There was no equivocating, no hiding behind the language of diplomacy. Rogers said flatly: "We are withdrawing troops. We are going to Vietnamize the war. We are going to get American soldiers out of combat. And that is irreversible."

It must be noted that this sheds no light on how fast the withdrawal will move. At the present rate, a long time would pass before U.S. troops in Vietnam were down to anything like a mere standby force. Still, it is good to have that word, "irreversible," given such emphasis by one so close to the President.

There was encouragement, too in something else Rogers said. After years of official attempts in both the Nixon and Johnson administrations to flesh out a rather thin justification for our involvement in Vietnam, we now have this from the secretary of state: "We are not going to fight any major wars on the mainland of Asia again . . . unless we have the American public and the Congress behind us."

That, said Rogers, is the lesson the United States has learned in Vietnam. Let us hope that he is right on this point, and not merely optimistic. Those eminent military men who over the years had warned against committing this nation to war on the Asian land mass have beyond question been proved right. Now, happily, we have begun the "irreversible" process of getting out.

THE ONLY ALTERNATIVE: A REPLY TO THE PRESIDENT ON VIETNAM

Mr. CHURCH. Mr. President, following President Nixon's November 3 address to the Nation on the Vietnam war, I was asked by the editors of the Washington Monthly to write a reply in the nature of a rebuttal.

The resulting article was published in the December issue of the Monthly, in which I undertake to state the case for an orderly, systematic disengagement from the war as the only course offering us "a sure and certain path of extrication."

I ask unanimous consent that my article published in the Washington Monthly, entitled "The Only Alternative," be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE ONLY ALTERNATIVE—A REPLY TO THE PRESIDENT ON VIETNAM

(By Senator FRANK CHURCH)

On November 3, 1969, President Nixon appealed to the country for more patience with his Vietnam policy—for more time. To his credit, he stressed that "we are finally bringing American men home," but, like his predecessor, he could not find the rsolution to cut the knot that binds us to the Saigon generals. The United States thus remains committed to a war that we have been able neither to end nor to win. Ironically the reasons for the deadlock are much the same as those which governed the final outcome of our own struggle for national independence nearly two centuries ago.

In the second year of the American Revolution, the great William Pitt rose in the House of Lords and spoke words which, in a less civilized nation, might have been taken for treason. "My Lords," he declared, "you cannot conquer America. . . . You may swell every expense and every effort still more extravagantly; pile and accumulate every assistance you can buy or borrow; traffic and barter with every little pitiful German prime that sells and sends his subjects to the shambles . . . your efforts are forever vain and impotent, doubly so from this mercenary aid on which you rely, for it irri-

tates, to an incurable resentment, the minds of your enemies. . . . If I were an American, as I am an Englishman, while a foreign troop was landed in my country, I never would lay down my arms—never—never—never!"

The England which Pitt counseled was not a decrepit nation but a rising empire still approaching the peak of its power. The inglorious end of the American war, from the British point of view, was not followed by a worldwide loss of confidence in Britain's word or Britain's power. Yorktown was followed by Waterloo and in the 19th century Great Britain acquired vast new domains, becoming the vital center of world commerce and industry. The real loser of the American Revolutionary War was America's ally, France, whose prodigal waste of resources—all for the sake of humbling England—almost certainly helped bring about the French Revolution of 1789. To compound the irony, when the British Empire finally did disintegrate, it was not in the wake of defeat but of British "victories" in the two world wars.

The paradox turns back upon us full circle. The victory denied George III by ragtag American rebels fighting to end foreign rule has now, nearly two centuries later, been denied to us in distant Vietnam by stubborn, native guerrilla fighters equally determined to drive the foreigner from their land.

Faced with their implacable resolve, what kind of "victory" can be won? The "victory" of holding a proud people hostage? The "victory" of inflicting a "favorable kill ratio" upon an enemy who will not quit? The "victory" of maintaining a puppet government in Saigon propped up by the money we lavish on it and sustained in the field by the troops we send—and others we hire—to fight for it? No, there is no "victory" we can win in Vietnam worthy of the name. President Nixon himself conceded as much. Six months ago, he said, "We have ruled out attempting to impose a purely military solution on the battlefield."

When, on November 3rd, he again addressed the nation on the subject of Vietnam, he sought not to reach for the laurels of an unobtainable victory, but to reject the sackcloth of an abject defeat.

"The precipitate withdrawal of all American forces from Vietnam," he warned, "would be a disaster not only for South Vietnam but for the United States and the cause of peace. . . . Our defeat and humiliation in South Vietnam . . . would spark violence wherever our commitments help maintain the peace—in the Middle East, in Berlin, eventually even in the Western Hemisphere. For the future of peace," the President repeated, "precipitate withdrawal would be a disaster of immense magnitude."

It is unnecessary to dispute these dire prophecies, as no responsible critic of the war calls for our "precipitate withdrawal" from Vietnam. Webster defines "precipitate" as "acting very hastily or rashly; impetuous; very sudden, unexpected or abrupt." I am unaware that any member of Congress, in either party, has urged the President to preside over an American rout in Vietnam. Nor is there any real pressure elsewhere in the country—even on the campuses—for a Dunkirk-type evacuation. Mr. Nixon simply conjured up a dragon in order to slay the monster before the approving eyes of his vast television audience. Then, just to be sure no one had missed the screen, he recited how he has spurned the advice of those who pleaded with him to adopt "a popular and easy course," only to imply, a few minutes later, that the course he had adopted faced no resistance more formidable than that of a "vocal minority" of dissidents seemingly bent on surrender.

Setting these political theatrics aside, what are the real alternatives open to us for ending American participation in the Vietnamese War? In his speech, President Nixon mentioned two of the three courses that are actually available. He said, "We can persist in our search for a just peace through a negotiated settlement if possible, or through continued implementation of our plan for Vietnamization if necessary—a plan in which we will withdraw all of our forces from Vietnam . . . as the South Vietnamese become strong enough to defend their own freedom." Left unmentioned was the third course: a deliberate, orderly withdrawal of American forces which depends neither upon the willingness of Hanoi to give in, nor of Saigon to take over. If we are to free ourselves from the morass in which we are now caught, the third course alone offers us a sure and certain path of extrication.

THE FIRST COURSE—A NEGOTIATED SETTLEMENT

As for the first course, a negotiated settlement, the President himself all but writes it off. He concedes, despite his many overtures, that "no progress whatever has been made except agreement on the shape of the bargaining table," and he charges that the fault lies with Hanoi. Here in the United States, that proposition looks incontestable. From our point of view, the terms we have offered are unprecedented in their generosity. We say, let the people of South Vietnam decide by free elections who shall govern them. What could be fairer than that? What, indeed, could be more reasonable?

Yet the likelihood remains that the North Vietnamese and the Vietcong will continue to reject even the most "reasonable" proposals we can make. They have been at war for over 20 years and have lately been on the receiving end of something over three million tons of American bombs. They have also been betrayed before by foreign governments: by the French in 1946, who promised a referendum and then refused to hold it, by the United States in 1956, when the Eisenhower Administration upheld Ngo Dinh Diem in his refusal to hold the elections provided for in the Geneva Accords. These are not experiences to encourage reasonableness. The enemy may indeed be in a most unreasonable state of mind. Even the most carefully constituted electoral commission, even the most painstaking arrangements for a fair, internationally-supervised election, if that is possible, could well run up against an impenetrable wall of mistrust. If this seems outrageous, we might ask ourselves how, during our own civil war, the Union government would have responded to a British or French proposal for an internationally supervised plebiscite on Southern secession!

In his November speech, President Nixon held that Hanoi alone opposes self-determination for the people of South Vietnam. Once again he assured us that Saigon stood ready to accept the peoples' verdict, presumably even if elections were to result in a communist victory.

Mr. Nixon may think so, but not Mr. Thieu. Consistently and repeatedly he has made it clear that his government has no intention of accepting a "coalition with the Communists" or "domination by the Communists" under any circumstances whatever. No sooner had Thieu returned from his lovefeast with President Nixon at Midway last June than he proclaimed: "I solemnly declare that there will be no coalition government, no peace cabinet, no transitional government, not even reconciliatory government." If we must wait at the conference table in Paris for Saigon and Hanoi to compose their differences, then we shall probably have to sit there until pigs sprout wings.

Still, Mr. Nixon stalls for more time, trying to pry loose a settlement with modest troop withdrawals. He talks of bringing pressure on Hanoi. But you cannot bring pressure on an enemy by starting to leave! His real purpose is to bring pressure on Saigon to dignify our exit by accepting a transitional arrangement that will make it seem to the American people that the war has not been entirely pointless, that all the sacrifices have not been in vain.

So we wait, month after month, for some miracle to occur in Saigon or Hanoi that will bring the moribund peace talks back to life. We hint to Hanoi that progress at the conference table, or a winddown of the war, will mean faster withdrawal of American troops, while we tell Saigon that the peace will depend on the demonstrated ability of their forces to replace our own. In the resulting muddle, all we have succeeded in doing is to place the time-table out of our hands into theirs.

A policy wrong from the start can't be made to come out right. Our country is accustomed to imposing unconditional surrender on its enemies; there can be no compromise settlement of the war in Vietnam which will be applauded by the American people. Nor can there be any settlement worthy of reliance, regardless of its terms, for once we have left, no force remains to keep it.

THE SECOND COURSE—VIETNAMIZATION

The Nixon alternative to a negotiated peace is the "Vietnamization" of the war, by which he means turning the battle back, little by little, to the Thieu-Ky regime. How long this will take depends on Saigon, since it is clear that American disengagement cannot be completed until the South Vietnamese army, in the President's words, "becomes strong enough" to assume the full burden of the war. Thus does Mr. Nixon pin our hopes for a successful withdrawal in the future upon the very government which has proven the root cause of our failure in the past.

Had an honest and patriotic government ruled in Saigon, it would have beaten the Vietcong long ago, with no more than material support from the United States. The Vietnamese people are not lacking in military courage and resourcefulness; the Vietcong have demonstrated that. What is lacking is the ability of the Saigon government to inspire either the confidence of its people or the fighting spirit of its army. There is little mystery as to why this ability is lacking. An American study team made up primarily of prominent churchmen recently reported, after a trip to Vietnam, that the Thieu government ruled by terror, using torture and brutality to suppress political opposition, and that the regime relied more upon police state tactics and American support to stay in power than upon true representation and popular support.

Of all the misrepresentations which have been perpetrated about Vietnam none has been more insulting to the intelligence and offensive to the moral sensibilities of young Americans than the portrayal of the Saigon regime as an upholder of freedom and democracy.

Still, it is to this corrupt, incompetent rule of the Saigon generals that President Nixon looks for the implementation of his plan to extricate the United States from the war. He speaks of changing the military mix in Vietnam by first replacing American ground troops with South Vietnamese, while leaving our supply and support forces—air, artillery, engineers—in their combat roles. Gradually, the argument goes, these forces too could be reduced and returned home. So revealed, "Vietnamization" is not really a formula for leaving an American army engaged in Vietnam indefinitely. Its purpose is not to get us entirely out, but to keep us partially in.

Mr. Townsend Hoopes, former Under Secretary of the Air Force, has just completed a brilliant book on Vietnam called *The Limits*

of Intervention. In it he discusses the inherent weakness of any plan for partial withdrawal:

"At best, such a course is a prescription for interminable war; partially disguised by the declining level of U.S. participation, it would in fact require our country to sustain a continuing burden of war casualties and heavy dollar costs that would become open-ended as we leveled off our forces at 100,000 men or thereabouts.

"Sooner or later, and probably sooner, the American people would reawaken to the fact that they were still committed to the endless support of a group of men in Saigon who represented nobody but themselves, preferred war to the risks of a political settlement and could not remain in power for more than a few months without our largescale presence. These things are predictable because the Thieu regime is both self-serving and wholly unrepresentative; its strong anti-communist stance (which our support has both nurtured and hardened) bears little or no relation to the vaporous, myth-filled, unideological, village-oriented political sentiments of the vast majority of people who inhabit the non-country of South Vietnam.

"At worst, the course of partial withdrawal would produce a progressive erosion of the military situation in Vietnam, leading downward to a time when we faced the prospect of outright defeat. With U.S. strength reduced to 100,000 men, with no corresponding enemy reduction and with no dramatic improvement in the South Vietnamese government and army, developments could seriously threaten the safety of our smaller forces and thus pose the same hard question we faced in 1965—to escalate or liquidate. Were the United States to face, several months or years from now, the serious prospect of military defeat in Vietnam, I believe that fact would strain our capacity for wise choice beyond the breaking point, and that any decision in such circumstances could only further divide our people and imperil our political process."

Little can be added to so lucid and devastating an indictment of the Nixon plan for partial withdrawal, except perhaps this: To persist in a policy which offers us neither hope of winning nor hope of ending our marathon involvement in this tragic war—already the longest in our history—can only compound frustration at home and fuel the unsavory search for scapegoats.

In much the same way that the German General Staff, which had actually initiated Germany's surrender in World War I, later perpetuated the myth of defeat by betrayal on the home front, the men who led us into the Vietnam quagmire have sought to place the blame for the catastrophe on their domestic critics, on those of us who said that we never should have entered the quagmire in the first place and who now insist that we ought to get out. The "real battlefield," according to this self-serving doctrine of the architects of failure, is not in Vietnam but in America, where, if only the critics would be silent, the will of the enemy would supposedly be broken. "Let us understand," said the President, "North Vietnam cannot defeat or humiliate the United States. Only Americans can do that."

The failure to make any progress at the conference table is also being laid at the feet of the critics: "For the more divided we are at home," Mr. Nixon admonishes us, "the less likely the enemy is to negotiate in Paris."

Furthermore, Mr. Kissinger complains, "It's awfully hard to play chess with twenty kibitzers at your elbow, all of them demanding explanations of the purpose of every move, while your opponent listens."

The "Kibitzers" who are such an inconvenience to Mr. Kissinger are the very dissenters whose protest finally persuaded President Johnson to stop the escalation of the war and go to the conference table. Had these critics remained silent as the war makers would have had them do, the limited war in Vietnam might by now have escalated into a full-scale war with China. Whatever hope of peace there now is, it is the "kibitzers" gift to the architects of failure. Long may they "kibitz," acting, let it be remembered, on their own concept of patriotism—which is not the patriotism of silent acquiescence in a policy they detest, but the patriotism of Camus, who would have us love our country for what it ought to be, and of Carl Schurz, that "mugwump" dissenter from McKinley imperialism, who proclaimed: "Our country, right or wrong. When right, to be kept right; when wrong, to be put right."

THE THIRD COURSE

For the reasons I have endeavored to set forth, I believe that neither the prospects for a negotiated settlement nor the probable consequences of a partial withdrawal offer us any reasonable hope for resolving our predicament in Vietnam. For my part, I advocate a third course, ignored by the President in his address, but contained in a bipartisan resolution which Senator Mark Hatfield (R-Ore.) and I joined in introducing earlier this year. The operative language is the following:

"Be it resolved, That it is the sense of the Senate that, having furnished South Vietnam with an American shield for the past five years to allow for the development of its political and military capacities, the time has arrived for the people of South Vietnam to take charge of their own destiny; and be it further

"Resolved, That this can be accomplished only through a more rapid withdrawal of American troops, and a commitment by the United States to fully disengage from South Vietnam, pending such reasonable interval as may be necessary to effect an orderly transition on the battlefield, and provide for the safety of American troops and those who may wish to leave with them."

Nearly everyone now recognizes that our intervention in Vietnam was in error. Two years ago, our political skies were still filled with hawks; today, scarcely a hawk can be seen on the wing. President Nixon himself, once a ferocious hawk, may not openly admit, but he implicitly acknowledges, that this country has no vital interest at stake in Vietnam. Otherwise, we couldn't possibly leave the outcome for others to decide, even in a free election.

The time has come for the pretense to end; for the prideful nonsense to stop about securing an "honorable settlement" and avoiding a "disguised defeat." The truth is that as long as our troops stay in South Vietnam, we shall occupy a hostile country. There is no way that the United States, as a foreign power and a Western one at that, can win a civil war among the Vietnamese. Even now, five years after we entered the conflict, it remains a struggle between rival factions of Vietnamese for control of the government in Saigon. The outcome rests, now as before, on the Vietnamese themselves.

If we can find the resolution to end our protracted involvement in this war, we shall suffer no lasting injury to our power or prestige. I do not think that the liquidation of our intervention in Vietnam will mean the loss of our global greatness, any more than the loss of the American colonies cost England her greatness in the 18th century, or any more than the loss of Algeria and Indochina cost France her national stature. On the contrary, the end of empire was not a defeat for France but a liberation, in the wake of which a demoralized nation recovered its good name in the world and its own self-esteem. The termination of our war in Vietnam would represent a similar liberation for America, and even a victory of sorts—a victory of principle over pride and of intelligent self-interest over messianic delusion.

The United States government is not a charity-dispensing institution; its primary obligation is not to the Saigon generals, or to some portion of the Vietnamese people, but to the American people, to their security and well-being. When all is said and done about our "honor" and "commitment," the fact remains that our presence in Vietnam can be justified—if it can be justified—in terms of American interests, correctly defined as the freedom and safety of the American people.

"A nation cannot remain great," the President said on November 3rd, "if it betrays its allies and lets down its friends." But what more can the Saigon generals expect from us? The amount of money, weapons, ammunition, food, equipment, and supplies we have funneled into South Vietnam is beyond belief, vastly exceeding the outside help given North Vietnam and the Vietcong by all the communist governments combined. To fight for the South, we have sent an American expeditionary force of half a million men; no Russians or Chinese have been imported to fight for the North. Hanoi and the Vietcong do their own fighting. I say that Saigon—with larger and better-armed forces in the field than any arrayed against it—must stop relying on us to fight its war. We have kept our pledges, and done far more besides. We didn't undertake to make South Vietnam the 51st American state; we didn't promise to stand guard over the 17th parallel as though it were an American frontier.

But, the President argues, if we were to allow the Vietcong and the North Vietnamese to prevail, there would be "a collapse of confidence in American leadership, not only in Asia but throughout the world." Here Mr. Nixon espouses Mr. Rusk's concept of an exemplary war, which presumably demonstrates to other countries that the United States stands willing to intervene militarily to prevent communist-provoked internal "wars of national liberation" from succeeding. Yet, in his November address, the President reiterated what he had earlier disclosed in Guam, that the United States has a new policy: in the future, Asian governments must defend themselves against subversion from within and not look our way again. The motto, "No more Vietnams" cannot be reconciled with the fiction that we are still fighting an exemplary war in that country.

Withdrawing from Vietnam, according to President Nixon "would promote recklessness in the councils" of the Communist powers, and "would cost more lives. It would not bring peace, but more war." The assertion that by fighting in Vietnam we prevent other wars is pure speculation, rooted not in evidence but in analogy, the analogy of the 1930's when appeasement whetted Nazi Germany's appetite for aggression.

No good historian will buy that analogy. History unfolds more in paradoxes than in parallels. Mark Twain once observed that "We should be careful to get out of an experience only the wisdom that is in it—and stop there; lest we be like the cat that sits down on a hot stove-lid. She will never sit down on a hot stove-lid again—and that is well; but also she will never sit down on a cold one anymore." In the case of Vietnam we would do well to settle for the unwisdom that is in it and stop the sacrifice of real American lives for the sake of saving hypothetical ones in some conjectural war in an unforecastable future.

We dare not, says the President, abandon the South Vietnamese to "a massacre that would shock and dismay everyone in the world who values human life." Here again we are dealing with something that might happen; in the meantime does no one who values human life feel "shock and dismay" by the senseless sacrifice of American lives in endless assaults on useless hilltops and by death tolls of hundreds of GI's every week? Surely there is another way to protect those

South Vietnamese who may feel the need for sanctuary, if it comes to that. Better that we open our own gates to them than keep on sending Americans to die for them in their own land. As for the Saigon generals, there should be ample facilities for them on the French Riviera.

The most dangerous result of withdrawing from Vietnam, President Nixon contended on November 3rd, turns out not to be external but internal. "We would lose confidence in ourselves," he said. "Oh, the immediate reaction would be a sense of relief that our men were coming home. But as we saw the consequences of what we had done, inevitable remorse and divisive recrimination would scar our spirit as a people." Now, all of us have reason to fear the re-emergence of a new era of Joe McCarthyism in America. One wonders why the President insists on building the trap so large. Why does he continue to clothe this war in sacred language which has no bearing on its reality, as though "virtue" and "freedom" and the shape of the future itself were really at stake in Vietnam?

As Tom Wicker of The New York Times observed in his column on the Sunday following Mr. Nixon's address: "If the President wants . . . peace to be accepted in this country, it would be more logical for him to use such occasions as Monday's appearance to make a positive case that the American commitment to Vietnam has been honored. The most ever claimed for that commitment was that the United States had obligated itself to halt an aggression and give the people of South Vietnam an opportunity for self-determination. Dating from the first air strikes against the North in 1964, the 'aggression' has been staved off for five years. . . ." [In that time, I might add, we have told the world that a duly-elected government has been installed in Saigon.] "Surely," Wicker continues, "if the American people could be shown that the United States has done as much as possible of what it supposedly set out to do, it would be easier for Mr. Nixon to persuade the nation to expect something less than military victory." To this, I say, "Amen."

THE NATIONAL INTEREST

What indeed does Vietnam have to do with the vital interests of the United States, which is to say, with the freedom and safety of the American people? I attempted to define those interests more than four years ago, shortly after our full-scale intervention in Vietnam began. As to freedom, I said:

"Freedom, as a matter of fact, is not really at issue in South Vietnam, unless we so degrade freedom as to confuse it with the mere absence of communism. Two dictatorial regimes, one sitting in Hanoi, the other in Saigon, struggle for control of the country. Whichever prevails, the outcome is not going to settle the fate of communism in the world at large, nor the problem of guerrilla wars. They did not begin in Vietnam and will not end there. They will continue to erupt in scattered, far-flung places around the globe, wherever adverse conditions within a country permit communist subversion to take root."

And as to the safety of the American people, I added:

"Nor can it be soundly contended that the security of the United States requires a military decision in South Vietnam. Our presence in the Far East is not anchored there. Saigon does not stand guard over Seattle. We conquered the Pacific Ocean in the Second World War. It is our moat, the broadest on earth, from the Golden Gate to the very shores of China. There is no way for the landlocked forces of Asia to drive us from the Pacific; there is no need for us to retain a military base on the mainland of Asia."

After five years of futile warfare, I see no reason to alter that evaluation of American interests. The plain fact is that we did not then and do not now, have a vital interest in the preservation of the Thieu-Ky government, or even in the preservation of a noncommunist government, in South Vietnam. Nor do we have a vital interest in whether the two Vietnams are united or divided. We have preferences, to be sure, and our pride is at stake after committing ourselves so deeply, but preference and pride are sentiments, not interests. From the standpoint of our interests, we have been fighting an unnecessary war for five long years, making it possibly the most disastrous mistake in the history of American foreign policy. It can never be vindicated; it can only be liquidated.

The war in Vietnam has been more than unnecessary; it has been unsuccessful as well, and that, in the hard world of politics, is usually the greater crime. The Dominican intervention was unnecessary, illegal, and destructive of our relations with Latin America, but it achieved its immediate objective, the suppression of a revolution, with the result that the issue has not remained to plague and divide us. Had Mr. Rostow and his colleagues been right in 1965 in their supposition that the war in Vietnam could be won with "surgical" air strikes and a few months of ground warfare, the question of the war's necessity would not be the lacerating issue that it is today. But the Vietnam strategists were neither wise nor prescient nor lucky. With disastrous insensitivity to the thought processes of an alien culture, and with contemptuous disregard of the warnings offered by some of us in the Senate, they applied their "scientific" theories of warfare in the apparent belief that the Vietnamese would respond to "graduated" degrees of punishment as they themselves would have responded—by weighing immediate costs against prospective gains. But the Vietnamese turned out not to be scientists. They reacted irrationally and unaccountably by refusing to give up. Their calculations of cost and gain turned out to be different from ours; their willingness to endure punishment turned out to be greater than we had thought possible.

As a result, Vietnam is destined to revert to the control of the Vietnamese. Whether on the basis of a negotiated peace or an unnegotiated withdrawal, American forces will eventually have to be removed from Vietnam. When that happens, if not before, the Vietnamese civil war will be settled—as it should and would have been settled long ago but for American intervention—by the interplay of indigenous forces within Vietnam. Indeed, the chance for a political settlement among these forces may well hinge on our leaving, for it is hard to believe that the Saigon generals will ever settle, as long as they can depend on an American army to keep them in power.

There are—as we have learned and should have known without this trial by fire—limits to the ability of an alien power to work its will in a hostile environment. Our own civil war provides an example: after four years of savage warfare and 11 years of military occupation, the Union finally withdrew its forces from the South, allowing that region to revert to the political domination of the same people who had dominated the secessionist Confederacy. Another example is provided by the Boer War, Britain's turn-of-the-century "Vietnam." After more than two years of frustrating warfare against a guerrilla force of provincial rebels—in the course of which the mighty British Empire became an object of universal scorn and detestation—the British finally beat the Boers, organized the Union of South Africa and then, perforce, turned the political control of the country back to the defeated Boers, who have dominated South Africa ever since.

The common factor in the American Civil War, the Boer War, and the Vietnam War is that each confronted a dominant alien power with an intolerable dilemma: it could impose its will only by the sustained application of overwhelming force; the alternative was to withdraw that force, leaving the indigenous factions to strike their own natural balance more or less as they would have if the alien power had not intervened in the first place. In the one instance "victory" becomes insupportable; in the other meaningless.

Weighing this dilemma along with the other main considerations I have discussed—that this war is a failure and was never in our interests to begin with—what is to be inferred for a strategy of peace?

The point of departure is the clear, candid acknowledgment of our own lack of vital interest in the internal regimes of the two Vietnams. This means that we must break through the pride barrier which has thus far deterred us from admitting that, from the standpoint of our own interests, this war is and always has been a mistake. The purpose of this admission is not flagellation but freedom—the freedom of action which will only be ours when we end our thralldom to the Saigon generals and begin to act in our own interests and no longer on the basis of theirs.

The imperative is that we get out. This does not mean, of course, that the South Vietnamese government would be left helpless in the face of its enemies. It would still have 1,200,000 men under arms as against a total of 250,000 Vietcong and North Vietnamese soldiers now in South Vietnam. If Saigon's army could be inspired to defend the Saigon government, it would survive; if it could not be so inspired, then the government does not deserve to survive. In any case, we have done enough. We have fought their war for five long years and sacrificed 45,000 American lives. It is enough!

The process of disengagement need not be a long, protracted one. We can initiate it immediately by starting to withdraw forces on a significant scale—not the token scale initiated by the Nixon Administration. At the present rate of withdrawal, American troops will be engaged in Vietnam for the next eight to ten years!

For our own part, we have neither the need nor the right to sacrifice a single American life for any objective exceeding our own vital interest, which is the preservation of the freedom and safety of the American people. If this be thought ungenerous or unaltruistic, I put it to you that no nation has the moral right to be generous or altruistic with the lives of its own citizens. Perhaps a totalitarian nation, conceiving itself a spiritual entity transcending its individual citizens, may claim that right. A democratic nation cannot; its very existence is for the purpose of protecting and serving its citizens.

WHY WE MUST GET OUT

That is why it has become so necessary to disengage from Vietnam, because a process of deterioration has begun in our society which cannot be arrested, much less reversed, until we do get out. Dividing the American people as no issue since the Civil War has divided them, the war in Vietnam has been the cause and catalyst of great domestic ferment in the United States. The crisis it has directly caused is a moral one: the deep offense done to so many Americans by the blatant incompatibility of this war with the traditional values of our society. At the same time, by diverting financial and political resources and by dividing and demoralizing the American people, the war has incapacitated us for effective action in respect to the worsening crises of race and poverty, crime and urban deterioration, pollution and ecological decay.

None of this has to do with simple war-weariness, or, as President Nixon seems to think, with any lessening of the American people's "moral stamina and courage to meet the challenge of Free World leadership." Something more fundamental than fatigue is

involved. Twenty-five years ago the American people were simultaneously fighting two great wars on a vastly greater scale and at an even larger cost than the war in Vietnam, and their spirit never flagged. It is not just the burden of leadership or the exertions of warfare that outrage so many of our citizens, but it is this war, with its blood-soaked strategy of attrition, its unsavory alliance, and its objectives—which are both irrelevant to our interests and offensive to our principles. Nor is "weariness" in any way descriptive of what the war critics are experiencing; they are not tired but angry—angry about the needless killing and the stubborn pride which has kept us from putting a stop to it.

I recently received a letter from a young man who is deeply troubled by these matters. A portion of my reply follows:

"The deep disillusionment of young people in their country has its roots in the Vietnam war. When the power of the state is used to force young men to fight a war they believe to be wrongful, under penalty of imprisonment if they refuse, the seeds of sedition are sown. We now reap the bitter harvest, manifested in angry uprisings on campuses from coast to coast. . . .

"Whenever the limb is shaken, all the leaves tremble. Once the moral authority of the government is rejected, on an issue so fundamental as a wrongful war, every lesser institution of authority is placed in jeopardy. Every sacred principle, every traditional value, every settled policy becomes a target for ridicule or repudiation. Cauldrons of anarchy soon begin to bubble and boil.

"So it has happened that our country is coming unstuck. The ferment distorts every issue; perspective is lost. . . .

"I am convinced that we must end the war—or at least our participation in it—before we can begin to stick this country back together again. Then we must have the help of men like you, men who haven't abandoned all faith and who regard the job as worth doing."

Even now there is one thing in which we can take hope, and that is the great force of our American moral traditions. Out of all the dissent and disruption, we have learned something about ourselves—that we still believe in our own values, that Jefferson's idea of liberty and Lincoln's idea of equality and Woodrow Wilson's idea of a world community of law are still capable of moving us and guiding our behavior. We have learned, to be sure, that we are capable of violating our traditional values, but we have also learned that we are not capable of violating them easily, or permanently, or indeed without setting in motion the regenerative forces of protest and moral reassertion.

There will be time enough, when peace is restored, to contemplate the "lessons of Vietnam." Perhaps, if peace comes in the way that I believe it must come, some of our recent and present leaders will take it as the war's "lesson" that America has shown itself unworthy of world leadership. Others will conclude that we must develop more sophisticated techniques of intervention, or that we must improve our "social science," or substitute political and economic for military means of intervention. Still others, at the opposite extreme, will probably judge that we must never again involve ourselves in war on a distant continent. All of these propositions, and variations upon them, will undoubtedly be put forth as the "lessons" of Vietnam, but my own hunch is that none of these will stand as a definitive "lesson" or as a reliable guideline for the future.

It may be that there is no lesson in Vietnam other than the modest one suggested by James C. Thompson, Jr. of Harvard: "Never again to take on the job of trying to defeat a nationalist anticolonial movement under indigenous communist control in former French Indochina." Or the equally modest lesson: that we must for a time—not necessarily forever—tend to neglected matters at home. Or perhaps we will have learned nothing more than that we are a people with a moral tradition, a people who discriminate among their wars and who do not easily act against their own traditional values.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON CERTAIN FACILITIES PROJECTS PROPOSED FOR THE AIR FORCE RESERVE

A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting, pursuant to law, a report on the location, nature, and estimated cost of certain facilities projects proposed to be undertaken for the Air Force Reserve, dated December 9, 1969 (with an accompanying report; to the Committee on Armed Services.

REPORT OF ADVISORY COMMITTEE TO THE COOK COUNTY DEPARTMENT OF PUBLIC AID ON PRESIDENT NIXON'S WELFARE PROPOSAL

A letter from the chairman, advisory committee to the Cook County Department of Public Aid, transmitting a report prepared by the Committee on President Nixon's Welfare Proposals (S. 2986 and H.R. 14173) (with an accompanying report and list); to the Committee on Finance.

REPORT OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on management of the logistics airlift system contracted for by the Air Force, Department of the Air Force, dated December 18, 1969 (with an accompanying report); to the Committee on Government Operations.

REPORT ON U.S. ASSISTANCE PROGRAMS IN ETHIOPIA

A letter from the Comptroller General of the United States, transmitting a secret report on U.S. assistance programs in Ethiopia (with an accompanying report); to the Committee on Government Operations.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following favorable reports of nominations were submitted:

By Mr. MAGNUSON, from the Committee on Commerce:

Douglas William Toms, of Washington, to be Director of the National Highway Safety Bureau.

Mr. FULBRIGHT. Mr. President, from the Committee on Foreign Relations I report favorably sundry nominations in the Diplomatic and Foreign Service which have previously appeared in the CONGRESSIONAL RECORD and ask unanimous consent, to save the expense of printing them on the Executive Calendar, that they lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, ordered to lie on the desk, are as follows:

Thomas D. McKiernen, of Massachusetts, and sundry other persons, for appointment and promotion in the Diplomatic and Foreign Service.

Mr. GOLDWATER. Mr. President, from the Committee on Armed Services I report three flag and general officer nominations in the Navy and Air Force. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, ordered placed on the Executive Calendar, are as follows:

Gardiner Luttrell Tucker, of Virginia, to be an Assistant Secretary of Defense;

Lt. Gen. James W. Wilson (major general, Regular Air Force), U.S. Air Force, to be placed on the retired list, in the grade of lieutenant general;

Rear Adm. Eugene P. Wilinson, U.S. Navy, for commands and other duties determined by the President, for appointment to the grade of vice admiral while so serving; and

Vice Adm. Arnold F. Schade, U.S. Navy, for appointment as Navy senior member of the Military Staff Committee of the United Nations.

Mr. GOLDWATER. Mr. President, in addition to the above, I report 108 nominations in the Army in grade of lieutenant colonel and below. Since these names have already been printed in the CONGRESSIONAL RECORD, in order to save the expenses of printing on the Executive Calendar, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, ordered to lie on the desk, are as follows:

Arthur C. Harris, Jr., for reappointment in the active list of the Regular Army of the United States, from temporary disability retired list;

William R. Bates, and sundry other persons, for appointment in the Regular Army of the United States; and

Juan G. Santiago Rijos, scholarship student, for appointment in the Regular Army of the United States.

By Mr. HRUSKA, from the Committee on the Judiciary:

James L. Browning, Jr., of California, to be U.S. attorney for the northern district of California.

By Mr. McCLELLAN, from the Committee on the Judiciary:

Lynn A. Davis, of Arkansas, to be U.S. marshal for the eastern district of Arkansas; and

Lee R. Owen, of Arkansas, to be U.S. marshal for the western district of Arkansas.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GOLDWATER, from the Committee on Armed Services, without amendment:

H.R. 944. An act to amend section 404(d) of title 37, United States Code, by increasing the maximum rates of per diem allowance and reimbursement authorized, under certain circumstances, to meet the actual expenses of travel (Rept. No. 91–622).

By Mrs. SMITH of Maine, from the Committee on Armed Services, without amendment:

H.R. 14227. An act to amend section 1401a (b) of title 10, United States Code, relating to adjustments of retired pay to reflect changes in Consumer Price Index (Rept. No. 91–623).

By Mr. STENNIS, from the Committee on Armed Services, without amendment:

H.R. 14571. An act to amend the Central Intelligency Agency Retirement Act of 1964 for Certain Employees, as amended, and for other purposes (Rept. No. 91–624).

By Mr. TYDINGS, from the Committee on the District of Columbia, without amendment:

S. 3009. A bill to authorize the Commissioner of the District of Columbia to enter

into contracts for the payment of the District's equitable portions of the costs of reservoirs on the Potomac River and its tributaries, and for other purposes (Rept. No. 91–625).

By Mr. BIBLE, from the Committee on the District of Columbia, with amendments:

S. 1626. A bill to regulate the practice of psychology in the District of Columbia (Rept. No. 91–626).

BILLS AND A JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time and, by unanimous consent, the second time, and referred as follows:

By Mr. PACKWOOD:

S. 3262. A bill to establish the French Pete Creek Intermediate Recreation Area; to the Committee on Interior and Insular Affairs.

(The remarks of Mr. PACKWOOD when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. CRANSTON:

S. 3263. A bill for the relief of Maria Pierotti Lanci; to the Committee on the Judiciary.

By Mr. FONG:

S. 3264. A bill to waive the statute of limitations with respect to a certain claim against the United States by the State of Hawaii; to the Committee on the Judiciary.

(The remarks of Mr. FONG when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. MANSFIELD (for himself and Mr. INOUYE):

S. 3265. A bill for the relief of Mrs. Anita Ordillas; to the Committee on the Judiciary.

By Mr. COOK (for Mr. COOPER) (by request):

S. 3266. A bill to amend the Railroad Retirement Act of 1937 so as to increase the amount of the annuities payable thereunder to widows and widowers; to the Committee on Labor and Public Welfare.

By Mr. DOMINICK (for himself, Mr. BELLMON, Mr. FANNIN, Mr. GOLDWATER, Mr. JAVITS, Mr. KENNEDY, Mr. MONDALE, Mr. MURPHY and Mr. RANDOLPH):

S. 3267. A bill to amend title III of the Higher Education Act of 1965, relating to developing institutions, in order to promote the availability of higher education to Indians; and

S. 3268. A bill to amend title V of the Higher Education Act of 1965, in order to improve educational opportunities for Indians; to the Committee on Labor and Public Welfare.

(The remarks of Mr. DOMINICK when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. HART:

S. 3269. A bill for the relief of Tsung-Yao T'ien (Tien); to the Committee on the Judiciary.

By Mr. BYRD of West Virginia (for Mr. HOLLINGS):

S. 3270. A bill to amend the act of March 4, 1915, relating to the welfare of seamen in order to authorize the two watch system on certain voyages of less than 1,800 miles; to the Committee on Commerce.

S. 3271. A bill for the relief of Fred Earl Stephenson; to the Committee on the Judiciary.

By Mr. STEVENS:

S. 3272. A bill to extend to shipping in the Alaska trade the construction differential and operating differential subsidies now provided to shipping in foreign commerce; and

S. 3273. A bill to exempt Alaskan trade from sections 289 and 883 of the Cabotage laws; to the Committee on Commerce (by unanimous consent).

(The remarks of Mr. STEVENS when he introduced the bills appear later in the RECORD, under the appropriate heading.)

By Mr. FULBRIGHT (by request):

S. 3274. A bill to implement the Convention on the Recognition and Enforcement of Foreign Arbitral Awards; to the Committee on Foreign Relations.

(The remarks of Mr. FULBRIGHT when he introduced the bill appear later in the RECORD, under the appropriate heading.)

By Mr. MONDALE (for Mr. INOUYE):

S. 3275. A bill for the relief of Miss Alma Carrillo Custodio; to the Committee on the Judiciary.

By Mr. NELSON:

S. 3276. A bill to provide for the development of a low-emission engine for motor vehicles and for assistance to American industry in putting such engine into production as a replacement for the internal combustion engine; to the Committee on Commerce.

By Mr. KENNEDY (for himself, Mr. MONDALE, Mr. MCGOVERN, and Mr. HARRIS):

S.J. Res. 168. A joint resolution to provide for a White House Conference of Indians and Alaska Natives; to the Committee on Interior and Insular Affairs.

(Remarks of Mr. KENNEDY when he introduced the joint resolution appear later in the RECORD, under the appropriate heading.)

S. 3262—INTRODUCTION OF A BILL TO ESTABLISH THE FRENCH PETE CREEK INTERMEDIATE RECREATION AREA

Mr. PACKWOOD. Mr. President, today I am introducing legislation to create the French Pete Creek Intermediate Recreation Area within the Willamette National Forest in Oregon.

This proposed legislation has evolved after long and serious negotiations with the U.S. Forest Service. French Pete Creek is one of a kind. There exists nowhere else in the Oregon Cascades such a combination of a major untouched valley, a sweep of unbroken forest from low elevation to high elevation with all its associated ecological connotations, with all its associated opportunities for a special kind of recreation experience. I believe the people of Oregon have the right to experience the recreation, scenic and esthetic, which this valley has to offer, and which is becoming virtually extinct in our country. No valley remains within the Oregon Cascades that can offer all the characteristics of French Pete Creek drainage—a continuous stretch of unbroken, typical old growth virgin forest, in a totally unroaded and unlogged state.

It is the purpose of the bill I am today introducing to preserve this experience as part of our American heritage. This legislation would create an "intermediate recreation area" which would be administered by the Secretary of Agriculture; and wherein there would be no road construction, or timber harvest activities of any kind; no use of motor vehicles, motorized equipment or other mechanical transport; and no structures or installations, except as is necessary to meet emergency health and safety standards.

On the other hand, it would provide for trail construction, primitive walk-in campsites, trail bridges, sanitary facilities, and other necessary facilities.

In an article in the June 1968 Journal of Forestry, it was pointed out by professional forest ecologists that virgin forest communities typifying highly productive, low elevation sites are already scarce. I believe French Pete is one of the few remaining. I believe it is the only such valley left in the Oregon Cascades. I strongly feel it is worth saving and must be saved.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 3262) to establish the French Pete Creek Intermediate Recreation Area, introduced by Mr. PACKWOOD, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

S. 3264—INTRODUCTION OF A BILL WAIVING THE STATUTE OF LIMITATIONS WITH RESPECT TO A CERTAIN CLAIM AGAINST THE UNITED STATES BY THE STATE OF HAWAII

Mr. FONG. Mr. President, I introduce, for appropriate reference, a bill, the purpose of which is to grant a waiver of the statute of limitations in connection with the tort claim of the State of Hawaii against the United States.

My bill would waive the time limitation as set forth in section 5 of the act of March 9, 1920 (41 Stat. 526, 46 U.S.C. 745), as to the State of Hawaii's claim against the U.S. Bureau of Commercial Fisheries for damages to a pier owned by the State of Hawaii which resulted from the collision of the vessel *Townsend Cromwell* with the vessel *Neptune* in Kewalo Basin, Honolulu, Hawaii, on or about January 15, 1964. It does provide that such statute of limitations shall not apply in the case of any suit brought within 2 years after the date of enactment of this bill by such State.

The facts and circumstances giving rise to the claim of the Harbors Division, Department of Transportation, State of Hawaii, against the U.S. Bureau of Commercial Fisheries are as follows:

On or about January 15, 1964, the vessel MV *Townsend Cromwell*, under the control and supervision of employees and/or agents of the U.S. Bureau of Commercial Fisheries, collided with the vessel MV *Neptune* in Kewalo Basin, Honolulu, Hawaii. At the time of the collision, the *Neptune* was docked alongside of berth 104, Kewalo Basin. The catwalk on berth 104 was, and is, owned, operated, and maintained by the Harbors Division, Department of Transportation, State of Hawaii. The collision pushed the *Neptune* into the catwalk of berth 104, causing the berth to collapse. The damage being substantial, it was not economically feasible to repair the catwalk.

In meetings as to liability and the filing of a claim against the U.S. Bureau of Commercial Fisheries, officials in the harbors division of the State's department of transportation were apparently informed and advised by officials of the U.S. Bureau of Commercial Fisheries that the claim could be administratively settled under the Federal Tort Claims Act.

On September 17, 1965, and in reliance upon the representations and advice of the U.S. Bureau of Commercial

Fisheries, the legal section of the department of transportation, acting on behalf of the harbors division, filed a claim for $6,597 under the Federal Tort Claims Act. The claim was filed on form 95–103, "Claims for Damage or Injury," as supplied by, and submitted to the U.S. Bureau of Commercial Fisheries. The time of filing the said claim was well within the 2-year statute of limitations imposed by 46 U.S.C. 745.

Eleven months after submission of the State's claim, and after the statute of limitations had run, the deputy attorney general who had submitted the claim was informed by Mr. Lewis S. Flagg III, Associate Solicitor, Territories, Wildlife and Claims, Department of the Interior, by letter dated August 15, 1966, that the claim could not be administratively settled. The grounds were:

First, that the claim was an admiralty claim and did not come under the Federal Tort Claims Act:

Second, that that office could not administratively settle the claim under the provisions of the Federal Tort Claims Act; and

Third, that the 2-year statute of limitations had run against the State, thereby barring any action against the U.S. Bureau of Commercial Fisheries.

Further requests by the attorney general of the State of Hawaii, Mr. Bert T. Kobayashi, that the claim be settled administratively or that the statute of limitations be waived for this claim proved fruitless. On Feburary 25, 1969, the U.S. Department of Justice confirmed that the claim was barred by the statute of limitations and that the claim could not be settled administratively.

The bill I now send to the desk would right this injustice, and I urge its favorable consideration.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 3264) to waive the statute of limitations with respect to a certain claim against the United States by the State of Hawaii, introduced by Mr. FONG, was received, read twice by its title, and referred to the Committee on the Judiciary.

S. 3267 AND S. 3268—INTRODUCTION OF BILLS IMPROVING EDUCATIONAL OPPORTUNITIES FOR INDIANS

Mr. DOMINICK. Mr. President, I am introducing two bills which will implement some of the recommendations made by our Special Subcommittee on Indian Education. The first bill assists developing colleges for Indians; the second, encourages young Indians to enter the teaching professions, and at the same time provides aid to teachers in Indian schools.

Title III of the Higher Education Act is designed to assist in raising the academic quality of colleges which have the desire and potential to make a substantial contribution to the higher education resources of our Nation, but which for financial and other reasons are struggling for survival and are isolated from the main currents of academic life. The present law enables the U.S. Commissioner of Education to set up a national teaching fellow program as well as assist in the creation of cooperative arrangements under which these colleges may draw on the talent and experience of our finest colleges and universities. In addition, these arrangements may bring in the educational resources of business and industry, all in an effort to improve academic quality.

The law requires, however, that any of the developing institutions must be in existence for at least 5 years in order to be eligible for assistance.

Our subcommittee recommended that the Commissioner be authorized to waive the 5-year requirement in those cases of recently established colleges for educating Indians. An example of a college which the subcommittee intends should become eligible for consideration as a result of this bill is the Navajo Community College, which was established in January 1969.

My second bill would correct a serious deficiency in the Education Professions Development Act, relating to the various considerations involved in training and retraining teachers, attracting new personnel, and so forth.

According to the National Advisory Council on Education Professions Development, schools and programs operated by the Bureau of Indian Affairs are not now technically eligible for the benefits available under this act.

Moreover, I am concerned that schools operated by an agency of an Indian tribe, such as the Rough Rock demonstration school, may not have access to these resources.

As I have said before, one of our prime goals should be to shift from reliance on Indian experts to reliance upon expert Indians. What better way is there to achieve some forward momentum in this direction than to attract the Indian youth in this country to the teaching profession, and see that they receive our support as they continue to teach?

Mr. President, the following Senators have asked to join in cosponsoring the proposed legislation: Messrs. BELLMON, FANNIN, GOLDWATER, JAVITS, KENNEDY, MONDALE, MURPHY, and RANDOLPH.

Since these bills deal with Indians, but in fact deal with education, I ask that the assignment of these bills be considered carefully, because it is my opinion that they should properly come before our Committee on Labor and Public Welfare.

I ask unanimous consent that both bills be printed in the RECORD.

The PRESIDING OFFICER. The bills will be received and appropriately referred; and, without objection, the bills will be printed in the RECORD.

The bills (S. 3267) to amend title III of the Higher Education Act of 1965, relating to developing institutions, in order to promote the availability of higher education to Indians; and

(S. 3268) to amend title V of the Higher Education Act of 1965, in order to improve educational opportunities for Indians, introduced by Mr. DOMINICK, for himself and other Senators, were read twice by their titles, referred to the Committee on Labor and Public Welfare and ordered to be printed in the RECORD, as follows:

S. 3267

A bill to amend title III of the Higher Education Act of 1965, relating to developing institutions, in order to promote the availability of higher education to Indians

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 302 (d) of the Higher Education Act of 1965 is amended by inserting before the semi-colon at the end thereof a comma and the following: "except that the Commissioner may waive the five year requirement of this clause with respect to an institution located on or near an Indian reservation in any case in which he determines that such action will increase the availability of higher education to Indians".

S. 3268

A bill to amend title V of the Higher Education Act of 1965, in order to improve educational opportunities for Indians

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 503 (a) of the Higher Education Act of 1965 is amended (1) by inserting after "and higher education," the following: "including the need to provide such programs and education to Indians," and (2) by inserting after "the Department of Labor," the following: "the Department of the Interior,".

SEC. 2. Section 504(a)(1) of the Higher Education Act of 1965 is amended by inserting after "secondary schools" the following: "(including such schools operated by the Department of the Interior for Indians or by an agency of an Indian tribe.)".

SEC. 3. Section 505 of the Higher Education Act of 1965 is amended by inserting after "shall consult with" the following: "the Secretary of the Interior,".

SEC. 4. Subsections (a) and (d) of section 552 of the Higher Education Act of 1965 are each amended by inserting after "in all the States" a comma and the following: "including such needs in schools operated by the Department of the Interior for Indians, or by an agency of an Indian tribe.".

SEC. 5. Section 553(a) of the Higher Education Act of 1965 is amended by inserting at the end thereof the following: "The Commissioner may also enter into arrangements with the Secretary of the Interior, or with an agency of an Indian tribe, and use funds appropriated for the purpose of this section, for carrying out the purpose of this section with respect to schools operated by the Department of the Interior for Indians, or by an agency of an Indian tribe."

S. 3272 AND S. 3273—INTRODUCTION OF BILLS PERTAINING TO ALASKAN TRADE

Mr. STEVENS. Mr. President, I introduce today two bills of extreme importance to my State.

Alaska is a land of great potential. Ours is a vast land with a wealth of natural resources. It has hundreds of millions of acres of virgin forest lands. It is laced with thousands of miles of clean rivers. It is underlain with a wealth of minerals, including the largest proven reserves of petroleum in the United States.

But, Alaska is also a land of people—hearty, strong, industrious people of all ethnic backgrounds. These people are forging a new State, building homes and roads and industries that will turn a land of potential into one of productivity, that will turn a promise of the future into an asset of the present.

Alaska has long been termed the "last frontier," and this description is accurate. Alaska now stands in the position occupied by California in 1850, or by the 13 colonies in the 17th Century. And it shares the problems those pioneers of yesterday faced: isolation, lack of adequate communications, lack of sanitation facilities, and lack of adequate transportation. Most of these problems can be related to one factor—the great distances between the frontier and the nearest civilization. In the case of the colonies, it was 3,000 miles of open sea, in the case of California, it was 2,000 miles of unsettled plains and mountains, and in the case of Alaska it is either thousands of miles of rugged, unsettled Canadian northwest or thousands of miles of both sheltered and open seas. In all previous frontier situations the great distances over which supplies to sustain the pioneers had to be carried resulted in a high cost of living. And these distances also prevented products produced on the frontier from being competitive with similar products produced in settled areas even though the frontier producers may have had lower manufacturing costs. The Alaskan frontier has the same problems.

But Alaska's transportation problem is not simply the result of the great distances involved. Modern technology has so shrunk the world that people can travel to and from Alaska in a matter of hours whereas previous pioneers took weeks and even months to reach the frontier. Ship borne commerce can travel from Seattle to Anchorage in a fraction of the time it took to reach the colonies from Europe or California from the east coast. And, this same technology that greatly reduced the time involved has also reduced the costs. It cost $250 to fly from New York to California as late as 1936; the same flight can now be made for just over $100. Giant trucks traveling superhighways can deliver freight from New York to California at a fraction of the costs involved a few decades ago.

Then, why does Alaska still have this great transportation problem? It is not a result of such technology not being available to Alaska; it is. Alaska has consistently taken advantage of the latest technological advancements. Our highway standards already provide for the more efficient large trucks now being considered by Congress for the Interstate System. The latest jet aircraft fly in and out of our modern airports. Our ships employ the latest developments in containerized shipping.

The source of the problem can be isolated to two basic facts: Alaska is not contiguous to the South 48 by land, and an anomoly in our shipping laws substantially increases the cost of shipping by sea.

Alaska is as dependent on ocean shipping as an island. There is no railroad connecting Alaska with the South 48—though there should be. The only highway to the South 48 is still unpaved for over 600 miles of its length. Both automobiles and railway rolling stock are transported on barges or ferries. Air transportation is the only other means of mass transportation of passengers and merchandise to and from Alaska. And, at present, it is too expensive for the carrying of bulk cargo. So, oceangoing vessels must do the task.

Even though Alaska must rely on a single mode of transportation instead of the myriad of alternatives available to the South 48, there would be no problem if this mode of transportation were competitive with the alternatives. And, on a worldwide basis, it is. World trade reached a staggering $487 billion last year, and machinery shipped from Germany to Greece did not find itself at a competitive disadvantage because it went by ship rather than rail. In fact, in many instances ocean shipping is cheaper than alternative modes.

This is so partly because most of the shipbuilding nations of the world subsidize ocean shipping. These subsidies take many forms. Greece, for instance, exempts from income taxation for 10 years any ship brought under the Greek flag. Several nations provide either tax benefits or low interest rates for ship construction loans. France, Italy, and Japan and the United States provide direct subsidies for construction and operation of ships in domestic and foreign commerce.

But the United States has done a most peculiar thing. It has divided its shipping into two categories—foreign commerce and coastwise trade—and we subsidize the former to a great extent, but do nothing to make the latter competitive. Of the 11 major shipbuilding nations surveyed by the Joint Economic Committee of the U.S. Congress in 1963, three provided direct construction or operating subsidies to both foreign and domestic shipping and three provided such subsidies to domestic shipping only, but only one—the United States—provided direct operating and construction subsidies to ships engaged exclusively in foreign commerce, while denying such subsidies to its own domestic shipping industry. This anomaly in our shipping policy was a result of the unusual way in which we backed into subsidies.

The safety of passengers, crews, and merchandise on board oceangoing vessels has always been of great concern to the United States. During the past century we have taken a number of steps to assure that American passengers, crews, and merchandise would receive the maximum protection from ocean disasters, particularly fire, that technology allowed. In 1886, we prohibited the carrying of passengers on foreign vessels between American ports. In 1912 we prohibited the registry of foreign built vessels under the American flag unless they were engaged exclusively in foreign commerce. In 1920 we prohibited the carrying of merchandise on foreign built ships between American ports. This body of law is commonly known as the Jones Act. The reason for this heavy restriction against the use of foreign built vessels was, in part, predicated on the fact that we could control the method of construction of ships only if they were built in our own shipyards. Our safety record since the enactment of the Jones Act is an enviable one. There has not been one death due to fire on a nonmilitary ship built to our specification since these safety precautions were taken.

But the building of ships to these safety standards has been costly, and the ability of our merchant marine to compete in foreign commerce was greatly impaired. In 1936 we took steps to correct this problem by the enactment of construction differential and operating differential subsidies. However, since foreign built and foreign manned vessels could not operate in the coastwise trade—that is, trade between American ports—the subsidies were not extended to all shipping, but only to shipping which competed directly with foreign shipping.

The decision to exclude coastwide shipping from subsidization was based on two assumptions: That coastwise shipping was protected from competition by cheaper foreign shipping by operation of the Jones Act and that alternate methods of shipping among the United States did not receive construction differential or operating differential subsidies either.

These two assumptions, which may have had validity in 1936, are no longer valid today.

First, coastwise shipping, insofar as Alaska is concerned, does indeed receive competition from foreign shipping. Alaska imports almost all of its consumer goods and pays for them by exporting its natural resources. This is a typical frontier situation. The colonies exported agricultural products in exchange for manufactured goods from Europe. California exported lumber and gold and later fruits and vegetables in exchange for consumer products from the East. But California did not enjoy the option of an alternate market that Alaska does.

Alaska finds that Japan, a little over 3,000 miles away, has a great demand for its natural resources and is able to supply consumer goods in return. The "South 48," of course, is less than 2,000 miles away and offers the same market. However, Alaska finds itself shipping increasing quantities of its natural resources to foreign countries and importing increasing amounts of consumer goods from these countries in preference to the "South 48." In 1967, Alaska's five largest harbors reported handling 2,561,200 tons of imports, of which 538,800 tons—or more than 20 percent—was imported from foreign countries. In 1967 these same ports reported handling 1,279,800 tons of exports, of which 704,700 tons—or nearly 60 percent—was shipped to foreign countries. Alaska's three major timber-producing areas exported 333,000 tons of lumber to foreign countries, principally Japan, while only 3,000 tons went to the other 49 States. No one can tell me that there is no foreign competition in shipping when the shipping rates in foreign commerce make it economically advantageous to ship lumber, badly needed in the South 48 less than 2,000 miles away, to Japan over 3,000 miles away.

In testifying before the Subcommittee on Minerals, Materials, and Fuels recently, former Senator Kuchel pointed out that southern California will soon experience a shortage of natural gas. One solution to this problem is to ship liquified natural gas from Alaska to California. But, as Mr. Kuchel, pointed out:

The natural gas industry is faced with a paradox. The "lower 48" states are experiencing a rapid growth in the demand for natural gas, while generous supplies remain untouched in Alaska. Gas consumers in Japan and other countries may ultimately reap the benefit of these valuable Alaska reserves, since Alaska LNG can be transported to those countries in lower-cost, foreign-built vessels. On the other hand, American gas companies may find it economically advantageous to import LNG from foreign countries because such supplies can be carried in lower-cost tankers.

Mr. President, on October 10, Alaska began exporting LNG to Japan. Mr. Kuchel's prophecy is not conjecture, it is reality.

The assumption that coastwise trade does not require subsidization because it does not compete with foreign trade is wholly erroneous insofar as Alaska is concerned. Foreign commerce does compete, and it is winning. Alaska is being treated like a foreign country because of the anomaly in our shipping laws created by this erroneous assumption.

The second assumption on which the decision to exclude coastwise trade from subsidization was based is equally fallacious. The alternate methods of transportation are subsidized to a far greater extent than coastwise shipping. Highway user taxes exacted of all users, including passenger autos, build highways. Railroads received incentives to build their original rights-of-way, and they developed a system of rail transportation that was the envy of the world. Railroads no longer receive significant subsidies, and the decline that has resulted is evident to even the casual observer. In order to restore passenger rail service Congress is now being asked to commit $10 billion to the urban mass transit system—much of it for rail carriers. The fact that unsubsidized coastwise shipping is not competitive is clearly evidenced by the small fraction of cargo now carried in that trade compared to the volume handled by alternate transportation modes.

How does this concern Alaska, which does not have these alternate means of transportation? When California depended on shipments by ocean going commerce to supply its needs, the cost of living there was fantastic. As low-cost subsidized rail and truck transportation came to California, its cost of living grew closer to that of the east coast, until today it is a modest 10 percent higher than elsewhere in the South 48 and is actually lower than in some east coast cities. But Alaska cannot take advantage of this subsidized overland transportation because it does not have an unbroken land route to Alaska. It is not contiguous to the South 48 and it cannot control or subsidize the development of such transportation since a foreign country separates us from the rest of the United States. We depend to a great extent on ocean-going shipping and must work with that method of transportation.

So, Alaska is left with two basic facts with which it must reckon. The subsidies to non-ocean-going transportation are not available to Alaska because it does not have such transportation alternatives, and the subsidies which make ocean-going transportation competitive are denied Alaska because of the Jones Act restriction. There are two possible solutions to this dilemma: Alaska could be removed from the Jones Act restriction so that it could take advantage of the lower cost of foreign transportation, or Alaska ocean-going trade could be subsidized to offer to Alaska the same low transportation costs that the subsidization of alternate modes offers to the South 48. The bills I am introducing today are designed to accomplish these two solutions respectively.

The first would make the Jones Act restrictions inapplicable to ships operating in the Alaska trade. It would allow foreign vessels to compete with domestic carriers in shipping between points in Alaska and the rest of the United States. It would permit the registry of foreign-built ships under the American flag for purposes of engaging in the Alaska trade. It would permit foreign-built and foreign-operated vessels to carry passengers and merchandise between Alaska and the rest of the United States. It would solve the problems I have outlined without direct cost to the American taxpayer, since no subsidization by our country is involved. Of course, it is a foregone conclusion that American-built vessels could not compete without such subsidization, but it is a solution from Alaska's point of view. It is a "meat ax" approach to a problem that could be more deftly handled by a scalpel, and that is what the second bill I am introducing is designed to accomplish.

The second bill would retain the Jones Act restrictions intact. Alaska would not be opened up to direct foreign shipping competition, but it would still receive benefits as if it had. The bill simply extends to ships engaged in the Alaska trade the construction-differential and operating-differential subsidies now available to American ships engaged in foreign commerce. It is a logical step from the fact I have demonstrated that the Alaska trade does indeed compete with foreign commerce. It is a logical step also in view of the fact that Alaska cannot enjoy the subsidization granted to alternate modes of transportation in the South 48. Alaska, therefore, is not asking for special treatment, but is only asking that it receive the same benefits already granted to the South 48 through subsidies to alternate transportation methods.

The policies expressed in the Jones Act are national policies designed to benefit all Americans equally. But because of Alaska's geographical position as a noncontiguous State, the burden of these policies falls far more heavily on my State than on the contiguous 48. Because of the availability of alternate modes of transportation in the South 48, Alaska and Hawaii have ended up bearing almost the entire burden of these national policies. It is simply unfair to require that two States should bear the burden of policies designed to benefit all the States. My bill would recognize this unfairness insofar as Alaska is concerned and provide a simply way to remedy it.

I ask unanimous consent that the bills be referred to the Committee on Commerce. They pertain to amendments to the Jones Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bills (S. 3272) to extend to shipping in the Alaska trade the construction differential and operating differential subsidies now provided to shipping in foreign commerce, and (S. 3273), to exempt Alaskan trade from sections 289 and 883 of the Cabotage laws, introduced by Mr. STEVENS, were received, read twice by their titles, and referred to the Committee on Commerce (by unanimous consent).

S. 3274—INTRODUCTION OF A BILL IMPLEMENTING THE CONVENTION ON THE RECOGNITION AND ENFORCEMENT OF FOREIGN ARBITRAL AWARDS

Mr. FULBRIGHT. Mr. President, by request, I introduce for appropriate reference, a bill to implement the convention on the recognition and enforcement of foreign arbitral awards.

The bill has been requested by the Acting Assistant Secretary of State for Congressional Relations and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the letter from the Acting Assistant Secretary of State dated December 3, 1969, to the Vice President.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the letter and the bill will be printed in the RECORD.

The bill (S. 3274), to implement the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, introduced by Mr. FULBRIGHT (by request), was received, read twice by its title, referred to the Committee on Foreign Relations, and ordered printed in the RECORD, as follows:

S. 3274

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 9, United States Codes, is amended by adding:

"Chapter 2.—Convention on Recognition and Enforcement of Foreign Arbitral Awards

"Sec.
"201. Enforcement of Convention
"202. Agreement or award falling under the Convention.
"203. Jurisdiction; amount in controversy.
"204. Venue.
"205. Removal of cases from State courts.
"206. Order to compel arbitration; appointment of arbitrators.
"207. Award of arbitrators; confirmation; jurisdiction; proceeding.
"208. Chapter 1; residual application.

"§ 201. Enforcement of Convention

The Convention on the Recognition and Enforcement of Foreign Arbitral Awards of June 10, 1958, shall be enforced in United States courts in accordance with this chapter.

"§ 202. Agreement or award falling under the Convention

An arbitration agreement or arbitral award arising out of a legal relationship, whether contractual or not, which is considered as commercial, including a transaction, contract or agreement described in section 2 of this title, falls under the Convention. An agreement or award arising out of such a

relationship which is entirely between citizens of the United States shall be deemed not to fall under the Convention unless that relationship involves property located abroad, envisages performance or enforcement abroad or has some other reasonable relation with one or more foreign States. For the purpose of this section a corporation is a citizen of the United States if it is incorporated or has its principal place of business in the United States.

"§ 203. Jurisdiction; amount in controversy

An action or proceeding falling under the Convention shall be deemed to arise under the laws and treaties of the United States. The district courts of the United States (including the courts enumerated in section 460 of Title 28) shall have original jurisdiction over such an action or proceeding, regardless of the amount in controversy.

"§ 204. Venue

An action or proceeding over which the district courts have jurisdiction pursuant to section 203 of this title may be brought in any such court in which save for the arbitration agreement an action or proceeding with respect to the controversy between the parties could be brought, or in such court for the district and division which embraces the place designated in the agreement as the place of arbitration if such place is within the United States.

"§ 205. Removal of cases from State courts

Where the subject matter of an action or proceeding pending in a State court relates to an arbitration agreement or award falling under the Convention, the defendant or the defendants may, at any time before the trial thereof, remove such action or proceeding to the district court of the United States for the district and division embracing the place where the action or proceeding is pending. The procedure for removal of causes otherwise provided by law shall apply, except that the ground for removal provided in this section need not appear on the face of the complaint but may be shown in the petition for removal. For the purposes of Chapter 1 of this title any action or proceeding removed under this section shall be deemed to have been brought in the district court to which it is removed.

"§ 206. Order to compel arbitration; appointment of arbitrators

A court having jurisdiction under this chapter may direct that arbitration be held in accordance with the agreement at any place therein provided for, whether that place is within or without the United States. Such court may also appoint arbitrators in accordance with the provisions of the agreement.

"§ 207. Award of arbitrators; confirmation; jurisdiction; proceeding

Within three years after an arbitral award falling under the Convention is made, any party to the arbitration may apply to any court having jurisdiction under this chapter for an order confirming the award as against any other party to the arbitration. The court shall confirm the award unless it finds one of the grounds for refusal or deferral of recognition or enforcement of the award specified in the said Convention.

"§ 208. Chapter 1; residual application

Chapter 1 applies to actions and proceedings brought under this chapter to the extent that chapter is not in conflict with this chapter or the Convention as ratified by the United States."

SEC. 2. Title 9, United States Code, is further amended by inserting at the beginning:

"Chap. Sec.
1. General provisions ---------- 1
2. Convention on the Recognition and Enforcement of Foreign Arbitral Awards ---------- 201"

SEC. 3. Sections 1 through 14 of title 9, United States Code, are designated "Chapter 1" and the following heading is added immediately preceding the analysis of sections 1 through 14: "Chapter 1.—General Provisions".

SEC. 4. This act shall be effective upon the entry into force of the Convention on Recognition and Enforcement of Foreign Arbitral Awards with respect to the United States.

The letter, furnished by Mr. FULBRIGHT, follows:

Hon. SPIRO T. AGNEW,
President of the Senate.

DEAR MR. VICE PRESIDENT: On behalf of the Department of State I am forwarding draft legislation to implement the Convention on the Recognition and Enforcement of Foreign Arbitral Awards. The Senate gave its advice and consent to United States accession to the Convention on October 4, 1968. At the hearings on the Convention, the witness from the Department informed the Foreign Relations Committee that deposit of the United States instrument of accession would be deferred until the Congress enacted the necessary implementing legislation (Senate Executive Report No. 10, 90th Congress, 2d Session).

The Federal Arbitration Act, which has been codified in Title 9 of the United States Code, embodies basic national policy concerning arbitration. The Secretary of State's Advisory Committee on Private International Law, which includes representatives of the American Bar Association, the Conference of Chief Justices, and the Conference of Commissioners on Uniform State Laws, suggested that the Department discuss with a small group of representatives of the American Arbitration Association, members of the arbitration bar, and law school professors, the most effective approach to the implementing legislation. The consensus of the group, with which the Department of Justice concurs, was that rather than amending a series of sections of the Federal Arbitration Act it would be preferable to enact a new chapter dealing exclusively with recognition and enforcement of awards falling under the Convention. This approach would leave unchanged the largely settled interpretation of the Federal Arbitration Act. Moreover, it would avoid complicated interlineations which, while facilitating implementation of the Convention, might also mislead or confuse persons dealing with cases falling under the Federal Arbitration Act but not under the Convention.

The proposed new chapter has eight sections.

Section 201 provides that the Convention shall be enforced in United States courts in accordance with the provisions of the proposed new chapter.

Section 202 defines the agreements or awards that fall under the Convention. The second sentence of section 202 is intended to make it clear that an agreement or award arising out of a legal relationship exclusively between citizens of the United States is not enforceable under the Convention in United States courts unless it has a reasonable relation with a foreign State.

Section 203 gives original jurisdiction over any action or proceeding falling under the Convention to the District Courts of the United States regardless of the amount in controversy. Section 204 establishes venue with respect to such action or proceeding.

Section 205 permits removal of an action or proceeding relating to an agreement or award falling under the Convention from a State court to a District Court of the United States.

Section 206 permits a court to direct that arbitration be held at the place provided for in the arbitration agreement. Since there may be circumstances in which it would be highly desirable to direct arbitration within the district in which the action is brought and inappropriate to direct arbitration abroad, section 206 is permissive rather than mandatory.

Section 207 deals with confirmation of an award made under the Convention. A similar provision is included in section 9 of the Federal Arbitration Act.

The purpose of section 208 is to make the provisions of the Federal Arbitration Act applicable to actions brought under the Convention to the extent that such provisions are not in conflict with the implementing legislation or the Convention as ratified by the United States.

The Department of State has been informed by the Bureau of the Budget that there is no objection from the standpoint of the Administration's program to the submission of this proposal to the Congress for its consideration.

Sincerely yours,

H. G. TORBERT, Jr.,
Acting Assistant Secretary for Congressional relations.

SENATE JOINT RESOLUTION 168—INTRODUCTION OF A JOINT RESOLUTION PROVIDING FOR A WHITE HOUSE CONFERENCE OF INDIANS AND ALASKA NATIVES

Mr. KENNEDY. Mr. President, within the past few months three volumes have provided us with broad analyses of various issues relating to the American Indian and Alaska native. The Senate Subcommittee on Indian Education, the Citizens' Advocate Center, and Vine Deloria, Jr., have all reached the same conclusion: in the words of the subcommittee report, this Nation's Indian affairs has been "a national tragedy and a national disgrace."

The statistics indicating the extent of poverty of American Indians have been repeated again and again. Mr. Deloria, a Standing Rock Sioux, observed almost as an aside that "Indians rank lowest of any group in every conceivable statistic used to measure poverty." To what should we attribute this plight that Mr. Deloria describes? His answer: "It is the fault of the U.S. Government."

It should be clear by now that if any progress is to be made in Indian affairs, we must stop offering the white man's solutions as the only solutions to the Indians' problems. We should use as a premise, not a conclusion, that each American Indian and Alaska native must be provided with the full measure of his rights and privileges. He must be able to enjoy them in our society, if he chooses. Otherwise, he must feel secure in their enjoyment on his own land, on his own terms.

And, most importantly, we must learn his terms; we must provide the native American with a vehicle for making his voice heard here in Washington, by Congress and the Executive. We must listen to that voice, as well. I believe we should start by providing for a White House Conference of American Indians, to be convened as soon as possible. I am sending to the desk, on behalf of myself and Senators MONDALE, MCGOVERN, and HARRIS, a resolution to authorize such a conference.

The white man has sought both comprehensive and piecemeal solutions to the "Indian problem" for centuries.

Annihilation seemed to be our first solution. Puritans settling in the New

World burned Indian villages and shot their inhabitants or sold them into slavery. Bounties were set on Indians, and thus did the English introduce scalping to this country before the French and Indian War.

Although less direct in our approach following these early days, this Nation's policy "to Christianize and civilize the nation" has been no less destructive to Indian society. Assimilation was the ultimate goal—our goal, not theirs. Subjugation was the means.

Probably the most consistent feature of Federal Indian policy through the years, besides its failure, has been the lack of Indian participation in its formulation. In 1928, the Meriam report, commissioned by the Secretary of the Interior, surveyed the social and economic conditions of the American Indians and the administration of Indian programs. The report concluded that one of the most serious deficiencies in Indian administration was the exclusion of Indians from the management of their own affairs.

The Citizens' Advocate Center, over 40 years later, outlined the many solutions formulated by various governmental agencies for the red man's betterment and concluded:

> History, if it has taught anything, should demonstrate that unless the Indians can shape their own policies and priorities and have the opportunity to participate—an opportunity which is, after all, integral to American democracy—the solutions will fail.

We have studied the Indian, his tribes, his history, his customs. We have mounted task forces, study groups, research teams. We have come up with reports, studies, analyses, histories. Volume after volume of them.

These reports and studies have been important and valuable. But there is still a need for a more unified policy formulation, greater legislative oversight, and greater participation by Indians and Alaska natives in the total process. On the congressional side, we need more data, and more reliable data, on Indian needs and on Federal programs operating to meet them. The Special Subcommittee on Indian Education, in a little over 2 years, has provided us such data in the area of education. We should not stop there. I have thus recommended the establishment of a Select Committee on the Human Needs of the American Indian, and I shall soon introduce a resolution to authorize such a committee. This committee would gather and analyze data and work on programs and priorities necessary for Congress to carry out its legislative oversight function in this area.

But we need more than a congressional committee; more than another Executive task force. We need a vehicle for involving Indians and Alaska natives, on more than a token or after-thought basis, in the actual analysis and formulation of Federal policy and Federal programs. To this end, I am introducing today a resolution to provide for a White House Conference of American Indians and Alaska natives.

The final report of the Indian Education Subcommittee followed 2 years of hearings and extensive investigations into many aspects of the human needs of American Indians and Alaska natives. That report explored and analyzed the failure of national Indian policy throughout this country's history and recommended emphatically, in the following language, that Congress authorize a White House Conference on American Indian affairs:

> The Subcommittee has found that one of the primary reasons for the failure of national policy and programs for American Indians has been the exclusion—or only token involvement—of Indians in determining policy or planning of programs. A White House Conference on American Indian Affairs would be a dramatic reversal of this unyielding practice.

My resolution calls for broad-scale participation of Indians and Alaska natives in extensive deliberations at the local, regional, and national levels of the conference. I outlined this approach to the National Congress of American Indians in October of this year. It was endorsed by the NCAI and by the present Commissioner of Indian Affairs. Funds are to be provided equal to those Congress authorized for the White House Conference on Aging, reflecting our equally strong commitment to the American Indian and Alaska native.

I understand that some Indians feel it important to disassociate the conference provided in any congressional resolution from the White House as such. For example, one member of the American Indian Task Force suggested that a "red house conference" be authorized. I believe that we cannot ignore the prestige and attention accorded a conference of white status, wherever it is held. And as I earlier mentioned, it is important that the Indians be clearly heard by the Government and by as large a segment of the public as possible. I am thus using this designation, but I do suggest this as a proper area of inquiry by the committee considering the resolution.

The resolution provides that the Office of Economic Opportunity and the National Council on Indian Opportunity will be the contracting authorities and provide back-up services for the various stages of the conference. Indian and Alaska native tribes, communities, groups, and organizations will be responsible for actually conducting the conference. Participation of minority Indian groups and dissenting tribal factions is to be provided. Thus, the conference recommendations will be not only for the Indian people, but also by them.

We can all look forward to the recommendations that would come from such a White House Conference—to the information and to the insights that we would be provided with. It is time we raise to the highest status the voices of the American Indian and Alaska native. They have been listening to our voices, silently, for long enough.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 168), to provide for a White House Conference of Indians and Alaska Natives, introduced by Mr. KENNEDY (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

ADDITIONAL COSPONSORS OF BILLS

S. 2218

Mr. KENNEDY. Mr. President, on behalf of the Senator from Maryland (Mr. TYDINGS), I ask unanimous consent that, at the next printing, the names of the Senator from Indiana (Mr. BAYH), the Senator from Utah (Mr. BENNETT), the Senator from Nevada (Mr. CANNON), the Senator from Idaho (Mr. CHURCH), the Senator from New Hampshire (Mr. COTTON), the Senator from Missouri (Mr. EAGLETON), the Senator from Oklahoma (Mr. HARRIS), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Washington (Mr. JACKSON), the Senator from Maryland (Mr. MATHIAS), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Utah (Mr. MOSS), the Senator from Wisconsin (Mr. NELSON), and the Senator from Oregon (Mr. PACKWOOD) be added as cosponsors of S. 2218, to amend the Elementary and Secondary Education Act of 1965 and related Acts, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2846

Mr. KENNEDY. Mr. President, on behalf of the Senator from Maryland (Mr. TYDINGS), I ask unanimous consent that, at the next printing, the name of the Senator from Minnesota (Mr. MONDALE) be added as a cosponsor of S. 2846, the Development Disabilities Services and Facilities Construction Act of 1969.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL COSPONSOR OF A RESOLUTION

SENATE RESOLUTION 166

Mr. KENNEDY. Mr. President, on behalf of the Senator from Maryland (Mr. TYDINGS), I ask unanimous consent that, at the next printing, the name of the Senator from Virginia (Mr. SPONG) be added as a cosponsor of Senate Resolution 166, to provide for an International Conference on Problems of Human Environment.

The PRESIDING OFFICER. Without objection, it is so ordered.

MANPOWER TRAINING ACT OF 1969—AMENDMENT

AMENDMENT NO. 440

Mr. BOGGS. Mr. President, I submit an amendment intended to be proposed by me and the distinguished Republican leader (Mr. SCOTT), the distinguished assistant majority leader (Mr. KENNEDY), and the distinguished Senator from Pennsylvania (Mr. SCHWEIKER), to S. 2838, the proposed Manpower Training Act of 1969. This amendment would establish a new category of program that would be eligible for funds under title I of this legislation.

Specifically, the language of my amendment is designed to insure that the Federal Government can and will provide financial support to the opportunities industrialization centers.

The OIC concept was developed 5 years ago by the Reverend Dr. Leon Sullivan, a minister in Philadelphia. From this idea and money raised by Dr. Sullivan's congregation, the OIC concept of self-help job training has been expanded to some 75 cities across the Nation. Only one-third of the OIC's receive financial support from the Federal Government. Yet each provides an important adjunct to Federal manpower programs, an important blending of local needs with national goals.

Earlier this year, I introduced S. 1362, a bill that would enable the Federal Government to offer more adequate financial support to the OIC program. Since that time, of course, the proposed Manpower Training Act has been introduced by the distinguished Senator from New York (Mr. JAVITS). This is an attempt to coordinate the Government's programs for training the unemployed and the underemployed. It is my belief that the approach of this bill, S. 2838, has merit: Too many of these programs are widely scattered among various agencies, fragmenting the effort and undermining the goal.

While I personally believe it is important to formally recognize the OIC program through legislation. I believe we should not neglect this opportunity to use the Manpower Training Act to assist the OIC programs and thus strengthen the Federal Government's program in manpower training. As this important Manpower Training proposal is discussed by the Congress, I believe we should consider the OIC proposal in conjunction.

Therefore, I have prepared an amendment to the language of S. 2838. I must also add that the OIC approach meshes well with the intent of the Manpower Training Act. Both seek to invest increased authority and responsibility for program development in the States and cities.

You will notice that the amendment does not offer any reference to the title of the opportunities industrialization centers. Part of the approach of S. 2838 is to free the existing manpower training programs from the naming game.

While I believe it may still prove helpful to legislate Federal participation in the OIC's by name at some later date, every approach should be considered to insure that this important community program is given our full support.

The PRESIDING OFFICER The amendment will be received, printed, and will be appropriately referred.

The amendment was referred to the Committee on Labor and Public Welfare.

ANNOUNCEMENT OF RESUMPTION OF HEARINGS ON AMENDMENTS TO THE VOTING RIGHTS ACT OF 1965

Mr. ERVIN. Mr. President, I announce that the Subcommittee on Constitutional Rights will resume hearings on amendments to the Voting Rights Act of 1965, on January 27, 28, 29 and February 3, 4, and 5, 1970, in room 2228, New Senate Office Building.

So that all may understand what is being considered, I ask unanimous consent that the Voting Rights Act of 1965, the administration's proposed amendments (S. 2507), and the proposed simple extension of 5 years (S. 818) be inserted at this point in the RECORD.

There being no objection, the material referred to was ordered to be printed in the RECORD, as follows:

PUBLIC LAW 89–110, 89TH CONGRESS, S. 1564, AUGUST 6, 1965

An act to enforce the fifteenth amendment to the Constitution of the United States and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be known as the "Voting Rights Act of 1965".

SEC. 2. No voting qualification or prerequisite to voting, or standard, practice, or procedure shall be imposed or applied by any State or political subdivision to deny or abridge the right of any citizen of the United States to vote on account of race or color.

SEC. 3. (a) Whenever the Attorney General institutes a proceeding under any statute to enforce the guarantees of the fifteenth amendment in any State or political subdivision the court shall authorize the appointment of Federal examiners by the United States Civil Service Commission in accordance with section 6 to serve for such period of time and for such political subdivisions as the court shall determine is appropriate to enforce the guarantees of the fifteenth amendment (1) as part of any interlocutory order if the court determines that the appointment of such examiners is necessary to enforce such guarantees or (2) as part of any final judgment if the court finds that violations of the fifteenth amendment justifying equitable relief have occurred in such State or subdivision: *Provided,* That the court need not authorize the appointment of examiners if any incidents of denial or abridgment of the right to vote on account of race or color (1) have been few in number and have been promptly and effectively corrected by State or local action, (2) the continuing effect of such incidents has been eliminated, and (3) there is no reasonable probability of their recurrence in the future.

(b) If in a proceeding instituted by the Attorney General under any statute to enforce the guarantees of the fifteenth amendment in any State or political subdivision the court finds that a test or device has been used for the purpose or with the effect of denying or abridging the right of any citizen of the United States to vote on account of race or color, it shall suspend the use of tests and devices in such State or political subdivisions as the court shall determine is appropriate and for such period as it deems necessary.

(c) If in any proceeding instituted by the Attorney General under any statute to enforce the guarantees of the fifteenth amendment in any State or political subdivision the court finds that violations of the fifteenth amendment justifying equitable relief have occurred within the territory of such State or political subdivision, the court, in addition to such relief as it may grant, shall retain jurisdiction for such period as it may deem appropriate and during such period no voting qualification or prerequisite to voting, or standard, practice, or procedure with respect to voting different from that in force or effect at the time the proceeding was commenced shall be enforced unless and until the court finds that such qualification, prerequisite, standard, practice, or procedure does not have the purpose and will not have the effect of denying or abridging the right to vote on account of race or color: *Provided,* That such qualification, prerequisite, standard, practice, or procedure may be enforced if the qualification, prerequisite, standard, practice, or procedure has been submitted by the chief legal officer or other appropriate official of such State or subdivision to the Attorney General and the Attorney General has not interposed an objection within sixty days after such submission, except that neither the court's finding nor the Attorney General's failure to object shall bar a subsequent action to enjoin enforcement of such qualification, prerequisite, standard, practice, or procedure.

SEC. 4. (a) To assure that the right of citizens of the United States to vote is not denied or abridged on account of race or color, no citizen shall be denied the right to vote in any Federal, State, or local election because of his failure to comply with any test or device in any State with respect to which the determinations have been made under subsection (b) or in any political subdivision with respect to which such determinations have been made as a separate unit, unless the United States District Court for the District of Columbia in an action for a declaratory judgment brought by such State or subdivision against the United States has determined that no such test or device has been used during the five years preceding the filing of the action for the purpose or with the effect of denying or abridging the right to vote on account of race or color: *Provided,* That no such declaratory judgment shall issue with respect to any plaintiff for a period of five years after the entry of a final judgment of any court of the United States, other than the denial of a declaratory judgment under this section, whether entered prior to or after the enactment of this Act, determining that denials or abridgments of the right to vote on account of race or color through the use of such tests or devices have occurred anywhere in the territory of such plaintiff.

An action pursuant to this subsection shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28 of the United States Code and any appeal shall lie to the Supreme Court. The court shall retain jurisdiction of any action pursuant to this subsection for five years after judgment and shall reopen the action upon motion of the Attorney General alleging that a test or device has been used for the purpose or with the effect of denying or abridging the right to vote on account of race or color.

If the Attorney General determines that he has no reason to believe that any such test or device has been used during the five years preceding the filing of the action for the purpose or with the effect of denying or abridging the right to vote on account of race or color, he shall consent to the entry of such judgment.

(b) The provision of subsection (a) shall apply in any State or in any political subdivision of a state which (1) the Attorney General determines maintained on November 1, 1964, any test or device, and with respect to which (2) the Director of the Census determines that less than 50 per centum of the persons of voting age residing therein were registered on November 1, 1964, or that less than 50 per centum of such persons voted in the presidential election of November 1964.

A determination or certification of the Attorney General or of the Director of the Census under this section or under section 6 or section 13 shall not be reviewable in any court and shall be effective upon publication in the Federal Register.

(c) The phrase "test or device" shall mean any requirement that a person as a prerequisite for voting or registration for voting (1) demonstrate the ability to read, write, understand, or interpret any matter, (2) demonstrate any educational achievement or his knowledge of any particular subject, (3) possess good moral character, or (4) prove his qualifications by the voucher of registered voters or members of any other class.

(d) For purposes of this section no State or political subdivision shall be determined to

have engaged in the use of tests or devices for the purpose or with the effect of denying or abridging the right to vote on account of race or color if (1) incidents of such use have been few in number and have been promptly and effectively corrected by State or local action, (2) the continuing effect of such incidents has been eliminated, and (3) there is no reasonable probability of their recurrence in the future.

(e) (1) Congress hereby declares that to secure the rights under the fourteenth amendment of persons educated in American-flag schools in which the predominant classroom language was other than English, it is necessary to prohibit the States from conditioning the right to vote of such persons on ability to read, write, understand, or interpret any matter in the English language.

(2) No person who demonstrates that he has successfully completed the sixth primary grade in a public school in, or a private school accredited by, any State or territory, the District of Columbia, or the Commonwealth of Puerto Rico in which the predominant classroom language was other than English, shall be denied the right to vote in any Federal, State, or local election because of his inability to read, write, understand, or interpret any matter in the English language, except that in States in which State law provides that a different level of education is presumptive of literacy, he shall demonstrate that he has successfully completed an equivalent level of education in a public school in, or a private school accredited by, any State or territory, the District of Columbia, or the Commonwealth of Puerto Rico in which the predominant classroom language was other than English.

SEC. 5. Whenever a State or political subdivision with respect to which the prohibitions set forth in section 4(a) are in effect shall enact or seek to administer any voting qualification or prerequisite to voting, or standard, practice, or procedure with respect to voting different from that in force or effect on November 1, 1964, such State or subdivision may institute an action in the United States District Court for the District of Columbia for a declaratory judgment that such qualification, prerequisite, standard, practice, or procedure does not have the purpose and will not have the effect of denying or abridging the right to vote on account of race or color, and unless and until the court enters such judgment no person shall be denied the right to vote for failure to comply with such qualification, prerequisite, standard, practice, or procedure: *Provided,* That such qualification, prerequisite, standard, practice, or procedure may be enforced without such proceeding if the qualification, prerequisite, standard, practice, or procedure has been submitted by the chief legal officer or other appropriate official of such State or subdivision to the Attorney General and the Attorney General has not interposed an objection within sixty days after such submission, except that neither the Attorney General's failure to object nor a declaratory judgment entered under this section shall bar a subsequent action to enjoin enforcement of such qualification, prerequisite, standard, practice, or procedure. Any action under this section shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28 of the United States Code and any appeal shall lie to the Supreme Court.

SEC. 6. Whenever (a) a court has authorized the appointment of examiners pursuant to the provisions of section 3(a), or (b) unless a declaratory judgment has been rendered under section 4(a), the Attorney General certifies with respect to any political subdivision named in, or included within the scope of, determinations made under section 4(b) that (1) he has received complaints in writing from twenty or more residents of such political subdivision alleging that they have been denied the right to vote under color of law on account of race or color, and that he believes such complaints to be meritorious, or (2) that in his judgment (considering, among other factors, whether the ratio of nonwhite persons to white persons registered to vote within such subdivision appears to him to be reasonably attributable to violations of the fifteenth amendment or whether substantial evidence exists that bona fide efforts are being made within such subdivision to comply with the fifteenth amendment), the appointment of examiners is otherwise necessary to enforce the guarantees of the fifteenth amendment, the Civil Service Commission shall appoint as many examiners for such subdivision as it may deem appropriate to prepare and maintain lists of persons eligible to vote in Federal, State, and local elections. Such examiners, hearing officers provided for in section 9(a), and other persons deemed necessary by the Commission to carry out the provisions and purposes of this Act shall be appointed, compensated, and separated without regard to the provisions of any statute administered by the Civil Service Commission, and service under this Act shall not be considered employment for the purposes of any statute administered by the Civil Service Commission, except the provisions of section 9 of the Act of August 2, 1939, as amended (5 U.S.C. 118i), prohibiting partisan political activity: *Provided,* That the Commission is authorized, after consulting the head of the appropriate department or agency, to designate suitable persons in the official service of the United States, with their consent, to serve in these positions. Examiners and hearing officers shall have the power to administer oaths.

SEC. 7. (a) The examiners for each political subdivision shall, at such places as the Civil Service Commission shall by regulation designate, examine applicants concerning their qualifications for voting. An application to an examiner shall be in such form as the Commission may require and shall contain allegations that the applicant is not otherwise registered to vote.

(b) Any person whom the examiner finds, in accordance with instructions received under section 9(b), to have the qualifications prescribed by State law not inconsistent with the Constitution and laws of the United States shall promptly be placed on a list of eligible voters. A challenge to such listing may be made in accordance with section 9(a) and shall not be the basis for a prosecution under section 12 of this Act. The examiner shall certify and transmit such list, and any supplement as appropriate, at least once a month, to the offices of the appropriate election officials, with copies to the Attorney General and the attorney general of the State, and any such lists and supplements thereto transmitted during the month shall be available for public inspection on the last business day of the month and in any event not later than the forty-fifth day prior to any election. The appropriate State or local election official shall place such names on the official voting list. Any person whose name appears on the examiner's list shall be entitled and allowed to vote in the election district of his residence unless and until the appropriate election officials shall have been notified that such person has been removed from such list in accordance with subsection (d): *Provided,* That no person shall be entitled to vote in any election by virtue of this Act unless his name shall have been certified and transmitted on such a list to the offices of the appropriate election officials at least forty-five days prior to such election.

(c) The examiner shall issue to each person whose name appears on such a list a certificate evidencing his eligibility to vote.

(d) A person whose name appears on such a list shall be removed therefrom by an examiner of (1) such person has been successfully challenged in accordance with the procedure prescribed in section 9, or (2) he has been determined by an examiner to have lost his eligibility to vote under State law not inconsistent with the Constitution and the laws of the United States.

SEC. 8. Whenever an examiner is serving under this Act in any political subdivision, the Civil Service Commission may assign, at the request of the Attorney General, one or more persons, who may be officers of the United States, (1) to enter and attend at any place for holding an election in such subdivision for the purpose of observing whether persons who are entitled to vote are being permitted to vote, and (2) to enter and attend at any place for tabulating the votes cast at any election held in such subdivision for the purpose of observing whether votes cast by persons entitled to vote are being properly tabulated. Such persons so assigned shall report to an examiner appointed for such political subdivision, to the Attorney General, and if the appointment of examiners has been authorized pursuant to section 3(a), to the court.

SEC. 9. (a) Any challenge to a listing on an eligibility list prepared by an examiner shall be heard and determined by a hearing officer appointed by and responsible to the Civil Service Commission and under such rules as the Commission shall by regulation prescribe. Such challenge shall be entertained only if filed at such office within the State as the Civil Service Commission shall by regulation designate, and within ten days after the listing of the challenged person is made available for public inspection, and if supported by (1) the affidavits of at least two persons having personal knowledge of the facts constituting grounds for the challenge, and (2) a certification that a copy of the challenge and affidavits have been served by mail or in person upon the person challenged at his place of residence set out in the application. Such challenge shall be determined within fifteen days after it has been filed. A petition for review of the decision of the hearing officer may be filed in the United States court of appeals for the circuit in which the person challenged resides within fifteen days after service of such decision by mail on the person petitioning for review but no decision of a hearing officer shall be reversed unless clearly erroneous. Any person listed shall be entitled and allowed to vote pending final determination by the hearing officer and by the court.

(b) The times, places, procedures, and form for application and listing pursuant to this Act and removals from the eligibility lists shall be prescribed by regulations promulgated by the Civil Service Commission and the Commission shall, after consultation with the Attorney General, instruct examiners concerning applicable State law not inconsistent with the Constitution and laws of the United States with respect to (1) the qualifications required for listing, and (2) loss of eligibility to vote.

(c) Upon the request of the applicant or the challenger or on its own motion the Civil Service Commission shall have the power to require by subpena the attendance and testimony of witnesses and the production of documentary evidence relating to any matter pending before it under the authority of this section. In case of contumacy or refusal to obey a subpena, any district court of the United States or the United States court of any territory or possession, or the District Court of the United States for the District of Columbia, within the jurisdiction of which said person guilty of contumacy or refusal to obey is found or resides or is domiciled or transacts business, or has appointed an agent for receipt of service of process, upon application by the Attorney General of the United States shall have jurisdiction to issue to such person an order re-

quiring such person to appear before the Commission or a hearing officer, there to produce pertinent, relevant, and nonprivileged documentary evidence if so ordered, or there to give testimony touching the matter under investigation; and any failure to obey such order of the court may be punished by said court as a contempt thereof.

SEC. 10. (a) The Congress finds that the requirement of the payment of a poll tax as a precondition to voting (i) precludes persons of limited means from voting or imposes unreasonable financial hardship upon such persons as a precondition to their exercise of the franchise, (ii) does not bear a reasonable relationship to any legitimate State interest in the conduct of elections, and (iii) in some areas has the purpose or effect of denying persons the right to vote because of race or color. Upon the basis of these findings, Congress declares that the constitutional right of citizens to vote is denied or abridged in some areas by the requirement of the payment of a poll tax as a precondition to voting.

(b) In the exercise of the powers of Congress under section 5 of the fourteenth amendment and section 2 of the fifteenth amendment, the Attorney General is authorized and directed to institute forthwith in the name of the United States such actions, including actions against States or political subdivisions, for declaratory judgment or injunctive relief against the enforcement of any requirement of the payment of a poll tax as a precondition to voting, or substitute therefor enacted after November 1, 1964, as will be necessary to implement the declaration of subsection (a) and the purposes of this section.

(c) The district courts of the United States shall have jurisdiction of such actions which shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28 of the United States Code and any appeal shall lie to the Supreme Court. It shall be the duty of the judges designated to hear the case to assign the case for hearing at the earliest practicable date, to participate in the hearing and determination thereof, and to cause the case to be in every way expedited.

(d) During the pendency of such actions, and thereafter if the courts, notwithstanding this action by the Congress, should declare the requirement of the payment of a poll tax to be constitutional, no citizen of the United States who is a resident of a State or political subdivision with respect to which determinations have been made under subsection 4(b) and a declaratory judgment has not been entered under subsection 4(a), during the first year he becomes otherwise entitled to vote by reason of registration by State or local officials or listing by an examiner, shall be denied the right to vote for failure to pay a poll tax if he tenders payment of such tax for the current year to an examiner or to the appropriate State or local official at least forty-five days prior to election, whether or not such tender would be timely or adequate under State law. An examiner shall have authority to accept such payment from any person authorized by this Act to make an application for listing, and shall issue a receipt for such payment. The examiner shall transmit promptly any such poll tax payment to the office of the State or local official authorized to receive such payment under State law, together with the name and address of the applicant.

SEC. 11. (a) No person acting under color of law shall fail or refuse to permit any person to vote who is entitled to vote under any provision of this Act or is otherwise qualified to vote, or willfully fail or refuse to tabulate, count, and report such person's vote.

(b) No person, whether acting under color of law or otherwise, shall intimidate, threaten, or coerce, or attempt to intimidate, threaten, or coerce any person for voting or attempting to vote, or intimidate, threaten, or coerce, or attempt to intimidate, threaten, or coerce any person for urging or aiding any person to vote or attempt to vote, or intimidate, threaten, or coerce any person for exercising any powers or duties under section 3(a), 6, 8, 9, 10, or 12(e).

(c) Whoever knowingly or willfully gives false information as to his name, address, or period of residence in the voting district for the purpose of establishing his eligibility to register or vote, or conspires with another individual for the purpose of encouraging his false registration to vote or illegal voting, or pays or offers to pay or accepts payment either for registration to vote or for voting shall be fined not more than $10,000 or imprisoned not more than five years, or both: *Provided, however,* That this provision shall be applicable only to general, special, or primary elections held solely or in part for the purpose of selecting or electing any candidate for the office of President, Vice President, presidential elector, Member of the United States Senate, Member of the United States House of Representatives, or Delegates or Commissioners from the territories or possessions, or Resident Commissioner of the Commonwealth of Puerto Rico.

(d) Whoever, in any matter within the jurisdiction of an examiner or hearing officer knowingly and willfully falsifies or conceals a material fact, or makes any false, fictitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious, or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

SEC. 12. (a) Whoever shall deprive or attempt to deprive any person of any right secured by section 2, 3, 4, 5, 7, or 10, or shall violate section 11 (a) or (b), shall be fined not more than $5,000, or imprisoned not more than five years, or both.

(b) Whoever, within a year following an election in a political subdivision in which an examiner has been appointed (1) destroys, defaces, mutilates, or otherwise alters the marking of a paper ballot which has been cast in such election, or (2) alters any official record of voting in such election tabulated from a voting machine or otherwise, shall be fined not more than $5,000, or imprisoned not more than five years, or both.

(c) Whoever conspires to violate the provisions of subsection (a) or (b) of this section, or interferes with any right secured by section 2, 3, 4, 5, 7, 10, or 11 (a) or (b) shall be fined not more than $5,000, or imprisoned not more than five years, or both.

(d) Whenever any person has engaged or there are reasonable grounds to believe that any person is about to engage in any act or practice prohibited by section 2, 3, 4, 5, 7, 10, 11, or subsection (b) of this section, the Attorney General may institute for the United States, or in the name of the United States, an action for preventive relief, including an application for a temporary or permanent injunction, restraining order, or other order, and including an order directed to the State and State or local election officials to require them (1) to permit persons listed under this Act to vote and (2) to count such votes.

(e) Whenever in any political subdivision in which there are examiners appointed pursuant to this Act any persons allege to such an examiner within forty-eight hours after the closing of the polls that notwithstanding (1) their listing under this Act or registration by an appropriate election official and (2) their eligibility to vote, they have not been permitted to vote in such election, the examiner shall forthwith notify the Attorney General if such allegations in his opinion appear to be well founded. Upon receipt of such notification, the Attorney General may forthwith file with the district court an application for an order providing for the marking, casting, and counting of the ballots of such persons and requiring the inclusion of their votes in the total vote before the results of such election shall be deemed final and any force or effect given thereto. The district court shall hear and determine such matters immediately after the filing of such application. The remedy provided in this subsection shall not preclude any remedy available under State or Federal law.

(f) The district courts of the United States shall have jurisdiction of proceedings instituted pursuant to this section and shall exercise the same without regard to whether a person asserting rights under the provisions of this Act shall have exhausted any administrative or other remedies that may be provided by law.

SEC. 13. Listing procedures shall be terminated in any political subdivision of any State (a) with respect to examiners appointed pursuant to clause (b) of section 6 whenever the Attorney General notifies the Civil Service Commission, or whenever the District Court for the District of Columbia determines in an action for declaratory judgment brought by any political subdivision with respect to which the Director of the Census has determined that more than 50 per centum of the nonwhite persons of voting age residing therein are registered to vote, (1) that all persons listed by an examiner for such subdivision have been placed on the appropriate voting registration roll, and (2) that there is no longer reasonable cause to believe that persons will be deprived of or denied the right to vote on account of race or color in such subdivision, and (b), with respect to examiners appointed pursuant to section 3(a), upon order of the authorizing court. A political subdivision may petition the Attorney General for the termination of listing procedures under clause (a) of this section, and may petition the Attorney General to request the Director of the Census to take such survey or census as may be appropriate for the making of the determination provided for in this section. The District Court for the District of Columbia shall have jurisdiction to require such survey or census to be made by the Director of the Census and it shall require him to do so if it deems the Attorney General's refusal to request such survey or census to be arbitrary or unreasonable.

SEC. 14. (a) All cases of criminal contempt arising under the provisions of this Act shall be governed by section 151 of the Civil Rights Act of 1957 (42 U.S.C. 1995).

(b) No court other than the District Court for the District of Columbia or a court of appeals in any proceeding under section 9 shall have jurisdiction to issue any declaratory judgment pursuant to section 4 or section 5 or any restraining order or temporary or permanent injunction against the execution or enforcement of any provision of this Act or any action of any Federal officer or employee pursuant hereto.

(c) (1) The terms "vote" or "voting" shall include all action necessary to make a vote effective in any primary, special, or general election including, but not limited to, registration, listing pursuant to this Act, or other action required by law prerequisite to voting, casting a ballot, and having such ballot counted properly and included in the appropriate totals of votes cast with respect to candidates for public or party office and propositions for which votes are received in an election.

(2) The term "political subdivision" shall mean any county or parish, except that where registration for voting is not conducted under the supervision of a county or parish, the term shall include any other subdivision of a State which conducts registration for voting.

(d) In any action for a declaratory judgment brought pursuant to section 4 or section 5 of this Act, subpenas for witnesses who are required to attend the District Court for the District of Columbia may be served in

any judicial district of the United States: *Provided,* That no writ of subpena shall issue for witnesses without the District of Columbia at a greater distance than one hundred miles from the place of holding court without the permission of the District Court for the District of Columbia being first had upon proper application and cause shown.

SEC. 15. Section 2004 of the Revised Statutes (42 U.S.C. 1971), as amended by section 131 of the Civil Rights Act of 1957 (71 Stat. 637), and amended by section 601 of the Civil Rights Act of 1960 (74 Stat. 90), and as further amended by section 101 of the Civil Rights Act of 1964 (78 Stat. 241), is further amended as follows:

(a) Delete the word "Federal" wherever it appears in subsections (a) and (c);

(b) Repeal subsection (f) and designate the present subsections (g) and (h) as (f) and (g), respectively.

SEC. 16. The Attorney General and the Secretary of Defense, jointly, shall make a full and complete study to determine whether, under the laws or practices of any State or States, there are preconditions to voting, which might tend to result in discrimination against citizens serving in the Armed Forces of the United States seeking to vote. Such officials shall, jointly, make a report to the Congress not later than June 30, 1966, containing the results of such study, together with a list of any States in which such preconditions exist, and shall include in such report such recommendations for legislation as they deem advisable to prevent discrimination in voting against citizens serving in the Armed Forces of the United States.

SEC. 17. Nothing in this Act shall be construed to deny, impair, or otherwise adversely affect the right to vote of any person registered to vote under the law of any State or political subdivision.

SEC. 18. There are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this Act.

SEC. 19. If any provision of this Act or the application thereof to any person or circumstances is held invalid, the remainder of the Act and the application of the provision to other persons not similarly situated or to other circumstances shall not be affected thereby.

Approved August 6, 1965.

S. 2507

A bill to amend the Voting Rights Act of 1965, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be known as the "Voting Rights Act Amendments of 1969."

SEC. 2. Section 4 of the Voting Rights Act of 1965 (79 Stat. 438; 42 U.S.C. 1973b) is amended as follows:

(a) Strike subsection (a) and substitute the following:

"(a) (1) Prior to January 1, 1974, no citizen shall be denied the right to vote in any Federal, State, or local election because of his failure to comply with any test or device."

(b) Strike subsection (b) and designate present subsection (c) as (a) (2).

(c) Strike subsections (d) and (e) and add the following as subsection (b):

"(b) (1) No citizen of the United States who is otherwise qualified to vote in any State or political subdivision in any election for President and Vice President of the United States shall be denied the right to vote in any such election for failure to comply with a residence or registration requirement if he has resided in that State or political subdivision since the first day of September next preceding the election and has complied with the requirements of registration to the extent that they provide for registration after that date.

"(2) If such citizen has begun residence in a State or political subdivision after the first day of September next preceding an election for President and Vice President of the United States and does not satisfy the residence requirements of that State or political subdivision, he shall be allowed to vote in such election: (A) in person in the State or political subdivision in which he resided on the last day of August of that year if he had satisfied, as of the date of his change of residence, the requirements to vote in that State or political subdivision; or (B) by absentee ballot in the State or political subdivision in which he resided on the last day of August of that year if he satisfies, but for his nonresident status and the reason for his absence, the requirements for absentee voting in that State or political subdivision.

"(3) No citizen of the United States who is otherwise qualified to vote by absentee ballot in any State or political subdivision in any election for President and Vice President of the United States shall be denied the right to vote in such election because of any requirement of registration that does not include a provision for absentee registration.

"(4) 'State' as used in this subsection includes the District of Columbia."

SEC. 3. Section 5 of the Voting Rights Act of 1965 (79 Stat. 439; 42 U.S.C. 197c) is amended to read as follows:

"SEC. 5. (a) Whenever the Attorney General has reason to believe that a State or political subdivision has enacted or is seeking to administer any voting qualification or prerequisite to voting, or standard, practice or procedure with respect to voting which has the purpose or effect of denying or abridging the right to vote on account of race or color, he may institute for the United States, or in the name of the United States, an action in a district court of the United States, in accordance with sections 1391 through 1393 of title 28, United States Code, for a restraining order or a preliminary or permanent injunction, or such other order as he deems appropriate.

"(b) An action under this section shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28 of the United States Code and any appeal shall be to the Supreme Court."

SEC. 4. Section 6 of the Voting Rights Act of 1965 (79 Stat. 439; 42 U.S.C. 1973d) is amended by striking the words "unless a declaratory judgment has been rendered under section 4(a)" and by striking, immediately after the words "political subdivision," the words "named in, or included within the scope of, determinations made under section 4(b)."

SEC. 5. Section 8 of the Voting Rights Act of 1965 (79 Stat. 441; 42 U.S.C. 1973f) is amended by striking the words "Whenever an examiner is serving under this Act in any political subdivision the Civil Service Commission may" and substituting the following:

"Whenever the Attorney General determines with respect to any political subdivision that in his judgment the designation of observers is necessary or appropriate to enforce the guarantees of the fifteenth amendment, the Civil Service Commission shall".

Section 8 is further amended by adding the following sentence at the end thereof:

"A determination of the Attorney General under this section shall not be reviewable in any court."

SEC. 6. Section 14 of the Voting Rights Act of 1965 (79 Stat. 445; 42 U.S.C. 1973l) is amended by striking subsections (b) and (d) and designating subsection (c) as (b).

SEC. 7. The Voting Rights Act of 1965 (79 Stat. 437; 42 U.S.C. 1973) is amended by redesignating sections 17, 18, and 19 as sections 18, 19, and 20, respectively, and inserting the following new section:

"SEC. 17. (a) There is hereby created a temporary Commission, to be known as the National Advisory Commission on Voting Rights (hereafter called the Commission), which shall be composed of not more than nine members who shall be appointed by the President. The President shall designate one member to serve as Chairman.

"(b) The Commission shall undertake to make a study of the effects upon voting and voter registration of laws restricting or abridging the right to vote, including laws making residence, economic status or passage of literacy tests and other tests or devices a prerequisite to voting. The Commission shall also study the impact of fraudulent and corrupt practices upon voting rights. The Commission shall conduct such hearings as it deems appropriate and shall consult with the Attorney General, the Secretary of Commerce, and the Civil Rights Commission, and with such other persons and agencies as it deems appropriate. The Commission shall report to the President and the Congress, not later than January 15, 1973, the results of its study and make its recommendations for legislative or other action to protect the right to vote. The Commission shall cease to exist thirty days following the submission of its report.

"(c) As soon as practicable following enactment of this statute and after consultation with the Attorney General and the Civil Rights Commission, the Secretary of Commerce shall make special surveys, in States which utilize literacy and other tests or devices, and in other States, to collect data regarding voting in Presidential and other elections, by race, national origin, and income groups. The Secretary of Commerce shall transmit this data, together with other pertinent data from the Nineteenth Decennial Census, to the Commission.

"(d) The Commission is authorized to request from any executive department or agency any information and assistance deemed necessary to carry out its functions under this section. Each department or agency is authorized, to the extent permitted by law and within the limits of available funds, to cooperate with the Commission and to furnish information and assistance to the Commission.

"(e) Members of the Commission who are Members of Congress or in the executive branch of the Government shall serve without additional compensation, but shall be permitted travel expenses, including per diem in lieu of subsistence as authorized by section 5703 of title 5, United States Code, for persons intermittently employed. Other members of the Commission shall be entitled to receive compensation at the rate now or hereafter provided for GS–18 of the General Schedule for employees for each day (including traveltime) during which they are engaged in the actual performance of duties vested in the Commission. While traveling on official business in performance of services for the Commission, members of the Commission shall be allowed expenses and per diem in lieu of subsistence as authorized by law (5 U.S.C. 5703) for persons intermittently employed. The Commission shall have an Executive Director who shall be designated by the President and shall receive such compensation as he may determine, not in excess of the maximum rate now or hereafter provided for GS–18 of the General Schedule under section 5332 of title 5, United States Code. The Commission is authorized to appoint and fix the compensation of such other personnel as may be necessary to perform its functions. The Commission may obtain the services of experts and consultants in accordance with section 3109 of title 5, United States Code."

SEC. 8. The provisions of this Act shall become effective on August 6, 1970, except that section 7 shall become effective immediately.

S. 818

A bill to extend the Voting Rights Act of 1965 with respect to the discriminatory use of tests and devices

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4(a) of the Voting Rights Act of 1965 (79 Stat. 438; 42 U.S.C. 1973b(a)) is amended as follows:

In the first and third paragraphs, after the words "during the", strike the word "five" and substitute the word "ten".

In the first paragraph, after the words "a period of" strike the word "five" and substitute the word "ten".

ORDER OF BUSINESS

Mr. PROXMIRE. Mr. President, I ask unanimous consent to speak for 5 minutes in the morning hour.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONGRESS HAS MADE A $5 BILLION CUT IN PRESIDENT'S BUDGET REQUESTS

Mr. PROXMIRE. Mr. President, the impression has gotten around the country that the President is being responsible on fiscal policy and that Congress is being irresponsible; that Congress is spending money wildly; that we are, so far as the HEW budget is concerned, so far beyond the budget that the President, unfortunately, has to veto the measure.

This, I suppose, is not the fault of the press. The press is being honest and objective in reporting this news, but I think it is the fault of those of us who are on the Appropriations Committee and have responsibility for reporting to the Congress and the country on what we have done.

The fact is that the Congress has cut presidential requests sharply; that we have made cuts on most appropriation bills.

Let me document that. We have cut approximately $5 billion from the President's request for new obligational authority. We have cut almost $3 billion in fiscal 1970 outlays. I am including the Health, Education, and Welfare appropriation bill, as well as all the other bills. The fact is that if we take a look at the action that we have taken so far, we find that on only four of the 14 fiscal year 1970 appropriation bills has the Senate provided amounts above the President's requests. One is on the agriculture bill. One is on public works. One is on labor, health, education, and welfare. One is on transportation. These are the only bills in which Congress has provided money over the President's requests.

The fact is that if Congress had done exactly what President Nixon had asked us to do, we would have appropriated $5 billion more than we have appropriated.

I wonder how many people in the country really appreciate that? I am sure they have gotten the impression, especially in view of the action of the President last night, that the President is laboring hard to hold an irresponsible Congress in check. The fact is precisely the contrary. The cuts Congress has made is the biggest anti-inflation news of the year.

Contrary to the impression the Nixon administration is trying to put across, it is the Congress which has acted constructively to stem inflation. Congress this year has cut the President's budget.

It is therefore ironic that the President should now exhort the Congress to cut spending and that he should now threaten to veto funds for schoolchildren, for the poor, for the ill, and for the unskilled at the end of a year when he has sent to the Hill one inflationary budget request after another, from the ABM and the B–1 superbomber to the SST.

The President yesterday voiced his concern that the Labor-HEW appropriations bill is too costly at this critical point in the battle against inflation. It is strange that the President did not give way to a similar concern when he gave the go-ahead to the SST or when the Pentagon decided to ask for money for the B–1 superbomber and countless other unneeded weapons systems.

The President has tried to give the impression that we in the Congress are irresponsible spendthrifts. The facts are just the opposite.

What the Congress has done is to change the administration's priorities. We cut the military budget, which is far and away the most significant cause of the present inflation. We increased somewhat the funds for the poor. We cut back on proposed foreign aid abroad. We used some of the money to help the needy here at home. But, overall, we made a major cut in Presidential requests.

We have cut hardest in the military budget because that is where the greatest dividends in the war on inflation were to be found. Military spending is the most inflationary spending the Government does because it does not supply a marketplace need.

We have increased the funds for investment in people, where the payoff is largest. The President gives us no credit for cutting his inflationary requests. Yet he tells us he will veto the bill for health, for schools, and for the development of the human resources of the country.

The Congress—and I am talking about the House and the Senate—reduced the Treasury-Post Office-Executive Office appropriation by $38 million.

It reduced the independent offices bill.

It reduced the Department of Housing and Urban Development by $226 million.

It reduced the Interior Department appropriation by $10 million.

It reduced the State, Justice, Commerce, Judiciary appropriations bill by $111 million.

It reduced the legislative branch appropriation by $27 million below the request.

It will reduce the military construction bill by approximately $400 million, depending on what happens in conference. The House was $466 million under the President's request. The Senate was $313 million under the Presidents request.

Congress reduced the District of Columbia appropriation by $60 million below the President's request.

It reduced the Department of Defense appropriation $5.637 billion below the President's request.

It reduced the foreign aid appropriation between $1.071 billion and $858 million. Probably it will be about a $1 billion reduction below President Nixon's request.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am glad to yield.

Mr. GOLDWATER. Did I understand the Senator from Wisconsin to say that the Appropriations Committee cut defense spending by $5 billion?

Mr. PROXMIRE. The fact is that the action on new obligational authority so far was to reduce defense expenditures by a total of $5.637 billion below the revised budget request and to cut outlays by more than $3 billion below the President's request.

Mr. GOLDWATER. If I am not mistaken, it seems to me that the Senate Armed Services Committee provided about $1.7 billion——

Mr. PROXMIRE. The Senator is correct; that is a very good correction. The fact is that the Armed Services Committee did that. Further action on the floor cut it somewhat but did not cut very much more than the Armed Services Committee had recommended and what the Appropriations Committee had recommended. That is a good correction. I should have said the action of the Congress, not just the Appropriations Committee, reduced the President's request overall by $5 billion in obligational authority and by about $3 billion in spending outlays below what the President requested in his revised budget.

Mr. GOLDWATER. Again I may be mistaken, but it seems to me Secretary Laird accomplished most of that $5 billion reduction.

Mr. PROXMIRE. I am talking about cuts below the estimate of the Secretary. We are almost $9 billion below President Johnson's defense budget. Secretary Laird cut a little less than $4 billion below President Johnson's budget, and we went another $5 billion below Secretary Laird.

Mr. GOLDWATER. I just wanted to get the record straight. I know the Appropriations Committee works very diligently and that it has its problems on the floor when we continue to add billions of dollars to bills that we should not be adding billions of dollars to; but I think it is proper to recognize that a Republican administration, with a Republican Secretary of Defense, really got the ball rolling on cutting military expenditures.

Mr. PROXMIRE. Who got the ball rolling is a question.

Mr. GOLDWATER. The Armed Services Committee——

Mr. PROXMIRE. There were many who were responsible for it. There were critics of wasteful military spending. I think there are enough billions of dollars in cuts here to permit a number of people to get credit.

Certainly Secretary Laird deserves credit for cutting below the request of

Secretary Clifford and President Johnson's requests, but Congress as a whole made the big reduction. As we know, the Senate cut the amount lower than the House did.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. ALLOTT. I think it goes beyond that. If the Senator will examine the RECORD, I think he will find Secretary Laird's cut, in conjunction with the President's, which is reflected in the reduced appropriation, resulted in $3.5 billion below the President's original budget figure.

Mr. PROXMIRE. I am not talking about the original budget figure. I am talking about the latest revised budget. If we followed the recommendation of Secretary Laird and the President we would have been $5 billion above. We would have spent $5 billion more than we did.

Mr. ALLOTT. That is true, but the $5 billion cuts the President speaks of are reflected because of an additional $3.5 billion to $4 billion of Defense spending curbs by Secretary Laird, which are reflected in the $5 billion the Senator is talking about. This is below the revised estimate.

Mr. PROXMIRE. We have received cooperation from the Secretary of Defense, that is true. The point I am making is what I am sure is the impression around the country. In fact, it is the impression in this body. I brought this up, frankly, in our caucus this morning. Senators were astonished. They could not get over it. They wanted to get the table I will introduce to document the greater fiscal responsibility of Congress. I am sure the overwhelming majority of the people do not know that Congress reduced the President's requests sharply.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield.

Mr. WILLIAMS of Delaware. There is no question that Defense has been cut——

Mr. PROXMIRE. I am talking about overall cuts, not only in Defense, but other departments.

Mr. WILLIAMS of Delaware. Defense and a few of the others. When he speaks of Defense is it not true that the Senator is talking about pipeline appropriations which will feed into the economy months and years later? We have to take the initial step in appropriations, but those cuts will not show up until months or years later. It is a fact that right now, as a result of carryover appropriations last year and before, mandatory expenditures are running considerably higher than they were a year ago in Defense.

Mr. PROXMIRE. May I say to the Senator, first, that these cuts are cuts below what the President requested, for the future.

Mr. WILLIAMS of Delaware. That is right.

Mr. PROXMIRE. In addition to that, it is a fact that in terms of outlays, not obligational authority, but outlays—and this has the inflationary impact—the Senate is not $5 billion below on Defense, but about $3.1 billion below. But it is substantially below, and I assert that Congress is playing a bigger role in fighting inflation or cutting spending than the President is.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. PROXMIRE. I ask unanimous consent that I may proceed for 5 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS of Delaware. No, I think the figures—and we will have them over here in a moment, and I shall put them in the RECORD—the exact spending figures on Defense are running higher now than they were a year ago due to the excessive amount that was appropriated and contracts made in earlier years. The most recent daily Treasury report shows expenditures of all agencies are running about $5 billion higher than they were last year.

Mr. PROXMIRE. I did not know that, but I accept the word of the Senator from Delaware. He is always accurate in these things. But the point is that that is not the result of action by this Congress.

Mr. WILLIAMS of Delaware. Not entirely.

Mr. PROXMIRE. We cannot control what previous Congresses have done and what this President and the Secretary of Defense have decided to do now, this year. But what we have done this year is cut the appropriations, both the obligational authority and the outlay far below what the President requested in Defense and these other areas.

Mr. WILLIAMS of Delaware. The Senator is correct on Defense, and that reduction will show up later in reduced expenditures; and whether the reduction is the result of action by the Armed Services Committee, the Secretary of Defense, or Congress, it is certainly a step in the right direction, and one that is long overdue.

But what has the inflationary aspect now is that, as a result of large appropriations heretofore made and in the pipeline, expenditures must be carried on to fulfill our contract obligations. We are actually spending more money in the first 5 months of this fiscal year than we did in the corresponding months of fiscal year 1969, by about $5 billion.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. SPARKMAN. I am glad that the Senator changed his credit line to Congress as a whole, because action on these bills is always by Congress as a whole, both Houses.

Mr. PROXMIRE. Yes, absolutely. That statement that the Appropriations Committee has made the cuts was unfortunate. This was action by Congress as a whole.

Mr. SPARKMAN. I want to get this point clear: The Senator is speaking of the appropriations that have been passed by this Congress, as against the requests of the President, even under his revised estimates?

Mr. PROXMIRE. That is correct.

Mr. SPARKMAN. In this Congress; we are not dealing with previous Congresses.

Mr. PROXMIRE. That is right.

Mr. SPARKMAN. I wonder if the Senator has checked on previous Congresses. I do not know how it stands now, but I know several years ago I checked on it, and I found out that Congress almost always appropriates less money than the President requests.

Mr. PROXMIRE. The Senator is absolutely correct. I checked 2 years ago, and found that for the preceding 24 years, Congress was below the President 24 times. Every year it was below the President. This year we are doing one of our better jobs. Rarely have we cut as much as $5 billion below the President, though we have on occasion. Back about 1954 I think Congress cut something like $12 billion below the President.

The point I am making is that Congress has cut well below the President this year, and, as the Senator adds, we have done that consistently over the years.

Mr. SPARKMAN. I think a great many people get the idea that Congress is supposed to go exactly by the rule book as laid down by the Bureau of the Budget functioning for the President. I think we are in danger of losing the proper perspective. Historically, the legislative body is supposed to be on the one that, as we say, controls the purse strings; is that not correct?

Mr. PROXMIRE. Yes, indeed. This is the one real power Congress has. The President has the power of the sword; we have the power of the purse.

Mr. SPARKMAN. And it is a constitutional power.

Mr. PROXMIRE. That is right.

Mr. SPARKMAN. And the power the executive has is to recommend to Congress.

Mr. PROXMIRE. The President proposes, Congress disposes.

Mr. SPARKMAN. Yes; and the President recommended, this year, sums that totaled more than $5 billion above what Congress has appropriated?

Mr. PROXMIRE. Exactly.

Mr. SPARKMAN. That is a simple story, is it not?

Mr. PROXMIRE. Yes, indeed.

Mr. SPARKMAN. I appreciate the Senator's bringing out these facts. We are not dealing with current expenditures; they are controlled by past appropriations, are they not?

Mr. PROXMIRE. That is correct.

Mr. SPARKMAN. And we are talking about this only because, in his letter last night, as I understand, the President referred particularly to this bill because it exceeded his request?

Mr. PROXMIRE. Correct.

Mr. SPARKMAN. By the way, there is another thing, too. We receive a lot of criticism about dragging our feet on appropriation bills. Does the Senator from Wisconsin know what happened with reference to this Health, Education, and Welfare appropriation bill while it was pending, so far as additional requests from the White House are concerned?

Mr. PROXMIRE. How much were they? I am sure they were very substantial.

Mr. SPARKMAN. More than $3 billion.

Mr. PROXMIRE. More than $3 billion, that is right.

Mr. SPARKMAN. Came up here in additional requests.

Mr. PROXMIRE. From the President.

Mr. SPARKMAN. We were asked to add those items to the bill.

Mr. PROXMIRE. That is right.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. PROXMIRE. I ask unanimous consent to proceed for 5 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPARKMAN. Does the Senator know how recently some of those requests came?

Mr. PROXMIRE. How recently did they come?

Mr. SPARKMAN. How long ago it was when the last one came up?

Mr. PROXMIRE. No; I do not.

Mr. SPARKMAN. I heard the chairman of the subcommittee, the able Senator from Washington (Mr. MAGNUSON), say that some of those requests came up only 2 weeks ago.

Mr. PROXMIRE. Two weeks ago the President was asking us to spend more?

Mr. SPARKMAN. Asking for money, yes. And now he says because we went over what he asked for in this particular bill, it is inflationary and, therefore, he is going to veto it. Did the President say anything about the bills—Defense, for instance—where we cut $5 billion under what he requested?

Mr. PROXMIRE. Not a word.

Mr. SPARKMAN. Or any of these other bills the Senator has so well pointed out?

Mr. PROXMIRE. Independent offices, foreign aid, and a number of others. Of the 14, 10 of them were reduced.

Mr. SPARKMAN. Ten out of the 14 we reduced?

Mr. PROXMIRE. Exactly.

Mr. SPARKMAN. I certainly commend the Senator for bringing out these important facts for the Senate and for the country, and I hope the word gets around that that is the way Congress is acting, instead of in a reckless, irresponsible manner, as so many have charged us with acting.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. SPARKMAN. If there is fiscal responsibility in the Government today, it has been exercised by Congress.

Mr. PROXMIRE. There is no question about that, in the area of spending. Of course, we have to see what comes out of the tax bill.

Mr. SPARKMAN. Yes; I am not referring to the tax bill.

Mr. PROXMIRE. I understand it is in pretty good shape. As far as spending is concerned, there is no question but that the Senator is absolutely correct, and that, as the Senator from Delaware has indicated, there has been substantial reduction in spending.

Mr. WILLIAMS of Delaware. Will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from Delaware.

Mr. WILLIAMS of Delaware. Much has been made of the requests of the administration for some additional appropriations for some program in HEW. Normally those requests keep coming in at intervals and are included in the supplemental appropriation bill. This year we were so late with our regular appropriation bills that they were all included. Next year we shall have a second supplemental. This is the first time we have ever had appropriation bills held up this late. They should have been acted upon months ago.

And when we speak of the HEW bill I am not unmindful of the fact that when it was reported out earlier this week the Senate was actually debating the bill for about 3 hours before it came back from the printer. It was to my mind highly irresponsible for the Senate to have been asked to vote on a bill 3 hours before it was printed. I am sure that the Senator from Wisconsin will concur that we should have these appropriation bills at least a day or two ahead of time.

As to the amount of the HEW bill, it was $1,496,566,000 above the budget at the time of the final rollcall here in the Senate. This was for increased expenditures, and that is why the President is so concerned.

Mr. PROXMIRE. The Senator is correct. We were well under, as I say, on 10 of them. That was one of the four on which we were over; and, in the aggregate, we are more than $5 billion under what President Nixon asked Congress to find; and, in addition, in terms of the inflationary fight, we are about $3 billion under the President in terms of outlay of cash. This year, right now, in terms of the amount that will be spent during the fiscal year.

Mr. WILLIAMS of Delaware. I agree with the first part of the Senator's statement, that we have cut the appropriations back for some projected or future expenditures. In actual current expenditures we have not cut back. For instance, the $1,496 million we have added to HEW are mandatory expenditures, and the President could not impound the funds. While Defense is cut back, he could have impounded funds in certain areas where they are not for contractual obligations.

I mentioned a moment ago how expenditures were rising. I notice that the Defense military expenditures for the first 5 months of this year are about $250 million more than they were for the corresponding period last year.

On the military for the first 5 months of this year they were $37.352 billion compared with $37.102 billion in the corresponding 5 months for fiscal year 1969. That has to do with the fact that there were such large appropriations for the earlier years, and we have to pay for these contracts now. It takes time to shut it off.

Mr. PROXMIRE. The Senator is absolutely right. That was under both President Johnson and President Nixon. They were both involved. President Johnson asked for more money than Congress provided. That money was in the pipeline. It is being spent. President Nixon can spend that money on defense.

Mr. WILLIAMS of Delaware. He can cut back in the future, but not now. He is obligated to pay for contracts previously incurred under the prior administration.

In agriculture there is $1.2 billion more cost this year to carry out contractural obligations than in the corresponding period.

Mr. PROXMIRE. And agriculture is one of the four out of the 14 programs which the Senate increased above the President's request.

Mr. WILLIAMS of Delaware. On this item alone there is $1.2 billion in extra cost for the first 5 months.

HEW expenses are up $720 million. The increase on the interest on the national debt was $500 million more in the first 5 months of this year than last year. That is to pay the interest on the money we borrowed to cover last year's deficit.

Altogether our expenditures in the first 5 months of this fiscal year have increased $9.5 billion above the corresponding 5-month period last year whereas our income increased only $6 billion. We are running about $3.7 billion more deficit than last year.

I notice that on December 12 our national debt had climbed up to $372 billion.

We are increasing our national debt by an average of about $720 million a month right now to pay for the operating expenses of the Government. That is the reason that I said we could not afford any reduction in taxes at this time.

Mr. PROXMIRE. I agree with much of the thrust of what the Senator is saying. We are spending enormous amounts of money, and we will probably have to spend more in the future.

However, so far, in terms of responsibility, as between this Congress and the Nixon administration, if we had followed to the letter the advice of the Bureau of the Budget, we would have appropriated $5 billion more than we have appropriated and provided for outlays of more than $3 billion more than we are providing.

So, this Congress, I would say, has been more responsible in the area of spending and has fought harder to combat inflation than has the President of the United States.

Mr. WILLIAMS of Delaware. Mr. President, I cannot agree with the Senator from Wisconsin on that point.

Mr. PROXMIRE. I am talking about this year.

Mr. WILLIAMS of Delaware. Our mandatory programs, the Veterans' Administration, and various other programs that are mandatory, have been approved in the Congress. In fact, if Congress continues to save money as this Congress is saving money we shall save ourselves into a state of bankruptcy. The Senator will agree with me that we are not making any headway when we run behind by $720 million a month.

Mr. PROXMIRE. The Senator agrees with me that we are $5 billion below the requests.

Mr. WILLIAMS of Delaware. We have cut back on Defense requests but have increased the mandatory expenditures to more than offset it.

Mr. PROXMIRE. Defense is only one out of the 10 that have been cut back. Four others have been increased, and there have been substantial cuts elsewhere.

Mr. HART. Mr. President, will the Senator yield, so that I may attempt, perhaps by oversimplifying my question, to clarify what the Senator from Wisconsin is suggesting?

Mr. PROXMIRE. I yield.

Mr. HART. Mr. President, let us assume that we have been what we are sometimes charged with being, a rubberstamp. If this Congress had rubberstamped the Nixon budget request, would we be authorizing more money than we as independent agents are authorizing?

Mr. PROXMIRE. Yes; because if we had been a rubberstamp and done everything they asked us to do we would have been providing more than $5 billion more than we did provide.

Mr. HART. Mr. President, so, except for Congress, which in the minds of most of the people of the country is a big spender, except for Congress and its responsible action, if there had not been any Congress intervening, the President would be in a position of pumping out more money.

Mr. PROXMIRE. The Senator is absolutely correct. The administration is a big spender. There is no question about that.

Mr. HART. I think that comes as a surprise to some Members of the Congress.

Mr. PROXMIRE. I think it does, too. But there is not any question about it.

Mr. ALLOTT. Mr. President, the executive branch is always the spender. Congress does not spend money.

Mr. PROXMIRE. That may be, but the executive branch last night with their dramatic—some would call it a "snow job"—action gave the impression very skillfully that it was cracking down on a spendthrift Congress that was throwing money around like a drunken sailor, in port after a year at sea. The administration pointed out that it is constrained now to act to veto the HEW bill under these circumstances.

Mr. ALLOTT. I think one thing that was not understood last night at all, except by a handful of people, if I may say so—and I am not sure that even some of those intimately involved really understood—is the fact that the Labor, Health, Education, and Welfare appropriation bill—which is I guess still in conference, although I am not sure what the situation is at the moment—contains so many items which the President must spend and must spend this year. And the President pointed that out.

It was pointed out in some 3 hours of conferences in which the majority leader and several of the senior appropriations people were involved, along with the minority leader and the distinguished Senator from North Dakota (Mr. YOUNG), who is the ranking minority member on the Appropriations Committee, and the senior Senator from Colorado. This was pointed out repeatedly, again and again.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. PROXMIRE. Mr. President, I yield myself an additional 5 minutes.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized for another 5 minutes.

Mr. ALLOTT. Mr. President, this is where the real impact of the HEW bill is going to come, and the real impact so far as spending and inflation.

There are two points I would like to ask the Senator about. The Senator has been a member of the Appropriations Committee for some time, I do not recall exactly how long.

Mr. PROXMIRE. I have been a member of that committee for 6 years.

Mr. ALLOTT. I have been a member of that committee now for 10 years. And I do not think there was ever an instance on an overall basis that Congress was not somewhere in the neighborhood—and I had these figures at one time and am trying to recall them—of between $5 billion and $7 billion a year in its appropriation bills below the President's budget.

Mr. PROXMIRE. I made a study of that about 2 years ago. I found that for the preceding 24 or 25 years, Congress has been under the President's budget every year. There is no question about that. One year they were under his budget by $12 billion. They are usually under it by $1 billion or $2 billion.

This is a good Congress in this respect. It is more than usual below the President's request. They are being tremendously economical. This is one of the better Congresses, I would say.

There have not been more than one or two Congresses in the past that have done a better job in terms of cutting requests.

Mr. ALLOTT. Mr. President, of the $5 billion the Senator has talked about that Congress has cut, about $3.5 billion in round figures of those cuts are subsequent cuts that were made by the President and Secretary of Defense Laird in the Defense Department and are reflected in the Defense appropriation bill.

Mr. PROXMIRE. The Senator can put any interpretation he wants on it. However, we have taken the latest revised budget of December 17. If we could get the figures for today, we would use them. As of December 17, 1969, it was $5 billion above what Congress provided.

Mr. ALLOTT. Yes. I will agree to that unadorned statement. But of that $5 billion, approximately $3.5 billion of the cut is reflected in subsequent cuts and expenditures in the Defense Department made between the President and Secretary Laird.

Mr. PROXMIRE. Secretary Laird said he was cutting reluctantly; that, in his view, it could hurt our defense, and that he was doing this only because he felt he had to accommodate a Congress that insisted on it.

Mr. ALLOTT. If we are going to talk about that, we could get into another area.

Mr. PROXMIRE. It was not done of his volition.

Mr. ALLOTT. Our whole defense system in this country has been brought to a shambles by the Vietnam war. There are so many areas in which to protect ourselves that we will have to make large expenditures, and we still have a long way to go in that respect.

I want to say one other thing, if the Senator will yield—and I know he does a great deal of work in this area. I wonder whether he agrees with me that one of the most phony things that ever came down the track is the so-called combined budget, or unitized budget, under which we have been operating the past 2 or 3 years. And does the Senator believe that we would do much better, in dealing with figures such as he had in his hand a few moments ago—new obligational authorities and so forth—to go back to the administrative budget, in which we say we appropriate, and we do appropriate?

I know that the Senator is far too smart to think that, as a businessman or as a professional man, he could mix his customers' funds with his own and think he could get away with it. We all know that none of us could. But in the Government of the United States, that is exactly what we are doing under the budgetary system.

Mr. PROXMIRE. The new budget, as the Senator knows, is the result of a Johnson committee, but it was a Johnson committee headed by the present Secretary of the Treasury, David Kennedy. The executive director of the group that made the study and recommended the budget was Robert Mayo, the present Director of the Budget. These gentleman recommended that Congress would be better served by this kind of consolidated budget. I think it gives us a better picture of the impact of Federal spending on the country.

The Senator is correct in pointing out that it does not give us as clear a picture as the administrative budget did of the effect on the national debt and of many other relationships. We ought to have them all in mind, if we are going to make a fair judgment of our own actions and of the effect on the country as a whole.

Mr. ALLOTT. I think that the Secretary of the Treasury, in that task force—or committee, or whatever it was; I do not know its official designation—in doing this, I think it was one of the biggest mistakes the country ever made, because in the first year everybody was confused because part of the departments were operating under one budget and another. But you cannot take the income into trust funds—and social security is a trust fund—and the income, for example, from the highway fund and treat it as income of the Government.

Mr. PROXMIRE. I think the Senator from Colorado has a good point, inasmuch as we ought to have all these budgets in mind and should not pick one as if it is the only one that counts.

CONGRESS HAS REORDERED PRIORITIES

Mr. President, what Congress really has done here is to reorder our priorities. We have cut the overall spending, but we have cut military spending, cut military construction spending, cut spending in many other areas, and we have added to the appropriations for Health, Education, and Welfare. In my view, that is about the healthiest and most wholesome thing Congress could do at this time. We have reordered our priorities, and I think properly so.

I ask unanimous consent that a table documenting and reflecting what I have just spoken of be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE NO. 1.—ACTIONS ON INDIVIDUAL BILLS AFFECTING BUDGET AUTHORITY AND OUTLAYS (EXPENDITURES) (AS OF DECEMBER 18, 1969)[1]

[In thousands of dollars]

Items acted upon	NOA: Congressional actions on budget authority (changes from the revised budget)[1]			Outlays: Congressional actions on budget outlays (changes from the revised budget)[1]		
	House	Senate	Enacted	House	Senate	Enacted
	(1)	(2)	(3)	(4)	(5)	(6)
Fiscal year 1970:						
Appropriation bills (changes from the revised budget):						
Treasury, Post Office, and Executive Office (H.R. 11582, Public Law 91-74)	−42,382	−34,519	−38,482	−37,000	−30,600	−34,000
Agriculture and related agencies (H.R. 11612, Public Law 91-127)	−160,907	+405,236	+251,341	+53,000	+294,000	+166,000
Second supplemental, 1969 (H.R. 11400, Public Law 91-47)				−92,700	−64,700	−75,000
Section 401 outlay ceiling					(−1,900,000)	(−1,000,000)
Independent Offices and Department of Housing and Urban Development (H.R. 12307, Public Law 91-126)	−471,325	−177,521	−226,099	−61,000	−25,900	−40,000
Interior and related agencies (H.R. 12781, Public Law 91-98)	−15,810	−8,090	−10,481	−15,300	−11,800	−7,800
State, Justice, Commerce, the Judiciary and related agencies (H.R. 12964)	−130,070	−83,350	−111,272	−71,000	−40,600	−56,100
Labor and Health, Education, and Welfare and related agencies (H.R. 13111)	+1,078,365	+1,637,286		+521,000	+653,000	
Legislative Branch (H.R. 13763, Public Law 91-145)	−26,850	−29,842	−27,826	−7,900	−8,800	−8,700
Public Works (H.R. 14159, Public Law 91-144)	+301,469	+789,451	+552,030	+10,500	+67,400	+50,000
Military Construction (H.R. 14751)	−466,741	−313,854	−356,844	−37,000	−26,500	−29,000
Transportation (H.R. 14794)	+34,546	106,579	+89,265	−172,000	−43,260	−153
District of Columbia (H.R. 14916)	−40,151	−55,295	−60,332	−14,000	−13,800	−18,800
Department of Defense (H.R. 15090)	−5,318,152	−5,955,544	−5,637,632	−3,000,000	−3,250,000	−3,200,000
Foreign Aid (H.R. 15149)	−1,071,544	962,626		−167,000	−146,000	
Supplemental, 1970 (H.R. 15209)	−63,490	−17,721		−5,670	+30,000	
Subtotal, appropriation bills	−6,393,042	−4,699,310	−5,576,332	−3,096,070	−2,617,500	−3,406,400

[1] See explanation below:

Explanation of table: The table indicates that 11 of the 14 appropriation bills affecting fiscal year 1970 appropriations have been enacted. (The 15th bill, the second supplemental, 1969 affects 1970 outlays but not appropriations.) The total reduction in new obligational authority from that requested by President Nixon is $5,576,332. (Total, Col. 3.)

Three bills have yet to be enacted. These are the Labor-HEW bill, the Foreign Aid bill and the supplemental, 1970. In each case, the final amount enacted will be an amount somewhere between the amount the Senate enacted and the amount the House enacted.

The Labor-HEW bill will be between $1,078,365,000 and $1,637,286,000 over the President's request.

The Foreign Aid bill will be from $962,626,000 and $1,071,544,000 under the President's request. The supplemental, 1970 will be from $63.5 million to $17.7 million under the President's request.

The final net result will in any case mean a cut in the new obligational authority (NOA) of at least $5 billion below the President's request and a cut of $3 billion in outlays below the amount the President requested in his revised budget.

CONVENTION ON THE PRIVILEGES AND IMMUNITIES OF THE UNITED NATIONS—REMOVAL OF INJUNCTION OF SECRECY

Mr. BYRD of West Virginia. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from Executive J, 91st Congress, first session, the Convention on the Privileges and Immunities of the United Nations, transmitted to the Senate today by the President of the United States, and that the convention, together with the President's message, be referred to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message from the President is as follows:

To the Senate of the United States:

I transmit herewith the Convention on the Privileges and Immunities of the United Nations with a view to receiving the advice and consent of the Senate to accession.

The United Nations General Assembly unanimously approved the Convention on February 13, 1946, to give precision to the obligations of members under Articles 104 and 105 of the United Nations Charter. Of the 126 United Nations Members, 100 have already become parties to the Convention.

As host to United Nations headquarters the United States bears special responsibility for the status of the United Nations, its officials, and representatives of its members. We should have acceded to the Convention long ago. Over the years, our failure to do so has become a source of embarrassment to the United States as well as increasingly troublesome to the U.N. Secretariat and to a growing number of U.N. Member states.

The Convention was submitted to the first session of the 80th Congress for approval by Joint Resolution together with the Headquarters Agreement Between the United States and the United Nations. The Headquarters Agreement was approved by both Houses of Congress and entered into force on November 21, 1947. The Convention was approved by the Senate and the House Committee on Foreign Affairs, but the House as a whole took no action. It was resubmitted to the 81st Congress, but once again no action was taken. It has not subsequently been resubmitted up to this time although I understand the Chairman of the Foreign Relations Committee inquired during the last Congress as to its status.

In accordance with the more usual practice concerning conventions dealing with diplomatic and consular matters, I have decided now to submit the Convention to the Senate for action under the treaty power of the Constitution. The enclosed report of the Secretary of State explains the Convention and its relation to existing law. Many of the privileges and immunities provided by the Convention are already accorded by the Headquarters Agreement or by the 1945 International Organizations Immunities Act. But under existing law full diplomatic status is not accorded to the Secretary-General, to Under Secretaries-General, or to non-resident representatives from other countries to United Nations meetings. Accession to this Convention would close these and other anomalous and unintended gaps.

It is my hope that the Senate of the United States will consider this long overdue matter and consent to United States accession at an early date.

RICHARD NIXON.

THE WHITE HOUSE, *December 19, 1969.*

ADDRESS BY SECRETARY OF COMMERCE STANS BEFORE NATIONAL MARKETING CONFERENCE

Mr. MOSS. Mr. President, on December 4, 1969, Secretary of Commerce Maurice H. Stans addressed the opening session of the National Marketing Advisory Conference, which had as its focus marketing and consumer interests. This important annual conference brought together 54 of the country's marketing leaders representing manufacturers, retailers, advertising agencies, and graduate schools of business. In his keynote speech, Secretary Stans reaffirmed his commitment to the American consumer in a most lucid and forceful manner. I believe his ideas will be of interest to all Senators. I ask unanimous consent that his address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE HONORABLE MAURICE H. STANS, U.S. SECRETARY OF COMMERCE, BEFORE THE NATIONAL MARKETING ADVISORY COMMITTEE, NATIONAL MUSEUM OF HISTORY AND TECHNOLOGY, WASHINGTON, D.C., DECEMBER 4, 1969

INTRODUCTION

Mr. Cleaves has already pointed out that this is an unusual and highly significant

meeting of the National Marketing Advisory Committee. I am particularly pleased that in addition to more than 40 members of NMAC who are here for tomorrow's working session with the Department of Commerce, we also have with us tonight representatives of the White House, other Federal agencies, key Congressmen and Senators, and the press. You all are vitally interested in our conference subject—Marketing and Consumer Interests.

I have really been looking forward to this opportunity to exchange views on consumer matters with this top group of marketing executives, which represents both manufacturers and retailers. Without the vital link provided by marketing, producers and consumers could not deal with each other effectively and goods would pile up at our factories. There would be many products ill-suited to customer needs and conversely, important wants would go unrecognized and unfilled. Our whole society would be a vastly different place if it were not for the American marketing system which it is your job to foster and advance.

First, I want to say how much we in the Department of Commerce value our relationship with the NMAC. You have provided us with expert assistance and wise counsel in the past on a wide range of marketing problems. We sincerely appreciate that help. We hope that this particular conference will afford you, the marketing leaders of the country, and those of us in government, with a unique forum to talk and plan together on how to best meet the growing consumer needs of our most important constituents—the American public.

BUSINESS-CONSUMER RELATIONS

A prime secret of the success of the U.S. competitive enterprise system has been the great freedom of interaction between buyers and sellers. That freedom has generated the most dynamic and productive economic system in the world. We need to preserve that system, and build upon its effectiveness.

But that does not mean that there are no problems in the marketplace.

In our complex technological society today, the individual buyer often feels isolated and helpless in what he regards as an increasingly impersonal environment. In fact, this may be the key consumer problem. We all know that purchasing choices are very personal decisions. Even when such decisions are based on factual comparisons and on adequate information, the final decision is a matter of individual judgment. The mass marketplace of today arouses a natural sense of frustration despite its very real contributions to our ever higher material standards of living. When sufficient knowledge on which to base our purchases is missing—and when product dissatisfaction results—the consumer's sense of frustration can reach great heights. Congressmen, Senators and the President himself are no longer surprised at receiving angry letters of consumer complaint with calls for Government action.

Without question the consumer is justified in complaining about products that do not work, warranties that are meaningless, services that do not serve, repairs that cost too much, and workmanship that is shoddy. Even though perhaps only 1% of business is intentionally responsible for these abuses, they reflect upon all.

The consumer has been heard on these matters. Business has recently been placing much greater emphasis on voluntary consumer protection programs. But the efforts to date have left the consumer still not satisfied. One thing should be said in defense of the business community. Without doubt companies have been afraid to meet, to discuss such matters as product standards, sizes and similar subjects for fear of anti-trust action. Certainly we must remove this threat in the interest of the consumer to pave the way for voluntary business action.

The extent to which legislation becomes a substitute for free operation of the marketplace in the future will depend on how responsibly we all act—businessmen, those of us in all parts of Government, and even the consumer organizations themselves. But whether we take the legislative route or the route of voluntary action or some blend of both, we need to understand what it is that we really are seeking to protect.

BASIC CONSUMER RIGHTS

These are some of the basic rights of the consumer which I believe we must all acknowledge:

First, the consumer certainly must have protection from fraud, deceit, and misrepresentation.

Second, he must have access to adequate information to make an intelligent choice among products and services.

Third, he must be able to rely on products working as represented.

Fourth, he must have the right to expect that his health and safety will not be endangered by his purchases.

Fifth, our marketing system must provide him with a wide range of choice to meet individual tastes and preferences.

THE CHALLENGE

It is this last consumer right which reflects the great strength of our current marketing system and yet causes the most difficulty in assuring the other four rights.

As you gentlemen well know, meeting this challenge is easier said than done. The government could, for example, legislate standards for a whole range of "perfect" products. What would be the point, however, if it forced prices so high that the great majority of consumers wouldn't or couldn't buy the goods? There have been attempts to bring out such products. You may have heard about the electric toaster that was guaranteed not to give an electric shock no matter how badly it was misused. And it really worked. That toaster lived up to its billing. The only problem was that it took twice as long to make a piece of toast and cost 20% extra. You all can guess what happened. Customers weren't willing to pay more and wait longer for their toast just to have that extra protection.

More simply, not every automobile driver wants a Cadillac. His needs may be less and he wants to pay less. He should have that right of choice.

Also, it is pretty clear that there is no "average consumer." At least my wife doesn't think she's average in this regard, and I'll bet yours doesn't think she is either. For each individual consumer, product life and performance legitimately have different meanings and value. The fact is that product qualities which are important to some individuals for some uses are not important to others. To restate, the challenge is how to maintain and preserve a diversity in the options available to the consumer while preventing abuses.

BUYER'S BILL OF RIGHTS

From the very beginning of this Administration, President Nixon asked all of us who have consumer responsibilities to give top priority to developing a more constructive consumer program. On October 30th he sent to Congress a "Buyer's Bill of Rights" that will give consumers new protection and at the same time build on the inherent strengths of the American marketing system. The President's program represents an Administration-wide effort focused through Mrs. Knauer, his Special Assistant for Consumer Affairs, and drawing in the Federal Trade Commission, the Departments of Justice, Commerce, and Health, Education and Welfare, and the Office of Economic Opportunity. The President called for:

A New Office of Consumer Affairs in the White House:

Expanded powers for the Federal Trade Commission;

A new Division of Consumer Protection in the Department of Justice;

A new consumer protection law with provisions for consumer class action;

A new consumer products testing law;

A newly activated commission on consumer finance;

Expanded Government consumer education activities;

Increased Federal attention to product safety;

Stronger enforcement of food and drug laws;

Expansion of consumer activities in the Office of Economic Opportunity;

Greater Federal efforts to strengthen State and local consumer programs; and,

A new look at warranties and guaranties and possible legislative remedies.

These proposals stand as the most significant set of Presidential recommendations ever made on consumer interests. Let me emphasize that in this program there is ample room for constructive, voluntary initiatives by business.

The President's consumer program has been hailed as a very significant and positive step forward. There are other views being put forward too. There are those who would resist change and attempt to keep the status quo. There are others who seem to believe that the answer to consumer problems is to have the Government go much further in master-minding the marketplace. Some of their proposals seem to focus only on the very small percentage of present shortcomings while failing to retain the benefits of legitimate market competition.

There is, in my opinion, a middle ground solution. If the American marketplace is to be made to serve the consumer better, we need active involvement throughout the entire marketing community. We want you to use your knowledge and voices in business and trade associations and in the universities where the businessmen and consumers of the future are forming their attitudes which will shape our world of tomorrow.

You men are the top business communicators of America. We are counting on you to make yourselves heard as never before, particularly in the area of voluntary improvements.

VOLUNTARY ACTION

How far can we go and what do we really mean by voluntary action? Let's talk some specifics. We can't expect the impossible. No amount of voluntary action (or legislation either, for that matter) to reduce package size proliferation can give us both standard sizes *and* standard weight of contents. An ounce of perfume and an ounce of cornflakes weigh the same, but they can't be packaged in the same size containers. We are dealing here with the laws of physics rather than the laws of the courts. Lawmakers can't change the laws of physics.

On the other hand, this can go too far. Will we really serve the consumer by standardizing the size and shape of perfume bottles?

But we in Commerce have had some good experiences with voluntary actions which have taken place in a framework of law. The National Bureau of Standards wrote the performance specifications for refrigerator door latches to prevent children from being entrapped. Voluntary innovative action by private manufacturers produced the magnetic door latch to meet the need. Working together, business and Government conceived a better product and ended needless deaths

Do we always need a framework of law

to have effective voluntary action? Let's look at another case. For a year we have been working, along with the President's Special Assistant for Consumer Affairs and others, to guide the major household appliance industry towards voluntary improvements in warranties, guaranties, and service. Frankly, it has been complex and difficult going. But we do see significant progress. Their warranties and guaranties *are* now simpler, easier to read and understand. Agreements *have* been reached on parts availability, the meaning of "authorized" and "factory trained" service, and the location of model numbers where purchasers can read them without undue effort. I understand that agreement has been reached, after more than a decade of indecision, on how much a pound of wash really is, and we didn't even ask them to settle that one.

Gentlemen, we would like to launch more joint Government-business efforts like this major appliance project. We would welcome suggestions either from the retail or manufacturing segments of industry.

MANDATORY ACTION

At the other end of the spectrum there are important mandatory approaches to protecting the consumer. What would our marketplace be like without the rigid standards of weights and measures? Where would we be without standardization on household electric current, light bulbs or pipe threads. You may have noticed that we finally have reached agreement in the lumber industry on a standard size of a 2 x 4. Differences in wet and dry measurement will be eliminated and construction costs will be cut without strength impairment.

As the President indicated in his Consumer Message, there are some other areas where the mandatory approach can underlie a sounder program. The proposed consumer product testing law aims not at having Government test every product but at determining what tests should be performed to give the consumer the right information on which to base his purchasing decision. And to have Government certify what constitutes a proper testing procedure to develop that information. We believe this proposal is a sound and practical way to help our consumers be better buyers and our manufacturers and retailers be more reliable sellers.

SUMMING UP

What we can observe, then, is that there is no single answer to the protection of the consumer. We must find the best blend of purely voluntary action, voluntarism within a framework of law, and mandatory regulations. Each has its place, and ours is the task of matching each to the need.

How each individual acts—each businessman, each trade association, each Government official and each consumer group—will determine how well we match up problems with the right answers. By helping us and by helping yourselves in your businesses, you can play a crucial role. You are close to the consumer. You know, or know how to find out, what he really needs and wants. You also know business, what it can and cannot do. And as our advisors, you have come to know Government, what we can do and what we must do. You are the professionals on whom the responsibility has fallen to fill two key functions:

First, the early-warning system for business to recognize emerging consumer problems and their solutions *before* business's inability or unwillingness to solve the problem requires the Government to act; and,

Second, where and when it is necessary for Government to act, you can serve as the most effective business spokesmen to Government on the basis of your unmatched knowledge of the consumer and the marketing system.

So gentlemen, please recognize that we take most seriously our responsibility to see that the consumer's rights in the marketplace are protected, that the needs of the consumer are being met, and that our marketing system, which we recognize as the world's most productive engine for meeting the consumer's needs, is functioning up to its potential.

Our intent is to act where and when we see consumer problems going unmet, but to do so in a manner which improves the functioning of the marketplace. This means protecting the consumer's freedom of choice and preserving fair initiative for the producer.

Our expectation is that business will recognize the wisdom and profit of meeting the consumer's needs on its own, and of cooperating to the utmost with Government when our involvement is required.

RESPECT FOR THE U.S. AIR FORCE

Mr. GOLDWATER. Mr. President, having spent many years of my life in the Air Force Reserves, I naturally hold this branch of our military in great respect. Never, though, have I been so proud of the U.S. Air Force as when I visited 18 of their bases in Vietnam and Thailand during the last several weeks.

My pride, in fact, stems from the obvious pride that every member of the Air Force in that theater has in the service they are giving. Commanders, pilots, enlisted men, noncommissioned officers, and officers all reflect this. I have been trying to put this feeling into words, but I read an article, entitled "Tactical Air Power," written by Gen. William Momyer, and published in the November-December issue of Ordnance, which does it far better than I can.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TACTICAL AIR POWER: OUR SUPERBLY TRAINED PILOTS MUST HAVE FIRST-CLASS FIGHTER AIRCRAFT

(By Gen. William W. Momyer)

Today's pilots are the most professional we have produced. As many did, I flew fighters in World War II. As Commander of the 33rd Fighter Group, I trained and took to war what I considered to be the best pilots ever to climb into a cockpit. There was no question in my mind that they were good, considering what we knew at the time about fighting an air force.

I arrived in Korea just before that war ended. As Commander of the 8th Tactical Fighter Wing, I had a first-hand opportunity to see what kind of pilots we were producing some 10 years after the conclusion of World War II. These pilots were flying at speeds never thought possible in World War II. I was soon convinced that these Korean veterans exceeded the hard-core professionals we produced in World War II. They destroyed the MiG's at a 14 to 1 advantage.

All my previous views about pilots had to be changed when I went to Vietnam some 11 years after Korea. As I watched our pilots perform under the most exasperating kind of limitations, the true attributes of experts were prevalent throughout all our operations. These pilots are superb in all categories of airmanship. This ability to produce men of such quality is the greatest source of strength in our Air Force—of all our armed services.

As long as we have men dedicated to their country and their profession as we have in Vietnam, I am convinced the security of this Nation will never be jeopardized because of inadequate military leadership.

We can't defeat an enemy air force which is equipped with modern aircraft unless we have first-class aircraft for our superbly trained pilots. We must provide our pilots with the best weapons that are within our imagination, ingenuity, and skill to produce. We must rely upon industry to provide the same high standards of performance in our weapons that we demand of our combat pilots. Nothing less is acceptable. There must be teamwork between industry and the military to produce the most effective fighting potential for the dollar invested. The taxpayer is entitled to nothing less.

The war in Vietnam has indicated what is needed if we are to maintain our tactical air forces in the posture required to support our national policy and strategy. Every war produces new requirements by virtue of the peculiarities of the combat. This war is no different than previous ones in this respect.

The need for gaining and maintaining air superiority was never more self-evident than in Vietnam. Our air operations against the North Vietnamese Air Force prevented it from being a factor on the battlefields of South Vietnam. As I flew around Vietnam it didn't take much imagination to visualize what the effect would have been if there were MiG–21's over the ports of Cam Ranh Bay, Da Nang, Saigon, and our supply depots at Long Binh and Nha Bey.

With the heavy concentration of supplies and equipment we had in those ports and depots, even a limited air attack would have had a major effect on all our ground operations. We are able to concentrate our resources for better efficiency because of the uncontested air superiority we have enjoyed throughout the war. We know from World War II what happened to the German Army when the Allied air forces cut their logistics to pieces. In Vietnam, because of the nature of the terrain, our logistics are far more vulnerable than in World War II and Korea.

Maintaining air superiority is a continuous and never-ending task because of the sanctuaries enjoyed by the enemy. By the nature of our objectives and the character of the geography, the enemy defenses had a distinct advantage. To get into important targets, we had to penetrate the full gamut of his defenses. Hence he could configure his defenses to meet the approaches our strike forces had to take on penetration.

For the first time our tactical air forces were fighting in an arena where we didn't have the flexibility of employing the full potential of our striking power. Consequently, we couldn't use the tactics that characterized our operations in World War II and even in Korea. This imposed upon us the necessity of meeting the enemy defenses head on. No military commander elects these tactics unless he has no other option or unless the enemy is particularly vulnerable to a frontal assault.

With our air operations in North Vietnam, we had no other option or alternative in the field but to go at the defenses direct. The magnitude of these defenses was formidable. The total number of antiaircraft guns numbered about 7,000—with 3,000 to 4,000 of them in the Hanoi area. We suffered most of our losses from these weapons. I would estimate that about 60 per cent of our air combat losses were from antiaircraft guns.

With so many guns, there was no way to get into the target area without being highly exposed. The high speed of penetration of our strike forces limited the time in the target area while the ability of pilots to execute accurate dive-bomb runs in a matter of a few seconds further reduced the exposure. In addition to these techniques, we used some of the flak-suppression tactics of World War II but with different munitions. The CBU is an excellent munition for flak sites and I don't know a pilot who doesn't want them when going against a defended target.

I am sure the antiaircraft fire would have

been less effective without the enemy's surface-to-air missiles (SAM's). Most pilots have a healthy respect for SAM's. The effectiveness of these weapons has been vastly overrated—but this still doesn't minimize them as a potent threat. I can remember in the late 1950's when many were postulating the death of the aircraft as a weapon because of the lethality of the surface-to-air missile. This hypothesis has been proved wrong by the relatively low kill rate of the missile.

The SAM's, however, limited the altitudes at which we could employ our strike force without unacceptable vulnerability. The SA–2, like all other such missiles, is less effective at lower altitudes but increases in effectiveness until reaching its optimum altitude of between sixty and seventy thousand feet. At these altitudes it has achieved its maximum speed and therefore has its highest kill probability. At the very low altitudes, it is still picking up speed and the target aircraft has a greater potential for evasion.

These characteristics of the SAM made our operating altitudes, at best, a compromise. If we moved into the higher altitudes to avoid the antiaircraft guns, the SAM's became very difficult to handle. On the other hand, if we stayed at the lower altitudes to minimize the SAM's, the antiaircraft artillery (AAA) was maximized and our losses would go up.

We constantly shifted our altitudes of attack to take advantage of electronic countermeasure (ECM) coverage, the position of antiaircraft batteries, SAM locations, and MiG performance versus our aircraft.

This was a different combination of defenses than we had encountered in previous wars and led to the development of new techniques to be able to live and fight in such an environment. The defenses were more aggravating than one would have to deal with if the area of operation were comparable in size to Europe. Confronted with a front of defenses packed into an area of about 100 miles by 60, our problem was severe. We couldn't flank or deceive it because of its concentration. The directions of penetration were limited because of the close proximity of the Chinese border.

Not much has been said about the real unsung heroes of the war. They were quite a small group of men who flew the Iron Hand aircraft. They were the elite of the strike force. These pilots led the attacks in suppressing the SAM's. Normally, they flew in flights of four. Many times they were able to pick up the SAM's before launch and by firing a Shrike air-to-ground missile often either knocked out the SAM or forced it out of the air.

These flights were the first into the target area and the last to leave. It took great courage, skill, and dedication to fly these missions.

The North Vietnamese unloaded everything they had at these pilots. When the SAM's and AAA were not giving them a hard time, the Mig's were after them. Our losses would have been much higher without these flights covering the penetrating forces during ingress to and egress from the target.

The Iron Hand is a new element in tactical air warfare, but it is here to stay. I believe we will require these highly specialized pilots to help minimize the missile threat. Whereas we used a 2-seater F–105 for the mission in Vietnam, I believe that whatever high-performance fighters we buy for the future, some of them will have to be dedicated to this effort.

Even though eventually we must have a self-possessed capability for all fighters to destroy SAM's, it seems to me, we probably will have to work our way around to this position over a period of time because of the specialized nature of the task.

In addition to the Iron Hand flights, electronic countermeasures (ECM) became a most essential element of our force. It was not until the spring of 1967 that we were able to get an operational ECM pod for our fighters. With this equipment, the strike force carried their jammers into the target area.

This demanded some special tactics, ones that were very difficult to execute with the high speeds we were flying. Nevertheless, we gained much greater tactical flexibility with the introduction of this equipment. There was a significant reduction in losses as well as an appreciable gain in bombing accuracy.

This type of equipment will be essential to the future of tactical air warfare. Much ingenuity will be needed to keep ahead of the enemy as well as to be able to package the equipment with minimum penalty in weight and aircraft performance.

Where the standoff jamming aircraft fits into the tactical forces for the future is uncertain. Unless such an aircraft has the same performance as the strike force, it seems to me the enemy will drive it out of effective jamming range. To expect a standoff jammer to operate in heavy defenses of AAA, SAM's, and fighters is perhaps too much. For this reason we must be extremely cautious about how we apply resources for this function.

At the moment, I am inclined to think the EB–66 is probably the last of the standoff jammers we will have in the tactical force. This makes the problem critical in the development of organic ECM for fighters and reconnaissance aircraft.

There has been much said and written about the MiG's and the air battles. Our kill rate never reached the level it did in Korea and, I think, for some very good reasons. Whereas we had a 14-to-1 kill rate in Korea, the final rate in Vietnam was about 2 to 1. It reached a high of 4 to 1 in late summer of 1967.

Actually, the total number of MiG's based in North Vietnam didn't vary much between the summer of 1966 and the halt of the bombing on November 1, 1968. I would estimate the total aircraft in the North Vietnamese Air Force didn't exceed 120 aircraft. At any given time, there were about 50 to 60 MiG's in North Vietnam, with the remainder held in reserve in China.

Beginning in the fall of 1966 we saw a major change in the North Vietnamese air-defense system. With their redundancy in early-warning radars, the problem of tracking our strike forces was not significant. Getting the AAA, SAM's, and fighters working together so that the opportunities of each weapon could be taken advantage of seemed to be their most severe problem. In a small area, this is not an easy task and is one of the reasons I think the North Vietnamese defense system was so slow in developing into a problem for us.

Once this coordination was achieved, we began to encounter some new tactics that were difficult to cope with. With the excellent GCI control, the MiG's could be vectored very accurately on the ingress or egress routes to make an attack at our 6-o'clock position. We were particularly vulnerable during penetration with a load of bombs.

Because of fuel limitations, the strike force couldn't do much better than 480 knots prior to the target. In the target area, the speeds would be boosted to over 500 knots.

The MiG controllers would try to vector the MiG's in behind us and then have the pilots boost their speed up over Mach 1. This type of an attack with a heat-seeking missile is most difficult to handle. The attacker has the advantage of position and speed. All fighter pilots dream of being in such an advantageous position on an enemy aircraft. Even though our combat air patrols (CAP) were alert to these tactics, they still were difficult to stop.

To make it even more difficult, we had to make a visual identification before our air-to-air missiles could be fired. With this type of restraint, it meant the enemy was almost within firing range before we could do anything about it. This was a tremendous advantage to the enemy since he was always free to fire by being under his own controllers while we were never free to fire until the enemy was on top of us.

If we had been allowed a missile-free environment, I think our kill rate would have been far different. The superior performance of our aircraft at the lower altitudes was the only thing which made our position tolerable. If we are to be confronted with such restraints in the future, we need some breakthroughs on visual identifications at ranges three and four times that of the naked eye.

I think we have got to approach the problem differently in the future. It seems to me we must have a missile-free authority in order to break the enemy attack before it develops. To do this we will have to move our command and control closer to the air battlefield.

Our proposal for the Airborne Tactical Air Control Battle System (ATACBS) is designed to accomplish his. We would bring this command-and-control platform into such close proximity to the air battle it would be able to provide just as positive control for our fighters as the enemy does for his.

If we achieve this tactical advantage of being able to know where all of our forces are, I see no reason why we shouldn't be able to operate missiles free as long as we are under control of the ATACBS or have a visual contact.

It will probably cost us some effort to protect the ATACBS, but we may have to sterilize an area of AAA, SAM's, and fighters in order for it to be brought close enough to the battle to control our forces effectively. I don't think we can count on a sanctuary for the protection of this platform or being able to operate over open seas like we could in the Gulf of Tonkin.

In the Korean war we were able to keep most of the enemy airfields knocked out between the Yalu and the ground battlefield. Our daily effort against these airfields left the enemy no alternative but to base in China as a sanctuary and then sortie across the Yalu when he thought it was to his advantage. It is surprising that we destroyed as many MiG's as we did under these conditions.

The airfields in North Vietnam were not released for attack until the spring and summer of 1967. By this time the enemy had well developed revetments and large dispersal areas. Under these conditions, the task of destroying the aircraft and making the runway unusable was very difficult. With the large labor force he had, an airfield could be put back in operation almost as fast as we could take it out.

Dut to poor weather, we rarely had sufficient good days to sustain our attacks against the airfields. The North Vietnamese would move their aircraft into China as our attacks developed and then return as soon as the airfield was repaired. Many times they would intercept the strike force which was attacking airfields and, if the airfield was damaged, recover in China.

If we could have kept the airfields in North Vietnam in an unusable condition, the MiG's operating from bases in China, wouldn't have been a significant threat to our strike forces.

This is one of our most pressing problems today—a new munition that will effectively crater a runway with a high degree of delivery accuracy. With such a weapon we would require a minimum of follow-on attacks to force the enemy air out of range. We could do this in World War II because of the large force which could be put against German airfields. I don't think we will ever see a time again when we will have forces of such size to do this task. We must, therefore, look to new developments that will let

a small number of fighters neutralize in airfield for a protracted time.

Finally, it was the superior performance of our fighters at the operating altitudes we flew which made it possible to contain the MiG's in the north. There is no substitute for superiority in performance. Our foresight in developing the F–105 and F–4 was the decisive element in our gaining air superiority. Without the high performance of these aircraft, it would not have been possible to sustain the air offensive in such a heavily defended area.

Our tactical air forces must be continuously modernized to meet the new tactical weapons of the enemy. Because air superiority is of such fundamental importance to the survival of air and surface forces in war, we have placed the attainment of a new tactical fighter as the dominant requirement today.

The F–15 is proposed as a replacement for the F–4. With its high speed, maneuverability, and bomb load, I see no reason why we won't be able to live and fight regardless of the enemy defenses we can visualize in the future. We must be sure that specifications prescribed for the F–15 are met and that late add-ons don't increase the weight and degrade performance.

We are in a highly competitive time period with rapid advancements in aircraft performance. The air force which is able to control the air will dictate the outcome of the battle.

Our tactical air forces are at an all-time high in combat experience. The Vietnam war has produced a higher proportion of combat veterans than any other time in our history. On the other hand, the Vietnam war has not produced the new weapon systems needed for the future. This is the task ahead which will require the most critical judgment we have.

Without our overwhelming air superiority, I am convinced there would be no Vietnam peace negotiations; much larger forces would have been required; greater casualties would have occurred; and in all probability we would have a war of far greater size. Our forces have fought magnificently in Vietnam under conditions which have challenged all the courage and discipline we could muster.

PROTECTING OURSELVES

Mr. PROXMIRE. Mr. President, the Human Rights Convention on Genocide was adopted in December of 1948 by the United Nations General Assembly. Over 70 nations have signed this convention since its adoption. The United States has not.

One reason for our failure to join other nations in a declaration against this crime is the question of the value and effectiveness in ratifying such a convention.

A United Nations report has, I think, answered this urgent question in the correct perspective. It stated:

The effectiveness of any law depends upon its acceptance and application. It will, therefore, be incumbent upon all nations to develop the necessary moral force, to be expressed in decisions to apply the Genocide Convention, if peoples and their cultures are to be saved from obliteration. At stake is not only the solidarity of nations in preserving human life, but the interdependence and mutual borrowing among various cultures on which civilization rests. Consequently, it is hoped the feeling will grow in world society that by protecting national, racial, religious and ethnic groups everywhere, we are protecting ourselves. Towards this end, the Convention establishes that the international community cannot tolerate acts of genocide which threaten the very foundation of world order. Further, it obligates contracting states to pass effective national legislation. In this way, the laws of individual nations will reaffirm and thus strengthen international law.

Another and inestimable effect of the Convention would be that it represents the moral force of a unanimous proclamation by member states that "genocide is a crime under international law, contrary to the spirit and aims of the United Nations and condemned by the civilized world." It is widely held that the very existence of the Convention and the severe penalties for which it calls will act as a deterrent.

The United Nations report stresses the "moral force" of this convention. Can Senators doubt the value of such a force? Has the Nation not relied many times on moral force to generate the public awareness of a problem and to generate public pressure for change in the form of law? I believe that an international moral could also be developed that would one day be responsible for the elimination of the crime of genocide from the earth forever.

The value of ratifying this convention can also be seen in the comment by the United Nations that by protecting national, racial, religious and ethic groups everywhere, "we are protecting ourselves." It is in the interest of self interest, then, that we should consider and ratify the Human Rights Convention on Genocide.

FRANCHISING—SMALL BUSINESS BOON OF BOONDOGGLE?

Mr. WILLIAMS of New Jersey. Mr. President, on two occasions recently, I have spoken to the Senate regarding the franchising concept and its implications on small business.

I have scheduled 3 days of public hearings on January 20, 21, and 22 before my Small Business Subcommittee on Urban and Rural Economic Development, to explore "The Impact of Franchising on Small Business."

On these same occasions, I have had printed in the RECORD articles on franchising that appeared in U.S. News & World Report and Newsweek magazines. These articles were noteworthy, in my judgment, in that they discussed many new and interesting developments now taking place within the franchising system. The public needs to know more about franchising. Housewives and the elderly should know more about franchising. Small businessmen and prospective small businessmen need to know more about franchising.

Mr. President, I am calling for an education in franchising. Why is this so important? Why do we need to explore the franchising concept in search of knowledge?

The explanation is simple. Franchising has grown so phenomenally in the last few years that it now accounts for over $90 billion in annual sales, over 10 percent of our entire gross national product. There are 600,000 franchisees operating in the United States today, most of which are small businesses.

Franchising was for many years a "sleeping giant" within our economic system. We have now witnessed its awakening.

The amazing success stories of franchising have also been accompanied by some equally depressing failures.

The ever present con artist and swindler are using the franchise phenomenon to lure unsuspecting and uninformed small businessmen into back alleys of deceptions, fraud, and trickery.

The public must learn all about franchising—its attributes, advantages, and benefits—as well as its somewhat shady side—if we are to produce an intelligently cautious investor.

Mr. President, I wish to share with my fellow Senators an article which appeared recently in Parade magazine entitled, "Franchise Frauds: How To Lose Your Life Savings Without Really Trying." I ask unanimous consent to have this article printed in full at the conclusion of my remarks.

I submit that a thorough reading of this article by Senators and other readers of the CONGRESSIONAL RECORD will serve to make us all better informed and intelligently cautious. We will want an answer to the question: Is Franchising a Small Business Boom or Boondoggle? I hope our January hearings will provide that answer.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FRANCHISE FRAUDS: HOW TO LOSE YOUR LIFE SAVINGS WITHOUT REALLY TRYING

(By James D. Snyder and Robert F. Hickox)

Big corporations and crushing taxes are driving the small businessman into oblivion. Right?

Wrong. This year some 500,000 Americans will take the plunge into self-employment—25 percent more than ten years ago. The increase comes largely from franchising. By offering the "little guy" a piece of the action, plus management guidance and quality control, franchisers have carved out an $80 billion industry whose 400,000 "partners" operate everything from pizza parlors to pet shops to ear-piercing salons.

But unfortunately, the wave of success ridden by reputable firms like McDonald's, Howard Johnson's, Burger Chef and Burger King has created an undertow in which con artists suck out the life savings of those who plunge in without testing the water. The Post Office Department, for example, reports that franchise rackets have shot up to the top of the list of 68 fraud categories policed by its network of mail fraud inspectors. Since 1964 alone, they've investigated more than 550 franchise schemes and obtained some 220 convictions. The damage just from those already behind bars exceeds $120 million.

How do franchise frauds operate? An excellent teacher is Harold ("Wild Man") Pritchard, a long-time St. Louis promoter of dubious renown until he confirmed the description by literally painting himself into a corner. A few years ago, ads appeared in various publications under the banner of "National Chem-Plastics Corporation." For fees of $3000 to $7000 "qualified investors" could obtain exclusive territorial franchises to sell an "amazing liquid plastic coating for all surfaces . . . which eliminates waxing and painting." If you signed up, Chem-Plastics promised to help you get started with a direct mail advertising campaign and by sending in trained salesmen. One small condition: you had to sign an agreement to buy at least 500 gallons of the wonder product each month. But even then, if you wanted out after 30 days, Chem-Plastics would take the product off your hands at cost: $6 a gallon.

How could you lose? In truth, you couldn't win, as postal authorities and Better Business Bureaus began to learn through irate

letters. The miracle product turned out to be an ordinary floor paint sold to Chem-Plastics by an unsuspecting manufacturer for $2 a gallon. Pritchard and his sales crew never furnished franchisers with sale training, never produced the direct mail aids, refused all requests for refunds, and even had the gall to assign investors overlapping sales territories. Pritchard was eventually sent upstream for ten years—and five of his cohorts for lesser terms—but not until scores of gullible investors had willingly handed him life savings totaling $1.5 million.

BUSINESSMEN, TOO

Some might say that people so gullible deserved their fate. But the fact is that franchise frauds can victimize even businessmen with years of experience. Recently, dozens of construction contractors, cement masons and plumbing firms received offers to "share in the family swimming pool construction boom" by becoming franchised dealers for corporations with such glamorous names as Bermuda Pools, Inc., Cinderella Pool Corp., and Town & Country Pools. Pulling the strings behind all three corporate facades was a group of 11 "promoters" headed by 46-year-old Clair Wagner.

Terms: magnificent. A display pool would be sent free. Dealers would have to purchase pool construction kits worth $2000 each, but wouldn't have to pay until each was sold. Only $3000 in "good faith money" would be needed to seal the deal—to be returned later.

It wasn't. Promises of sales training and advertising aid also failed to materialize. The display pool and construction kits did arrive but accompanied by a C.O.D. bill for $2000 each. Franchisers usually wised up after a few shipments, but by then they'd already been abandoned. By the time postal inspectors caught up with Wagner, he had taken an estimated 400 businessmen for $1 million. Wagner was sent to jail.

Overlapping territories, "can't miss" come-ons, unreturned deposits, unfulfilled advertising and training assistance are all part of the franchise fraud's stock in trade. But there are many other tools often more subtle. A few examples:

"Pyramid" distributorships

"Fradulent multilevel distributorships are in many ways like the illegal chain letter or lottery," says Chief Postal Inspector William J. Cotter. "In most such cases, families with savings of from $2000 to $10,000 are lured into buying a distributorship for a 'fabulous' new product which can bring them five- and six-figure incomes." Typical was the carpenter in Oklahoma who mortgaged his furniture to invest $1200 after being swept off his feet at a lavish free dinner by a Tulsa-based company, the National Marketing Association. The carpenter and others at the dinner were told how they could earn more than $15,000 a year by taking out franchises to sell a cleaning solvent named "Terrific." Part of the "Terrific Success Plan" called for the investor to share in the company's growth by inviting friends and relatives to other dinners featuring impressive speakers and a "beauty queen" as hostess. Once friends of the "sponsor" signed up, too, he'd get a percentage of their initial investment plus a commission on all sales in their territories.

The big hitch; each new recruit's profits depended on keeping the chain going by roping in others for "sub-franchises." By the time National Marketing Association's chain was broken and its president sent to jail for ten years, it had taken 400 investors for $400,000.

"Dumping" equipment

Just as the pyramid seller is more interested in the franchise than the product, some swindlers use the attractive word "franchise" merely as a cover to sell equipment. The vending machine industry, for example, is rife with promoters who lure customers with newspaper ads seeking persons to "service coin-operated machines" or to "invest in an established vending route." Invariably when the prospect makes his inquiry, he's told that no "established" route is open at the time. "But don't worry," the salesman comforts him. "If you'll agree to buy our vending machines, we'll help you find 'hot' locations and even pay local license fees." A schoolteacher in Jacksonville, Fla., decided to buy 20 hot-nut vending machines at $100 apiece—a seemingly low price in view of the "up to" $3000 in sales each machine was supposed to yield annually. None of the promises showed up in the contract signed by the victim—only the obligation for $2000. When he later protested that he'd received no help in establishing the franchise territory, the company agreed to "place" his machines. It did—at lonely bus stops, dingy stores, and even at an abandoned train depot. Only after the promoters had been caught and sentenced to three years for swindling $350,000 from others like himself did the schoolteacher learn the machines had cost the company only $17 each.

The "secured" investment

"You can't lose. Your entire investment has been secured by an equal value of goods at our warehouse," the "Terrific" products salesman told the carpenter who plunked down $1200 for a franchise. He even got a gilt-edged receipt, which of course turned out to be worthless. And even had the inventory really been "secured," chances are that its value (determined, naturally, by the promoter) would have been a fraction of its worth on the open market.

In a similar vein, the Federal Trade Commission warns against promoters who vow to buy back a franchisee's equipment and inventory if he wants out. Says the FTC: "This may show up in the contract language as merely giving the franchiser an *option* to repurchase—and, of course, no assurance that the option will be exercised."

The "switcheroo"

The franchise is authentic; only the quality of the product has been changed to milk the innocent. This was what 32-year-old James Fallin of Minneapolis had in mind when he offered record sales franchises under such names as Economy Record Service, Discount Record Service and Hit Parade Record Company. Recordings of top name artists were promised. But when the delivered products turned out to be amateurish "cuts" by unknown performers, some 3000 inexperienced franchisees found themselves minus a combined $750,000. Fallin has pleaded guilty and awaits sentencing.

The "name game"

One of the Post Office Department's mail fraud specialists in Washington recently received a puzzled inquiry from an executive of the National Biscuit Company in New York. Nabisco, he explained, had received angry letters from Texas residents threatening to sue the company for selling them fraudulent franchises. "We told them we don't offer franchises," he said. "Now we're wondering if the Post Office might know what this is all about." Indeed it did. Several weeks beforehand mail fraud experts in Dallas had closed in on 28-year-old Russell Lee Hildebrand, who headed "Nabisco Snack Varieties." His scheme was cut in the usual pattern: advertisements to operate "Nabisco Snack Routes," which turned out to be a come-on for selling vending machines which yielded their owners little. But by using a name linked by implication to a reputable, nationally known company, Hildebrand had to fight the suckers off. He's now fighting a grand jury indictment.

Unauthorized franchises

While some promoters prey on an established company's good name, others sell franchises *in* their name, but without their sanction. One classic case got its start when the Marathon Battery Co. of Wausaw, Wis. (now Gould Marathon Battery Co.), granted a legitimate sales distributorship to a firm called Mercury Electronics, Inc. of Dallas. Shortly afterward Marathon got a query from Mercury: "Would it be all right if we authorized other distributors to sell your batteries to retail stores?" Sure, said Marathon. "Our distributors don't have exclusive territories. We can't stop you from selling to other wholesalers."

The Wisconsin firm was amazed, however, when it learned from the Federal Trade Commission that Mercury Electronics had formed the "Marathon Sales Company," represented itself as a subsidiary of the battery manufacturer, and advertised "exclusive franchises" to all who would get up sizable fees.

The franchiser made sure that its territories didn't overlap, but left unsaid one fact: those who thought they alone could sell Marathon batteries in their territory found themselves competing with many other battery distributors in the same retail stores.

When federal officials caught onto the game, they faced a dilemma: should they take the long months necessary to build a criminal case, during which many more unwitting investors might lose their life savings? Or should they shoot for a quick settlement that would halt the practice at once? They chose the latter. Officials of Mercury Electronics signed an FTC "consent order," which while agreeing to stop the franchise plan, carried no penalty nor admission of guilt.

The above case demonstrated one of franchising's side effects. Franchising, with all its unique characteristics, sprouted so suddenly and grew so fast that efforts at regulation have never been able to keep pace. The FTC is now finding that even some of the oldest prosperous franchise agreements give the parent company almost totalitarian control of its franchisees. Recent court decisions have, for example, outlawed contracts which force a franchisee to buy from suppliers who pay the franchiser a kickback, or make him finance all credit purchases through its own wholly owned loan company.

SENATE BILL

If Sen. Philip A. Hart has his way, Congress may soon balance the scales. The Michigan Democrat, who chairs the Senate's powerful antitrust subcommittee, introduced a bill in April requiring all franchise contracts to allow impartial arbitration in the event of disputes with franchises. One of Hart's main goals: "to curb the ability of the franchiser to whip the franchisee into line by threat of cancellation."

Mere laws, however, don't seem to curb the appetite of the determined con man. California, for example, recently enacted a statute requiring new franchise organizations to register their proposed plans with the State Attorney General just as stock offers are now submitted in advance to the Securities and Exchange Commission. Results? "Negative, if anything," complains a veteran franchiser with a multimillion-dollar restaurant business. "It may seem strange," he says, "but the public now tends to think that anyone offering a franchise has been cleared by the Attorney General's office. The con man, who doesn't bother with such things, now goes about his promoting under what amounts to a veil of official protection."

Until the laws do catch up with franchising frauds—if ever—it appears that the new franchisee will have to look to other sources for protection. One place is the industry itself, whose ideals are embodied in the Chicago-based International Franchise Association, whose 260 company members represent more than 75,000 franchised outlets. IFA claims that 79 of every 20 franchisees who sign up with its members make it through

the critical first five years, compared to five in 20 for those who go it alone.

"One of the basic reasons for starting the association was the desire by established, reputable companies to set themselves apart from the charlatans who were doctoring age-old con games and calling them franchises," says IFA's refreshingly frank 36-year-old director Thomas O. Robinson. "We take pains to investigate the business reputations and financial records of all companies who apply for membership. We have also developed a code of ethics, which all members pledge to follow by signing affidavits. We think the great majority live up to the code but I'll be the first to admit that we haven't got the power to police it.

TEN-POINT CHECKLIST

"Despite all we try to do," says Robinson, "protection in the long run depends on the prospective franchise himself." He offered PARADE readers a ten-point checklist:

1. Make sure the promoter does indeed have all the franchisees he claims.

2. If a product is involved, find out who makes it, is it the franchiser? If someone else, who controls its price to the franchisee?

3. Does the product measure up to official quality standards? Are there any government restrictions on its use? Several persons, for example, recently bought franchises to sell large neon signs, only to learn that their sales were severely restricted by local ordinances.

4. Double check all claims of "guaranteed earnings" and "secured investments." Most reputable franchisers don't promise either.

5. If advertising or training aids are offered, find out exactly what they include.

6. Under what conditions can your franchise contract be canceled?

7. Does your agreement obligate you to buy a minimum amount of goods or services each month from the franchiser? If so, beware. Most reputable franchisers don't require it.

8. Check the franchiser's financial record through sources like Dun and Bradstreet and the Better Business Bureau.

9. Does the franchiser say a market study has been made of your potential franchise area? If so, ask who did it. Get a copy and read it in full.

10. Make your own market study. Find out how the product compares with competitors in price and performance. Take a lesson from a retired Army colonel and his wife who paid $4000 for a garage full of cosmetics. According to the franchiser's sales plan, all they had to do was recruit college kids for door-to-door routes, sell them the cosmetics for $5000. The salesmen would add another $1000 to make up the actual consumer price, and everyone would be happy.

Had the couple bothered to learn cosmetics marketing, they would have found that most established door-to-door sellers must mark up the manufacturer's price by 100 percent to make ends meet. By selling at a mere 25 percent markup, the military couple's business was doomed from the start.

"The latter experience demonstrates what I feel is the cardinal rule for any prospective franchisee," says IFA's Tom Robinson. "For heaven's sake get in touch with the guy who already operates one of the franchises. Suppose it even costs you $50 in long-distance calls. What's that compared to the $2000 or $20,000 you're about to invest?"

Another bit of advice comes from Chief Postal Inspector William Cotter. "Before you plunge into that 'fabulous franchise'," he says, "stop and think how hard you really worked for that savings."

THE NATIONAL INTEREST IN OIL IMPORT CONTROLS

Mr. MURPHY. Mr. President, I am deeply concerned about the widely publicized misconceptions that the oil import controls initiated by President Eisenhower and continued under the administrations of President Kennedy and President Johnson are not necessary for national security. These controls are vital to national security and actually serve well the interests of consumers as well as our military forces in assured supplies of oil and gas at reasonable prices.

First, let me set the record straight on the erroneous assumption that oil import controls costs billions of dollars. The price index for petroleum products this year is only 2.5 percent higher than in 1957–59, the period immediately prior to import controls, whereas the general cost of living is up over 20 percent. If other goods and services had increased only as much as the price of petroleum, consumers would be saving billions of dollars and would not be complaining about inflation and following practices that cause individuals and business to pay record interest rates for money.

Second, the idea that foreign oil is cheap assumes incorrectly that the price would not increase if we were dependent upon it and overlooks the large supply of low-cost natural gas supplied by the domestic petroleum industry. Demands for oil abroad are increasing so rapidly that what seems to be a surplus will prove quite temporary, as happened when the United States found a lot of new oil in the 1930's, with the result that foreign oil prices will increase sharply.

We must realize that the domestic petroleum industry supplies as much energy for us in the form of cheap natural gas as in the form of crude oil. The wholesale price of that natural gas is much cheaper than any natural gas that can be imported from overseas sources. We now use 20 trillion cubic feet of natural gas a year and probably save an average of 25 cents per thousand cubic feet, or about $5 billion a year, compared with the use of liquified natural gas imported by tankers.

Third, we have created a false sense of security by talking about crude oil imports representing only 12.2 percent of domestic production. In fact, petroleum imports are already 22 percent of our total demand. Furthermore, these imports are concentrated heavily on the east coast. For the east coast, 85 percent of the industrial fuel oil used currently is already imported, and the fact that these imports are free from controls provides benefits for this area not enjoyed by other areas that use gas. The east coast also uses large amounts of other imported oil, so that it now depends on imports for 50 percent of all oil it uses. If imports were greatly liberalized, the east coast would become almost entirely dependent on foreign oil. In that case, facilities to supply the east coast with oil from domestic sources would no longer exist or be available to take care of this area in emergencies.

Fourth, removal of controls on oil imports would have serious adverse effects on the entire economy. It would greatly depress the drilling of wells in the United States, affecting jobs everywhere, from the steel mills in Pittsburgh to the suppliers of pumps and tanks in the Midwest and the companies engaged in well servicing in the producing areas. Reduced production of oil and gas would also mean much less tax revenue for local, State, and Federal Governments. Such action would also drive out of business thousands of small operators in producing, refining, and related service operations, reducing competition and concentrating the remaining business in the hands of a few large companies.

The consequences that I have set forth as a result of removal of controls are economic realities that would affect every citizen as well as our national security. Protecting national security by means of stockpiling foreign oil has been mentioned but that would require billions of dollars of Federal money and still not avoid drastic economic consequences in the United States. We cannot expect private investors to maintain their properties in standby condition without payment of the same return they realize from operations which they must have to pay out and justify their investments.

The oil industry is a vital part of our economy affecting the lives of every citizen. We are all consumers of oil and gas, and we all benefit greatly from the better life that these attractive and reasonably priced forms of energy have made possible. Also, the vast investments made in this industry represent holdings by millions of individuals and stockholders. Even those who do not own oil stocks directly are affected if they own mutual funds or have interests in pension funds whose portfolios include a substantial portion in petroleum companies.

The petroleum industry of the United States has served the Nation well for many years. It has brought us from the "horse and buggy days" to the age of jets and space travel. It has provided the power for victory by our military forces in all our wars. It has increased our supplies of oil and gas enormously and provided us with products that became increasingly attractive in terms of the pay for an hour's work. It will continue to serve us well if we maintain in effect sound and reasonable policies of import controls and of differential tax treatment suited to the hazardous and unusual business of petroleum exploration and development.

NATIONAL GENERAL SERVICES PUBLIC ADVISORY COUNCIL

Mr. MURPHY. Mr. President, Robert L. Kunzig, Administrator of General Services, has recently formed a National General Services Public Advisory Council in keeping with President Nixon's desire for greater public involvement in the operations of the Federal Government.

I am pleased to learn that California is represented on the council by Jay Davis, Jr., of Monrovia.

Mr. Davis is vice president and a director of the Los Angeles-based Southern Counties Gas Companies, and also chairman of the American Gas Association. In addition, he is chairman and director of the Pacific Coast Gas Association.

Mr. Davis attended Fresno State College and the University of Southern California, where he majored in mathematics and English.

GSA is indeed fortunate to have obtained the services of such an outstanding civic-minded citizen.

MARY E. SWITZER TAKES A NEW JOB

Mr. RIBICOFF. Mr. President, Mary E. Switzer, the Administrator of the Social and Rehabilitation Service at HEW, is leaving the Government to become vice president of the World Rehabilitation Fund.

I have known Miss Switzer for many years. She was one of my most trusted and capable associates when I was Secretary of the Department of Health, Education, and Welfare.

She is also a dear friend.

Our Government will miss her wise counsel and competent administration. However, I know that in her new position at the World Rehabilitation Fund she will continue to make an important and constructive contribution to social and medical progress.

With the ending of her Federal career in 1970, Miss Switzer will complete 48 years of public service spanning an era marked by unprecedented changes and far-reaching improvements in federally supported social programs. As an administrator of major Federal social agencies for two decades, Miss Switzer exerted enormous influence over the evolution and expansion of federally financed services to millions of people in need of help.

Miss Switzer leaves Government service from the post of Administrator of the Social and Rehabilitation Service within the Department of Health, Education, and Welfare. This agency, organized August 15, 1967, with Miss Switzer as its first head, combines under her unified administration welfare and social programs with a total annual budget exceeding $8 billion. For more than 2½ years, as administrator of Federal programs serving the needy, the disabled, children and youth, and the aged, she has carried the largest adminstrative responsibility of any woman in the history of our Government.

A native of Newton, Mass., Miss Switzer is a 1921 graduate of Radcliffe College. Her Federal career began the following year when she became a junior economist in the Treasury Department. The first of many promotions came within a year, and her long rise to the highest level of the career service was underway. By 1928 Miss Switzer was handling press intelligence for the Secretary of the Treasury, and she subsequently served with that Department's representative on President Hoover's White House Editorial Report Service.

In 1934 Miss Switzer was named assistant to the Assistant Secretary of the Treasury who had supervisory responsibilities over the U.S. Public Health Service, and from that time to the present she has nurtured a deep and enduring concern for public health, and for the delivery of health and medical services. When the Public Health Service was transferred in 1939 to the Federal Security Agency—forerunner of the Department of Health, Education, and Welfare—Miss Switzer became assistant to the Administrator with special concern for public health and vocational rehabilitation services.

In this capacity Miss Switzer served during World War II as the Federal Security Agency representative with the Procurement and Assignment Services for Physicians, Dentists, Sanitary Engineers, and Nurses. She helped develop the Government's system for assuring maximum use of the Nation's medical and health manpower during the war emergency, and she served with the War Research Service which developed scientific policies and projects in support of the war effort. For this latter service she received the President's Certificate of Merit, the highest wartime award for civilians. Immediately following the war Miss Switzer was a member of the President's Scientific Research Board, which produced the widely used series of reports on "Science and Public Policy."

In 1950 Miss Switzer was named head of the Federal-State program for the rehabilitation of the disabled, a post which she held until her appointment as administrator of the Social and Rehabilitation Service in August 1967. As commissioner of the Vocational Rehabilitation Administration, Miss Switzer made sweeping changes in the public rehabilitation program and made recommendations to the Department and to the Congress which resulted in vastly expanded and improved services to the disabled.

When Miss Switzer assumed responsibility for administering vocational rehabilitation in 1950, this program was rehabilitating fewer than 60,000 disabled persons a year for useful work. Of this number, only about 200 were mentally retarded—a particularly difficult and challenging group to serve. The vending stand program which provides earning opportunities for blind operators under the Randolph-Sheppard Act was a source of employment in 1952 for about 1,500 blind persons, and the gross business of these small enterprises amounted to less than $19 million a year.

In the face of pressing needs for expansion of vocational rehabilitation services in the United States, there was no organized national training program to help meet the demands of public and voluntary rehabilitation agencies for professional staff members. Only 12 rehabilitation counselors graduated from American universities in 1950, and only three of the Nation's medical schools were providing their undergraduate medical students with any training in rehabilitation methods. No organized research program in the field of rehabilitation existed in 1950 to seek new methods and techniques for making rehabilitation services more effective.

One of several major social programs under Miss Switzer's administration, the public vocational rehabilitation program today is rehabilitating more than 240,000 disabled Americans a year for useful work. Many of these are severely disabled; about 8,000 of them are blind, and 25,000 of them are mentally retarded. The number of blind persons given employment through the vending stand program has grown to more than 3,300, and these 3,300 small enterprises now are doing a gross annual business of $86.4 million.

When she was commissioner of Vocational Rehabilitation, Miss Switzer instituted a comprehensive training program through which universities across the country are supplying a wide variety of professional specialists for both public and voluntary rehabilitation agencies. Training is provided in such fields as medicine; physical, occupational, and speech therapy; rehabilitation counseling, psychology, prosthetics, and orthoptics; workshop administration and other specialties involved in rehabilitation. Last year more than 5,000 rehabilitation counselors were graduated in this country—a far cry from the mere dozen who entered this profession in 1950.

Today, in contrast to the three medical schools offering undergraduate training in rehabilitation for medical students, most of the Nation's 98 schools of medicine and osteopathy routinely provide such training. Seventy-six of these schools are providing training supported by the Social and Rehabilitation Service. The far-reaching research program initiated by Miss Switzer today supports a wide variety of advanced research undertakings in universities, rehabilitation facilities, and other institutions with research competence. This research program has brought about vast improvements in rehabilitation methods and techniques, benefiting uncounted thousands of severely disabled individuals.

One achievement of which Miss Switzer is especially proud is the establishment in 1960 of an international rehabilitation research program. This was in part the product of an interest in international affairs extending back to her college years when she majored in international law at Radcliffe, and her subsequent participation as a U.S. representative in international proceedings which led to development of the constitution for the World Health Organization. Miss Switzer helped work out the idea of using foreign currencies owed to the United States by foreign governments for the support of rehabilitation research abroad. Since this program got underway in 1961, 237 projects have operated in 12 countries. Forty-eight new projects in seven countries were approved in 1969. Through these projects, rehabilitation and medical specialists in foreign countries receive valuable training which otherwise would not be possible, and rehabilitation methodology is advanced throughout the world.

In fiscal terms alone the Federal vocational rehabilitation agency grew under Miss Switzer's leadership from a small agency that invested only $20.5 million in the rehabilitation of the disabled in 1950 to the dynamic organization now acknowledged to be making a substantial impact on the problem of disability throughout the United States. The agency's budget for 1969 amounted to $433.2 million—an investment that will be repaid many times over by taxes collected from the thousands of disabled men and women provided with the capacity and the opportunity to work and to earn.

August 15, 1967, is a significant milestone in Miss Switzer's public service. On that date she assumed responsibility for unifying under her leadership all of the major welfare and rehabilitation programs of the department and heading them in a new direction. As administrator of the newly constituted Social and Rehabilitation Service, Miss Switzer faced the enormous task of welding into a single organization the income support programs for needy Americans, rehabilitation services for the disabled, and specialized services for mothers and children, for youth, and for the aged.

Five major Federal agencies serving millions of Americans were brought under the new agency. Its functions included providing cash assistance, in 1967, to 7.6 million persons—about 4 percent of the population—supporting medical assistance for 6 million needy persons a year, providing rehabilitation services for the Nation's disabled, extending Federal assistance for medical services for 450,000 crippled children each year, helping a quarter million women a year obtain family planning services, and assisting 700 projects in the course of a year in providing services for 19 million Americans over 65. To carry out its far flung missions, Miss Switzer's new agency began with a work force of 1,900.

The Social and Rehabilitation Service under Miss Switzer's guidance has simplified procedures for needy people to obtain public assistance and other social services, and has ameliorated the punitive aspects which often had been associated with welfare payments. Both the agency's experience and its research proved Miss Switzer's conviction that the overwhelming majority of welfare recipients prefer work and self-support to idleness and dependency.

Exercising her prerogatives to unify social programs, Miss Switzer has achieved close and effective relationships between the welfare and rehabilitation components of her agency. As a consequence, increasing numbers of persons on welfare as a result of disability are receiving rehabilitation services on a priority basis, and increasing numbers thereby are enabled to become wholly or largely self-supporting. One of the success stories still being written is the work incentive program through which welfare recipients are provided with job training and job opportunities in cooperation with the Department of Labor's manpower training and placement programs.

Miss Switzer regards the monumental task of organizing the Social and Rehabilitation Service and welding it into an effective instrument for administering and advancing major social programs as on the way to being accomplished. She also recognizes the considerable contributions of the constituent agencies under her control to the emerging concepts upon which legislative proposals for a new and improved welfare system are largely based.

Miss Switzer was elected to the position of vice president of the World Rehabilitation Fund by the Board of Governors of the Fund on December 2, 1969. At that time the Board asked her to assist the Fund's efforts to carry out its growing worldwide commitments in the rehabilitation of the disabled. In her new capacity, Miss Switzer will be in charge of the Fund's Washington office which she will establish, and will be responsible for the Fund's relationships with the U.S. Government, with national and international voluntary organizations, and with international health agencies. She also will provide technical consultation to these agencies on behalf of the Fund. She will also be associated on the domestic scene with the Association of Schools of Allied Health Professions, a longtime interest of hers.

Miss Switzer has been the recipient of many honors both in the United States and abroad. She received the President's Certificate of Merit, highest wartime award given civil servants, for her work in medical manpower procurement and scientific research programs. In 1956 she received the Department of Health, Education, and Welfare Distinguished Service Award.

She received the Albert Lasker Award in 1960 for her contributions to international rehabilitation programs. In 1966 she received the National Civil Service Award, the Hadassah Myrtle Wreath Award, Dignity of Man Award from the Kessler Institute for Rehabilitation, and Distinguished Service Medal from the National Society for Crippled Children and Adults. Her most recent one has special significance—the George Deaver Award from the Institute for the Crippled and Disabled.

Honorary degrees have been conferred on Miss Switzer by Tufts University, Gallaudet College, Western College for Women, Adelphi College, Boston University, Duke University, Women's Medical College of Pennsylvania, California College of Medicine, Springfield College, Manhattanville College of the Sacred Heart, Temple University, New York University, Smith College, Assumption College, Hofstra University, and Russell Sage College.

Miss Switzer is a past president of the National Rehabilitation Association and twice served as president of the American Hearing Society. In 1946 she was the U.S. representative to the first International Health Conference which developed the charter for the World Health Organization. She served on the American Preparatory Commission and later as a delegate to the First World Congress on Mental Health. In 1949 she was a delegate to the Second World Health Assembly. She is vice president for North America and member of the Council of the International Society for Rehabilitation of the Disabled. In 1968 she was vice chairman of the U.S. delegation to the First United Nations Conference of Ministers Responsible for Social Welfare. In June 1969, Miss Switzer was appointed the first woman to serve on the board of directors of Georgetown University and in October 1969, as the first woman to be appointed a trustee of Assumption College.

Miss Switzer has served as a member of the board of trustees, Radcliffe College; board of trustees, Menninger Foundation; board of visitors, St. Elizabeths Hospital; advisory council, Community Services Committee, AFL–CIO; and the Board of the World Rehabilitation Fund.

A longtime resident of Alexandria, Va., Miss Switzer finds time to participate actively in the civic affairs and social life of her home community.

For the Washington Post of December 18, 1969, reporter Mary Wiegers wrote an informative article about an interview with Miss Switzer. The interview captures the flavor of Miss Switzer's inviting and charming personality.

I ask unanimous consent that article be printed in the RECORD.

On January 3, 1968, Miss Switzer spoke before the HEW Forum. Her address is most informative—and inspiring. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

MARY SWITZER: WELFARE, WORK, AND WISDOM

(By Mary Wiegers)

Since Mary Switzer "came to Washington with the Harding gang," eight Presidents have come and gone.

Through all those administrations, Mary Switzer was making a steady climb from a clerk's post in the U.S. Treasury Department to the job she holds today as head of the U.S. Department of Health, Education, and Welfare's Social and Rehabilitation Service.

The SRS is an agency organized in 1967 with Miss Switzer as its first head. It combines welfare and social service programs with a total annual budget exceeding $8 billion, and distributes funds to the needy, disabled, children and the aged. It also makes Miss Switzer the executive with the largest administrative responsibility of any woman in government.

Now at the age of 69, the tough-minded bureaucrat with the Boston accent is retiring. HEW Secretary Robert Finch announced yesterday that he is accepting her resignation "with regret," to be effective in mid-February.

As the announcement was being released, the gray-haired, sparkling-eyed Miss Switzer sat at a conference table outside her office and talked about her 48 years of government service.

She reflected on the future of the welfare program, and the landmark decision which merged welfare, rehabilitation and social services and what it could mean.

She recalled highlights from her career, the jobs she didn't get, the ones she did—like becoming the first person to organize a bacteriological and chemical warfare program, and the first to head federal programs for rehabilitation of the disadvantaged.

The beginning, she recalled, was pretty inauspicious. "I came in at the bottom as a junior economist in the division of statistics in the Treasury Department. If there's one thing I have no gift for, it's research." On the day the Graf Zeppelin flew over Washington, she was fired. But the Treasury Department is "paternalistic" and took her back as a mimeograph operator.

That first setback didn't last long. By 1928, Mary Switzer was handling press intelligence for the Secretary of the Treasury. By 1934 she was assistant to the assistant secretary, who supervised the Public Health Service.

In 1939, when the Public Health Service was transferred to the Federal Security Agency, forerunner of HEW, Miss Switzer became assistant to the administrator. During the war, she managed the Procurement and Assignment Services for Physicians, Dentists, Sanitary Engineers and Nurses. For her work she received the President's Certificate of Merit, the first of many honors.

She also organized a research program on bacteriological and chemical warfare. "I had to do it because, strangely enough in today's light, the Army and Navy wouldn't do it. They thought it was contrary to the Geneva Convention. I've often thought how terrible it was, that I did that though I don't know. I don't see much difference between one weapon and another, though on the scale they're doing it today, it's unnecessary and unreal. Anyway we developed some good medical information valuable to researchers later on, so I suppose some good came out of it."

In 1950, Miss Switzer became head of the federal-state program for the rehabilitation of the disabled. Thirteen years later, she was made commissioner of the vocational rehabilitation administration, when HEW Secretary Anthony Celebrezze thought that rehabilitation ought to be co-equal with welfare. In 1967, Secretary John Gardner sold her on the idea of merging the two areas and she was appointed head.

That merging, she felt, was an important and wise step. What she'd like to see now is a merging of services for the individual on the local level.

"The next five years are years that need the thrust in the field to get much closer interaction of these services in the community." She would like to see the individual get medical needs, welfare assistance, disability training, and so on, all in the same place, and with all the bureaus working together.

"There has to be a willingness to give up sovereignty on everybody's part to give people what they have to have. There must be decentralization of authority to regions. This big government has to have some glue—has to put things together."

The SRS, she believes, is the part of HEW that is concerned about the individual. "It's like a southern mansion with three pillars. There's health on one side, education on the other and us in the middle.

"Health and education deal mainly with institutions. And sometimes the institutionalized structure stops before they ever see a person. SRS reaches down to the individual.

"One of the most exciting exposures to involvement was with the National Welfare Rights Organization people. During the Poor People's march, we met with them or their representatives every day for a month.

"The greatest eye opener of that was the difficulty they had getting something done on the local level."

Miss Switzer lives in Alexandria and has made it a point to take part in community affairs there. "It's essential if you have a job like mine, where you are telling people what to do in the communities. It's one thing to tell people what to do, but to do it yourself is to find out how difficult it really is.

"In the Rehabilitation Administration, I had every letter of complaint followed up immediately. Now I've adopted that program in welfare, but I've found the welfare people are not as responsive. I suppose after years in the field they become kind of tough."

On the welfare program, Mary Switzer is a firm believer that "people shouldn't get something for nothing. I think we made the biggest mistake when we saw the welfare load growing, when we didn't emphasize work."

She added that work must be made dignified and meaningful again, as it's not been "in this age of permissiveness."

"I think that one good part about Mr. Nixon's welfare program is that it doesn't put a premium on breaking up homes." In the past, she explained, a man didn't work if, for instance, he had a wife and three children, because he could get more money for his family by deserting them and letting them get welfare.

"I don't see anything else that will change the present psychology of not minding dependency, except to make it more attractive to be employed."

Miss Switzer, herself, is going to continue to be employed after her retirement. On Dec. 2, she was elected vice president of the World Rehabilitation Fund, and when she leaves government service in February, she'll set up an office at 1 Dupont Circle for the fund.

She'll also work with the Association of Schools for Allied Health Professions in Washington.

"But if I want to take a day off, I'll be able to. When I feel like cooking my spiced gooseberry preserves and yellow tomato preserves, I can."

Her HEW office is filled with more than 40 awards she has received, among them the Albert Lasker award and the National Civil Service award. Sixteen colleges have given her honorary degrees. She is the first woman to serve on the board of directors of Georgetown University, and the first woman to be appointed trustee of Assumption College.

Miss Switzer was born in Newton, Mass. Her parents came from Ireland. About the one disappointment in her life was that she didn't become assistant director of the mint, a job she badly wanted at the time. "Nellie Tayloe Ross was director then, and she said no. She didn't want another woman around her. When I think of what a dead end that job would have been . . ." said Miss Switzer, her voice trailing off.

REHABILITATION: AN ACT OF FAITH

(By Mary E. Switzer)

I see the Social and Rehabilitation Service in terms of people. I feel an intensely personal identification with hundreds of rehabilitated people I have met all over the world. One of my most vivid recollections is of a young man in Portland, Oregon, who had broken his neck in an automobile accident two years before I saw him. He was then a patient in a nursing home, had been bedridden and almost helpless for two years.

His physical disability was severe, almost insupportable, but his spiritual and social disability was even worse. He had been a brilliant young commercial art student in a school where a number of handicapped individuals had been trained by the Oregon Department of Vocational Rehabilitation. The teachers and staff of this school knew about rehabilitation and immediately thought of it in connection with this young man. Counselors, teachers, friends, and family worked with him to try to bring him out of his depression so he could embark again in the world of art, where he had such a promising career.

For two years this was without avail, and then suddenly the spark revived and hope returned. Faith in him had never been lost, and this faith by those who were committed to see him through, combined with all their kindnesses and acts of love, helped to bring about this miracle.

He was in a modest nursing home, rather a grim place it seemed to me as I visited him, and I thought it would be hard to revive any spirit in that atmosphere. He came from a limited family background, and family resources had long since been used up in his physical care.

The day I visited him, he spoke with a certain degree of enthusiasm about getting back to his drawing and painting. He had begun by copying the little portraits of children that families wanted enlarged. I must have gotten across to him my elation at his response, because a month or so later he sent me a lovely picture of the head of a little boy with something very special in his eyes—one of his first comeback efforts.

This little boy looks down at me in my office every day and gives me the inner strength to do impossible things. It reminds one that this young man made it. He went back to his art work with almost no motion anywhere except in the tips of his fingers. He painted and drew, and people in downtown Portland began to buy his paintings. He began to earn money and to be almost self-sustaining. And what did he do with the first money he earned? He paid it back to the Welfare Department on which he had been dependent for two years.

This case has almost every lesson any rehabilitation case could have. Most of all, it illustrates the axiomatic fact that without faith, hope can hardly be revived. My life with rehabilitation has been a continuous renewal of acts of faith by myself and thousands of others who had joined in writing the rehabilitation story, which brought us last August to the creation of the Social and Rehabilitation Service.

FAITH IN OUR COUNTRY

Today, I reaffirm anew my abiding faith in the strength of our country, and I do so because I have been able to look back on other days when faith was hard to sustain. We are all the result of the road over which we have come, of the people who have inspired us, of the work which has challenged us and built our experience, and we are also frequently standing at "crisis corner"—as we are today—looking back and looking ahead, and wondering.

In the course of my long Government service, I have heard warnings. I heard it long ago from President Roosevelt, when in his first inaugural he said, "The only thing we have to fear is fear itself." Today, we are again on the verge of succumbing to fear—fear of the complicated and seemingly uncontrollable forces creating problems beyond our power to solve.

But not long after President Roosevelt's clarion call, revolutionary things happened to our social fabric. The Social Security Act was passed and a floor was built under the disasters of the depression. It is well to recall here that this floor had financial grants that remain the main support of dependent people today, and it had work programs in great variety—WPA, NYA, PWA, and so on. Then in 1939, the Federal Security Agency was created, bringing together for the first time the constellation of services that constituted the Federal Government's investment in its human resources of health, education, and welfare.

I was one of the staff members chosen by the first Administrator, Paul McNutt, to attempt to unify at least the philosophy behind what was for those days a major shift in Federal policy. Before much progress was made to forge a unified agency, the war came and, with it, seemingly insurmountable problems for this new and struggling agency.

But our faith was unbounded in those days. We had faith in our manifest destiny, and faith in our own ability to do what had to be done. During those years, I learned about scarce medical manpower and how scientific research could be organized by Government grants and contracts. I was exposed to the miracles that were taking place in the care of the injured in battle. Dr. Howard Rusk was building the rehabilitation service of the Air Force, Henry Kessler had the Navy program, and the Army, too, was making its contribution, especially in work for the blind at Valley Forge and Avon.

The civilian program of vocational rehabilitation, reaching only a few thousand people a year, was chafing under its inability to respond to the war needs, when suddenly, in 1943, disability became a serious fact in our consciousness and trained manpower a national need. Congress passed the 1943 amendments to the Vocational Rehabilitation Act, the first gesture of recognition that not only the war-disabled, but all disabled people, were entitled to a chance for a full life and for an opportunity to contribute to the needs of our country.

CREATIVE FORCES OF HEALING

Finally the war was over and the creative forces of healing were finding their way back into civilian life. Dr. Rusk went to New York

to found his great center and begin his years of tireless education of the United States and the world in what rehabilitation could mean to the faith and hope of that world. He and others began to demand more and more of the civilian program, no longer satisfied with small victories when so many great ones needed to be won for peace.

The forties gave way to the fifties, and one day the then Federal Security Administrator, Oscar Ewing, said to me, "I want you to take over the vocational rehabilitation program, expand it, and breathe new life into it." With the support of leaders becoming constantly more numerous, vocal, and influential, with another act of faith, I did. Fifteen years later, the greatest challenge that rehabilitation has ever had was given to it and to me when Secretary Gardner created the Social and Rehabilitation Service on August 15, 1967.

HELP AND HOPE—FOR ALL IN NEED

What were the ingredients of the years that brought such a profound expression of faith in the rehabilitation program? An important foundation stone was the creation of the Department of Health, Education, and Welfare in 1953. Its motto, "Spes Anchora Vitae—Hope the Anchor of Life," seemed to make a special plea to reaffirm once more our faith that more could be done for the disabled, for the underprivileged, and for all those in need.

Gradually, the philosophy of helping people constructively to be what they have it in themselves to be permeated the new Department's thinking about the future and influenced its choice of programs to advocate. And so Congress passed the 1954 Vocational Rehabilitation Amendments, coupled with companion pieces enacted the same year—such as the amendment to the Hospital and Medical Facilities Act which made it possible to build rehabilitation facilities, the first step toward the Social Security disability payments program. But more important than all of these separate acts was the national commitment to serve all the disabled and return them to useful work at the earliest possible time.

Without the basic features of the new 1954 Act, properly exploited through the 1950's, rehabilitation would not be where it is today; it would not have its opportunity now, or its obligation.

* * * * *

As we moved through the busy fifties and came into the sixties, a sense of uneasiness was growing again in our society, based on a slowing down of civil rights progress, unemployment (especially in marginal groups), mounting decay in our cities, and economic upheavals resulting from our tremendous technological changes.

And then we had another stirring challenge. Just as many were asking for the impossible from their country, a young President said in his inaugural, "Ask not what your country can do for you—ask what you can do for your country." How many times in the past six years have we thought about that challenge? Like President Roosevelt's—great words, it unleashes something within us when we are tired, frustrated, and frightened. We renew again our faith in our America, because we *know* we can do *something* for our country. Building on the past and the lessons of the past, the future becomes clear and hopeful.

A GREAT MOMENT FOR REHABILITATION

In what now looks to me like a fairly sequestered, pleasant valley, the rehabilitation program was also coming of age in the sixties. It was in August 1962 that President Kennedy in a ceremony in the Rose Garden at the White House memorialized the fact that we had reached an annual goal long sought for—more than 100,000 disabled men and women had been rehabilitated through our public program in a single year. This was a great moment in the lives of many of us.

As we look back today upon the success story that rehabilitation is, we see a well-established public program with its roots now in every community in the country—a mosaic of local community groups serving the mentally retarded, the cerebral palsied, the blind, and some antedating the idea of rehabilitation, but unknowingly committed to its philosophy.

We look back, too, from any one of hundreds of rehabilitation facilities designed to provide under one roof the many services we have learned to give, many of which were unknown in the historic past.

We look back from the apex of our educational institutions—hundreds of them—where thousands of dedicated, talented people are acquiring the knowledge and skills to go forth to share the burden.

Today, the success of vocational rehabilitation owes much—perhaps all that is distinctive in the program—to the principle that the serving person gives himself to the served; he thinks first of the disabled person as a human being in need of something and, in the giving of that something, the giver receives even more, to store up for the next cycle of sharing.

* * * * *

DARING TO INNOVATE

Now, just a word about two or three of the distinctive characteristics which have made rehabilitation popular and which have lessons for us today. I think the research and demonstration program broke ground in demonstrating new methods of dealing with old problems and daring innovations in tackling new ones. First of all, it identified areas of need that were not now served. A good example is the field of mental retardation where one of the first and earliest projects was a work training and evaluation effort to show what the mentally retarded could really do. And against a hundred mentally retarded young people who were rehabilitated at the beginning of the program we had about ten thousand last year—and these were in a whole variety of jobs, including the civil service. This is an old story now, but it's a good example too of how a pebble dropped in a pool makes concentric circles that have far-reaching effects. This led to the cooperative effort with school systems—first, for the mentally retarded and, finally, for all disabled youngsters—to try to get as early as possible a hold and a continuing program for their vocational adjustment.

All this was before President Kennedy's task force so that when that report came out, the rehabilitation program was able to take full advantage of it. It resulted in the establishment of comprehensive research and training centers and extensive new legislation which is now a matter of history. And it led, of course, to the inclusion of the major parts of the mentally retarded program in the new agency, the Social and Rehabilitation Service.

Another series of projects concerned the older handicapped worker. Here again the same procedure was followed—first, a demonstration showing new ways of doing things, spreading it by a wide variety of other projects and, finally, the public program taking it on.

Public assistance cases have always been a major concern of rehabilitation agencies and a *great* variety of projects have been tried in this area. The cost-effectiveness of these projects have been outstanding. One of the most interesting and successful, in the State of California, shows an 80-percent success story, after 30 months, of people working who were originally on public assistance.

NEW EMPLOYMENT OPPORTUNITIES

An area of tremendous importance is to open up a new and special employment opportunities. I think we would all agree that, with the complexities of the labor market for any group that has special problems, the necessity of experimenting with new kinds of professional opportunities is fundamental. A few of the more dramatic examples I'll just mention in passing:

We had a training program in spoken Russian for the blind, among the group of people who have a special talent for language, in order to supply much need translators.

The Theater for the Deaf opens up to the deaf a whole range of professional opportunities and related occupations in theater.

For the retarded, we have *very* comprehensive experiments still going on in banking, in making candles, and in a whole variety of other jobs.

For the mentally ill, amazing success has been achieved in special training for women in home economics projects.

For the blind, there have also been training programs for tax assisters in Internal Revenue.

And oftentimes the research grants have led to legislation. Our statewide rehabilitation planning grew out of a grant to the Oklahoma Joint Committee of the Legislature for surveying the needs of that State.

In the last several years we have been concentrating particularly on private industry, and the importance of tying in employers in the process of evaluation and adjusment of mentally disabled and physically disabled people. Among the outstanding areas here:

Fountain House in New York works with 34 different employers handling the personal adjustment of mental patients returned from State hospitals. This project—right in the center of one of the most difficult sections of New York City—offers great promise as a pattern for attempting to do something with the hard core unemployed in our central cities. There is a similar project in Philadelphia.

In Seattle, 100 employers are tied in to vocational evaluation—and this is the third year of that project which includes employers as part of the team.

A BRIDGE TO THE COMMUNITY

Equally as important as rehabilitation projects themselves and the value of the work that comes from them is the bridge that is built to the community by the use of community facilities. Almost every organization in this country that has anything to do nationally, statewide, or locally, with any phase of physical disability is tied in to the rehabilitation program in one way or another.

This means a tremendous constituency of people who are committed to serve not only with their dollars, with themselves, with the voluntary effort that goes along with it, but with a total understanding of what the problem of disability can be. And this kind of cooperative efforts, I think, has great significance for the Social and Rehabilitation Service and the short and long future of public welfare.

* * * * *

In 1965, President Johnson proposed, and Congress passed without a single dissent, a bill authorizing more than a billion dollars for vocational rehabilitation programs in the years ahead. It did this with the clear understanding that somehow the last 15 years had shown that the basic structure of trying to create community resources, facilities, spirit, and commitment to help disabled people be what they have it within them to be was a national program of great significance.

EXTENDING REHABILITATION TO SOCIALLY HANDICAPPED

But more important for our immediate consideration is the fact that public discussion and knowledge of what rehabilitation had accomplished might be extended to reach other millions, people who were not victims

of precise physical or mental disability, but who were handicapped at least as seriously by social, educational, cultural, economic, and other limitations. In essence, there was a growing consensus that problems of the perennially poor and fundamentally disadvantaged should be attacked on the same general basis as had been used with the physically and mentally handicapped.

* * * * *

In 1963, as Commissioner of Vocational Rehabilitation, I testified before the Senate Committee on Employment and Manpower, and said:

"I have wondered many times if some of the concepts and methods of operation of the vocational rehabilitation program might not be profitably put to use in attacking some of the unemployment problems of the nondisabled as well as the disabled . . . there is within the unemployed group a 'hard core' of people whose problems will not yield to standard procedures of education, training, and hiring. . . . I believe many of them could be prepared for jobs and placed in employment if we had an organized national program to deal with them individually, as we now approach the problem of rehabilitating handicapped people on an individual basis."

In the past five years, these views have been projected in numerous action programs aimed at experimenting with and testing the workability of such an effort—in the poverty program, the manpower development and training program, and others.

* * * * *

ACTION TO IMPROVE PUBLIC WELFARE

And where are we now, as we face the momentous changes which we hope to influence for an improved quality of life for those we serve? The creation of the Social and Rehabilitation Service is an effort on the part of the Secretary to recognize the need for a guiding principle, and he has chosen rehabilitation to influence the change in our public welfare programs.

The President recognized the need for taking a new look at the welfare system when he said yesterday as he signed the new Social Security Amendments of 1967:

"The welfare system today pleases no one. It is criticized by liberals and conservatives, by the poor and the wealthy, by social workers and politicians, by whites and by Negroes in every area of the Nation. My recommendations to the Congress this year sought to make basic changes in the system. Some of these recommendations were adopted. They include a work incentive program, incentives for earning, day care for children, child and maternal health services, and family planning services. I believe these changes will have a good effect.

"Other of my recommendations were not adopted by the Congress. In their place, the Congress substituted certain severe restrictions. I am directing Secretary Gardner to work with State governments so that compassionate safeguards are established to protect deserving mothers and needy children. The welfare system in America is outmoded and in need of a major change."

And then he announced appointment of a commission to look into all aspects of welfare and related programs.

CREATION OF SRS

Now, the first step in this major change was taken by the creation of the Social and Rehabilitation Service. A major purpose of the reorganization was to place the concept of rehabilitation at the very heart of the new agency. Another major purpose was to bring together programs that have as their objective service to certain target groups—to improve the ability to work together, to make it possible to have a better coordinated approach, to simplify relationships with States and communities, and to get service more efficiently, more effectively, and faster to the people we are in business to serve. And the major target groups that we have in the Social and Rehabilitation Service are, of course, the disabled, the aged, and families, especially children.

Another purpose the Secretary hoped to accomplish was to unsnarl the complexities of the cash payments part of welfare from its service programs. And so it was decided that the payments process would be administered as the Assistance Payments Administration and the service components would be added to the programs that are in the best position to promote the extension and enlargement of services to the target groups. Title XIX, the Medical Assistance Program, is so important and in such a developing stage that it required a separate administration—the Medical Services Administration—so that it could pursue its objectives and so that we could watch carefully this development.

The reorganization was also a recognition of public disaffection with certain aspects of the public welfare program because of the continually increasing costs of the program of Aid to Families with Dependent Children (AFDC), and the absence of any substantial effort to help people to independence by training them for work. The growing relief load in a period of prosperity, coupled with all the other problems of poverty, civil rights, and poor housing associated with the city ghettos, is hard for people to understand. They tend to blame "welfare."

NEW CONCEPTS NEEDED

The public attitude has to be changed. The key to most change is in the hands of the thousands of people who have given their lives to service in departments of public welfare throughout this country and who have been committed to the improvement of the lives of the people they served. But added to this concern must be other ingredients. There must be the ingredient of providing incentive to help people to be independent and to be removed from dependency on welfare, as well as to have an adequate level of welfare where this remains necessary. We must stress those aspects of the program that are constructive, that have as their objective work training, family planning, proper day care, and all of the things that can be used positively to develop a public welfare program which more nearly meets the needs of our people.

Combining with other programs—like those of the Office of Economic Opportunity, the Department of Labor, and the work in our cities—is our great challenge. And we will not meet it looking backward. We will not meet it by being unwilling to make exceptions. We will not meet it unless we are daring, and really revolutionary in our concepts. And I believe we *can* be, because I believe we *must* be. I believe the survival of this country as we know it and love it depends upon this act of faith.

I believe that we can take this new law, as it was signed, make the constructive approach to it that is expected of us, use the lessons that have been learned from the rehabilitation program, and bring into focus the kinds of programs that we feel are important, are essential, and are right. We must never forget that we are the main advocates of the people who are dependent upon us for educational programs, for health programs, for economic support, for the quality of life that is just as essential as the material aspects of life. And for this we have an opportunity again, I think, to reaffirm our faith in ourselves, in our capacity, in the strength of our Government, and in the leadership that we have in this Department.

I'll close by quoting a favorite verse from Carl Sandburg which expresses pretty well what we would like all of us to have in our hearts:

"I see America, not in the setting sun of a black night of despair ahead of us.

"I see America in the crimson light of a rising sun fresh from the burning, creative hand of God.

"I see great days ahead, great days possible to men and women of will and vision."

GENERAL SERVICES PUBLIC ADVISORY COUNCIL

Mr. MURPHY. Mr. President, General Services Administrator Robert L. Kunzig has named Mr. Stanley W. McKiernan, a prominent Los Angeles attorney, to the newly created General Services Public Advisory Council.

Public awareness of the impact of governmental activities upon the daily lives of all citizens is basic to the democratic process. The variety and scope of GSA activities makes it desirable to establish a special advisory committee so that the views of the public can reach the highest level of policymaking at GSA.

Mr. McKiernan is a member of the California Bar Association. He received his bachelor's degree at the University of Wisconsin, his master's at the University of Southern California, and his law degree at Southwestern College of Law.

I am sure that the wide and varied background which Mr. McKiernan brings to the Council will be a valuable asset to Administrator Kunzig.

ALCOHOL—THE IGNORED DRUG

Mr. JAVITS. Mr. President, I commend to the attention of Senators a series of three articles on alcoholism written by Colman McCarthy and published recently in the Washington Post. I ask unanimous consent that the full text of the articles, entitled "Alcohol: The Ignored Drug With the Polished Image," "Getting Off the Bottle and Staying Off," and "Alcohol's Indecent Disease," be printed in the RECORD at the conclusion of my remarks.

The Senator from Utah (Mr. Moss), and I, representing a completely bypartisan effort, have been trying since 1966 to establish alcoholism as an acknowledged illness which needs to be treated as a sociomedical problem, how the Senator from Iowa (Mr. HUGHES), as chairman of the Special Alcoholism and Narcotics Subcommittee, of which I am the ranking minority member hereafter, has given the fight on alcoholism—the fourth major "disease" in America—the energy and the leadership which the consummation of this total effort requires. Senator HUGHES has been tireless in leading the fight against alcoholism and has conducted hearings on the problem in Washington, New York, Los Angeles, and Denver, in an effort to focus attention of the public on the disease afflicting approximately 5 million Americans. Senator HUGHES may have been reluctant to call this series of articles to the attention of the Senate because of the prominence—rightfully given—of his own role in the fight against alcoholism. Therefore, I have taken the liberty of placing the series of articles in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

ALCOHOL: THE IGNORED DRUG WITH THE POLISHED IMAGE

(By Colman McCarthy)

Not long ago, Iowa Senator Harold Hughes, a former alcoholic, remarked, "as long as we put the liquor salesman on the city council and put the marijuana salesman in jail, we're going to have trouble from the young."

And trouble in lots of others ways, too. One of the side effects of the present preoccupation to the evils of marijuana and other drugs is that what is perhaps the most widely destructive drug of all—alcohol—continues on, almost as unnoticed as uncontrolled. Those who see the alcohol drug as making the country more and more an alcoholic society are often laughed off or put off. Even those who try to do something in a practical way are often blocked. Recently, a lawyer acquaintance driving on a Long Island highway saw a drunk driver careening along in heavy traffic. The lawyer, a brave man, waved the drunk to the shoulder. He detained him until a trooper arrived. When the latter did come, he was astonished at the lawyer's actions. How dare he disrupt traffic. The lawyer said he was only trying to prevent a potential accident. Only after he threatened to make a citizen's arrest of the drunk and report the trooper to his sergeant did the trooper agree to detain the drunken driver.

Current statistics reveal that some 80 million Americans regularly drink: 72 per cent male, 57 per cent female; 82 per cent of the Catholic population, 56 per cent among Protestants. The Distilled Spirits Institute reports that in 1968 in Washington, 5.9 million gallons of liquor were purchased, not including beer or wine.

Nationally, six to nine million people are alcoholics. This makes alcoholism the fourth major disease in America, following cancer, heart disease and mental illness. Aside from the alcoholics themselves, some 20 million others—family and friends—suffer materially and emotionally by having to live with them.

According to an estimate by Dr. William Terhune, a former Yale Medical School professor and writer of the authoritative book, "The Safe Way to Drink," alcoholic men outnumber women five to one among the poor; in the upper class, the ratio is equal. A recent study by the Department of Transportation said that one driver out of every 50 is drunk; not merely drinking, but drunk. Last year, an estimated 25,000 traffic deaths and 200,000 injuries involved drinking drivers. In 1965, said the FBI, two million arrests—one in three—were for public drunkenness. The North American Association of Alcoholism Programs estimates the cost to industry from absenteeism and accidents due to alcoholism at $2 billion annually.

Despite this massive evidence of the drug's harm to the individual and danger to the society, little is done to control either it or its effect.

Among the social reasons for ignoring the dangers of alcohol is that many do not even classify it as drug. The marijuana of the hippies, the heroin of the junkie, the LSD of the hallucinates who leap from buildings: those are the drugs that get attention and worry the Establishment. Never mind that marijuana, for examples, does not necessarily lead to addiction, nor mental or physical deterioration—all of which are effects of alcohol. Thus, says Dr. Joel Fort, director of the Center for Treatment and Education on Alcoholism, Oakland, Calif., "smoking one marijuana cigarette can lead to many years in prison, while the alcohol user drinks with impunity despite the many dangers to himself and society."

Many social drinkers, particularly those with a sophisticated self-image, laugh off the effects of alcohol. Yet even one mild drink hampers both intelligence and efficiency. Dr. Terhune tells how some medical schools demonstrate to future doctors the effect of alcohol on the intelligence. The students are given "two written examinations on subsequent days, with similar questions. The first exam is written under the usual circumstances without alcohol. Preceding the second one, each man is given one bottle of beer to drink . . . At the end of the second examination, the students are asked these questions: first, is this exam easier, harder or about the same as the one yesterday? Second, have you done better worse, or as well as yesterday?

"Most of the students reply that the second test is easier and that their marks are better. However, the grades on the second exam are approximately 17 per cent lower."

A second social reason for ignoring the dangers of the alcohol drug is due to its well-informed and highly shined image. The alcoholic beverage industry in the United States grosses $12 billion a year, and spends nearly $200 million on advertising, a figure exceeded only by car and food ads. In a recent New Yorker magazine, 28 out of 71 full-page ads were for alcohol. Perfume was next with 6 out of 71.

The liquor ads unfailingly associate the consumption of the drug with sex, success, smartness, elegance, youth, health and beauty. Shrewdly, they often stress the high integrity of the liquor maker; occasionally, this is a hooded monk—Brother Timothy is popular—or a Kentucky mountaineer, even though most monks and mountaineers are too busy with prayer or poverty to produce or profit by liquor.

Partly as a result of the advertising, partly from a national tradition that does not limit liquor consumption to mealtime or festivities, the alcohol drug is in heavy demand. Some 800 million gallons of wine and distilled liquor and 100 million barrels of beer are legally produced annually. Forty thousand liquor stores, along with uncounted grocery and drug stores, help Americans to have a yearly alcohol intake per capita of 17 gallons. According to Dr. Philip White of the AMA, the average 70-year-old American has downed 510 gallons of gin.

Legally, sale of the alcohol drug is more and more widely sanctioned. The Prohibition repeal legislation that began in 1933 culminated three years ago when the last remaining statewide ban on liquor sales ended in Mississippi. Beyond this, the drug has been available over the counter without prescription and, despite such laws as forbidding sales to minors and known inebriates, virtually available to anyone who is half-determined to get it.

The federal government takes in $4 billion a year on liquor taxes, second only to individual and corporate income taxes. Hence, weakly devised and lamely enforced controls are allowed to stand, lest the golden egg-laying goose be killed. Legislatures, particularly on the state level, are eagle-eyed by the powerful liquor lobbies and seldom pass alcohol control legislation without industry opposition. The legislatures have had difficulty passing strong laws against drunken driving; as of January 1969, only 11 states fully complied with the National Safety Standards on alcohol.

Many of the legal restraints upon alcohol are applied to public drunks. A disproportionate number involve the alcoholic poor in slums and skid rows, with many of these being repeat offenders. In 1957, the Committee on Prisons, Probation and Control in the District of Columbia studied six chronic offenders; they had been arrested 1,409 times and had served a total of 125 years in jail.

In January 1966, a Washington lawyer, Peter Barton Hutt, appealed the case of chronic and homeless alcoholic Dewit Easter before the U.S. Court of Appeals. In a major ruling, the court said that chronic alcoholism was a defense against a drunkenness charge because the defendant "has lost the power of self-control in the use of intoxicating beverages." Instead of being slapped in jail for the usual 90 days or fined $100, alcoholics like Easter, said the court, should be given medical treatment.

In Washington, public alcoholics can expect better-than-average medical treatment, since the Easter decision only affected the District of Columbia. In most other areas of the country old laws apply. Last year, the Supreme Court ruled against a Texas alcoholic who appealed his conviction for public drunkenness. Ironically, the court's ruling was based in part on the theory that putting the man in jail was the best treatment he could get, since nothing else was available. Thus, the Supreme Court says that until health facilities are available, alcoholics can continue to be punished, not rehabilitated.

Having the ball thrown to it by the courts, the medical profession drops it in nothing flat. No medical school offers a comprehensive course in the nation's fourth major disease. Most hospitals won't be bothered with alcoholics, especially not after the drying out period. Insurance companies have been reluctant to cover the illness. As of January 1969, no armed forces veteran has ever received disability compensation due to service-connected alcoholism. The nation has some 25,000 psychiatrists, but most are wary of alcoholic patients; even if the neurosis is relieved, the alcohol dependency is seldom altered, since the latter is now an organic as well as a psychic problem.

The Nixon administration has shown its concern by refusing to ask for funds in the last budget for the operation of alcoholism units in its some 200 community mental health centers. The current budget for federal alcohol programs is about $10 million a year. This means that about 90 cents a year is spent by the federal government on each alcoholic.

It is almost a sick joke, but the lack of concern and money given to this enormous national problem is enough to drive anyone to drink. Alcoholics have other reasons, but they are happy to have this one, too.

GETTING OFF THE BOTTLE AND STAYING OFF

One of the most fearsome alcoholics in Washington is Sen. Harold E. Hughes (D-Iowa). He is a tall, large-bodied, dark, muscular man who, when he has a few shots of liquor in him, can rage and fume like a dozen Elmer Gantrys. But there is one important difference between Hughes and the Gantrys of the alcoholic world, as well as one difference between Hughes and the drunks who drive cars and kill people, or the winos who pass out in gutters or the upper class boozers who have wives and butlers to cart them upstairs after the fifth martini; the difference between Hughes and these alcoholics is that Hughes hasn't had a drink in 15 years.

"I'm not a practicing alcoholic now," he says, in a deep, low voice, but he is like any other alcoholic who doesn't drink. "Despite how long a man may be sober, if he suddenly resumed drinking, the progressive and compulsive nature of this disease would once again take over."

From the time Hughes was 16 until he was 32, the bottle was the most important thing in his life. "I remember the first drink I had," he said last week in his Senate office, "some bathtub juice called Cream of Kentucky. That was during the days following the Depression and Prohibition, and in Ida Grove, Iowa, you had to take any kind of booze you could get. The 75 cents a pint stuff was good enough for me.

"In high school, I was a wild spree drinker. A long weekend or holiday would come along and that would be it. I'd drink and drink and drink. In college, the sprees increased and I regularly lost control of myself. By the time I went into the army, I was hooked. I needed it the way you need food."

Hughes is an intelligent man, and he rightly calls alcohol a drug. Many people think alcohol is a stimulant, others call it a depressant. "But it's a drug—dirty, vicious and brutal. It's the mainstay drug of the American adult society. The kids get lectured about pot from their parents; but the kids are smart and know hypocrites when they see them—the anti-pot adults are the same ones who can't get through the day or face the night without the most dangerous drug of all, alcohol."

Since he came to the Senate a year ago, after three terms as governor of Iowa, Hughes has been going up and down the country talking about alcoholism. He is chairman of the Senate Subcommittee on Alcoholism and Narcotics; hearings have been held in Washington, Los Angeles, New York and Denver. Doctors like HEW's Roger Egeberg, actresses like recovered alcoholic Mercedes McCambridge, lawyers. Alcoholic Anonymous speakers and others have testified with facts and personal horror stories that America, with 80 million drinkers and about 10 million alcoholic addicts, is virtually an alcoholic culture.

For himself, Hughes tells audience after audience, reporter after reporter that alcoholism is not an irreversible disease, that in nearly all cases it can be treated, controlled or prevented, that it's a health problem not a moral problem.

People listen. It is impressive to have before them such a towering, soft-spoken man who is an ex-drunk who made it to the U.S. Senate. The people listen, but the politicians in power don't. The Johnson budget for fiscal 1970 requested $4 million pinmoney for community assistance grants for alcoholism programs. Hughes angrily says this is "like trying to stop a tidal wave with a single sandbag."

As for the Nixon administration, it needs the sand elsewhere; its first budget has dropped the $4 million sum and as yet it has not been appropriated. "It's just as bleak here in the District of Columbia," said Hughes. "When local officials were ordered to cut their current spending, one of the first suggested reductions was in the alcoholism program of the Health Department The targets of the economy move were a very modest program for halfway houses for recovering alcoholics and a badly needed second detoxification center.

"So nationally and locally, alcoholics get the same treatment as when we pass by and see them dead drunk in the gutter: we look the other way."

When asked what he does at Washington cocktail parties when hostesses come around with drinks, Hughes says he politely asks for fruit juice or a soft drink. "Occasionally though, I just say, 'I'm an alcoholic, so I can't drink.' But this usually comes as a shock to people; not that I'm an alcoholic, but that I come out and say so."

Actually, Hughes is a recovered alcoholic. " 'Recovered' is the accurate word, not 'reformed.' You don't speak of a 'reformed' cancer or heart patient, or a 'reformed' tubercular or diabetic. So it's just as inaccurate to speak of a 'reformed' alcoholic.

"Of course, people use reformed because alcoholism is still seen by many as something sinful. The Irish refer to it as 'the curse' or 'the weakness.' And then the moralizers say that drunkenness is condemned in the Bible. These attitudes are one reason why so pitifully little is done in this country for alcoholics. Why spend money on sinners? If the drunks would just stop their sinful ways, the problem of alcohol would go away."

In many ways, Hughes was lucky during his drinking years. He lived in a small town in Iowa where the cops didn't put drunks in jail, but took them home instead. "I was 26 and working for a trucking line," said Hughes, "when I first saw something was wrong with me. Until then, I didn't consider myself an alcoholic. This is the classic attitude of all alcoholics. They diagnose themselves, but they never call it an illness. The alcoholic is always the guy next to you on the bar stool. He's the one who needs the AA.

"I'd swear off for periods, three months, six months, once for 14 months. Then I'd say to myself, 'There, I've proven I can lay off, so now it's O.K. if I take two or three drinks now and then." This is the subtlest of rationalizations. So I'd have two or three snorts. Then one day I woke up and didn't know where I was or how I got there."

Hughes does not know how many times he quit drinking. "But each time I meant it. That's what people don't realize about an alcoholic: when he says he quits, he really does mean it. Just the way you'd mean it if you said I want to quit having cancer or quit being diabetic. The reason so many alcoholics relapse so often is because society gives them practically no support. Not only are treatment facilities rare or non-existent, but alcohol has become so much a part of our culture that the diseased man can hardly get away from what makes him sick."

When asked how he finally got off the bottle, Hughes says he doesn't know. "All I'm sure of is that I didn't have a drink today. I can't think about a lifetime of quitting. I just think of today. I'm free today."

It is said of Hughes around Washington that he is a one-issue Senator, that he can't go for very long without talking about "the problem." Perhaps the criticism is true. It is also true that Washington has trouble with politicians who have passion. They upset the pace. They won't lay off.

Hughes does not see himself as a crusader, rather as a man using politics to relieve suffering. In his speeches and conversations, he talks about other killers that take the lives of Americans needlessly: heart disease, Vietnam, lack of auto safety. Alcoholism is part of the death pattern in America. Since he was once a part of that pattern himself, Hughes feels he has a right to ask others to put down their drinks for a minute and listen to him.

ALCOHOL'S INDECENT DISEASE

When a person in the downtown area of any major American city falls to the street in a seizure brought on by a coronary attack or is the victim of an automobile accident or a fainting spell, he will likely be taken quickly to a hospital, put in a bed and be given moderate to excellent medical care until healthy or recovered. Society is conscientious in tending to its decently sick.

But if a person happens to have the indecent disease of alcoholism and falls sick to the street, one of three probable fates await him, none of which includes a hospital bed; first, he lies there until he gets himself up and can move on. During the passed-out time, he will either be beaten, robbed, ignored or snickered at by passersby. Second, if he is part of the skid row subculture that every city supports, he will either be brought to jail, to a last-rate drunk-tank or, in the case of only about four American cities, to a well-run detoxification center.

Third, if he is a middle- or upper-class citizen, he will likely be taken by friends to his home where the sick person may have jokes made about his "bender", or how "good old Bill really tied one on." Even doctors occasionally look on diseased drinkers with humor; said the physician attending the death of alcoholic poet Dylan Thomas: "He died of a massive insult to the brain."

Many see the public alcoholic as the most pathetic, the most hopelessly sick. Locally, on any night of any week, they can be seen stumbling, crawling or being escorted into the D.C. public health detoxification center at 619 N St. NW. Most of the incoming cargo were once healthy, happy and employed men, with wives and families. Now, as they sit in the waiting room with Renoir and Degas reprints on the wall, they are broken, defeated men, almost completely forgotten by society. They are not happy-drunk, the way Dean Martin cutely poses; nor glib-drunk, the way Norman Mailer gets; nor funny-drunk, like Jackie Gleason. Instead, they are puking, urinating, stinking, besotted drunk, classic tributes to what happens when Americas most popular drug is abused.

Washington is one of the few cities lucky enough to have a good, all-around detoxification center, even though, cursed by the fickle House District Budget Committee, it lives with an uncertain future. With a staff of 38 full-time professionals and sub-professionals and a 75-bed capacity, the center had admitted over 14,000 patients since opening in May 1968, although many of these are repeats. The patients have ranged from a drunken youth brought in by his ear by his mother to a sozzled, homeless alcoholic admitted 67 times.

The men are treated immediately on entry by a registered nurse, bathed and clothed. They are served high-protein meals, receive counseling and job-finding guidance. Most important, they are treated like human beings who are sick. A doctor is at the center every afternoon to provide medication and attend to any accompanying illness. Since the center, by law, is an emergency operation, the patients are allowed to leave after 24 hours. Some go back to the streets and the bottle, others to the rehabilitation center at Occoquan, Va., where a more permanent program is offered. The cost per patient per day at the D.C. detox center is $18.32, which in terms of U.S. hospital costs is unbelievable low.

Until a few years ago, a person diseased by overuse of the alcohol drug had only the Alcoholics Anonymous for hope of recovery, assuming he wanted recovery. The AA, which began in 1934 and has about 300,000 U.S. members, still has the best recovery record of any program. But taking nothing away from it, the AA's success may be because it has virtually had the field to itself. Only in recent years have community health boards, county and state departments of health and federal health officials become involved. Like alcoholics the morning after, the awakening has been slow.

More and more, stories appear about alcohol disease programs achieving remarkable success in their local area: well-known examples include the OEO project in Iowa, the Manhattan Bowery project set up by the VERA Institute of Justice, the enlightened program in Montgomery County, Md., to name a few.

Most of these programs, and the growing number like them—such as Al-Anon and Alateen for friends and relatives of problem drinkers—are for the rich and poor. Many are unique because they bring together services and staff that formerly worked on the problem separately, if not competitively.

Since these programs are new, this invariably means that politicians and planners are breathing down their necks for results; politicians know how to be scrupulous about wasting public money when they want to be. But what the politicians need here is not scrupulosity but patience, the same patience they have in awaiting "results" from cancer, heart and other research programs—which no politician would dare criticize or deny funds.

An alcoholic is a person whose drinking messes up some, or all, parts of his life; about one in 20 Americans has been diseased by the drug. No one completely knows the exact causes of the sickness, nor are the changes it effects in the body and psyche completely known. Alcoholism cannot be

cured, at least not in the sense that the sick person can return to "normal" drinking.

The pattern of alcoholism is complex. Some persons are hooked from the first drink. Others drink for years, see the disease coming and seek help, the way they would seek help for oncoming cancer or leukemia. Millions, who know the drug is harmless if not abused, drink sanely and on appropriate occasions. But when a person's body chemistry and psychic reactions become conditioned to whiskey, gin, bourbon, rye, rot-gut or whatever, that's it. He is either an alcohol addict or an alcohol dependent for whom there is no such thing as "one drink."

Over-all, authorities like Sen. Harold Hughes, Dr. Selden Bacon of Rutgers, Gus Hewlett of Washington, have been saying for years that what is needed is the development and implementation of a total national alcohol policy. Many of the answers to curing alcoholism are there: in the exciting new programs and centers which need only to be funded and multiplied by the hundreds if the country wants seriously to control its most costly disease.

How to prevent the millions today who will become alcoholics 10 or 20 years from now is another question. Prohibition is not the answer. What is needed is some combination of education, awareness, legislation, money and outrage. The American public is odd. Its fury can be whipped up about cyclamates, chicken meat in hotdogs, unsolicited credit cards, smut in the mails—none of which kills anyone. But an enormous and deadly disease like alcoholism, which annually wastes countless lives and billions of dollars, rarely raises a murmur. A voice may be raised occasionally by a senator, a film, perhaps a newspaper article, but the drinking, dying and wasting goes on. It occurs among and by businessmen who "need a snort" at the cocktail lounge, the clerk at the office parties, the housewife who nips secretly during the day, the priest in the lonely rectory, the military man trapped by the routine of army life. These, and the other alcoholics like them, don't need excessive sympathy, nor lectures, nor jail sentences, nor smiles. What they need, categorically, is medical and psychological treatment; like any other sick person with a disease he is helpless to cure himself.

NATIONAL COMMISSION ON MATERIALS POLICY—II

Mr. BOGGS. Mr. President, I continue to be gratified by the response that my proposal to establish a National Commission on Materials Policy has received among the experts in fields related to materials and the environment.

My proposal, contained in amendment 153 to S. 2005, has generated many letters offering what I consider to be a valuable analysis of the need, scope, and urgency for such a commission. Members of the Ad Hoc Committee for the Environment have been particularly helpful in this evaluation.

To bring Senators up to date on the wide support for such a study of our national material needs and utilization, I ask unanimous consent that copies of these letters as well as questions that were the basis for the letters be printed in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL COMMISSION ON MATERIALS POLICY

There are several questions on which your comments would prove most helpful in a consideration of legislation to create a National Commission on Materials Policy.

1. On the basis of your own experience, do you know of any important issue under the general heading of National Materials Policy that you believe is receiving insufficient attention today?

2. Should a commission, as proposed in this amendment, investigate the availability and use of materials? What limitations and restrictions, if any, should be placed on the consideration of the availability and use of materials by such a commission?

3. Do you believe that the directives in the amendment to such a commission are adequate? How might they be strengthened?

4. Do you believe that a 1½ year life and a $2,000,000 authorization is sufficient for an optimum contribution by such a commission?

5. Can you suggest other knowledgeable individuals whom the Committee might profitably contact to gain a broader analysis of this amendment?

6. Do you believe the establishment of this Commission would serve a useful purpose?

7. Have you any suggestions for improvements to the amendment?

Any additional comments or thoughts you might wish to make would be greatly appreciated.

MICHIGAN STATE UNIVERSITY,
October 17, 1969.

Hon. J. CALEB BOGGS: In reply to your letter concerning S. 2005, National Materials Policy:

(1) I am in favor of the intent of bringing better research and development to bear on the more effective use, recycling and conserving of materials and on preventing environmental degradation from inadequately handled materials.

(2) The establishment of a Commission would, if well staffed, move us ahead on this very urgent matter.

(3) The duties of the Commission are well thought out and clearly stated. I can think of only one major point that, in my opinion, ought to receive special emphasis. This is the need to put the materials policy question into the larger systems questions; e.g., many aspects of effective solid waste management could be made more congruent with excess heat problems in power generation with the scrubbing of nutrients from urban waste water and these in turn with the need for more green space—recreational facilities.

In essence, what I'm saying is that the congruity of solution options to a number of needs should be specifically sought and the research and development objectives should adopt this additional objective from the beginning.

(4) I can endorse this legislation both as an environmental scientist and as a concerned citizen. Please convey to Senator Boggs my appreciation for his efforts in this timely legislation.

Sincerely yours,

JOHN E. CANTLON,
Provost.

STATE UNIVERSITY OF NEW YORK,
Stony Brook, October 23, 1969.

Senator J. CALEB BOGGS,
U.S. Senate.

DEAR SIR: Thank you very much for your letter of October 1. On reading rather quickly the report and the amendment, I would like to offer my strong support for the Commission suggested in the amendment. This is outside my direct area of expertise, but I do find myself somewhat concerned with the duties of the Commission.

While the Commission is an excellent idea, its prospective duties are so broad that there is a dangerous possibility that the report of the Commission will receive undue weight and may hamper the development of later and more detailed inquiries. That is, a determination of national and international materials requirements, priorities, and objectives, both current and future, is a tremendously tall order, particularly if it is to be done in a year and a half, and for two million dollars.

It requires the Commissioners developing an insight into present and future technology that is almost superhuman. Similar remarks can be made with reference to all seven of the proposed duties of the Commission. This is in part taken into consideration in part B in which the Committee is authorized to seek outside consultation in this development. Even so, I feel rather strongly that a one and one half year life, which is indicated for the Commission, is excessively short.

If an expert is taken on, in all probability he will not be able to simply reel off to the Commission the answer to their questions. If he is a thoughtful and serious person, he will have to devote a fairly extensive period of time to it, probably sandwiched between other duties. It is not a trivial fact that I waited two weeks to answer your letter. This was not a lack of interest on my part, but due simply to the fact that other things must get done all the time.

It is to be expected that when presented with extremely grave questions of the sort you have outlined, serious answers will take a long time.

I would suggest that the Commission be activated as soon as possible and that interim reports be presented as soon as they are ready, but that the life of the Commission be somewhat longer, if possible. Also it is not obvious whether the two million dollars is to include simple consultants fees or actual research support. If research support is contemplated in answering specific questions then I believe that the two million dollars is an inadequate sum. Certainly a reasonably generous appropriation for this purpose at this time will more than repay itself in the relatively near future in terms of savings in not only materials technology, but in the social problems that are almost certain to arise if the problems of solid waste disposal are not solved quickly and in a fairly elegant fashion.

I hope that these remarks are relevent. If you feel that I can be of any further service, please call on me.

Yours,

LAWRENCE B. SLOBODKIN,
Director, Ecology and Evolution Program.

HARVARD UNIVERSITY,
October 29, 1969.

Senator J. CALEB BOGGS,
U.S. Senate.

DEAR SENATOR BOGGS: First let me apologize for being so tardy in replying to your letter of October 1. There was some delay in this letter reaching me because this fall I left The Brookings Institution to become Associate Dean of the John F. Kennedy School of Government at Harvard University. There has been further delay because the demands on my time in my new assignment here at Harvard have been many. I trust that it is still not too late to comment on the proposed creation of a National Commission on Materials Policy.

I think that the creation of a Commission along the lines proposed in the amendment which you have introduced together with a number of your colleagues in the Senate can serve a useful purpose, and I think the general charge to the Commission included in this amendment will point the Commission at the main items that should concern them. In this regard, I have only one suggestion for an additional charge to the proposed Commission, which might appear as another item under Section 204(a). Item (6) calls for the Commission to consider "means to effect coordination and cooperation among Federal departments and agencies. . . . " It seems to me that there is an additional requirement

for coordination and cooperation, namely between the Federal Government and its agencies on the one hand and state and local government on the other. Moreover, there are some problems and issues involving materials, and certainly some environmental quality issues, which require effective cooperation between the Government of the United States and foreign nations. It seems to me that the Commission might usefully be specifically urged to consider ways and means of effecting such cooperation and coordination.

Another question which occurs to me as I read the amendment has to do with the proposed reporting date for the Commission. The subject is so difficult, and the amount of information and data which the Commission will want to assemble and analyze is so vast, that I question whether a really useful report could be produced in a period as short as a year and a half. I would urge that you consider modifying your amendment to call for an interim report at the end of one and a half years with an additional year made available to the Commission before submitting its final report. This would probably also require some increase in the amount authorized to support the work of the Commission.

The amendment permits the President to appoint to the Commission private citizens as well as people currently in government service. I think that the proposed Commission would be more apt to perform an effective service for the American people if it were composed solely of persons drawn from the private sector. In particular, I question whether it is wise to have on the Commission people currently holding government positions which involve them in the subject matter of the Commission. Their presence might tend to inhibit the kind of recommendations the Commission might otherwise develop (e.g. short-term budgetary issues may influence what they feel free to propose). Let me emphasize that I am not questioning the qualifications and objectivity of any particular individual official currently serving the Administration. However, my own experience in government suggests to me that there are inevitably certain inhibitions placed on an official when he is asked to participate in the work of a Commission of this sort. I recognize that there is on occasion an offsetting advantage in that if one or more members of such a Commission are officials in the Executive Branch, they are often able to facilitate the Commission's gaining access to the information relevant to its tasks. Nonetheless, on balance, I would have the President confine his appointments to the Commission to distinguished people from private life.

One other very minor thought which occurs to me has to do with the name of the Commission—though I do not think that names of such bodies have any significant affect on what they actually do! Nonetheless, given the charge to the Commission, a title such as "National Commission on Materials Policy and Environmental Quality" might give the public a somewhat clearer idea of the range and emphasis which you intend for this Commission.

I hope that these few comments will be of some use, but let me emphasize that I think that none of them are of great moment, and I hope that your proposed amendment is acted on favorably by the Congress.

Sincerely yours,

WILLIAM M. CAPRON.

NEW YORK, N.Y.,
November 4, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

DEAR SENATOR BOGGS: Thank you very much for your letter inviting my comments on the amendment to S. 2005 which you and Senators Baker, Bayh, Cooper, Eagleton, Inouye, Montoya, Muskie, Pearson, Randolph and Spong have proposed.

In 1951 and 1952 I had the honor to serve as chairman of the President's Materials Policy Commission which conducted a study similar to the one which your amendment would entrust to a National Commission on Materials Policy. Since then I have been a member and chairman of the board of directors of Resources for the Future, Inc., a nonprofit organization established in 1952 to conduct scholarly research in the field of natural resources. While in no sense an expert, I have, over the past 17 years, maintained a keen interest in the field of materials policy. This is a matter that touches virtually all aspects of our national life. The availability of materials, their use and re-use, the development of alternatives, the disposal of waste products—all these are of increasing urgency as our population grows and our society becomes more interdependent.

On the basis of my own observations as an interested layman and from what I know to be the opinions of the ablest scholars in the field, I believe there can be no doubt that the national interest would be served by the creation of a National Commission on Materials Policy as your amendment proposes.

The new Commission would have the opportunity to consider once again a proposal made 17 years ago by the President's Materials Policy Commission but never implemented and to make a recommendation with regard to it. The proposal, briefly, was that there be a single agency in the federal government designed to keep all aspects of the materials problem under continuous study, especially future requirements for specific commodities. There was no doubt in our minds seventeen years ago that the task of creating such an agency within the federal structure would be no simple matter. The sheer volume of data involved was formidable then. Today it is immense. But today we have an incomparably more sophisticated computer technology to help with the job and, perhaps more important, we have a greater degree of awareness than ever before in our history of the imperative need to know what is happening to the materials that sustain our lives.

I believe that you and your colleagues are performing a most valuable service in bringing to the attention of Congress the continuing and still unmet need for a comprehensive and sustained study of our national materials policy.

My very best regards.

Sincerely yours,

WILLIAM S. PALEY.

DOTATION CARNEGIE POUR LA PAIX INTERNATIONALE,
November 10, 1969.

Hon. J. CALEB BOGGS,
Committee on Public Works.

DEAR SENATOR BOGGS: I am writing in response to your letter of October 1, 1969 asking for my comments on the proposed amendments submitted by you and your colleagues that would establish a National Commission on Materials Policy. The delay in my response is due entirely to the fact that I am spending a sabbatical year in Geneva, and did not receive the material until fairly recently. I hope these brief comments do not arrive too late to be of some use.

I will restrict my remarks to those aspects of the question with which I am most familiar, though I can only say that the general purposes of the amendments have my wholehearted support. Quite clearly we must devote much more effort than we have to date on questions revolving around the use of the world's material resources, and a new National Commission seems to me to be an effective way to begin that process. I am not convinced that that is the only way, and in fact would prefer to see more direct institutional and programmatic innovations in the Executive Branch and the Congress. Realistically, however, a Commission may be the only way to get started.

Let me make my comments briefly in a series of points:

1. I believe the idea of a Commission initiated by the Congress, rather than the Executive, has considerable attractiveness since it offers the opportunity to enhance the information and analysis resources available to the Congress. For the future, it seems to me that this is a critical objective not only in the materials field but in many others related to science and technology. Of course, this creates the reciprocal requirement that the Congress will take the recommendations of the Commission seriously.

2. The biggest gap in the proposal, and in the report of the ad hoc Committee, I believe is in the references to the international implications of materials policy. I cannot help but be convinced that we are heading for a time in which nations will have to invent new, or much more effective, international mechanisms to deal with global problems of all kinds, such as the fair allocation of resources; regulation of the use of resources from the point of view of efficiency, pollution, etc.; monitoring of activities considered today to be purely national concerns; potential international ownerships of some resources, and so forth. These issues are mentioned in both the amendments and the report, but I would recommend much more explicit reference to insure that the makeup of the Commission and its studies adequately deal with these questions.

My concern here is that we will continue to view this largely as a national problem with some international dimensions, when in fact I think it is now, or will soon be, essentially an international problem that nations must approach in a quite new framework.

3. Lastly, I would raise as a question whether the wording of the amendments adequately reflect the fact that, as I believe, such a Commission is likely to come forth with substantial and consequential recommendations for programs (such as a global geochemical survey), and for institutional change in the U.S. Government as well as in the international community. This may only be a matter of interpretation of the charge of the proposed Commission (I find the phrase "means to effect coordination and cooperation among Federal departments and agencies . . ." to be quite weak) or of the legislative history of the amendments. But I would hope there is sufficient scope given to the Commission to enable them to make far-reaching proposals if they so desire.

Aside from these comments, I have little to offer to what I consider to be your excellent initiative. I hope it succeeds, even in these times of excessive budget stringency; it is of great importance. I hope these thoughts are of some use.

Yours sincerely,

EUGENE B. SKOLNIKOFF,
Professor of Political Science, M.I.T.

HERCULES INC.,
Wilmington, Del., November 10, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

MY DEAR SENATOR BOGGS: In response to your letter of October 1 (which I have not answered sooner because of foreign travel), I have studied the Solid Waste Disposal Act passed by the 89th Congress (S. 306) . . . Public Law 89–272 . . . Title II . . . October 20, 1965) together with the Muskie Amendment S. 2005 and the amendment now proposed by you and under review by the Committee on Public Works.

In so far as your amendment concerns the establishment of a National Commission on Materials Policy for the determination of recycling, reuse or disposal of waste materials,

I think that meets a very important present need. While the Solid Waste Disposal Act puts this increasingly important part of the federal environmental improvement program under the Secretary of Health, Education and Welfare, it does not seem to provide anywhere for an external advisory function. Your amendment would correct this serious deficiency.

While our cities are being threatened with inundation by their own junk, HEW seems to be dragging its heels a bit. A Commission such as you describe would make the situation more visible, and perhaps result in some positive action—as we are now seeing in the water and air pollution areas.

The duties of the Commission, as you have spelled them out, go well beyond the above purposes. In my view, these are much too broad to be accomplished effectively in the period of time—1½ years—and for the financial support provided—$2 million. It would seem to me, therefore, that the duties of the Commission could well be focused initially on the restricted purposes outlined under Section 204(a)(3); this part of the program should be implemented immediately. In this event, I think the useful tenure of such a group could be five to ten years, with an initial budget something like $1 million annually.

Sincerely,

Bob Cairns,
ROBERT W. CAIRNS,
Vice President.

UNIVERSITY OF CALIFORNIA, DAVIS,
November 10, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

DEAR SENATOR BOGGS: Thank you for sending me the draft of S. 2005, and the document Towards a National Materials Policy.

The amendments which you and your senate colleagues propose to S. 2005 constitute an excellent document, which correctly establishes the relation between conservation of materials, population size, recycling and environmental quality.

I very strongly urge that these amendments be passed into law at the earliest possible moment, and cite only one example to illustrate the urgency of the problem.

At the moment, two groups of voices are crying out important messages in Washington.

The first group of distinguished, and demonstrably expert voices are expressing increasing alarm at the U.S. petroleum situation. The North Shore strike will add only between 10 and 100 billion barrels to the stores under the 48 coterminous states, which stores, it is now obvious, will be Half Gone by the winter of 1975–76. Also, the estimates of future demand, that is, for use rates of 3 billion barrels a year by the fall of 1975 and exponentially higher use rates thereafter, are all gross underestimates, because no one foresaw, as recently as 1963, that use rates in jet aviation would rise 4.4 times per decade.

The second group of distinguished voices in Washington are approving and advocating an S.S.T. Fleet for the U.S. of 500 planes by the fall of 1978. This is an unmitigated disaster for the U.S. The President, in 1978, whoever he is, may be in the ludicrous position of having to come before the public and explain why an investment of 60 million dollars for each of 500 planes must be Scrapped before being used, on the grounds of depletion of energy resources. Insofar as the academic world can read the President's mind, the decision to go ahead on the S.S.T. was based purely on arguments relating to national prestige, and international balance of trade. The S.S.T. will not be particularly profitable, will not represent a significant improvement in safety, will not economize on fuel, and will have a marginal effect on portal-to-portal transit time, because of the time spent getting to and from the airports.

Clearly, there is an urgent and crying need for a national materials policy, and a Commission that will be listened to by the president.

Yours very truly,

KENNETH E. F. WATT,
Professor of Zoology.

MUSEUM OF COMPARATIVE ZOOLOGY,
THE AGASSIZ MUSEUM, HARVARD UNIVERSITY,
November 12, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

DEAR SENATOR: Thank you for your inquiry about the amendment to bill S. 2005.

It would seem to me that such a National Commission on Materials Policy would indeed be most valuable. There has never been any organized planning in this area and very little careful and well integrated analysis of the relevant problems. Assigning the task to this Commission to make a full and complete investigation of the materials problem cannot help but be of immense value.

It would seem to me, and I hope this is clearly brought out in the amendment, that the "materials problem" has two major components. One is the conservation of nonrenewable resources and the other one is the disposal of solid wastes. The question of nonrenewable resources has already received a good deal of attention and is, I presume, fairly well in hand.

The situation is quite different for the question of the disposal of solid wastes. A drive along any country road makes one distressingly aware of this problem. Hundred thousands of miles of American roads are littered on both sides with empty bottles and empty beer or soft drink cans. The problem was compounded when the principle of nonreturnable bottles are introduced. The old tin cans eventually rusted away, the new aluminum cans will last several life times.

I am afraid that ultimately more will be needed than merely research. Model legislation will have to be proposed that will protect the community and our beautiful American landscape against the "bottle thrower."

These are serious and difficult problems, and it is, therefore, doubly important that a Commission soon be appointed to study the problems and make proposals for their solution.

I congratulate you on taking such an active part in this important legislation.

Sincerely yours,

ERNST MAYR,
Alexander Agassiz Professor of Zoology.

NATIONAL AUDUBON SOCIETY,
November 10, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

DEAR SENATOR BOGGS: I wish to thank you for requesting my views with regard to your amendment to S. 2005. I am in complete agreement with you as to the desirability of establishing a National Commission on Materials Policy. It is certainly essential that we develop a unified national approach to the problems of the development, use, and, increasingly critical, the disposal of materials. The proposed commission promises to perform this important function.

Sincerely,

CHARLES H. CALLISON,
Executive Vice President.

JOHNS-MANVILLE RESEARCH & ENGINEERING CENTER,
November 14, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

DEAR SENATOR BOGGS: Thank you for giving me the opportunity of commenting on your amendment to S. 2005.

As I understand it, your amendment would establish a commission to define and appraise clearly the many problems of materials' recovery, use and disposal, and to make available to the Administration and to Congress the expert recommendations of this commission.

Your proposal appears to enter a much broader field of study than is covered in S. 2005, to which it is an amendment.

We recognize that a solid waste disposal problem does not begin at the point of disposal; it begins with the procurement of the original raw material, and develops through every phase of processing, distribution and consumption. Your amendment provides needed recognition of this aspect of the situation, but also goes much farther by getting into all aspects of materials' policy.

This makes us wonder if the National Materials Policy proposal ought not to be made a separate proposal, rather than tied to S. 2005? Or perhaps the directives for study should be more specific in directing attention to disposal and re-cycling problems.

We hope these brief comments will be helpful.

Sincerely yours,

EDMUND M. FENNER,
Director, Environmental Control.

NOVEMBER 17, 1969.

Hon. J. CALEB BOGGS,
Washington, D.C.

DEAR SENATOR BOGGS: My most sincere apologies for the delay in responding to your request of October 1, 1969 for an evaluation of S. 2005 and the report "On a proposed Commission on National Materials Policy."

I have read the report; particularly those sections dealing with effects on environmental quality, and believe that it is quite to the point. It substantiates, I believe, the need for a central Federal body to spearhead required action. In terms of action required, it appears critical that a central point from which to coordinate a concerted effort to meet National objectives be determined.

Loosely quoting the report:

"Decisions are being made piecemeal with partial information."

"No central source of information."

"At least 19 departments and agencies sponsor applied research, 15 in long range policy planning, 20 perform materials information functions."

"No central point from which to coordinate a concerted effort."

"Authority of Government is needed to achieve concerted action."

S. 2005, by creating a National Commission on Materials Policy, initiates only the first step in the final solution of the overall problem which seems to require strong Federal control through appropriate legislation. As such, it is to be recommended, and I look forward to its enactment.

The real problem is that we just don't know enough about the entire ecological system to enable a complete response. Mr. Huddle, in his paper, points out that the area of salvage and disposal (of waste materials) is least amendable to automatic correction, and Mr. Garnsey adds that the disposal of waste materials is noneconomic, and shows the need for a complete review of the materials problem. He states, ". . . a general system embracing a continuous flow of materials must be conceptualized and analyzed." Mr. Gershinowizt adds, "One must consider the environment as a whole and that human beings and their cultural and social activities are a part of nature."

A problem of staggering dimensions is thereby postulated, and indeed, several writers refer to the need for large scale "systems analysis" supported by high speed computerized facilities. My experience in analysis of complex systems forces me to accept this conclusion, but with considerable tenderness and care!

In conclusion, Senator, I would sincerely support S. 2005 as a forward step in the right direction. I would recognize it as "'only one small step" and hope that it will lead

to further initiative on the part of the Congress.

My most sincere appreciation to you and your colleagues for your forward looking interest in the future of our United States.

Sincerely,

FRANCIS J. ENGE.

STANFORD UNIVERSITY,
November 18, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate, Committee on Public Works, Washington, D.C.

DEAR SIR: Please forgive the long delay in sending you an evaluation of the amendment to create a National Commission on Materials Policy. Such a comprehensive re-evaluation of the U.S. situation in regard to available resources and the more efficient use of them appears to be long overdue. I hope that this Commission will lead to the establishment of a permanent agency that will continue to monitor the resources situation in all the aspects covered by the amendment (and in greater detail by the excellent ad hoc committee report), particularly in relation to the environment and the recycling and reclaiming of materials.

It is to be hoped that the days of a wasteful America are numbered. We and the world can no longer afford such behavior. I expect that this Materials Policy Commission can make a great contribution by making clear just how limited the world's resources are and by providing guidelines for more prudent utilization of them. In this connection, I hope that the Commission's findings will be given wide publicity and that the U.S. government will promptly act on any measures that seem appropriate in accordance with the findings.

I appreciated very much the opportunity to look over the materials study and the proposed amendment, both of which are very well conceived. Please let me know if I can provide any further assistance.

Very sincerely,

PAUL R. EHRLICH,
Professor of Biology.

ROCKY MOUNTAIN CENTER
ON ENVIRONMENT,
November 19, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

DEAR SENATOR BOGGS: Please excuse my tardiness in replying to your inquiry as to my reaction to your amendment to the Solid Waste Disposal Act to create a National Commission on Materials Policy. I am, frankly, overwhelmed with the request for reactions to various environmental legislation.

Before responding briefly to your seven specific questions, I have this general comment. While those of us who have been engaged for a number of years in conservation work, the time when there was little or no national concern about the quality of our environment, the current interest of Congress is indeed welcome. However, I feel there is some need for coordination of the numerous environmental programs that are now being proposed, including proposals for fourteen or more environmental quality commissions, committees, joint committees, councils, etc. Is it wise to have a separate commission on every separate environmental problem or should our concern for the *total* environment be coordinated within the same agency, commission or department? I think this is true of your proposed national commission for materials policy as well as other proposed commissions on special environmental problems.

As to your seven questions, my brief response is:

1. Certainly, a number of items are receiving insufficient attention. Foremost among them I believe is the whole question of reclamation of metals and so-called "recycling." Congress is considering a bill such as yours at the same time as considering (or may have already passed) a policy on mining development which is geared to "full development and utilization" of our resources—translated meaning all out, no holds barred mineral exploration and development. This certainly is not consistent with your proposal for study of reclamation and recycling of metals. I think that we already have the technology to reclaim used metals of the mining industry would stand still for it.

2. A commission such as you propose, if established, certainly should not have any "restrictions and limitations" imposed on it in its consideration of the availability and use of materials. However, you can be assured the certain special interests will want to exempt their particular material, be it iron ore, tungsten, molybdenum, pulp and paper, or whatever. It is certainly true that our emphasis has been on availability or *supply* of materials and not on their use in any conservation sense.

3. In Section 204 of the proposed amendment, "Duties of the Commission," I am not clear as to the meaning of charging the commission to recommend "opportunities and incentives for the operation of the free enterprise system" unless this is intended to win the support of the U.S. Chamber of Commerce. Unfortunately, the goals and objectives of the business community which represents the "free enterprise system" is not always harmonious with the other objectives of your bill. I also think the types of materials that you are referring to should be spelled out with particularity although the bill would not be limited to cover only those mentioned in this list.

4. No, I think the job of such a commission would be a continuing one and increasing importance as the nation gains in population size. Again, this is another argument before putting the responsibilities of your commission under a somewhat larger umbrella concerned with a total environment which would have a continuing, ongoing, regularly funded opportunity.

5. I do not have the names of other specialists in solid waste disposal or materials policy whom I could recommend.

6. Please refer to my general comment prior to the questions.

7. I have already made some brief suggestions.

I am sorry that I was not able to reply earlier.

Yours very truly,

ROGER P. HANSEN,
Executive Director.

NOVEMBER 18, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate,

DEAR MR. BOGGS: I have received your letter of October first, the follow-up of October third, the one-page Natl. Comm. on Materials Policy listing 7 questions, copy of S. 2005, and the Library of Congress Report "Toward a National Materials Policy". I regret the undue delay in answering: I have been away from my desk for a considerable time (my only way of finishing work on a book).

I have now given these papers my considered attention.

I am solidly in favor of your Amendment as expressed in S. 2005. To reply to your questions by number:

1. It is not necessary to list any specific important issue. The total integrated situation needs attention. We need sources of energy, and yet we are heat-polluting our rivers. We mine lead and sulphur, and yet the air is polluted with them. We are planning to mine phosphates in estuarine areas in the Southeast, and destroy those estuarine areas, yet phosphates are a pollutant from our best sewage disposal plants. Let's get together, even if it seems to cost more "today".

2. I would be less concerned about what materials were used by the Commission, than what human materials went in to the Commission! Section 203 a. I would strongly recommend that a majority of the members of the Commission be "generalists" and ecologists as indicated not by the positions they hold, but by their publications and established interests. Such a majority should not be specialists on any one material. If otherwise, the total purpose of the Commission will be lost.

3. No further opinion at this time.

4. Okay for a starter. After that, would depend on how this program is integrated with other broad generalist ecological programs.

5. No suggestion at this time.

6. YES

7. None, other than the above. The problem is basically an ecological one—of quality man in a quality environment.

In the Library of Congress report "Toward a National Materials Policy", there were repeated references to the increasing human populations, and thus providing for them. I consider such statements irresponsible. Like a slatternly common-law couple on welfare, having a new child regularly each year. The very need for this Commission shows that too many people want too much. The time is overdue to put a clamp of the national irresponsibility of the burgeoning human population.

Sincerely,

FRANK E. EGLER,
Member, Board of Advisors, Ad Hoc Committee for the Environment.

THE UNIVERSITY OF CHICAGO,
November 25, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

DEAR SENATOR BOGGS: The amendment which you and your colleagues have introduced to establish a National Commission on Materials Policy seems to me to guide federal action in this field in a positive direction, but to have one major handicap. The difficulty is that such actions, unless carefully coordinated with related actions in the resource and economics field, may have a divisive rather than integrating effect on national policy.

Clearly, there are important issues which are not receiving sufficient attention these days and which would benefit from some special kind of investigation. One-and-a-half years probably is too short a time when one considers the difficulties of organizing a venture of this sort.

More import, it would seem highly desirable for such activity to be linked with broader efforts to deal with the complex issues of policy towards manipulation of the environment. Would there not be great gain to relating the National Materials Policy Commission proposal with related proposals for government agencies dealing with environmental quality and natural resource consideration policy?

Sincerely,

GILBERT F. WHITE.

CALIFORNIA INSTITUTE OF TECHNOLOGY,
December 2, 1969.

Hon. J. CALEB BOGGS
U.S. Senate.

DEAR SENATOR BOGGS: I was pleased to receive your letter of 29 October 1969 enclosing S. 2005 and the print of the Committee on Public Works entitled "Toward a National Materials Policy," April 1969.

I believe it is a most useful step to integrate materials management and waste management for, in fact, nothing is really consumed. Any intelligent management of materials must take account of the problems of waste disposal. Furthermore, the economics of salvage should be credited with the money saved on waste disposal. For example, if the intangible costs of environmental blight due

to non-degradable aluminum cans could be attached to the beverage industry and the consumer, the invention of aluminum cans would probably look like a step backwards instead of forwards. The same applies to the massive influx of no-return bottles in the marketplace, which unfortunately leads to a sharp increase in the litter of broken glass in our public ways and greater loads on our refuse systems.

I enclose one recent article of mine entitled "Man, Water, and Waste." This deals mostly with the problem of liquid wastes and sewage sludge rather than solid wastes. Solid waste management is of interest to me but is outside my basic area of expertise.

If you have further technical questions about solid wastes, may I suggest that you write to my colleague, who is expert in such matters, Professor Jack E. McKee, Keck Laboratory of Environmental Health Engineering, California Institute of Technology. Professor McKee is a very well known environmental engineer and is a member of the National Academy of Engineering.

Sincerely yours,

NORMAN H. BROOKS,
Professor of Civil Engineering.

PEAT, MARWICK, MITCHELL & CO.,
December 4, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

DEAR SIR: Several of my associates and I have completed our review of your Amendment to S. 2005 and the Report prepared, at your request, by the Materials Policy Study Group. Our detailed comments relative to the seven questions included with your letter of November 10 are contained in the enclosed document. In summary, there are two basic points which we would make as a result of our evaluation:

1. We believe the Amendment is excellent. We concur completely with the need for and the stated purpose of the Amendment and further believe that a National Commission on Materials Policy is an appropriate vehicle for developing such a national policy. Thus, while the enclosed detailed evaluation suggests some possible changes to the Amendment, these are changes in emphasis on detail.

2. We believe that the report, and consequently the Amendment, gives insufficient attention to the problems of *how* a National Materials Policy might be carried out organizationally and administratively. It is our view that the *major* obstacle to the achievement of the "Ideal Posture for Materials in the year 2000" is not one of either policy definition or economic or technological feasability, but rather one of developing the organizational and administrative mechanisms necessary to *implement* the appropriate National policy and *apply* the appropriate technology. We, therefore, would recommend that Section 204 of the Amendment be expanded to explicitly include in the duties of the Commission, the requirement to examine and recommend alternative organizational and administrative means to implement the appropriate policy.

Peat, Marwick, Mitchell & Co. recognizes the vastly challenging problems to management posed by the proposed policymaking, policy-implementing effort in materials production, utilization and salvage. As this effort progresses, PMM & Co. would hope to have the opportunity to work with the Subcommittee and, eventually, the Commission in assisting to achieve the stated objectives of the proposed legislation.

Again, I deeply appreciate this opportunity to cooperate with the Subcommittee on Air and Water Pollution and sincerely look forward to other opportunities to comment on significant new legislation in the near future.

Sincerely yours,

BRUCE A. WILBURN,
Principal.

COMMENTS ON THE AMENDMENT TO S. 2005 PROPOSING THE ESTABLISHMENT OF A NATIONAL COMMISSION ON MATERIALS POLICY LEGISLATION

This document has been prepared in response to a request from Senator J. Caleb Boggs of Delaware, a member of the United States Senate Subcommittee on Air and Water Pollution. It responds to the seven questions asked by Senator Boggs in his letter of November 10, 1969, requesting review and comment on the proposed legislation.

It was prepared as a public service by staff members of Peat, Marwick, Mitchell & Co. under direction of Bruce A. Wilburn, Principal. Specific comments follow:

Question 1.—On the basis of your own experience, do you know of any important issue under the general heading of National Materials Policy that you believe is receiving insufficient attention today?

Insufficient attention is given to the very difficult question of how to formulate and implement necessary organizational and administrative arrangements to "facilitate orderly progress in materials posture" (LRS Report p. 17).

While it is clear that a large number of public and private organizations are currently part of the problem, i.e., they are involved in one or more stages of the materials production, utilization and salvage process, it is not at all clear how they might interact so as to close the cycle. While much has been written about the technological or economic feasibility of closing a number of key material cycles, little attention has been paid to the question of how, and by whom, this would be accomplished.

The complex nature of the organizational problem is made explicit in the "salient questions" defined by the LRS Report and in the testimony on S. 2005 of witnesses before the Subcommittee on Air and Water Pollution last April. However, the need to develop a suitable methodology for the development of new institutional and organizational forms is not made explicit. That is, granted that certain organizational characteristics are necessary (such as areawide jurisdiction, intergovernmental linkages and/or a combination of public and private resources and capabilities), what procedures must be developed to incorporate into decision-making processes of all affected organizations the necessary coordinations and appropriate disciplines for:

Urban landscaping and ecology;

Social engineering;

Systems management and development; and

New technology utilization?

When a procedure is developed which provides an approach to these issues, and specific institutional arrangements are suggested, a second tier of questions needs to be addressed:

What are the relevant needs of potential users, contributors and others affected by the proposed organizations?

Which needs are currently unmet by government and private activities in materials management?

What alternative functions of the proposed organizations would most nearly correspond to unmet needs?

What criteria for material management system organization may be derived from comparable existing service organizations or from more recent systems organizations which evolved in the Aerospace environment?

A very fundamental question which should be addressed by the Commission is this: How, institutionally and organizationally, should we change from an "open-loop" materials production, utilization and salvage process involving large numbers of individual organizations, with independent decision-making capability, into a "closed-loop" system? This question is basic and has not yet, in our opinion, been receiving sufficient attention.

Question 2.—Should a Commission, as proposed in this amendment, investigate the availability and use of materials? What limitations and restrictions, if any, should be placed on the consideration of the availability and use of materials by such a Commission?

As a general statement, it would seem appropriate to put few, if any, limitations and restrictions on the scope of the Commission's investigations. However, were the Commission to devote too much of its effort to the investigation of the availability and use of specific materials, it would run the risk of either duplicating effort now being accomplished by other organizations or failing to explore sufficiently more critical issues of national policy.

The NMPC's consideration of the availability and use of materials should be related to and perhaps limited by the activities of organizations such as the National Water Commission, the National Council on Marine Resources and Engineering Development, the President's Water Resources Council, the Public Lands Law Review Commission, and the President's Environmental Quality and Urban Affairs Councils.

The combined result of these studies ought to be a set of mutually consistent environmental management policies dealing with different levels of abstraction and specificity. Fractionalization of institutional responsibilities is well recognized as a major defect in both environmental and urban management. Unless the NMPC serves through its own organization and definition of its functions to alleviate this condition, a primary mission of the national policymaking effort in materials production, utilization and salvage will fall short of achievement.

Question 3.—Do you believe that the directives in the Amendment to such a Commission are adequate? How might they be strengthened?

We would offer the following suggestions:

Section 204(4) could be made more explicit on the need to engage private industry in the achievement of a nearly " 'closed system' in which materials retained value throughout the system and were recycled rather than discarded" (LRS Report p. 15). Along with social cost pricing, this would seem to be an essential element of an effective materials management system. The description of a major industry in the LRS Report, whose functions would be to collect, classify and process waste and distribute recovered waste values, in effect describes what must occur, rather than what merely might occur, in the materials salvage phase in order to realize national materials policy objectives.

Similarly, Section 204(6) could be strengthened by reference to the necessity of a metropolitan/regional approach to materials usage.

Section 204 might require the determination of recommended means of implementing systems analysis and operations research techniques in the development of alternative programs and priorities.

Section 204 could be strengthened by specifically requiring a determination of "necessary organizational and administrative arrangements to facilitate orderly progress in materials posture," as stated by the LRS Report, Part IV C.

Question 4.—Do you believe that a 1½-year life and a $2,000,000 authorization is sufficient for an optimum contribution by such a Commission?

These allotments have sufficed for other Commissions with similar functions and ought to suffice here.

Question 5.— Can you suggest other knowledgeable individuals whom the Committee might profitably contact to gain a broader analysis of this Amendment?

Professor Richard S. Rosenbloom, Harvard Business School, Soldiers Field Road, Boston, Mass.

Professor William J. Abernathy, Graduate

School of Business, Stanford University, Stanford, Calif.

Professor Stanley Jacks, Massachusetts Institute of Technology, Sloan School of Management, Room 52–541, Cambridge, Mass.

Senator John J. Moakley, Commonwealth of Massachusetts, State House, Room 312, Boston, Mass.

Mr. Henry Lyman, Publisher, Salt Fisherman's Magazine, c/o Salt Water Sportsman, Inc., 10 High Street, Boston, Mass.

Mr. Peter S. Hunt, Consultant, 832 Palmer Road, Bronxville, N.Y.

Question 6.—Do you believe the establishment of this Commission would serve a useful purpose?

Without question, yes.

Question 7.—Have you any suggestions for improvements to the Amendment?

These are generally covered in the answers to the preceding questions. Specifically, we would suggest strengthening the wording in Sections 204(a)(4) to direct the Commission to investigate social cost pricing and the economics of recycling specific, high-volume materials, such as paper, glass, steel and aluminum, through the materials process. We would also suggest that Section 204(a)(6) direct the Commission to explore alternative metropolitan/regional approaches to materials management. Further, we would recommend the addition of a Section, 204(a)(8), directing the Commission to identify alternative organizational and administrative arrangements to implement the recommendations of the Commission.

One administrative suggestion we would make is to eliminate the $100 per diem rate ceiling cited in 204(b)(3). The rate is unrealistically low and would preclude the Commission from obtaining the services of either the major consulting organizations or most highly-qualified academic consultants.

KEEP AMERICA BEAUTIFUL, INC.,
December 5, 1969.

Senator J. CALEB BOGGS,
U.S. Senate.

DEAR SENATOR BOGGS: Thank you for inviting our comments on your proposed Amendment to Senate Bill 2005. My delay in responding is attributable to a heavy travel schedule and the KAB annual meeting just recently completed.

We endorse the establishment of a National Commission on Materials Policy. Certainly the Commission can be an effective vehicle with which to increase public understanding and concern of the limitations of our natural resources. Indeed, the investigation of the availability and use of materials is long overdue.

An inventory of our natural resources by a National Commission would provide the opportunity to bring together appropriate government departments and agencies, along with the professionals from the private sector, to determine restrictions and establish a priority list of materials. Such an inventory may further indicate the need for a government/industry program to develop regional markets for expanding utilization of secondary materials.

Research and determination of methods for re-cycling and re-use of materials as laid out in S. 2005, is an extremely important area for Commission study. A regional concept of municipalities, in cooperation with industry, might be considered as a method for encouraging further research in the re-cycling area.

There are two further areas that we feel should be given more attention by the Commission. In view of the fact that municipalities are contributing in excess of 60% of the Nation's water waste and a substantial portion of the air pollution, the upgrading of municipal disposal systems would be an appropriate area for study. Providing more stability to public works efforts, enabling them to plan long-range programs, should also be considered.

Although we have no special recommendations as to the life of the Commission, we would recommend that an additional period of time be set aside to acquaint the public with the findings of the Commission's report. Consideration might be given to the development of a broad based public educational program to gain the understanding and support of any costs, limitations or material restrictions determined by the Commission and any subsequent action that may be recommended.

In response to your suggestion that we provide the names of knowledgeable individuals who might contribute a broader analysis of this Amendment, we are recommending that you solicit the view point of members serving on the Materials Disposal Research Council which is a committee of environmental technicians in the packaging field. The President and address of that organization is:

Mr. Richard L. Cheney, President, Materials Disposal Research Council, c/o Glass Container Manufacturers Institute, Inc., 330 Madison Avenue, New York, N.Y.

As you know, the activities of Keep America Beautiful are currently confined to litter prevention, but we hope our views, based on marginal experience within the solid waste field, will make some meaningful contribution to you and your colleagues in considering broader objectives to your proposed Amendment.

Sincerely,

ALLEN H. SEED, Jr.,
Executive Vice President.

TENNECO CHEMICALS, INC.,
December 9, 1969.

Hon. J. CALEB BOGGS,
U.S. Senate.

DEAR MR. SENATOR: I appreciate the honor of being asked to comment on S. 2005, the National Materials Policy Act of 1969.

It is my view that the nation's interests in the long run will be best served by a single governmental department, rather than the current situation in which responsibility for protecting the country's environment and resources is shared by a variety of departments, committees and councils. However, such a drastic reorganization will require time and study, and considerably more insight into many environmental and resource use problems which at present are not fully understood.

Taking the questions you ask in order, I have the following comments:

1. The use of low sulfur coal for heating and power generation to meet certain state air pollution laws is a waste of a precious natural resource.

2. The commission should investigate the availability and use of materials without restriction.

3. I believe line 24, page 3 should read "(1) to *require* the cooperation . . ."

I doubt the sum of $100 per diem stated on page 4, line 13 is adequate. I believe an allowance of $300 per diem is necessary to obtain the services of consultants and experts in the present market.

4. I believe the commission's assigned task is too important not to be done on a continuing basis, although it may not be necessary to perpetuate the commission to accomplish this. I suspect $2,000,000 is too little to do the job properly.

5. Dr. A. Joel Kaplovsky, Chairman, Department of Environmental Sciences, Rutgers—The State University, New Brunswick, New Jersey.

6. Most emphatically YES.

7. None at this time.

I trust these comments are of some value.

Very truly yours,

STEPHEN C. BROWN,
Director of Environmental Science.

GENERAL SERVICES PUBLIC ADVISORY COUNCIL

Mr. MURPHY. Mr. President, General Services Administrator Robert L. Kunzig has named a resident of Washington, Mr. Ray A. Watt, to membership on the newly created General Services Public Advisory Council.

The Council was formed for the purpose of creating greater public involvement in the operations of the Federal Government.

Mr. Watt is the president of the National Corporation for Housing Partnerships, and is one of the Nation's leading homebuilders and a pioneer in construction of housing for minority races. Also, he is a trustee of the National Housing Center and a past president of the Homebuilders Association of Los Angeles, Orange and Ventura Counties.

Following attendance at the University of California at Los Angeles and employment at Douglas Aircraft during World War II, Watt formed the R. A. Watt Construction Co. in 1947. During the ensuing 22 years, his firm developed more than 30,000 homes, 6,000 apartment units, and numerous commercial and industrial projects and mobile home parks in southern California.

Administrator Kunzig is fortunate to have acquired a man of Mr. Watt's background. I am sure his wide and varied background will be a valuable asset to the Council.

REPORT ON PRISONS SERVES IMPORTANT PUBLIC SERVICE

Mr. RIBICOFF. Mr. President, Eugene J. Brown, president of the Ottaway News Service and publisher of the Danbury, Conn., News-Times, has performed an important public service in writing a series of newspaper articles about Federal prisons.

The articles are informative and productive. Other Senators will find them of interest.

I ask unanimous consent that the articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

PRISON PIONEERS WORK-RELEASE PLAN

(By Eugene J. Brown)

A prisoner of the Federal Correctional Institute stopped me as I was wandering around the prison compound on a sunny day and asked if I were a writer.

"Yes." I answered, "but . . ."

The "yes" was enough for him. "Write about this! I am suing the attorney general for $1 million!"

My new client was a sturdy middle-aged Negro.

The other inmates sitting on the bench with him edged away as if they had heard the story too many times before.

"Why the million? Why are you suing the attorney general?"

He replied: "I had a gall bladder attack in another prison. They operated and told me I'd have just a little scar," and he widened his fingers to show me about a four-inch scar. "You see what they did to me!" and with that he ripped open his shirt to show a neat scar about 15 inches long.

"Was that being honest?" he asked. "That's why I am suing the government for a million!"

I carefully examined the scar and said it might be worth a million in damages and I would indeed write about it and send him a copy.

This million dollar suit was the 18th case given to me by the inmates of Danbury, Connecticut's Federal Correctional Institute as I wandered around the compound, in dormitories and shops over the course of two weeks. My purpose: Find out how prisoners live in prison and what is being done to prepare them for eventual release.

Most of the two weeks I wandered alone. At the warden's invitation I talked with prisoners without any supervision by guards.

I had asked the warden, Frank Kenton, if I could do a story on what happens to human beings shut behind locked doors and iron bars. My story would naturally take me beyond that and into the areas of rehabilitation and work-release, the programs for which the Danbury Federal Institution is creating nation-wide interest.

The warden is an old hand at being interviewed. Network TV crews and top reporters have been in his jail to tell about the work-release program. Magazine feature writers have published numerous articles on the success of the program. It has been the focus of publicity since it started in 1966.

"Work-release" is a plan whereby prisoners at a correctional prison, who meet very rigid requirements, leave the prison during the day and work in the adjacent community in skilled jobs which pay the going rate. They return to prison at night, pay board and room, and give half their pay to their families. This work-release usually occurs in the last year or six months of their sentence. Theoretically it gives them a money stake and prepares them for the outside world. I call the plan "work release," the warden refers to it as a "community-based program."

The first morning of my visit I sat in Warden Kenton's office while he philosophized on prisoners and his crusade—"work release." After some conversation he said: "Why don't I fix you up with an I.D. (Identity) card and you can come and go into the prison freely and talk with the prisoners by yourself." I thanked him for his confidence; mentioned that one of the prisoners had said to me. "Watch out for the warden, he is a pacifying S.O.B.

He laughed. "Find out for yourself."

The administrative officers of the institute want to talk about "work release." It is dramatic, the results are evident, and other prisons are following the Danbury work-release." Right now only 50 out of 700 meet the criteria set up to enable an inmate to qualify to work on the outside. These 50 are a most carefully selected group.

But what about the lives of the other 650 men at the FCI?

About 150 of the 700 inmates at Danbury are NARA men. Many inmates told me they were NARA men with the same matter-of-fact attitude that one says he's a Yale-man or Princeton or Dartmouth-man.

NARA signifies a method of addict rehabilitation. In 1966 Congress passed the Narcotic Addicts Rehabilitation Act. This is a nation-wide attempt to cure convicts of the drug habit which contributed to their crime. The reasoning develops that if addiction is eliminated the reasons for crime tend to diminish. Every state in the union also is wrestling with the same problem. Today there are more addicts than ever before in our history. Congress hopes that the NARA program is a good beginning towards curing addicts.

Most of the NARA men at Danbury's FCI are there because they committed a crime of stealing, forgery, first-time bank holdup, drug-selling and crimes of that nature. Before final sentence is pronounced by a judge an investigation is made to determine why the criminal did what he did. The probation report often reveals that he stole to feed his drug habit. Obviously the penologists reason, unless his drug habit is cured, he will get out and steal again.

"How do we cure his drug habit?"

AN OTTAWAY NEWS SERVICE FEATURE—PART III: PRISON DESIGNED MAINLY FOR REHABILITATION

(By Eugene J. Brown)

A federal correctional institute such as the one in Danbury, Conn. is not primarily designed to punish a man for his crime. Its purpose is to get the man rehabilitated as quickly as possible. "Get him out of prison and back into ordinary life," I was told by several officers.

Many prisoners I talked with, in the compound or sitting on their bunks, would argue this point. They say the administration wants to keep them "locked up."

The correctional philosophy makes little impression on an embittered inmate, who thinks he has served his time.

Theoretically a drug addict can be recommended for parole by the prison NARA parole board. Their recommendations are then considered by the formal parole board which agrees in 90% of the cases.

I listened one afternoon as Dr. Robert Rapkin, his staff and Dr. Margaret Lindner personally interviewed six parole applicants. As each man entered the crowded office, Dr. Rapkin would ask him if he had any objections to "a reporter" listening in. None objected.

Dr. Rapkin had spent a number of years at Massachusetts State Hospital as a resident psychiatrist. He told me that the food, conveniences, medical care, etc. were better at the Danbury FCI than in most state institutions.

A number of prisoners told me later in the week that state prisons "treat you like dogs." Beatings are not unknown in state prisons.

According to prisoner stories state prisons teach nothing and give nothing. "You come out feeling like an animal," a prisoner said.

FOOL-PROOF BOTTLE

The first inmate applying for parole that afternoon talked in a pleasing Southern accent. A fluent speaker about 40, he had been very helpful in therapy groups, at Danbury and at other prisons. Instead of using such terms as "jailed" he would use "incarcerated" and very naturally too.

He said he was entitled to parole as he was a "new" man and was damn tired of seeing his life go down the drain on account of drugs. He wished to go back to his father in Kentucky and a "lady friend whose company I enjoy." He was once married but not currently.

It was explained to him that he would have to undergo urine tests every week during his entire probation period plus some surprise tests. He agreed that he could handle that all right. (Drugs show up in urine.) He laughed: "You can't fool the bottle!"

In discussing cases with parole officers later, I was advised that addicts of middle age who have spent most of their life stealing to support their habit are good prospects to break off because they can look back on a wasted life and a probable tragic future. These men often succeed in breaking the habit, even after 20 years of addiction.

The group recommended the Kentuckian for parole consideration. I too thought he was entitled to return to his "lady friend."

The second case was a young white Virginian of a good family. He was subjected to long questioning by the parole group. He had been in the FCI about a year and felt that he had learned his lesson and was ready to move out. He was careful in his answers to the questions, spoke frankly of his good points as well as those which he thought would give him future trouble. The board decided favorably.

A few days later while visiting the intensive treatment unit, there was my friend from Virginia. He had broken the rules, contrary to the promises he had made to the board.

READY FOR WORLD

Mr. McDowell the knowledgeable black man had been in prisons for 15 years except for one 18-month period. In response to questions he said drugs made him a thief. He spoke fluently:

"Now, the thrill of drugs is gone. It was a big illusion, a dream, a myth! I know that there is something better in life than drugs, and I think I am now ready to face the world."

If this speech was rehearsed, he was indeed a fine actor. It sounded both spontaneous and sincere.

Asked how he managed to stay out of prison for that 18-month period, he said he had joined the Moslem religion. The parole report showed that he was a leader of a small group of devoted Moslems at the FCI.

He repeated, "I am a dedicated Muslim. You can't give my religion lip service, you've got to live it." (The Muslim religion has a very strict code which forbids drinking, drugs or other vices.)

He sensed that the board was divided, especially as they had detailed information covering all the infractions of the past 15 years. One member asked him if his parole was not recommended at this time, what would he do? He replied that he had the patience to continue as an inmate but he did not feel that the board considered fully his religion and his determination. His parole was deferred for consideration in a few months.

Late that afternoon in the therapy session, McDowell was bitter at this lack of confidence. But when I met him again that evening in the compound, he seemed composed and was looking forward to his next parole hearing.

BARBER TRADE

One parole applicant had learned the barber trade. He had adhered to prison discipline and cared little about learning any other trade. The board voted unanimously to recommend him for parole. (I thought otherwise).

In discussion afterwards they pointed out that nothing would be accomplished by keeping him in prison any longer. He had attained his educational goals. He had a trade and had as good a chance as anyone else of staying out of prison.

Parole officers practically live with these inmates. They have a feeling if rehabilitation has "taken" or if the convict is just "hustling" them.

They do not look upon prison as a place for further punishment. By the time the inmate reaches Danbury FCI, the purpose is to get them out of prison and back into society. This may strike many citizens as a revolutionary philosophy, but it is basic to the Federal Correctional System.

AN OTTAWAY NEWS SERVICE FEATURE—PART IV: ADDICTS NOT QUALIFIED FOR WORK RELEASE

(By Eugene J. Brown)

After wandering around the dormitories, dining rooms and the walks of the Federal Correctional Institute at Danbury, Conn., for a week, the prisoners took me for granted and would often start a conversation without any prompting.

In one dormitory a middle-aged man stopped me and said he didn't mind prison so much as he had committed a "wrong," but he did mind being forced to shave off his goatee. He asked me if I had had mine long and I said "about a year."

"What are you in for," I asked.

"Well, I was working with a veterinarian and we used drugs on the animals. After a while I started to slip a few pills to my friends," he said.

At the gate I asked another inmate the usual, "Why are you here?"

"I have 10 kids and you can't support 10 kids without stealing," he replied.

I surmised that 10 seemed like a valid reason and suggested that when he got out that he at least stop at 10. (He laughed rather hollowly.)

HALF ARE ADDICTS

Probably half of 700 inmates at this federal prison are or have been drug addicts.

A drug addict does not qualify for the work-release program because the chief of police in the City of Danbury is not anxious to complicate his law duties with known drug addicts from the prison.

Most of the inmates blame the warden for this. The truth is that the prison administration thinks that an addict undergoing therapy in the prison is just as good a risk for work release as the other inmates. The final responsibility, however, rests with the police chief where the correctional institute is located.

Dr. Robert Rapkin, the chief psychiatrist, thought that the drug rehabilitation program might end up with a 25 per cent cure rate.

HEROIN PROBLEM

Heroin is the major drug of addicts, commented Dr. Rapkin. The heroin user doesn't bother with marijuana. "Why fool around with junk when you can go places with heroin," is their attitude. Addiction is not a problem of race. However the white addicts tend to come from middle class homes and are usually young.

Several addicts in private conversations asked me how could they prove they were ready for "society" unless they got a chance to prove themselves on work release?

Others said there should be a pilot program for addicts on work release to see how it would work out. My assumption is that this is being tried in isolated instances, without publicity, in certain prisons.

Some of the staff men told me they thought an addict was a good work-release risk as any infraction while on the outside would stretch their terms out interminably. Most of them were on indeterminable sentences up to 10 years.

Dr. Rapkin told me that what is being done at the FCI will be evaluated after several years of drug therapy. At present there is almost no medication, just group therapy, counseling and the reward of early release.

While sitting in the parole hearings, I was attracted to the reasoning of Robert Garcia, a senior case worker who had been sent North to help on the rehabilitation of addicts in federal prisons.

Mr. Garcia came from Laredo, Texas, and speaks fluent Spanish. He was enthusiastic about his successes and became depressed, he said, when some of his cases did not respond to the rehabilitation processes.

He agreed with Dr. Rapkin's statement that "cure rates" depended upon both the probation officers who checked with addicts after they got out of prison and the competence of the case workers in the prisons.

Dr. Rapkin had told me previously many young addicts won't quit until they have been in the dregs of hell and have lost everything. Then they are more amenable to therapy.

HAD ENOUGH

Some people just quit voluntarily—after they have had enough of losing everything.

Is there drug addiction in the prison? Undoubtedly. Surprise shakedowns, stripping the men for drugs, urine tests, etc. can only slow down the traffic. An addict will "shoot" aspirin, Darvan, or anything, if he can't get heroin.

Garcia did have one ray of sunshine. He remarked that 70 per cent of first offenders will stay off dope after therapy.

Garcia is especially valuable because most of the Puerto Ricans are much more at home in the Spanish language. He commented that the average Puerto Rican makes a model prisoner, but the hard case Puerto Rican is the "toughest of all."

AN OTTAWAY NEWS SERVICE FEATURE—PART V: EDUCATIONAL, VOCATIONAL PROGRAMS

(By Eugene J. Brown)

At the Danbury, Conn. FCI, like many other correctional institutes, the open dormitories and cell blocks surround an open compound containing baseball field and bleachers, basketball and handball courts, walks and flower gardens. With the exception of men in the intensive treatment cells, the other inmates circulate freely around the vast compound.

Some years ago, federal correction prisons, including Danbury, were often called "Country Clubs" because they differed from the public's concept that "prison is for punishment."

These correction centers have never lived that appellation down. There are numerous federal prisons where the inmate is there for punishment. The atmosphere of such a prison is grim and rugged. However, one must keep in mind that the federal correctional prisons are primarily centers for rehabilitation, that within reason they try to impress the prisoner with his chances of rehabilitation if he will take advantage of the prison's educational and vocational opportunities.

RECREATION IN WINTER

I spent several evenings in the compound watching the ball games, the bocci players or the younger men playing basketball and handball. It was ideal August weather. Recreation in the winter, however, is much more difficult, and many complain that there is nothing to do on cold days except work and be a prisoner.

Edward Mannion, who has been in charge of recreation at the prison for over 25 years, said they did miss the winter recreation gym which had been converted to industrial use.

I suggested that keeping 700 men over the long winter months with no athletics were indeed confining. Mannion said (and he is an exercise enthusiast), that he hadn't ever noticed that exercise or lack of it made a man either a better inmate or better able to adjust to the outside. Nevertheless, he is constantly on the alert to promote interest in athletics.

The dining room is light and spacious. Food is American style and about average; the vegetables are tasty and plentiful; the menu includes a green salad and dessert. For men with ethnic or Southern backgrounds, it would probably take time getting used to the menu. I thought the variety seemed good, but inmates complained that it wasn't their idea of "food."

A store is open to the men where they can buy up to $20 per month, mostly food, soft drinks, ice cream, candy and cigarets. In the evening a great many men had paper containers from which they were spooning ice cream. A sign in the store read: "Absolutely no exchanges. All sales final." Another sign: "No personal checks accepted."

The prison baseball team is usually around the top of the local leagues. All games are at home; some players would like to "go on the road." Most of the inmate spectators cheer the town team, to the dismay of the prison champions.

Many of the older prisoners just sit or walk around in the compound during the evening. Of the younger men, some lift weights, or play games or sit and talk the time away.

There are movies two or three times a week. TV is available in the dormitories after work and on Sundays.

Book racks with free paperbacks are placed throughout certain buildings. No one needs to account for the loan of a book. A group of three black men, however, complained that there was too much friction and not enough "meaningful" books. They wanted more material on black history and the biographies of great men. One man with a minimum education asked: "Why don't the warden give the library more books that explain the meaning of life?"

DORMITORIES

The dormitories are as varied as residential areas in the outside world. Several of the "dorms" have two tiers of individual cells on each side with cots on the ground floor-walk area to accommodate the overflow. The men do prefer individual cells where they can keep their photographs and other possessions.

We walked through a number of dormitories with double bunks in low-walled cubicles; others had a cubicle for each man. Inmates were busy repainting the area as there is always plenty of experienced labor available to keep the prison in top shape.

AN OTTAWAY NEWS SERVICE FEATURE—PART VI: FEW DRAFT EVADERS AT DANBURY

(By Eugene J. Brown)

During my two weeks of visiting the prison at Danbury, Conn., I would seek out the warden for short visits mostly to check on the stories, factual or rumored.

Warden Frank Kenton said that there was no truth to a current rumor that the prison has a great number of draft evaders. (Many evaders get from three to five year terms and are sent to other federal prisons, although they might spend the last year in Danbury).

He did say that during World War II Danbury had a great number of draft evasion convicts.

Danbury is no longer a haven for income tax violators. At present there are only 30 out of the 700 inmates committed for tax evasion. Those who sell counterfeit money, first offense, those who rob banks for the first time and get caught, often do their penance at Danbury. Forgers also find Danbury their place of temporary employment.

About 1,000 inmates are committed a year and 1,000 go out. Ed Mannion, recreational director, has seen 19,000 men come and go, most of whom he has had personal contact with during his years at the prison.

Only a few inmates are in Danbury prison for crimes of violence, although a few may be sent for rehabilitation during their final months.

Mixing the younger men with the older men usually results in teaching the younger ones the tricks of crime. One young fellow told me that his term in the prison was the best thing that ever happened; he was picking up the trade of a card-dealer and would head for Las Vegas the hour he got out.

Being in prison destroys a man's natural dignity; it makes men bitter and revengeful. Eight cases out of 10 return to prison. In prison one is constantly under the scrutiny of a guard who is firm and inclined to enforce the rules as written. Most of them don't trust "cons." Most guards come from small western or midwestern towns and may be incapable of understanding "the criminal mentality" of the larger cities.

One afternoon I found my way into the educational building where a few prisoners were working on a mimeograph prison newspaper. There had been a lapse of some months of an in-prison publication, now the prison had a new editor, Ronn Arquette.

He seemed to be in his early 30's, and he handled himself like an experienced newspaper editor.

He had a crew of four in the makeup department and a dozen reporters in other parts of the jail.

I asked him of his previous experience. He replied: "I've been an editor four times. Once in a Texas State Prison and three times in federal prisons."

His reputation for editorial competence is so well known that apparently no matter what crime he commits, he is automatically assigned to the editor's job.

As I was leaving the compound one evening I sat down to rest my feet beside a middle-aged man, M. Silbert from Maryland. He said he was in for misplacing $3,000. He was a first-termer and hoped to get out in six months on parole. He had sold his home so that his family could live while he was an inmate.

He said: "I made a mistake and am paying for it . . . but this is a swell place to be. They treat you decently; the food is as good as I get at home. I highly recommend this prison." We chatted a few more minutes, and, as I got up to leave he called: "Be sure to send me a copy of your story."

Three black men were cooling themselves off on a low stoop, and I sat down and stretched out my legs again.

None of them wanted to talk and seemed suspicious of me. I said that I was a reporter and, when they wouldn't believe that, I told them I was a spy for the warden. That broke their reserve .

One was on the NARA Program but didn't think therapy was any good. He was a mason by trade and exclaimed: "What the hell is the use of my learning any other trade here? I'm a damn good mason and that's my trade. Anything else is garbage!"

Another young man had had 15 months of twice a week therapy. He claimed that they got too many evasive answers in therapy, but lately they were getting more direct replies. I asked him of his educational background. Said he had had two years at Columbia University.

While walking through the administration office one day, Mannion, the recreational director, introduced me to a very pleasant chap who was ready to go to work as a plumber's apprentice the next day in a local town shop. His brother was also on the work release program as a carpenter. I asked why he was a guest at the FCI. He told me that he and his brother held up a bank. It was a first offense, and they were caught as most amateurs are. My impression was that the two brothers had had their fill of prison and crime and were excellent prospects for normal life of release.

The case workers repeated to me that first offenders have the best chance of staying out of future trouble, though approximately eight out of 10 inmates return. But then, two out of 10 are "saved."

AN OTTAWAY NEWS SERVICE FEATURE—PART VII: PRISON'S INDUSTRY KEEPS

(By Eugene J. Brown)

The inmate in a federal prison in which correction is stressed as part of the inmate's life, fills his days by working in "in-prison industry," the service departments, and on "work release."

Industry in Danbury Federal Correction Prison includes glove making, various electrical component assemblies, maintenance, and the development of skills in small motor repairs, oil burner maintenance, plumbing and heating and similar trades.

The prisoner can also go to school, a privilege available on his free time.

In prison industry such as the glove factory, an inmate can make up to about $60 a month. His board and room are free.

The sewing and cutting of gloves in the Danbury prison still has a great number of workers, though this type of work is being phased out, as there is little future for men in "gloves" on the outside.

The hum of the glove machinery made conversation difficult, but I found one table where prisoner Robert Bruer was temporarily idle. Mr. Bruer had finished his quota for the day but the rules required him to stay at his post until quitting time two hours hence.

Bruer, about 30, had worked on the Baltimore Sun and was now in the FCI for selling counterfeit money. He was quiet and rather shy, had a high school education, and wanted to go on to college for an electronics course.

He hoped some day to get on the work release program when he could meet the requirements. He said rehabilitation at the state prisons was mostly a farce and that they made hardened criminals out of the young men sent there. Bruer is separated from his wife.

Time and again an inmate would tell me that he was separated or divorced. Many wives divorced prisoner-husbands, or crime may have broken up the family previous to his sentence.

Most enthusiastic in the administration of the prison are the instructors involved in industrial training. Watching inmates with no particular previous skill master the art of repairing small motors such as used on outboards, chain saws, lawn mowers, snow blowers and boats in a matter of 19 weeks is rewarding to the teachers.

I noticed in the small motors shop several Puerto Ricans who couldn't understand English, laboriously following motor diagrams and diagnosing mechanical problems.

There is a ready market in the city for graduates of the small-motors classes on work-release or when paroled.

There is a waiting list of inmates to get into the small-motor repair school, but the course requires individual instruction. There are not enough full-time teachers.

The plumbing, heating and custodial school takes inmates without previous experience and gives them a working knowledge of the trade. The instructor showed me a number of letters from former inmates who wrote of their new jobs and expressed their genuine gratitude for what they had learned in prison. These small successes make a teacher's life meaningful in or out of prison.

I did run into a few men who had taken the small-motors course, had received their high school educational equivalency and numerous other certificates, and were still in prison. After they had gone through all the "motivation" programs, there is little to do except serve their time. That's when "punishment" really sets in.

In addition to the glove shop, the big industry is "Cable." This usually involves attaching electric fittings to cable, much of which is on contract to local industry. In this industry the men can make up to $100 a month which supplements their family income or gives them a stake when released.

Many families of prisoners are on welfare. When a judge sentences the average criminal to a prison, the taxpayer supports the family he left behind.

Many convicted men arrive at prison with only the rudiments of elementary education. Some may have had a year or two of high school. The prison educational department makes a special effort with these uneducated inmates in both academic and vocational courses with the result that most of them do earn the equivalent of a high school diploma before they are released.

A few men with special problems or special aptitude may be sent to the local high or vocational school for further education.

The three career men who run the educational department of the prison said that their biggest problem is to get the inmates motivated.

Prisoners who work all day in "industry," kitchens, etc., have to want education to go to school at night. Even the instructors suggest that working prisoners should be given two hours off four days a week to attend school to supplement the motivation.

Younger criminals unfortunately usually look upon more education as "the bunk."

The desire for more education was mostly confined to Negroes whose willingness is the result of their belief that they got into "trouble" because of lack of education.

I met men in the glove shop in the "Cable" industry who felt that the work they were doing was meaningless—if it was designed to teach them a useful trade. And correctional administrators would be inclined to agree.

Working in prison industry does serve to give the families of the prisoner supplementary income, and he can also accumulate a bank account available to him on release. Working also keeps him occupied while in prison and that too has some therapeutic value.

The occupational skills which are fast being introduced into the correctional prisons is a tremendous advance in the area of giving a man a trade which will help keep him out of future trouble.

The prisoner grouses if he sees no future in what the prison is trying to do for him. If the grousing is bitter, he tends to give up hope. In this writer's opinion, the "hopeless" convict will most likely return to crime.

Perhaps one of the brightest spots about my stay in the prison was my contacts with career men who are in prison educational and vocational systems. Knowing that they are going to have a large percentage of "failures" they still manage to avoid a professional cynicism.

Personally, after observing the performance of prison teachers, instructors and shop managers, I was amazed at their enthusiasm. I would have thrown up my hands within seven days.

AN OTTAWAY NEWS SERVICE FEATURE—PART VIII: DANBURY WARDEN OPPOSES CONJUGAL VISITS

(By Eugene J. Brown)

On several days when Warden Frank Kenton had time, he would lunch with me in the prison administrative room which served the same menu as the prisoner cafeteria. This relaxed hour usually gave me an opportunity to probe his views on the habits of prisoners and their problems.

Kenton said that one of his unpleasant duties was attempting to answer a wife on the release date of her husband. Many mothers would make a plea for "consideration" as they would often say that as long as the husband was in jail the children were the butt of ridicule from their playmates. Others just feared that the long separation would break up the family.

Kenton had no formula for the man who keeps on committing crimes—except to lock him up and isolate him from society. I gathered from some of his remarks that habitual criminals are often made that way when they are thrown into contact with older and hardened convicts. Today, even in the state prisons, there are sincere attempts being made to separate first termers from the habitual criminal.

"The warden flatly denied the rumor that the prison held a number of young men who secured a felony conviction of one year by stealing a car and crossing a state line for the purpose of avoiding the draft. The draft does not take felons. I asked the Warden and several the staff about the place of religion in the rehabilitation of criminals. The prison has full-time Catholic and Protestant chaplains A few men are granted the privilege of attending church in the city.

I could not determine from the staff if religion played any role in rehabilitation. I questioned some of the convicts and those I did talk with were not interested in formal religion, except perhaps for the Muslims.

I asked Kenton if he was in favor of conjugal visits under circumstances where a prisoner would be able to live with wife and

family on weekends or have extended weekend visits.

Kenton said that he might be puritanical but he opposed conjugal visits. "They tend to degrade the meaning of marriage."

From Kenton's attitude I surmised that he would vehemently oppose the experiment. This writer thinks it is quite unrealistic to isolate men from families for extended periods of time. It is a punishment only sanctioned in times of war.

Kenton maintained that the best way to bring the family together was to keep the inmate in prison the shortest possible time. "Return him to his family as quickly as you can," was his formula for the rehabilitated convict.

Alcoholics Anonymous has an active chapter in the FCI at Danbury. A group of 24 inmates meet each Wednesday; on Sundays outside AA groups send in leaders for the group therapy sessions. The FCI unit is sponsored by the Danbury chapter, and they do a fine job according to anonymous members.

AA graduates, when paroled, can also go to a Halfway House in Waterbury, Conn., which admits parolees only. At this house they can spend up to 90 days adjusting to the routine of working and living outside and hopefully away from chronic alcoholism.

Sick call in a prison is from 7 to 7:30 a.m. Two excellent full-time physicians and two dentists keep occupied with their 700 patients plus the 1,000 who come in and out each year.

The private hospital cells do not cost $50 per day and the dental work is free.

One doctor said that one of the benefits of prison practice is your ability to see your patient daily if needed—the patient is always around.

In two of the hospital rooms were young healthy-looking men with needle-induced hepatitis. A rather common affliction of addicts.

After inspecting the very modern medical and dental facilities, I came away with the thought that the body gets far better care than the soul.

The average citizen seldom gets locked up behind bars, and I remarked to the warden that I had no particular reaction to the experience while visiting his facilities. In fact, looking out a skyscraper window makes me far more squeamish. He replied: "You would make an ideal inmate, however visitors are often locked for fun and react uncomfortably within only a few minutes."

I asked Kenton why a few men on work-release attempt to escape with only a month to serve. He replied that some run away as the end of the term expires with the unconscious hope that they will be caught. They are afraid of facing the problem of being on their own. This "shortitis" can take the form of a nervous illness as the end of their term approaches—and even require hospitalization. The warden called it a Cinderella Syndrome: The pumpkin wants to stay a pumpkin.

The warden said he really couldn't answer the question satisfactorily as the reasons are just too complex.

The average prisoner, however, wants to get out, and the reward of a shortened sentence for good behavior is a powerful motivating force, commented Kenton.

Kenton thought I could help by spreading the word that the correctional system was a wonderful opportunity for young people who contemplate going into social service work. There is a dearth of social workers in the system. He said it offered educational opportunities . . . and a chance to do a great good.

AN OTTAWAY NEWS SERVICE FEATURE—PART IX: PRISON'S WORK-RELEASE PROGRAM REWARDING

(By Eugene J. Brown)

The work-release program based on community participation is the most exciting event to affect the Federal Prison System in recent years.

The program has worked in Danbury at the Federal Correctional Institute because Warden Frank Kenton and his officers sold the City of Danbury on the idea of becoming actively involved in the program.

The success and some of the problems of work release are outlined in this and the concluding article to follow.

One inmate on work release who worked in the city during the day and slept in the jail at night complained that if the warden thought enough of him to put him on "work release" why didn't he allow him to join his employer's evening bowling team.

Another "work release" prisoner with an 8 to 5 job in the city said that for the first time in years: "I feel like a human being."

And Warden Kenton said to me in the course of one two-hour conversation: "I stake my career on the success of the work release program."

A captain on the 4 to midnight shift in the compound commented as we were watching the dusk ball game: "I've seen a lot of things tried in my life to help a prisoner and this (work release) is the first one that is working."

What is work release?

A prisoner with a short term or in the last year of his sentence, who meets very rigid requirements, can work on the outside during the day or night for standard outside wages, he returns to jail for sleep and weekends when not working.

At present only 50 out of 700 inmates meet the difficult criteria set up. He cannot be a sexual deviate, an alcoholic, a drug adict or have been sentenced for a crime of violence. He must have in-prison training for the job and show an attitude and record that will practically guarantee his success on the job.

He must abide by a long list of rules including: Do no favors for other prisoners in jail, make no phone calls, send no letters on the outside, bring nothing into the prison or drive an automobile. In addition he submits to surprise "strip-downs" for possible contraband when he returns at night.

He pays the Government $2 a day for room and board, sends half of his earnings to his family and must have the guts to withstand the temptations of the free world.

If he fails, his parole date is set-off further; he is condemned by his fellow prisoners for "fouling up" the program and back to the prison routine he goes.

Three weeks before my visit, three work-release men got drunk and were taken off the program. The succeeding three weeks resulted in a spotless record—all rules were obeyed.

The work release people meet as a group every Wednesday to discuss the week's happenings and problems. At the meeting I attended, Mr. Paul T. Walker, the deputy Warden ran it with the attitude of a genial college coach or even as a neighborhood scoutmaster.

One prisoner complained at the open meeting that he was only permitted to take out one pack of cigarets a day. Permission was granted for 2 packs plus a cancer warning.

A member of the Muslim sect complained bitterly that for a week his sandwiches on the job from the prison kitchen were pork, forbidden in his religion. Walker said he would arrange more of a variety of sandwiches.

After the meeting one of my inmate friends (J.P.) an orderly at Danbury Hospital on the team which responded to emergency calls in the cardiac unit, said that work release saved his sanity. His parole was due in a few weeks and he planned to go back into the construction business.

One evening around eight, I asked an inmate to take me over the Danbury House, the dormitory for the work-release prisoners.

I sat down on a bed next to a reclining inmate and asked if he minded talking. We were joined by five or six others who demanded that I write about their "beefs."

One shouted off with: "If the Warden trusts us to go out and work each day, why can't we spend the weekends with our families? We wouldn't escape!"

Another: "Some of the pens in the west have little houses where our families can live outside the jail on weekends. Why can't we have that in Danbury?" (The warden told me on another day that it was an interesting idea but that he had never heard of it in the U.S.)

Several men doing journeymen work but getting apprentice pay didn't like the idea of working on the outside for less than journeymen union wages. (Most get good comparable wages.)

Some said that their educational programs which qualified them for outside work should also entitle them to special privileges.

All said that they were fearful of making a misstep which would affect their parole. The pressure bothers them.

Towards the end of our conversation a prisoner, overhearing the group, stepped in and said: "Hell man, bad as it is . . . it is still better than staying in jail all day." After a silence, they nodded their heads in agreement.

I couldn't resist saying to a white North Carolinian who had been sentenced for bootlegging, what he was going to do when he got out. In pure Southern he said: "Well suh, I'm piling up my stake and when ah git out, I'm going right back to bootlegging cuz that's muh trade."

"Yes," I said, "and in three months you'll be right back here."

"No suh," he replied, "Last time they got me cuse I talked too much. Now I've learned to keep muh mouth shut."

Work release with the proper community cooperation and the wholehearted support of the warden and his staff prepares the prisoner for the major adjustment from prison life to an every-day routine of "outside" society. Without this intermediate step, the adjustment is traumatic for many prisoners. They then fall back on crime.

AN ONS FEATURE—PART X: SOME CALL WARDEN A MOLLYCODDLER

Telephone calls from citizens to Warden Frank Kenton accusing him of mollycoddling work-release prisoners are not unusual. Some people just abhor the idea of prisoners working in the town.

However neither uncommon are notes from congressmen wherein they enclose copies from prisoners claiming discrimination because the warden won't put them out on work-release.

The prisoners and the warden of the federal correctional prison agree on one fact. The attitude of the outside community determines the success of releasing prisoners for work; the prisoners say "the help of the townspeople makes the 'thing' work."

One said: "The outside people are the redeeming feature of work-release." Being treated like a human being meant more to this prisoner than the money or the freedom.

One of the sparkplugs of the work-release system is Ed Mannion of Bethel, Conn., who is recreational director and a job-seeker for the prisoners. He has spent more than 25 years at the local FCI.

"Our personal success is judged if we can keep the man from coming back," Mannion said.

Mannion retains a paternal interest about the men after they leave the prison. They write to him about their jobs and their hopes of success. They tell him about their families, their homes and say "thanks." Mannion, as well as the others do get depressed at their "failures" and are inclined to wonder where the mistakes were made.

I told him that my personal attitude was a more casual . . . "as long as you are working with human beings, the successes are going to be less than the failures."

Warden Kenton of the FCI is easy to know. He has three boys with the usual problems of a father. He has risen in the prison system to the warden's position and has spent his whole life, adult life primarily, in the correction area of prisons.

Kenton had just been promoted to a correction prison on the West Coast which specializes in the rehabilitation of young convicts. He was due to leave in two weeks.

Kenton is the opposite of a "jailer." He acts more like a manager of men whose job is to sell ideas.

His stint in Danbury has lasted nine years. He says that perhaps it has been too long, for wardens tend to lose their enthusiasm after five years. Perhaps Kenton would have lost his enthusiasm after five years had it not been for the inception of the work release program in 1965.

The warden wanted to talk exclusively about the program for, as he says, "now we have something that works." It is a matter of great satisfaction for him to go to a convention where penologists and social workers convene and have the professionals ask him for more details about the "Danbury" plan.

I use the term "Danbury plan," only because this is a successful program. It could be labeled San Francisco or Springfield, Mo., as the program is being tried in other federal prisons; even certain state prisons are now attempting work-release procedures.

Kenton warned, "We can give the inmate the tools for normalcy but sooner or later the responsibility has to be assumed by the general public."

Kenton takes a businessman's approach to locking men up: "The profit is based upon the percentage of human beings that we can successfully return to the outside world."

"When a prisoner leaves here, our success is determined if we can keep him in normal society for two years; for three years or for more." The warden said, "It is sort of a numbers game."

"Very few of us think that keeping a man in prison has much effect on rehabilitating him. Whether the prisoners think so or not, we are working here to get the man out into normal family life. Rehabilitating him. Whether the prisoners the prison may give him the equipment to cope with society but beyond that it is the community's responsibility," continued Warden Kenton.

"What will happen to your work release system if jobs become scarce?" I asked Kenton.

The question disturbed him: "No jobs, no work-release. Big trouble," he replied.

I asked why are there only 50 men now out on work-release when the figures have run as high as 100.

"In this area," he replied, "we are not playing a numbers game, we have rigid requirements as to who can go out. If only 50 meet the requirements, that is that," he said, and then continued, "many men who could meet the requirements are eliminated by detainers which means that on release they will be picked up by other enforcement officers."

The warden and his staff, at this time, are not prepared to veer from the very rigid requirements which they think have contributed to the excellent reputation which the program has in the community. He said that 50 men out on work release who are going to succeed is far better than having twice that number out just because we want to make a "record."

Most everyone in the system maintains that the prisoner is out to "hustle or con" you, and I think most prisoners think the same of those who run the prison.

This failure of communications makes "rehabilitation" a dirty word to prisoners, but as one merely reporting the situation as it exists, it is just one phase of the vast science of criminology.

My discussions with prisoners and administrators, however, would suggest the prisoners understand far less about the purpose of "correction" than the administration hopes they do.

As I gathered my material to say goodbye to the warden, his zeal for work-release could not be contained.

"If you can convey any kind of message, thank God for the American trait of wanting to help unfortunate people. They have made our work-release really possible."

ACTION ASKED ON MUTUAL FUNDS

Mr. McINTYRE. Mr. President, in an editorial published yesterday, the Washington Post called for House action on the mutual fund bill which the Senate has already passed on two different occasions.

As a sponsor of the bill in the Senate, I have been greatly concerned by the inaction of the House, and I think this editorial reinforces the urgency of this matter and the need for immediate enactment.

So I would hope that my colleagues in the other Chamber would carefully consider what this editorial has to say, and then take some positive steps toward passage of this important legislation.

Mr. President, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 18, 1969]

REGULATING MUTUAL FUNDS

Only a few weeks ago it appeared that impediments to enactment of the Securities and Exchange Commission's mutual fund bill had been eliminated. Representatives of the commission had met with spokesmen for the industry for full discussion of the commission's proposed regulations. The SEC had agreed to compromises which it deemed to be reasonable, and the investment companies seemed to acquiesce. With this understanding, the Senate passed the bill unanimously. New objections have now been raised in the House Subcommittee on Commerce and Finance, but the problems of mutual fund investors have not gone away, and legislation in this sphere becomes more urgent every month.

When Congress passed the existing law in 1940, investment companies of this kind were new, and the need for strict regulation of their fees was not apparent. The net asset value of all mutual funds at that time was only $450 million. That sum has since been multiplied by 120, bringing the assets of mutual funds this year to more than $54 billion. Size has brought many economies in operation, yet some companies are still paying the same advisory fees (traditionally ½ of 1 per cent).

Advisory fees are said to be the largest element in the total expenses of mutual funds. One authority places mutual fund outlays for advisory fees at two thirds of total expenses. While other costs have declined 51 per cent in the last 20 years of the mutual fund boom, advisory fees have shrunk in proportion to investments by only 23.5 per cent and there is no present means of bringing them into a reasonable relationship.

Chairman Hamer H. Budge of the SEC made a strong case for enactment of that agency's corrective bill before the House subcommittee the other day. This is an area in which the competition of the market place simply does not operate. Nor is it likely that self-regulation would prove effective. The size and importance of the industry, plus the fact that the advisers are virtually in a position to fix their own fees, seem to make public regulation essential despite the complications of fixing generally applicable standards.

The Senate bill is also designed to lower mutual fund sales prices. The SEC thinks the existing "sales loads" should be cut from about 8.5 to 5 per cent. The Senate bill would allow the National Association of Securities Dealers to make rules prohibiting "excessive sales loads" subject to review and alteration by the SEC after 18 months.

Small investors would also obtain substantial relief from so-called "front-end loads" under the bill. At present up to 50 per cent of the first year's payments under a contract to buy mutual fund shares by installment may be deducted for sales commissions, even though many such contracts are suspended after a few years. The SEC wanted to abolish the "front-end load" entirely but had to be content with halfway reforms.

Finally, the bill would put some restraints on the payment of "performance fees" to registered investment companies. The SEC found many fees of this kind to be grossly unfair to investors. I have given long and conscientious study to the operations of the mutual funds, and while its proposed remedies for the abuses uncovered may be in some respects experimental, we think enactment of this bill is in the public interest.

NUCLEAR TEST BAN TREATY SAFEGUARDS

Mr. JACKSON. Since June 1963, the United States and the Soviet Union have reached agreement in four areas of arms control. We began, in mid-1963, by establishing and maintaining a communications system to minimize the chance of a catastrophic accident or miscalculation in moments of crisis. In the aftermath of the Cuban missile crisis we took measures to assure positive control over the previously uncertain channels for rapid and authoritative communication—measures that represented the first successful attempt to control nuclear armaments in concert with the Soviet Union.

A few months later the U.S. Senate voted to approve the limited nuclear test ban. Since then we have made great progress in keeping outer space a demilitarized zone, and have tried, through the institution of the nonproliferation treaty, to control the diffusion of nuclear weapons.

More recently, the effort to search out areas in which agreement to limit armaments can be reached has taken us to Geneva, where measures to control the use of the seabed for military purposes and to limit chemical and biological weapons are under consideration, and to Helsinki where the strategic arms limitation talks are underway.

In Geneva and Helsinki more serious consideration is being given to arms control now, this year, than in all the years of the nuclear era put together. The interest of the Senate in the test ban agreement did not end with its ratifica-

tion. The safeguards program established in conjunction with the agreement gave physical expression to the concern of many Senators that we take such measures as are necessary to maintain the position of this country with respect to the evolution of nuclear weapons technology. It was the intention of this program that the United States should always maintain the infrastructure necessary to make a timely response to any abrogation of the treaty, and, by so doing, to make plain to the Soviets that they cannot hope that our unreadiness will enable them to conduct a one-sided crash program leading to some military advantage.

In the current context of extensive arms control negotiations in Helsinki and Geneva, we remain mindful that the persistence of the Executive in adhering to the understanding given to the Senate on the safeguards program will constitute an important element in the approach of many Senators to further measures of arms control.

By way of review, the safeguards were adopted after members of the Joint Chiefs of Staff in testifying before the Senate Armed Services Committee and the Joint Committee on Atomic Energy recommended them as necessary if the proposed treaty were not to operate against our national security interests. The safeguards, in brief, are:

(1) The conduct of comprehensive, aggressive, and continuing underground nuclear test programs;

(2) The maintenance of modern nuclear laboratory facilities and programs;

(3) The maintenance of the facilities and resources necessary to resume promptly atmospheric testing should it be deemed essential to our national security or should the treaty be abrogated by others; and

(4) The improvement of our capability to monitor and detect violations of the treaty and to maintain our knowledge of foreign nuclear activity.

Since the adoption of the Limited Test Ban Treaty in 1963, staff members of the Joint Committee on Atomic Energy and the Preparedness Investigating Subcommittee have continually monitored the safeguard program to insure that the safeguards are implemented in accordance with the presidential commitment. Each year since 1963, I have presented a report to the Senate assessing the safeguard program. This is the sixth annual report and, as on the five previous occasions, I am able to report that, on the whole, our implementation of the treaty safeguards for the period since the last report has been very satisfactory.

However, there has been a most significant development in the plans for the future regarding implementation of Safeguard 3; i.e., the maintenance of facilities and resources necessary to resume promptly atmospheric testing should it be deemed essential to our national security or should the treaty be abrogated by others. I have been advised that the Defense Department and the Atomic Energy Commission have reached a decision to revise the national nuclear test readiness program in what has been described quite candidly as an economy measure. The DOD and AEC revision will reduce the readiness program budget for fiscal year 1971 and future years to approximately one-third of the previous program. The resulting degradation in our "readiness to test" posture will be reflected principally in increases in response time. We are informed by the Defense Department and AEC that all essential tests previously planned will still be feasible under this reduced posture and that the end date for such a test program would not need to be changed—only the beginning. Presumably, the planned program could be compressed to achieve the previously planned end date.

This proposed revision to our "readiness to test" program is a matter of some concern to me. Any degradation in the response time raises the serious political question: How long would the "test window" stay open if testing were resumed by the Soviets? Pressure to reinstate the ban would begin as soon as the Soviets completed their test series and stopped testing. If the "window" were closed before we completed our tests the results might be the achievement of an insurmountable technological advantage by a potential adversary.

The Nuclear Safeguard Subcommittee has a responsibility to the Senate and the Nation to inquire more thoroughly into the effects of this degradation. This is the first significant reduction in the nuclear safeguards program. It may well be that a revision in the test plan is justified and that a stretch out in the response time is acceptable. Certainly, if economies can be made in the program without adversely affecting the national security, I for one, would applaud the action. A careful and critical review of the continuing need for each element in the safeguard program is a healthy and commendable function of the DOD and AEC. In addition to the Administration's examination, however, I consider that it is incumbent on the Safeguards Subcommittee to inquire closely into a decision which will have a major impact on the safeguards program.

The original assurances that the safeguards would be maintained were given by President Kennedy in August of 1963. They were reaffirmed by President Johnson in April 1964, but the present Administration has not formally stated its policy in this regard.

I plan to arrange for the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, the Chairman of the Atomic Energy Commission, the Director of the Defense Atomic Support Agency, and the Directors of the two AEC laboratories, Livermore and Los Alamos, to appear before the Subcommittee to testify on the possible technological and political impacts of this decision and on the policy of this Administration regarding the continued implementation of Safeguard 3 as well as the other Safeguards which are our responsibility to oversee.

As has been my practice in the past, I would like to discuss now the record of the Atomic Energy Commission and the Department of Defense in implementing each of the safeguards over the past year. Considerable detail will be included in order to provide as broad a dissemination of this information as is possible without compromising our Nation's security.

SAFEGUARD 1—UNDERGROUND TEST PROGRAM

This safeguard requires the aggressive conduct of a continuing comprehensive underground nuclear test program designed to add to our knowledge and improve our weapon systems in all areas of significance to our military posture. The underground test program is providing substantially more information than was expected when the safeguards were formulated in 1963. Through the acquisition of more sophisticated technologies from the continuing underground test program and the research activities conducted by the laboratories (Los Alamos Scientific Laboratory at Los Alamos, N. Mex., the Lawrence Radiation Laboratory at Livermore, Calif., and the Sandia Laboratories) which support the test program, there has been continued development in our capability to conduct a variety of full-scale underground nuclear tests. Many of the techniques used were not envisioned as possible when the underground test programs first began. The continuing underground test program is of paramount importance in the continued growth of the U.S. capabilities in both the defensive and offensive categories.

During fiscal year 1969 the BOWLINE test series continued the underground test program at Nevada test site at about the same level as CROSS TIE, the fiscal year 1968 test series. Two tests in the fiscal year 1969 BOWLINE series were Plowshare experiments (peaceful uses) and three were DOD effects tests which were logistically and technically supported by the AEC. The remainder of the BOWLINE tests were AEC weapons development tests.

The AEC program to conduct higher yield testing on Pahute Mesa at the Nevada test site has proceeded in an expeditious manner. Since my last report two more high yield tests have been conducted there, the largest of which had a yield of about one megaton. The two supplemental test areas have now reached an operational status, one in central Nevada and one in Amchitka Island in the Aleutian Islands chain off Alaska. The site calibration test MILROW at Amchitka was conducted on October 2, 1969, with a yield in the one megaton range with no untoward effects generated. For fiscal year 1970 the planned weapons development program is directed toward the primary objectives of weaponization, weapon feasibility, advanced technology and site calibration. Because of a reduction in the amount of funding for AEC weapons development which will be available in fiscal year 1970, the level of activity will be somewhat reduced from the 1969 level.

SAFEGUARD 2—MAINTENANCE OF MODERN LABORATORIES AND PROGRAMS

The second safeguard requires the maintenance of modern laboratory facilities and programs in theoretical and exploratory nuclear technology which will attract, retain, and insure the continued application of human scientific resources to those programs on which progress on

nuclear technology depends. The laboratory program is conducted by both the Atomic Energy Commission and the Department of Defense.

The three weapons laboratories, contractor operated for the AEC, have since the last report continued to operate as progressive research organizations in the nuclear, as well as in nonnuclear fields. The nuclear research and development programs are conducted by Los Alamos Scientific Laboratory and the Lawrence Radiation Laboratory at Livermore. The nonnuclear engineering and development activities are conducted by Sandia Laboratories. In each of the laboratories the work performed can be classified into three primary areas of interest:

(a) The fundamental research of general interest to a broad range of development needs;

(b) Advanced development of specific concepts; and

(c) The weaponization of these concepts into stockpile weapons or weapon systems.

Of primary importance to the long-range vitality of the nuclear weapons development program is the emphasis which is placed on activities devoted to developing in advance the new design concepts so important to realizing the new state-of-the-art weapons necessary for assuring the capability of meeting future defense requirements. Emphasis on preweaponization development effort must be maintained in order to insure advancement of technology to meet the potential threat of the future and readiness to meet the future weaponization requirements as they rise. The Atomic Energy Commission reports that the combination of the challenging research program in both nuclear and nonnuclear weapons technologies, the continuing, progressive, highly complex nuclear testing program, and the maintenance and improvements in required laboratory facilities have continued the laboratories' ability to retain or recruit the necessary technical and scientific staff.

A major factor in the maintenance of progressive laboratories is the constant need to up-date both facilities and equipment, both of which are vital to providing for a wide spectrum of forward looking scientific research and development programs. A measure of the magnitude of this requirement is found in the total of about $385 million which has been authorized or obligated for new or up-dated laboratory facilities and equipment at Sandia, Los Alamos, Livermore and the Nevada Test Site during the 6-year period of fiscal year 1964 through fiscal year 1966. The fiscal year 1970 budget allocates about $6 million for construction and $51 million for equipment.

In carrying out its part of the responsibility for implementation of Safeguard 2, the Defense Department has expended research in nuclear technology in Government laboratories and contractor facilities. These DOD programs help insure a continuing source of top scientific personnel.

Some of the accomplishments of the DOD in implementing the second safeguard during this reporting period are as follows:

Significant progress has been made in obtaining better calculations of radiation environments in the atmosphere and within various structures.

Calculations of radiation transport at low altitudes, including air/ground interface were completed for use in studying missile silo radiation hardness.

Vulnerability and hardening research was expanded for design, test, and evaluation of strategic reentry vehicles and related systems components.

Improvements were made in calculations of the magnitude of shock waves induced in materials by X-ray depositions and the ensuing propagation and attenuation of the shock.

A 20-ton high explosive surface burst test was used to check theoretical calculations of structural damage due to air blast induced ground shock from a nuclear explosion.

Models continue to be developed for high altitude nuclear phenomenology for anti-ballistic-missile radars and communications. A first generation computer code for radar degradation and a 6-volume communication handbook describing nuclear effects on radio propagation was published in late 1968.

Land and naval system vulnerability/hardening, medical effects of nuclear radiation and general development of laboratory simulation of nuclear effects has continued. The overall program has been active and responsive to service requirements.

In summary, our evaluation of both the AEC and DOD program for implementation of Safeguard 2 is that the laboratories continue to be vigorous, their facilities and technical and scientific talent are being maintained in a high state of competence, and their programs are supporting the second safeguard effectively.

SAFEGUARD 3—READINESS-TO-TEST PROGRAM

The third safeguard requires the maintenance of facilities and resources necessary to institute promptly nuclear tests in the prohibited environments (atmosphere, underwater and space) should they be deemed essential to our national security. The capability to conduct such a nuclear test series on short notice was first attained by the AEC and DOD on January 1, 1965. Since then, the national nuclear test readiness program has been reviewed twice at the presidential staff level. It was revised in October 1968 and the revised program was approved by the White House in March 1969.

The revised national nuclear test readiness program required some additional preparation to achieve readiness to carry out the revised program. In the meanwhile, the DOD and AEC maintained their readiness to resume testing in the prohibited environments with a significant program. As indicated in my report of last year, the revised readiness program included:

1. Full proof of the survivability of hardened reentry vehicles when they are subjected to a realistic nuclear environment while in their operational modes;

2. Evaluation of the effects of ABM radar operation from detonations at high altitude;

3. Obtaining realistic data on the electromagnetic fields created by nuclear detonations at low and high altitudes;

4. Cratering, ground shock and debris effects on hardened systems and installations;

5. Air burst and underwater shock effects related to problems of antisubmarine warfare and modern ship structures.

As budgetary constraints grew tighter and tighter during this past year, the AEC and the Department of Defense felt compelled to revise the national nuclear test readiness program once again. Details of the revision are, of course, classified and the committee has not yet had an opportunity to thoroughly examine and evaluate the full impact of the budgetary reductions.

As I indicated earlier, I have invited the Secretary of Defense, the chairman of the Joint Chiefs of Staff, the chairman of the Atomic Energy Commission to appear before the committee and testify on the possible technological and political impacts of this decision. For that reason this report, as it pertains to Safeguard 3, must be considered tentative pending the completion of the hearing, which I hope to have some time during the early part of the next session.

SAFEGUARD 4—IMPROVEMENT OF OUR CAPABILITY TO MONITOR AND DETECT VIOLATIONS

Safeguard 4 requires the improvement of our capability within feasible and practical limits to monitor the terms of the treaty, to detect violations, and to maintain our knowledge of foreign nuclear activity, capabilities and achievements. The VELA program is a joint AEC/DOD program supervised by the DOD's Advanced Research Projects Agency. It is a research and development effort being jointly conducted to improve the U.S. capabilities for detecting, locating, and identifying nuclear detonations. The VELA program has three subprograms: VELA Uniform—detection of underground nuclear explosions, VELA Satellite—detection by satellites of nuclear explosions in space or in the atmosphere; and VELA Surface Based—detection of nuclear explosions in space by ground based equipments.

All of these subprograms are discussed and managed under Safeguard 4, but it should be noted that one of these subprograms, VELA Uniform, while it produces important information and gives us a capability to detect, locate and identify underground nuclear explosions and to research technical methods that could be used by other nations to evade detection or identification of underground nuclear explosions, does not contribute directly to the safeguards program of the Limited Test Ban Treaty. This capability might become much more significant in the event that the talks that started in Helsinki result in some agreement or that the United States and the Soviet Union should enter into treaties contemplating more comprehensive test prohibitions.

VELA UNIFORM—DETECTION OF UNDERGROUND NUCLEAR EXPLOSIONS

The seismic location capability is being improved by application of knowledge gained from a systematic study of all

factors affecting hypocenter determinations based on teleseismic data. Analysis of data available from recent studies indicates that if source bias can be effectively removed, then large events can be located within areas of only a few kilometers at high confidence. Investigation of source bias is being conducted through comprehensive evaluation of Long Shot as well as Nevada Test Site data. A working three-dimensional earth model computer program has been developed for evaluating the travel time effects of differing crustal and uppermantle structures on location accuracy. Preliminary analyses have been initiated to test new earth models which may lead to prediction of travel time anomalies (source bias) in uncalibrated regions.

The objective of the large array program is to develop and demonstrate the utility of larger rays and associated automated data processing techniques for detection and identification of small seismic events. To achieve this, three large arrays have been or are in process of being constructed and a seismic array analysis center has been established in Washington, D.C. The Montana array is complete. Construction on the large aperture Norwegian seismic array began in July 1968 and is expected to be completed by the end of this year. The Alaskan long-period array was begun in April 1969.

Another area of effort is to evaluate technical methods that might be used by other nations to evade seismic detection or identification of underground nuclear explosions. As with most of the other VELA uniform program, this effort is only incidentally associated with the safeguards to the Limited Test Ban Treaty but might take on increased importance in a more comprehensive test ban situation. The research program includes theoretical studies, laboratory research, and chemical and nuclear experiments.

VELA SATELLITE PROGRAM

The VELA Satellite subprogram, with its five successful launches in five attempts and long-lived payloads, is recognized in the field of space technology as a highly successful endeavor. All spacecraft except those from Launches I and II continue to function about as planned. Launch I spacecraft have been retired from active service in view of several factors: (1) Their more limited capability when compared to subsequent launches; (2) the cumulative effect of malfunctions which have decreased their capability; and (3) the undue burden placed on the spacecraft tracking and data handling facilities. The Launch II spacecraft, while functioning reasonably well, are not now being utilized on a routine basis because of the improved capabilities of Launches III, IV, and V.

CONCLUSION

To summarize the status of implementation of the safeguards program we can say that over the past year DOD and AEC have made satisfactory progress in protecting the national interest under the terms of the Limited Nuclear Test Ban Treaty. The underground test program continues to provide important information far beyond what was originally expected. The laboratories are vigorous and productive and, as a result, they are able to insure their vitality by retention and recruitment of high calibre technical and scientific staff. Safeguard No. 4 was adequately supported during the past year. It is only in the area of Safeguard No. 3—Readiness to Resume Testing in the Prohibited Environments—that budget constraints are being imposed which will result in degradation of the safeguards program. Whether this is the beginning of a change in emphasis or a justifiable adjustment of priorities which will still retain an acceptable level of readiness is a question into which the coming year will provide additional insights and on which the subcommittee intends to take additional testimony.

BILL OF RIGHTS DAY, HUMAN RIGHTS DAY—THE PRESIDENT AND THE BILL OF RIGHTS

Mr. KENNEDY. Mr. President, some of us have worried and wondered whether there is beginning a serious erosion of the rights and freedoms guaranteed to all Americans by our Constitution. Because reassurance from the executive branch on this score has been limited, or given only in the context of actions or statements which seem to contradict the assurances, it is especially gratifying to note that President Nixon last week expressed his—and the Nation's—continuing dedication to constitutional liberties and especially to the Bill of Rights. In proclaiming December 15 as Bill of Rights Day. The President pointed out that "the founders of our Republic had fought for individual liberty and for representative and responsible government," and that "In the first 10 amendments to the Constitution they sought to insure that the power of the Government would not abridge the rights of citizens." He stressed that "the Bill of Rights is the law of the land" and expressed the hope "that we may rededicate ourselves as a united people to the task of assuring to every person—regardless of his race, sex, creed, color, or place of national origin—the full enjoyment of his basic human rights."

This is an important message for today, especially since it comes from the President of the United States. So that all Members of Congress, as well as all those who carry out the President's policies, may appreciate his commitment to constitutional liberties and human rights, I ask that the proclamation proclaiming Bill of Rights Day and Human Rights Day be included in the RECORD.

There being no objection, the proclamation was ordered to be printed in the RECORD, as follows:

BILL OF RIGHTS DAY AND HUMAN RIGHTS DAY

(By the President of the United States of America)

A PROCLAMATION

One hundred seventy-eight years ago, the Bill of Rights was ratified and incorporated as part of the United States Constitution. The founders of our Republic had fought for individual liberty and for representative and responsible government. In the first ten amendments to the Constitution they sought to ensure that the power of the government would not abridge the rights of citizens.

More than twenty years ago, the United Nations General Assembly adopted the Universal Declaration of Human rights. The founders of the United Nations had endured a world war brought on by those who denied the rights of men to equality and justice and who abrogated the rights of nations to exist in peace.

The two documents—the Bill of Rights and the Universal Declaration of Human Rights—are close in spirit although widely separated in time. The Bill of Rights is the law of the land. The Universal Declaration is a statement of principles, of common standards of achievement for all peoples and all nations. We in the United States are engaged in unremitting efforts to give real meaning to these standards for every American, to assure to every person the full enjoyment of his basic rights.

Now, therefore, I, Richard Nixon, President of the United States of America, do hereby proclaim December 10, 1969, as Human Rights Day and December 15, 1969, as Bill of Rights Day, and call upon the people of the United States of America to observe the week of December 10–17, 1969, as Human Rights Week, to the end that we may rededicate ourselves as a united people to the task of assuring to every person—regardless of his race, sex, creed, color, or place of national origin—the full enjoyment of his basic human rights. Let us act so as to provide an example that will point the way in the struggle to promote respect for human rights throughout the world.

In witness whereof, I have hereunto set my hand this ninth day of December, in the year of our Lord nineteen hundred sixty-nine, and of the Independence of the United States of America the one hundred ninety-fourth.

RICHARD NIXON.

CONCERN ABOUT REMARKS OF SECRETARY OF STATE ROGERS ON MIDDLE EAST

Mr. CRANSTON. Mr. President, I am deeply concerned by Secretary of State Rogers' recent remarks on the Middle East situation. By calling for a balanced approach to this critical area of the world, he strongly implied that our past policies were unbalanced. That is not true.

The simple fact of the matter is that the United States of all the major powers has been the only one with a balanced Middle East policy. Time after time we have urged the Arabs to recognize the reality of the State of Israel, to sit down with Israel representatives to negotiate a true peace, and to allow for both sides freely to share and exchange in the wealth, resources, and progress of modern life.

The Secretary's remarks are being interpreted in diplomatic circles as being primarily directed toward moves Israel should make, especially returning territory overrun during the 1967 war. His speech was an ill-advised attempt to move Arab leaders closer toward peace. It has had precisely the opposite effect—it has hardened Arab resistance to a peaceful settlement. When the one major power with a sensible position on the Middle East crisis makes statements which seem to unhinge its heretofore firm policies, it is not at all surprising that the side being favored—the Arab side—becomes even more intransigent.

Where is the balance in this kind of a policy?

What sense does it make to urge Israel to withdraw from Arab territories—territories only occupied by Israel in self-defense—when there is absolutely no reason to believe the Arabs are prepared to accept the existence of Israel, to make peace with her, and to end Israel's concern for her own security?

As my colleagues know so well, there will never be peace in the Middle East until the parties to the conflict there are willing to become the parties to the peace. There must be a binding contractual agreement between Israel and her Arab neighbors, an agreement arrived at directly by the parties themselves—not imposed by outside powers.

I believe that in foreign policy as in domestic policy, actions speak louder than words. The actions of the Soviet Union in the Middle East speak for themselves. Almost $10 billion worth of Russian arms have been shipped into Arab countries in the last 12 years. Arab armies have been completely resupplied with modern jets, tanks, artillery, and missiles in the last 2 years. Soviet military instructors have swarmed into the area. And now, for the first time, Russian weapons are being shipped directly to various terrorist organizations. Also there has of late been an increase in intemperate attacks on United States and Israel policies in the Middle East in the Russian press.

The Soviet policy is simple: to radicalize the Arab world with arms and with rhetoric. The ostensible target is Israel; the real target is moderate Arab leaders and moderate Arab governments throughout the area. The Soviets have done nothing to demonstrate that they want peace in the Middle East. Apparently, they just want to keep the pot boiling.

Faced with this situation, the United States must react with patience and with firmness. We must counter Soviet arms shipments to the Arab world with military and economic assistance to Israel to enable her to maintain parity in arms and to sustain the continuing economic burden of continual military preparedness.

We must also continue to point out to our Arab friends that this dispute is no more in their interests than it is in the interests of Israel. Russian arms and military equipment cannot alleviate the population explosion in the United Arab Republic nor can they relieve the misery of the Palestinian refugees. Arab socialism and Arab unity will never be advanced by a holy war against Israel, nor will they be advanced by falling under the domination of Russia. America will see to it that Israel will always have the tools to defend herself. And each defeat will drive the Arab world deeper and deeper into the embrace of the Russian bear.

When the leaders of the Arab world realize that a permanent peace with Israel is in their interests and in the interests of their people, there will be a just settlement. Foreign Minister Eban has repeatedly said that all things are possible in a condition of peace.

Until a permanent peace comes we must not let our sensible long-term policies in the Middle East be nibbled away at by those who shortsightedly seek short-term tactical advantages there.

RETIREMENT OF DR. JOHN SLOAN DICKEY, PRESIDENT OF DARTMOUTH COLLEGE

Mr. McINTYRE. Mr. President, last week my alma mater, Dartmouth College, honored its president, John Sloan Dickey, who has announced his retirement.

Dr. Dickey has served as president for 25 years. During his tenure, this small men's liberal arts college in Hanover, N.H., has emerged as one of the leading academic institutions in the Nation. Dartmouth's stature today as one of the top colleges in the country is in no small part due to John Sloan Dickey's leadership, his dedication, and his imagination.

At a time when university officials throughout the land are being subjected to criticism from all sides, I offer a well deserved tribute to this fine educator.

I ask unanimous consent that an editorial entitled "The Dickey Years at Dartmouth," published in the Lebanon, N.H., Valley News, December 13, 1969, be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Lebanon (N.H.) Valley News, Dec. 13, 1969]

THE DICKEY YEARS AT DARTMOUTH

Whenever institutional cement has been allowed to set around curricula and administrators, campus dissent has taken explosive forms. And where internal rigidity has been combined with outside urban pressures, as at Harvard and Columbia, violence has verged on catastrophe

This may be one instance when Dartmouth's upstate location has been helpful. But geography does not confer immunity from disorder, (as the Parkhurst affair proved), and it is to John Sloan Dickey, honored today after 25 years at the helm of Dartmouth, that one must look for keeping this institution relatively loose and responsive to changing needs.

Scholastically, Dartmouth under Dickey came from behind in the Ivy League. From the first, Dickey recognized that there must be scholars as well as outstanding jocks on scholarship, and that the Big-Green-party-boy image must be replaced. So he set out, in his own words, to "compete with the best for the best".

By raising faculty compensation and instituting such benefits as faculty fellowships, Dickey directed the recruitment of a new team to replace one that was superannuated. Funds were also found to broaden opportunity for deserving but needy students.

For twenty years the campus was visited by persons of distinction from every area of endeavor who spoke of the great issues of our times for the benefit of seniors. Dartmouth's Public Affairs Center, with its emphasis on participation in public life, from Senatorial offices to those of local town managers, was an outgrowth of this 1947 Dickey innovation.

In 1954 Dickey persuaded the trustees to study what the college should accomplish in the fifteen years remaining before its bicentennial. Doctoral programs under the faculty of Arts and Sciences were re-instituted, and deliberately kept small so that Dartmouth would have, in the president's words, "an undergraduate educational operation worthy of celebration as she moved from her second to her third century".

In turn, the fourth oldest medical school in the nation was reconstituted to take greater advantage of its proximity to the regional medical facilities of the Mary Hitchcock Memorial Hospital and, most recently, to provide more physicians and better medicine through a shortened and sharpened MD degree program. Two other professional schools, Thayer and Tuck, received essential encouragement.

The most dramatic innovations, the Hopkins Center and the time-sharing concept of computer usage, underlined Dartmouth's transition from a provincial institution to one with concern for the whole man and woman, outside as well as inside the academic community. And perhaps the most "relevant" programs on and off campus are those developed under the Tucker Foundation, inspired by President Dickey, and named after William Jewett Tucker, the last of Dartmouth's minister leaders. The idea behind ABC, A Better Chance, came to the president following discussion in 1964 with preparatory school headmasters over the needs of disadvantaged youngsters in the secondary school level.

Most recently Dickey insisted that the merits of the black demands for an Afro-American program on campus be examined. "No white man," (said JSD), "no matter how hard he tries, can understand the burdens black Americans carry from 100 years of discrimination on top of 200 years of slavery".

As John Sloan Dickey prepares to retire in the countryside he loves, he leaves with the satisfaction that Dartmouth is no longer a small parochial voice in the wilderness. Thanks to his quarter century of responsive leadership, the numbers of those who love her are now legion. And as his door was always open to anyone who sought his counsel, so the doors of a grateful community will always be open to him.

SUPPORT FOR FUNDS TO IMPLEMENT COAL MINE HEALTH AND SAFETY ACT GIVEN BY CHAIRMAN CARL PERKINS OF HOUSE LABOR COMMITTEE

Mr. RANDOLPH. Mr. President, last night, during the consideration of the supplemental appropriations bill, 1970, I offered for myself and the junior Senator from Pennsylvania (Mr. SCHWEIKER) amendments to add to that measure $25 million for expenses necessary to improve health and safety in the Nation's coal mines—$10 million for the Department of Health, Education, and Welfare and $15 million for the Department of the Interior. We are grateful that the amendments were agreed to and that the Senate followed this action by agreeing also to the conference report on the new Federal Coal Mine Health and Safety Act, which now needs only affirmative action by the President of the United States to become law.

I desire at this time to officially recognize that, through inadvertence, we failed in our discussion of the need for the appropriations addition to bring to attention and place in the legislative record a communication by the distinguished chairman of the House Committee on Education and Labor, the Honorable CARL D. PERKINS of Kentucky, relating to the funding essential to provide for payments incident to black lung disease, for health research and medical examinations, for coal mine safety research, and for coal mine health and safety enforcement.

Chairman PERKINS' letter to the distinguished chairman of our Appropria-

tions Committee, Mr. RUSSELL, with copies to the Senators from West Virginia, is of vital importance to the legislative history in support of the amendments agreed to. The able Representative from Kentucky was chairman of the House-Senate conference and submitted conference report No. 91–761 to accompany S. 2917, the bill to improve the health and safety conditions of persons working in the coal mining industry of the United States. Chairman PERKINS provided outstanding leadership, along with his subcommittee chairman, Representative JOHN DENT, of Pennsylvania, on the legislation in the other body, and he presided with dispatch and fairness over the remarkable achievement of the conference in agreeing to report the complex measure following a single day of meeting and working diligently and amicably in that conference.

Again, I highly commend the services performed for the Nation, and especially for the coal miners, by those leaders and their colleagues from the House. And our colleagues in this body, led by Chairman RALPH YARBOROUGH of our Committee on Labor and Public Welfare, and Chairman HARRISON WILLIAMS of New Jersey, chairman of the Subcomittee on Labor, are deserving of praise for persevering on this measure to a fruitful conclusion. In my 25 years of service in the Congress, rarely have I observed and worked at the side of a colleague who devoted as much time and expended as much effort with diligence, patience, and intelligence as did Senator WILLIAMS of New Jersey in presiding over hearings and subcommittee sessions and in Senate management of the Coal Mine Health and Safety Act of 1969. He is deserving of a special tribute, as is the ranking minority member of our Labor Subcommittee and its parent Committee on Labor and Public Welfare, the senior Senator from New York (Mr. JAVITS), who likewise devoted an inordinate amount of time and energy with acumen to the development of the landmark health and safety legislation. The untiring and intelligent performances by the members of staffs of the Labor Committee and Senate members of the committee deserve special recognition and I commend them.

Mr. President, I ask unanimous consent to have printed in the RECORD the December 18, 1969, letter from Chairman PERKINS of the House Committee on Education and Labor to Chairman RICHARD B. RUSSELL of the Senate Committee on Appropriations, concerning appropriations to implement actions under the Federal Coal Mine Health and Safety Act of 1969.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON EDUCATION AND LABOR,
December 18, 1969.

HON. RICHARD B. RUSSELL,
Chairman, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: As you know, last night the House of Representatives passed the landmark conference report on the Federal Coal Mine Health and Safety Act of 1969.

I, and I am sure you, too, are quite anxious to see that there is no delay in implementing this important legislation to protect our Nation's miners and to provide needed benefit payments to those miners afflicted with pneumoconiosis, commonly called, "Black Lung" disease, and their widows.

I have consulted with the two Departments concerned in administering this Act, namely Interior and Health, Education, and Welfare, and I find that the following amounts are needed for the remainder of this fiscal year to get this program off the ground:

To Health, Education and Welfare:

(a) Black Lung Payments—$7 million to develop standards by April 1, 1970 and to pay initial claims filed between that date and July 1, 1970.

(b) Health Research and medical examinations—$3.5 million (a portion of this sum will be reimbursed).

To Interior:

(a) Safety Research—$8 million.

(b) Health and Safety Enforcement—$7 million.

I note that your committee approved the fiscal supplemental appropriations bill for this fiscal year for floor action today. I strongly urge you to amend this bill to include the above sums so we can get immediate action by these departments in helping the miners and their families. I assure you that, once included in the Senate, I will work actively in the House to gain acceptance.

I appreciate your kind consideration of this matter which is of critical importance to many people in Kentucky, West Virginia, Virginia, Pennsylvania, and other coal producing states.

With warmest regards.

Sincerely,

CARL D. PERKINS,
Chairman.

THE LAPEER COUNTY COURTHOUSE

Mr. HART. Mr. President, the American Bar Association has for some time featured courthouses of unusual architectural interests on the cover of its monthly journal. The November cover pictures the Lapeer County Courthouse, the oldest courthouse still in use in Michigan.

The journal has an interesting article about the history of the courthouse and the efforts of the Lapeer County Press in preserving it.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MICHIGAN'S OLDEST

Mark Twain's remark that the report of his death was an exaggeration may be applied to the courthouse on our cover this month—the Lapeer County Courthouse. For through the years it has been considered a wreck, or a disgrace or just plain falling down, and it has been threatened with extinction, destruction or replacement. Yet it stands today, perhaps in better condition than it has ever been, on Nepessing Street in Lapeer, Michigan, a thriving little city in southeastern Michigan, proudly bearing the mantle of the oldest courthouse in Michigan still in use.

The courthouse, constructed in 1839, was the product of a feud that proved profitable for the residents of Lapeer. The first settler of Lapeer, A. N. Hart, got into a fuss with the second settler, J. R. White, who arrived a few days later—a fuss that a later Lapeer County history described as "more or less bitter". By 1839 Hart and White, both of whom were lawyers, each had built a courthouse and offered it to the public. Hart won what was called the "Courthouse War" when the board of supervisors bought his building for $3,000, although it had cost him $10,000 to erect it. White's courthouse became the Lapeer Academy and later the town's high school. Everyone was happy about the war.

Time and wear and tear took their toll, for by 1879 a committee of the board of supervisors sadly noted that the "courthouse is fast going to decay on account of the crumbling of the walls and poor condition of the underpinning". The committee also observed that, "The yard around the courthouse is in a dirty and filthy condition by reason of cattle being allowed to run therein." The cows were chased away and the building moved to a new foundation.

In 1887 a supervisor from Imlay City, a town that aspired to the status of Lapeer County seat, charged that the county buildings were a "shame and a disgrace" and said Imlay City was prepared to spend $50,000 for a new courthouse, if, of course, it were located in Imlay City. But this move was defeated.

By the 1960s the building had fallen into disrepair again. It had not been painted since before World War II, and the paint was peeling. It was stained from rusted pipes; it had dirty windows; the yard was weedy; the heating system was erratic. The move for rejuvenation and restoration was led by the *Lapeer County Press*, which offered money for an architectural survey of the building. This showed that the building was structurally sound, and a restoration fund was established. The *Press* sponsored what was described as the "biggest dance ever held in the county", the paper paying all the expenses and half the proceeds going to the fund. The board of supervisors allocated funds, but unfortunately the restoration was not completed.

A brand new building to house the county offices has been built behind the old courthouse, now 130 years old. But many of the citizens of Lapeer County now realize they have a jewel in their midst, and they are determined to protect and cherish it. If they have their way, the Lapeer County Courthouse will last another hundred years.

HARTFORD COMMON COUNCIL APPEALS ON BEHALF OF SOVIET JEWS

Mr. DODD. Mr. President, all people and all religions are persecuted under communism. But for some reason the Communist regimes in the Soviet Union and other countries have singled out the Jewish people for special persecution.

They are villified in the press in terms reminiscent of Nazi propaganda; but they are denied the right to defend themselves.

They are barred from many positions and made to feel unwanted in a hundred different ways; but they are denied the right to emigrate from the Soviet Union to Israel or other countries.

Their religion is dying in the most literal sense because the Soviet Union for several decades now has maintained a near total ban on the publication of Hebrew religious books and on Jewish theological seminaries.

These facts have become widely known in recent years and have resulted in many protests.

I believe that the American attitude toward Soviet treatment of her Jewish citizens was most eloquently expressed in a recent resolution adopted by the court of common council of the city of Hartford, Conn.

The resolution wound up by appealing to the Soviet Government "to restore to Soviet Jews their full rights and to grant to those who wish to leave the right to be reunited with wartorn families and to join their brethren in other countries, whether in Israel or in other countries."

Mr. President, I ask for unanimous consent to have printed in the RECORD the full text of the resolution adopted by the court of common council of the city of Hartford on December 8, 1969.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

CITY OF HARTFORD,
Hartford, Conn., December 10, 1969.

RESOLUTION

This is to certify that at a meeting of the Court of Common Council, December 8, 1969, the following resolution, sponsored by all members of the Council of the City of Hartford, Connecticut, was passed unanimously.

Whereas, Chanukah, the Festival of Lights, is being celebrated by Jews throughout the world from December 4, 1969 through December 12, 1969; and

Whereas, This year the world-wide commemoration of the adoption of the Universal Declaration of Human Rights—a contemporary proclamation against tyranny—coincides with Chanukah, an ancient victory over oppression; and

Whereas, It is fitting that as we commemorate Human Rights Day, we give thought to the situation of more than three million Jews in the Soviet Union, the largest Jewish community in the world outside the United States, who are denied the fullest means of religious and cultural self-expression based on the rights guaranteed them by Soviet Law; now, therefore, be it

Resolved, That the Court of Common Council hereby appeals to the Government of the Soviet Union to restore to Soviet Jews their full rights and to grant to those who wish to leave the right to be reunited with war-torn families and to join their brethren in other countries, whether in Israel or in other countries.

ROBERT J. GALLIVAN,
City Clerk.

EXPENDITURE REFORM NEEDED EVEN MORE THAN TAX REFORM

Mr. GRIFFIN. Mr. President, in a recent column, entitled "John S. Knight's Notebook," Mr. Knight emphasized that expenditure reform is needed even more than tax reform.

While Senators may not agree with Mr. Knight's comments, I am sure there will be no dissent regarding his tribute in the same column to two of the Senate's most distinguished Members—Senator SPESSARD L. HOLLAND, of Florida, and Senator JOHN J. WILLIAMS, of Delaware.

Mr. President, I ask unanimous consent that these parts of Mr. Knight's column, published in the Detroit Free Press of Sunday, December 14, 1969, to which I have referred, be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

EXPENDITURE REFORM IS NEEDED EVEN MORE THAN TAX REFORM

It was not so many years ago that Lyndon Johnson was taking pride in his ability to hold the federal budget under $100 billion.

"I'm going to keep it lower than Kennedy's," he told me in December of 1963.

While this hope was never fully realized, it was not until 1966 that the federal administrative budget rose above the $100 billion mark. As late as fiscal 1961, the unified budget, which includes trust funds, had only been $97.8 billion.

Now comes Arthur Burns, presidential counsellor and soon to become chairman of the Federal Reserve, with a prediction that the federal budget will total more than $200 billion in the next fiscal year.

Mr. Burns reminds us that the budget has grown as much in the last nine years as it did in nearly two centuries of the republic's history. He says that while much of the increase has been attributed to the Vietnam war, "the fact is that civilian programs are the preponderant cause" of the growth in spending.

And Mr. Burns really gets to the heart of the matter when he observes that "the need for expenditure reform may be even greater than the need for tax reform."

Unhappily Congress and the American people are traveling in an opposite direction.

For years we have been brainwashed with the nonsense that since America is the richest nation in the world, we can afford everything. Yet the facts are all to the contrary.

There is a limit to the sums of money that can be raised by taxation to cover both the essential needs of government and the ill-considered forays into unprecedented prodigality.

Yet we blithely pursue the course of fiscal irresponsibility when all economic indicators signal a turn to fiscal discipline.

In 1966, the need for a tax increase was clearly indicated when federal outlays were on a sharply rising trend. But President Johnson, when advised that more money would be required to pay for the Vietnam war and his Great Society programs, thought otherwise. The result was a $25 billion deficit for the fiscal year 1968.

Highly expansive monetary and credit policies of the past three years have brought inflation and high price levels. The Nixon administration is attempting to apply corrective measures which Chairman Paul W. McCracken of the President's Council of Economic Advisers believes will eventually "cool off overheated economic conditions."

Meanwhile Congress is playing politics with a "Christmas tree" tax reform bill designed to win votes with highly inflationary boosts in personal exemptions and Social Security benefits.

When the resultant loss in revenues of approximately $9 billion is added to another $12 billion drop beginning in mid-year as the 10 percent surcharge expires, another huge deficit is in prospect unless halted by a presidential veto.

As Dr. McCracken points out, "we revel in larger incomes and a growing economy. But as incomes rise, aspirations also rise and the visible list of unmet demands for the family, the city, the state or the nation never seems to get shorter."

In other words, we live in an undisciplined society which pursues its own selfish ends without thought of sacrifice or fear of the future.

President Nixon's opposition in Congress is making a cynical play or votes in the forthcoming election year.

If he vetoes the tax bill as rewritten by the Senate-House conference committee, his opponents will charge him with ignoring human needs. If he allows it to become law, the nation suffers another setback to fiscal stability.

Mr. Nixon's choice is clear. With inflation as the nation's most plaguing problem, he must stand against the woolly-headed legislators who are inviting more of it in the future.

THE NATION'S LOSS

Speaking of the Senate, Florida's Spessard L. Holland and Delaware's John J. Williams will not seek re-election at the expiration of their present terms.

Spessard Holland is a courtly legislator of conservative persuasions who nevertheless led the successful fight for abolition of the discriminatory poll tax.

He served his state admirably as governor in the war years and brought about needed tax reforms and support for public education. Spessard Holland won the Distinguished Service Cross as a member of our fledgling Air Corps in World War I.

In Florida and Washington, the Senator is known for his integrity, his tolerance of opposing opinion and great strength of character.

Sen. John J. Williams of Delaware is sometimes called the "conscience of the Senate."

His relentless digging and probing into dubious practices and governmental waste have brought him an enviable reputation as one of our most useful public servants.

Sen. Williams finds the tax bill passed by the Senate a "cruel hoax" on the public.

Sens. Holland and Williams are a cut apart from the new breed of legislators who think more of public posturing than the substance of what they say and do.

The nation is greatly in their debt.

RETIREMENT OF JUSTICE SAMUEL LEIBOWITZ—GIL HODGES PLAYING FIRST BASE

Mr. KENNEDY. Mr. President, last Monday, Justice Samuel S. Leibowitz, one of America's great judges, formally announced his retirement. Justice Leibowitz came to the bench of the New York State Supreme Court in Brooklyn nearly 30 years ago, after a distinguished career as one of the Nation's best known defense attorneys.

An article published last Tuesday in the New York Times records the eloquent tributes paid to Justice Leibowitz at the retirement ceremony by his colleagues, and captures much of the judge's warmth and his strong and colorful personality. As one of his fellow judges put it, Justice Leibowitz was a "tough judge," but he was tough only on those who demanded toughness.

Justice Leibowitz' 76 years belie the youth, and vitality, the broad interests and solid Brooklyn background he always displayed both on and off the bench. As he said last Monday in discussing his retirement:

I feel young enough so that it seems like its summer, and Gil Hodges is playing first base in Ebbetts Field.

There are others who will record better than I the many highlights of Justice Leibowitz' long and distinguished career. But I cannot let this occasion pass without remarking briefly on what he regards as the proudest moment of his career, his role as unpaid defense attorney for the Scottsboro boys in one of the great cases in American constitutional history, and one of the principal cornerstones of the meaning of due process of law and equal protection of the laws in our Constitution.

None of us who recalls the Scottsboro case from law school, or who has come to know it subsequently in this Chamber in the course of our debates on law enforcement, civil rights, and neighborhood legal services, can fail to have deep respect for the talent and perseverance of Justice Leibowitz. In this time of continuing controversy over these issues, it

is worth recalling the history of that celebrated case, since it is one of the landmarks on the road we have traveled to equal justice for all our citizens.

A brief description of the Scottsboro case is given by Louis H. Pollak, dean of the Yale Law School, in his recent anthology, "The Constitution and the Supreme Court, a Documentary History," and much of the remarks that follow are adapted from Dean Pollak's excellent commentary. The case is also the subject of a newly published book "Scottsboro, a Tragedy of the American South" by Dan T. Carter.

As Dean Pollak states, the Scottsboro case draws its name from the town of Scottsboro, Ala. There, in 1931, nine Negro youths—two of them boys of 13 and 14—were charged with raping two white prostitutes, who were fellow passengers on a freight train. Eight of the youths were found guilty and sentenced to death. One conviction was set aside by the Alabama Supreme Court. The seven remaining convictions were reviewed by the U.S. Supreme Court, which reversed the convictions on the ground that the defendants had not been adequately represented by counsel at their mass trial. See *Powell* v. *Alabama*, 287 U.S. 45 (1932).

It was at this point that Mr. Leibowitz entered the case. He appeared as defense counsel for the defendants at their second trial, and he remained in the case throughout its tortuous subsequent history. Two of the defendants were retried, and the Supreme Court again reviewed the ensuing death sentences. The Court once again reversed, this time on the ground that Negroes had been systematically excluded from both the grand jury and the trial jury. See *Norris* v. *Alabama*, 294 U.S. 587 (1935); *Patterson* v. *Alabama*, 294 U.S. 600 (1935).

Subsequently, the State of Alabama dropped the rape charges against five of the nine youths, although one of them later pleaded guilty to stabbing a sheriff. But, in 1936 and 1937, the other four youths were retried and convicted. Three of the four received long jail sentences, and the fourth received a death sentence, which was later commuted to life imprisonment. Three of the four were later paroled. The fourth, Haywood Patterson—with whom Mr. Leibowitz is pictured in a photograph accompanying the Times article on his retirement, escaped, and died in 1952 in a Michigan prison, where he was under sentence for manslaughter.

As many experts have stated, there is good reason to believe that the defendants in the Scottsboro case were guilty only of being members of a mistreated minority, not of the offenses charged. The case reflects local American criminal justice at its worst. It is not representative of the way American criminal procedure works in the ordinary case.

At the same time, the Scottsboro case is symptomatic of what can happen when constitutional limitations break down. And one of the Supreme Court's great accomplishments in the three decades since the case caused grave national and international concern has been to move forward aggressively, in a long series of relatively unnoticed criminal cases, to promulgate new and more rigorous constitutional standards.

To many experts, the Court's initial intervention in the Scottsboro case is the starting point for the Court's new vigilance in vindicating the guarantee of "due process of law," and much of the credit for launching the Court on this path rightfully belongs to Mr. Leibowitz.

The first time the Scottsboro case reached the Supreme Court, the dominant question was whether the lawyers assigned to represent the defendants at their trial had furnished their young and unlettered clients anything more than token legal representation. The Supreme Court, in an opinion written by the deeply conservative and deeply conscientious Justice George Sutherland of Utah examined the question of whether the defendants had been represented by counsel in any meaningful sense. Finding the answer to be in the negative, Justice Sutherland then addressed himself to the question of whether, at least in some circumstances, the due process clause of the 14th amendment required the State to furnish counsel. The fact that the Federal Bill of Rights required the Federal Government to accord due process, and also specifically guaranteed the accused a lawyer in a Federal criminal trial did not deter Justice Sutherland from reading "due process" in the 14th amendment to include, at least in capital cases, the right to assistance of counsel. Thereby, the Court took a major step on the path of "incorporating" fundamental rights into the 14th amendment.

The second time the Scottsboro case reached the Supreme Court, the issue was whether Negroes had been unfairly excluded from the grand jury and the trial jury. Mr. Leibowitz argued the case in the Supreme Court, the first time he had ever appeared before that Court. In the course of his argument, Mr. Leibowitz noted that Alabama law did not on its face exclude Negroes from jury service, but insisted that there was a long and unbroken tradition of systematic exclusion throughout the State. One of the questions in the case concerned whether the names of Negroes had been forged on jury rolls offered as exhibits by the State. During his oral argument before the Justices of the Supreme Court, Mr. Leibowitz declared that the jury rolls were fraudulent, and that the fraud had been perpetrated not only on the defendants in the case but on the U.S. Supreme Court itself.

At this point, in one of the most dramatic moments in the history of the Supreme Court, Chief Justice Charles Evans Hughes interrupted Mr. Leibowitz and asked him whether he could prove the forgery. Mr. Leibowitz produced the jury rolls and offered them for the inspection of the Court. One by one, each of the Justices examined the names in questions under a magnifying glass, while Mr. Leibowitz explained the mechanics of the forgery. Later, Mr. Leibowitz learned that this was the first time in its history that the Supreme Court had allowed such an exhibit to be brought into the Court, since the Court deals almost solely with question of law, not questions of fact like the existence of forgery.

Subsequently, in vindicating the position argued by Mr. Leibowitz and reversing the defendants' convictions, Chief Justice Hughes held that the systematic exclusion of Negroes from jury service had deprived the Negro defendants of their right to the equal protection of the laws under the Constitution. "The question in the case," said the Chief Justice, "was not so much the principle, but the facts: That the question is one of fact," he said, "does not relieve us of the duty to determine whether in truth a Federal right has been denied."

Mr. President, I ask unanimous consent that the New York Times article on Justice Leibowitz, to which I referred, be printed in the RECORD. In addition, since much of the atmosphere of the Scottsboro case is set out in Justice Sutherland's opinion for the Supreme Court in Powell against Alabama, I ask unanimous consent that an excerpt from the opinion be printed in the RECORD. I also ask unanimous consent that the Court's opinion in Norris against Alabama, to which Justice Leibowitz contributed so much, be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 16, 1969]

A "TOUGH JUDGE" MELLOWS ON HIS RETIREMENT

(By Paul L. Montgomery)

Justice Samuel S. Leibowitz heard his last "Oyez" yesterday at a tearful retirement ceremony in State Supreme Court in Brooklyn.

The hot-tempered 76-year-old judge, who moved to the bench 29 years ago after a mercurial career that included defending Al Capone and the Scottsboro Boys, fought for speech for one of the few times in his life when he arose to address the gathering who had come to pay him tribute.

"There are few times a man is bereft of words to express the feelings that are in his heart," Justice Leibowitz said, peering out over the courtroom.

There was absolute silence in the court, filled with 30 of his colleagues on the bench and a lunch-hour crowd of courtroom veterans.

There was a moment when he tried to go on, and couldn't. Then the man who was known as one of the toughest judges the city has seen reached under his robe for a handkerchief to dry his eyes. At last, he went on.

"I've lived a million lives in my time," he said. "How can I say good-by. It's like ringing down a curtain on a person's life.

"They say old soldiers never die, they just fade away. Well, when this old soldier dies it will be decided by the Chief Justice in Heaven, but the old soldier must decide for himself whether he fades away. As long as God Almighty gives me the strength, I don't propose to fade away. I propose to serve the cause of justice as long as I am able."

TRIBUTES ARE SPOKEN

The judge looked over at his wife of 50 years, who sat weeping in a corner of the hushed courtroom.

"They spoke of me as a tough judge," he said. "Well, Belle can tell you how nights went by when I tossed in bed until dawn trying to figure out what to do with the poor devil to be sentenced in the morning."

Four of Justice Leibowitz's colleagues in Supreme Court—Anthony J. DiGiovanna, Murray H. Pearlman, John R. Starkey and John E. Cone—spoke in tribute to him.

"This is an unprecedented occasion," said Justice DiGiovanna. "In my 21 years on the

Supreme Court and 40 years in public life I have never heard of a ceremonial meeting of the justices such as this."

Justice Starkey recalled how Justice Leibowitz used to handle 450 or 500 cases a year on the old Kings County Court.

"Sam was only tough on those who demanded toughness," he said. "We didn't have many recidivists from Sam Leibowitz."

The audience, recalling the 30- or 60-year sentences he used to mete out to muggers and stick-up artists, laughed for the only time in the ceremony.

When it was over, court attendants and guards crowded around to wish Justice Leibowitz well in his retirement. Under the law, justices may be reappointed for three two-year terms after they pass their 70th birthday. Dec. 31 marks the end of Justice Leibowitz's third extra term.

Justice Leibowitz said he would join the faculty of the Practicing Lawyers' Institute, and give lectures at law schools on trial techniques. He will also be a counsel with the Manhattan law firm of Jacob D. Fuchsberg, who served as Mario A. Procacino's campaign manager in the recent mayoral election.

Before his election as a judge, Justice Leibowitz had made a reputation as one of the country's leading trial lawyers. Of 140 clients tried for first-degree murder, only one was sent to the electric chair.

In an interview in his chambers yesterday after the ceremony, he attributed his later toughness on the bench to his early association with criminals.

"For 22 years I lived with them all—Scarface Capone, all of them," he said. "I know what you do with a dangerous snake. [If] you couldn't take the fangs out, at least you put him away where he can't bite anybody."

Justice Leibowitz said one improvement would be to permit conjugal visits in prisons, something that is allowed now only in Mississippi. "You keep a man in prison away from women, you tear his insides out, you make him a shell," he said.

The judge said that, in his long career, he was proudest of his participation in the Scottsboro Case. As the unpaid defense attorney for nine black Alabama youths accused in 1931 of raping two white prostitutes, he won new trials for them by showing before the Supreme Court that blacks were systematically excluded from Alabama juries.

"If there's anything else I can take to my grave, it's that I got the first black man on a jury in the South in the history of the United States," he said.

By mid-afternoon, Justice Leibowitz had regained the peppery form that won him the enmity of defendants, lawyers and even some of his colleagues on the bench. The judiciary committee of the Association of the Bar of the City of New York opposed his reappointment in 1963 on the ground that he showed "habitual arrogance and discourtesy to lawyers and litigants." He was reappointed anyway.

Justice Leibowitz was asked if he felt old.

"I feel young enough so that it seems like it's summer, and Gil Hodges is playing first base in Ebbetts Field," he said.

Someone asked him what he would do with his robe now that he had retired.

"Who the hell knows," he retorted. "They'll probably bury me in it."

POWELL v. ALABAMA, 287 U.S. 45 (1932)

Mr. Justice Sutherland delivered the opinion of the Court.

These cases were argued together and submitted for decision as one case.

The petitioners, hereinafter referred to as defendants, are negroes charged with the crime of rape, committed upon the persons of two white girls. The crime is said to have been committed on March 25, 1931. . . .

. . . [T]he defendants were tried in three . . . groups. . . . Each of the three trials was completed within a single day. Under the Alabama statute the punishment for rape is to be fixed by the jury, and in its descretion may be from ten years imprisonment to death. The juries found defendants guilty and imposed the death penalty upon all. . . .

In this court the judgments are assailed upon the grounds that the defendants, and each of them, were denied due process of law and the equal protection of the laws, in contravention of the Fourteenth Amendment, specifically as follows: (1) they were not given a fair, impartial and deliberate trial; (2) they were denied the right of counsel, with the accustomed incidents of consultation and opportunity of preparation for trial; and (3) they were tried before juries from which qualified members of their own race were systematically excluded. These questions were properly raised and saved in the courts below.

The only one of the assignments which we shall consider is the second, in respect of the denial of counsel; and it becomes unnecessary to discuss the facts of the case or the circumstances surrounding the prosecution except in so far as they reflect light upon that question.

The record shows that on the day when the offense is said to have been committed, these defendants, together with a number of other negroes, were upon a freight train on its way through Alabama. On the same train were seven white boys and the two white girls. A fight took place between the negroes and the white boys, in the course of which the white boys, with the exception of one named Gilley, were thrown off the train. A message was sent ahead, reporting the fight and asking that every negro be gotten off the train. The participants in the fight, and the two girls, were in an open gondola car. The two girls testified that each of them was assaulted by six different negroes in turn, and they identified the seven defendants as having been among the number. None of the white boys was called to testify, with the exception of Gilley, who was called in rebuttal.

Before the train reached Scottsboro, Alabama, a sheriff's posse seized the defendants and two other negroes. Both girls and the negroes then were taken to Scottsboro, the county seat. Word of their coming and of the alleged assault had preceded them, and they were met at Scottsboro by a large crowd. It does not sufficiently appear that the defendants were seriously threatened with, or that they were actually in danger of, mob violence; but it does appear that the attitude of the community was one of great hostility. The sheriff thought it necessary to call for the militia to assist in safeguarding the prisoners. . . . Soldiers took the defendants to Gadsden for safekeeping, brought them back to Scottsboro for arraignment, returned them to Gadsden for safekeeping while awaiting trial, escorted them to Scottsboro for trial a few days later, and guarded the court house and grounds at every stage of the proceedings. It is perfectly apparent that the proceedings, from beginning to end, took place in an atmosphere of tense, hostile and excited public sentiment. During the entire time, the defendants were closely confined or were under military guard. The record does not disclose their ages, except that one of them was nineteen; but the record clearly indicates that most, if not all, of them were youthful, and they are constantly referred to as "the boys." They were ignorant and illiterate. All of them were residents of other states, where alone members of their families or friends resided.

However guilty defendants, upon due inquiry, might prove to have been, they were, until convicted, presumed to be innocent. It was the duty of the court having their cases in charge to see that they were denied no necessary incident of a fair trial.

First: the record shows that immediately upon the return of the indictment defendants were arraigned and pleaded not guilty. Apparently they were not asked whether they had, or were able to employ, counsel, or wished to have counsel appointed; or whether they had friends or relatives who might assist in that regard if communicated with. . . .

April 6, six days after indictment, the trials began. When the first case was called, the court inquired whether the parties were ready for trial. The state's attorney replied that he was ready to proceed. No one answered for the defendants or appeared to represent or defend them. Mr. Roddy, a Tennessee lawyer not a member of the local bar, addressed the court, saying that he had not been employed, but that people who were interested had spoken to him about the case. He was asked by the court whether he intended to appear for the defendants, and answered that he would like to appear along with counsel that the court might appoint. The record then proceeds:

"The Court: If you appear for these defendants, then I will not appoint counsel; if local counsel are willing to appear and assist you under the circumstances all right, but I will not appoint them

"Mr. Roddy: Your Honor has appointed counsel, is that correct?

"The Court: I appointed all the members of the bar for the purpose of arraigning the defendants and then of course I anticipated them to continue to help them if no counsel appears.

"Mr. Roddy: Then I don't appear then as counsel but I do want to stay in and not be ruled out in this case.

"The Court: Of course I would not do that——

Mr. Roddy: I just appear here through the courtesy of Your Honor.

"The Court: Of course, I give you that right; . . ."

And then apparently addressing all the lawyers present, the court inquired:

". . . well are you all willing to assist?

"Mr. Moody: Your honor appointed us all and we have been proceeding along every line we know about it under Your Honor's appointment.

"The Court: The only thing I am trying to do is, if counsel appears for these defendants I don't want to impose on you all, but if you feel like counsel from Chattanooga—

"Mr. Moody: I see his situation of course and I have not run out of anything yet. Of course, if Your Honor proposes to appoint us, Mr. Parks, I am willing to go on with it. Most of the bar have been down and conferred with these defendants in this case; they did not know what else to do.

"The Court: The thing, I did not want to impose on the members of the bar if counsel unqualifiedly appears; if you all feel like Mr. Roddy is only interested in a limited way to assist, then I don't care to appoint—

"Mr. Parks: Your Honor, I don't feel like you ought to impose on any member of the local bar if the defendants are represented by counsel.

"The Court: That is what I was trying to ascertain, Mr. Parks.

"Mr. Parks: Of course if they have counsel, I don't see the necessity of the Court appointing anybody; if they haven't counsel, of course I think it is up to the Court to appoint counsel to represent them.

"The Court: I think you are right about it Mr. Parks and that is the reason I am trying to get an impression from Mr. Roddy.

"Mr. Roddy: I think Mr. Parks is entirely right about it, if I was paid down here and employed, it would be a different thing, but I have not prepared this case for trial and have only been called into it by people who are interested in these boys from Chattanooga. Now, they have not given me an opportunity to prepare the case and I am not familiar with the procedure in Alabama, but I merely came down here as a friend of the people who are interested and not as paid counsel, and certainly I haven't any money to pay them and nobody I am interested in had me to come down here has put up any fund of money to come down here and pay

counsel. If they should do it I would be glad to turn it over—a counsel but I am merely here at the solicitation of people who have become interested in this case without any payment of fee and without any preparation for trial and I think the boys would be better off if I step entirely out of the case according to my way of looking at it and according to my lack of preparation of it and not being familiar with the procedure in Alabama. . . ."

Mr. Roddy later observed:

THE CONSTITUTION AND THE SUPREME COURT

"If there is anything I can do to be of help to them, I will be glad to do it; I am interested to that extent.

"The Court: Well gentlemen, if Mr. Roddy only appears as assistant that way, I think it is proper that I appoint members of this bar to represent them, I expect that is right. If Mr. Roddy will appear, I wouldn't of course, I would not appoint anybody. I don't see, Mr. Roddy, how I can make a qualified appointment or a limited appointment. Of course, I don't mean to cut off your assistance in any way—Well gentlemen, I think you understand it.

"Mr. Moody: I am willing to go ahead and help Mr. Roddy in anything I can do about it, under the circumstances.

"The Court: All right, all the lawyers that will; of course I would not require a lawyer to appear if—

"Mr. Moody: I am willing to do that for him as a member of the bar; I will go ahead and help do anything I can do.

"The Court: All right."

And in this casual fashion the matter of counsel in a capital case was disposed of.

* * * * *

. . . [T]he trials immediately proceeded. the defendants, young, ignorant, illiterate, surrounded by hostile sentiment, haled back and forth under guard of soldiers, charged with an atrocious crime regarded with especial horror in the community where they were to be tried, were thus put in peril of their lives within a few moments after counsel for the first time charged with any degree of responsibility began to represent them.

It is not enough to assume that counsel thus precipitated into the case thought there was no defense, and exercised their best judgment in proceeding to trial without preparation. Neither they nor the court could say what a prompt and thoroughgoing investigation might disclose as to the facts. No attempt was made to investigate. No opportunity to do so was given. Defendants were immediately hurried to trial. . . . Under the circumstances disclosed, we hold that defendants were not accorded the right of counsel in any substantial sense. To decide otherwise, would simply be to ignore actualities. . . .

* * * * *

The fact that the right involved is of such a character that it cannot be denied without violating those "fundamental principals of liberty and justice which lie at the base of all our civil and political institutions" (Hebert v. Louisiana, 272 U.S. 312, 316), is obviously one of those compelling considerations which must prevail in determining whether it is embraced within the due process clause of the Fourteenth Amendment, although it be specifically dealt with in another part of the federal Constitution. Evidently this court, in the later cases enumerated, regarded the rights there under consideration as of this fundamental character. That some such distinction must be observed is foreshadowed in Twining v. New Jersey, 211 U.S. 78, 99, where Mr. Justice Moody, speaking for the court, said that ". . . it is possible that some of the personal rights safeguarded by the first eight Amendments against National action may also be safeguarded against state action, because a denial of them would be a denial of due process of law. Chicago, Burlington & Quincy R. Co. v. Chicago, 166 U.S. 226. If this is so, it is not because those rights are enumerated in the first eight Amendments, but because they are of such a nature that they are included in the conception of due process of law." While the question has never been categorically determined by this court, a consideration of the nature of the right and a review of the expressions of this and other courts, makes it clear that the right to the aid of counsel is of this fundamental character.

It never has been doubted by this court, or any other so far as we know, that notice and hearing are preliminary steps essential to the passing of an enforceable judgment, and that they, together with a legally competent tribunal having jurisdiction of the case, constitute basic elements of the constitutional requirement of due process of law. The words of Webster, so often quoted, that by "the law of the land" is intended "a law which hears before it condemns," have been repeated in varying forms of expression in a multitude of decisions. . . .

What, then, does a hearing include? Historically and in practice, in our own country at least, it has always included the right to the aid of counsel when desired and provided by the party asserting the right. *The right to be heard would be, in many cases, of little avail if it did not comprehend the right to be heard by counsel. Even the intelligent and educated layman has small and sometimes no skill in the science of law. If charged with crime, he is incapable, generally, of determining for himself whether the indictment is good or bad. He is unfamiliar with the rules of evidence. Left without the aid of counsel he may be put on trial without a proper charge, and convicted upon incompetent evidence, or evidence irrelevant to the issue or otherwise inadmissible. He lacks both the skill and knowledge adequately to prepare his defense, even though he may have a perfect one. He requires the guiding hand of counsel at every step in the proceedings against him. Without it, though he be not guilty, he faces the danger of conviction because he does not know how to establish his innocence.* If that be true of men of intelligence, how much more true is it of the ignorant and illiterate, or those of feeble intellect. If in any case, civil or criminal, a state or federal court were arbitrarily to refuse to hear a party by counsel, employed by and appearing for him, it reasonably may not be doubted that such a refusal would be a denial of a hearing and, therefore, of due process in the constitutional sense.

In the light of the facts outlined in the forepart of this opinion—the ignorance and illiteracy of the defendants, their youth, the circumstances of public hostility, the imprisonment and the close surveillance of the defendants by the military forces, the fact that their friends and families were all in other states and communication with them necessarily difficult, and above all that they stood in deadly peril of their lives—we think the failure of the trial court to give them reasonable time and opportunity to secure counsel was a clear denial of due process.

But passing that, and assuming their inability, even if opportunity had been given, to employ counsel, as the trial court evidently did assume, we are of opinion that, under the circumstances just stated, the necessity of counsel was so vital and imperative that the failure of the tiral court to make an effective appointment of counsel was likewise a denial of due process within the meaning of the Fourteenth Amendment. Whether this would be so in other criminal prosecutions, or under other circumstances, we need not determine. . . .

NORRIS V. ALABAMA

CERTIORARI TO THE SUPREME COURT OF ALABAMA

No. 534. Argued February 15, 18, 1935.—Decided April 1, 1935.

HEAD NOTE

1. Exclusion of all negroes from a grand jury by which a negro is indicted, or from the petit jury by which he is tried for the offense, resulting from systematic and arbitrary exclusion of negroes from the jury lists solely because of their race or color, is a denial of the equal protection of the laws guaranteed to him by the Fourteenth Amendment. P. 589.
2. Whenever a conclusion of law of a state court as to a federal right is so intermingled with findings of fact that the latter control the former, it is incumbent upon this Court to analyze the facts in order that the enforcement of the federal right may be assured. P. 590.
3. Evidence reviewed and found to establish systematic exclusion of negroes from jury service in two Alabama counties, solely because of their race and color. Pp. 590, 596. 229 Ala. 226; 156 So. 229 Ala. 556, reversed.

CERTIORARI, 293 U.S. 552, to review a judgment affirming a conviction of rape.

Mr. Samuel S. Leibowitz for petitioner.

Mr. Thomas E. Knight, Jr., Attorney General of Alabama, with whom *Mr. Thomas Seay Lawson*, Assistant Attorney General, was on the brief, for respondent.

OPINION OF THE COURT

Mr. CHIEF JUSTICE HUGHES delivered the opinion of the Court.

Petitioner, Clarence Norris, is one of nine negro boys who were indicted in March, 1931, in Jackson County, Alabama, for the crime of rape. On being brought to trial in that county, eight were convicted. The Supreme Court of Alabama reversed the conviction of one of these and affirmed that of seven, including Norris. This Court reversed the judgments of conviction upon the ground that the defendants had been denied due process of law in that the trial court had failed in the light of the circumstances disclosed, and of the inability of the defendants at that time to obtain counsel, to make an effective appointment of counsel to aid them in preparing and presenting their defense. *Powell* v. *Alabama*, 287 U.S. 45.

After the remand, a motion for change of venue was granted and the cases were transferred to Morgan County. Norris was brought to trial in November, 1933. At the outset, a motion was made on his behalf to quash the indictment upon the ground of the exclusion of negroes from juries in Jackson County where the indictment was found. A motion was also made to quash the trial *venire* in Morgan County upon the ground of the exclusion of negroes from juries in that county. In relation to each county, the charge was of long continued, systematic and arbitrary exclusion of qualified negro citizens from service on juries, solely because of their race and color, in violation of the Constitution of the United States. The State joined issue on this charge and after hearing the evidence, which we shall presently review, the trial judge denied both motions, and exception was taken. The trial then proceeded and resulted in the conviction of Norris who was sentenced to death. On appeal, the Supreme Court of the State considered and decided the federal question which Norris had raised, and affirmed the judgment. 229 Ala. 226; 156 So. 556. We granted a writ of certiorari. 293 U.S. 552.

First. There is no controversy as to the constitutional principle involved. That principle, long since declared, was not challenged, but was expressly recognized, by the Supreme Court of the State. Summing up precisely the

effect of earlier decisions, this Court thus stated the principle in *Carter* v. *Texas*, 177 U.S. 442, 447, in relation to exclusion from service on grand juries: "Whenever by any action of a State, whether through its legislature, through its courts, or through its executive or administrative officers, all persons of the African race are excluded, solely because of their race or color, from serving as grand jurors in the criminal prosecution of a person of the African race, the equal protection of the laws is denied to him, contrary to the Fourteenth Amendment of the Constitution of the United States. *Strauder* v. *West Virginia*, 100 U.S. 303; *Neal* v. *Delaware*, 103 U.S. 370, 397; *Gibson* v. *Mississippi*, 162 U.S. 565." This statement was repeated in the same terms in *Rogers* v. *Alabama*, 192 U.S. 226, 231, and again in *Martin* v. *Texas*, 200 U.S. 316, 319. The principle is equally applicable to a similar exclusion of negroes from service on petit juries. *Strauder* v. *West Virginia*, *supra*; *Martin* v. *Texas*, *supra*. And although the state statute defining the qualifications of jurors may be fair on its face, the constitutional provision affords protection against action of the State through its administrative officers in effecting the prohibited discrimination. *Neal* v. *Delaware*, *supra*; *Carter* v. *Texas*, *supra*. Compare *Virginia* v. *Rives*, 100 U.S. 313, 322, 323; *In re Wood*, 140 U.S. 278, 285; *Thomas* v. *Texas*, 212 U.S. 278, 282, 283.

The question is of the application of this established principle to the facts disclosed by the record. That the question is one of fact does not relieve us of the duty to determine whether in truth a federal right has been denied. When a federal right has been specially set up and claimed in a state court, it is our province to inquire not merely whether it was denied in express terms but also whether it was denied in substance and effect. If this requires an examination of evidence, that examination must be made. Otherwise, review by this Court would fail of its purpose in safeguarding constitutional rights. Thus, whenever a conclusion of law of a state court as to a federal right and findings of fact are so intermingled that the latter control the former, it is incumbent upon us to analyze the facts in order that the appropriate enforcement of the federal right may be assured. *Creswill* v. *Knights of Pythias*, 225 U.S. 246, 261; *Northern Pacific Ry. Co.* v. *North Dakota*, 236 U.S. 585, 593; *Ward* v. *Love County*, 253 U.S. 17, 22; *Davis* v. *Wechsler*, 263 U.S. 22, 24; *Fiske* v. *Kansas*, 274, U.S. 380, 385, 386; *Ancient Egyptian Order* v. *Michaux*, 279 U.S. 737, 745.

Second. The evidence on the motion to quash the indictment. In 1930, the total population of Jackson County, where the indictment was found, was 36,881, of whom 2688 were negroes. The male population over twenty-one years of age numbered 8801, and of these 666 were negroes.

The qualifications of jurors were thus prescribed by the state statute (Alabama Code, 1923, § 8603): "The jury commission shall place on the jury roll and in the jury box the names of all male citizens of the county who are generally reputed to be honest and intelligent men, and are esteemed in the community for their integrity, good character and sound judgment, but no person must be selected who is under twenty-one or over sixty-five years of age, or, who is an habitual drunkard, or who, being afflicted with a permanent disease or physical weakness is unfit to discharge the duties of a juror, or who cannot read English, or who has ever been convicted of any offense involving moral turpitude. If a person cannot read English and has all the other qualifications prescribed herein and is a freeholder or householder, his name may be placed on the jury roll and in the jury box." See Gen. Acts, Alabama, 1931, No. 47, p. 59.

Defendant adduced evidence to support the charge of unconstitutional discrimination in the actual administration of the statute in Jackson County. The testimony, as the state court said, tended to show that "in a long number of years no negro had been called for jury service in that county." It appeared that no negro had served on any grand or petit jury in that county within the memory of witnesses who had lived there all their lives. Testimony to that effect was given by men whose ages ran from fifty to seventy-six years. Their testimony was uncontradicted. It was supported by the testimony of officials. The clerk of the jury commission and the clerk of the circuit court had never known of a negro serving on a grand jury in Jackson County. The court reporter, who had not missed a session in that county in twenty-four years, and two jury commissioners testified to the same effect. One of the latter, who was a member of the commission which made up the jury roll for the grand jury which found the indictment, testified that he had "never known of a single instance where any negro sat on any grand or petit jury in the entire history of that county."

That testimony in itself made out a *prima facie* case of the denial of the equal protection which the Constitution guarantees. See *Neal* v. *Delaware*, *supra*. The case thus made was supplemented by direct testimony that specified negroes, thirty or more in number, were qualified for jury service. Among these were negroes who were members of school boards, or trustees, of colored schools, and property owners and householders. It also appeared that negroes from that county had been called for jury service in the federal court. Several of those who were thus described as qualified were witnesses. While there was testimony which cast doubt upon the qualifications of some of the negroes who had been named, and there was also general testimony by the editor of a local newspaper who gave his opinion as to the lack of "sound judgment" of the "good negroes" in Jackson County, we think that the definite testimony as to the actual qualifications of individual negroes, which was not met by any testimony equally direct, showed that there were negroes in Jackson County qualified for jury service.

The question arose whether names of negroes were in fact on the jury roll. The books containing the jury roll for Jackson County for the year 1930–31 were produced. They were produced from the custody of a member of the jury commission which, in 1931, had succeeded the commission which had made up the jury roll from which the grand jury in question had been drawn. On the pages of this roll appeared the names of six negroes. They were entered, respectively, at the end of the precinct lists which were alphabetically arranged. The genuineness of these entries was disputed. It appeared that after the jury roll in question had been made up, and after the new jury commission had taken office, one of the new commissioners directed the new clerk to draw lines after the names which had been placed on the roll by the preceding commission. These lines, on the pages under consideration, were red lines, and the clerk of the old commission testified that they were not put in by him. The entries made by the new clerk, for the new jury roll, were below these lines.

The names of the six negroes were in each instance written immediately above the red lines. An expert of long experience testified that these names were superimposed upon the red lines, that is, that they were written after the lines had been drawn. The expert was not cross-examined and no testimony was introduced to contradict him.[1] In denying the motion to quash, the trial judge expressed the view that he would not "be authorized to presume that somebody had committed a crime" or to presume that the jury board "had been unfaithful to their duties and allowed the books to be tampered with." His conclusion was that names of negroes were on the jury roll.

We think that the evidence did not justify that conclusion. The Supreme Court of the State did not sustain it. That court observed that the charge that the names of Negroes were fraudulently placed on the roll did not involve any member of the jury board, and that the charge "was, by implication at least, laid at the door of the clerk of the board." The court, reaching its decision irrespective of that question, treated that phase of the matter as "wholly immaterial" and hence passed it by "without any expression of opinion thereon."

The state court rested its decision upon the ground that even if it were assumed that there was no name of a negro on the jury roll, it was not established that race or color caused the omission. The court pointed out that the statute fixed a high standard of qualifications for jurors (*Green* v. *State*, 73 Ala. 26; *State* v. *Curtis*, 210 Ala. 1; 97 So. 291) and that the jury commission was vested with a wide discretion. The court adverted to the fact that more white citizens possessing age qualifications had been omitted from the jury roll than the entire negro population of the county, and regarded the testimony as being to the effect that "the matter of race, color, politics, religion or fraternal affiliations" had not been discussed by the commission and had not entered into their consideration, and that no one had been excluded because of race or color.

The testimony showed the practice of the jury commission. One of the commissioners who made up the jury roll in question, and the clerk of that commission, testified as to the manner of its preparation. The other two commissioners of that period did not testify. It was shown that the clerk, under the direction of the commissioners, made up a preliminary list which was based on the registration list of voters, the polling list and the tax list, and apparently also upon the telephone directory. The clerk testified that he made up a list of all male citizens between the ages of twenty-one and sixty-five years without regard to their status or qualifications. The commissioner testified that the designation "col." was placed after the names of those who were colored. In preparing the final jury roll, the preliminary list was checked off as to qualified jurors with the aid of men whom the commissioners called in for that purpose from the different precincts. And the commissioner testified that in the selections for the jury roll no one was "automatically or systematically" excluded, or excluded on account of race or color; that he "did not inquire as to color, that was not discussed."

But, in appraising the action of the commissioners, these statements cannot be divorced from other testimony. As we have seen, there was testimony, not overborne or discredited, that there were in fact negroes in the county qualified for jury service. That testimony was direct and specific. After eliminating those persons as to whom there was some evidence of lack of qualifications, a considerable number of others remained. The fact that the testimony as to these persons, fully identified, was not challenged by evidence appropriately direct, cannot be brushed aside. There is no ground for an assumption that the names of these negroes were not on the preliminary list. The inference to be drawn from the testimony is that they were on that preliminary list, and were designated on that list as the names of negroes, and that they were not placed on the jury roll. There was thus presented a test of the practice of the commissioners. Something more than mere general asseverations was required. Why were

[1] The books containing the jury roll in question were produced on the argument at this bar and were examined by the Court.

these names excluded from the jury roll? Was it because of the lack of statutory qualifications? Were the qualifications of negroes actually and property considered?

The testimony of the commissioner on this crucial question puts the case in a strong light. That testimony leads to the conclusion that these or other negroes were not excluded on account of age, or lack of esteem in the community for integrity and judgment, or because of disease or want of any other qualification. The commissioner's answer to specific inquiry upon this point was that negroes were "never discussed." We give in the margin quotations from his testimony.[2]

We are of the opinion that the evidence required a different result from that reached in the state court. We think that the evidence that for a generation or longer no negro had been called for service on any jury in Jackson County, that there were negroes qualified for jury service, that according to the practice of the jury commission their names would normally appear on the preliminary list of male citizens of the requisite age but that no names of negroes were placed on the jury roll, and the testimony with respect to the lack of appropriate consideration of the qualifications of negroes, established the discrimination which the Constitution forbids. The motion to quash the indictment upon that ground should have been granted.

Third. The evidence on the motion to quash the trial venire. The population of Morgan County, where the trial was had, was larger than that of Jackson County, and the proportion of negroes was much greater. The total population of Morgan County in 1930 was 46,176, and of this number 8,311 were negroes.

Within the memory of witnesses, long resident there, no negro had ever served on a jury in that county or had been called for such service. Some of these witnesses were over fifty years of age and had always lived in Morgan County. Their testimony was not contradicted. A clerk of the circuit court, who had resided in the county for thirty years, and who had been in office for over four years, testified that during his official term approximately 2500 persons had been called for jury service and that not one of them was a negro; that he did not recall "ever seeing any single person of the colored race serve on any jury in Morgan County."

There was abundant evidence that there were a large number of negroes in the county who were qualified for jury service. Men of intelligence, some of whom were college graduates, testified to long lists (said to contain nearly 200 names) of such qualified negroes, including many business men, owners of real property and householders. When defendant's counsel proposed to call many additional witnesses in order to adduce further proof of qualifications of negroes for jury service, the trial judge limited the testimony, holding that the evidence was cumulative.

We find no warrant for a conclusion that the names of any of the negroes as to whom this testimony was given, or of any other negroes, were placed on the jury rolls. No such names were identified. The evidence that for many years no negro had been called for jury service itself tended to show the absence of the names of negroes from the jury rolls, and the State made no effort to prove their presence. The trial judge limited the defendant's proof "to the present year, the present jury roll." The sheriff of the county, called as a witness for defendants, scanned the jury roll and after "looking over every single name on that jury roll, from A to Z," was unable to point out "any single negro on it."

For this long-continued, unvarying, and wholesale exclusion of negroes from jury service we find no justification consistent with the constitutional mandate. We have carefully examined the testimony of the jury commissioners upon which the state court based its decision. One of these commissioners testified in person and the other two submitted brief affidavits. By the state act (Gen. Acts, Ala., 1931, No. 47, p. 55), in force at the time the jury roll in question was made up, the clerk of the jury board was required to obtain the names of all male citizens of the country over twenty-one and under sixty-five years of age, and their occupation, place of residence and place of business. (*Id.*, p. 58, § 11.) The qualifications of those who were to be placed on the jury roll were the same as those prescribed by the earlier statute which we have already quoted. (*Id.*, p. 59, § 14.) The member of the jury board, who testified orally, said that a list was made up which included the names of all male citizens of suitable age; that black residents were not excluded from this general list; that in compiling the jury roll he did not consider race or color; that no one was excluded for that reason; and that he had placed on the jury roll the names of persons possessing the qualifications under the statute. The affidavits of the other members of the board contained general statements to the same effect.

We think that this evidence failed to rebut the strong *prima facie* case which defendant had made. That showing as to the long-continued exclusion of negroes from jury service, and as to the many negroes qualified for that service, could not be met by mere generalities. If, in the presence of such testimony as defendant adduced, the mere general assertions by officials of their performance of duty were to be accepted as an adequate justification for the complete exclusion of negroes from jury service, the constitutional provision—adopted with special reference to their protection—would be but a vain and illusory requirement. The general attitude of the jury commissioner is shown by the following extract from his testimony: "I do not know of any negro in Morgan County over twenty-one and under sixty-five who is generally reputed to be honest and intelligent and who is esteemed in the community for his integrity, good character and sound judgment, who is not an habitual drunkard, who isn't afflicted with a permanent disease or physical weakness which would render him unfit to discharge the duties of a juror, and who can read English, and who has never been convicted of a crime involving moral turpitude." In the light of the testimony given by defendant's witnesses, we find it impossible to accept such a sweeping characterization of the lack of qualifications of negroes in Morgan County. It is so sweeping, and so contrary to the evidence as to the many qualified negroes, that it destroys the intended effect of the commissioner's testimony.

In *Neal* v. *Delaware, supra,* decided over fifty years ago, this Court observed that it was a "violent presumption," in which the state court had there indulged, that the uniform exclusion of negroes from juries, during a period of many years, was solely because, in the judgment of the officers, charged with the selection of grand and petit jurors, fairly exercised, "the black race in Delaware were utterly disqualified by want of intelligence, experience, or moral integrity, to sit on juries." Such a presumption at the present time would be no less violent with respect to the exclusion of the negroes of Morgan County. And, upon the proof contained in the record now before us, a conclusion that their continuous and total exclusion from juries was because there were none possessing the requisite qualifications, cannot be sustained.

We are concerned only with the federal question which we have discussed, and in view of the denial of the federal right suitably asserted, the judgment must be reversed and the cause remanded for further proceedings not inconsistent with this opinion.

Reversed.

MR. JUSTICE MCREYNOLDS did not hear the argument and took no part in the consideration and decision of this case.

[2] "Q. Did you ever exclude from the jury rolls any negroes because you found first, he was a man under twenty-one years old or over sixty-five, and he was excluded by reason of his age; secondly because he was a person who wasn't esteemed in the community for being a decent and honorable citizen, for good sound common sense and judgment, did you ever see or hear of them not going to take that negro because he wasn't esteemed in the community for good sense and judgment? A. No, sir.

"Q. Did you ever have occasion to say, I can't take that negro because he is a fellow that has a disease which may affect or does affect, his mentality, did you ever say that to yourself, with reference to any particular negro? A. No, sir, negroes was never discussed.

"Q. Did you ever say to yourself as a jury commissioner in compiling those lists, I am not going to take that negro because he has been convicted before of a crime involving moral turpitude, have you ever excluded a negro on that ground, did you ever find any negro that came within that category, under your personal knowledge in Jackson County? A. I couldn't recall any, no, sir, I don't know.

"Q. Have you ever known of any negro in Jackson County who was excluded by reason of the fact that he could not read English, and that negro at the same time wasn't a free holder or householder, did you ever say I can't take that negro because he is prohibited under the rules from serving by reason of that provision? A. No, sir.

"Q. Or anybody in your presence? A. It never was discussed.

"Q. You had been a jury commissioner how long? A. I was on it under Bibb Graves administration, 1928, 1929, 1930.

"Q. Three years? A. Yes, sir.

"Q. And you never had occasion to exclude any negro in Jackson County by reason of the disqualifying provisions I have just called to your attention? A. Not to my personal knowledge, no, sir.

RECESS

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate stand in recess, awaiting the call of the Chair, with the understanding that the recess not extend beyond 3:45 p.m. today.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Thereupon (at 2 o'clock and 9 minutes p.m.) the Senate took a recess subject to the call of the Chair.

The Senate reassembled at 2:33 p.m., when called to order by the Presiding Officer (Mr. HART in the chair).

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL MORTGAGE CREDIT—CONFERENCE REPORT

Mr. PROXMIRE. Mr. President, I submit a report of the committee of con-

ference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2577) to provide additional mortgage credit, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of December 18, 1969, pp. 38989–38991, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. PROXMIRE. Mr. President, the bill which came out of conference is a very controversial bill and a very important anti-inflation bill. It could be one of the most important anti-inflation bills of the year. It tries to provide a better opportunity for small businessmen and for housing, which have been so badly hurt by the high interest rates, while at the same time it provides a voluntary credit system and, in addition, a standby mandatory credit system that would be available to the President to counteract high interest rates and try to hold down credit costs so they will not become more inflationary than they are at the present time.

In my opinion, the conference committee has combined the best provisions of both the Senate and House bills in order to give the President and the administration the maximum authority for slowing down inflation and increasing the supply of mortgage credit.

The need for this legislation has been fully documented in the hearings held before the Senate and House Banking Committees and in the reports of those committees. Housing starts are down 30 percent from the start of the year and in the opinion of industry observers, we are in the worst housing shortage since the end of World War II. Interest rates have skyrocketed to well over 8 percent and are approaching 9 percent in some sections of the country.

The bill reported by the conference committee includes the Senate provision which increases the Treasury borrowing authority of the Home Loan Bank Board from $1 billion to $4 billion. This provision was not contained in the House bill and I am pleased that the conferees accepted the Senate version. In my view it is the most meaningful provision of the bill.

If implemented, it can reduce mortgage interest rates by as much as 1 percentage point because of lower cost Treasury borrowing.

Not many people realize it, but the Federal Home Loan Bank Board has supplied nearly half the mortgage credit extended by savings and loan associations in 1969. Since savings and loan associations provide the bulk of credit for single family mortgages, their position in the home financing field is crucial.

Unfortunately, as the total volume of credit is squeezed the Home Loan Bank Board must pay higher and higher rates to obtain the funds for mortgage lending. The latest Home Loan Bank issue cost the agency a record 8.70 percent. This cost must be passed on to the home buyer with the result that hundreds of thousands of middle-income families are being priced out of the housing market.

As a matter of fact, I remember being told earlier this year by builders in Milwaukee that anybody with an income of less than $10,000 a year could forget about buying a home. That means 70 percent of American families are unable to buy a home. They cannot buy homes; they can buy trailers and live in them or live with their relatives, but at a time when new family formations are making new records, these people are unable to buy homes.

Lower cost Treasury borrowing can reduce borrowing costs by 1 percentage point or more and thus reduce the average home buyer's monthly payments by $15.00 per month.

The second most important provision in the bill gives the President the authority to implement selective credit controls. Under the Senate version, these controls would be administered on a voluntary basis. That is, the President or his designee could establish committees of private lenders who would work out voluntary guidelines for channeling credit to the most essential uses such as housing, small business, agriculture, and State and local governments.

That version was tried during the Korean war, and it was found to be very effective. As a matter of fact, the administrators of the measure made a report, shortly afterward, which highly commended the experience and indicated that it was very helpful in holding down prices, as well as holding down interest rates.

Under the House version, the President was given authority to implement mandatory controls on consumer and business credit. These controls could limit the amounts which lenders could lend or borrowers could borrow as well as the terms by which such credit could be extended including the maximum rate of interest, the minimum down payment, the maximum maturity and the frequency of repayment. In addition, the Federal Reserve Board which would administer the controls could require borrowers or creditors to be licensed or registered and in so doing could prescribe the aggregate amounts of credit which could be extended or acquired by such creditors or borrowers for specified purposes.

Mr. President, we all know we live in a credit economy. Very few people buy things for cash. This proposal means giving the President an instrument which is broad and selective enough to use if he needs to slow down inflationary forces, virtually to the degree he wishes to do it. It is giving the President a most important and powerful instrument.

The timing is especially propitious because we are passing it before the administration thinks it is necessary, but, on the basis of many predictions, inflation could become so serious next year that the administration would need it, and it could then use it and not have to wait for long debates in the Senate and the House.

Under both the Senate and House versions, the implementation of selective credit controls would be at the option of the President and only if he deemed such controls necessary to fight inflation.

The conferees wisely decided to accept both the Senate and House provisions and thus provide the President with the widest range of options in combatting inflation.

The conferees gave him both voluntary credit controls and mandatory credit controls. He can use either one to any degree to which he wants to use it.

Under certain circumstances, voluntary credit controls might be most appropriate. Under other circumstances, mandatory credit controls might be more effective. It is also possible that the President might want to extend voluntary credit controls to one sector of the economy while at the same time extending mandatory credit controls to another sector. All of these options would be open to him under the conference bill.

Since monetary and fiscal policies have not succeeded in slowing inflation we ought to give the President the widest possible authority for bringing price increases under control.

A third important provision deals with the financing of the small business investment company program. Because of action by the Bureau of the Budget, SBA loans to SBIC's were cut off earlier this year. In order to provide a source of funds, the Senate passed legislation, S. 2540, to permit SBA to guarantee loans to SBIC's made by private lenders.

The House amended S. 2577 by adding a provision directing the SBA to make an additional $70 million available to SBIC's from its business loan and investment fund. It is expected that there will be $115 million available in this fund by the end of the fiscal year, hence the use of the $70 million for the SBIC program will still leave $45 million.

The Senate conferees agreed to the House amendment and expect the provision to be promptly implemented by the SBA. A precedent for using the business loan and investment revolving fund for SBIC loans without additional appropriation authority already exists in view of recent action by the SBA to use this fund for making $15 million available to Minority Enterprise SBIC's.

Mr. President, in addition to the three major items I have listed, the conferees agreed on a number of lesser issues.

First, the extension of flexible deposit rate control authority was extended to March 22, 1971, as provided by the House bill rather than September 22, 1970, as contained in the Senate bill.

Second, the Senate conferees agreed to the House provision which reduced the amount of insurance payments savings and loan associations must make to the FSLIC by eliminating creditor obligations from the base from which premiums are computed.

Third, the Senate conferees accepted the House provision giving the Federal Reserve Board the authority to establish reserve requirements against commercial paper borrowing of bank affiliates. Both bills also authorize deposit rate control

authority with respect to such borrowing.

Fourth, the Senate conferees agreed to a modified House provision increasing the amount of deposit insurance for banks and savings and loan associations from $15,000 to $20,000. I think to many people this will be very important. Savings are now insured for up to $15,000 in any bank or savings and loan association. This provision increases the maximum amount from $15,000 to $20,000 for banks and savings and loan associations.

No change was made to the sections of both bills which extend limited deposit rate control authority to uninsured financial institutions and which increase the Federal Reserve Board's authority to levy higher reserve requirements on Eurodollar borrowing.

So, Mr. President, all of the provisions of this bill have been designed to lower interest rates, fight inflation, help housing, small business, and employment, and make mortgage credit more available. I wholeheartedly recommend the adoption of the conference report to achieve these objectives.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Several Senators addressed the Chair.

Mr. DOMINICK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Mr. BYRD of West Virginia. Mr. President, I move that the Senate stand in recess until 3:45 p.m., today.

The motion was agreed to; and (at 2 o'clock and 48 minutes p.m.) the Senate took a recess until 3:45 p.m., the same day.

The Senate reconvened at 3:45 p.m., when called to order by the Presiding Officer (Mr. COOK in the chair).

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SCHWEIKER in the chair). Without objection, it is so ordered.

Mr. BENNETT. Mr. President, on November 13 this body considered S. 2577, a bill which provided Federal regulation over State institutions, $4 billion in Treasury borrowing to the Federal Home Loan Bank System, and authority to establish voluntary credit controls similar to those used during the Korean war. In addition to these three major items which I opposed strongly at that time, the bill had several other provisions which had received almost complete support by the committee. One of these items is the extension of regulation Q authority, providing that Federal regulatory authorities can regulate rates of interest and dividends paid by banks and savings and loan associations. That authority needs to be extended now because it expires on Sunday, the 21st of this month.

Mr. President, it is unfortunate that the need to extend that authority has been used as a hostage to bring about a legislative proposal containing authority for controls on our economy which has never been equaled in the history of this country. Not even during the worst periods of World War II was such authority granted. Mr. President, if such authority were necessary and if the administration had asked for such authority and if the committees responsible for such legislation on both the House and Senate sides had spent time considering the provisions contained in this proposal which has now come before the Senate, I would certainly not feel as strongly as I do. I would like to say, however, Mr. President, that this has not been the case. The Senate considered its bill several months ago. There was no provision for this broad authority in the Senate bill. I have followed carefully the proceedings which brought about the House version of S. 2577. A bill was introduced; members of the committee were asked to vote on the bill without having any knowledge of what it contained or a chance to have carefully considered its provisions. No hearings were held on its provisions, and it was enacted by the House on Wednesday, the 17th, just 2 days ago. Unfortunately, the pressures of the present situation forced a conference at 1 o'clock yesterday afternoon to reconcile the differences between that bill which passed late the day before and the Senate version, which passed some time ago. There was not an opportunity for Members of the Senate to be fully acquainted with what the House had done, since we did not know what their action would be until the night before. Now, without any interim during which Members of the Senate could consider what the conferees agreed to, we take this up on the Senate floor.

Mr. President, I believe I would be safe in saying that there are very few Members of this body who have any idea what is contained in this bill. Unfortunately the Senator from Texas (Mr. TOWER) was out of town because of a misunderstanding that a conference would not be held yesterday and I was unable to attend the conference because of responsibilities I had at another conference on tax legislation which I felt I could not interrupt in order to attend the second conference. This put the whole burden of responsibility on the Senator from Massachusetts (Mr. BROOKE). I am informed that he did a good job. But I was appalled when I discovered that the conference committee had approved authority for the Federal Reserve Board to "prohibit or limit any extensions of credit under any circumstances the Board deems appropriate." I was also surprised to learn that the conference committee had agreed to the establishment of a Federal usury statute limiting the amount of interest that may be paid on any extension of credit. In addition, authority is granted for the Federal Reserve Board to bring about an action whenever it appears that any person is about to engage in any act which would violate this authority—not after the authority has been violated, but when perhaps someone decides subjectively that a man is about to violate it. Let me repeat, Mr. President, never in the history of this Nation has such broad authority been given to any President or any agency of the Government to control private credit transactions in the United States.

I was interested to note that title III of the report which is before us reads that the Small Business Administration shall promptly increase the level of its financing functions by $70 million. It seems to me that we should recognize in the Congress that it is not our prerogative to determine and to require certain amounts of money to be spent while at the same time we have set ceilings above which the administration cannot go.

Mr. President, I do not want to take a great deal of time on this issue. I realize the situation we face in the Senate. We are driving to get through our work before the holiday begins. And we are under the added pressure that legislation which is important will expire on Sunday if we do not act. I feel, however, that this is legislating at its worst, that it is irresponsible for us to accept such broad authority and to make such mandates without proper consideration by the committees and without the two bodies of Congress really having had time to study and understand the extent to which this bill could change the credit pattern in the United States.

I cannot support the conference report.

Fortunately, this authority is permissive and not mandatory. I hope that those to whom it is being transferred will have the wisdom—I am sure they do—to ignore the authority. What I fear is that the fact that this measure has been passed will be used by some as though it were a mandate and to harass and attempt to put pressure on the authorities given this power, in order to try to put themselves in a position later to make charges of failure if in fact the situation does not clear up quickly.

President Nixon did not ask for this grant of authority and members of his party, I think, by and large, strongly oppose it.

Another thing that worries me very much is that we may now be setting a precedent and that, having given discretionary authority, we can be urged later to transfer this to mandatory authority on the ground that the people to whom it was given have failed to use it and they must be mandated and forced to use it.

I realize that under the circumstances it is going to be impossible to defeat the acceptance of the conference report, and that is, therefore, not my purpose. But I could not with clear conscience let it be accepted without calling the attention of the Senate to what I consider some very real dangers.

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. GRIFFIN. I commend the distinguished Senator for his statement and associate myself with it.

I call attention to the fact that the Senator from Utah comes to the floor to make this statement after many long hours in the conference on the tax bill.

The Senator may have said this when I was not in the Chamber. I am somewhat concerned about the way this conference report agreement was handled. It is very important, far-reaching legislation. I know that the Senator from Utah was tied up with the tax bill. There was some misunderstanding as to whether or not there was to be a conference, and the Senator from Texas could not attend. The House did not even have hearings, as I understand it, on the mandatory provisions that were added in that body.

Mr. BENNETT. That is my understanding.

Mr. GRIFFIN. I believe that just the procedure provides very substantial grounds for objection to this conference report, in addition to the merits.

Mr. BENNETT. I feel that way, but I would like to say to my friend, the Republican whip, that I have had the cooperation of the Democratic leadership today. They wanted to bring it up around noon. I was in the other conference. I asked them if they would delay it until approximately 3 o'clock. I do not know why 3 o'clock should be sacred, except that is the time we quit this morning in the other conference. They did delay it until 2:30 and then I understand that you and the Senator from Colorado (Mr. DOMINICK) made it possible to hold off action on the report so that I could be here.

So that from that point of view, I have had an opportunity to express myself before action is taken. But the whole thing disturbs me.

Mr. GRIFFIN. I will say, too, that so far as the floor leadership of the majority party is concerned, they cooperated with the leadership on this side of the aisle in making sure that it did not go through until the Senator from Utah did have an opportunity to be on the floor.

But it seems to me disturbing that this far-reaching measure has not had that kind of consideration which I think many people would like to see.

Mr. PROXMIRE. Mr. President, this bill is the home buyers' bill of the year. This industry urgently needs help. This bill provides it.

We have heard much talk about the need to fight inflation. This bill is the most significant action Congress can take this year to combat inflation and help the depressed homebuilding industry.

The bill gives the President authority to slow inflation and bring down interest rates through selective credit controls;

The bill provides up to $4 billion in borrowing authority to be used for mortgage lending;

The bill closes several loopholes which big banks and large corporations have used to escape from tight money;

The bill provides $70 million of funds already appropriated for loans to small business investment companies;

The bill extends until March 22, 1971, the authority to prevent inflationary rate wars between financial institutions.

Mr. President, I move that the Senate agree to the conference report.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Wisconsin.

The motion was agreed to.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, informed the Senate that pursuant to the provisions of section 3 (a) Public Law 91–129, the Speaker appoints as members of the Commission on Government Procurement the following Members on the part of the House: Mr. HOLIFIELD and Mr. HORTON; and the following member from outside of the Federal Government: Joseph W. Barr, of Maryland.

The message also requested the Senate to return to the House of Representatives the message informing the Senate that the House had agreed to the amendments of the Senate to the bill (H.R. 9634) entitled "An act to amend title 38 of the United States Code in order to improve and make more effective the Veterans' Administration program of sharing specialized medical resources."

The message further announced that the House had agreed to the amendment of the Senate to the bill (H.R. 9334) to amend title 38, United States Code, to promote the care and treatment of veterans in State veterans' homes.

The message also announced that the House had agreed to the report of the committee on conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 14580) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic economic, social, and political institutions, and for other purposes.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 14751) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 14794) making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970, and for other purposes; that the House insisted on its disagreements to the amendments of the Senate numbered 2, 14, and 15 to the bill.

The message further announced that the House had agreed to the concurrent resolution (H. Con. Res. 473) authorizing the Clerk of the House to make a correction in the enrollment of the bill (H.R. 14751).

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (S. 740) to establish the Cabinet Committee on Opportunities for Spanish-Speaking People, and for other purposes, and it was signed by the Acting President pro tempore.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FOREIGN ASSISTANCE ACT OF 1969—CONFERENCE REPORT

Mr. MANSFIELD. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 14580) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic, economic, social, and political institutions, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of December 18, 1969, pp. 39833–39840, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. FULBRIGHT. Mr. President, I shall be very brief in explaining the conference agreement. The Senate authorized a total foreign aid program of $1,970,650,000. The House authorized $2,193,900,000—making a difference of $223,250,000. The conference agreement is for $1,972,525,000—or $1,875,000 above the amount approved by the Senate. Although I do not take any pride in this bill—because it means a temporary continuation of a program which is a failure—I think the Senate conferees reached an agreement on amounts which is better than the Senate could reasonably expect.

The bill authorizes appropriations for both fiscal years 1970 and 1971. The Senate conferees recognized the difficulties involved in trying to draw up a complete new aid program between the time the President's recommendations to Congress are due on March 31, and the likely early adjournment next year, due to election campaigns. The 2-year authority will free the Committee on Foreign Relations to spend more time on study of new, long-range policy in the coming year than would have been possible if it were necessary to go through the renewal ritual again next year.

The only significant substantive addition to the bill approved by the Senate is the authorization of an Inter-American Social Development Institute. The Institute would be a public corporation, whose board of directors would be subject to confirmation by the Senate. The purpose of the Institute would be to stimulate the use of people-to-people channels for aid in social and economic development of Latin America. It is, admittedly, an experiment, a new approach to distribution of aid and, for that reason, it was limited to use of $50 million in economic aid funds, as the administration decides, for fiscal years 1970 and 1971. The committee will follow the progress of the Institute and give careful study to its record of operations in connection with its development of a new aid program in 1971.

Mr. President, when I presented the foreign aid bill to the Senate I said, that I took no pleasure in doing so, and that the bill was being presented with reluctance rather than enthusiasm. The same holds true for this conference report. But, as a compromise between the Senate and House bills, the agreements is, I believe, satisfactory and reasonable.

Mr. FULBRIGHT. Mr. President, I move that the conference report be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. GRIFFIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. AIKEN. Mr. President, I favor approval of the conference report.

Mr. FULBRIGHT. Mr. President, I renew my motion for adoption of the conference report.

The motion was agreed to.

Mr. COOK. Mr. President, I should like the record to show that I voted in the negative on the conference report.

Mr. MANSFIELD. Mr. President, I should like the record to show that I voted in the negative on the conference report.

Mr. HATFIELD. Mr. President, I should like the record to show that I voted in the negative on the conference report.

"AGNEW'S CRITERIA"

Mr. FULBRIGHT. Mr. President, my attention has been attracted to an editorial published in the Baltimore Sun of December 17, 1969, entitled "Agnew's Criteria."

I think it is a significant editorial from the leading newspaper of Baltimore and it comments upon the action that the Vice President has taken to implement the threats he made in his first speech in attacking the news media.

Those were words. Now it seems that the Vice President has proceeded to apply the principle to exclude representatives of newspapers who do not agree with his policies.

So we now have the gradual unfolding of the policy of the Vice President, that only those who agree with his approach to public policy will be allowed to report his trips.

I might say, however, that his trips around the world are not made at his expense but are public trips and thus it is assumed his traveling expenses are paid by the Government.

Therefore, I do not believe that he should properly be allowed to exclude representatives of great newspapers from access to the news because news is the breath of life to a newspaper.

I believe that this is a questionable precedent. If it is to be applied not only to newspapers but later to television, we will certainly end up with a managed press.

Mr. President, I ask unanimous consent to have the editorial printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Baltimore Sun, Dec. 17, 1969]

AGNEW'S CRITERIA

In a speech in Des Moines in mid-November, Vice President Agnew discussed the question of the handling of news and news commentary by the television networks, and then told his listeners:

"In tomorrow's edition of the Des Moines *Register* you will be able to read a news story detailing what I said tonight; editorial comment will be reserved for the editorial page, where it belongs. Should not the same wall of separation exist between news and comment on the nation's networks?"

Strictly as to newspapers, Mr. Agnew did seem at that time to understand the clear distinction any respectable newspaper makes between news on the one hand and editorial comment on the other.

Yet now, as is detailed in our news columns today, *The Sun* is denied news coverage of the Vice President's coming Asian trip in part because, according to his press secretary, Mr. Agnew dislikes editorial comment he has received on our editorial pages. This is one instance, it seems to us, in which the facts themselves provide sufficient comment.

PEACE IN VIETNAM

Mr. FULBRIGHT. Mr. President, I ask unanimous consent to have printed in the RECORD a very interesting article written by James Reston, entitled "Something Happened on the Way to Peace."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOMETHING HAPPENED ON THE WAY TO PEACE

(By James Reston)

WASHINGTON.—Despite all President Nixon's efforts to clarify his Vietnam policy in the last few weeks, two fundamental questions remain.

First, does he intend to withdraw "all of our forces" from Vietnam, or all United States "combat forces?" He says one thing one time and the other another time, and the difference between the two is estimated in official quarters at between 100,000 and 200,000 men.

Second, does his peace plan depend on his assumption that the South Vietnamese can successfully defend their country either with or without the logistical support of noncombat United States troops, and if they cannot, do we keep our troops there indefinitely?

In his Vietnam speech on November 3, Nixon said: "The American people cannot and should not be asked to support a policy which involves the overriding questions of war and peace unless they know the truth about that policy." He added in this same speech that he not only wanted peace, but had put into effect "a plan which will bring the war to an end regardless of what happens on the negotiating front."

For over a quarter of a century, Hanoi has been fighting and negotiating to get rid of all foreign troops—first against the Japanese, then the French, and now the Americans. No doubt its aim in doing so was to establish its control over all of Vietnam.

During the last few years, the United States has built at Cam Ranh Bay, on the coast of South Vietnam, an air and naval base which is the best in Asia, all the more important with the decline of Singapore and the eventual transfer by treaty of Hong Kong to China.

Accordingly, it has been a fundamental question throughout the Paris negotiations, whether the United States really meant to scale down its war effort or whether it meant to get out, leaving Cam Ranh Bay and many other modern military bases as a potential prize in the future struggles between the Vietnamese themselves.

On May 14 of this year, President Nixon stressed that the United States wanted, "no military bases" in Vietnam, "no military ties" and would accept "any government in South Vietnam that results from the free choice of the South Vietnamese people themselves."

In short, he was willing to risk then the chance that Cam Ranh Bay and all the United States military supplies in the hands of the South Vietnamese would fall to a Communist government, though he has always rejected the enemy claim that there could be "no free choice of the South Vietnamese people themselves" under the present government in Saigon.

In recent weeks, however, the Nixon administration's emphasis has seemed to change. The commitments to withdrawal have become less precise. In his November 3 speech, Nixon talked both about withdrawing "all" American forces and at another place "all combat forces." In his news conference this week, he said merely:

"We have a plan for the reduction of American forces in Vietnam, for removing all combat forces from Vietnam, regardless of what happens in negotiations."

The questions here are fairly obvious. A plan to withdraw "all forces" is one thing. but a plan to withdraw all "combat forces" could leave a couple of hundred thousand Americans in Vietnam to maintain and fly the planes and helicopter gun ships and continue to train and supply and help direct the Vietnamese.

A strong argument is made at the Pentagon for doing just that, but we do not know whether this is "the plan" and obviously it makes a difference in the enemy's calculations about whether to go on fighting or to negotiate.

The President's assumption that the South Vietnamese can successfully take over the fighting as we withdraw our combat units raises an equally interesting question. For if his policy is to stick with the South Vietnamese until they demonstrate that they are secure, all they have to do is prolong their inefficiency in order to guarantee that we will stay in the battle indefinitely.

In recent weeks, the President has run a successful and even brilliant campaign on the politics of Vietnam on the home front, but he is still stuck on the war front and the peace front.

In fact, he has done so well against his critics recently, that he may have seen persuaded the original political and strategic

objectives in Vietnam are still within his grasp. If so, he would not be the first to try it. Presidents Johnson and Kennedy passed that way themselves.

PRESIDENT NIXON'S WARNING THAT HE WILL IMPOUND FUNDS ON DOMESTIC PROGRAMS

Mr. FULBRIGHT. Mr. President, I have been intrigued by the threats, or rather the assurances, by the administration that it will not only veto congressional acts which involve spending of which it does not approve, but also according to the article entitled "Nixon May Freeze Funds" written by Dan Thomasson, that it will freeze funds which are duly appropriated for the use of the people of this country.

The reason why this has attracted my attention is that it prompts me to recall how determined the administration was when we had up such items as the ABM earlier in the year, which involved vast expenditures of public funds. In those cases, there was never mention made of the inflationary nature of those expenditures which, in most cases, will be far greater than the sums mentioned in the article. Those sums are, in many cases, quite small.

One of them is $4 billion compared to the ABM which, for example, on its first estimate would cost about $7 billion. Then upon revision, it was $10 billion. I think the latest figure now is about $15 billion. So that, by the time it gets into production no doubt it will be $30 billion to $40 billion.

Thus, it seems to me an odd inconsistency that on the one hand certain programs are inflationary while on the other hand other programs, in the weapons field particularly, are not.

Perhaps, before very long, the administration can explain to the people this inconsistency.

I ask unanimous consent to have printed in the RECORD the article to which I have referred.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NIXON MAY FREEZE FUNDS

(By Dan Thomasson)

President Nixon has warned he will impound funds in most government domestic programs during the next six months to protect the nation's already inflationary economy from further damage by excessive congressional spending and revenue reductions.

House and Senate Republican leaders said today they had expected Mr. Nixon would follow this course of not spending all Congress appropriates rather than veto congressional spending measures which would exceed his self-imposed spending limitation of $192.9 billion for this fiscal year.

The President made his intentions clear yesterday in a public letter to Congress obviously aimed at influencing conference committee action on the tax-reform bill and on several remaining appropriations measures.

Mr. Nixon said that actions already passed by at least one House of Congress could add about $4 billion to Federal spending this year and added that congressional inaction on several revenue raising requests had cost another $1 billion.

"This combination of action and inaction would load an additional $5 billion onto an already overheated economy," he said.

The President also noted that the Senate version of the tax bill would take away another $1.6 billion in revenues this fiscal year thru an increase in the personal income tax exemption and retention of part of the investment tax credit for business.

In the fact of this, Mr. Nixon said:

"If the Administration is to achieve its goal of slowing down the rise in prices, it will have to reserve funds on many popular spending programs."

"The other course—of appealing to sundry interests—would run directly counter to the public interest," he said.

Mr. Nixon appealed to leaders of both houses of Congress to join him in holding down spending "no matter what the cost of political popularity."

The President's letter came as the Senate was passing a Health, Education and Welfare Department appropriations bill providing $1 billion more than the President had requested—split about 50–50 between health research programs and Federal aid to education.

There had been reports Mr. Nixon, in a gesture to dramatize the seriousness of the fiscal situation, might take the unusual step of vetoing some appropriations bills with budget overruns.

But House GOP Leader Gerald R. Ford, Mich., said today that he believes the President wants to avoid any unnecessary confrontation with the Democratic-controlled Congress at this point and, therefore, will fall back on his authority not to spend some of the funds appropriated.

In his letter to Congress, Mr. Nixon pointed out that with the expiration of the income tax surcharge next July 1, revenues for fiscal 1971 must be figured from a base $8.5 billion lower than formerly expected.

He also said other increases in uncontrollable Federal payments, like the interest on the national debt, will raise next fiscal year's budget expenditures "probably above $200 billion."

RETURN TO THE HOUSE OF H.R. 9634

Mr. MANSFIELD. Mr. President, I ask unanimous consent that, at the request of the House, H.R. 9634, to amend title 38 of the United States Code in order to improve and make more effective the Veterans' Administration program of sharing specialized medical resources, be returned to that body.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGETS AND EXPENDITURES

Mr. WILLIAMS of Delaware. Mr. President, earlier today there was discussion about how much Congress had appropriated and how much it had allegedly saved in reducing the budget requests, and so forth.

In order to set the record straight, I thought I had better compile a tabulation. We have not reduced appropriations during this Congress.

Mr. GRIFFIN. Mr. President, the senior Senator from Delaware is making a very important statement. It should be listened to, and I hope that the Chair will call the Senate to order.

The PRESIDING OFFICER. The Senate will please be in order.

Mr. WILLIAMS of Delaware. I am going to have the various tabulations printed in the RECORD, and they show on the major appropriation bills this year that the bills as reported by the Appropriations Committee to the Senate—this does not include supplemental bills which may have been enacted last year or this year, they are assumed to cancel out—but appropriation bills as they came to the Senate, including Defense, and so forth—have been increased by a total of $6,231,901,000 above last year's appropriations.

Then, offsetting that, on three appropriations, including Defense, we reduced the total by $3,173,712,000. When we subtract that we find that the Senate this year in its appropriations appropriated $3,058,189,000 more than was appropriated for the same agencies last year. This does not include the amount added to the appropriation bills by rollcall votes or voice votes in the Senate.

This year, for example, on the HEW appropriation alone the Senate added $511 million to the committee bill. That is not included.

The breakdown shows, going back to Agriculture first, that this year for fiscal 1970 the bill as it was reported to the Senate would appropriate $7,636,797,650. That compares with $5,536,050,300 in fiscal 1969, or last year, or an increase of $2,100,747,350.

I ask unanimous consent that the committee tabulation for both of these years as appearing in the committee report be printed in the RECORD.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 11612]

The Committee on Appropriations, to which was referred the bill (H.R. 11612) making appropriations for the Department of Agriculture and related agencies for the fiscal year ending June 30, 1970, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amount of bill as passed House—Total new (obligational) authority	$6,806,655,000
Amount of increase by Senate committee—New (obligational) authority	830,142,650
Amount of bill as reported to Senate—New (obligational) authority	7,636,797,650

REPORT

[To accompany H.R. 16913]

The Committee on Appropriations, to which was referred the bill (H.R. 16913) making appropriations for the Department of Agriculture and related agencies for the fiscal year ending June 30, 1969, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amount of bill as passed House—Total new (obligational) authority	[1] $5,523,635,500
Amount of increase by Senate committee—New (obligational) authority	12,414,800
Amount of bill as reported to Senate—New (obligational) authority [2]	[1] 5,536,050,300

[1] Includes contract authorization of $220,000,000 and authorization to spend from debt receipts totaling $424,000,000, but excludes sums to liquidate contract authority; amended by Senate to include $195,5000,000 for con-

tract authorization, and $449,000,000 authorization to spend from debt receipts.

[2] Does not reflect reductions made pursuant to Public Law 90-218 and excludes proposed supplementals for 1968.

Mr. WILLIAMS of Delaware. The second is the Interior Department. This year, fiscal 1970, on the Interior Department the bill, as reported by the Senate, called for $1,544,819,900. This compared to last year's appropriation for this agency of $1,402,915,000, an increase of $141,844,100.

I ask unanimous consent that excerpts from reports Nos. 416 and 1255 on these two bills of this year and last year be printed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 12781]

The Committee on Appropriations, to which was referred the bill (H.R. 12781) making appropriations for the Department of the Interior and related agencies for the fiscal year ending June 30, 1970, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes recommended:

Amount of budget estimates, 1970	$1,569,454,500
Bill as passed by the House	1,540,184,700
Increases over House bill recommended by committee	4,635,200
Total of bill as reported	1,544,819,900

REPORT

[To accompany H.R. 17354]

The Committee on Appropriations, to which was referred the bill (H.R. 17354) making appropriations for the Department of the Interior and related agencies for the fiscal year ending June 30, 1969, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes recommended:

Amount of budget estimates, 1969 [1]	$1,577,112,300
Bill as passed by the House	1,411,680,300
Decreases under House bill recommended by committee	−8,704,500
Total of bills as reported	1,402,975,800

[1] Includes $22,000,000 for National Foundation on the Arts and the Humanities not considered by the House of Representatives.

Mr. WILLIAMS of Delaware. Mr. President, next let us consider the legislative branch. This year's appropriation bill, as reported by the Senate, authorized $344,060,817 as compared with $298,151,396 last year. This was an increase of $45,909,000 to run the legislative branch this year.

I ask unanimous consent that excerpts from the committee reports for both of these years be printed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 13763]

The Committee on Appropriations, to which was referred the bill (H.R. 13763) making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amount of bill as passed House	$284,524,057
Amount of increase by Senate committee	59,536,760
Amount of bill as reported to Senate	[1] 344,060,817

[1] Includes $59,631,260 in Senate items not considered by House.

REPORT

[To accompany H.R. 18038]

The Committee on Appropriations, to which was referred the bill (H.R. 18038) making appropriations for the legislative branch for the fiscal year ending June 30, 1969, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amount of bill as passed House	$247,497,349
Amount of increase by Senate committee	[1] 50,654,047
Amount of bill as reported to Senate	298,151,396

[1] Includes $50,423,447 not considered by House.

Mr. WILLIAMS of Delaware. Mr. President, the next appropriation I mention is for State, Justice, and Commerce. This year's appropriation bill for these agencies was $2,369,949,700 as reported to the Senate. Last year it was $1,874,444,000 for these same agencies, or an increase this year of $495,505,700 on the appropriation for these agencies.

I ask unanimous consent that the committee tabulations for these 2 years be printed in the RECORD.

There being no objection, the tabulations were ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 12964]

The Committee on Appropriations, to which was referred the bill (H.R. 12964) making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending June 30, 1970, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amounts in new budget (obligational) authority

Amount of bill as passed House	$2,335,634,200
Amount of increase by the Senate	34,315,500
Amount of bill as reported to Senate	2,369,949,700

REPORT

[To accompany H.R. 17522]

The Committee on Appropriations, to which was referred the bill (H.R. 17522) making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending June 30, 1969, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amounts in new budget (obligational) authority

Amount of bill as passed House	[1] $1,794,981,500
Amount of increase by the Senate	79,462,500
Amount of bill as reported to Senate	[1] 1,874,444,000

[1] Excludes $207,275,000 appropriations to liquidate contract authority ($206,000,000 for operating differential subsidies: $1,275,000 for State marine schools.)

Mr. WILLIAMS of Delaware. The next appropriation, Mr. President, is for the independent offices. There is a reduction in the appropriation for this department this year. Appropriations as reported to the Senate were $14,981,949,000. Last year these same agencies received $15,546,552,000, which shows a reduction for those agencies of $564.603 million. However, the record should show that while this indicates a reduction it was more than offset by supplemental appropriations later.

I ask unanimous consent that excerpts from both of those reports be printed in the RECORD at this point.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 12307]

The Committee on Appropriations, to which was referred the bill (H.R. 12307) making appropriations for sundry independent executive bureaus, boards, commissions, corporations, agencies, offices, and the Department of Housing and Urban Development, for the fiscal year ending June 30, 1970, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made.

The report reflects the new budget concept and presents the effects of the committee's recommendations in terms of new budget (obligational) authority, which includes appropriations, authorizations to spend public debt receipts, and contract authorizations, less appropriations to liquidate contract authorizations.

Amounts in new budget (obligational) authority

Amount of bill as passed House	$14,909,089,000
Amount of increase by Senate	72,860,000
Amount of bill as reported to Senate	14,981,949,000

REPORT

[To accompany H.R. 17023]

The Committee on Appropriations, to which was referred the bill (H.R. 17023) making appropriations for sundry independent executive bureaus, boards, commissions, corporations, agencies, offices, and the Department of Housing and Urban Development, for the fiscal year ending June 30, 1969, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made.

The report reflects the new budget concept and presents the effects of the committee's recommendations in terms of new budget (obligational) authority, which includes appropriations, authorizations to spend public debt receipts, and contract authorizations, less appropriations to liquidate contract authorizations.

Amounts in new budget (obligational) authority

Amount of bill as passed House	[1] $13,670,636,000
Amount of increase by Senate	1,875,916,000
Amount of bill as reported to Senate	[1] 15,546,552,000

[1] Exclude sums to liquidate contract authority ($122,000,000). Includes advance funding for urban renewal programs ($1,250,000,000).

Mr. WILLIAMS of Delaware. Next, I refer to the Public Works and pollution control appropriation. The bill as reported by the Senate this year provided for $4,993,428,500, as compared with $4,727,462,500 last year. That is an increase of $265,966,000. That was a substantial increase this year for those agencies.

I ask unanimous consent that excerpts from the committee reports on both of those bills, this year's and last year's, be printed in the RECORD at this point.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 14159]

The Committee on Appropriations, to which was referred the bill (H.R. 14159) making appropriations for public works for water, pollution control, and power development, including the Corps of Engineers—Civil, the Panama Canal, the Federal Water Pollution Control Administration, the Bureau of Reclamation, power agencies of the Department of the Interior, the Tennessee Valley Authority, the Atomic Energy Commission, and related independent agencies and commissions for the fiscal year ending June 30, 1970, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amount of bill as passed by House	$4,505,446,500
Amount of increase by Senate (net)	487,982,000
Amount of bill as reported to Senate	4,993,428,500

REPORT

[To accompany H.R. 17903]

The Committee on Appropriations, to which was referred the bill (H.R. 17903) making appropriations for water and power resources development, including the Corps of Engineers, the Panama Canal, the Bureau of Reclamation, the Federal Water Pollution Control Administration, and power agencies of the Department of the Interior, the Atlantic-Pacific Interoceanic Canal Study Commission, the Delaware River Basin Commission, the Interstate Commission on the Potomac River Basin, the Tennessee Valley Authority, the Water Resources Council, and the Atomic Energy Commission, for the fiscal year ending June 30, 1969, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amount of bill as passed House	$4,499,223,000
Amount of increase by Senate (net)	228,239,500
Amount of bill as reported to Senate	4,727,462,500

Mr. WILLIAMS of Delaware. Next, I refer to the appropriation for the Departments of Labor and HEW. This year the bill as reported by the Senate called for expenditures of $20,819,691,700. Last year these agencies received $18,488,800,000. This was an increase of $2,330,891,700. That was the big increase for those agencies. As I said before, even this increase does not include the $511 million extra which was added to this bill by amendments in the Senate this year.

I ask unanimous consent that excerpts from both of those reports be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 13111]

The Committee on Appropriations, to which was referred the bill (H.R. 13111) making appropriations for the Departments of Labor and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1970, and for other purposes report the same to the Senate with various amendments and present herewith information relative to the changes made:

Amount of bill passed by House	$17,573,602,700
Amount added by Senate (net)	3,246,089,000
Total of bill as reported to Senate	20,819,691,700

REPORT

[To accompany H.R. 18037]

The Committee on Appropriations, to which was referred the bill (H.R. 18037) making appropriations for the Departments of Labor and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1969, and for other purposes report the same to the Senate with various amendments and present herewith information relative to the changes made:

Amount of bill passed by House	$17,232,871,000
Amount added by Senate (net)	1,255,929,000
Total of bill as reported to Senate	18,488,800,000

Mr. WILLIAMS of Delaware. Next, I refer to the Department of Transportation appropriation. For fiscal 1970 the bill as reported to the Senate called for $2,140,052,630. Last year this agency operated on $1,788,341,000. This was an increase of $351,711,630.

I ask unanimous consent that excerpts from both of these reports be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 14794]

The Committee on Appropriations, to which was referred the bill (H.R. 14794), making appropriations for the Department of Transportation for the fiscal year ending June 30, 1970, and for other purposes, report the same to the Senate with various amendments and present herewith information relative to the changes made:

Amount of bill as passed House	[1] $2,095,019,630
Amount of increase by Senate (net)	45,033,000
Amount of bill as reported to Senate	[2] 2,140,052,630

[1] Includes $220,000,000 for 1971.
[2] Includes $200,000,000 for 1971.

REPORT

[To accompany H.R. 18188]

The Committee on Appropriations, to which was referred the bill (H.R. 18188), making appropriations for the Department of Transportation for the fiscal year ending June 30, 1969, and for other purposes, report the same to the Senate with various amendments and present herewith information relative to the changes made:

Amount of bill as passed House	$1,353,391,000
Amount of increase by Senate	434,950,000
Amount of bill as reported to Senate	1,788,341,000

Mr. WILLIAMS of Delaware. The military construction appropriation bill as reported to the Senate this year called for an appropriation of $1,690,064,000, which is a reduction from last year's appropriation. Last year it was $1,744,936,000, which shows a reduction of $54,872,000.

I ask unanimous consent that excerpts from both of those reports be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 14751]

The Committee on Appropriations to which was referred the bill (H.R. 14751) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes, reports the same to the Senate with various amendments, and presents herewith information relative to the changes made:

Amount of bill passed by House	$1,537,177,000
Amount of increase by Senate from the House	152,887,000
Total of bill as reported to Senate	1,690,064,000

REPORT

[To accompany H.R. 18785]

The Committee on Appropriations, to which was referred the bill (H.R. 18785) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1969, and for other purposes, reports the same to the Senate with various amendments, and presents herewith information relative to the changes made:

Amount of bill passed by House	$1,765,019,000
Amount of decrease by Senate from the House	20,083,000
Total of bill as reported to Senate	1,744,936,000

Mr. WILLIAMS of Delaware. Mr. President, last year the Department of Defense appropriation bill, as reported to the Senate, called for new expenditures in the amount of $71,886,893,000. This year the Defense Department was given $69,332,656,000, or a reduction in the Department of Defense appropriations this year of $2,554,237,000.

I ask unanimous consent that excerpts from the committee reports on both those bills be printed at this point in the RECORD.

There being no objection, the excerpts are ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 15090]

The Committee on Appropriations, to which was referred the bill H.R. 15090 making appropriations for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amount of bill as passed House (new obligational authority)	$69,960,048,000
Amount of decrease by Senate committee	−627,392,000
Total of bill as reported to Senate	69,332,656,000

REPORT

[To accompany H.R. 18707]

The Committee on Appropriations, to which was referred the bill H.R. 18707 making appropriations for the Department of Defense for the fiscal year ending June 30, 1969, and for other purposes, reports the same to the Senate with various amendments and presents herewith information relative to the changes made:

Amount of bill as passed House (new obligational authority)	$72,239,700,000
Amount of decrease by Senate committee	−352,807,000
Total of bill as reported to Senate	71,886,893,000

Mr. WILLIAMS of Delaware. The Treasury and Post Office Departments appropriations last year called for total expenditures of $8,158,877,000. This year the appropriation was $8,787,208,000, or an increase of $628,331,000 for that agency.

I ask unanimous consent that excerpts from those reports be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

REPORT

[To accompany H.R. 11582]

The Committee on Appropriations, to which was referred the bill (H.R. 11582) making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies for the fiscal year ending June 30, 1970, and for other purposes, report the same to the Senate with various amendments and present herewith information relative to the changes made:

Amount of bill as passed House	$8,779,345,000
Amount of increase by Senate	+7,863,000
Amount of bill as reported to Senate	8,787,208,000
Less net postal revenues (as estimated in 1970 budget)	−6,507,013,000
Amount of new budget (obligational) authority as reported to Senate	2,280,195,000

REPORT

[To accompany H.R. 16489]

The Committee on Appropriations, to which was referred the bill (H.R. 16489) making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies for the fiscal year ending June 30, 1969, and for other purposes, report the same to the Senate with various amendments and present herewith information relative to the changes made:

Amount of bill as passed House	$8,155,624,000
Amount of increase by Senate	+3,253,000
Amount of bill as reported to Senate	8,158,877,000
Less net postal revenues (as estimated in 1969 budget)	−6,377,824,000
Amount of new budget (obligational) authority as reported to Senate	1,781,053,000

Mr. WILLIAMS of Delaware. Mr. President, with respect to all these agencies—and I am talking about the bills as they were reported to the Senate—the Senate this year has been far more liberal than last year in increasing appropriations, and this does not include the supplemental appropriation of this year, which of course, will add to the total.

This report shows that there has been a total increase of $6,231,904,000 offset by a reduction of $3,173,712,000, which, as I stated earlier, represents an increase of over $3 billion in appropriations this year over last year for the same agencies. This does not include the increases for HEW and other agencies.

In addition, there are not included in this total the several other expenditure items which were approved by the Senate within the past 2 weeks on at least a 2-to-1 rollcall vote, which would require expenditures over and beyond those reported in the appropriation bills of an additional $10 billion if they become law. They are in conference committees at this time. I cite a few of them.

I am not referring to the increases in social security payments of 15 percent or 10 percent, whether they are to be effective January 1 or April 1, as is proposed by the administration. I am not including that in this calculation.

Let us consider a few of the amendments adopted on the floor during the debate on the tax bill. One amendment proposed an increase in social security benefits to a minimum of $100 a month. This would have cost $2 billion per year. Reducing the age of retirement to 60 would cost $600 million. The Ribicoff amendment providing tax credits for college tuition would cost $1.7 billion, and the Hartke amendment will cost $720 million, that is if they are accepted by the conference committee and become law. I assume Senators who voted for them did so in good faith. That would call for extra expenditures of $5 billion. Those expenditures were not included in the other totals, and those amounts would be expended immediately.

This has been an extravagant Congress—let that point be understood. That should be made clear for the RECORD. I do not want the impression to go out in the country that this Senate has done a tremendous job of cutting expenditures, because if we continue to cut expenditures as we have been doing we are going to put this country into bankruptcy. At the rate that this Congress proposes to spend money it will bankrupt the Federal Treasury.

When we discuss appropriations we should keep in mind those which call for prompt spending and those that call for projected spending. It is true that the so-called $5 billion in these reductions in appropriations are, to a large extent reductions from requests, as pointed out in the colloquy with the Senator from Wisconsin, and are not reductions in expenditures as compared with last year. In fact, we find these agencies always ask for more than they expect to get. They are always reduced, but even after their requests are reduced the final answer has been an increase of billions. It is like the wife who goes to look at a hat and finds a $75 hat marked down to $40. She buys it and goes home and tells her husband that she has saved $35, when she has actually paid $20 more than she ordinarily would have paid.

Congress has appropriated this year $3 billion to $4 billion more than it appropriated last year for comparable agencies, and that cannot be described as a reduction in any language. The Senate has authorized increases in expenditures which if they become law will amount to extra expenditures of over $7 billion. Sure we reduced Defense appropriations by a couple of billion dollars below last year's level, but we also cut it last year by $2.5 billion. In both instances, however, we are cutting back expenditures projected for the future. I support that. The only way we are going to cut expenditures this year and next year is by cutting appropriations today and stopping the authorization of these expenditures, but let us not kid the taxpayers that this means an immediate reduction.

Many of these programs trigger mandatory expenditures, and to that extent they are fanning the fires of inflation. That is what the President was speaking about last night when he referred to the HEW expenditures. Many of these programs are triggered into action immediately upon becoming law. They are programs, in which the Government would have no choice but to spend the money. The President does not have the authority to impound the funds of some of these programs comparable to what he can do with respect to many other agencies. For example, suppose Congress decides it wants to approve x million dollars for a nuclear carrier. That may represent an appropriation of hundreds of millions of dollars, but it is not going to be spent for many years to come. They are projected expenditures, and theoretically the President can impound those funds and not spend them at all. He does have discretionary authority to impound at least some of these funds, and to that extent it is his responsibility as well as our responsibility.

But the President has promised to hold the total expenditures for this fiscal year down to $192.9 billion. This Congress, by an overwhelming vote, instructed him to hold it to $191.9 billion, but it cannot be held to that figure unless we in Congress cooperate. If Congress insists, for example, on overriding his veto and approves these larger programs that require expenditures above what is in the budget he must either make an offsetting reduction in some other department, which may hurt more, or exceed the ceiling.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield to the Senator from Wisconsin.

Mr. PROXMIRE. First, Mr. President, the Senator from Delaware has devoted most of this discussion to a contrast between this year's appropriations and last year's appropriations.

Mr. WILLIAMS of Delaware. That is correct.

Mr. PROXMIRE. He does not dispute what he said this morning, which is that Congress has reduced appropriations be-

low the President's budget requests by about $5 billion.

Mr. WILLIAMS of Delaware. That is right, but that is not at all unusual. Last year we reduced President Johnson's budget by $7 billion. We always reduce it below the budget request, but that does not alter the fact that in the end the appropriations were still increased above the expenditures of last year.

Mr. PROXMIRE. But, Mr. President, there have been very few Congresses that have reduced it this far below the request. This Congress has done a better job than Congresses have usually done in reducing the expenditures recommended by the President.

In the second place, the statistics given by the Senator from Delaware show that there was a net increase in appropriations over last year of less than $3 billion. This is true. The appropriations that he considered amount to approximately $1 billion. This means an increase of only about 2 percent, while we have had inflation, since last year, of 5 percent. That means that in terms of resources actually at work appropriated by Congress, we are actually reducing the resources, not increasing them.

I agree with the Senator from Delaware that we ought to do all we possibly can to hold down expenditures. When you consider that there are wage increases involved here, and very serious price increases involved, the fact is that this Congress has done a job of holding down expenditures that I think should not be distorted because of the fact that there have been some increases involved also.

Mr. WILLIAMS of Delaware. I am not trying to distort the picture.

Mr. PROXMIRE. I know the Senator is not. He is very fair and responsible.

Mr. WILLIAMS of Delaware. As I say, we have reduced the President's budget requests this year, but last year Congress reduced the President's figures by about $7 or $8 billion. The agencies always ask for more than they expect to be appropriated.

The Senator points out that there have been salary increases. That is true, and those are not figured into this calculation. They will have to be offset with supplemental appropriations, which will increase the expenditures over and beyond this figure I am using here today.

Those are the items over which we have no control. And I remind the Senator that I have just pointed out that the $3 billion in extra appropriations which were in the first tabulation do not include the more than $10-billion in additional expenditures voted here on the floor of the Senate during the past 2 weeks when we had the tax reform bill before us. Many of these multibillion-dollar expenditures were passed with but two dissenting votes on the other side of the aisle, so I assume they were all for it. There were only two dissenting votes recorded against the $10 billion in added expenditures attached to the so-called tax reform bill.

Mr. PROXMIRE. As to the salary increase, in the one appropriation bill that I handled and worked on, the District of Columbia appropriation bill, one of the big reasons why we had to appropriate the amount we did—and, incidentally, we were about 25 percent below the President's budget request—was that there was a salary increase for 1970 over 1969. There will be another increase coming on, but there already is an increase written into that appropriation bill, and I am sure that is probably true as to each and every appropriation bill we have passed.

Mr. WILLIAMS of Delaware. No. The increases are not all provided for in the appropriation bills. Many of them developed later and will need extra appropriations.

Mr. PROXMIRE. Not all of them, that is true.

Mr. WILLIAMS of Delaware. In addition, this does not include the additional $5 billion in expenditures that will be triggered as a result of the votes in Congress during the last 2 weeks on four items alone. If those who voted for them meant what they said, if they honestly voted for those measures, such as the $2 billion for the $100 minimum for social security, or the $1.7 billion for a tax credit for college tuition, or the $600 million to reduce the retirement age to 60, or the $700 million cost of the Hartke amendment which provided for a $20,000 exemption, across the board, on the investment tax credit, then the increased expenditures are over $5 billion.

Now, if those measures were only approved by Senators with tongue in cheek, Senators who had no thought that the conferees would agree to them, and there are to be no appropriations made one could subtract that $5 billion and just call it all political poppycock.

Mr. PROXMIRE. Of course, we cannot separate the one from the other. They have the same effect on the budget.

Mr. WILLIAMS of Delaware. I am putting them on the basis of how they are going to affect the total expenditures. When we are talking about combating inflation we have to talk about the total expenditures being approved. Surely we can assume these additional $5 billion in expenditures were voted for in good faith—and I do not question the good faith of those who voted for them—then there is an additional $5 billion going into the spending stream, and that must be included in the Senator's report.

If Senators are perfectly satisfied just to show their constituents back home that they voted for the benefits but they have no intention of those provisions becoming law. I agree it will have no effect on inflation, but we will know when we get the conference report whether this was but merely a political maneuver.

I do not want the statement to go unchallenged that this Congress, particularly the Senate, has such an excellent record for economy, because I must say we are going to end up in the poorhouse at the rate we are saving money. This has been one of the most extravagant Congresses on record.

We had a deficit 2 years ago of $25 billion. We had a deficit last year, and we will have a deficit again this year. We are running behind right now at a rate of over $700 million a month. We are borrowing that much to finance this Government. I do not think we can finance the expanding requirements of this Government unless we continue to borrow, which will further fan the fires of inflation.

Everyone professes to be concerned about the high interest rates, but the reason that there are high interest rates is that there is a shortage of money to borrow. If you do not believe it ask the young couple who are trying to finance a mortgage for their home. They cannot find the money at reasonable rates. They have to pay an exorbitant rate, and that is because the Government is continuously going to the money market and siphoning off all the available investment capital. Savings that would normally be available for investment are used to finance the cost of expanding Government.

To finance the deficit just a couple of years ago we took $25 billion out of the economy in 1 year. We are operating now at a deficit rate of $700 million a month.

Our national debt today is around $372 billion. It was $350 billion just 17 months ago. We simply cannot continue to go down the road of borrowing money to finance all of the many programs that are now in effect.

The same is true of tax reduction. We talk about reducing taxes. Certainly we would all like to reduce taxes, but if we expect to reduce taxes merely by borrowing money, paying 8 percent for the money in order to finance the tax reduction, we will only be kidding ourselves. We will not be getting anywhere. The only real way to reduce taxes is to cut back first on the cost of operating the Government.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. FULBRIGHT. The Senator said a moment ago, in his discussion with the Senator from Wisconsin (Mr. PROXMIRE), that there was a reduction last year, fiscal year 1969, of $7 billion below the budget estimate, and this year, $5 billion. To which budget is this reduction related?

Mr. WILLIAMS of Delaware. Both the Nixon budget and the Johnson budget.

Mr. FULBRIGHT. The Johnson budget for fiscal 1969 provided a reduction of $7 billion?

Mr. WILLIAMS of Delaware. No, but the Congress reduced the Johnson budget.

Mr. FULBRIGHT. How much has the Johnson budget for 1970 been reduced from the Nixon budget for 1970?

Mr. WILLIAMS of Delaware. I think the Johnson proposed budget for 1970 was about $3 billion or $4 billion higher than the Nixon budget. I do not have the exact figures before me. Perhaps the Senator from Wisconsin could tell us.

Mr. PROXMIRE. It was $3 billion or $4 billion higher in this case alone.

Mr. FULBRIGHT. Let us take the Johnson budget in both instances, the one for 1969, the other for 1970. There has been a larger decrease this year from last year in relation to the Johnson budget, has there not?

Mr. WILLIAMS of Delaware. If we compare what was appropriated with what President Johnson asked we can say that we have saved a lot of money. The mere fact that Johnson or Nixon

or any other President asked for a specific amount does not mean that they need the full amount.

Mr. FULBRIGHT. The Senator from Delaware is the one who made the comparison. I was only taking the Johnson budget to begin with. I confess that it is like a sleight-of-hand trick. It is not unusual for Presidents to request large amounts and then show how economical they have been at the end of the year, after their requests have been reduced.

Mr. WILLIAMS of Delaware. They might need but $80 million; yet they ask for $100 million, get $90 million, and then say that they saved $10 million. The country will go broke on that kind of savings.

Mr. FULBRIGHT. I asked how the Senator from Delaware compared the Johnson budget with the Nixon budget, after the Nixon budget came with a reduced request.

Mr. WILLIAMS of Delaware. I wish the Senator from Arkansas had paid attention, I was comparing appropriations this year with appropriations last year, and the Senator from Wisconsin referred to appropriations requested in the Johnson budget.

Mr. FULBRIGHT. I was making the same point the Senator was making with regard to the reduction below the budget estimate. It seems to me that the big difference is the difference between the present administration's requests and what Congress has provided with respect to priorities for which to spend the money. Earlier this year Congress made a determined effort to cut both immediate and future expenditures on a gadget called the ABM. The Senator will recall that we spent some time on that item. The administration went all-out to prevent this body from reducing expenditures in this field, did it not?

Mr WILLIAMS of Delaware. That is correct. I think about $300 million was involved at the time.

Mr. FULBRIGHT. It was estimated to be anywhere from $10 billion to $20 billion over a period of years, but $300 million immediately. Actually, in this year's budget, $300 million-plus is provided, not all to be expended immediately, but a substantial amount.

Then we come to the SST. That is another matter in which the Senator from Wisconsin has been interested. There was a debate about the matter and we fought this.

The administration used all of its power to pass this kind of an appropriation. Congress comes along now in some instances and wishes to change the priority. And the administration is deeply opposed to it.

I think this is much more significant than the overall amount. There is a difference of opinion as to what is important in our expenditures.

Mr. WILLIAMS of Delaware. There is no question about it.

Mr. FULBRIGHT. None of us want to spend money for the sake of spending. I do not want to leave the impression that Congress is profligate in spending money.

On the one hand, the administration gets its way in the field of weapons and in the field of war. I would have assumed that the war would have been wound down by now. But it has not. On the other hand, Congress is getting impatient to respond to the demands of the people in this country.

That leads to a divergence which is very serious.

I agree with the Senator that if we continue to do this, we will go bankrupt. This is a very sad commentary to make, but basically there is a difference in views on what is important to the country.

Neither side wants us to go broke. However, each side believes that the particular expenditures in which they are interested are much more important to the country than those of the other.

Mr. WILLIAMS of Delaware. I appreciate that. I am not debating the merits or the demerits of individual programs at the moment.

I would expect that if each Senator issued a list of priorities we would get 100 variations on priorities. However, the Senate does finally let the majority opinion establish priorities.

I am not debating the merits or demerits or the priorities. I am taking the view that at this point we are spending far beyond our income, and we certainly have to take that into consideration.

I agreed with the Senator from Wisconsin earlier today that the fact that Congress did cut the budget request and made reductions in Defense and other items is good, and as the long-range effect there will be substantial reductions in expenditures.

The Senator is correct. We cannot always evaluate the long-range cost of today's appropriations.

In the Public Works program one item involved between $60 million and $70 million. The money was for the initial costs on a series of new public works projects. The Senator from Wisconsin and I joined in an effort to delete that section. If we had been successful we would have stopped projects that when completed would have cost over $1.5 billion.

We cannot always relate today's cost to the long-range cost.

As an example, I have here the most recent daily Treasury reports. The date is December 11. It shows that in the first 5 months of this fiscal year our expenditures, or withdrawals, totaled $104,244,000,000 as compared to $94,493,000,000 in a comparable 5½ months in the last fiscal year. That is an increase of around $10 billion in spending.

To offset that, our income or deposits from all categories of the Government were $84.8 billion this year as compared with $78.8 billion last year. Our income from all departments—excise taxes, employment taxes, income taxes, and other income—has increased in this 5½ month period by around $6 billion, but our spending has increased by around $9.5 billion to $10 billion.

That means that we are about $3.5 billion further behind this fiscal year than we were last fiscal year.

I am speaking on a cash basis. That is what we are dealing with when we speak of inflation.

It is true that to the extent we hold down future appropriations the ultimate effect will be expenditure reductions in years to come. However, we need some immediate reductions, right now.

I call attention to the fact that it is costing us now over $1 billion a month just to pay the interest on the national debt. At some point, somewhere, we have to stop adding to these appropriations and adding to the necessity for the Government to borrow money in order to finance their costs.

I think another problem has been—and I made this statement many times when President Johnson was in office—the practice of what I called a phony bookkeeping system under which we include, as if it were normal income, the assets accruing in the various trust funds and use that increase in order to report to the American taxpayers a balanced budget or a surplus. It is misleading to the American taxpayer, and I criticized it on many occasions as a deceitful practice.

I regret to say that the present administration has adopted the same accounting system. I think it is just as wrong and misleading today to include trust funds as though they were normal revenue as it was when it was done under the preceding administration.

By no stretch of the imagination can the Government spend one dime of this trust fund money to defray the cost of building a battleship or paying the salaries of the Government employees or to defray the cost of any single Government program. It cannot do it under the law.

These are trust funds, and the Government is the trustee. I think it is misleading to the American people to include those accumulated accounts as though they were normal revenue for the purpose of presenting a good financial report to the American taxpayers as to what it costs to operate the Government.

I criticized this phony practice very strongly under the preceding administration, and I do not think any more of it today.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. HANSEN. Mr. President, I understood the Senator to say that the initial appropriations made by this Congress exceeded those of the previous Congress. I am not speaking about the supplemental appropriations, but am comparing the appropriations of this year with a year earlier.

Mr. WILLIAMS of Delaware. The Senator is correct. They exceed last year's by about $3 billion. After we make the allowance for the reduction in defense and the other reductions the net total is an increase of around $3 billion. It is more than $3 billion when we consider what was added on the floor of the Senate, and that does not include the $10 billion revenue loss that would arise from the series of Senate amendments attached to the so-called tax reform bill.

Mr. HANSEN. Mr. President, does the Senator agree that President Nixon in the presentation of the budget to Congress planned sufficient revenue so as not to add to the imbalance in our budget?

Mr. WILLIAMS of Delaware. Yes, but

we cannot answer that until we find out exactly what happens to the so-called tax reform bill which is now pending in the conference. I can only say that the bill as it was passed by the Senate would have played havoc with expenditures in the next calendar or fiscal year. The total cost of the Senate amendments was approximately $10.5 billion more than was in the budget. When fully effective they would increase the expenditures on an annual basis of about $10.5 billion. In approving those large tax reductions and increased expenditures the Senate was acting most irresponsibly.

Mr. HANSEN. If we are talking about inflation and about the success or the lack of success that probably characterizes our present position, is it not fair to look at not only those expenditures which have been authorized by Congress but to examine as well the sources of revenue upon which the Federal Government must depend in order to meet those expenses?

Mr. WILLIAMS of Delaware. That is correct.

I think that two of the mistakes this Congress has made in connection with combating inflation was the delayed action in either extending or not extending the surcharge, delay in answering the question of whether we would or would not repeal the investment tax credit and, if so, the effective date and what the exemptions would be, so that business would know what we were doing. There is no excuse for this delayed action.

I think this uncertainty creates further disturbances and problems in American business, and it is most unfortunate.

By the same token, I think that the delay by Congress last year in acting on President Johnson's request for the surcharge—I think his request was in January—interfered with his efforts to combat inflation at that time. I think it took us until July to get it passed. If we had done it promptly I believe it would have been much better, even though we made it retroactive and the final answer came out the same mathematically. An equally contributing factor to the present inflation was President Johnson's refusal to cooperate in reducing government expenditures.

Another mistake that was made with respect to inflation was that after we did finally pass the surcharge last year the Federal Reserve Board loosened credit and pumped a considerable amount of money into the economy in the last 6 months of last year, over and beyond that which was normal. I think the Federal Reserve Board agree they made a mistake.

Mr. HANSEN. I agree with the Senator that, certainly, we have to examine closely, as he has done—and I compliment him for it—the expenditures that have been made.

I criticize, with him, the unified budget that has been embraced by this administration. I criticized President Johnson a year ago when he proposed to present a budget to Congress which I thought was deceptive and misleading because it did not tell the public what the facts were, and I think the same charges are equally applicable today. The trouble with the unified budget is that it introduces elements into the total Federal fiscal picture which are misleading.

I invite the Senator's response to this question: While we do not yet know what the conference committee report will show on the tax bill, insofar as the actions of Congress go, what is the opinion of the senior Senator from Delaware as to the recommendations coming from the Senate with respect to reductions in income?

In order that I might be better understood, let me try to illustrate what I am asking the Senator.

When we increase the personal exemption from $600 to $800, will this have an impact upon the income from the income tax that would ordinarily come to the Federal Government?

Mr. WILLIAMS of Delaware. As it was passed by the Senate, the impact in the next 2 years would have been approximately $6.1 billion reduction in revenue. There was some offsetting tax reform in that bill, but we should set the record straight on that. While they figured that there was a net $6.4 billion increase in revenue under the tax reform bill, so to speak, as it left the Senate this amount was arrived at in this manner: The extension of the excise taxes on automobiles and telephones for the next 12 months, which everybody concedes is going to be done, was $4.2 billion of that. The repeal of the investment tax credit last April would be $2.5 billion of additional revenue in this fiscal year, and it would ultimately go to $3.3 billion. That is not exactly tax reform. The additional revenue from the tax reform bill as it was reported by the committee would be $1.4 billion. To offset that, the committee bill would reduce taxes next year for the low-income taxpayers by $1.7 billion, thus leaving a gain of about $6.4 billion.

That tax reform revenue includes the change in depletion allowance, the change in the recapture clause of the depreciation, and so forth. But the Senate whittled that $1.4 billion tax reform revenue away by $500 million, and as the bill was passed by the Senate it only provided $900 million additional revenue from tax reform.

I do not think you can take that figure and then say that you are going to use that revenue to finance a $4-billion to $5-billion tax reduction.

I do not question the arguments that can be made for tax reduction—if only you did not have to finance it with borrowed money. For example, if you finance the $6-billion tax reduction with borrowed money it will cost the Government $480 million a year for the interest to provide that tax reduction. I do not think that makes sense, and I do not think the American people think so. Such irresponsible action only further fans the fires of inflation.

Every time the cost of living is increased 1 percent in this country it costs the consumers of America $5 billion in increased cost of living. We are pricing many a young man out of the market when he wants to buy a home and start his family. He cannot get a mortgage, and he cannot afford to pay the interest.

We have to give some consideration to the impact that inflation is having on these people, as well as the fact that this inflation has pauperized many of the retired people in this country.

Mr. HANSEN. Is it not a fact that since the last social security increase was authorized—which, as I recall, was less than 2 years ago—the cost of living has risen 9¼ percent?

Mr. WILLIAMS of Delaware. That is correct, and if we do not check inflation, regardless of what increase is made in social security, it will be taken away from them in a few months. In order to help these people we in Congress, as well as the administration, must take the steps to reduce the cost of government. I am not placing all the blame in Congress, but we have to check this inflationary spiral. Many a man in this country retired 10 years ago on what the Senator and I would have advised him was adequate to take care of him and his wife the rest of their lives, the income from a pension or from his life insurance or savings, but as a result of the increased cost of living, or the reduced purchasing power of the dollar, which is the definition of inflation, that man today is having a job to meet the living costs of his family. Many of them have to resort to public welfare in order to survive. I think it is a crime that as a result of inflation our Government has destroyed the security of many a hard-working American who retired on what he thought was an adequate amount. We in Congress and the administration—this administration or the preceding administrations, whichever it may be—are responsible for this inflationary spiral. I think we have the responsibility to bring it under control, and it cannot be brought under control by a continuation of the spendthrift tactics of this present Congress.

This Congress, especially the Senate did not act fiscally responsible when it turned what started out as a tax reform measure into a politically motivated Santa Claus package, promising benefits to a lot of people that they never intended to become law. In order to bring inflation under control it is going to mean all of us are going to have to say no to a lot of programs that have a lot of merit—programs that we would like to support in normal times but which we recognize we cannot afford today.

I hope that in this Congress, working together on both sides of the aisle, we can bring these expenditures under control. What I am stating here is not in contradiction of the remarks of the Senator from Wisconsin (Mr. PROXMIRE) earlier today. He was speaking about reductions in projected expenditures. I support him, and I have supported him on many proposals. What I have outlined today is how we have increased the cost of government far above what it cost only a year ago. This has been the most expensive Congress in American history.

I yield the floor.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I am about to call up the conference report on military construction. I wish to inform the Senate that following this it is my intention to call up the conference report on OEO.

MILITARY CONSTRUCTION APPROPRIATION BILL, 1970—CONFERENCE REPORT

Mr. MANSFIELD. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 14751) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The assistant legislative clerk read the report. (For conference report, see House proceedings of December 18, 1969, p. 39886, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. MANSFIELD. Mr. President, the committee agreed on an overall figure of $1,647,074,000 for the military construction bill for fiscal year 1970. This is an amount of $42,990,000 under the figure allowed by the Senate and $109,897,000 over the amount approved by the House, and $356,844,000 under the budget estimate of $2,003,918,000. The conferees agreed on the following amounts for the military services and the Department of Defense:

Army, $287,228,000.
Navy, $300,028,000.
Air Force, $284,327,000.
Defense agencies, $33,915,000.
Army National Guard, $15,000,000.
Air National Guard, $13,200,000.
Army Reserve, $10,000,000.
Naval Reserve, $9,600,000.
Air Force Reserve, $5,300,000.
Family housing, $688,476,000.

Mr. President, I wish to emphasize that the military construction bill this year is indeed an austere bill. The percentage of reduction for the military services from the budget estimate amounts to approximately 23 percent. However, I wish to point out that this bill provides for all of the essential operational facilities needed by the military services. I can state categorically that there are no moneys in this bill which would afford plush accommodations for the military services.

I do not intend to make a long and involved statement of the conference committee's actions. The conference report and the statement of the managers on the part of the House explain in a succinct manner the complete action of the committee.

I shall be glad to answer any questions which individual Senators may have regarding construction projects in their State.

I ask unanimous consent at the conclusion of my remarks on this bill that a tabulation comprising the summary of the conference action on the military construction appropriation bill for fiscal year 1970 be included in the RECORD.

The PRESIDING OFFICER (Mr. GRAVEL in the chair). Without objection, it is so ordered.

(See exhibit 1.)

Mr. MANSFIELD. Mr. President, before I close, I wish to thank the members of the Military Construction Subcommittee who assisted in the preparation of this bill. The penetrating questions asked at the hearings, as well as their measured judgment in the consideration of the bill, were of inestimable help. I wish to thank particularly the ranking minority member of the subcommittee, the junior Senator from Delaware (Mr. BOGGS), the senior Senator from Nevada (Mr. BIBLE), and the ranking minority member of the full committee, the senior Senator from North Dakota (Mr. YOUNG). Their faithful attendance at the hearings, sound judgment, and complete cooperation are deeply appreciated. The thanks of the committee also goes to our able counsel, V. M. (Mike) Rexroad, for his outstanding services, his keen understanding, and his deep devotion to his work.

I would also like to thank the able staff member of the Armed Services Committee, Mr. Gordon Nease, and Mr. Edmund Hartung, the minority counsel, for their fine help and advice.

EXHIBIT 1—SUMMARY OF CONGRESSIONAL ACTION ON THE MILITARY CONSTRUCTION APPROPRIATION BILL, 1970 (H.R. 14751)

Item	New budget (obligational) authority, fiscal year 1969	Budget estimates of new (obligational) authority, fiscal year 1970	New budget (obligational) authority recommended in the House bill	New budget (obligational) authority recommended in the Senate bill	Conference action	Conference action compared with— Budget estimate	House	Senate
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Appropriations:								
Military construction, Army	$548,126,000	$395,600,000	$240,446,000	$297,597,000	$287,228,000	−$108,372,000	+$46,782,000	−$10,369,000
Military construction, Navy	291,513,000	397,200,000	271,605,000	305,377,000	300,028,000	−97,172,000	+28,423,000	−5,349,000
Military construction, Air Force	222,141,000	389,100,000	253,505,000	302,349,000	284,327,000	−104,773,000	+30,822,000	−18,022,000
Military construction, defense agencies	83,396,000	74,500,000	28,720,000	43,165,000	33,915,000	−40,585,000	+5,195,000	−9,250,000
Transfer, not to exceed	(20,000,000)	(20,000,000)	(20,000,000)	(20,000,000)	(20,000,000)			
Military construction, Army National Guard	2,700,000	15,000,000	15,000,000	15,000,000	15,000,000			
Military construction, Air National Guard	8,300,000	13,200,000	13,200,000	13,200,000	13,200,000			
Military construction, Army Reserve	3,000,000	10,000,000	10,000,000	10,000,000	10,000,000			
Military construction, Naval Reserve	5,000,000	9,600,000	9,600,000	9,600,000	9,600,000

Mr. MANSFIELD. Mr. President, I move the adoption of the conference report.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. WILLIAMS of Delaware. Mr. President, I as one who has just made reference to the excesses in our appropriations for this fiscal year I would like to point out that this is one of the three appropriation bills that were approved at a lower figure than last year. The tabulation which I had printed in the RECORD earlier showed a $54,872,000 reduction for this agency as compared with last year's. I wish we had a similar report for the other appropriations but unfortunately we do not.

Mr. MANSFIELD. I am delighted to have the recognition accorded to this committee. It is well merited.

Mr. BOGGS. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. BOGGS. Mr. President, I wish to add my support to the report of the conference, which has just been made by the Senator from Montana (Mr. MANSFIELD). I feel satisfied the needs of the services have been met and at the same time every possible economy has been made.

Mr. MANSFIELD. Mr. President, I move that the conference report be agreed to.

The report was agreed to.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION TO MAKE CORRECTIONS IN THE ENROLLMENT OF MILITARY CONSTRUCTION APPROPRIATION BILL

Mr. MANSFIELD. Mr. President, I ask that the Presiding Officer lay before the Senate a message received today from the House of Representatives in connection with the military construction appropriation bill which has just been

passed, and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair lays before the Senate Concurrent Resolution 473, received today from the House of Representatives, which will be stated.

The legislative clerk read as follows:

H. CON. RES. 473

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives, in the enrollment of the bill (H.R. 14751) making appropriations for military construction for the Department or Defense for the fiscal year ending June 30, 1970, and for other purposes, is hereby authorized and directed to make the following correction in the text of the House engrossed bill:

On page two of the House engrossed bill, strike out "Public Law 91-____" and insert "Public Law 91-121."

Mr. MANSFIELD. Mr. President, this measure does not in any way conflict with the total amount; it is merely the correction of an error and a technical oversight.

I ask for the adoption of the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 473) was agreed to.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT UNTIL TOMORROW, SATURDAY, DECEMBER 20, 1969, AT 12 O'CLOCK NOON

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ECONOMIC OPPORTUNITY AMENDMENTS OF 1969—CONFERENCE REPORT

Mr. NELSON. Mr. President, I file the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3016) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, to authorize advance funding of such programs, and for other purposes. I ask unanimous consent that the conference report be printed in the RECORD.

There being no objection, the conference report was ordered to be printed in the RECORD, as follows:

CONFERENCE REPORT (H. REPT. 91-778)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3016) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, to authorize advance funding of such programs, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

That this Act may be cited as the "Economic Opportunity Amendments of 1969".

TITLE I—EXTENSION OF THE ECONOMIC OPPORTUNITY ACT OF 1964 AND RELATED PROVISIONS

EXTENSION OF ECONOMIC OPPORTUNITY ACT

SEC. 101. (a) Section 161 of the Economic Opportunity Act of 1964 (redesignated section 171 by section 201 of this Act) is amended (1) by striking out "for which he is responsible", and (2) by striking out "three" and inserting in lieu thereof "five".

(b) Sections 245, 321, 408, 615, and 835 of such Act are each amended by striking out "three" and inserting in lieu thereof "five".

(c) Section 523 of such Act is amended by striking out "two" and inserting in lieu thereof "four".

AUTHORIZATION OF APPROPRIATIONS

SEC. 102. (a) For the purpose of carrying out the Economic Opportunity Act of 1964, there are hereby authorized to be appropriated $2,195,500,000 for the fiscal year ending June 30, 1970, and $2,295,500,000 for the fiscal year ending June 30, 1971.

(b) Notwithstanding any other provision of law, unless expressly in limitation of the provisions of this section, of the amounts appropriated pursuant to subsection (a) of this section for the fiscal year ending June 30, 1970, and for the next fiscal year, the Director shall for each such fiscal year reserve and make available not less than $328,900,000 for the purpose of local initiative programs authorized under section 221 of the Economic Opportunity Act of 1964 and the remainder of such amounts shall be allocated, subject to the provisions of section 616 of such Act, in such a manner that of such remaining amounts so appropriated for each fiscal year—

(1) $890,300,000 shall be for the purpose of carrying out parts A and B of title I (relating to work and training programs);

(2) $46,000,000 shall be for the purpose of carrying out part D of title I (relating to special impact programs);

(3) $20,000,000 shall be for the purpose of carrying out part E of title I (relating to special work and career development programs);

(4) $811,300,000 shall be for the purpose of carrying out title II, of which $398,000,000 shall be for the Project Headstart program described in section 222(a)(1), $90,000,000 shall be for the Follow Through program described in section 222(a)(2), $58,000,000 shall be for the Legal Services program described in section 222(a)(3), $80,000,000 shall be for the Comprehensive Health Services program described in section 222(a)(4), $62,500,000 shall be for the Emergency Food and Medical Services program described in section 222(a)(5), $15,000,000 shall be for the Family Planning program described in section 222(a)(6), and $8,800,000 shall be for the Senior Opportunities and Services program described in section 222(a)(7);

(5) $12,000,000 shall be for the purpose of carrying out part A of title III (relating to rural loans);

(6) $34,000,000 shall be for the purpose of carrying out part B of title III (relating to assistance for migrant and seasonal farmworkers);

(7) $16,000,000 shall be for the purpose of carrying out title VI (relating to administration and coordination); and

(8) $37,000,000 shall be for the purpose of carrying out title VIII (relating to VISTA).

If the amounts appropriated pursuant to subsection (a) of this section for any fiscal year are not sufficient to allocate the full amounts specified for each of the purposes set forth in clauses (1) through (8) of this subsection, then the amount specified in each such clause shall be prorated to determine the allocations required for each such purpose.

(c) In addition to the amounts authorized to be appropriated pursuant to subsection (a) of this section, there are further authorized to be appropriated the following:

(1) $14,000,000 for the fiscal year ending June 30, 1971, to be used for the Special Impact programs described in part D of title I;

(2) $34,700,000 for the fiscal year ending June 30, 1971, to be used for the Special Work and Career Development programs described in part E of title I;

(3) $180,000,000 for the fiscal year ending June 30, 1971, to be used for the Project Headstart program described in section 222(a)(1);

(4) $32,000,000 for the fiscal year ending June 30, 1971, to be used for the Legal Services program described in section 222(a)(3);

(5) $80,000,000 for the fiscal year ending June 30, 1971, to be used for the Comprehensive Health Services program described in section 222(a)(4);

(6) $112,500,000 for the fiscal year ending June 30, 1971, to be used for the Emergency Food and Medical Services program described in section 222(a)(5);

(7) $15,000,000 for the fiscal year ending June 30, 1971, to be used for the Family Planning program described in section 222(a)(6);

(8) $3,200,000 for the fiscal year ending June 30, 1971, to be used for the Senior Opportunities and Services program described in section 222(a)(7);

(9) $15,000,000 for the fiscal year ending June 30, 1971, to be used for the program of assistance for migrant and seasonal farmworkers described in part B of title III; and

(10) $50,000,000 for the fiscal year ending June 30, 1971, to be used for Day Care projects described in part B of title V.

PARTICIPATION OF CHILDREN IN HEADSTART PROJECTS

SEC. 103. Paragraph (1) of section 222(a) of the Economic Opportunity Act of 1964 is amended by adding at the end thereof the following new sentences: "Pursuant to such regulations as the Director may prescribe, persons who are not members of low-income families may be permitted to receive services in projects assisted under this paragraph. A family which is not low income shall be required to make payment, or have payment made in its behalf, in whole or in part for such services where the family's income is, or becomes through employment or otherwise, such as to make such payment appropriate."

AMENDMENTS WITH RESPECT TO LEGAL SERVICES PROGRAM

SEC. 104. (a) Section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by striking out "counseling, education, and other appropriate services" and inserting in lieu thereof "legal counseling, education in legal matters, and other appropriate legal services".

(b) Section 222(a)(3) of such Act is amended by adding at the end thereof the following: "Members of the Armed Forces, and members of their immediate families, shall be eligible to obtain legal services under such programs in cases of extreme hardship (determined in accordance with regulations of the Director issued after consultation with the Secretary of Defense): *Provided*, That nothing in this sentence shall be so construed as to require the Director to expand or enlarge existing programs or to initiate new programs in order to carry out the provisions of this sentence, unless and until the Secretary of Defense assumes the cost of such services and has reached agreement

with the Director on reimbursement for all such additional costs as may be incurred in carrying out the provisions of this sentence."

EMERGENCY FOOD AND MEDICAL SERVICES

SEC. 105. Section 222(a)(5) of the Economic Opportunity act of 1964 is amended to read as follows:

(5) A program to be known as 'Emergency Food and Medical Services' designed to provide on an emergency basis, directly or by delegation of authority pursuant to the provisions of title VI of this Act, financial assistance for the provision of such medical supplies and services, nutritional foodstuffs, and related services, as may be necessary to counteract conditions of starvation or malnutrition among the poor. Such assistance may be provided by way of supplement to such other assistance as may be extended under the provisions of other Federal programs, and may be used to extend and broaden such programs to serve economically disadvantaged individuals and families where such services are not now provided and without regard to the requirements of such laws for local or State administration or financial participation. In extending such assistance, the Director may make grants to community action agencies or local public or private nonprofit organizations or agencies to carry out the purposes of this paragraph. The Director is authorized to carry out the functions under this paragraph through the Secretary of Agriculture and the Secretary of Health, Education, and Welfare in a manner that will insure the availability of such medical supplies and services, nutritional foodstuffs, and related services through a community action agency where feasible, or other agencies or organizations if no such agency exists or is able to administer programs to provide such foodstuffs, medical services, and supplies to needy individuals and families."

NEW SPECIAL EMPHASIS PROGRAMS AUTHORIZED

SEC. 106. Section 222(a) of the Economic Opportunity Act of 1964 is amended by adding at the end thereof the following new paragraphs:

"(8) An 'Alcoholic Counseling and Recovery' program designed to discover and treat the disease of alcoholism. Such program should be community based, serve the objective of the maintenance of the family structure as well as the recovery of the individual alcoholic, encourage the use of neighborhood facilities and the services of recovered alcoholics as counselors, and emphasize the reentry of the alcoholic into society rather than the institutionalization of the alcoholic. Of the sums appropriated or allocated for programs authorized under this title, the Director shall reserve and make available not less than $10,000,000 for the fiscal year ending June 30, 1970, and not less than $15,000,000 for the fiscal year ending June 30, 1971, for the purpose of carrying out this program.

"(9) A 'Drug Rehabilitation' program designed to discover the causes of drug abuse and addiction, to treat narcotic and drug addiction and the dependence associated with drug abuse, and to rehabilitate the drug abuser and drug addict. Such program should deal with the abuse or addiction resulting from the use of narcotic drugs such as heroin, opium, and cocaine, stimulants such as amphetamines, depressants, marihuana, hallucinogens, and tranquilizers. Such program should be community based, serve the objective of the maintenance of the family structure as well as the recovery of the individual drug abuser or addict, encourage the use of neighborhood facilities and the services of recovered drug abusers and addicts as counselors, and emphasize the reentry of the drug abuser and addict into society rather than his institutionalization. Of the sums appropriated or allocated for programs authorized under this title, the Director shall reserve and make available not less than $5,000,000 for the fiscal year ending June 30, 1970, and not less than $15,000,000 for the fiscal year ending June 30, 1971, for the purpose of carrying out this program."

TECHNICAL AMENDMENT REGARDING TIME OF APPROPRIATIONS OBLIGATION

SEC. 107. (a) Section 242 of the Economic Opportunity Act of 1964 is amended by inserting after the first sentence thereof the following new sentence: "Funds to cover the costs of the proposed contract, agreement, grant, loan, or other assistance shall be obligated from the appropriation which is current at the time the plan is submitted to the Governor.".

(b) All obligations under the Economic Opportunity Act of 1964 which have been heretofore recorded substantially as provided in the amendment made by subsection (a) of this section are hereby confirmed and ratified.

AMENDMENT OF RURAL LOAN PROGRAM

SEC. 108. Section 302(a) of the Economic Opportunity Act of 1964 is amended by striking out "such families, and" and inserting "such families, or".

APPLICABILITY TO TRUST TERRITORY

SEC. 108. Section 320(a) of the Economic Opportunity Act of 1964 is amended by striking out "and title II" and inserting ", title II, title III–A, and title IV".

AMENDMENT TO PROVIDE INCREASED FELXIBILITY IN USE OF FUNDS

SEC. 110. Section 616 of the Economic Opportunity Act of 1964 is amended by—

(1) inserting after the phrase "10 per centum" the first time it appears in such section, the following: "for fiscal years ending prior to July 1, 1970, and not to exceed 15 per centum for fiscal years ending thereafter;" and

(2) striking out "but no such transfer shall result in increasing the amounts otherwise available for any program or activity by more than 10 per centum" and inserting in lieu thereof the following: "but no such transfer shall result in increasing the amounts otherwise available for any program or activity by—

"(1) more than 100 per centum in the case of any program or activity for which the amounts otherwise available are $10,000,000 or less; or

"(2) more than 35 per centum in the case of any program or activity for which the amounts otherwise available exceed $10,000,000".

ADEQUATE LEADTIME

SEC. 111. (a) Part A of title VI of the Economic Opportunity Act of 1964 is amended by adding at the end thereof the following new section:

"ADVANCE FUNDING

"SEC. 622. For the purpose of affording adequate notice of funding available under this Act, appropriations for grants, contracts, or other payments under this Act are authorized to be included in the appropriation Act for the fiscal year preceding the fiscal year for which they are available for obligation."

(b) In order to effect a transition to the advance funding method of timing appropriation action, the amendment made by subsection (a) shall apply notwithstanding that its initial application will result in the enactment in the same year (whether in the same appropriation Act or otherwise) of two separate appropriations, one for the then current fiscal year and one for the succeeding fiscal year.

CREDITING SERVICE OF A VISTA VOLUNTEER

SEC. 112. (a) Section 8332 of title 5, United States Code, is amended as follows:

(1) in subsection (b)—

(A) strike out "and" at the end of clause (5);

(B) strike out the period at the end of clause (6) and insert in lieu thereof a semicolon and the word "and"; and

(C) add at the end thereof the following new clause:

"(7) a period of service of a volunteer under part A of title VIII of the Economic Opportunity Act of 1964 only if he later becomes subject to this subchapter."

(2) in subsection (j)—

(A) after "1956," in the first sentence, insert "the period of an individual's services as a volunteer under part A of title VIII of the Economic Opportunity Act of 1964,";

(B) before "volunteer or volunteer leader" in the second sentence, insert "volunteer under part A of title VIII of the Economic Opportunity Act of 1964 or as a"; and

(3) before the period at the end of the last sentence, insert a comma and the following: "and the period of an individual's service as a volunteer under part A of title VIII of the Economic Opportunity Act of 1964 is the period between enrollment as a volunteer and termination of that service by the Director of the Office of Economic Opportunity or by death or resignation".

(b) Section 833 of the Economic Opportunity Act of 1964 is amended by—

(1) striking out in subsection (a) "subsection (b)" and inserting in lieu thereof "section 8332 of title 5 of the United States Code, and subsections (b) and (c) of this section"; and

(2) adding at the end thereof the following new subsection:

"(c) Any period of service of a volunteer under part A of this title shall be credited in connection with subsequent employment in the same manner as a like period of civilian employment by the United States Government—

"(1) for the purposes of section 852(a)(1) of the Foreign Service Act of 1946, as amended (22 U.S.C. 1092(a)(1)), and every other Act establishing a retirement system for civilian employees of any United States Government agency; and

"(2) except as otherwise determined by the President, for the purposes of determining seniority, reduction in force, and layoff rights, leave entitlement, and other rights and privileges based upon length of service under the laws administered by the Civil Service Commission, the Foreign Service Act of 1946, and every other Act establishing or governing terms and conditions of service of civilian employees of the United States Government: *Provided*, That service of a volunteer shall not be credited toward completion of any probationary or trial period or completion of any service requirement for career appointment."

(c) The amendments made by subsections (a) and (b) of this section shall be effective as to all former volunteers employed by the United States Government on or after the effective date of this Act.

USE OF CLOSED JOB CORPS CENTERS FOR SPECIAL YOUTH PROGRAMS

SEC. 113. (a) Notwithstanding any other provision of law, the Director of the Office of Economic Opportunity shall establish procedures and make arrangements which are designed to assure that facilities and equipment at Job Corps centers which are being discontinued will, where feasible, be made available for use by State or Federal agencies and other public or private agencies, institutions, and organizations with satisfactory arrangements for utilizing such facilities and equipment for conducting programs, especially those providing opportunities for low-income disadvantaged youth, including, without limitation—

(1) special remedial programs;

(2) summer youth programs;

(3) exemplary vocational preparation and training programs;

(4) cultural enrichment programs, including music, the arts, and the humanities;

(5) training programs designed to improve the qualifications of educational personnel,

including instructors in vocational educational programs; and

(6) youth conservation work and other conservation programs.

(b) To achieve the objectives of this section, the Director of the Office of Economic Opportunity shall consult with, elicit the cooperation of, and utilize the services of the Administrator of the General Services Administration, and the Secretaries of Agriculture, of the Interior, and of Labor.

PROVISION WITH RESPECT TO DIRECTOR'S AUTHORITY TO DELEGATE FUNCTIONS

SEC. 114. The authority of section 620(d) of the Economic Opportunity Act of 1964 shall not apply to the Legal Services program authorized under section 222(a)(3) of such Act. The Director of the Office of Economic Opportunity shall not delegate the program authorized under such section 222(a)(3) to any other existing Federal agency.

AMENDMENT WITH RESPECT TO WITHHOLDING CERTAIN FEDERAL TAXES BY ANTIPOVERTY AGENCIES

SEC. 115. Upon notice from the Secretary of the Treasury or his delegate that any person otherwise entitled to receive a payment made pursuant to a grant, contract, agreement, loan or other assistance made or entered into under the Economic Opportunity Act of 1964 is delinquent in paying or depositing (1) the taxes imposed on such person under chapters 21 and 23 of the Internal Revenue Code of 1954, or (2) the taxes deducted and withheld by such person under chapters 21 and 24 of such Code, the Director of the Office of Economic Opportunity shall suspend such portion of such payment due to such person, which, if possible, is sufficient to satisfy such delinquency, and shall not make or enter into any new grant, contract, agreement, loan or other assistance under such Act with such person until the Secretary of the Treasury or his delegate has notified him that such person is no longer delinquent in paying or depositing such tax or the Director of the Office of Economic Opportunity determines that adequate provision has been made for such payment. In order to effectuate the purpose of this section on a reasonable basis the Secretary of the Treasury and the Director of the Office of Economic Opportunity shall consult on a quarterly basis.

TITLE II—SPECIAL WORK AND CAREER DEVELOPMENT PROGRAMS

SEC. 201. Title I of the Economic Opportunity Act of 1964 is amended by redesignating part E as part F, by renumbering section 161 (as amended by this Act) as section 171, and by inserting after part D the following new part:

"PART E—SPECIAL WORK AND CAREER DEVELOPMENT PROGRAMS

"STATEMENT OF PURPOSE

"SEC. 161. The Congress finds that the 'Mainstream' program aimed primarily at the chronically unemployed and the 'New Careers' program providing jobs for the unemployed and low-income persons leading to broader career opportunities are uniquely effective; that, in addition to providing persons assisted with jobs, the key to their economic independence, these programs are of advantage to the community at large in that they are directed at community beautification and betterment and the improvement of health, education, welfare, public safety, and other public services; and that, while these programs are important and necessary components of comprehensive work and training programs, there is a need to encourage imaginative and innovative use of these programs, to enlarge the authority to operate them, and to increase the resources available for them.

"SPECIAL PROGRAMS

"SEC. 162. (a) The Director is authorized to provide financial assistance to public or private nonprofit agencies to stimulate and support efforts to provide the unemployed with jobs and the low-income worker with greater career opportunity. Programs authorized under this section shall include the following:

"(1) A special program to be known as 'Mainstream' which involves work activities directed to the needs of those chronically unemployed poor who have poor employment prospects and are unable, because of age, physical condition, obsolete or inadequate skills, declining economic conditions, other causes of a lack of employment opportunity, or otherwise, to secure appropriate employment or training assistance under other programs, and which, in addition to other services provided, will enable such persons to participate in projects for the betterment or beautification of the community or area served by the program, including without limitation activities which will contribute to the management conservation, or development of natural resources, recreational areas, Federal, State, and local government parks, highways, and other lands, the rehabilitation of housing, the improvement of public facilities, and the improvement and expansion of health, education, day care, and recreation services;

"(2) A special program to be known as 'New Careers' which will provide unemployed or low-income persons with jobs leading to career opportunities, including new types of careers, in programs designed to improve the physical, social, economic, or cultural condition of the community or area served in fields of public service, including without limitation health, education, welfare, recreation, day care, neighborhood redevelopment, and public safety, which provide maximum prospects for on-the-job training, promotion, and advancement and continued employment without Federal assistance, which give promise of contributing to the broader adoption of new methods of structuring jobs and new methods of providing job ladder opportunities, and which provide opportunities for further occupational training to facilitate career advancement.

"(b) The Director is authorized to provide financial and other assistance to insure the provision of supportive and follow-up services to supplement programs under this part including health services, counseling, day care for children, transportation assistance, and other special services necessary to assist individuals to achieve success in these programs and in employment.

"ADMINISTRATIVE REGULATIONS

"SEC. 163. The Director shall prescribe regulations to assure that programs under this part have adequate internal administrative controls, accounting requirements, personnel standards, evaluation procedures, availability of in-service training and technical assistance programs, and other policies as may be necessary to promote the effective use of funds.

"SPECIAL CONDITIONS

"SEC. 164. (a) The Director shall not provide financial assistance for any program under this part unless he determines, in accordance with such regulations as he may prescribe, that—

"(1) no participant will be employed on projects involving political parties, or the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious worship;

"(2) the program will not result in the displacement of employed workers or impair existing contracts for services, or result in the substitution of Federal for other funds in connection with work that would otherwise be performed;

"(3) the rates of pay for time spent in work-training and education, and other conditions of employment, will be appropriate and reasonable in the light of such factors as the type of work, geographical region, and proficiency of the participant; and

"(4) the program will, to the maximum extent feasible, contribute to the occupational development and upward mobility of individual participants.

"(b) For programs which provide work and training related to physical improvements, preference shall be given to those improvements which will be substantially used by low-income persons and families or which will contribute substantially to amenities or facilities in urban or rural areas having high concentrations or proportions of low-income persons and families.

"(c) Programs approved under this part shall, to the maximum extent feasible, contribute to the elimination of artificial barriers to employment and occupational advancement.

"(d) Projects under this part shall provide for maximum feasible use of resources under other Federal programs for work and training and the resources of the private sector.

"PROGRAM PARTICIPANTS

"SEC. 165. (a) Participants in programs under this part must be unemployed or low-income persons. The Director, in consultation with the Commissioner of Social Security, shall establish criteria for low income, taking into consideration family size, urban-rural and farm-nonfarm differences, and other relevant factors. Any individual shall be deemed to be from a low-income family if the family receives cash welfare payments.

"(b) Participants must be permanent residents of the United States or of the Trust Territory of the Pacific Islands.

"(c) Participants shall not be deemed Federal employees and shall not be subject to the provisions of law relating to Federal employment, including those relating to hours of work, rates of compensation, leave, unemployment compensation, and Federal employment benefits.

"EQUITABLE DISTRIBUTION OF ASSISTANCE

"SEC. 166. The Director shall establish criteria designed to achieve an equitable distribution of assistance among the States. In developing those criteria, he shall consider, among other relevant factors, the ratios of population, unemployment, and family income levels. Of the sums appropriated or allocated for any fiscal year for programs authorized under this part not more than 12½ per centum shall be used within any one State.

"LIMITATIONS ON FEDERAL ASSISTANCE

"SEC. 167. Programs assisted under this part shall be subject to the provisions of section 131 of this Act."

And the House agree to the same.

Managers on the Part of the House.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR

Mr. NELSON. Mr. President, I ask unanimous consent that the staff of the Committee on Labor and Public Welfare be given the privilege of the floor during the debate on the OEO bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL RAILROAD SAFETY ACT OF 1969 AND HAZARDOUS MATERIALS TRANSPORTATION CONTROL ACT OF 1969

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of calendar No. 614.

The PRESIDING OFFICER. The bill will be stated by title.

The BILL CLERK. A bill (S. 1933) providing for Federal railroad safety.

The PRESIDING OFFICER. Is there objection to the Senator from West Virginia?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Commerce with amendments strike out all after the enacting clause and insert:

PURPOSE

SECTION 1. Congress declares that the purpose of this Act is to promote safety in all areas of railroad operations and to reduce railroad-related accidents, and to reduce deaths and injuries to persons and to reduce damage to property caused by accidents involving any carrier of hazardous materials.

TITLE I—RAILROAD SAFETY

§ 101. SHORT TITLE

This title may be cited as the "Federal Railroad Safety Act of 1969".

§ 102. RAIL SAFETY REGULATIONS

(a) The Secretary of Transportation shall (1) prescribe appropriate rules, regulations, and standards for all areas of railroad safety and (2) conduct, as necessary, research, development, testing, evaluation, and training. However, nothing in this Act shall prohibit the bargaining representatives of common carriers and their employees from entering into collective bargaining agreements under the Railway Labor Act, including agreements relating to qualifications of employees, which are not inconsistent with rules, regulations, or standards prescribed by the Secretary under this Act.

(b) Hearings shall be conducted in accordance with the provisions of section 553 of title 5 of the United States Code for all rules, regulations, or orders issued by the Secretary including those establishing, amending, revoking, or waiving compliance with a railroad safety standard under this Act, and an opportuntiy shall be provided for oral presentations.

(c) The Secretary may waive in whole or in part compliance with any rule, regulation, or standard established under this Act, if he determines that such waiver of compliance is in the public interest and is consistent with railroad safety. The Secretary shall make public his reasons for granting any such waiver.

(d) In prescribing rules, regulations, and standards under this section the Secretary shall consider relevant existing safety data and standards.

(e) The Secretary shall issue initial railroad safety rules, regulations, and standards based upon existing safety data and standards, not later than September 1, 1970. Eighteen months after enactment of this Act the Secretary shall issue new and revised railroad safety rules, regulations, and standards under this Act.

(f) Any final agency action taken under this section is subject to judicial review as provided in chapter 7 of title 5 of the United States Code.

§ 103. EMERGENCY POWERS

If through testing, inspection, investigation, or research carried out pursuant to this Act, the Secretary determines that any facility or piece of equipment is in unsafe condition and thereby creates an emergency situation involving a hazard of death or injury to persons affected by it, the Secretary may immediately issue an order prohibiting the further use of such facility or equipment until the unsafe condition is corrected. Subsequent to the issuance of such order, opportunity for review shall be provided in accordance with section 554 of title 5 of the United States Code.

§ 104. GRADE CROSSINGS

(a) The Secretary shall submit to the President for submission to the Congress, within one year from the date of enactment of this Act, a comprehensive study of the problem of eliminating and protecting railroad grade crossings with his recommendations for appropriate action including, if relevant, a recommendation for equitable allocation of the economic costs of any program.

(b) In addition the Secretary shall, insofar as practicable, under the authority provided by this Act and pursuant to his authority over highway, traffic, and motor vehicle safety, and highway construction, undertake a coordinated effort toward the objective of developing and implementing solutions to the grade crossing problem.

§ 105. STATE REGULATION

The Congress hereby declares that laws, rules, regulations, and standards relating to railroad safety shall be nationally uniform to the extent practicable. A State may adopt or continue in force any law, rule, regulation, or standard relating to railroad safety until such time as the Secretary has adopted a rule, regulation, or standard covering the subject matter of such State requirement. A State may adopt or continue in force an additional or more stringent law, rule, regulation, or standard relating to railroad safety when necessary to eliminate or reduce a local safety hazard, and when not incompatible with any Federal law, rule, regulation, or standard, and when not creating an undue burden on interstate commerce.

§ 106. STATE PARTICIPATION

(a) No provision of this Act shall apply to railroad facilities, equipment, rolling stock, and operations within a State when the safety practices applicable to same are regulated by a State agency which submits to the Secretary an annual certification that such State agency: (1) has regulatory jurisdiction over the safety practices of such railroad facilities, equipment, rolling stock, and operation; (2) has adopted each Federal safety rule, regulation, and standard applicable to such railroad facilities, equipment, rolling stock, and operation established under this Act as of the date of the certification; (3) is enforcing each such rule, regulation, and standard, as interpreted by the Secretary, and the law of the State makes provision for the enforcement of same by such State agency or courts of the State by way of injunctive and adequate monetary sanctions substantially the same as are provided under this Act; except that the rules, regulations, and standards of the Secretary prescribed under section 102(a) of this Act involving rolling stock and employee qualifications shall also remain in full force and effect as Federal law within the State and the Secretary shall retain the exclusive authority to assess and compromise penalties and request injunctive relief for the violation of such rules, regulations, and standards involving rolling stock and employee qualifications and to recommend prosecution thereof as provided by sections 109 and 110 of this Act; and except that, sections 103, 105, 108 and subsection (f) of this section of this Act shall apply in every State.

(b) Each annual certification shall include a report, in such form as the Secretary may by regulation provide, showing: the name and address of each common carrier by railroad subject to the safety jurisdiction of the State agency; all accidents or incidents reported during the preceding twelve months by each such carrier involving personal injury requiring hospitalization, fatality, or property damage exceeding $750 or such other higher amount as the Secretary may prescribe, together with a summary of the State agency's investigation as to the cause and circumstances surrounding such accidents or incidents; the record maintenance, reporting, and inspection practices by the State agency to enforce compliance with such safety standards, including a detail of the number of inspections made of rail facilities, equipment, and operation by the State agency during the preceding twelve months and such other information as the Secretary may require. The report included with the first annual certification need not show information unavailable at that time. If after receipt of annual certification the Secretary determines that the State agency is not satisfactorily enforcing compliance with such safety rules, regulations, and standards, he may, on reasonable notice and after opportunity for hearing, reject the certification or take such other action as he deems appropriate to achieve adequate enforcement, including the assertion of Federal jurisdiction. When such notice is given by the Secretary, the burden of proof shall be upon the State agency to show that it is satisfactorily enforcing compliance with Federal safety rules, regulations, and standards.

(c) With respect to any railroad facilities, equipment, rolling stock, and operation for which the Secretary does not receive such an annual certification, the Secretary may enter into an agreement with a State agency to authorize such agency to provide all or any part of the inspection service necessary to obtain compliance with Federal safety rules, regulations, and standards applicable to such railroad facilities, equipment, rolling stock, and operation.

(d) Upon application, the Secretary shall pay out of funds appropriated pursuant to this Act or otherwise made available up to 50 per centum of the cost of the personnel, equipment, and activities of a State agency reasonably required, during the ensuing fiscal year, to carry out a safety program under such a certification or agreement. No such payment may be made unless the State agency making application under this subsection gives assurances satisfactory to the Secre-

tary that the State agency will provide the remaining cost of such a safety program and that the aggregate expenditures of funds of the State for the safety program will be maintained at a level which does not fall below the average level of such expenditures for the last two fiscal years preceding the date of enactment of this section.

(e) The Secretary is authorized to conduct such monitoring of State enforcement practices and such other inspection and investigation as may be necessary to aid in the enforcement of the provisions of this Act.

(f) The certification which is in effect under subsection (a) of this section shall not apply with respect to any new or amended Federal safety rule, regulation, or standard for railroads established pursuant to this Act after the date of such certification. The provisions of this Act shall apply to any such new or amended Federal safety rule, regulation, or standard until the State agency has adopted such rule, regulation, or standard and has submitted an appropriate certification in accordance with the provisions of subsection (a) of this section.

§ 107. EXISTING STATUTES

(a) The Act of March 2, 1893, as amended (27 Stat. 531, 532; 45 U.S.C. 1–7, inclusive) except as related to power or train brakes, the Act of March 2, 1903, as amended (32 Stat. 943; 45 U.S.C. 8 and 10) except as related to power or train brakes, the Act of April 14, 1910, as amended (36 Stat. 298, 299; 45 U.S.C. 11–16, inclusive), the Act of May 30, 1908, as amended (35 Stat. 476; 45 U.S.C. 17–21, inclusive), the Act of March 4, 1915, as amended (38 Stat. 1192; 45 U.S.C. 30), the joint resolution of June 30, 1906, as amended (34 Stat. 838; 45 U.S.C. 35), the Act of May 27, 1908, as amended (35 Stat. 325; 45 U.S.C. 36), the Act of March 4, 1909, as amended (35 Stat. 965; 45 U.S.C. 37), the Act of May 6, 1910, as amended (36 Stat. 350; 45 U.S.C. 38–43, inclusive), and section 441 of the Act of February 28, 1920 (41 Stat. 498; 49 U.S.C. 26, as amended), are repealed. The substantive requirements of the Acts repealed herein, and all orders, rules, regulations, standards, requirements, and permits prescribed or issued pursuant thereto and in effect on the date of enactment of this Act, are continued in effect as regulations of the Secretary under this Act until amended, repealed, or modified by the Secretary in accordance with the provisions of section 102(b) of this Act.

(b) No suit, action, or other proceeding and no cause of action under the statutes repealed in subsection (a) of this section shall abate by reason of enactment of this Act.

§ 108. GENERAL POWERS

(a) In carrying out his functions under this Act, the Secretary is authorized to perform such acts including, but not limited to, conducting investigations, making reports, issuing subpenas, requiring production of documents, taking depositions, prescribing recordkeeping and reporting requirements, carrying out and contracting for research, development, testing, evaluation, and training (particularly those aspects of railroad safety which he finds to be in need of prompt attention), and delegating to any public bodies or qualified persons, functions respecting examination, inspecting, and testing of facilities or equipment, or persons, as he deems necessary to carry out the provisions of this Act.

(b) The National Transportation Safety Board shall have the authority to determine the cause or probable cause and report the facts, conditions, and circumstances relating to accidents investigated under subsection (a) above, but may delegate such authority to any office or official of the Board or to any office or official of the Department, with the approval of the Secretary, as it may determine appropriate.

(c) To carry out the Secretary's and the Board's responsibilities under this Act, officers, employees, or agents of the Secretary or the Board, as the case may be, upon display of proper credentials, are authorized to enter upon, inspect, and examine rail facilities and equipment and pertinent records at reasonable times and in a reasonable manner.

(d) All orders, rules, regulations, standards, and requirements in force, or prescribed or issued by the Secretary, pursuant to this Act shall have the same force and effect as a statute for purposes of the application of the Act of April 22, 1908, as amended (35 Stat. 66) (45 U.S.C. 53, 54).

§ 109. PENALTIES

(a) It shall be unlawful for any railroad to disobey, disregard, or fail to adhere to any rule, regulation, order, or standard prescribed by the Secretary under this Act or established or continued in effect pursuant to section 107(a) of the Act.

(b) The Secretary shall include in, or make applicable to, any railroad safety rule, regulation, order, or standard a civil penalty for violation thereof in such amount not less than $250 nor more than $1,000 as he deems reasonable.

(c) Any railroad violating any rule, regulation, order, or standard prescribed by the Secretary under this Act shall upon conviction thereof be fined the civil penalty applicable to the standard violated. Each day of such violation shall constitute a separate offense. Such civil penalty is to be recovered in a suit or suits to be brought by the Attorney General on behalf of the United States in the district court of the United States having jurisdiction in the locality where such violation occurred. Civil penalties may, however, be compromised for any amount by the Secretary prior to referral to the Attorney General. The amount of any such penalty, when finally determined, or the amount agreed upon in compromise, may be deducted from any sums owing by the United States to the person charged.

(d) In any action brought under this Act, subpenas for witnesses who are required to attend a United States district court may run into any other district.

§ 110. INJUNCTIVE RELIEF

(a) The United States district court shall, at the request of the Secretary of Transportation and upon petition by the Attorney General on behalf of the United States, have jurisdiction, subject to the provisions of rule 65 (a) and (b) of the Federal Rules of Civil Procedure, to restrain violations of this Act or to enforce rules, regulations, orders, or standards established hereunder.

(b) In any proceeding for criminal contempt for violation of an injunction or restraining order issued under this section, which violation also constitutes a violation of this Act, trial shall be by the court, or, upon demand of the accused, by a jury, conducted in accordance with the provisions of rule 42(b) of the Federal Rules of Criminal Procedure.

§ 111. ANNUAL REPORT

(a) The Secretary shall prepare and submit to the President for transmittal to Congress on March 1 of each year a comprehensive report on the administration of this Act for the preceding calendar year. Such report shall include but not be restricted to—

(1) a thorough statistical compilation of the accidents and casualties occurring in such year;

(2) a list of Federal railroad safety standards in effect or established in such year;

(3) a summary of the reasons for each waiver granted under section 102(c) of this Act during such year;

(4) an evaluation of the degree of observance of applicable railroad safety standards;

(5) a summary of outstanding problems confronting the administration of this Act in order of priority;

(6) an analysis and evaluation of research and related activities, including the policy implications thereof, completed and technological progress achieved during such year;

(7) a list, with a brief statement of the issues, of completed or pending judicial actions under the Act;

(8) the extent to which technical information was disseminated to the scientific community and consumer-oriented information was made available to the public;

(9) a compilation of—

(A) certifications filed by State agencies (including municipalities) under section 106(a) which were in effect during the preceding calendar year, and

(B) certifications filed under section 106(a) which were rejected by the Secretary during the preceding calendar year, together with a summary of the reasons for each such rejection; and

(10) a compilation of—

(A) agreements entered into with Senate agencies (including municipalities) under section 106(c) which were in effect during the preceding calendar year, and

(B) agreements entered into under section 106(c) which were terminated by the Secretary during the preceding calendar year, together with a summary of the reasons for each such termination.

(b) The report required by subsection (a) shall contain such recommendations for additional legislation as the Secretary deems necessary to strengthen the national railroad safety program.

TITLE II—HAZARDOUS MATERIALS CONTROL

§ 201. SHORT TITLE

This title may be cited as the "Hazardous Materials Transportation Control Act of 1969".

§ 202. AUTHORIZATION

(a) The Secretary shall, within six months from the date of enactment of this Act:

(1) Establish facilities and technical staff to maintain within the Federal Government the capability to evaluate the hazards connected with and surrounding the various hazardous materials being shipped.

(2) Establish a central reporting system for hazardous materials accidents to provide technical and other information and advice to the law enforcement and firefighting personnel of communities and to carriers and shippers for meeting emergencies connected with the transportation of hazardous materials.

(3) Conduct a review of all aspects of hazardous materials transportation to determine and recommend appropriate steps which can be taken immediately to provide greater control over the safe movement of such materials.

(b) The authority granted the Secretary by this Act shall be in addition to the authority granted by sections 831 to 835, inclusive, of title 18 of the United States Code.

(c) The Secretary shall prepare and submit to the President for transmittal to the Congress on or before March 15 of each year a comprehensive report on the transportation of hazardous materials for the preceding calendar year. Such report shall include, but not be restricted to (1) a thorough statistical compilation of the accidents and casualties occurring in such year which involved the transportation of hazardous materials; (2) a list of relevant Federal standards in effect or established in such year; (3) a summary of the reason for each waiver or exemption granted pursuant to sections 831 to 835, inclusive, of title 18 of the United States Code; (4) an evaluation of the degree of observance of safety standards for the transportation of hazardous materials; and (5) a summary of outstanding problems created by the transportation of hazardous materials.

(d) The report required by subsection (c) of this section shall contain such recommendations for additional legislation as the Secretary deems necessary.

TITLE III—MISCELLANEOUS PROVISIONS

§ 301. APPROPRIATION AUTHORIZATION

There is hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

§ 302. SEPARABILITY

If any provision of this Act or the application thereof to any person or circumstance is held invalid, the remainder of this Act, and the application of such provision to other persons or circumstances shall not be effected thereby.

Mr. PROUTY. Mr. President, as the ranking minority member on the Surface Transportation Subcommittee, I have shared with my distinguished colleagues the realization that an effective railroad safety act was needed. When I joined as a cosponsor of S. 3061, the administration's "Railroad Safety and Research Act of 1969," I pointed out the compelling reasons for prompt action. At that time I pointed out that there are around 30,000 railroad accidents a year. These accidents, Mr. President, cost the industry—and ultimately the American public—$266 million in 1967 alone.

Examining the legislation concerned with railroad safety, all of us were appalled. In the first place, most legislation now on the books concerning railroad safety is from 50 to 75 years old. Its vintage stands as a stark reminder that laws often fail to keep pace with technology in our changing society.

Moreover, Mr. President in examining the existing laws, it was quite apparent that for several generations a piece-meal approach has been followed which left vast areas affecting railroad safety unregulated.

Last Spring, Mr. President, the distinguished senior Senator from Indiana (Mr. HARTKE) conducted hearings concerning the need for legislation at the Federal level for the purpose of insuring railroad safety. Prior to those hearings, Mr. President, Secretary Volpe of the Department of Transportation had created a task force to study the problem and come up with an effective and a fair solution. That task force, Mr. President, was truly a remarkable task force. First, it was made up of representatives of railroad management, representatives of railroad labor, and representatives from the States. Reginald M. Whitman, the Federal Railroad Administrator, was chairman of the task force.

I recall, Mr. President, when the Commerce Committee first held hearings on railroad safety in the latter part of May, Mr. Whitman testified before our committee. Concerning the work of the task force, he stated at that time:

We have set a target date of June 30, for our report to the Secretary. I may sound too optimistic but until I know otherwise, I expect labor, management and the States to take full advantage of the unique opportunity and challenge of participating in the development of Federal policy.

Primarily because of Mr. Whitman's dedication, persistence, and skill the task force made its report exactly on time. Mr. Whitman spelled out the recommendations of the task force to the Surface Transportation Subcommittee at hearings held in Indianapolis, Ind., in the middle of July. Unfortunately, I was unable to attend those hearings but the distinguished Senator from Indiana (Mr. HARTKE) who chaired those hearings, summed up my feelings concerning the task force when he told Mr. Whitman:

I want to offer my congratulations for the fine work that you have done and I hope you will convey to the Task Force my sincere appreciation for the fact that they have moved as rapidly as they have in this field.

In addition, the task force, under the direction of Reginald Whitman, issued a report which not only was put together and finalized within 60 days, submitted when promised, and was comprehensive, but it was also unanimously supported by the broad spectrum of interests represented on the task force. The specific recommendations of the task force were:

First. That the Secretary of Transportation, through the Federal Railroad Administration, have authority to promulgate reasonable and necessary rules and regulations establishing safety standards in all areas of railroad safety, through such notice, hearing, and review procedures as will protect the rights of all interested parties.

Second. In order to strengthen the administration of Federal rail safety regulations, there should be established a National Railroad Safety Advisory Committee to advise, consult with, and make recommendations to the Secretary on matters relating to the activities and functions of the Department in the field of railroad safety. The committee would be chaired by the Federal Railroad Administrator with the remaining members appointed by the Secretary to represent equally the State regulatory commissions, railroad management, and labor. The Secretary would submit to the committee proposed safety standards and amendments and afford it a reasonable opportunity to prepare a report on the technical feasibility, reasonableness, and practicability of each such proposal prior to adoption. The committee may propose safety standards to the Secretary for his consideration.

Third. Existing State rail safety statutes and regulations remain in force until and unless preempted by Federal regulation. Administration of the program should be through a Federal-State partnership, including State certification similar to the certification principles set forth in the Federal Natural Gas Pipeline Safety Act of 1968.

Fourth. The Advisory Committee be directed to study the present delegation of authority to the Association of American Railroads' Bureau of Explosives in certain areas of the Transportation of Explosives and Other Dangerous Articles Act.

Fifth. A research program be initiated by Government and industry into railroad safety technology, which should be funded immediately for an initial 3-year period, over and above existing research programs.

Sixth. Formal employee training programs be expanded by railroad management, with the cooperation of labor and Government, for the purpose of insuring compliance with safe operating practices and reducing the impact of human error in the accident experience.

Seventh. An expanded, concerted program of grade crossing safety be undertaken utilizing established Federal and State agencies and advisory groups to set uniform procedures and standards. Early attention must be given to the development of improved crossing protection at lower cost plus greater emphasis placed on driver education and traffic enforcement. In addition to more extensive use of existing Federal funds now allocable to present highway safety programs, there must be new sources of funding to finance expanded grade crossing program.

Eighth. The Federal Railroad Administration should revise, in consultation with railroad management, labor, and State regulatory commissions, its rules for reporting of accidents. The aim should be to make the data more current, more uniform and to identify causes more accurately.

I think Mr. Whitman best summed up the significance of this excellent Task Force Report when he made the following comment during the Indiana hearings:

Of great significance is the fact that the recommendations represent the unanimous views of management, labor and the states. We have here a landmark development in labor-management cooperation. The report sets the stage for a new era of cooperation in building a safer railroad system. We hope to build from this base of mutual interest and commitment to rail safety, a meaningful program that will get the job done.

Mr. President, I think we owe a debt of gratitude for the work done by the Railroad Safety Task Force because in reality that group set in motion close cooperation between the many economic and political interests affected by any railroad safety legislation.

Mr. President, I believe that S. 1933, as reported by the committee, is a good bill. It attacks the problem of railroad safety with a comprehensive overall approach.

As a result of an amendment which I had adopted in committee, the bill is divided into three titles.

Title I of the bill embodies the Federal Railroad Safety Act of 1969. Title II of the bill contains the Hazardous Materials Transportation Control Act of 1969. Title III contains miscellaneous provisions.

Under the Federal Railroad Safety Act of 1969, which would be enacted by the passage of the bill, the Secretary of Transportation is given broad powers to prescribe appropriate rules, regulations, and standards for all areas of railroad safety.

In addition, Mr. President, the Secretary is granted the authority to conduct research, development, testing, and evaluation in all areas of railroad safety.

Mr. President, I think both of these powers are extremely important. As I have previously mentioned, the piecemeal approach to railroad safety now in existence is far from satisfactory. Under the act, the Secretary of Transportation can direct a coordinated effort toward the goal of reducing railroad accidents, thereby making railroads safe both for employees who work on them and for the general public.

Perhaps even more important, Mr. President, is the power given to the Secretary authorizing research into how we can make our railroads truly safe.

I am reminded, Mr. President, of a

recent accident in Laurel, Miss. After thorough investigation of that accident, the National Transportation Safety Board came to the conclusion that a broken wheel from one of the cars caused the accident. Perhaps, Mr. President, more research in the specific area concerning the types and design of wheels used on boxcars could have averted that accident.

I could go on and enumerate the hundreds of variables that contribute to train accidents and in each and every case one always comes to the conclusion that additional research is needed in order to know for certain the best way to build and run a railroad safely.

Mr. President, as a member of the Senate Labor and Public Welfare Committee I am keenly aware of the importance of successful collective bargaining. For that reason I supported a proviso in section 102 of the bill which would clearly point out that collective bargaining could be used as a vehicle for establishing safety standards that are not inconsistent with safety regulations issued by the Secretary. As originally written, the proviso permitting collective bargaining was so broad that it could have undermined the basic goals of this act—namely, management and labor through collective bargaining could have had agreed upon standards that were less stringent than those established under this act.

Mr. President, I was pleased that the majority of the committee agreed with me and adopted my amendment which encourages collective bargaining for more stringent standards which are not inconsistent with those established by the Secretary of Transportation but at the same time would insure the fact that collective bargaining will not be used as a vehicle for undermining safety standards.

In section 103 of the bill, Mr. President, the Secretary is given emergency powers so as to stop any trains which might create a safety hazard to the public.

In section 104, Mr. President, we face up to perhaps the greatest problem affecting railroad safety, that is the number of accidents that occur at grade crossings. Historically we all know that because railroad tracks were in existence long before the automobile literally hundreds of thousands of grade crossings present a great threat to both automobile and railroad safety. Under this section of the act the Secretary is authorized to conduct a comprehensive study of ways and means to correct the grade crossing problem. In addition to the immediate things that can be done to lower the accident rate at grade crossings is a congressional mandate for the Secretary of Transportation to look into ways of financing whatever needs to be done.

Mr. President, sections 105 and 106 establish a close working relationship between the Federal Government and State Governments. I was particularly pleased that through my efforts the States and the Federal Government were able to work in partnership which was satisfactory to both parties. Only through close cooperation between Federal and State Governments can we hope to have an effective program.

In section 107 several laws which have become obsolete through the passage of time are repealed. For example, the Ash Pan Act of 1893 is repealed. That act required that the wood-burning locomotives stop at various intervals in order to empty their ash pans.

Unfortunately Mr. President, certain problems remain inasmuch as some of these old laws continue to be on the books. For example, acts such as the locomotive Inspection Act and the so-called power brake law were proposed to be repealed by the administration bill. I also favored their repeal.

My reasons were simple. Under this act a State that meets the criteria set forth for State certification takes over the responsibilities for carrying out the railroad safety enforcement within their State. Because certain laws were not repealed, a State such as Pennsylvania—which I am sure will be certified to carry out railroad safety law—will not be able to do the total job. As a consequence of not repealing certain laws, the Federal Railroad Administrator will also be forced to send people into the State to carry out the Locomotive Inspection Act and other laws which were not repealed. This duplication of effort may turn out to be wasteful and ineffective. Nevertheless, I feel that those laws which were repealed go a long way toward helping us create an up-to-date, modern railroad safety law.

Section 108 of the bill, Mr. President, gives the Secretary certain general powers so that he can effectively obtain the necessary facts for setting railroad safety standards. The right of the National Transportation Safety Board to conduct accident investigations is also maintained.

Finally, this section makes certain that none of the rules, regulations, nor other provisions promulgated by the Secretary in any way, shape, or form effect the Federal Employee Liability Act.

Section 109 provides civil penalties for any carriers which do not obey regulations under this act.

Section 110 grants the Attorney General the power to seek injunctions in order to restrain the violators of this act.

Finally, section 111 provides that there be an annual report so that we in Congress can make certain that this statute is continuously kept up to date

Mr. President, I think that title II of the bill may also turn out to be a most important piece of legislation. It establishes the Hazardous Materials Transportation Control Act of 1969. Mr. President, I think the shipments of poisonous gas last spring reminded all of us that tremendous quantities of hazardous materials are shipped in interstate commerce.

During the hearings, we all learned of some bad accidents in the States of Indiana, Mississippi, and elsewhere, where local firemen and policemen did not really know the contents of burning boxcars and tank cars.

The Hazardous Materials Transportation Control Act of 1969 will set into motion the apparatus necessary for establishing a Federal control whereby local officials can find out important information pertaining to the types of chemicals to be used to extinguish other chemicals and how to protect the public in those situations where serious accidents do occur.

Mr. President, the Hazardous Materials Control Act applies to all common carriers. In the future, I believe that the Federal Government, by collecting and disbursing information at its disposal, will be able to provide an important and valuable service to State and local officials in times of emergencies.

Mr. President, I am proud to be a member of this committee which has reported such an important piece of legislation. The distinguished senior Senator from New Hampshire (Mr. COTTON) was most helpful in adding his assistance to the enactment of this legislation.

On the other side of the aisle, the distinguished senior Senator from Indiana (Mr. HARTKE) is to be congratulated for his diligence in conducting very comprehensive hearings.

Finally, Mr. President, I ask unanimous consent that two memorandums be inserted in the RECORD immediately following my remarks. One is from the Comptroller General of the United States; the other is prepared by the staff of the Department of Transportation. Both of these memorandums clearly demonstrate that the repeal of certain antiquated laws by section 108 of this act in no way, shape, or form affects any rights or privileges under the Federal Employees Liability Act.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, D.C., December 19, 1969.

Hon. WINSTON PROUTY,
U.S. Senate.

DEAR SENATOR PROUTY: Reference is made to your letter of December 11, 1969, in which you requested our opinion as to the effect the repeal section of Committee Print No. 1 of S. 1933, 91st Congress (which, if enacted into law would be cited as the "Federal Railroad Safety Act of 1969"), might have upon the Federal Employers' Liability Act.

Apparently, you are particularly concerned with the effect that the part of section 8(a) of S. 1933, which, among other things would repeal the "Act of March 2, 1893, as amended (27 Stat. 531, 532; 45 U.S.C. 1–7 inclusive), except as related to power or train brakes," might have upon the act commonly known as the Federal Employers' Liability Act, as amended, which is codified in 45 U.S.C. 51–60.

Nothing in section 8(a) of S. 1933 purports to specifically repeal the provisions of 45 U.S.C. 51–60. Also nothing in the introductory remarks made by Senator Hartke on April 22, 1969, in connection with his introduction of S. 1933 shows any intention that those provisions be repealed.

Section 8 of the act of March 2, 1893 (45 U.S.C. 7), provides that an employee of any common carrier engaged in interstate commerce by railroad who may be injured by any locomotive, car, or train in use contrary to the provisions of that act shall not be deemed thereby to have assumed the risk thereby occasioned although continuing in the employment of such carrier after the unlawful use of such locomotive, car, or train has been brought to his knowledge. This provision would be included in the provisions repealed by section 8(a) of S. 1933.

There would remain in effect the provisions of 45 U.S.C. 54 which provide:

"In any action brought against any common carrier under or by virtue of any of the provisions of this chapter to recover damages for injuries to, or the death of, any of its employees, such employee shall not be held to have assumed the risks of his employment in any case where such injury or death resulted in whole or in part from the negligence of any of the officers, agents, or employees of such carrier; and no employee shall be held to have assumed the risks of his employment in any case where the violation by such common carrier of any statute enacted for the safety of employees contributed to the injury or death of such employee."

As originally enacted the provisions of 45 U.S.C. 54 were held to relate to violations of such statutes as the act of March 2, 1893, 27 Stat. 531, and other acts known as the Safety Appliance Acts found in sections 1–16 of 45 United States Code and to other acts subjecting common carriers in interstate commerce to particular obligations for the safety of their employees, but that where such violations are not involved, the defense of assumption of risk is available under this section of the Federal Employers' Liability Act. See *Great Northern Railway Co., et. al.* v. *Leonidas*, 305 U.S. 1, 59 Sup. Ct. 51, 83 L. Ed. 3, and cases therein cited. The section was amended after that decision. However, the amendment would not affect the holding.

The safety rules, regulations, and standards which the Secretary of Transportation is to prescribe under S. 1933 might be comparable to and take the place of those statutes enacted for the safety of employees, which S. 1933 would repeal. It is conceivable, however, that the courts could construe 45 U.S.C. 54 as being applicable only to *statutes* enacted for the safety of employees and not applicable to rules, regulations and standards prescribed pursuant to S. 1933 if enacted into law and having the same objective. The intention of the Congress in this respect should be clarified. We suggest this could be accomplished by inclusion in the bill, possibly as section 8(c), of a provision substantially as follows·

"An employee of any common carrier engaged in interstate commerce by railroad who may be injured by any locomotive, car, or train in use contrary to a rule, regulation, or standard prescribed pursuant to this Act shall not be deemed thereby to have assumed the risk thereby occasioned, although continuing in the employment of such carrier after the use of such locomotive, car, or train contrary to such rule, regulation, or standard has come to his attention or been brought to his knowledge."

Aside from the above we do not see any possible adverse effect that the provisions of S. 1933 which would repeal the act of March 2, 1893, might have on the rights of employees under the Federal Employers' Liability Act.

Sincerely yours,

B. Y. KELLER,
Assistant Comptroller General of the United States.

MEMORANDUM OF LAW

The question has been raised on whether replacement of existing rail safety statutes by administrative regulations pursuant to the proposed Federal Railroad Safety Act of 1969 (S. 1933) could diminish the rights of rail employees in civil suits to recover damages for injuries or deaths arising out of violations by interstate rail carriers of those existing rail safety statutes and regulations. The answer is no.

The Federal Employers' Liability Act (45 U.S.C. 51–60) (hereinafter FELA) is the exclusive and inclusive remedy for injuries to or the death of a rail employee employed in interstate commerce. *New York Central R.R. Co.* v. *Winfield*, 244 U.S. 147 (1917). This is true even if the employee fails to bring himself within the statute and alternative remedies would otherwise be available. *Id.* 153–54. States are prohibited from presuming a waiver of the federal rights or forcing an election between the federal and an alternative state right. *Erie* v. *Winfield*, 244 U.S. 170 (1917). While the rigidity of these rules was somewhat modified in the case of unconscionable conduct by the carrier in *South Buffalo Railway Co.* v. *Ahern*, 344 U.S. 367 (1953), this case has not been followed and the *New York Central* and *Erie* cases should be considered controlling.

The Federal Employers' Liability Act is a negligence statute. 45 U.S.C. 51. Whether a complaint states a claim of negligence and a particular injury is within the statute is determined by federal law, as is the standard of recovery after the evidence has been presented. *Urie* v. *Thompson*, 337 U.S. 163 (1949). Respecting the negligence issue the Court stated in *Urie* at 174:

"What constitutes negligence for the statute's purposes is a federal question, not varying in accordance with the differing conceptions of negligence applicable under state and local law for other purposes. Federal decisional law formulating and applying the concept governs."

This rule has not been modified in subsequent cases and remains the controlling law on the subject. The fact that the FELA uses a negligence concept should not be construed as preventing the imposition of a stricter standard in accordance with well known principles of negligence law.

The rail safety statutes contained in 45 U.S.C. 1–34, 45 U.S.C. 61–66, and 49 U.S.C. 26 require compliance by interstate rail carriers with certain safety appliances, equipment standards, and hours of service limitations. Decisional law imposes an *absolute* standard of compliance with these standards on such rail carriers. Such carriers are not excused from compliance by any showing of care, however assiduous. *O'Donnell* v. *Elgin, Joliet & Eastern R. R. Co.*, 338 U.S. 384 (1949). In analyzing the negligence problem, the Court stated at 390:

"But this Court early swept all issues of negligence out of cases under the Safety Appliance Act. For reasons set forth at length in our books, the Court held that a failure of equipment to perform as required by the Safety Appliance Act is in itself an actionable wrong, in no way dependent upon negligence and for the proximate results of which there is liability—a liability that cannot be escaped by proof of care or diligence." (Citations omitted.)

Thus, whenever an interstate carrier is in violation of these statutes and an injury arises from such defect, the carrier is liable irrespective of negligence. *Id.* 390–391, 394; *Urie, supra* at 195; *Lilly v. Grand Trunk Western Railroad*, 317 U.S. 481, 485 (1942). Any violation of a rail safety regulation is considered a violation of the statute for purposes of a carrier's liability. *Atcheson, Topeka & Santa Fe Ry.* v. *Scarlett*, 300 U.S. 471, 475 (1937); *Urie, supra at* 195; *Lilly, supra* at 488. These rules have not been modified in subsequent cases.

Certain of the existing rail safety statutes would be repealed by the proposed Federal Railroad Safety Act of 1969. However, the substantive provisions of these statutes would thereafter be preserved as regulations of the Secretary until modified or otherwise changed under the proposed Act. We understand that subsection (e) of section (2) of S. 1933, as reported, contemplates a comprehensive regulatory scheme within a definite time period. Therefore, any such modifications or changes will be made as part of a general comprehensive regulatory program.

Many FELA cases rely on the general substantive language of the statutes rather than on specific statutory or regulatory requirements. For example, in *Lilly* v. *Grand Trunk Western Railroad Co., supra*, the petitioner fell from the top of the locomotive tender, allegedly after slipping on some ice. An ICC regulation provided in part that "top of tender behind fuel space shall be kept clean, and means provided to carry off waste water." The Court concluded at 488 that:

"The failure of petitioner's counsel to call Rule 153 to the attention of the trial court should no more deprive petitioner of its benefits than the failure to plead specifically the Federal Employers' Liability Act foreclosed the application of that Act on appeal to test correctness of the trial judge's refusal to charge in *Grand Trunk Western Railway Co.* v. *Lindsay*, 233 U.S. 42, *especially when, as here, the rule only fortifies a result which we think the jury could probably have reached even in the absence of such a rule.*" (Italic ours.)

In *O'Donnell* v. *EJ&E Railway Co.*, supra, the employee met an unwitnessed death while working as a switchman in the defendant's yards. As a result of a broken coupler two cars separated from a moving cut of cars and collided with other standing cars. The latter cars were driven into cars whose couplers the decedent stated he was going to adjust shortly before the collision occurred.

At the trial, the plaintiff asked that the jury be instructed that breaking of the coupler in and of itself was negligence per se. The trial court refused to so instruct. On appeal the Court of Appeals with one dissent sustained this refusal so to charge saying:

" 'We do not believe the Act required defendant to furnish couplers that would not break. We think the true rule is that where a coupler does break, the jury may, if they think it reasonable under all the circumstances, infer that the coupler was defective and was furnished and used in violation of the Act. The cases go no further than to hold that from the breaking of a coupler the jury may infer negligence.' " *Id.* 486, quoting 171 F. 2d at 976.

Reversing the Court of Appeals the Supreme Court stated at 387 that "[A] close and literal reading of the Safety Appliance Act, 45 U.S.C. 52, suggests that two functions only are required of couplers: that they couple automatically by impact, and that they uncouple without requiring men to go between the ends of the cars." (Citations omitted.) However in further analyzing the negligence problem, the court stated beginning at page 388:

"It is hard to think of a coupler defect in which greater danger inheres to workmen, travelers and all to whom the railroad owes a duty, than one which sets cars running uncontrolled upon its tracks. We find it difficult to read the Safety Appliance Act to require that cars be equipped with appliances which couple automatically by impact and which may be released without going between the ends of cars, but which need not remain coupled in the meantime. The Act so construed would guard against dangers incident to effecting an engagement or disengagement while ignoring the even greater hazards which can result from a failure of a coupling to perform its main function, which is to stay coupled until released.

"We hold that the Safety Appliance Act requires couplers, which after a secure coupling is effected, would remain coupled until set free by some purposeful act of control."

Thus, in both of these FELA cases the court found a general safety purpose beyond the literal requirements of either the statute involved in the *O'Donnell* case or the regulation involved in the *Lilly* case and allowed recovery on such a general safety purpose.

Therefore, with respect to the statutes being repealed in light of the Supreme Court's holdings in *O'Donnell, Scarlett, Urie,* and *Lilly*, it is evident that the proposed conversion pursuant to the proposed statute of these specific statutory requirements to specific regulatory requirements would not diminish in any way the absolute standard of liability imposed for injuries arising from violation of such requirements.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time, and passed.

The title was amended, so as to read: "A bill to provide for Federal railroad safety, hazardous materials control and for other purposes."

Mr. HARTKE. Mr. President, the passage of comprehensive railroad safety legislation by the Senate represents a most important step in the Federal Government's attempt to improve safety in all modes of transportation.

The purpose declared in this bill is to promote safety in all areas of railroad operation, to reduce railroad related accidents, and to reduce death and injuries to persons and to reduce damage to property caused by accidents involving any carrier of hazardous materials.

The Senate Committee on Commerce in reporting favorably the comprehensive railroad safety legislation embodied in S. 1933 has determined that the soaring accident rate on the Nation's railroads coupled with the great potential for disaster when an accident occurs requires early and effective governmental attention. The committee has also made the judgment that the Federal Government in its effort to provide for greater safety on the Nation's railroads should enlist the assistance of those States which have the capability and which are willing to join in the effort. The committee, by its action also recognized that the railroad industry is the only mode of transportation in the United States which presently is not subject to comprehensive Federal safety regulation.

Five full days of hearings were held in 1969 by the Subcommittee on Surface Transportation. During those hearings approximately 50 witnesses representing almost every conceivable viewpoint relevant to safety on the railroads testified before the subcommittee. Included among the witnesses were representatives of the National Transportation Safety Board, the Federal Railroad Administration, the Office of Hazardous Materials—in the Department of Transportation—railroad labor, railroad management, the Department of Interior, the Department of Defense, mayors, fire chiefs, chiefs of police, State police, health officials, military firefighters, individual railroad employees, concerned citizens, representatives of rail passengers, the Secretary of Transportation, the National Association of Regulatory Utility Commissioners, the Chairman of the Product Safety Commission, and private consumer counsels. The basic thrust of the testimony in a voluminous hearing record is that the unsafe conditions which persist on some railroads are very serious, particularly in view of the fact that with the introduction of higher speed, longer and heavier trains, the increased carriage of deadly and dangerous materials, the possibility of a major catastrophe is ever present.

Train accidents have been steadily increasing and so have the dangers flowing from them. The number of such accidents rose from 4,149 in 1961 to 8,028 in 1968, an increase of 93.5 percent since 1961. The number of deaths from all kinds of railroad accidents rose from 2,127 in 1961 to 2,359 in 1968. While the number of deaths from railroad accidents exceeds substantially the number of annual deaths in aviation accidents, these statistics do not provide an accurate picture of the potential for disaster attending the operation of the Nation's railroads. Railroads today are transporting extremely flammable explosives high ly reactive and poisonous substances throughout the Nation's metropolitan areas and countrysides. It has been reported to the committee that there are 25 new dangerous commodities considered for marketing purposes every day. Often as the committee learned so well during its hearings, the hazardous materials carried are so exotic and represent such an unknown factor that control of fire and contamination resulting from an accident is too often beyond the capability of local authorities. Special fire fighting equipment and procedures may be necessary for each of several kinds of materials that are being transported on a single train. Biological and chemical warfare materials including deadly nerve gases have been shipped in the past and may be shipped in the future by the Defense Department on the Nation's railroads. Increased accidents, greater speeds and more hazardous shipments provide an extremely lethal combination so that with increased frequency, train wrecks threaten whole communities with flame explosions, and contamination by poisonous chemicals.

The legislation approved today will, I am convinced, contribute greatly to improving safety on the railroads. Fashioning this measure was not a simple matter, however, and I take this opportunity to commend Senator WINSTON PROUTY the very able Senator from Vermont. Senator PROUTY has always been a strong advocate of greater safety on the railroads and early recognized the problems. He is the ranking minority member on the Subcommittee on Surface Transportation and as such has been very successful in attaining his goals. Without Senator PROUTY's great contribution to the effort of drafting a good safety bill it would have been impossible for the Subcommittee on Surface Transportation and the full Committee on Commerce to overcome the extremely abundant obstacles to committee approval of a comprehensive rail safety measure. Senator PROUTY brought many of the opposing parties together in his office and personally worked to thrash out agreement upon some of the most bitterly contested issues.

Let me say also that the distinguished chairman of the Senate Commerce Committee, Senator MAGNUSON, demonstrated once again his outstanding leadership abilities in gaining approval of this bill by the full Commerce Committee. Senator MAGNUSON has fought long and hard to improve safety in all modes of transportation. The passage of this bill is another milestone in his distinguished career.

Mr. MAGNUSON. Mr. President, I am gratified that the Senate has at long last approved a comprehensive rail safety bill. Unsafe conditions on some railroads have long been of concern to many Members of the Senate. We have now done something about that concern. I know from personal experience the formidable obstacles that have been placed in the way of congressional approval of rail safety legislation over the years. The chairman of the Subcommittee on Surface Transportation, Senator VANCE HARTKE, made a monumental effort to obtain approval of this vital legislation. He deserves the gratitude of the entire Nation for what is truly an outstanding achievement. Approval of this bill has truly been a bipartisan effort, however. The ranking minority member of the subcommittee, Senator PROUTY as well as other Members from both sides of the aisle have worked long and hard on this legislation.

EXTENSION OF PROVISIONS OF THE PUBLIC HEALTH SERVICE ACT

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 613.

The PRESIDING OFFICER. The bill will be stated.

The BILL CLERK. A bill (S. 2660) to extend and otherwise amend certain expiring provisions of the Public Health Service Act for Migrant Health Services.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Labor and Public Welfare with amendments on page 2, line 2, after "1972", insert "and"; in line 3, after "30", strike out "1973, $35,000,000 for the fiscal year ending June 30, 1974, and $10,000,000 for the fiscal year ending June 30, 1975" and insert "1973"; and, after line 5, insert a new section, as follows:

SEC. 2. Section 310 of the Public Health Service Act is further amended by adding immediately after the final sentence thereof the following new sentence: "For the purposes of assessing and meeting domestic migratory agricultural workers' health needs, developing necessary resources, and involving local citizens in the development and implementation of health care programs authorized by this section, the Secretary must be satisfied, upon the basis of evidence supplied by each applicant, that persons broadly representative of all elements of the population to be served and others in the community knowledgeable about such needs have been given an opportunity to participate in the development of such programs, and will be given an opportunity to participate in the implementation of such programs."

So as to make the bill read:

S. 2660

A bill to extend and otherwise amend certain expiring provisions of the Public Health Service Act for migrant health services

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 310 of the Public Health Service Act is amended by striking out "$9,000,000 each for the fiscal year ending June 30, 1968, and the next fiscal year, and $15,000,000 for the fiscal year ending June 30, 1970", and inserting in lieu thereof "$15,000,000 for the fiscal year ending June 30, 1970, $20,000,000 for the fiscal year ending June 30, 1971, $25,000,000 for the fiscal year ending June 30, 1972, and $30,000,000 for the fiscal year ending June 30, 1973".

SEC. 2. Section 310 of the Public Health Sevice Act is further amended by adding immediately after the final sentence thereof the following new sentence: "For the purposes of assessing and meeting domestic migratory agricultural workers' health needs, developing necessary resources, and involving local citizens in the development and implementation of health care programs authorized by this section, the Secretary must be satisfied, upon the basis of evidence supplied by each applicant, that persons broadly representative of all elements of the population to be served and others in the community knowledgeable about such needs have been given an opportunity to participate in the development of such programs, and will be given an opportunity to participate in the implementation of such programs."

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendments were agreed to.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. YARBOROUGH. Mr. President, I ask for third reading of S. 2660.

The bill was ordered to be engrossed and to be read a third time.

The bill was read the third time.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that the Committee on Labor and Public Welfare be discharged from further consideration of H.R. 14733 and that the Senate proceed to the immediate consideration of H.R. 14733.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 14733) to amend the Public Health Service Act to extend the program of assistance for health services for domestic migrant agricultural workers and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. YARBOROUGH. Mr. President, I am indeed gratified to support the passage of this bill to extend and improve health services for domestic migratory farmworkers, which I introduced earlier this year.

The need for increased funds for migrant health services is graphically illustrated by comparing statistics that reveal the per capita expenditures of $12 for health care for migrants, compared with the per capita expenditures of well over $200 for health care for the Nation as a whole. Migrants have been shown to have an incidence of tuberculosis 17 times greater, and infestations with worms 18 times greater, than is seen among patients in private physicians' offices.

Notwithstanding this great need, Federal funds for the years 1967 through 1969 for migrant health services totaled less than $25 million for all 3 years. My bill, S. 2660, authorizes Federal funding for the years 1971 through 1973, which total $75 million or more than triple the funds that were appropriated for 1967 through 1969. The need is great—we must try to meet it.

The bill also strengthens congressional support for the involvement of migrants in the development and implementation of health care programs for their benefit. The Secretary must be satisfied by the project applicant that persons broadly representative of all elements of the population to be served will be given an opportunity to participate in the development and implementation of programs to improve migrant health services. Thus, the migrants themselves must be involved in the health projects.

The Committee on Labor and Public Welfare agreed unanimously that the migrant health program should be "a permanently and separately identifiable program." The action taken by the Public Health Service to destroy the separate identity and operation of the migrant health program must be reversed. The staff should be reinstituted as a core unit.

We are on the road to overcoming generations of neglect. We should continue on this road. S. 2660 provides an opportunity. As chairman of the Committee on Labor and Public Welfare, I urge its immediate passage.

Mr. President, I move that all after the enacting clause be stricken and that the text of S. 2660 as amended be inserted in lieu of the text of H.R. 14733.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to.

The PRESIDING OFFICER. The question now is on the engrossment of the amendment and the third reading of H.R. 14733.

The amendment was ordered to be engrossed and the bill (H.R. 14733) to be read a third time.

The bill was read the third time, and passed.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that S. 2660 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

The title was amended so as to read: "To extend and otherwise amend certain expiring provisions of the Public Health Service Act for migrant health services."

SENATOR ELLENDER ADDRESSES THE NATIONAL AERIAL APPLICATORS ASSOCIATION CONFERENCE

Mr. ELLENDER. Mr. President, I ask unanimous consent that an address I delivered before the National Aerial Applicators Association Conference in New Orleans on December 9, 1969, be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS DELIVERED BY SENATOR ALLEN J. ELLENDER BEFORE THE NATIONAL AERIAL APPLICATORS ASSOCIATION CONFERENCE, NEW ORLEANS, LA., DECEMBER 8, 1969

I am glad to be with you and to add my voice to those welcoming you to the Queen City of the South, New Orleans. Although December is not the best time of the year to visit this city, it is still a good place in which to have a good time.

I realize it is not always easy to address professional groups, such as the one now facing me. It is always taken for granted that experts know more about their own business than a humble Senator, who must always keep his ear to the ground and measure the reaction that follows any position he may take when the public is involved.

Your Executive Director has informed me that today your members must not only be top-fight pilots, but also—and I quote—"knowledgeable in chemistry, physics, agronomy, farming and engineering, meteorology, and cost-accounting." In regard to the last qualification named—I would like to say—"cost-accounting", of all things! If any of you are good at cost-accounting and happen to lose your job, I wish you would come and work for the government, particularly in the Department of Defense. What we badly need there are people able to count the cost of the programs which are advocated. This applies not only to the dollar cost to the taxpayers, but to the social cost—the cost which must be borne by our society as a whole, including the taxpayer, the consumer, the farmer, the city dweller—in fact, the entire environment which supports the American public.

I am pleased to note the theme of this Conference—"SAFETY IN '70." I think it is very appropriate, as it reflects the dangerous times in which we live. We are all concerned with safety. There is danger lurking in the streets of our large cities, particularly our capital city of Washington. South Vietnam wants to be safe from North Vietnam, North Vietnam from China. China must dream of protection from Russia. Russia desires safety from the United States and the United States wants to be safe from Russia. I repeat—what an appropriate theme you have selected.

Seriously speaking, security is one of the foremost psychological needs of mankind. It always has been, and I presume that it always will be. What is important, however, is that some danger is real and some danger is only imagined. It is to this point that I want to address myself today. Sometimes the imagined dangers can be more serious than the real ones, for men are moved as much by myth as they are by logical reasoning.

There are several problems facing this Conference today, and facing the chemical industry as a whole. You know your business better than I; you are experts in your field, and I will not presume to tell you how to run your affairs. I will speak to you, therefore, as a long-term Chairman of the Senate Committee on Agriculture and Forestry, and as one who has some knowledge and experience with the forces of public opinion, and how these forces can act to shape changing public policy.

This nation is becoming increasingly concerned with the growing problem of pollution, along with the means to control the use of those substances which may cause the pollution of our water and atmosphere. There are many reasons for this heightened public awareness. Unfortunately, however, such an increase in public awareness usually breeds emotionalism, and some people are then inclined to lose their sense of reason. Politics becomes involved, and whenever that hap-

pens, even many men and women in public life seem to lose their sense of reason. They listen to the cry of pressure groups and often-times do not use their own God-given common sense.

This awareness, I must observe is being reinforced by a growing scientific, governmental, and public concern about the problem of pollution in general. This is a concern which is coming to be shared by private industry, and by groups such as your Association. I take much encouragement from this attitude, for these are the forces which are the movers and doers of our society.

It may not be entirely true, as some still think, that what is good for General Motors is good for the nation, but as soon as General Motors realizes that; gasoline fumes represent a clear and present danger to our society, the problem will be attacked and probably licked. The government can lead the way, as it must do on occasion, but in the final analysis real progress depends upon the wholehearted cooperation of those who produce, develop, and find use of our national wealth and resources.

We can consider other factors in this increasing public awareness as well. There is the discovery of DDT in the far and uninhabited reaches of the world, for instance, or the discovery of oily waste material in the Sargasso Sea, a thousand miles from any shoreline or shipping lane, to cite another example. Still, it seems to me that there are two primary sources for the increased public concern with pollution that we have seen developing in the last few years.

First, and perhaps most important, is the development of machines able to measure tolerances down to levels previously unheard of. Thus, at one stroke, we found substances present in food, water and air that we did not know were there. What the presence of small quantities of poisonous materials means to human life is a subject of scientific controversy. The man on the street, however, has no difficulty in jumping to a conclusion.

The second factor involved in our heightened awareness and the change in attitude toward pollution in general is the advent of television. Television is capable of graphically displaying a polluted river and showing the effects of pollution to all the people in the country. People in some parts of the country may never have seen a large river in their lives, or heard of a fish-kill. But after seeing on their television screens the thousands of dead fish piled up on a river bank, they are quick to sit down and write their Congressmen to have something done about the situation immediately.

A good example took place only a few months ago in my own Parish of Terrebonne. Thousands of fish were found floating along the south shore of Lost Island, which parallels our coastal waters.

Pictures of the dead fish were taken and printed in some of our local newspapers. Water pollution for certain was the cause according to some who were not acquainted with the facts. Some alleged that the oil or gas industry was the culprit or maybe it was the pesticide used to kill sugar cane borers or maybe DDT that was used to kill weeds, caused the fish kill. After a survey was made by some of our local people it was found that a large fishing boat loaded down with menhaden, a fish from which oil is extracted, floundered on a sand bar and in order to put the boat afloat, it was necessary to dump its cargo of fish. No pollution was found, but it was too late to give the true picture and in the minds of some, the cause of the fish kill was pollution.

This is largely the problem facing your Association today. A fish-kill occurs somewhere on the Mississippi after a farmer upstream has dusted a few acres of cotton. In the public mind, DDT is automatically the villain. A detailed study by the Fish and Wildlife Service and the United States Department of Agriculture may later determine that DDT had nothing to do with this particular fish-kill. The real cause may have been industrial over-flow, or a drop in the oxygen supply, or too much sewage from an upstream city, but it is usually too late to undo the damage done to the farmer by an over-zealous public.

Public opinion is a vital and effective force in this country. In some areas it is more effective than in others. This is true in different areas of public policy. I have noticed, for instance, that the greatest outcry against the use of pesticides is in those regions where their use is almost unknown, or is of little economic importance to the agricultural producer. Yet in those general areas of policy-making which have to do with pollution control, public opinion is exerting a powerful force. By and large, this is long overdue, and I welcome the development.

But one of the difficulties is that very often those who are most concerned with a national problem are those who know relatively little about it. Because of this, the danger the public feels at present takes on many qualities of a myth. Whether the danger actually exists is sometimes beside the point. The fact is that people think it does. They feel insecure, unsafe, and they want something done about it. Emotion takes the place of reason, as I pointed out before, especially when those concerned with a public problem have no economic stake in its solution, or feel they have none.

It is the responsibility of reasonable men to keep things in perspective. It is our duty to balance what can be done today with what ought to be done tomorrow, when everything in the world is near perfect.

Those authorities whose business it is to know the facts, those who manage the testing stations scattered through Louisiana, Mississippi, and the entire Southeast, feel that DDT applied in a safe manner, according to regulations, represents little danger to the environment. It does not build up to dangerous levels in the soil, and its potential can be controlled.

Far greater danger to the pollution of our lakes and streams comes from industrial production and from the use of DDT and similar control chemicals in our vast urban areas. It is this that may be responsible for the high levels of toxic substances found in the fish of the Great Lakes and other areas. We face a far greater change from industrial and municipal sources than we do from the limited chemical applications made on Southern cotton fields.

Make no mistake about it—I am not saying that the dangers from the widespread use of persistent agricultural chemicals is non-existent. What I am saying is that in my judgment the worst teeth of this dragon can be pulled by training, and by the use of wise methods of application. Furthermore, it is a danger which we must face if cotton production in the South, as we know it, is to continue in the future.

A very recent study by the United States Department of Agriculture indicates that if the use of the most common chemicals were restricted on a selective basis, increased production costs in the Southeast would have amounted to an average of $3.12 per treated acre. This would have totaled $15.4 million in 1966 and would have represented 1.2% on the farm value of cotton lint and cotton seed in that year. The biggest increase would have been in the Delta Region, and would have amounted to $6.8 million or an average of $4 per treated acre.

Those who have studied this problem in the U.S. Department of Agriculture are in agreement that the use of persistent pesticides will be necessary until other substances are developed by our chemical industry. The industry itself is hard at work on this problem because of its economic implications. The government is also at work. I am informed that two-thirds of the pesticide research conducted by the Department of Agriculture is aimed at the development of non-persistent, less dangerous chemical compounds. Today, as you well know, what we have to work with is generally less effective and greatly more expensive. Some of them are even more dangerous to human and animal life than DDT and similar compounds.

We come now to what might be done—no, what *must* be done to protect the legitimate interests of your Association, and the interest of American agriculture. If the use of pesticides is immediately and seriously curtailed in agricultural applications, the price of our products will climb even faster than it is at present under inflationary pressures. If we are forced to compensate for increased insect damage by increasing the acreage devoted to our staple crops—cotton, corn, wheat, and the like—we will find that insects and crop diseases have an infinite capacity to reproduce. We will find that a danger largely misunderstood by the public can come to have real and serious consequences. Not only will your Association and the American farmer be hurt, but all our citizens will suffer. We are all consumers, and we all make regular visits to the grocery store.

As I said earlier, I am speaking to you today as one knowledgeable in agriculture, and also as one with some experience in the making of public policy. As such, I yield to no man in my concern with the dangers facing our environment from the effects of pollution. Less than a month ago, I persuaded the Senate to increase by almost five times the amount of money budgeted for this fiscal year in water pollution control work. The House of Representatives would agree to only $800 million, or four times the amount requested by the Nixon Administration. There is a problem, without question, but we must deal with the facts and not with the myth. This latest action by the Congress, which I sponsored, is one way to get at the problems which are real.

The widespread use of persistent pesticides will remain under attack because public opinion is demanding changes in present policy, and because, in my estimation, fact is mixed with fancy, and reason is mixed with emotion. This does not make the attacks any easier for the farmer to face, for as I mentioned earlier, it is not only real danger which frightens people, but what they see as dangerous.

It seems to me that your task, the task of those segments of American agriculture vitally affected, and the task of the chemical industry, is to approach this problem over two avenues. First, you may implement the theme of this Conference—"Safety in '70"—which I would expand to mean safety in all the '70's. A great deal of work has already been done in adding to the safeguards of those who fly the planes and handle the materials, and this has been of benefit to all of you. The use of better control techniques must be developed so that the smallest possible quantities of pesticides can be used, and those applied only to those areas in need. You, yourselves, know these problems, and I am glad to see that you are moving to meet them. You must continue to do so.

Your activities are already regulated by the Department of Agriculture, the Federal Aviation Administration, and the State Agricultural authorities. Now the Departments of Health, Education and Welfare, and Interior, are trying to barge into the act. This pressure will continue; make no mistake about it. What you must do is work to make the areas of concern cause for the smallest possible concern.

As a second part of this first avenue of approach, all efforts to develop non-persistent insecticides for agricultural use must be supported.

As I mentioned, the government and the

industry are already doing much in this direction, but more can and must be accomplished. With the tide of public opinion running as it is, I do not think that much time is left. I have supported the research effort by the Department of Agriculture, and also by the Department of Health, Education and Welfare, and I promise to work for increased efforts in this direction.

The second avenue which should be explored by all parties dealing with this problem, and this includes those with an over-riding concern with the environment, is to work to get dangerous pesticides banned for nonessential uses. This is perhaps the best way we have of separating fact from myth. There is no good reason for use of heavy doses of of DDT on the shade trees along the streets of our cities, for example, and I could cite many other examples of what I would call abuses of the use of pesticides. Other substances can be used with greater safety, and if the expense of application is higher, this becomes a part of the social cost that we all must pay for a decent place in which to live.

We have returned to this question of social cost, which I referred to in the beginning of my remarks. It is a phrase which we are going to hear more and more in the decade of the 1970's. If Vietnam can be settled and we can enter an essentially peaceful era, the attention of the nation is going to be focused on its domestic problems. For too long, in my estimation, too much of our attention has been directed abroad. In our transportation system, our cities, our entire national environment, in the way in which we live today, problems have been allowed to get a start and grow up more or less behind our backs, to catch us unawares.

Changes in public policy are going to be made bit by bit, but the results are going to be seen across-the-board in the years ahead. These changes will be expensive—for government, for private industry, and for the consumer. I rate myself as a conservative in economic matters, for I try to maintain a healthy respect for prudence and good business when it comes to using other peoples money, to say nothing of my own. Yet there is little that I and the Congress can do to halt the trends which are in the making. I doubt that anything could be effective in this regard, short of a hair-curling depression, which none of us wish to see. The most that can be done by rational men is to control the direction of the changes that are taking place—to try and channel the trends for the betterment of all our people. For my part, I would rather see the tax money spent here at home than in questionable foreign adventures that drain the nation's wealth. I would much prefer that we make every effort to settle our differences with Russia than to continue an arms race that may lead to the destruction of mankind.

During the 1970's the expenses of improving our society will be too much for either the taxpayer or our industrial producers to bear alone. The cost will have to be borne by the consumers of all our goods, and by those who benefit from clean water and fresh air. If the public decides that electric lines should be put underground, electric rates will go up. If we decide finally that filthy, dangerous and polluted rivers are unacceptable to our people, the costs to those who use that water will increase. This is a fact that those who advocate expensive programs sometimes fail to point out. In an industrial society of 250 million people, it will be almost impossible for any individual to live very cheaply.

Those who deal with agriculture have already felt the pressures of this social cost in a multitude of ways, from the farmer in his fields, to the housewife in the supermarket. If uninformed concern with the pesticide problem is allowed to concentrate on myth, without due regard for the facts, this cost could increase immensely, overnight. Those groups advocating more stringent environmental controls are genuine in their alarms. But we must be certain that their concern is balanced with the efforts of our farmers and producers in the attempt to protect and expand our food supply.

I am convinced that a balance can be worked out which will benefit and cause undue harm to no one. For the time being, however, it is best that this problem be dealt with by those most knowledgeable in regard to the facts. For that reason, it seems to me inadvisable to allow controls of pesticide application when used for agricultural purposes to pass into hands other than those concerned with American agriculture.

There are those at the highest levels of government who apparently desire to see this control diffused to the Department of Health, Education, and Welfare, and perhaps to the Department of the Interior. I frankly see nothing to be gained by this, and I see many dangers which might flow from it. In short, our present laws should be enforced as written by the Congress, and by those agencies to whom authority was given by the Congress.

When more progress is made along those two avenues I have pointed out to you, when other non-persistent, effective substances have been developed, perhaps we can look at the problem differently. At the present, however, I do not favor proposals to diminish the authority of the Department of Agriculture over an activity so vital to our agricultural well being. You may rest assured that as Chairman of the Senate Committee on Agriculture and Forestry I will resist such a move. There is not much time to be lost, however, and I urge all of you to do everything possible to develop a constructive approach to these problems that will be with us in the years ahead.

In conclusion I would like to call to your attention a classic case in which I participated, a few years ago before I was elected to the United States Senate. This case illustrates the need for scientific studies before reaching conclusions as to the damages that may come from alleged pollution.

Several years after oil and gas were discovered in our Louisiana coastal waters, oyster fishermen complained that their oysters were dying. The fishermen and their lawyers commented that the culprits must be the many oil companies that produced oil and gas near and in the waters where oysters were grown. Damages were claimed from the oil companies which denied that the production of oil and gas killed oysters.

Damage suits involving several hundred thousand dollars were filed and I was asked to represent some of the oil companies. At first I refused to take the cases and I asked for time to look into the matter. For over six months I studied the situation and I suggested to the oil companies that they hire some scientists to do some research in our coastal waters in order to find out the reason for the death of so many oysters. In my studies I found that oysters were dying away from the oil and gas fields, and that oysters survived in the oil fields and I concluded that oil and gas explorations could not cause the death of so many oysters.

The lawyers for the plaintiffs insisted that their cases be fixed for the trial and we, the lawyers for the defendants, asked for time in order to obtain evidence indicating the real cause of the death of oysters. In the meantime our scientists were busy and could come to no definite conclusions except that their opinions were that neither the oil nor gas killed the oysters.

One case finally came to trial and after several weeks of taking testimony the trial judge concluded that the plaintiffs had not made out their cases. An appeal was taken to our Supreme Court in Louisiana and after arguments were heard the high court reversed the judgment of the lower court and the oil company involved was ordered to pay damages.

At that time we had no recourse. Many more suits were filed involving millions of dollars. Our scientists keep on working in their research efforts. Believe it or not about six months after the oil companies were forced to pay damages our scientists found the cause of the death of the oysters. It was neither oil nor gas that did the damages but a bug or parasite that attacked the adductor muscle of the oysters, making it impossible for the oyster to open and close its shell. As a result the oysters died. Soon after the discovery was made all the remaining suits were withdrawn or dismissed.

I repeat, this is a classic example of what good results can be obtained through research. Many operators, like yourselves, may be convicted in the eyes of the public before the truth is surfaced.

I hope that you in cooperation with the Department of Agriculture will continue in your research to find pesticides that will kill the bugs but not pollute the land and water.

ORDER OF BUSINESS

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate stand in recess for 15 minutes.

Thereupon (at 6 o'clock and 5 minutes p.m.) the Senate took a recess.

The Senate reassembled at 6:20 p.m., when called to order by the Presiding Officer (Mr. MCINTYRE in the chair).

PROCLAMATION OF JANUARY AS "NATIONAL BLOOD DONOR MONTH"

Mr. KENNEDY. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on Senate Joint Resolution 154.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the joint resolution (S.J. Res. 154) to authorize and request the President to proclaim the month of January of each year as "National Blood Donor Month", which were, in line 5, strike out "annually".

In line 6, strike out "of each year" and insert "1970".

And amend the title so as to read: "Joint resolution to authorize and request the President to proclaim the month of January 1970 as 'National Blood Donor Month'."

Mr. KENNEDY. Mr. President, I move that the Senate agree to the House amendments with an amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

At the end of the bill, add the following new section:

"SEC. —. Notwithstanding any other provision of law, the citizenship or nationality of Erneido A. Oliva shall not prohibit the Secretary of the Senate from paying compensation, for a period not to exceed 6 months,

to the said Erneido A. Oliva while serving as an employee of the Senate."

Mr. GRIFFIN. May I ask the Senator from Massachusetts if this was cleared with the ranking Republican members?

Mr. KENNEDY. Yes.

Mr. GRIFFIN. I thank the Senator very much.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Massachusetts.

The motion was agreed to.

VACATING OF ORDER FOR ADJOURNMENT UNTIL NOON TOMORROW

Mr. KENNEDY. Mr. President, I move that the previous order adjourning the Senate until tomorrow at noon be vacated.

Mr. GRIFFIN. Mr. President, reserving the right to object, and I shall not object, can the distinguished acting majority leader tell me whether this contemplates that the OEO will be the pending business tomorrow at 11 a.m. instead of 12?

Mr. KENNEDY. It does.

Mr. GRIFFIN. I thank the Senator.

The PRESIDING OFICER. The question is on agreeing to the motion of the Senator from Massachusetts.

The motion was agreed to.

ORDER FOR ADJOURNMENT UNTIL 11 A.M. TOMORROW

Mr. KENNEDY. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 11 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF TRANSPORTATION APPROPRIATION BILL, 1970—CONFERENCE REPORT

Mr. STENNIS. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 14794) making appropriation for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of Dec. 18, 1969, p. 39888, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. STENNIS. Mr. President, let me state that the conference report was signed by all the conferees.

I have a brief statement to make explaining the results of the conference.

All differences have been resolved with the exception of an amendment involving language which would authorize the Secretary to make transfers relating to staff functions, and the amount of liquidating cash for Federal-Aid Highways—trust fund. These last two matters have been left in disagreement and are not included in the conference report which I am describing.

I am happy to report that the House conferees have accepted the Senate amendment providing $50 million for an additional amount in 1970 for Grants-in-Aid for Airports. There was no money requested for airports this year because we were expected to pass a users tax; the civil supersonic aircraft funding has been resolved at $85 million—$95,958,000 in the House version and $80 million in the Senate version; the advanced funding for the Urban Mass Transportation Fund for 1971 has been resolved at $214 million—$220 million in the House version; $200 million in the Senate version.

I am advised that in separate actions following the approval of the report, the House has further insisted upon its disagreements to amendments numbered 2, 14, and 15—described in paragraph 2 of this statement. It is my intention, following the adoption of the report and the official advice from the House with respect to these disagreements, to move that the Senate recede from its amendments numbered 2, 14, and 15.

The total arrived at following these actions on the bill is $6,670,149,000, which is $652,157,000 over 1969 appropriations, $102,456,000 under the 1970 estimates, $55,719,000 over the House version, and $108,792,000 under the Senate version of the bill.

Mr. President, I move the adoption of the conference report.

The motion was agreed to.

Mr. STENNIS. Now, Mr. President, I ask that the Chair lay down the message with reference to the other items.

The PRESIDING OFFICER. The clerk will report the amendments in disagreement.

The LEGISLATIVE CLERK. Resolved, that the Senate recede from its amendments numbered 2, 14, and 15.

Mr. STENNIS. Mr. President, those are the items that the House conferees took back in disagreement, and the House sustained them.

Amendment No. 2 was the language whereby we gave authority to Secretary of Transportation Volpe to make certain transfers of personnel from various administrations under the Department of Transportation. The House insisted that that authority not be granted. It had been granted for 2 years to the preceding Secretary. Our committee thought, and the Senate approved, that he should be given that authority for more than the mere 5 months he had it.

But that has been resolved now, and I am going to move that the Senate recede from that amendment.

The others, 14 and 15, are companion amendments relating to $100 million that the House reduced in the Highway Trust Fund appropriation. The funds are paid out of the Trust Fund but have to be appropriated each year. That money has already in effect been promised to the States, and they have already made contracts against it.

We thought, and the Senate agreed, that we should provide all of it now, but the House disagreed. It will be handled some time later in that exact amount. So it is a matter that does not have to be done right now.

I, therefore, move that the Senate recede from its amendments just described, amendments 2, 14, and 15.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Mississippi.

The motion was agreed to.

Mr. STENNIS. Mr. President, I ask unanimous consent to have printed in the RECORD a summary on this bill, reflecting the amounts appropriated in fiscal year 1969, the budget estimates for fiscal year 1970, the amounts agreed to in the House and Senate versions of the bill, and the conference action.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE BILL, H.R. 14794

Item	New budget (obligational) authority, 1969	Budget estimates of new (obligational) authority, 1970	Version of bill: House	Version of bill: Senate	Conference action
TITLE I					
DEPARTMENT OF TRANSPORTATION					
OFFICE OF THE SECRETARY					
Salaries and expenses	$10,150,000	$12,900,000	$11,500,000	$11,750,000	$11,600,000
Transportation planning, research, and development	6,000,000	20,000,000	8,000,000	14,000,000	11,000,000
Consolidation of departmental headquarters			4,520,000	4,520,000	4,520,000
Total, Office of the Secretary	16,150,000	32,900,000	24,020,000	30,270,000	27,120,000
COAST GUARD					
Operating expenses	371,500,000	389,015,000	386,000,000	386,000,000	386,000,000
Deduct amount applied to debt reduction	—126,000	—131,370	—131,370	—131,370	—131,370
Acquisition, construction, and improvements	90,000,000	77,300,000	57,300,000	75,700,000	66,500,000
Retired pay	53,000,000	57,750,000	57,750,000	57,750,000	57,750,000
Reserve training	25,900,000	26,600,000	25,900,000	26,600,000	25,900,000
Research, development, test, and evaluation	4,000,000	14,900,000	14,500,000	14,500,000	14,500,000
Total, Coast Guard	544,274,000	565,433,630	541,318,630	560,418,630	550,518,630

SUMMARY OF THE BILL, H.R. 14794—Continued

Item	New budget (obligational) authority, 1969	Budget estimates of new (obligational) authority, 1970	Version of bill: House	Version of bill: Senate	Conference action
TITLE I—Con.					
DEPARTMENT OF TRANSPORTATION—Con.					
FEDERAL AVIATION ADMINISTRATION					
Operations	$705,354,000	$767,000,000	$767,000,000	$767,000,000	$767,000,000
Facilities and equipment	120,000,000	134,000,000	224,000,000	224,000,000	224,000,000
Research and development	27,000,000	47,500,000	41,000,000	41,000,000	41,000,000
Operation and maintenance, National Capital Airports	9,120,000	9,800,000	9,500,000	9,800,000	9,650,000
Construction, National Capital Airports	700,000	3,200,000	1,900,000	1,900,000	1,900,000
Grants-in-aid for airports, 1970	30,000,000				
Grants-in-aid for airports, additional 1970				50,000,000	50,000,000
Civil supersonic aircraft development		95,958,000	95,958,000	80,000,000	85,000,000

[1] Adjusted to conform with House and Senate Committee allowances.

[2] By transfer.

Mr. STENNIS. Mr. President, I want to express my appreciation to the members of the committee. The Senator from New Jersey (Mr. CASE), the ranking minority member on the subcommittee, is not here just now. The Senator from Colorado (Mr. ALLOTT) is a valuable member of the subcommittee, as is the distinguished Senator from Maine (Mrs. SMITH). They were also conferees.

I want to express my appreciation to all members of the subcommittee. I think that the bill as it emerged in final form will be sound and good for the Nation.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. ALLOTT. Mr. President, I would like to yield first to the distinguished Senator from Maine (Mrs. SMITH) if she wishes to speak.

Mrs. SMITH of Maine. Mr. President, I would like to say that we all owe the distinguished Senator from Mississippi a debt of gratitude for the dedicated way in which he has carried through on this bill—a very difficult bill. I at least want to thank him.

Mr. ALLOTT. Mr. President, will the Senator yield further?

Mr. STENNIS. I yield to the Senator from Colorado.

Mr. ALLOTT. Mr. President, I want to underscore and emphasize the remarks made by the distinguished Senator from Maine, because I participated in this matter. I am sorry that official business keeps the distinguished Senator from New Jersey, who is the ranking minority member of the committee, off the floor, because he has worked so hard and so devotedly on the bill.

Of course, none of us is completely happy with the bill, as we hardly ever are, but we had to yield on those points in order to get a bill. All in all, we have done a good job. I think the whole Transportation Department will be stronger. Those of us who are vitally interested in the transportation area know it means much to our country, and particularly to the large city areas, where it is important to resolve transportation problems.

I am sure the distinguished Senator said this while I stepped out of the Chamber, but I would like to say it because it needs to be said. I think we ought to pay particular tribute to the efficient members of the staff, John Witeck, for the majority, and Bob Clark, the minority member, who devoted much time and effort to enable us, first of all, to bring a bill out of the subcommittee which the full committee would adopt, and then to carry the bill on the floor, and then to assist us in asserting the Senate's position in conference. Without them, we could not have done it. Their assistance has been invaluable.

Again I pay tribute to the distinguished chairman. It is wonderful to work with him. The time he has devoted to this bill has paid off, in my opinion, for the good of the United States.

Mr. STENNIS. Mr. President, I thank the Senator. I am most grateful for the fine work he has done this year and in preceding years and on the authorizing committee. I know he has made many outstanding contributions. I join him in his tribute to our staff members. They always go the second mile and are very efficient.

ADJOURNMENT UNTIL TOMORROW, SATURDAY, DECEMBER 20, 1969, AT 11 A.M.

Mr. KENNEDY. Mr President, if there is no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 11 o'clock tomorrow morning.

The motion was agreed to; and (at 6 o'clock and 35 minutes p.m.) the Senate adjourned until tomorrow, Saturday, December 20, 1969, at 11 a.m.

CONFIRMATIONS

Executive nomination confirmed by the Senate December 19, 1969:

AMBASSADOR

Henry J. Tasca, of Pennsylvania, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Greece.

HOUSE OF REPRESENTATIVES—*Friday, December 19, 1969*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

The people that walk in darkness have seen a great light: they that dwell in the land of the shadow of death, upon them hath the light shined.—Isaiah 9: 2.

O God, to whom glory is sung in the highest, while on earth peace is proclaimed to men of good will, grant that good will unto us, unto the citizens of our land, and unto the nations of the world that peace may live in our hearts and in the hearts of all people.

Guide, strengthen, and give wisdom to our President, our Speaker, Members of Congress, and all who labor with them that there may be justice and good will at home and freedom and peace between the nations of the world.

Make us humble in faith, genuine in love, concerned about the needy that the Christmas spirit may live in our lives and find expression in daily living throughout the new year.

In the spirit of Christ we pray. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 15209. An act making supplemental appropriations for the fiscal year ending June 30, 1970, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 15209) entitled "An act making supplemental appropriations for the fiscal year ending June 30, 1970, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BYRD of West Virginia, Mr. PASTORE, Mr. HOLLAND, Mr. ELLENDER, Mr. MCCLELLAN, Mr. MAGNUSON, Mr. STENNIS, Mr. YOUNG of North Dakota, Mrs. SMITH, Mr. HRUSKA, and Mr. ALLOTT to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 15090) entitled "An act making appropriations for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2917) entitled "An act to improve the health and safety conditions of persons working in the coal mining industry of the United States."

The message also announced that the Senate agrees to the amendments of the House to a bill of the Senate of the following titles:

S. 740. An act to establish the Cabinet Committee on Opportunities for Spanish-Speaking People, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to amendments of the Senate to a bill of the Senate of the following title:

H.R. 9233. An act to amend title 5, United States Code, to promote the efficient and effective use of the revolving fund of the Civil Service Commission in connection with certain functions of the Commission, and for other purposes.

The message also announced that the Presiding Officer of the Senate, pursuant to Public Law 115, 78th Congress, entitled "An act to provide for the disposal of certain records of the U.S. Government," appointed Mr. MCGEE and Mr. FONG members of the Joint Select Committee on the part of the Senate for the Disposition of Executive Papers referred to in the report of the Archivist of the United States numbered 70–3.

APPROPRIATION FOR INDIAN HEALTH SERVICES ADOPTED BY SENATE

(Mr. EDMONDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDMONDSON. Mr. Speaker, yes-

terday the other body by a vote of 80 to zero adopted an amendment which added $2,000,000 to the appropriation for Indian health services in this country.

The amendment was one offered principally by the senior Senator from Oklahoma, Senator HARRIS, with 11 Senators as cosponsors.

I think a case was made on the floor of the Senate that overwhelmingly justified the addition of these funds. Generous use in the Senate debate was made of a report recently submitted by two Members of the Indian Affairs Subcommittee of the House Committee on Interior and Insular Affairs pointing out drastic shortages of medicine and of personnel in three Indian hospitals in Oklahoma.

I hope and earnestly pray that the House conferees will accept the addition of this money without a great deal of delay and without a great deal of controversy, because it is urgently needed if we are to give quality medical care to our first Americans. There is good reason to believe that we are today seeing needless deaths and needless prolonged illness in our Indian hospitals because of the shortages which prevail. I earnestly beseech our conferees on behalf of the House to accept this addition of funds that has been added in the other body.

TIME TAKEN UP BY QUORUM CALLS

(Mr. COLLIER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLLIER. Mr. Speaker, it seems appropriate on this 19th day of December, as this Congress is limping toward a belated adjournment, that we give some consideration to all the factors which contribute to a really unnecessary situation. For obvious reasons we cannot go into all of them at this time, but there is one which deserves the attention of the Members of this House, particularly since the Legislative Reorganization Act is pending before the Rules Committee.

Perhaps it has not occurred to you that we had in the 90th Congress 397 straight quorums—completely useless straight quorum calls consuming an average of 30 minutes apiece—which means a loss of the equivalent of 24 working days per Member of this body. We have already had 172 of these straight quorums this year. It seems to me that all of us can put this time to better use. If someone can come up with anything that resembles a justification for this type of useless routine, I certainly would like to hear it.

SEASON'S GREETINGS

(Mr. WILLIAMS asked and was given permission to address the House for 1 minute.)

Mr. WILLIAMS. Mr. Speaker, once again, this newsletter reaches you amid the spirit of the holiday season, that time of year during which Americans gather within their groups of family and friends to participate in what, to them, is basic in their respective beliefs and traditions.

This is the joyous season in which Americans, of whatever religious conviction, find common bond in man's belief in God and in man's determination to preserve the dignity and freedom which God intended.

From myself, my family, and staff—to you and yours—go every good wish for the full blessings and joy which only this holiday season can afford.

MEDICAL SCHOOLS ARE UNDERFINANCED

(Mr. CARTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARTER. Mr. Speaker, the medical schools and medical students in our country are undergoing a difficult period of underfinancing.

I have a letter from the dean of the University of Kentucky Medical School, in which he states that 45 percent of the students currently in the health professions programs project financial deficits during this academic year, and that the total amount of these shortages will approximate $100,124.

Almost certainly some of these students may be forced to withdraw unless supplemental funds are found. In view of the critical health needs of the State of Kentucky, and the very limited economic reserves available to most of our students—for example, 39 percent of the students in their first year classes are from families where annual gross income is under $10,000. I feel that any and all steps toward restitution of these funds should receive your immediate attention.

The administration has asked that the medical schools in the United States graduate 1,000 more physicians this year. Can we afford, then, to cut back our aid to medical schools and our medical students at this time when we have been asked for an increased number of graduates? Are the necessary funds to be withdrawn?

I strongly urge, Mr. Speaker, that the conferees on the HEW bill include sufficient funds for loans for the medical students and for the medical schools, so that these young physicians so necessary to improvement of the health of the United States may be graduated.

THE TENNESSEE-TOMBIGBEE WATERWAY IS A LEGITIMATE FEDERAL PROJECT

(Mr. EDWARDS of Alabama asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDWARDS of Alabama. Mr. Speaker, during the last few weeks, I have mentioned some urgent reasons why construction of the Tennessee-Tombigbee Waterway should begin. This project affects some 23 States directly and many others indirectly. However, it is oftentimes difficult to think about its effect in those terms. I would like to discuss briefly today, nine counties in Alabama that will be contiguous to the waterway and will certainly directly benefit by the commerce and industry the project will stimulate.

These nine counties lie in the southwestern region of the State. Eight of the counties are considered rural by Office of Economic Opportunity standards. Seven must participate in the Department of Agriculture's food stamp program. The other two participate in the commodity distribution program. All are well below the national average in health personnel and hospital beds per 100,000 population ratio.

With respect to income, all nine counties have more families with incomes below $3,000, on the average, than the rest of the Nation. To cite 1969 statistics:

In one county between 25 and 35 percent of the families earn less than $3,000. Another has between 35 and 50 percent in this category. Five of the counties have 50 to 65 percent who earn less than $3,000. And two counties have incomes of less than $3,000 going to between 65 and 80 percent of the families.

Remember that the new poverty level has been set at just under $3,000. When I say to you that the Tennessee-Tombigbee Waterway will provide new life for one of the poorest areas of the South, I am not just whistling "Dixie."

In terms of buying power per capita the figures are even more demoralizing. The range lies between $883 to $1,636.

I have mentioned many times in connection with the Tennessee-Tombigbee Waterway project, the great effect it will have on moving people off welfare rolls and onto payrolls. Let me cite to you a few figures that indicate the level of employment in these areas: I will use two counties as examples.

In Choctaw County, based on 1960 population figures, 8,891 were in the eligible labor force of males over 14 years of age. Of this group only 3,644 were actually employed. That is less than 40 percent of the eligible males. In the case of the 8,979 females of the same age only 1,308 are working—less than 15 percent.

In Washington County 10,639 males over 14 years of age were in the eligible labor force. Of this group only 4,671 were employed—less than 45 percent. In the case of the 11,243 females of the same age only 2,262 were working—around 20 percent.

Large amounts of taxpayers' dollars are poured into these counties to help the people of the area. But these tax dollars are doing nothing to permanently alter the situation and only bring the promise of continued dependency on the Federal Government. For a mere $316 million over 10 years, this Federal Government can build a project that will help put an end to this perpetual cycle of welfare, poverty assistance, and handouts. I hope the President and this Congress will back such a project wholeheartedly.

PUTTING OUR FISCAL HOUSE IN ORDER

(Mr. ARENDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARENDS. Mr. Speaker, what I am about to say may make me the most unpopular Member of this body. I am willing to take that risk.

The risk I am taking is of no consequence compared to the risk to our country's well-being that many of my colleagues seem willing to take simply to serve what they conceive to be in the interest of their own political well-being.

I have been checking voting records. I have been amazed to find many of those who voted against continuation of the surtax to be consistently voting for increases in Government spending.

As much as I would like to have this session of Congress adjourn that we may have a vacation period before the opening of the next session, I am advocating that the President veto any appropriation bill which he finds excessive. I am advocating that the President veto any so-called tax reform bill sent to him that materially reduces much-needed revenue. I am advocating that the President keep us here and do whatever may be necessary to put our fiscal house in order.

Never in my many years' service in this House have I witnessed such disregard for the economic health of our country and the welfare of our people suffering from the ever-increasing prices.

ANOTHER INCREASE IN WHOLESALE PRICES

(Mr. ANDERSON of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANDERSON of California. Mr. Speaker, on Wednesday we were presented some events that allegedly indicate that results are showing up in the administration's fight against inflation. We were given "tangible evidence that we are beginning to make some progress in relieving those excessive pressures on the economy that have been driving up the cost of living."

But today, we are presented with some hard realistic evidence that appears to contradict the optimistic attitude of the administration.

The Bureau of Labor Statistics revealed that overall wholesale prices rose 0.6 percent in November. This is the largest monthly increase since May. This increase brought the Wholesale Price Index up to 114.7, an increase of 4.7 percent in the past year.

When wholesale prices go up, retail prices usually follow suit. Thus, increases in prices for the wholesaler are usually passed on to the consumer.

The wholesale price of food rose 3 percent during this period. If retail prices rise by a like amount, the housewife will have to buy 3 percent less food or spend 3 percent more money in order to provide the same menu she offered her family in May.

Perhaps the administration's "evidence" does not consider the needs of the average consumer. Perhaps the evidence is relieving the inflationary pressure only for a privileged few. The evidence from the Bureau of Labor Statistics illustrates higher prices for those of us who do our own shopping in the grocery store—those of us who do not believe that "progress" of this type is to be welcomed.

BLACK PANTHER INVESTIGATION

(Mr. ROSTENKOWSKI asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. ROSTENKOWSKI. Mr. Speaker, following the announcement that the Justice Department will have a grand jury investigation in the city of Chicago, the State's attorney of Cook County held a press conference. I feel that Mr. Hanrahan's observations should be noted. Therefore, I am including his statement in the RECORD at this point:

Assistant Attorney General Jerris Leonard of the Department of Justice today told me that because the Black Panthers had *refused* to be interviewed by the FBI it was impossible for the FBI to complete its preliminary investigation.

As a consequence of this refusal by the Black Panthers, Mr. Leonard told me the Department of Justice was forced to abandon its preliminary investigation and would now try to get Black Panther testimony through a Federal Grand Jury.

This decision by the Department of Justice was made *despite* the continuing willingness of our officers to be interviewed by FBI agents.

It is *outrageous* that the Department of Justice would abandon its established practices because of the refusal of the Black Panther party to tell the truth to FBI Agents. It is *amazing* that the Black Panthers, who claim their civil rights were violated, would refuse to support their claims by giving the facts to the FBI.

PERMISSION FOR HOUSE MANAGERS TO FILE CONFERENCE REPORT ON H.R. 15149, FOREIGN ASSISTANCE APPROPRIATIONS, 1970

Mr. PASSMAN. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on H.R. 15149, a bill making appropriations for foreign assistance for the fiscal year ending June 30, 1970, and for other purposes.

The SPEAKER pro tempore (Mr. ALBERT). Is there objection to the request of the gentleman from Louisiana?

There was no objection.

CORRECTION OF RECORD WITH RESPECT TO H.R. 9334

Mr. TEAGUE of Texas. Mr. Speaker, on yesterday the Speaker recognized me for a unanimous consent request to take from the Speaker's table the bill H.R. 9334, with the Senate amendment thereto, and concur in the Senate amendment.

The CONGRESSIONAL RECORD, on page 39800, shows that this is what occurred, although the number of the bill shown in the RECORD is incorrectly shown as H.R. 9634.

The error in the number was also repeated in the message to the Senate later on yesterday, the Senate was mistakenly informed that the House had concurred in the amendments of the Senate to H.R. 9634, rather than in the Senate amendment to H.R. 9334.

I therefore ask unanimous consent that the CONGRESSIONAL RECORD be corrected to show that I asked for the consideration of H.R. 9334 instead of H.R. 9634.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas.

There was no objection.

Mr. TEAGUE of Texas. Mr. Speaker, I also ask unanimous consent that the Clerk be directed to request the Senate to return to the House of Representatives the message on the bill (H.R. 9634) to amend title 38 of the United States Code in order to improve and make more effective the Veterans' Administration program of sharing specialized medical resources.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

CALL OF THE HOUSE

Mr. MINSHALL. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. BOLAND. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 341]

Abbitt	Foley	O'Neill, Mass.
Adams	Fraser	Ottinger
Alexander	Fulton, Tenn.	Patman
Anderson, Tenn.	Gallagher	Pelly
	Gray	Pepper
Andrews, Ala.	Grover	Pike
Ashbrook	Gubser	Pirnie
Ashley	Hall	Poage
Baring	Harvey	Powell
Bolling	Hébert	Pucinski
Brock	Hungate	Rees
Cahill	Karth	Reifel
Carey	Kirwan	Rosenthal
Celler	Kleppe	St Germain
Chisholm	Kluczynski	Sandman
Clancy	Kyros	Scheuer
Clark	Lipscomb	Sisk
Clay	McCarthy	Skubitz
Conyers	MacGregor	Stephens
Corman	Martin	Sullivan
Dawson	May	Teague, Calif.
Diggs	Miller, Ohio	Tunney
Eckhardt	Morse	Vanik
Edwards, Calif.	Morton	Watkins
Erlenborn	Moss	Whitehurst
Farbstein	Myers	

The SPEAKER. On this rollcall 357 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PERMISSION FOR HOUSE CONFEREES TO HAVE UNTIL MIDNIGHT SUNDAY, DECEMBER 21, TO FILE CONFERENCE REPORT ON H.R. 13270, TAX REFORM ACT OF 1969

Mr. MILLS. Mr. Speaker, on behalf of the conferees on the part of the House I ask unanimous consent that the conferees may have until midnight Sunday, December 21, to file a conference report to accompany H.R. 13270, the Tax Reform Act of 1969.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

Mr. BYRNES of Wisconsin. Mr. Speaker, reserving the right to object—and I do so only so that the Members of the House might have an understanding of the situation—this does not mean that the conference committee will not finish its work today. The timing of the request for Sunday night is to give an opportunity to put the language of the report that has to be filed and the amendments that have been agreed to into proper form.

Mr. MILLS. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Arkansas.

Mr. MILLS. Mr. Speaker, I appreciate the gentleman bringing up the matter because it is true that a number of changes have been made in both the House bill and the Senate bill that require variations in the language of one or the other or both of those bills. That language, being part of the Internal Revenue Code, has to be drawn and included in the conference report. Our decisions undoubtedly will be completed fairly soon.

Mr. BYRNES of Wisconsin. At least we hope so.

Mr. MILLS. Mr. Speaker, if the gentleman will continue to yield, we, as the gentleman knows, stayed in session last night and left the House about 5 minutes of 3.

Mr. BYRNES of Wisconsin. This morning.

Mr. MILLS. This morning. We did so thinking that we could get through last night, but the hamburgers we had for supper in the conference room, and the little bit of milk we drank, stimulated us at least until 3 o'clock, and when we saw that it was not going to furnish enough stimulus to our minds to enable us to stay there all night we broke up with the understanding that we would come back today and complete our decisions. I would hope very earnestly that we will not be in conference very long today.

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman.

Mr. GERALD R. FORD. Under the program that has been announced, would the report be available for Members on Monday?

Mr. MILLS. That is hard to predict. I certainly hope it will be. I understand the Government Printing Office is heavily loaded at the moment and will be from now until we adjourn or recess or whatever we do.

I was told yesterday that on a similar request, to have until midnight to file a report, that the report was not available in printed form, in that connection, until or by at least noon the next day.

I would think, if it is agreeable with the Speaker and the majority leader—and I would like to get his opinion on this, so that the membership may be given now some idea of the time—that on Monday or Tuesday we would vote. Very frankly, it might be better to predict now that we will be ready to vote sometime on Tuesday than to have to undertake to do it on Monday, although I would like for it to be possible to do it Monday, but because of the possibility that the report itself would not have been printed and available to the membership in time for them to have a look at it, it might be best to consider setting it for Tuesday.

I do not mind asking unanimous consent, but the only way we can schedule it and take it up before it is available, as I understand the rules, is to ask unanimous consent that we may take it up even though it has not been printed. I do not think I want to make that kind of request.

Mr. BYRNES of Wisconsin. Well, I would add that I do not think that I could accede to that kind of request.

Mr. MILLS. Of course not.

Mr. BYRNES of Wisconsin. This bill encompasses so much and it is so vital that every Member should have an opportunity to see what has been done in conference. This is particularly true in this case because of the possible differences between the House bill, the Senate bill, and the conference decisions.

The big difference frankly so far, I think we can predict, will be the difference that we will have between the Senate bill and the conference report.

Mr MILLS. Yes, I think that there will be more similarity up to this point, in the conference report and the House bill, and I think I can take all of you into our confidence and say that in the bill that passed the House we recoup through our reform provisions over a period of time, an estimated $6.9 billion, and that when the Senate completed its action on the bill that amount had been materially reduced perhaps by as much as one-half.

My recollection is, and I would like the gentleman's memory to assist me here—but my recollection is that the decision so far made within the conference, with respect to the reforms, would bring the amount back close to the House bill, so we would recoup some $6.5 billion through the reforms.

Mr. BYRNES of Wisconsin. I would not agree with that figure because the gentleman has added into that figure the extension of the surtax.

Mr. MILLS. No, no.

Mr. BYRNES of Wisconsin. And the excise tax extension also when you are talking about the $6.5 billion figure.

Mr. MILLS. No, no, I am not adding it—I am not adding those. I am adding, and what we are talking about, are those items listed as reform items—as reform items—and not the 5 percent surcharge for 6 months of 1970, or the excises.

Mr. BYRNES of Wisconsin. I am talking about the balance between the two.

Mr. MILLS. I am not talking about 1970. I am talking about the figure in the conference report which corresponds to the figure in the House-passed bill—or $6.9 billion. This of course, is not the immediate figure but a figure over a period of time.

Mr. Speaker, I want to point out that we are almost in line with the House-passed bill so far as the recoupment through reform is concerned. That is the point I wanted to make.

Mr. BYRNES of Wisconsin. I thank the gentleman. I do not want to quarrel with those figures.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I am glad to yield to the gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, of course we are hoping that the situation is such, but it might be possible to bring it up on Monday and we are hopeful of that even if it be late on Monday.

Mr. MILLS. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman.

Mr. MILLS. That suits me fine. So many Members have asked me the question about when we might take this up, that I thought we needed to have this colloquy so that it would be understood that after today the only thing that is holding it up is the completion of the conference report by our technicians, and the printing of the conference report.

If it is made available to us on Monday and Members have an opportunity to look at it on Monday, we could, of course, bring it up on Monday.

Mr. ALBERT. If the gentleman will yield further, we are very hopeful, the House is, as the distinguished chairman and ranking member of the committee know, that we might get out on Monday. But I would like to state that should we fail to be able to do so, by reason of the fact that the report is not printed and available, we would hope on Monday to ask to come in quite early on Tuesday and see if we could finish it on Tuesday.

Mr. BYRNES of Wisconsin. I would emphasize to the gentleman that we are not only getting many inquiries about when we will conclude action but we are also getting many inquiries about what we have done. I seems to me we have to allow ample time for Members to find out what we have done before they will be prepared to vote on this legislation.

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the minority leader.

Mr. GERALD R. FORD. I would like to ask the distinguished majority leader, in light of what he just said about what he would hope to do in reference to Tuesday, if we should meet on Tuesday, is there any harm in asking unanimous consent now that we come in at an earlier hour on Tuesday so that we know in advance that that would be the plan if we should meet on Tuesday?

Mr. ALBERT. I would prefer not to make that request right now. We have had discussions about coming in at 10 o'clock on Tuesday. We may make the request later.

Mr. GERALD R. FORD. But we do have the majority leader's statement as to his intention.

Mr. ALBERT. I understand the Speaker will recognize me for the purpose of making such a request to come in no later than 10 o'clock on Tuesday if we do not have the report on Monday.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from California.

Mr. HOLIFIELD. I thank the gentleman for yielding. I would strongly urge that this policy be followed, and that at the proper time a request be made that we meet at 10 o'clock on Tuesday morning. Many of us have reservations for

the Tuesday noon plane for the west coast. It is hard to get reservations, by the way, at this time of the year. Many of us want to be home with our families at Christmastime. This is said without any degree of criticism of the committee. I know what a terrific job they have had and the problems they have had. I would hope that every step will be taken by the leadership to permit some of us who live on the west coast to have an opportunity to fulfill our reservations on Tuesday in order that we might be home for Christmas.

Mr. LANDRUM. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Georgia.

Mr. LANDRUM. With reference to what the gentleman from California (Mr. HOLIFIELD) has had to say, the same statement applies to some of us who live on the east coast and on the Atlantic seaboard. While I fully appreciate the situation in which my distinguished chairman and my friend from Wisconsin find themselves, we have been told here that we certainly could have this report available to us on Monday, and if we have to wait until Tuesday to vote, then it occurs to me the leadership ought to be able now to give us some indication of what hour we can expect to get out of here. I have been trying to make reservations for 2 weeks, and I have not been able to get them. I know others who are in the same situation. I am trying to discharge my responsibilities. If someone does not make a request and get some information as to what we can expect, this whole business is going to wind up in a dilemma.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the majority leader.

Mr. ALBERT. May I take the House into my confidence. I have been advised by some Members they would object to coming in early on Tuesday. So I would like to work that out, at least, before I make the request.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Iowa.

Mr. GROSS. I wonder if I might make a suggestion. It is not my desire to in any way hold up the sine die adjournment of this session of the Congress, but we ought to have a copy of the conference report in hand when it is called up. May I make the suggestion that we extend the time for consideration of the conference report? Under the rules, an hour would be allocated to its consideration. When the conference report comes before the House for consideration, could the time for discussion of the conference report be extended, say, to 2 hours?

I am sure we would get far more from having the opportunity, if we cared to use it, to ask questions of the gentleman from Arkansas (Mr. MILLS) and the gentleman from Wisconsin (Mr. BYRNES) and the other members of the Ways and Means Committee.

I would be perfectly willing to come in at an early hour if the time for discussion of the conference report could be extended. This conference report will have tremendous ramifications and it is highly technical. I am confident the House will learn far more of the actions taken in conference by extending the time for discussion than it will in any other way.

Mr. MILLS. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Arkansas.

Mr. MILLS. Mr. Speaker, I think the point made by my friend, the gentleman from Iowa, is a good one. This is perhaps one of the most all-inclusive tax bills that the Congress has had an opportunity to consider since I have been a Member of the Congress. There is very little of the Internal Revenue Code that is not affected or changed by it.

Members will recall we had an excessive amount of time to discuss the bill when we had it on the floor under general debate. If it would facilitate the matter in any way, I would not be averse as we call up the conference report, if the Speaker and others think it parliamentarily in order, to ask unanimous consent that on this particular conference report the time might be extended for an additional hour so that we can have that 2 hours. We might not use all of it, but I would not want to deprive any of my colleagues of the opportunity of asking the gentleman from Wisconsin or me or any other House conferees any questions the Members might have about the conference report. I think most Members would have some questions about the very voluminous conference report.

Mr. WAGGONNER. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Louisiana.

Mr. WAGGONNER. Mr. Speaker, I thank the gentleman for yielding. It seems to me from the colloquy that has developed here involving the leadership, that the final item of business for this first session will be the adoption of the conference report on tax reform.

I would just like to ask the leadership if they would tell us when we can expect to vote—since we are clarifying the tax issue—on the HEW conference report and the foreign aid conference report.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, those are matters that are still within the jurisdiction of the Committee on Appropriations. We intend to discuss those matters with the distinguished chairman, and we will advise the House just as soon as we can.

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Michigan

Mr. GERALD R. FORD. Mr. Speaker, I thank the gentleman for yielding.

I would like to ask the distinguished majority leader, inasmuch as I have had a number of inquiries this morning and this afternoon, about whether or not, in the light of these developments, we would meet tomorrow for a session on Saturday.

Mr. ALBERT. If the gentleman will yield further, the answer to that, as far as I know, is yes, because we have other conference reports that we must dispose of.

We would like to come down to Monday with no other business than the tax bill, if possible. We want to meet tomorrow to finish all the other conference reports, if possible.

I would like very much to go along with the suggestion made by the gentleman from Iowa and concurred in by the chairman of the committee. I would suggest that the gentleman ask that permission. I cannot see any possible harm that would come from it, and possibly considerable good would come from it, if this bill is ready on Monday and Members can have the extra time so we might dispose of this bill on Monday.

Mr. BYRNES of Wisconsin. It might be possible, Mr. Speaker, that with the additional time there would be more of a possibility of considering it on Monday under circumstances assuring every member of an opportunity to know what is in the bill.

Mr. MILLS. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. Mr. Speaker, I yield to the gentleman from Arkansas.

Mr. MILLS. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, in the light of the colloquy that has just occurred, I ask unanimous consent that when the conference report is considered——

The SPEAKER. The gentleman from Arkansas has one unanimous-consent request pending now, that the conferees have until midnight Sunday to file the conference report.

Mr. BYRNES of Wisconsin. Mr. Speaker, I withdraw my reservation.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

PROVIDING AN ADDITIONAL HOUR FOR CONSIDERATION OF THE CONFERENCE REPORT ON H.R. 13270, TAX REFORM ACT OF 1969

Mr. MILLS. Mr. Speaker, I ask unanimous consent that when the conference report to accompany H.R. 13270, the Tax Reform Act of 1969, is called up for consideration by the House that there be an additional hour—a total of 2 hours—to consider the conference report.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to make an observation. The Chair does not like to make observations from the chair, but this is an unusual situation, and colleagues will understand.

The Chair agrees with the statement made by the majority leader, that it is hoped to get the conference report up

Monday. That is the strong conviction and strong hope of the Chair, that the conference report will be brought up Monday.

All Members realize Christmas is only a few days off and this is important to Members. If a satisfactory climate can be developed—and evidently a satisfactory climate has been developed with the extension of the additional hour, which the gentleman from Iowa (Mr. GROSS) wisely suggested—the Chair is of the strong hope that the chairman of the committee and the members of the conference committee will be in a position where the conference report will be called up on Monday next.

CONSIDERATION OF TAX REFORM ACT OF 1969

(Mr. HOLIFIELD asked and was given permission to address the House for 1 minute.)

Mr. HOLIFIELD. Mr. Speaker, if I may have the attention of the distinguished chairman of the Ways and Means Committee, I should like to make a suggestion for consideration.

It is customary for us to receive galley prints of the reports before they are in final print. If the gentleman would order a few extra galley prints for the Members who are especially interested and would like to look at the report before the printed report is available, it might be of assistance.

Mr. MILLS. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Arkansas.

Mr. MILLS. I doubt in this instance if it would be possible for us to comply with the suggeston. We will need until probably 11:55 p.m. Sunday night to even file this. The galleys we will have will be full of errors, to begin with, and will have to be corrected. If we submit them to the Members there might be so many errors in them initially that they really would not get a true understanding of the conference report.

Mr. HOLIFIELD. The gentleman's suggestion is satisfactory.

Mr. MILLS. I am hoping to get it out and available early Monday morning.

APPOINTMENT AS MEMBERS OF THE COMMISSION ON GOVERNMENT PROCUREMENT

The SPEAKER. Pursuant to the provisions of section 3(a), Public Law 91–129, the Chair appoints as members of the Commission on Government Procurement the following members on the part of the House: The gentleman from California (Mr. HOLIFIELD) and the gentleman from New York (Mr. HORTON); and the following member from outside the Federal Government: Joseph W. Barr, of Maryland.

CONFERENCE REPORT ON H.R. 14751, MILITARY CONSTRUCTION APPROPRIATIONS, 1970

Mr. SIKES. Mr. Speaker, I call up the conference report on the bill (H.R. 14751) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 18, 1969.)

Mr. SIKES (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the statement of the managers on the part of the House.

The SPEAKER pro tempore (Mr. HOLIFIELD). Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida is recognized for 1 hour.

Mr. SIKES. Mr. Speaker, the conference report approves $1,560,456,000 in new obligational authority to support the military construction programs of the several military services in fiscal year 1970. This amount is $356,844,000 below the Nixon budget estimates and $997,994,000 below the Johnson budget. It is $115,022,000 below comparable appropriations for fiscal year 1969. It is $109,897,000 above the House-passed bill and $42,990,000 below the Senate-passed bill.

It will be recalled that this measure passed the House on November 13 before the conferees on the authorizing bill had reached agreement. It was necessary therefore to make adjustments to the House-passed appropriations bill to reflect the final outcome of the authorization legislation. This partly was due to the fact that meritorious projects were added in conference. A detailed list of these and other changes to the House bill is contained in the conference report.

Some of the major items approved for the Army which were not contained in the House-passed bill are an instruction facility for $2,830,000 at Fort Knox, Ky., which will provide needed space for armor and reconnaissance training; a maintenance instruction facility for enlisted aircraft mechanics at Fort Rucker, Ala., for $3,636,000; an administrative and classroom building in the amount of $9,891,000 which will allow barracks buildings currently being used for the purpose to be returned to their proper use, at Brook Army Medical Center, Tex.; and a cadet activities center at the U.S. Military Academy, West Point, N.Y., for $16,814,000. The continuing problem with cost escalation at West Point is a very serious one. For that reason, the conference report contains language to force the Army to deal aggresively with this problem and to encourage them to stay within cost estimates. In a related action at West Point, the authorizing legislation deleted $3,399,000 which had been requested by the Army to cover a cost overrun for a hospital and supporting utilities at West Point.

The major Navy projects which were allowed by the conferees over the House-passed bill include: recruit barracks and a mess hall at the Naval Training Center, Orlando, Fla., in the total amount of $10,308,000; barracks at the Naval Training Center, San Diego, Calif., Marine Corps Recruit Depot, San Diego, Calif., and the Marine Corps Air Station, El Toro, Calif.; and $11,988,000 to replace facilities at the Naval Construction Battalion Center, Gulfport, Miss., which were damaged in Hurricane Camille. The major item deleted from the House bill in the conference action was a hospital at Camp Pendleton, Calif., in the amount of $19,805,000. There has been a substantial cost overrun on this project and it cannot be built in the required scope for the amount which was authorized.

For the Air Force, the conferees added to the House bill: a composite recruit training and housing facility in the amount of $7,789,000 at Lackland Air Force Base, Tex., the sole Air Force recruit training center; three data processing plants, at Barksdale Air Force Base, La., Sheppard Air Force Base, Tex., and Keesler Air Force Base, Miss.—these facilities are necessary to house "phase 2" data processing equipment for the Air Force, which is already installed or on order. The remaining facilities in support of this program were denied. Airmen dormitories at George Air Force Base, Calif., Luke Air Force Base, Ariz., and a WAF dormitory at Loring Air Force Base, Maine, were restored. At the request of the several services, the following items to replace items which were destroyed by fire were included in the Senate bill and have been retained in the conference: an officers open mess at Eglin Air Force Base, Fla.; a refueling vehicle depot at Keesler Air Force Base, Miss.; and an officers open mess at McGuire Air Force Base, N.J.

For the Department of Defense agencies, the conferees restored various items which had been deleted in the House-passed authorizing bill. However, the reductions made in the House-passed appropriations bill for Department of Defense emergency construction and reductions from unobligated balances were largely retained.

For family housing, the committee of conference recommends $688,476,000. This represents every penny authorized for fiscal year 1970. It will provide 4,800 units of new family housing, a number that is totally insufficient when compared to the needs in this area. I take this opportunity to express once again the feeling of the committee that family housing construction has been insufficient in the past and that the current deficit in military family housing must be met in a realistic manner in the future.

I would like to point out that it has been the policy of the Congress in the past not to provide for the purchase of bulk milk dispensers with funds appropriated for military construction or, in fact, in other appropriations for the Department of Defense. There are no funds contained in this bill for the purchase of bulk milk dispensers and none of the funds contained in this bill are to be so used.

Mr. Speaker, I now insert a table which shows the action taken on the bill for fiscal year 1970:

MILITARY CONSTRUCTION APPROPRIATION BILL, 1970

[In thousands]

	Appropriations, 1969	Budget estimate, 1970	Passed House	Passed Senate	Conference action	Conference action compared with— Appropriations, 1969	Budget estimate, 1970	House	Senate
Military construction, Army	$548,126	$395,600	$240,446	$297,597	$287,228	−$260,898	−$108,372	+$46,782	−$10,369
Military construction, Navy	291,513	397,200	271,605	305,377	300,028	+8,515	−97,172	+28,423	−5,349
Military construction, Air Force	222,141	389,100	253,505	302,349	284,327	+62,186	−104,773	+30,822	−18,022
Military construction, Defense Agencies	83,396	74,500	28,720	43,165	33,915	−49,481	−40,585	+5,195	−9,250
Military construction, Army National Guard	2,700	15,000	15,000	15,000	15,000	+12,300			
Military construction, Air National Guard	8,300	13,200	13,200	13,200	13,200	+4,900			
Military construction, Army Reserve	3,000	10,000	10,000	10,000	10,000	+7,000			
Military construction, Naval Reserve	5,000	9,600	9,600	9,600	9,600	+4,600			
Military construction, Air Force Reserve	4,300	5,300	5,300	5,300	5,300	+1,000			
Total, military construction	1,168,476	1,309,500	847,376	1,001,588	958,598	−209,878	−350,902	+111,222	−42,990
Family housing, defense	583,700	694,418	689,801	688,476	688,476	+104,776	−5,942	−1,325	
Portion applied to debt reduction	−82,898	−86,618	−86,618	−86,618	−86,618	−3,720			
Subtotal, family housing	500,802	607,800	603,183	601,858	601,858	+101,056	−5,942	−1,325	
Homeowner assistance fund, defense	6,200					−6,200			
Grand total	1,675,478	1,917,300	1,450,559	1,603,446	1,560,456	−115,022	−356,844	+109,897	−42,990

Mr. Speaker, I yield now to the distinguished gentleman from Michigan (Mr. CEDERBERG), the ranking minority member of the committee.

Mr. CEDERBERG. Mr. Speaker, while this conference report does not suit me in all of its aspects, I signed the report. I think we have reached a good compromise with the other body on this bill. The question of adequate military construction for the Defense Department is something that is of concern to all of us, and I believe this bill for fiscal year 1970 is a step in the right direction but a rather small step in the overall need for modern defense facilities. I do concur in the remarks of the chairman of the subcommittee, the gentleman from Florida (Mr. SIKES).

Mr. SIKES. Mr. Speaker, I yield such time as he may require to the gentleman from California (Mr. TALCOTT).

Mr. TALCOTT. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, I was one of the conferees, but I was dissatisfied with the report, so I did not sign it.

I want to explain that I did attend each of the five meetings of the conferees, but the committee and the Congress, I feel, are not appropriating enough funds for operation and maintenance of the defense plant and facilities. Family housing is inadequate and most other facilities need rehabilitation and modernization. Unless we provide more funding for our defense plant and facilities, they will continue to deteriorate. My principal reason for not assigning the conference report involves a classified matter. I do not believe the classification of the item was necessary, but nevertheless I am bound by the classification and therefore I cannot discuss the project, but it was important and is essential to our national security. Deferment of the project jeopardizes our national and individual security. I think the project should be funded. For that reason I did not sign the conference report.

Mr. SIKES. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING CLERK OF THE HOUSE, IN ENROLLMENT OF H.R. 14751, TO MAKE CORRECTION IN TEXT

Mr. SIKES. Mr. Speaker, I call up the concurrent resolution (H. Con. Res. 473) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 473

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives, in the enrollment of the bill (H.R. 14751) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes, is hereby authorized and directed to make the following correction in the text of the House engrossed bill:

On page two of the House engrossed bill, strike out "Public Law 91– " and insert "Public Law 91–121."

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SIKES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days during which to extend their remarks on the matters discussed in connection with the conference report on the military construction bill and to include certain statistical facts.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

CONFERENCE REPORT ON H.R. 14580, FOREIGN ASSISTANCE ACT OF 1969

Mr. MORGAN. Mr. Speaker, I call up the conference report on the bill (H.R. 14580) to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world to achieve economic development within a framework of democratic economic, social, and political institutions, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the statement.

(For conference report and statement see proceedings of the House of December 18, 1969.)

Mr. MORGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we have just finished a very difficult conference, and we have not been able to bring back everything that we wanted to.

This was not because we did not do our best.

We found that we were not in a strong bargaining position.

Time was not on our side.

We were dealing with people whose attitude toward U.S. foreign policy in general and toward military assistance in particular differ from those of a majority of the Members of the House.

We did not reach a meeting of the minds on basic issues, and we had to accept compromises that no one liked.

Although we failed to bring back several provisions of the House bill which Members of the House regard as important and which the House conferees also recognize as being important, there is some good news.

For those who believe that we always spend too much money on foreign aid, I can report that we bring back a total figure of $1,972,525,000, which is $221,375,000 less than the amount in the House bill.

On the other hand, for those who believe that the foreign assistance program is essential to the implementation of U.S. foreign policy, the bill we bring back retains both the Overseas Private Investment Corporation and the Inter-American Social Development Institute which were approved by the House.

Even with the limited funds which will be available in the next 2 years, it should be possible to make significant improvements in our efforts to assist other countries by making use of these two new organizations.

We did not succeed in retaining the specific authorization of military assistance funds for the Republic of China and for Korea.

The Senate refused absolutely to go above a total figure for military assistance of $350 million. This is an increase of $25 million above the amount in the Senate bill. Under the circumstances, the House conferees believed that any earmarking of funds for the Republic of China or Korea, which are already included in the worldwide total, would result in such a reduction in the military assistance available to help other countries maintain their defenses that it would be detrimental to our own security.

The Senate bill included a provision that would limit the number of military personnel who could be brought to the United States for training to 50 percent of the number of civilians brought to the United States under the Hays-Fulbright bill. This would have had the effect of cutting the number of military trainees by more than half. We got the Senate to agree that the military trainees could be equal to the number of Hays-Fulbright students.

The bill as it passed the House included a lot of language which was a revision and updating of existing law. The Senate bill left existing law alone pretty much except for specific amendments which they thought were important.

After 3 days of argument about specific provisions in both bills, the conferees agreed to follow the procedure of amending existing law rather than incorporating the revisions and restructuring contained in the House bill. As a result, much of the language of the House bill was eliminated but comparable or related provisions of existing law remain in effect.

Mr. Speaker, I hope that the House will consider the bill we have brought back from conference on its merits. I know that some will be inclined to vote against the conference report as a protest against our foreign policy or because certain sections of the bill did not survive the conference.

I am sure that I speak for all of the House conferees when I say that I am convinced that this is the best we can do. I do not believe that sending the bill back to conference would enable the House to get anything more than we already have.

I urge the adoption of the conference report.

Mr. GROSS. Mr. Speaker, will the distinguished chairman of the committee yield to me?

Mr. MORGAN. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, I thank the gentleman for yielding.

I believe the gentleman said that the conference provided $221 million less than the House bill. Is that correct?

Mr. MORGAN. That is right, $221 million.

Mr. GROSS. However, it is still some $200 million above the actual appropriation for last year.

Mr. MORGAN. The gentleman is correct. I think the gentleman also understands that the final figure for this year's appropriation has not been settled. I want to assure the gentleman that there is a great deal of difference in the two appropriation bills as they passed this body and the other body, and they will have to be worked out in conference to determine the amount to be appropriated this year.

Mr. GROSS. Yes, I understand that we have not yet acted on the conference report on the appropriation. But the authorization bill is some $200 million more than was actually appropriated for the foreign aid program last year.

Mr. MORGAN. The figure was somewhere in the neighborhood of $1.7 billion appropriated last year.

Mr. GROSS. This is the program that started out many years ago as a 5-year program, and is still with us, and apparently always will be with us.

I should like to note, if I may have the indulgence of the chairman, that I am opposed to the conference report, and will vote against it if there is to be a rollcall. I do not intend to ask for a rollcall because I have made my record clear as to my position on foreign aid on many previous occasions. However, I do want the record to show that I am opposed to the conference report.

Mr. MORGAN. I want to say to every Member of the House that the gentleman from Iowa is a member of the Committee on Foreign Affairs, and I am sure every member of the committee knows his position about this type of legislation.

I also want to tell the Members of the House that he is a very valuable and hardworking member of the committee. His constructive criticism is very frequently helpful and I am very glad to have him aboard my committee.

Mr. Speaker, I now yield to the gentleman from Indiana (Mr. ADAIR).

Mr. ADAIR. Mr. Speaker, the gentleman from Pennsylvania has reviewed the major points that were agreed upon in the conference. As he has noted, the House conferees worked very diligently to sustain the House position. Although we were obliged to yield on a number of points, we were successful in bringing back to the House a bill that included a number of features which will improve the administration of this program.

In my opinion, it is quite significant that the Senate agreed to a 2-year authorization, as provided for in the House bill. This will give the executive branch time to carefully scrutinize the Peterson Commission report which is due early next year, and to consider new directions for the program beginning with fiscal year 1972.

Also, the House conferees were able to retain the Overseas Private Investment Corporation, an important new concept upon which the Foreign Affairs Committee held extensive hearings. While the Senate Foreign Relations Committee did not include OPIC in its bill, this feature was added on the Senate floor, and we were pleased that authorization for the corporation was retained in conference.

The total authorization of $1,972,525 is a reduction of more than $200 million from the figure of $2,193,900 originally authorized by the House. Although this is a sizable cut, it does provide a figure approximately the same as that authorized a year ago.

The Senate conferees accepted the House language pertaining to authorization for a prototype desalting plant in Israel, with an amendment authorizing $20 million instead of $40 million, and a requirement that the President determine the feasibility of developing such a plant.

The authorization for military assistance was a particularly difficult area upon which to reach agreement. We finally agreed upon the figure of $350 million for worldwide military assistance—which is the same allocation the House had given this category—but we were unable to retain line items for South Korea and the Republic of China.

In summary, the House conferees worked hard to sustain the House position and the result is one we should support. I urge that the conference report be approved.

Mr. Speaker, I yield to the gentleman from Florida (Mr. CRAMER).

Mr. CRAMER. Mr. Speaker, the Soviet Union continues its insidious efforts at undermining the balance of power in the troubled Middle East. The Communists are pouring a seemingly unending stream of military armaments into the hands of sworn enemies of the beleaguered State of Israel and are challenging the seapower of the free nations in the area.

The United States must reaffirm its long-standing policy of protecting Israel's integrity, and over the years I have strongly supported measures to this end, including last year's authorization of the sale of at least 50 F–4 Phantom jet fighters to Israel in an effort to restore a balance of power in this area. This sale has been successfully negotiated and delivery of the jet fighters began in September of this year at the rate of four a month, with the completed delivery scheduled for the end of this fiscal year.

The military threat to Israel persists as the Middle East arms buildup continues to spiral, and will not, in the long run, result in a peace to that volatile area. However, war is virtually assured if Israel's enemies are allowed to gain the upper hand militarily and to upset the delicate balance needed to preserve peace.

Israel must be allowed to live in peace. An all-out Israel-Arab confrontation must be forestalled. And the best way to insure this is to provide Israel with the jet fighters—to offset Communist planes—it needs to defend itself.

In addition to providing military support, the United States is also moving to meet the critical water shortage problems of the area.

Contained in this current authorization—in section 219 under technical cooperation and development grants, title II—is one of the most significant long-range efforts to break through this serious economic and water shortage problem. This section provides for a large-scale water treatment and desalting prototype plant to be constructed in Israel "as an integral part of a dual-purpose power generating and desalting project." The U.S. participation includes the "financial, technical, and such other assistance as the President deems appropriate to provide for the study, design, construction, and, for a limited demon-

stration period of not to exceed 5 years, operation and maintenance of the water treatment and desalting facilities of the dual-purpose project." The sum of $20 million is provided for to accomplish this "program for peaceful communication."

This is the beginning of a needed long-range development program to stabilize Israel and perhaps will show the way to further stabilization of other countries in the area where water problems exist. I strongly support this effort.

Mr. MORGAN. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LENNON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 208, nays 166, not voting 59, as follows:

[Roll No. 342]

Clark	Leggett	Stephens
Clay	Lipscomb	Sullivan
Conyers	Lukens	Tunney
Corman	McCarthy	Watkins

So the conference report was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Moss for, with Mr. Conyers against.

Mr. Rees for, with Mr. Montgomery against.

Mr. Pucinski for, with Mr. Andrews of Alabama against.

Mr. Morse for, with Mr. Carter against.

Mr. Morton for, with Mr. Martin against.

Mr. Celler for, with Mr. Watkins against.

Mrs. Hansen of Washington for, with Mr. Abbitt against.

Mr. Miller of California for, with Mr. Alexander against.

Mr. Gray for, with Mr. Pelly against.

Mr. Fallon for, with Mr. Lipscomb against.

Mr. Kluczynski for, with Mr. Blackburn against.

Mr. Hébert for, with Mr. Ashbrook against.

Mr. Cahill for, with Mr. Kleppe against.

Mr. Halpern for, with Mr. Lukens against.

Mr. Tunney for, with Mr. Brock against.

Mrs. Sullivan for, with Mr. Reifel against.

Mr. Carey for, with Mr. Hall against.

Mr. Corman for, with Mr. Stephens against.

Until further notice:

Mr. Anderson of Tennessee with Mr. McCarthy.

Mr. Clark with Mr. MacGregor.

Mr. Diggs with Mr. Leggett.

Mr. Blanton with Mr. Fulton of Tennessee.

Mr. Fraser with Mr. St Germain.

Mr. Edwards of California with Mrs. Chisholm.

Mr. Gallagher with Mr. Clay.

Mr. Kirwan with Mr. Powell.

Mr. Sisk with Mr. Pepper.

Mr. Ashley with Mr. Eckhardt.

The result of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. MORGAN. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to extend their remarks on the conference report just passed.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

CONFERENCE REPORT ON H.R. 14794, DEPARTMENT OF TRANSPORTATION APPROPRIATIONS, 1970

Mr. BOLAND. Mr. Speaker, I call up the conference report on the bill (H.R. 14794) making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1970, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 18, 1969.)

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that the further reading of the statement of the managers on the part of the House be dispensed with.

The SPEAKER pro tempore (Mr. HOLIFIELD). Without objection, it is so ordered.

There was no objection.

The SPEAKER pro tempore (Mr. HOLIFIELD). The gentleman from Massachusetts (Mr. BOLAND) is recognized for 1 hour.

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, there are three amendments that are in actual disagreement. I will offer motions that the House insist on its disagreement with the Senate amendments.

Under the position of the managers on the part of the House, the conference agreement would be $102 million less than the budget request and $55.7 million more than the House amount.

If the House gave in to the Senate position on the amendments in disagreement, the conference agreement would be only $2 million less than the budget request and $156 million more than the House amount.

The first amendment in disagreement, No. 2, involves language which would permit the Secretary of Transportation to transfer personnel into the Office of the Secretary.

During the first 2 years of the new Department, in order to help in the establishment of the new Department, we granted broad transfer authority to the Secretary. We think the Department is now sufficiently mature to budget for positions where positions are required.

Congress has a right to know where and how funds appropriated will be spent. No other department of Government has the authority in question. We feel that it is time to return to the regular order.

The other two amendments in disagreement involve liquidating cash in the highway program. In the hearings, we were informed that the President felt that in order to hold the line on spending, some reduction would be made in highway construction and that it was estimated that $100 million of the $4.5 billion requested would not be utilized. We felt that this 2-percent reduction was reasonable and we went along with the President. At a time when reductions are being made across the board, it is unreasonable to expect that the highway program would not be affected.

In the items agreed to in the conference, the House position on the Coast Guard Reserve prevailed, but $9.2 million was added to the House amount for acquisition, construction, and improvements for the Coast Guard.

For the FAA, the House agreed to the Senate increase of $50,000,000 for grants-in-aid for airports: We had hoped that the new airways-airports legislation would have been passed by this time and the new program be in effect, but it has not passed and the $50,000,000 will permit the continuation of the present program.

The funds agreed to for the SST program are $10.9 million less than the House amount. The lateness of the year makes the sum provided adequate.

An increase of $2 million more than the House amount is provided for Traffic and Highway Safety. The increase is for high priority research projects. In my opinion—and it is the opinion of the majority of the members of the subcommittee—the additional funds should be spent in the area of experimental safety cars. There is $1 million in the House-passed amount for this program, but the work has been proceeding too slowly.

The total amount which has been appropriated, including the $1 million which the House appropriated in the bill this year, and the $500,000 in the previous appropriations, account for the $1,500,000 for this program to build a prototype safety car. We think the department has been dragging its feet in this area, and have provided $2 million over the House bill for contract research, and we hope that the Department of Transportation will use this money in the direction of providing prototype cars.

The Senate added $7 million for this program and directed that the $7 million be used for the development of a safe prototype car. It would build some 15 cars, and the $7 million would fully fund the program. The concept of the car has not as yet been established. It is the judgment of the members of the subcommittee that the design and specifications ought to be established before the program is fully funded. When the design and specifications are justified and indicate a justification for a continuation of the development and building of the prototype then, at least in my judgment, the House will go along with the program.

I might also say that the conference agreement provides $214 million for the Urban Mass Transportation Administration, $6 million less than the House amount. The cut made by the Senate is in research and demonstration grants. The full amount of $176 million requested in the budget for capital facilities grants is provided by the terms of the conference.

I am delighted to yield to the distinguished gentleman from Ohio (Mr. MINSHALL).

Mr. MINSHALL. Mr. Speaker, as the chairman of our subcommittee has pointed out, I regret the disagreement on the two items he has mentioned. I think it is important that the House insist on its position.

I would like to add one thing to the comments of my good friend from Massachusetts about this experimental safety car program. For the information of the House, there was inserted on the floor of the other body an amendment providing for $7 million to construct a so-called prototype safety car. In my opinion, this is just the beginning of a multi-million-dollar boondoggle. I do not know why in heaven's name the Government of the United States should get into the car-building business, when any of the "big three" automobile manufacturers would be willing to build them on their own at a much less cost.

I agree especially with the fact that we have included $50 million in the conference agreement for grants-in-aid to airports. As the chairman has mentioned, the user tax legislation is not yet passed, and there will apparently be a need for this money in the year ahead to provide adequate funds to help the States to build some of these airports throughout the country.

Mr. GROSS. Mr. Speaker, will the gentleman yield very briefly?

Mr. BOLAND. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, the distinguished gentleman from Massachusetts spoke quite rapidly, and I was not able to keep up with all the figures he gave. Do I understand the approximately $56 million is largely as a result of the airport program?

Mr. BOLAND. Yes, $50 million of the increase is attributable to the grants-in-aid to the airports.

Mr. GROSS. Mr. Speaker, I should have said $56 million about the figure approved by the House.

Mr. BOLAND. The gentleman is correct.

Mr. GROSS. The bulk of that goes for the airports?

Mr. BOLAND. That is correct.

Mr. FARBSTEIN. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from New York.

Mr. FARBSTEIN. Mr. Speaker, in connection with the statement just made that $7 million was appropriated for a prototype automobile because there is concern about the safety factors being built into the automobile, there are two points I would like to raise.

Mr. BOLAND. Mr. Speaker, will the gentleman yield for a correction? There is no $7 million in this conference report for the building of a prototype safety car. The amount of money which was included by the conferees was $2 million, which we hope the Department of Transportation will use for this purpose.

The Senate did add an amendment for $7 million for the purpose to which the gentleman from New York is now addressing himself. The $7 million, according to the debate in the Senate on this item, would fully fund the development of 14 prototype safety cars. These cars, as the gentleman so well knows, are based on the Traffic Safety Act of 1966. That is the basic authority for the department to go ahead and construct the cars.

At least in my judgment, and I think in the judgment of many of the Members, the Department has been dragging its feet in this area. It was the hope of this subcommittee, and I believe the majority of this House and of the Senate, that the Department of Transportation will address itself to this problem. There is no way in which the Department is ever going to find out what the safety factors of a car ought to be unless they build a complete prototype. I agree with the gentleman in this respect.

Mr. FARBSTEIN. I am generally in agreement with what has been said by the gentleman with respect to the manufacture of prototype safety automobiles; but I am concerned not alone with the question of safety, because Government action in this area will benefit mainly those who own automobiles and only incidentally nonowners like those who are injured by automobiles.

I am also concerned about auto-caused air pollution because it affects everyone who breathes. I believe the Department of Transportation should be working on prototype engines that will do away with

air pollution. This means testing alternatives to the present internal combustion engine.

Mr. Speaker, I would like to know whether or not these prototypes will include experimental engines on automobiles, which will contain engines other than the internal combustion engines, like steam, electric, or turbine, so that all people who suffer today as a result of the polluted air will benefit from this, and not just those who operate automobiles or those who are injured by automobiles or who ride in automobiles.

Mr. BOLAND. Mr. Speaker, let me respond to the gentleman from New York by saying that his feelings are shared by this committee, and, I am sure, by the Members of this House.

As the gentleman knows, the Department of Health, Education, and Welfare, and specifically the Public Health Service, is engaged in the matter of pollution caused by the internal cumbustion engine.

I would agree with the gentleman that one of the ways to meet this problem is by a cooperative effort on the part of HEW and the Transportation Department to get at the problem the gentleman speaks so eloquently to.

Mr. FARBSTEIN. If the gentleman will yield further, it is just that I should like the legislative history to reflect that the Congress' intention is not alone for the prototype to be concerned about safety in the building of the automobile. The Department of Transportation also should concern itself, in building that prototype, with the internal combustion engine, and building prototype automobiles with different types of engines in order that the questions of smog and air pollution may be developed.

Mr. BOLAND. At the moment, the matter of pollution really is within the jurisdiction of HEW. It is hopeful that there will be some coordination between DOT and HEW in this area.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to my distinguished colleague from Illinois, a member of the subcommittee and a conferee.

Mr. YATES. I thank the gentleman for yielding.

Mr. Speaker, as a member of the conference I agreed with the conference report with two exceptions.

I excepted on amendment No. 9, which appropriates $50 million for grants-in-aid to airports. The House had put none of this money in the bill.

In view of the statements which have been made by President Nixon, about conserving construction money at this time, I have a hunch that the President may freeze these funds. There are more important uses for this money at this time and I do not believe this appropriation should have been approved. I excepted to it.

The other appropriation to which I excepted was the allocation of funds for the supersonic aircraft. I have made my position abundantly clear in the House before this time, and I will not go into it further. Unfortunately, it is not possible to have a rollcall on the appropriation.

I am particularly delighted with the action by the conference on an amendment pertaining to the construction of or the possible addition of funds for the jetport in Miami. As the Members of the House will recall, I offered an amendment to prohibit the expenditure of the funds for any airport in Florida which was likely to interfere with the ecology of the Everglades without first there having been made a study by the Departments of Transportation and Interior.

Under the language of this bill, I believe it is noteworthy that the amendment which has been incorporated signals the awakening of millions of Americans to the importance of environmental issues in the coming years. The fact that there was no opposition in either House is indicative of the wide consensus which has been built up concerning the high priority which must be given to protecting our national heritage.

The Everglades is a particularly spectacular example of that heritage, a dynamic mixture of wildlife and natural beauty unmatched anywhere in the country. The Everglades, for all its vibrancy, is fragile in terms of ecological balance. That must be maintained so that the area will not degenerate into a swamp.

The Congress by its action today is taking a long step toward insuring that the Everglades will continue as a part of our great wilderness natural heritage to be handed down to the coming generations.

Mr. OTTINGER. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from New York.

Mr. OTTINGER. Is the subcommittee recommending to the House that we insist on more funds for the SST than agreed upon in the conference?

Mr. BOLAND. No. The conference agreed on the sum of $85 million for the SST. When the bill left the House we had $95,958,000 for the SST. The Senate reduced this to $80 million. When we got to conference, some of the House conferees believed that was not a sufficient amount of money to continue with the orderly development of the prototype phase, phase 3. So the conferees added $5 million to the Senate amount.

Mr. OTTINGER. The conferees are not in disagreement?

Mr. BOLAND. No. It is not a matter in the amendments in disagreement.

Mr. ROGERS of Florida. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Florida.

Mr. ROGERS of Florida. I just wanted to comment on the discussion which went on regarding air pollution and the automobile engine. As the chairman of the subcommittee has stated, this really is handled by HEW in the air pollution program.

The Committee on Interstate and Foreign Commerce has already started hearings on clean air. We have heard from automobile companies and the Department of Transportation. We will continue these hearings next year. A great deal of progress is being made. We mean to keep pressure on to meet this problem, but I believe we are beginning to recognize it. It is really not a part of the appropriation in this bill. As you say, your bill goes more to safety, and the air pollution problem is concerned with HEW, and the Interstate and Foreign Commerce Committee is very much on top of it and will continue to be. I am encouraged by the testimony from a number of individual companies that they are working on different types of engines to try to solve the problem. We hope they will continue this type of work.

Mr. Speaker, I thank the gentleman for yielding to me.

Mr. MELCHER. Mr. Speaker, will the gentleman yield to me?

Mr. BOLAND. I yield to the gentleman from Montana.

Mr. MELCHER. I thank the gentleman for yielding.

My question is with regard to the supersonic transport. How much will this lead to, this $85 million being appropriated here, in total expenditures?

Mr. BOLAND. How much would it lead to?

Mr. MELCHER. In the next few years in the way of appropriations.

Mr. BOLAND. This is an appropriation for the fiscal year 1970. It will be $85 million. I presume that when the budget for fiscal year 1971 comes in, the amount requested might reach as high as $350 million. By that time, it will bring the total appropriations probably to about $1 billion. The Federal share of the cost of research and development, for the production of two prototypes, plus 100 hours of test flying, will come to about $1.2 billion or $1.3 billion.

Mr. MELCHER. Does this amount and the apparent succeeding steps that will lead to more than a $1 billion appropriation from the Treasury—and I do not know whether the gentleman from Massachusetts is prepared to answer me, but perhaps somebody on the minority side can answer this question—does this have the approval of the Bureau of the Budget and the President?

Mr. BOLAND. This was a recommendation submitted by the President of the United States and by the Bureau of the Budget. This item came up as a budget amendment in October.

Mr. MELCHER. This expenditure for the supersonic transport, which I understand has serious problems with the sonic boom and the airplane when built may not be able to be used over the continental United States as a result—this appropriation leading up to the $1 billion expenditure does have the approval of the President and the Bureau of the Budget and it is the same administration and Bureau of the Budget that are calling necessary funds for education and health expenditures inflationary. It is one and the same group, is it not?

Mr. BOLAND. I prefer to have the minority respond to that.

Let me say that this program also had the approval, of course, of President Johnson and President Kennedy.

Mr. YATES. But the answer to the gentleman's question is yes, is it not?

Mr. MELCHER. I would like to hear from the minority side.

Mr. MINSHALL. I would like to point out to the gentleman that the supersonic transport program, as I mentioned when

we discussed and debated this bill, has had the approval of both President Johnson and President Kennedy and has had the approval of every Congress during those administrations. Of course, this House overwhelmingly approved the supersonic transport program when we voted on it this year during the debate on the Department of Transportation bill, and the Senate did accordingly.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I am glad to yield to the gentleman from Illinois.

Mr. YATES. For a correction on what the gentleman from Ohio said.

The gentleman is correct that the supersonic transport has been approved in the Committee of the Whole during various debates. However, there has never been a record vote in the House directly on the question of the supersonic transport because the parliamentaly situation did not permit it.

Mr. MINSHALL. The gentleman is correct. We approved it in the Committee of the Whole, but it was overwhelmingly approved.

Mr. BOLAND. We have been all through this debate on the SST for a number of years.

I now yield to the gentleman from Montana further.

Mr. MELCHER. I would like to point out that both President Johnson and President Kennedy placed education and health before the supersonic transport, but now we find the supersonic transport ahead of health and education. The administration wants to cut back the health and education funds, but not this appropriation.

Mr. MINSHALL. The gentleman is just making a political statement that is completely politically motivated and does not need any comment.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Illinois.

Mr. YATES. I think the gentleman from Montana has made a very valid point. The President has indicated and the press has carried stories that he will veto the appropriations that the Congress has approved for education. On the other hand, he has approved funds for the SST. In one case his words are clear. He will not veto appropriations for the SST, but he will veto certain items which are contained in the HEW appropriation bill for education and health if they exceed a certain amount.

Mr. CARTER. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Kentucky.

Mr. CARTER. I would say concerning the SST, the leadership in this field has been gained by Russia and by Britain and France.

As you know, last year, at my own expense, I visited the factory where the Concorde is being manufactured in England. They are far ahead of us. If we are afraid of the sonic boom, I might mention this fact: The Concorde is so constructed that it will fly at a lower rate of speed over the continental limits of the United States and will cause no more trouble than the 747.

Certainly, Mr. Speaker, I feel that we should reestablish our leadership in this field and I support the SST program.

Mr. PICKLE. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Texas.

Mr. PICKLE. I thank the gentleman for yielding.

I notice in that section of the report pertaining to the Federal Railroad Administration, amendment No. 23, shows that you appropriate $11 million for the high-speed ground transportation research and development program. I assume that this is for the regular research and development program?

Mr. BOLAND. The gentleman is correct.

Mr. PICKLE. And, Mr. Speaker, if the gentleman will yield further, no money, then, is recommended for the high-speed ground demonstration project, the facility project, which has been recommended, and the site, about which concern has been expressed?

Mr. BOLAND. The gentleman is correct. It is not in the budget and it is not in the bill.

Mr. PICKLE. In other words, the administration has not made a recommendation as to the site?

Mr. BOLAND. The Department has not made a recommendation as to the site.

Mr. PICKLE. Does the gentleman know why this decision has not been made?

Mr. BOLAND. No, I suppose it is because they still are considering a number of sites and have not come to a conclusion on where that site will be. I presume this would be the reason for the delay.

Mr. PICKLE. I suppose that is correct, but I think it is regrettable that we have lost some 15 months time in this valuable project and I would hope that we can get a firm recommendation soon.

Mr. BOLAND. Under leave to extend, I place in the RECORD a summary table showing the actions of Congress on the bill:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR 1969 AND BUDGET ESTIMATES AND AMOUNTS RECOMMENDED IN THE BILL FOR 1970

[In thousands

Item	New budget (obligational) authority, 1969	Budget estimate of new (obligational) authority, 1970	House bill	Senate bill	Conference action	Conference action compared with— New budget (obligational) authority, 1969	Budget estimate, 1970	House bill	Senate bill
Office of the Secretary	$16,150	$32,900	$24,020	$30,270	$27,120	+$10,970	−$5,780	+$3,100	−$3,150

Mr. REUSS. Mr. Speaker, I protest once again, and certainly not for the last time, the inclusion of funds for the supersonic transport.

In addition to the sheer waste of taxpayers' dollars involved in the SST, a substantial question is presented concerning the afront to the environment caused by the sonic boom and airport noise of the proposed plane. Assurances that the SST would not be allowed to fly over populated areas, accompanied by a certain amount of wobbling, were made during the House debate on the SST last November 18.

In order to set the matter to rest, I addressed the following letter to President Nixon on November 24:

NOVEMBER 24, 1969.

HON. RICHARD M. NIXON,
President,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The House debate on November 19 over your request for $96 million to continue development of a supersonic transport (SST) showed that many Members of the House were concerned about

potential "noise pollution" from this aircraft—both sonic boom and airport noise.

It would help to lay to rest this concern if you gave Congress and the American people your formal assurance on two points:

(1) That no commercial supersonic aircraft will be allowed to fly over populated areas at boom-producing speeds, and

(2) That no commercial supersonic aircraft, U.S. or foreign, will be certified by the Federal Aviation Administration if the airport noise which it generates (both community noise and sideline noise) is greater than that from the most noisy commercial subsonic aircraft certified at that time by the FAA.

Assurance on the first point would implement a suggestion of your Ad Hoc Task Force on the SST. The Environmental and Sociological Panel of that Task Force said that:

"It is essential that the public be formally assured by appropriate authorities that commercial supersonic flight over land will not be permitted and that SST design, development, and economic considerations are and will remain restricted to over water routes."

This recommendation was reinforced by Dr. Lee A. DuBridge, Director of the Office of Science and Technology, in a letter to Transportation Under Secretary James Beggs:

"Surely we must have a policy statement that there shall be no supersonic operations by the SST over any populated areas."

In addition, Dr. Raymond L. Bisplinghoff, Dean of the School of Engineering at MIT and a consultant to the FAA Administrator on the SST program, told the Administrator in a February 7, 1969, memo on the new Boeing SST design:

"A very useful public statement at the present time would be one indicating that the B-2707-300 design was conceived from the very beginning as an overwater machine and that under no circustances could it ever be operated over populated land areas."

With regard to the airport noise problem, the assurance I ask would carry out the intention of Congress as expressed in Public Law 90-411 (July 21, 1968, 49 U.S.C. 1431) "to afford present and future relief and protection to the public from unnecessary aircraft noise. . . ."

I hope to hear from you shortly.

Sincerely,

HENRY S. REUSS,
Member of Congress.

My letter produced the following reply from the White House:

THE WHITE HOUSE,
Washington, December 4, 1969.

Hon. HENRY S. REUSS,
House of Representatives,
Washington, D.C.

DEAR MR. REUSS: Thank you for your letter to the President regarding the concern of many Members over the possibility of "noise pollution" by the supersonic transport.

I know the President will be interested in the points you raised in your letter on this matter. We shall call your letter to his early attention and be in further touch with you.

With cordial regard.

Sincerely,

WILLIAM E. TIMMONS,
Deputy Assistant to the President.

So we still do not know whether the SST will be allowed to fly over populated areas.

Mr. BOLAND. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to recondsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 2: Page 2, line 11, insert the following: ": *Provided*, That whenever the Secretary determines that staff functions being performed elsewhere in the Department could be performed more economically and effectively by the Office of the Secretary, he may, during the current fiscal year, transfer such functions to the Office of the Secretary."

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House insist upon its disagreement to the amendment of the Senate numbered 2.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that Senate amendments Nos. 14 and 15 be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The clerk will report the amendments.

The Clerk read as follows:

Senate amendment No. 14: Page 10, line 16, strike "$4,419,279,000" and insert in lieu thereof "$4,519,657,000."

Senate amendment No. 15: Page 10, line 20, strike "$3,533,765,964" and insert in lieu thereof "$3,634,143,964."

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House insist upon its disagreement to the amendments of the Senate numbered 14 and 15.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and on the several motions was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the conference report on the Department of Transportation appropriation bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

AUTHORIZING PRINTING OF ADDITIONAL COPIES OF CONFERENCE REPORT TO ACCOMPANY H.R. 13270, TAX REFORM ACT OF 1969

Mr. FRIEDEL. Mr. Speaker, by direction of the Committee on House Administration, I offer a resolution (H. Res. 761) and ask unanimous consent for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 761

Resolved, That there shall be printed concurrently with the conference report to accompany H.R. 13270, "A Bill to Reform the Income Tax Laws," three thousand additional copies for the use of the House Document Room.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AMENDING TITLE 5, UNITED STATES CODE, PROVIDING FOR ADDITIONAL POSITIONS IN GRADES GS-16, GS-17, AND GS-18

Mr. HENDERSON. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 2325) to amend title 5, United States Code, to provide for additional positions in grades GS-16, GS-17, and GS-18.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2325

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 5108(a) of title 5, United States Code, is amended by striking out "2,577" and inserting in lieu thereof "2,772".

(b) Section 5108(b)(2) of such title is amended by striking out "28" and inserting in lieu thereof "44".

(c) Section 5108(c)(1) of such title is amended by striking out "64" and inserting in lieu thereof "90".

(d) Section 5108(c)(2) of such title is amended by striking out "110" and inserting in lieu thereof "140".

(e)(1) Section 5108(c) of such title is amended by striking out "and" at the end of paragraph (8), by striking out the period at the end of paragraph (9) and inserting "; and" in place thereof, and by inserting the following new paragraph:

"(10) The Secretary of the Smithsonian Institution, subject to the standards and procedures prescribed by this chapter, may place a total of eight positions in the Smithsonian Institution in GS-16, 17, and 18."

(2) Section 5315 is amended by inserting the following new paragraph after paragraph (91):

"(92) Assistant Secretary, Smithsonian Institution."

SEC. 2. Section 4 of the Act entitled "An Act to provide certain administrative authorities for the National Security Agency, and for other purposes", approved May 29, 1959, as amended (50 U.S.C. 402, note), is amended to read as follows:

"SEC. 4. The Secretary of Defense (or his designee for the purpose) is authorized to—

"(1) establish in the National Security Agency (A) professional engineering positions primarily concerned with research and development and (B) professional positions in the physical and natural sciences, medicine, and cryptology; and

"(2) fix the respective rates of pay of such positions at rates equal to rates of basic pay contained in grades 16, 17, and 18 of the

General Schedule set forth in section 5332 of title 5, United States Code.

Officers and employees appointed to positions established under this section shall be in addition to the number of officers and employees appointed to positions under section 2 of this Act who may be paid at rates equal to rates of basic pay contained in grades 16, 17, and 18 of the General Schedule.".

SEC. 3. Of the additional positions authorized to be placed in GS–16, 17, and 18 by the amendment made by subsection (a) of the first section of this Act, forty-five positions snall initially be allocated by the Civil Service Commission to those positions which the Commission determines are identical or substantially identical to positions now classified in GS–16, 17, or 18, but which have not been identically classified because of the numerical limitations contained in section 5108(a) of title 5, United States Code, prior to the date of enactment of this Act.

AMENDMENT OFFERED BY MR. HENDERSON

Mr. HENDERSON. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HENDERSON: Strike out all after the enacting clause and insert the following:

"That (a) section 5108(a) of title 5, United States Code, is amended by striking out '2,577' and inserting in lieu thereof '2,727'.

"(b) Section 5108(b)(2) of such title is amended by striking out '28' and inserting in lieu thereof '44'.

"(c) Section 5108(c)(1) of such title is amended by striking out '64' and inserting in lieu thereof '90'.

"(d) Section 5108(c)(2) of such title is amended by striking out '110' and inserting in lieu thereof '140'.

"SEC. 2. Section 4 of the Act entitled 'An Act to provide certain administrative authorities for the National Security Agency, and for other purposes', approved May 29, 1959, as amended (50 U.S.C. 402, note), is amended to read as follows:

" 'SEC. 4 The Secretary of Defense (or his designee for the purpose) is authorized to—

" '(1) establish in the National Security Agency (A) professional engineering positions primarily concerned with research and development and (B) professional positions in the physical and natural sciences, medicine, and cryptology; and

" '(2) fix the respective rates of pay of such positions at rates equal to rates of basic pay contained in grades 16, 17, and 18 of the General Schedule set forth in section 5332 of title 5, United States Code.

Officers and employees appointed to positions established under this section shall be in addition to the number of officers and employees appointed to positions under section 2 of this Act who may be paid at rates equal to rates of basic pay contained in grades 16, 17, and 18 of the General Schedule.' "

The SPEAKER. The question is on the amendment offered by the gentleman from North Carolina (Mr. HENDERSON).

The amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

(Mr. HENDERSON asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HENDERSON. Mr. Speaker, I rise in support of S. 2325, as amended.

I believe that every Member of this body who knows me and my voting record would agree that I have not made it a practice to support or sponsor expensive programs or proposals of doubtful or questionable worth. I have consistently voted in favor of spending cuts and economy.

But the way to save money so far as personnel is concerned is to hold down programs. When Congress authorizes a program or creates a department or agency and delegates responsibility to it, then it is completely false economy to establish such rigid and arbitrary manpower and salary ceilings that the program or agency cannot be efficiently managed and operated.

All of us know that an essential ingredient of a successful business operation is good, capable management. All of us know that in our leading industries in the private sector, the competition for executives with demonstrated management, scientific, and engineering ability is extremely intense.

The same is true of the Federal Government. The Chairman of the Civil Service Commission appearing before the Manpower and Civil Service Subcommittee on November 9 indicated the administration's strong support of subject legislation and pointedly stated the case of the departments and agencies in these words: "In 1967 and 1968, the Commission described the needs for additional quota spaces as pressing but today in 1969, the need has ceased to be pressing, it is critical."

I feel that every Member of this body and the taxpaying public wants the various programs of the Federal Government to be managed and administered by executives who have the ability to administer them wisely, economically, and in accordance with the intent of the Congress.

PURPOSE

The purpose of S. 2325, as amended, is to provide for the establishment of certain management, administrative, scientific and research and development positions in the three highest Federal career service salary grades, which are needed for the successful and efficient conduct of new and/or expanded programs and functions authorized by the Congress and other essential Government activities.

AMENDMENT

The Post Office and Civil Service Committee of the House amended S. 2325 by rejecting 45 additional supergrades earmarked for regional office adjustments in several departments and agencies, and eight supergrades and one executive pay level IV position earmarked specifically for the Smithsonian Institution. The Manpower and Civil Service Subcommittee in its public hearing did not receive sufficient evidence to warrant the additional supergrades for regional office adjustments. The Post Office and Civil Service Committee does not consider it wise to earmark specifically supergrades as S. 2325 provided, as passed by the Senate, for the Smithsonian Institution.

POSITIONS AUTHORIZED

S. 2325, as amended by the House Committee on Post Office and Civil Service, authorizes 150 additional positions in grades GS–16, GS–17, and GS–18 of the General Schedule for allocation among departments and agencies in the executive branch in accordance with procedures established and administered by the U.S. Civil Service Commission to carry out the congressional policy laid down in Public Law 87–367:

Provides 16 additional top-grade positions for the Library of Congress;

Increases by 26 the number of positions in grades GS–16, GS–17, and GS–18 in the General Accounting Office;

Increases by 30 the number of positions in grades GS–16, GS–17, and GS–18 for the Federal Bureau of Investigation in the Department of Justice; and

Removes the quota restriction on the number of engineering and scientific positions in the National Security Agency, Department of Defense.

PUBLIC HEARING

The Manpower and Civil Service Subcommittee on November 5, 1969, held a public hearing on H.R. 12476 by Messrs. DULSKI and CORBETT. The Chairman of the Civil Service Commission, Hon. Robert E. Hampton, supported subject bill, providing for all items as now reflected in S. 2325, as amended by the committee.

Chairman Hampton did not request any supergrade positions in addition to those provided in subject bill as amended.

Favorable reports were received from the heads of the Federal Bureau of Investigation, the General Accounting Office, and the Library of Congress. There were no adverse reports.

JUSTIFICATION

For the Civil Service Commission pool there are now 2,577 spaces available for the Commission to allocate among the departments and agencies of the executive branch according to priorities of need.

Subject bill would increase this number to 2,727. The Congress has not increased the number of spaces in the Commission "pool" since 1966, when 177 were, at that time, given to the Civil Service Commission. However, since 1966, Congress has authorized large expansions in several existing programs and created many new ones. Examples of these programs are:

Highway safety, Department of Transportation;

Air and water pollution, Department of Health, Education, and Welfare;

Drug abuse and control, Justice Department;

Urban renewal, Department of Housing and Urban Development;

Vocational rehabilitation, the Departments of Labor and Health, Education, and Welfare.

The Federal Bureau of Investigation now has 110 supergrades and their last increment was 35 in 1966. There are currently no supergrade vacancies in the Bureau. The additional positions, according to FBI officials, are needed for increased activities in the criminal, security and civil fields. For example, from 1956 to date, the FBI primary investigative jurisdiction has increased from 140 categories to over 180. In turn, six additional field offices have been established.

The General Accounting Office would have an increase from 64 to 90 supergrade positions by enactment of subject legislation. In 1966 GAO received 25 of these positions. Currently there are no vacancies. Comptroller General Elmer

Staats has indicated to the committee an urgent requirement for 14 supergrade positions for the accounting, auditing and investigative responsibilities and 12 positions for legal, policy, technical and administrative functions.

Library of Congress now has 28 supergrades and this number would be increased by 16 to 44. The Librarian of Congress, Hon. L. Quincy Mumford, has indicated such reasons as the following for additional top jobs in the Library: the application of computers to control and to use information stored in card catalogs, the expansion of the Copyright Office, and increased use of automation for the Legislative Reference Service.

National Security Agency would be extended the same authority and flexibility afforded most of the other Federal agencies as to hiring top-level scientific and engineering personnel. The Secretary of Defense and the Chairman of the Civil Service Commission recommended this legislative change. Enactment of this provision would place the National Security Agency on an equal basis with most other agencies relative to the recruitment of highly skilled scientific personnel, especially in the cryptologic science.

CONGRESSIONAL CONTROL OVER ALLOCATION OF SUPERGRADE POSITIONS

For the past few years the members of the Post Office and Civil Service Committee have felt that the present system of controlling supergrades is as realistic and feasible a procedure as we have been able to develop. The various departments and agencies go the Civil Service Commissioners and indicate positions for review as to supergrade levels. The Commissioners evaluate each position as to whether it justifies a supergrade level. If it is, then the agency must justify priority over the requests of other departments and agencies. Likewise, the Commissioners evaluate the qualifications of each supergrade nominee. This procedure insures to Congress that the Civil Service Commission serves as the monitor of needs of Government for supergrade positions.

An alternative to this system would be for each congressional committee to legislate the supergrade requirements for the various departments and agencies over which it has jurisdiction. Thusly, there would be no control over these top-level jobs with such legislative procedure. The present system will only work if required positions for the Civil Service Commissioners to allocate to departments and agencies are made available. The pool of available positions at the Commission is now "dry."

CIVIL SERVICE COMISSION RESPONSIBILITY

The committee strongly recommends that the Civil Service Commission, in carrying out its responsibilities in allocating the 150 additional authorized supergrade positions, be most careful to allocate them to the departments and agencies that have the greatest need in view of the total number available. Any action to distribute these positions without regard to their need will certainly lead to a serious undermining of the confidence of the Congress as to the Commissioners' stewardship over the control of supergrades.

DISTRICT OF COLUMBIA GOVERNMENT

In his official report to the Congress on March 18, 1969, for the enactment of legislation providing for additional supergrades, the Chairman of the Civil Service Commission stated that, "Under current plans, from 20 to 25 of these additional supergrade positions would be made available to the government of the District of Columbia." This committee has received no testimony or no evidence whatsoever that would justify additional supergrade positions for the District of Columbia government.

The District of Columbia government currently has 60 city officials at the supergrade level. These are positions that, at the lowest supergrade level, pay more money than that earned by 27 of our State Governors. Only 15 of our State Governors are paid salaries higher than those now paid to the District of Columbia Corporation Counsel, the Directors of Highways and Traffic, Program Development, Public Safety, and Public Health, all of which are at the GS–18 level.

I believe that the District of Columbia government is currently overloaded in high-paying positions and see no justification for additional allocations by the Civil Service Commission of any of the positions being made available in this bill.

COSTS

It is estimated that for the 222 supergrade positions, plus an estimated increase of some 15 supergrade-level engineering and scientific positions in the National Security Agency, as provided by S. 2325, as amended by the committee, the annual cost will be approximately $2.4 million.

Mr. Speaker, in the interest of continued congressional control of top management positions in the Federal Government and in the interest of efficient administration of our Government, I urge the House to act favorably on S. 2325, as amended.

(Mr. GROSS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. GROSS. Mr. Speaker, it is with reluctance that I have agreed to the passage of this legislation. I have done so only in an effort to maintain at least some control on the part of Congress over the number and allocation of Federal employees in grades 16, 17, and 18.

These supergrades should never have been permitted. It is a device to provide higher pay that was supposed to be used sparingly as a reward for meritorious service of the highest order. There are now several thousand of these employees and the executive branch of Government must be put on notice that with respect to supergrades and scientific and professional employees any further increases in the foreseeable future will meet with this Member's opposition.

GENERAL LEAVE TO EXTEND

Mr. HENDERSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the Senate bill just passed by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

ORDER OF BUSINESS AND AUTHORITY FOR SPEAKER TO DECLARE RECESS

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the House may proceed with special orders at this time and that subsequent to the disposition of all special orders, the Speaker may declare a recess subject to the call of the Chair.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

Mr. PETTIS. Mr. Speaker, reserving the right to object, I do not know whether this has been cleared with the leadership on this side of the aisle. Can the gentleman from Oklahoma indicate that?

Mr. ALBERT. It has not been cleared with the leadership. We would assume that the leadership would be agreeable to it because we have cleared all the business that is before the House, and we are hopeful that the other body might send over a conference report or two this afternoon because we have a total of eight conference reports yet to dispose of prior to adjournment.

In view of that, we would expect that everyone would be agreeable to the request.

Mr. PETTIS. May I further ask the gentleman from Oklahoma, may we then reasonably expect that there will be business tomorrow?

Mr. ALBERT. We feel quite certain that there will be business tomorrow.

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. PETTIS. I yield to the gentleman.

Mr. KYL. Mr. Speaker, could the majority leader inform the membership as to the time frame? In other words, if we are not called back by some time certain, could we consider that we are through for the day?

Mr. ALBERT. I have not discussed this with other Members of the leadership. I can assure the gentleman, we would not make this an unreasonably long day.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma (Mr. ALBERT)?

There was no objection.

PERSONAL ANNOUNCEMENT

(Mr. CARTER asked and was given permission to address the House for 1 minute.)

Mr. CARTER. Mr. Speaker, as it happened I was unavoidably kept away from the floor of the House a little while ago and did not get to vote on the foreign aid conference report. If I had been here, I would have voted against it and I would like for the RECORD to show that.

The SPEAKER pro tempore. The gentleman's statement will appear in the RECORD.

THE LATE THORNTON HARDIE

(Mr. WHITE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WHITE. Mr. Speaker, the State of Texas has lost one of its great civic leaders, a widely known and highly respected lawyer, a forceful and eloquent figure on the political scene, a courtly respected gentleman.

Mr. Thornton Hardie came to El Paso as a young graduate of the University of Texas Law School in 1913. He has practiced law in El Paso for more than 56 years; certainly he was one of the senior members and former presidents of the El Paso Bar, a distinguished legal scholar, and the senior member of the highly respected firm of Hardie, Grambling, Sims & Galatzan.

Excellence in legal training and practice, in civic life, and especially in the field of education, were basic themes of his life. For 6 years, he served our State with great distinction as a member of the board of regents of the University of Texas system, as chairman of the board for 2 years, 1961 to 1963. He also served as a member of the Texas Council for Higher Education, and was a member of the Philosophical Society of Texas.

In politics, Mr. Hardie was an eloquent defender of those principles of constitutional government which he believed essential to our Nation's well-being. Opponents and allies alike respected his great ability and admired his unfailing courtesy and courtly bearing.

In our community of El Paso, he was honored in the field of business, having served as vice president and director of the El Paso National Bank, director of the Southern Union Gas Co., and the Rio Grande, El Paso & Santa Fe Railroad Co.

His imprint upon the city of El Paso and the State of Texas has been great beyond measure. His memory will remain bright among his four children, all of whom are outstanding civic leaders, 18 grandchildren and eight great-grandchildren, his brothers and sisters, and his many friends.

Other Members of this body, who had the good fortune to know Mr. Thornton Hardie, I am sure will join in the sentiments that here was a citizen whose career of service deserves our admiration and respect.

MIDDLE EAST RESOLUTION AMENDMENT

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FINDLEY. Mr. Speaker, daily the fighting in the Middle East increases, daily the tension multiplies, daily the toll of Arabs and Israelis killed mounts—and each day the likelihood grows that open warfare will erupt between nations in that part of the world. If that fateful, violent day comes again as it did in 1957 and 1967, the position of the United States may well determine the future of mankind. The military and political support which our Government gives to one side or the other will drastically affect the outcome of any war in the Middle East, whether it spreads beyond the immediate bounds of the conflict, whether it involves a confrontation with the Soviet Union, and whether once again American boys are called upon to put their lives on the line to support their Government's foreign policy.

Does the United States have a commitment that might draw us into a conflict in the Middle East? If it exists, how does it compare with the commitment our Nation undertook in Vietnam? Who would make the decision as to whether our interest justifies military action? What is the possibility of the United States becoming embroiled, through a Vietnam-like process of gradualism, in another undeclared war—this time perhaps posing an even greater risk of escalation to a nuclear confrontation?

These are questions the Congress and the American people are entitled to ask, particularly at this moment of mounting crisis in a region with which our country has so many cultural, religious, ethnic, and economic ties.

The answers will come as a surprise—indeed, a shock—to most Americans, including, I daresay, most of the Members of Congress.

Still in full force on the statute books is a resolution enacted by Congress in 1957 which states a broad area of national commitment to the preservation of the integrity of nations in the Middle East. It is far more specific than the formal obligations cited as justification for our entry into the conflict in Vietnam. In fact, the all but forgotten Middle East Resolution makes the Gulf of Tonkin Resolution pale by comparison. It places in the hands of the President the exclusive authority to make the determination that military action is required and to order into action military forces without limit. It relieves the President even of the necessity of consulting with the Congress, as well as the necessity of securing advance congressional approval.

It leaves open the possibility of another Vietnam-like experience, another undeclared war—this time bringing into basic confrontation the vital interests of the world's two superpowers.

What President—and especially one now dealing with the agony of disengagement from the Vietnam tragedy—would wish to use this awesome power without first consulting thoroughly with the Congress and gaining from the Congress specific approval. Surely, President Nixon would be the last person intentionally to permit the military doctrine of gradualism to draw the Nation into another large-scale undeclared war.

Indeed, President Nixon's statement this week that he approves of the Senate appropriation bill amendment forbidding ground combat troops from being introduced into Thailand and Laos suggests that the President would likewise welcome congressional restraint on similar authority in the Middle East.

This estimate of Presidential intention, while reassuring, does not relieve the Congress of its own responsibility to the American people. Under the Constitution, the power of the sword is vested in the Congress. This power it unwisely surrendered in 1957, and this power it must regain. To argue that the resolution is dormant and would never be cited is scant comfort.

In the fall of 1964, President Johnson would have scoffed at a forecast that he would use the Gulf of Tonkin resolution and the SEATO treaty as justification for sending a half-million men into war.

Such a possibility has not been ruled completely out in the Middle East. During the 10-day battle in November between the Lebanese Army and Arab guerrilla forces, Secretary of the Navy John H. Chaffee told a London news conference, "I think certainly the United States is not anxious to become involved in land deployment in the Mediterranean." But if circumstances became serious and required it, he said, "I think we could do it." He added that, "I think the United States would need very strong reasons for landing troops from the 6th Fleet."

No one can forecast with accuracy the passions and pressures which may be generated by future events and brought to bear on institutions of our Government.

If experience has taught us anything, it has shown how fragile peace really is, and how difficult it is to draw the fine line between U.S. involvement as a provider of noncombat military support and U.S. involvement in combat itself.

Difficult though it may be, the Congress must assume responsibility for that line drawing. The chore cannot wisely be left to the President, even one as experienced and chastened as Mr. Nixon.

The power of the sword—one of the two great powers reserved by the Constitution to the legislative branch—is clearly and exclusively established as a congressional prerogative by this mandate of article I, section 8 of the Constitution, "The Congress shall have power to declare war."

There are some, myself among them, who believe that Congress has not adequately fulfilled its responsibility in this regard in the past. Irrespective of differing views on points of history, each of us surely wants to guard the legislative prerogative of power over the sword in any future conflict which might entail the use of U.S. troops.

If war should break out in the Middle East—and there is every indication that this is a real possibility—the Congress should formally and officially participate in any decision fixing the role the United States would take in such a conflict. The Constitution says we must, and the people who elected us have the right to expect us to exercise our judgment in just such a circumstance.

Yet, in the event of war in the Middle East, would the Congress be called upon to exercise its constitutional authority before our military forces are used?

Under existing law, as interpreted when it was enacted, it is clear that the decision could be made to send American combat troops in almost unlimited numbers into the Middle East to fight on any side or as a buffer between sides without specific approval by the House or the Senate.

The Middle East resolution, passed in

the early months of 1957 when the menacing military posture of the Soviet Union seemed to threaten the stability of the countries of the Middle East, states:

The United States regards as vital to the national interest and world peace the preservation of the independence and integrity of the nations of the Middle East. To this end, if the President determines the necessity thereof, the United States is prepared to use armed forces to assist any such nation or group of such nations requesting assistance against armed aggression from any country controlled by international communism: Provided, That such employment shall be consonant with the treaty obligations of the United States and with the Constitution of the United States. Pub. L. 85–7.

This act has never been repealed. It has no specified date of expiration. It is permanent law.

Let there be no mistake. This resolution, passed under circumstances in the Middle East which have radically changed in the intervening 13 years, requires neither consultation with Congress nor congressional approval before the President can send American men to fight in a war.

When Secretary of State John Foster Dulles testified on the resolution before the Joint Senate Armed Services and Foreign Relations Committees he made that point abundantly clear in response to this question put to him by Senator Kefauver.

Senator KEFAUVER. But can you give us that as an assurance, that before the Armed Forces of this Nation will be used under circumstances which might bring about a substantial conflict, that the President would ask for a declaration that a state of war existed?

Secretary DULLES. Not prior to their use; no sir.

And in response to Senator FULBRIGHT'S query, "Who determines whether or not a country is Communist dominated?" the Secretary of State replied, "That determination would be made by the President."

This broad delegation of congressional power is far greater than the grant of authority in the SEATO treaty which President Johnson often cited as authority for American military actions under the Gulf of Tonkin resolution. Under article IV of the SEATO treaty, each party to the treaty pledged, in accordance with its "constitutional processes," to "act to meet the common danger" resulting from "aggression by means of armed attack in the treaty area against any of the parties."

The hearings on the SEATO treaty in 1954 made it perfectly clear that some form of congressional action would be required to authorize military action under article IV. Senator Wiley, the chairman of the Senate Foreign Relations Committee unmistakably clarified the meaning of the phrase "constitutional processes" when he asked Secretary of State Dulles the following question:

Senator WILEY. So whether it were the threat mentioned in Section 2 [of article IV] or the common danger resulting from open attack, action could be taken only after consultation with Congress?

To this, the Secretary of State unqualifiedly answered "yes."

Again, later in the hearings, the Secretary of State affirmed that the President "would act through the Congress if it were in session, and if not in session [he would] call Congress."

There was no similar pledge by Secretary Dulles in the hearings on the Middle East resolution. To the contrary, as indicated to Senator Kefauver above, the Secretary specifically stated that the President need not consult first with the Congress, nor seek any kind of congressional authority or supportive action, prior to committing U.S. Armed Forces to fight in the Middle East. Secretary Dulles did say that the President might, under certain circumstances, call Congress into session after he had committed troops and the war had already begun. This comment demonstrated clearly the degree to which the resolution relieved the Congress of its war-making power.

The only military action taken under authority of the Middle East resolution unquestionably supports this interpretation.

When President Eisenhower sent U.S. Marines into Lebanon without prior congressional approval on July 14, 1957, he cited the Middle East resolution—passed 16 months earlier—in support of his action, although the aggression was being carried out exclusively by Arab nationals using Soviet weapons. As further justification, he listed the pattern of conquest by the Communists in Greece in 1947, Czechoslovakia in 1948, China in 1949, Korea and Indochina in 1950, and stated:

We now see in the Middle East . . . the same pattern of conquest with which we became familiar during the period of 1945 to 1950. This involves taking over a nation by means of indirect aggression; that is, under the cover of a fomented civil strife the purpose is to put into domestic control those whose real loyalty is to the aggressor.

Referring to the Korean war, President Eisenhower went on to say, "All the world knew that the North Koreans were armed, equipped and directed from without for the purpose of aggression."

Times have changed since the Congress passed the Middle East resolution over a decade ago. The nature of the conflict has changed. Although Soviet power remains and in some respect is much greater, who can say with precision that any country in the Middle East is, in the words of the resolution, "controlled by international communism"? The fierce independence and nationalism of Arabs is only partly nurtured by Soviet ambition and aid. To the deep wounds of many years are added the scars of the 7-day war. Tension and conflict are seen more in nationalistic terms today than in terms of confrontation between the free world and international communism.

At the same time the Soviet threat has taken on a more menacing, although changed, character. The Soviet Union is now a superpower whose nuclear weapons are acknowledged to be in the same class as those of the United States. It is also a first-rate naval power, operating extensively for the first time throughout the Mediterranean.

If a confrontation should occur between the United States and the Soviet Union over the Middle East, our country would no longer hold the decisive advantages of yesterday, even though the danger of intimidation of these states by massed displays of Soviet ground forces no longer seems so great.

These changes make all the graver the risks entailed by a confrontation with "international communism" in that region. Such a confrontation may come. The time may also come when the United States will find it clearly in its interest to go to war. But the stakes are now so mountainous as to make absolutely vital formal congressional approval before any such decision is effected.

The Congress can deal expeditiously with a challenge in whatever manner is appropriate. Let no one doubt the capability or the capacity of the Congress to act with dispatch if the occasion merits it. The comment of Senator Lyndon B. Johnson, later to be President, at the hearings on the Middle East resolution are as instructive as they are ironic. Referring to the request in the resolution for $200 million to support U.S. economic and military aid, the Senator told Secretary Dulles:

I think that you can trust the Congress to act with reasonable care on matters vitally affecting this Nation and not to drag their feet. I know of no disposition to do so. It seems to me if the Secretary of State and the President feel the need for further information before they reach a conclusion, that they will give the Congress the same privilege they reserve for themselves.

The attitude of the American people has also changed quite markedly over the last decade. We have learned from bitter experience the limitations of limited wars.

We have learned that a war effort which has been denied the unifying force of formal congressional support and approval is gravely shortchanged. We have found that a limited military response ordered on his own by the President can lead the Nation into a paralyzing and seemingly bottomless quagmire. From this experience, I believe the Congress has become convinced that the American people will not support U.S. involvement in a foreign war unless and until such involvement has been given formal approval by the Congress.

Because of these two changed factors, plus the constitutional responsibility mentioned earlier, I am today introducing an amendment to the Middle East resolution. It would clearly spell out the role of Congress in any decision to commit U.S. forces to the Middle East under the authority of that resolution.

Retaining all the basic language of the resolution, the amendment would add three significant words, "and the Congress," to the operative clause permitting the commitment of armed forces. It would cause section 2 of the resolution to read, in pertinent part:

Furthermore, the United States regards as vital to the national interest and world peace the preservation of the independence and integrity of the nations of the Middle East. To this end, if the President *and the Congress* determine the necessity thereof, the United States is prepared to use armed forces to assist any nation or group of such nations requesting assistance against armed aggression from any country controlled by international communism: Provided, That such employment shall be consonant with the treaty

obligations of the United States and with the Constitution of the United States.

This amendment does not in any way lessen our commitment to peace, justice, and national security in the Middle East. Nor does the amendment in any way lessen our commitment to stand fast against Communist encroachment in that part of the world. Outright repeal of the Middle East resolution might very well have that effect.

Acceptance by the Congress of the amendment I propose would have the undeniable effect of reaffirming congressional support for and commitment to a stable, peaceful, independent Middle East. At this point in our history when the shadow of Vietnam seems to dull many of our commitments around the world, it would be wise for the United States to renew its commitment to stand fast against Communist penetration in this part of the world.

My amendment restores Congress to its proper decisionmaking role, recognizing that before the United States can constitutionally commit armed forces to preserve "the independence and integrity of the nations of the Middle East," approval by the Congress, as well as the President is required.

This amendment would not infringe upon the legitimate right—in fact the duty—of a President to commit troops in the Middle East or elsewhere under certain limited circumstances without prior specific approval by the Congress. As Commander in Chief, the President has the implied power to repel attack and to protect the lives and property of U.S. citizens.

However, these exceptions to the general rule of prior congressional approval cannot properly be interpreted loosely. Thus, a President cannot cite as authorization the need to protect American lives or property when in fact there is no clear and substantial showing of danger to such at the time of the intervention.

Similarly, the power to repel attack is not an unlimited one. The right of self-defense is undeniable, but this authority permits only a limited response to a specific situation, and it terminates when the need for self-defense terminates. Beyond this, any intervention by American forces must be preceded by specific congressional approval.

The need for action on this amendment is urgent. If the volcano of war does erupt in the Middle East, the United States may well decide to send troops to help restore peace and stability to that part of the world. But let the decision to do so result from the constitutional processes which form the strength and security of our Nation and in which the role of Congress is fixed by the Constitution and not by the pleasure of the President. Let the decision to send troops, or not to do so, result from a synthesizing debate and vote—actions which will help forge a unified public will behind national policy. Such a unified will can best be forged on the one great anvil of democracy, the Congress of the United States.

MYLAI INVESTIGATION

(Mr. MINSHALL asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MINSHALL. Mr. Speaker, on November 20 I took the floor to ask for a complete investigation of the alleged atrocities at Mylai. I am glad to see that the Congress and the Department of Defense are conducting in-depth investigations.

Yesterday I received a letter from Mr. Raymond J. Kappel, secretary of the Fairview Park, Ohio, Jaycees, detailing a meeting in July 1968, at which Ronald Haeberle showed his now-famous color photographs taken at Mylai.

Mr. Kappel, who did not attend that meeting, wrote the letter in his capacity as secretary of the group, at the request of fellow Jaycees who were present when the pictures were shown. I have discussed Mr. Kappel's letter with a member who was there, and he states that the facts are accurately represented.

I know that my colleagues are tremendously concerned with the alleged events at Mylai and, accordingly, I am making this letter part of the RECORD and am sending copies of it to the appropriate Department of Defense officials:

THE FAIRVIEW PARK JAYCEES, INC.,
Fairview Park, Ohio, December 11, 1969.

Hon. WILLIAM E. MINSHALL,
Rayburn Office Building,
Washington, D.C.

DEAR MR. MINSHALL: The Fairveiw Park Jaycees have been deeply disturbed by the alleged massacre at My Lai on March 16, 1968. We also are concerned about the sensationalism of the publicity concerning My Lai.

On July 10, 1968, Mr. Ronald Haeberle presented a slide show on Vietnam at our monthly meeting. The main theme of his presentation was Vietnam countryside until the final few slides, which showed Vietnamese people, whom Mr. Haeberle said were killed as a result of a military search-and-destroy mission. The slides were the same as photographs that are now getting sensational publicity by the news media. We were sickened by the photographs. We questioned Mr. Haeberle as to how these deaths occurred. He stated that his unit was on a search-and-destroy mission and that the village was a V. C. stronghold; that the villagers were warned two days in advance by dropped leaflets and voice communication that the village was going to be destroyed, and that they should leave, and that anyone remaining would be considered a V. C. The manner in which he made his presentation generally left the group with the impression that this act was justifiable.

As to what occurred in My Lai, we now question the use of these pictures by various publications and news media, 1½ years after they were taken.

We feel that the Government should thoroughly investigate the alleged massacre, and that the truth should be determined.

Sincerely yours,

RAY KAPPEL,
Secretary.

THE MAIL ON MYLAI

(Mr. RIVERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RIVERS. Mr. Speaker, I would like to read the House a sentence from a letter recently received from a man in Keene, N.H.:

I am an interstate bus driver (28 years old), and if a thug accosted me and robbed me, you can bet the news in reporting the incident would say "*alleged* assault," but here (the massacre) they almost never bother to say "alleged."

And here is another sentence from the same letter:

Politicians often think people are fooled by the press, but this is not true.

This letter from young Mr. Greg Murphy, of Keene, N.H., sums up very well the feeling expressed in the overwhelming majority of the mail received by our committee on the Mylai investigation.

The main thrust of concern among those who write to us is that the news media have tried and convicted the American soldiers in Vietnam before the case has been proved and that our committee should investigate the whole matter in depth and not prejudge the case.

I think Mr. Murphy has summed up very neatly the reaction many of us here have had to the reporting of this story in his reference to the fact that the papers did not even bother to use the word "alleged." Our mail would indicate that a similar reaction has been experienced by people throughout the country.

Our committee has received over 325 letters, and new batches of mail are delivered daily. There is a great interest on the part of the American people. The mail comes from all parts of the country and from people in all walks of life. Of course, we have received letters critical of our procedures and critical of statements I may have made in public interviews. But a staff review indicated that the mail is running approximately 20 to 1 in favor of our manner of procedure.

Those who write to us seem to be principally concerned that we get all of the facts before jumping to conclusions and that we assure that the rights of the American soldiers involved are protected. The people are greatly concerned that these matters will reflect unfairly on all of the GI's who have served in Vietnam.

The most frequent comment in our correspondence is concerned that the press and TV reports have assumed the guilt of the men accused before any investigation or any court-martial is completed.

Again, I want to say to Members of the House that the subcommittee I appointed under the chairmanship of the distinguished gentleman from Louisiana (Mr. HÉBERT) will press forward with a thorough investigation and will not rest until all of the facts are in. That subcommittee will determine if there has been a massacre, if there was who was guilty, and the extent to which the Army's system is at fault. That subcommittee will be diligent to protect the rights of individuals.

We shall not be swayed from our constitutional responsibilities by the glare of the TV lights or the slant of the editorialists.

Mr. CLEVELAND. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I am delighted to yield to the gentleman from New Hampshire.

Mr. CLEVELAND. Mr. Speaker, I would like to compliment the distinguished chairman of the Committee on Armed Services on his fine statement and, because he has used a letter of one of my

constituents, I would like to thank him for having selected that particular letter. I think it is fairly typical of letters I have received from other constituents. The motto of the State of New Hampshire has been and it still is, "Live free or die." There are many tough-minded, thoughtful people in the Granite State.

Mr. RIVERS. I want to thank the gentleman.

PRESS COVERAGE OF THE ARMED SERVICES COMMITTEE INVESTIGATION OF THE MYLAI INCIDENT

(Mr. NICHOLS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include a newspaper article.)

Mr. NICHOLS. Mr. Speaker, I read with great interest the comments of our colleague, Congressman BOB SIKES, of Florida, concerning the press coverage of the Armed Services Committee investigation of the Mylai incident. I agree with him 100 percent, and I want to add my endorsement to his statements about Chairman MENDEL RIVERS and the chairman of the special subcommittee looking into the Mylai incident, Congressman F. EDWARD HÉBERT, of Louisiana. It is an honor and a privilege to serve with these gentlemen, and I know that they have only the good of America at heart in this or any other matter which comes before our committee.

If there is any man in the Congress who would do a better job of investigating these charges than Congressman HÉBERT, I do not know who he is. As a career newspaperman for some 20 years before coming to the Congress, he knows that there is no use to try to whitewash or cover anything as important as this. Chairman RIVERS and Congressman HÉBERT want only to see that justice is done in this case.

While the press is quick to publicize incidents such as that which allegedly occurred at Mylai, they seldom make an effort to bring to the public's attention both sides of the situation. For instance, the Columbus, Ga., Ledger, on Tuesday, December 16, ran a picture which was taken some 2 weeks before the incident showing Vietcong women and young boys carrying arms in Mylai. Such a picture would not, of course, be of interest to certain newspapers because it would not help their case in prosecuting those Army officers who have been accused of participating in this incident.

I believe any man going into an area where he knew women and children were part of the Vietcong force would be particularly wary of anyone. I ask unanimous consent that this article from the Columbus Ledger be inserted in the RECORD at this point.

ARMY PHOTO SHOWS VC UNIT STATIONED IN MYLAI AREA

A photograph of a Viet Cong unit based in the My Lai (4) area was made available Monday by a man who had served with the 11th Infantry Brigade at the time of the incident of March 16, 1968, which has brought charges that G.I.'s committed murder against Vietnamese civilians.

He said the photograph came from a roll of film captured in a Viet Cong basecamp in the Song My village area (My Lai was one of the hamlets of this village) two weeks before the My Lai raid.

An officer who had served with the 11th Brigade during its organization and as both a field commander and staff officer, he said the photograph was developed by the brigade public information office photography laboratory, some copies retained by that office, others given to inteligence sources.

Identification of some of the individuals in the group of 38 armed Vietnamese, including three young women and several very young boys, was made by 11th Brigade intelligence offices, he said.

Kneeling in the center of the group one arm akimbo, with a holstered pistol, is the military leader of the unit, he said.

Standing at the far left, without a weapon, in peasant garb of black pajamas, and obviously older than the armed guerrillas, is the unit's political officer, he said.

Third from right, with a U.S. M–1 rifle, posed on one knee, is a "combat hero" and squad leader in the unit, the officer said.

Men in the photograph have a 60 mm. mortar, carbines, and M–1 rifles of U.S. manufacture and Mat 49 submachineguns of French manufacture—typical Viet Cong armament as opposed to North Vietnamese regulars who carry Chinese-Communist manufactured weapons of Russian style.

One man, standing on the right of the one identified as the political officer, wears a North Vietnamese regular's field uniform, as does the squad leader in the front row. (The man by the political officer was believed to be his body guard, the officer said.)

PFC. CHARLES F. TYSON III, LOVED HIS NATION AND HIS HOME, MARTIN COUNTY, FLA.

(Mr. ROGERS of Florida asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ROGERS of Florida. Mr. Speaker, on Monday, November 10, 1969, a special Veterans Day memorial service was held at Martin County High School, Martin County, Fla., to honor Pfc. Charles F. "Chuck" Tyson, an alumnus of that school, who gave his life in Vietnam.

Charles Tyson graduated from Martin County High School in June 1968. His favorite pastimes were surfing and swimming, both very popular in beautiful and scenic country located on the Atlantic Ocean, just north of West Palm Beach.

On September 17, 1968, Charles Tyson enlisted in the U.S. Marine Corps. He completed his basic training with flying colors and was very proud to be a marine.

In March 1969, he arrived in Vietnam and on March 29 observed his 20th birthday as a member of 3d Platoon, Company M, 3d Battalion, 5th Marine Regiment.

Private first class Tyson was assigned as a rifleman in the 1st Squad of the 3d Platoon of M Company and on the afternoon of June 21, 1969, Company M was engaged in a search-and-clear operation approximately 4 miles east of the Marine base at An Hoa, Quang Nam Province, Republic of Vietnam. The enemy was encountered and during the ensuing battle, Pfc. Charles Tyson was struck by small-arms fire and was killed. He was buried on July 8, 1969, at Fern Hill Cemetery, Stuart, Fla., in Martin County with military honors.

His commanding officer as well as his fellow marines had a deep affection and respect for Charles Tyson for they knew he was a sincere and dedicated marine who loved his country, and particularly Martin County.

His thoughts were of Martin County High School, Stuart, Fla., when he wrote to his parents in January of this year, prior to his departure for Vietnam. I would like to enclose that letter at this point in the RECORD for the benefit of my colleagues:

JANUARY 29, 1969.

TO MY LOVING MOM AND DAD: Even though I don't like to mention such things, it is a necessary step that must be taken. If by some odd stroke of fate I should not return from my coming tour in Vietnam, there are a few things I would like done.

1. First to be buried at Stuart, Florida.

2. To take the flag from my funeral and give it to Martin County High School. In addition I want $500 to be used to erect a monument to all those students past, present, and future who have given their lives in defense of their God and country. With an inscription by Nathan Hale, "I regret that I have but one life to give for my country."

3. $2,000.00 from my insurance policy to be used in 2 $1,000.00 scholarships for the most deserving male and female students of Martin County High School.

4. The rest is to be used by the two of you as you see fit.

Pfc. CHARLES F. TYSON III.

The wishes of Pfc. Charles F. "Chuck" Tyson were carried out at the Martin County High School on November 10.

The flag from his casket was presented to the Martin County High School by Charles' parents, Mr. and Mrs. Leonard R. Tyson, who now live in South Bay, Fla., a short distance from Stuart, where Mr. Tyson is now acting chief of police. That flag now flies over Martin County High School and has a very special meaning to the students there.

The monument for which Charles bequeathed $500 will be designed by the students of Martin County High School and will be constructed in the courtyard. Charles' parents will give a savings bond to the student who contributes the most toward the design of the monument.

A scholarship is being established at the school to provide $1,000 each to the most deserving male and female student at Martin County High School as Charles requested.

Mr. Speaker, words are most inadequate to express one's respect and admiration for this young man. Yet, I do not believe Pfc. Charles F. Tyson III would want us to linger in sorrow, but would rather have us heed the words of Nathan Hale in these troubled times:

I regret that I have but one life to give for my country.

Mr. Speaker, I think this Nation will continue to be strong as long as we have young men of this caliber.

THE NORTH AND SOUTH MUST HAVE EQUAL TREATMENT IN DESEGREGATION

(Mr. THOMPSON of Georgia asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. THOMPSON of Georgia. Mr. Speaker, it is my understanding that the southern strategy of the Nixon administration is to treat the South in exactly the same manner as the other sections of the country. Day before yesterday a decision was rendered by a three-judge Federal panel and a suit brought by the Justice Department against my State of Georgia, requiring the State school board to administer the desegration of the schools. The three-judge Federal panel, after listening to the pleas of the Justice Department attorneys, set forth certain mathematical racial balance requirements wherein each school in each district must have so many Negroes and so many whites. This is done under the guise of equal protection of the law. I maintain that equal protection of the law provides that there should be no discrimination against any person because of his race, creed, or color, and that to force a child out of his neighborhood because of his race, creed, or color is, in fact, denying him equal protection of the law.

I have in my hand a copy of an article appearing in our Atlanta Constitution, Tuesday of this week, wherein 2,000 white schoolteachers are protesting a recent Federal appellate court decision ordering mathematical proportional integration of each school faculty. In Atlanta, this means 57 percent black teachers in each school and 43 percent white teachers in each school. I disagree that this is equal protection of the laws, but returning to my major point, I have today written Attorney General Mitchell a letter and I have asked him to carry out his announced intention of treating all sections of the country as equals, and to file suit against Northern States who have segregated schools such as in Detroit, Chicago, and New York, and force proportional balance on them as Attorney General Mitchell's suit has done to the State of Georgia. If my President, of whom I am very proud, and his Attorney General are sincere in their statement that the southern strategy is to treat the South as the rest of the Nation then let us have the same action which Attorney General Mitchell brought against Georgia, brought against Northern States. I insert the text of my lettter and news article at this point:

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 19, 1969.

Hon. JOHN MITCHELL,
Department of Justice,
Washington, D.C.

DEAR MR. ATTORNEY GENERAL: Please note the attached newspaper clippings, wherein mathematical racial balance is being required by the Federal courts in schools in the State of Georgia.

Much of this is due to your action and the Justice Department suits, including the one which you brought against the entire State of Georgia.

Will you bring this same type of action against Northern states wherein there are racially identifiable schools?

If racial balance is to be forced on the South by Federal court action initiated through the Justice Department and implemented through busing, pairing and school closing (356 closed thus far), should not the same be forced on the North?

It was within your power to bring suit against Georgia, which you did. Will you now bring suit against Northern states, which is also within your power? I would be completely distressed to find that you favor a system of double standards wherein racial balance is required in the South but not in Chicago, Detroit, New York and other areas. This I sincerely hope is not the case.

If you expect the South to vote Republican, treat us no differently than any other part of the country. Do not oppress us; treat us as equals and file suit against the racially identifiable schools in the North.

May I please have an early reply.

Kindest regards.

Yours very truly,

FLETCHER THOMPSON,
Member of Congress.

[From the Atlanta (Ga.) Constitution, Dec. 16, 1969]

WHITE TEACHERS VOW TO FIGHT FACULTY DESEGREGATION ORDER

(By Richard M. Miles)

The Atlanta Education Association, representing some 2,000 white city school teachers, Monday night declared a recent federal court decision ordering proportional integration of school faculties as discriminatory and vowed to fight the ordered Feb. 1 desegregation of classroom teachers.

The resolution passed on the heels of a warning from Atlanta School Supt. John Letson, who said, "There will be no shenanigans. We will work as professionals."

Letson had told the group that he saw no way Atlanta schools could avoid mixing their teaching staffs 57 per cent black and 43 per cent white—in each school—as ordered by the Fifth District Court of Appeals in October.

Gaining a three-to-one margin after two hours of heated discussion and bickering, the resolution read:

"Our individual and collective civil rights are being discriminated against by the Fifth Circuit panel of U.S. judges, therefore, I move that we as an association draw up:

"1. A resolution explaining the undemocratic procedures, results, etc., thus requesting the reverse (sic) of their decision; and

"2. Our executive committee look into the legal feasibility of an immediate suit to change the court order."

Introduced by Kathy Byrd, a teacher at Hutchenson Elementary School, the resolution's architect and fervent spokesman was Hutchenson Principal A. D. Jones.

Jones told a reporter later, "Yes, I'm against integration. And I want our teachers to have a right to make their own decisions."

During the debate on the resolution, sometimes spiked with personal attacks, Jones said, "We ought not take this sitting down as an association.

"We ought to move for a delay until this is done all over the country—that is, I see this as discrimination against us."

Jones meant by local discrimination that other regions of the nation are not being forced to integrate their faculties in each school on a ratio equal to the racial ratio of teachers in the entire system as is the case in Atlanta.

Letson said when questioned by a Constitution reporter, however, that the only local discrimination was that the Atlanta area had a greater percentage of Negroes than some other sections of the country.

Therefore, any mixing in the Atlanta school system would more obviously change the complexion of the entire system.

Letson also said that faculty integration would probably crystalize sentiment against city-county government consolidation.

"I think it would have the opposite effect (thus not stimulating consolidation desires) because the Atlanta system is about 60-to-40 Negro-to-white; the Fulton County system is about 75-to-25. If we consolidated, the overall system would have a ratio of about 50–50."

AEA is the local unit of the Georgia Education Association and has no Negroes on its rolls. The Gate City Association is the Negro teacher association in Atlanta.

No Negroes attended the Monday night meeting, although they teach at schools in which AEA members teach.

Questioned before the passage of the resolution about what the city school board would do if such a move evolved, Letson would only say:

"The Atlanta school system has never offered any kind of resistance to court orders." He added, "I intend to find a way to implement the court order."

How?

"We'll just play it by ear," he said.

Earlier in the evening, Letson told about 200 teachers and representative delegates, who were authorized to vote, that the Board of Education would establish three criteria for achieving racial balance on faculties:

1. The assignments must be approached in a positive manner and with fairness to all persons—teachers and students—concerned.

2. That he hoped the teachers could act as professionals and "all work together" in drawing up a plan.

3. "Come what may . . . this is another challenge to a professional approach . . . We must look at the long term advantages of a well-devised plan of faculty integration," he said.

Leading off the Monday session of the AEA, Georgia Educational Association's E. C. Mitcham Jr., set three goals for the GEA during the upcoming General Assembly:

1. Making sure Georgia education gets at least $60 million of the total $125 million legislators will deal out this session;

2. Take steps to inaugurate a program providing for a statewide kindergarten program;

3. Making provisions for reducing the pupil-teacher ratio to 25 to one.

Mitcham said that the "General Assembly will probably put a freeze on taxes at the present level" and that it would therefore be a tight squeeze for education to get the funds it needs to improve and expand.

[From the Washington Post]

COURT ORDERS GEORGIA TO OVERSEE INTEGRATION

(By Bruce Galphin)

ATLANTA, December 17.—A federal court ordered the Georgia State Board of Education today to assume responsibility for local school desegregation and to withhold state funds from districts that do not comply. Both phases of the ruling in the case create new law.

This is the first time that a state board has been named the agent to achieve desegregation.

The three judges of the Northern District of Georgia sat en banc for the first time since Georgia's original school integration case 11 years ago. They ordered the State Board to comply with the order by early spring of next year.

The withholding of state funds is a potent weapon, because in Georgia about two-thirds of all public school funds come from the state treasury.

The federal ruling also presumably means that dozens of school districts in Georgia that have lost federal funds because of noncompliance with HEW guidelines now will be eligible to reapply for them as soon as the order is carried out.

The order was signed by Judges Sidney O. Smith Jr., Newell Edenfield and Albert J. Henderson Jr. It dwelt on the confusion in the South resulting from a lack of uniform integration standards and set forth the court's own definition.

These are the minimum standards the court set for a "unitary" school system:

The ratio of minority students in each school must be between one-half and 1½ the actual school population ratio.

A similar range shall apply to faculty and staff.

All facilities and employment shall be uniform at each school.

Extra curricular activities must be opened to all people, faculty and staff regardless of race.

As an example the court said that if a system were 40 per cent black and a school had an enrollment of 400, that would mean that 80 to 240 Negro pupils would have to be enrolled.

The court's standard for faculty integration appears to fall short of the exact ratio recently ordered by the U.S. Supreme Court.

The order said it was neither requiring nor prohibiting the closing of school buildings, the rezoning of school attendance districts, "freedom of choice," busing, pairing of schools nor neighborhood schools. "All of these are but means at the disposal of every local school board to achieve the necessary result," the ruling declared.

The court said the State School Board and Department of Education are better equipped to "monitor the progress" of desegregation than the court. It said the courts would be overwhelmed and "all other legal business (would) cease" if the courts were to take on the task of district-by-district and school-by-school integration.

"Moreover, the prospect of the courts acting as administrators or 'super school boards' is contrary to the concept of the judge's traditional role, and is anathema to our system of local public education," it said.

The suit against Georgia and the state Board of Education was an innovation. It was the first time the Justice Department had sued an entire state in a school case. There is a statewide school desegregation order in Alabama, but it was brought by private plaintiffs.

The order applies to 81 of Georgia's 191 school districts. The others either are in compliance with HEW standards or already are under court jurisdiction.

Gov. Lester A. Maddox called the decision "a violation of the laws of our land." But he added the decision would not be appealed to a higher court.

"There is only one remaining appeal," Maddox said, "and that is with the parents, both black and white, who can come to the defense of these children who have been betrayed."

In their order the judges told the State Board of Education to obtain compliance plans from individual school districts by March 1, 1970, and to submit them to the court by April 1. The state is forbidden to disburse any state funds to a district not meeting the court's deadlines.

A SAGA OF 30 YEARS, A TRIBUTE TO BILL HENRY

(Mr. GERALD R. FORD asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. GERALD R. FORD. Mr. Speaker, it has just been brought to my attention that this month marks the 30th anniversary of my good friend Bill Henry's outstanding column, "By the Way," in the Los Angeles Times. I shall append this memorable column to these remarks.

Thirty years may seem a long time to write a daily newspaper column but, as many of my colleagues know, this is but one of Bill Henry's talents. Throughout the Nation he is best remembered, perhaps, as the voice who for many years summarized the news each evening over the CBS radio network; here in Congress as the chairman of the radio correspondents' galleries who added the word "television" to its title, and headed the national political convention coverage for both major party conventions ever since 1952.

I know Bill best, however, not as a political commentator and columnist but as a sports enthusiast whose interest began back in 1911 when he reported on the Occidental College football games while studying as an undergraduate there. It was Bill Henry more than any other one person, who made the Olympic games in Los Angeles in 1932 an outstanding success, and he has been an adviser to and member of the U.S. Olympic Committee ever since. He was a great sports reporter and sports editor, and I am inclined to believe that sports remain his first love.

Bill was one of the first American war correspondents of World War II. In Europe for an Olympic meeting he was pressed into service by CBS and his newspaper for the Russo-Finnish War of 1939, was later assigned to the RAF in Europe and to the South Pacific. He wound up in Washington in 1942, and has been a friend and confidant of every President since.

His column of December 7, follows:

A Saga of 30 Years

(By Bill Henry)

It's been 30 years—Dec. 10, 1939—since the day this column first appeared in this space. A lot of things have happened since then, probably more changes than any other three decades since the beginning of time. I had been called home from my proud position as the first American uniformed war correspondent with the Royal Air Force in World War II, and, as I look back now, I realize the truth of the old French saying, "The more things change the more they are the same."

That summer I had been in Helsinki while the great powers attempted to head off World War II by negotiation nearby, just as the U.S.A. and the U.S.S.R. have been trying to head off a holocaust these last few weeks. That had been followed by a mysterious war-that-wasn't-a-war as hard to explain as our hostilities with Hanoi in 1969. People called it the "phony war," and all sorts of incredible things had happened. An RAF friend of mine named Cobber Kain had shot down several Luftwaffe planes and on one occasion I had even been hailed as a hero when I showed up in my uniform at the wreckage and the two frightened German airmen had tried to surrender to me.

SAME PROBLEMS TO WRITE ABOUT

I had flown home from the war front in a big Boeing seaplane whose passenger list was headed by Ambassador Joseph P. Kennedy, who remained a headline personality for the ensuing 30 years. As we soared from Lisbon to the Azores and Bermuda he worried about what he should say to the reporters when we arrived, and I wondered what pearls of wisdom I should include in my maiden effort as a roving columnist. I had written on a myriad of topics during my years on The Times, but my sudden reputation had been made as a war correspondent and I was succeeding a chap who had written mostly about the tendency to put too much lettuce and not enough mayonnaise in drugstore sandwiches.

Censorship then, as now, was a red-hot topic and on the advice of Franklin P. Adams, who has been a bigtime column writer for many years, I included in my first column an "Epitaph to a Censor" which had been dashed off in an idle moment by one of the RAF blue-pencil boys. It went as follows:

"Here at length in sweet repose
A censor lies; But who God knows.
When raving pressmen shot him dead
Filled like his pencil, full of lead
E'en in the graveyard, he was game;
Arose and blackened out his name."

NOTHING IS SOLVED

So, it would appear, the passage of 30 years, with the invention of the H-bomb, the glorious vision of the United Nations, and even the space age, the human race seems obsessed with many of the same problems that provided the headaches of 30 years ago. We seem to be capable of thinking up new problems to worry about without having the capacity to solve the problems we already have. The only refuge of the columnist that I have found is to follow the thinking of the late Alexander Woollcott whose definition of the columnist art was, "Writing is the art of putting black words on white paper in succession until the impression is created that something has been said."

Bill Henry made his first broadcast in the days of the crystal set—1923. He has had nearly a half century of broadcast affiliation and has worked for each of the major networks throughout his career.

His intense interest in athletics led him into sports announcing during these early days. In 1932 he served as technical director of the Olympic Games in Los Angeles. Aside from covering these games, the most recent in Tokyo in 1964, he authored a book "An Approved History of the Olympic Games," in 1948.

He joined NBC in 1952 and aside from general assignments, he served as anchor man on the platform of eight national conventions. In that same year, NBC won the conveted "Headliner's Award" for convention coverage and was attributed in large part to the excellent reporting of Bill Henry as the lead commentator.

After the nomination of General Eisenhower, 67 VIP's mounted the platform to wish success to Ike. Henry identified each of them without missing a single name.

I salute Bill and wish him many more happy anniversaries.

Mr. ALBERT. I would like, Mr. Speaker, to associate myself with the tribute which the distinguished minority leader has paid to Mr. William M. Henry who is known to all of us as Bill. For the last five national conventions he has presided over the radio and television arrangements and he is loved and admired and respected by all the political leaders of both parties of our generation.

My fellow Oklahoman Will Rogers said he never knew a man he did not like; I have never met anybody who did not like Bill Henry and very few who did not feel like he was a personal friend. This is a rare and wonderful quality, especially in the news business covering the world of politics.

Since he served as aide to Vice President Nixon on his 1956 and 1957 goodwill trips to Africa and around the world, I suppose that Bill's sympathies are with the present Republican President, but from my own dealings with him and from the way he has treated me in his reporting I would never have known. He is always fair and honest and always in

good humor, which is all anyone can ask of any newsman.

The honors that Bill Henry has received in nearly 60 years of reporting are too many to mention; president of the Radio Correspondents Association here, a National Headliners Award, an International Olympic Diploma, a Freedom Foundation Award, a fellow of Sigma Delta Chi, these are only a few.

I am sure I speak for all my colleagues when I wish Bill many more years of entertaining and enlightening us in his "By the Way" column and on the air.

Mr. HOLIFIELD. Mr. Speaker, Bill Henry has been writing for the Los Angeles Times for 58 years in one capacity or another, and for the last 30 as the author of one of its most popular columns, "By the Way." I have seen times change and the Times change, and they even endorse me nowadays, but I can remember when the only friendly words I could expect to find in my morning paper were those of Billy Henry.

Now I have heard Bill's heart is with the Republicans, but the fact is that Bill's heart is big enough for everybody, and that his friendship was never partisan, and fairness and good nature were always his trademarks. We Californians are especially proud of this distinguished native son who has contributed so much to his fellow men in his full career. He has literally walked with kings, queens, emperors, and presidents, but he certainly kept the common touch, and I am honored to salute him on this anniversary.

Mr. LIPSCOMB. Mr. Speaker, on behalf of the Republican members of the California delegation, many of whom have the privilege of calling Bill Henry a good and close friend, I would like to join in expressing our appreciation of his many years of straight and decent Washington reporting and wish him many more.

I can understand why he prefers the southern California climate of his "By the Way" Ranch to the Nation's Capital at this season of the year, but we hope he will be back on the campaign trail next year. He has been more than a great reporter and news analyst, he has been a warm and wise counselor to many of us, in both parties, just as he was many years ago to another new Member of this body who is now the President of the United States.

My heartfelt congratulations to Bill and his charming wife Corinne on the 30th anniversary of his ever-popular column.

GENERAL LEAVE

Mr. GERALD R. FORD. Mr. Speaker, I ask unanimous consent that all Members may have permission to extend their remarks on the 30th anniversary of Bill Henry's column, "By the Way."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

FREER TRADE

(Mr. MOLLOHAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOLLOHAN. Mr. Speaker, President Nixon yesterday committed his administration to a "freer exchange of goods among nations," with the ultimate goal of dismantling trade barriers altogether.

I think we all support the idea of freer trade, and we all realize that expanded world trade will open vast markets to the United States. At the same time, we know that we cannot allow this Nation's industrial plant to be anything other than self-sufficient. We cannot allow imports to so dominate the markets of this Nation that industries vital to our political and economic independence are jeopardized.

I submit to the Congress that it is unwise for this Nation to be substantially dependent upon any nation for either raw materials or finished products in industries of basic importance to our national welfare when the sudden shift of world events can deprive us of channels of commerce overnight.

It is wiser by far to insure that we maintain competence in all important industries if we wish to remain a commercially and politically independent power in today's world.

The flat-glass industry and the hand-glass industry have been forced into a serious decline by the failure of the Government to work out a well-reasoned trade policy which can afford enough protection to an industry to preserve the country from substantial dependence upon foreign imports for its products in this area. The lessons of this failure are now being learned by the steel industry, the textile industry and the electronics industry. The problem before us in all these industries is to prevent them from being so seriously compromised by imports that the country's industrial ability in these areas is prejudiced.

Last year, the United States increased its exports by just under 10 percent, but its imports increased by nearly 24 percent. The President contended that this was due largely to inflation, but I think we would be remiss if we were to overlook the fact that the economies of other nations, many of which we helped to rebuild following the last war, are aggressively and capably pursuing a far-ranging export program. The United States, with its vast wealth, is naturally a prime target of these programs.

Consequently, I hope this Congress will in the next session very carefully consider the entire range of our Nation's commitments to herself and to the rest of the world. Within that framework we must mold a trade policy which will allow us to maintain our own industrial capability in all vital industries, and pursue with the other nations the goal of larger economic benefits that an expanded world trade can provide.

A DISPLAY OF PURE POLITICS

(Mr. WILLIAM D. FORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WILLIAM D. FORD. Mr. Speaker, in the last few days, in the 11th hour of this session of the Congress, we have been treated to the most amazing and brazen display of power politics in the modern history of our country.

Within the last few days, as the most important legislation considered by this Congress is in conference committees, when its fate is hanging in the balance, we have seen an amazing display of a flood of letters and messages coming to the congress from President Nixon in a direct attempt to intimidate Members of Congress in their consideration of that legislation.

If the Members will pick up this morning's paper, they will discover that in at least four areas the President is attempting to influence the people now sitting in the conference committees, by threatening to veto the legislation they are even now considering in our behalf.

Just as an example, he threatened last night, by letter to the Senate, that he will veto the Health, Education, and Welfare appropriation bill which this House passed by a vote of 393 to 16 on July 31.

He is going to veto, according to this morning's paper, the committee mine safety bill, because he does not like it, even though the House passed it by a vote of 389 to 4 and just two nights ago reiterated its support for that legislation by passing the conference report on a vote of 333 to 12.

We passed a pay increase for all Federal employees, in an attempt to try to keep pace with the increase in the cost of living. That bill, H.R. 13000, passed this House by a vote of 311 to 51. The President threatened "I will veto the Federal Government employees' pay bill because it is inflationary." But if you will look at yesterday's Washington Daily News, you will find a headline story that says, inflationary or not, if he can make an under-the-table political deal to buy his postal corporation scheme he will no longer consider it inflationary, and he will sign the bill. In other words—he now offers what appears to be a greater increase in pay than the Senate voted in the bill he said he would veto—if we will buy the corporation.

A bill that is passed by Congress, he considers to be inflationary when he cannot get what he wants with it. However, it ceases to be inflationary when he can use it to get something else he wants to accomplish, even while asking us to buy a pig in a poke.

The social security bill passed on the floor of this House by a vote of 397 to 0. Nothing could be more bipartisan than that. The veto threat for a social security benefit increase comes despite the fact that the elderly and the disabled on fixed incomes are most in need of additional income if they are not to be deprived of adequate food and the other basic necessities of life. The social security increase voted by both Houses would do nothing more than to help them keep pace with the present cost of living.

I submit that the President of the United States has forgotten that we are a three-part coordinate Government, and he is now attempting to substitute White House power politics for the will of the people as expressed by its elected Repre-

sentatives in the House and in the Senate.

The doctrine of separation of powers among the three branches of the Government has served this Nation well for nearly 200 years. I, for one, do not propose to see it scrapped now.

The appropriations committees and both Houses of Congress have deliberated conscientiously to produce a bill which will continue, to a minimum degree of effectiveness, basic domestic programs in the use of health, education, labor, and the attack on poverty. It is our responsibility to our constituents to do so. We represent the American people. We cannot be intimidated by anyone, even the President of the United States, into abdicating our responsibility.

In his 11th-hour communication to the Senate last night, December 18, the President of the United States demonstrated once again that education appears nowhere on the priority list for his administration. In telling us that he would veto the Labor-HEW appropriation, H.R. 13111, as too expensive, he sided with those who would rather look at shiny military hardware than take the hand of a hungry and homeless child. This is the gut issue in our deliberations.

The Nixon administration has a lot of interesting educational moonshots on the launching pad, but the President hides behind the Bureau of the Budget when someone asks where the money is to pay for the fuel. We are promised a "right to read" program, and the Nixon budget cuts out the money for school libraries and textbooks. We are going to build up our community colleges, but my strongest magnifying glass fails to reveal an additional penny requested for higher education. We are going to feed an extra 3 million youngsters in the school lunch program, but the administration has not told us how.

Is it not tragic that the poor, who live in desperation, may watch the man who lights the national Christmas tree, veto a bill that would give their children a better education?

I propose that we repudiate this hypocritical administration and show the American people, our constituents who look to us for help, that we have the intestinal fortitude to override Mr. Nixon's veto—if indeed he dares do such a thing.

It is abundantly clear that education today is not a luxury but a necessity. It is equally clear that necessities have priority over all else as the expenditure of funds is determined.

Living within ones means is surely an admirable characteristic but going without food is hardly a way to live within family means.

Education of our children is the lifeblood of our Nation. There is no choice to be made. This necessity of our national welfare must be the highest priority.

To use education funds to buy time or gain political advantage is a cruel hoax on the American people.

MORTGAGE MONEY CRISIS

The SPEAKER. Under a previous order of the House, the gentleman from Maryland (Mr. HOGAN) is recognized for 5 minutes.

Mr. HOGAN. Mr. Speaker, I am sure that many of the Members are aware that earlier this fall the Federal National Mortgage Association announced that it would no longer purchase FHA-insured and VA-guaranteed mortgages covering 1- to 4-family properties located in the District of Columbia. This came as result of fears by FNMA that covered loans made at the prevailing rates in the District might be declared in violation of the provisions of the District of Columbia Code limiting the legal interest rate, including points, to 8 percent per annum.

This has had a very adverse effect on the economy, business community and progress of housing in Washington. In addition to the lack of funds available for financing home purchases by moderate income families, the development of low-income ownership housing under section 235 of the Housing and Urban Development Act is being severely restricted, as well as efforts of the District of Columbia Redevelopment Land Agency in relocating persons displaced by urban renewal projects.

Showing his concern over this problem, Mayor Walter E. Washington has met with various concerned elements of the community, District of Columbia government officials, and Housing and Urban Development and Federal National Mortgage Association officials, the result of which was unanimous support for legislation temporarily exempting FHA-insured and VA-guaranteed loans from the District of Columbia usury laws. The Mayor expressed the support of the District of Columbia government for this legislation as an intermediate step to alleviate the situation while a review of the interest rate policies is undertaken by the District government. This review, presumably, will be followed by further recommendations.

After familiarizing myself with the problems involved, I am in agreement with Mayor Washington and others that such a temporary exemption is desirable. I have, therefore, today introduced such legislation in response to this immediate need of the District of Columbia.

I recommend this bill to your attention and urge prompt action by the House District of Columbia Committee and by the House of Representatives on this bill.

TAKE PRIDE IN AMERICA

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of Ohio. Mr. Speaker, in 1967, there were 918 amateur and professional opera companies in the United States that presented 5,487 performances.

PANAMANIAN COUP AND COUNTER-COUP, DECEMBER 15–16, 1969, DRAMATIZE NECESSITY FOR ACTION ON CANAL SOVEREIGNTY RESOLUTIONS

The SPEAKER. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 10 minutes.

Mr. FLOOD. Mr. Speaker, the ousting on December 15, 1969, of Gen. Omar Torrijos, commander of the National Guard of Panama, followed by his restoration on December 16, does not surprise anyone acquainted with the history of that country. It merely conforms to its characteristic of endemic revolution, endless intrigue, and political instability.

The facts in the incident are simple. While General Torrijos made a secret visit to Mexico City to attend horse races, two of his subordinates, Col. Ramiro Silvera and Col. Amado Sanjur, led a coup and proclaimed themselves, respectively, as the commander and deputy commander of the National Guard. Lt. Gen. Rodrigo Garcia, who remained loyal to Torrijos, refused an appointment as Chief of Staff, slipped out of the country, flew to El Salvador to inform Torrijos who had gone there from Mexico, and accompanied him back to Panama.

In a dramatic return to Panama on December 16, Torrijos was acclaimed as a hero, reasserted his control of the National Guard and imprisoned the ringleaders of the revolt. About 18 persons related to the officers under arrest took refuge in the U.S. Canal Zone territory. General Torrijos has announced that he will dismiss Col. Jose Maria Pinilla and Col. Bolivar Urrutia, who have been serving respectively as figurehead provisional President and Vice President of the military government.

In view of the failure of the major papers of Washington to publish realistic editorial appraisals of the significance of the coup and counter coup and many requests from my colleagues for my views, I would stress that these are mere occurrences in a land of inherent political instability and that more such events can be expected in the future. Also, I would emphasize that the December 15–16 coups in Panama better than anything I can say illustrate the criminal stupidity of the treaty proposals to cede to Panama any sovereignty over the Canal Zone or any part in the management and defense of the Panama Canal.

This situation is in nowise a casual one that can be shrugged off by the United States. Our Nation has a tremendous responsibility involved and must keep its authority unimpaired. It is naive and stupid to think otherwise. The fate of the world may depend on what we do at Panama and all experience shows that it is best for Panama, the United States, and the world at large for the United States to continue its undiluted authority in the premises.

Mr. Speaker, starting on October 27, 1969—Theodore Roosevelt's Birthday—more than 100 Members of this body have sponsored identical resolutions that oppose cession of any sovereign rights or jurisdiction over the Canal Zone and Panama Canal to any other nation or any international organization. Because of the imperative necessity for making the position of our Government clear, I urge prompt action by the House on the indicated resolutions that were referred to the Committee on Foreign Affairs,

which committee has not yet acted thereon.

PARENTS LOSE COOL ON DRUG ABUSE

(Mr. MEEDS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MEEDS. Mr. Speaker, among the new entrants in the American language is the phrase, "Don't blow your cool." This admonition was first served up to us over-30 types by young people who later classified most adults as "up tight."

Working on behalf of effective drug abuse education legislation, I and my colleagues on the Select Education Subcommittee had to confront this phenomenon. Drug abuse, we found, often opens the widest chasm between the generations.

We learned that the motives for using and abusing drugs are as important to education as the chemical properties of the sustenances themselves. Presenting the facts and offering sympathetic counseling will do more for effective education than will the table-pounding, jail-threatening approach. Indeed, the "hard line" method may actually harm education, for it can cause young people to "turn off" completely.

Some how-not-to-do-it methods are illustrated very clearly in a recent Wall Street Journal article written by Jack Morris. The drug education bill passed by the House on October 31 is an attempt to make facts and understanding prevail over the fear and fantasy described so well by Mr. Morris. Mr. Speaker, I include the article in the RECORD at this point:

PANICKED PARENTS: HASTILY FORMED GROUPS SPRING UP ACROSS UNITED STATES TO FIGHT DRUG PROBLEM—THEY SEEK TO HALT SPREADING USE BY YOUTHS, BUT TACTICS OF SOME CALLED UNSOUND—HARD-LINE APPROACH IS BEST

(By Jack H. Morris)

A Smithtown, N.Y., citizens committee, alarmed over the growing use of drugs by teen-agers, recommends that all high school students be given blood and urine tests to determine who's using what. The school board in Clifton, N.J., considers imposing saliva tests. Parents in Montgomery County, Md., outside Washington, urge school authorities to ban publications and muzzle teachers that suggest marijuana laws be liberalized. And under parental pressure, the Grossmont High School District near San Diego attacks the problem by expelling drug experimenters in wholesale lots.

Such developments are taking place in hundreds of suburbs and small towns. Across the country parents' groups and concerned citizens are banding together in committees, councils and ad hoc organizations to "do something"—almost anything—to combat the drug problem.

"Parents are in a panic and they simply don't know how to proceed," says John Barringer, director of health programs in the Tucson schools.

WIDENING THE GAP

In New York state, where a recent survey found parents more concerned about drug abuse than muggings, unemployment, racial tension or poor schools, 57 communities have launched drug study groups since last spring and state officials say 72 more groups are being formed. At least four committees are operating at the state level in Massachusetts; so many local bodies are digging into the problem there that regional councils have been set up to keep track of them all. Indeed, in many communities around the nation it's not uncommon to find a formal committee appointed by the board of education or town government vying for expert witnesses and newspaper publicity with a loosely organized group of overwrought parents.

The Nixon Administration is giving strong backing to the use of local committees to attack the drug problem, though perhaps not to some of their more extreme activities. Earlier this month the President told a conference of 41 governors that "we all must go back to our communities and wage a campaign—a campaign of education and information" about teen-age drug abuse. Mr. Nixon added that while he had previously thought that the answer to the drug problem "was simply to enforce the law," he now sees the solution in the hands of local groups of parents and educators.

The primary concern of most committees is to prevent more youngsters from being drawn into drug use. Many groups claim that their reasoned approach has struck a responsive chord among potential experimenters. Some have received small Federal grants to help carry on their projects. Nevertheless, there is growing concern among the nation's health officials that many of the parents' groups, however well-meaning, may be widening the generation gap by their frenzy.

IT CAN'T HAPPEN HERE

"It's frightening to see so many of these committees handing out information on a subject on which they have only fragmentary knowledge at best," says Dr. George Mizner, professor of psychiatry at the University of Colorado Medical Center and a student of the "drug culture." In many cases, he adds, high school students are better informed about drugs than their parents or teachers.

Many suburban and small-town parents are uninformed about drugs because until recently they simply could not believe the problem would arise in their orderly communities—and thus largely ignored it. But now they are coming face to face with the drug crisis.

Domenic Conti, a real estate salesman in the Philadelphia suburb of Willingboro, N.J., for instance, was so taken aback recently when his PTA group learned that dozens of children were sniffing glue in the woods behind an elementary school that he immediately formed Code W, an organization to alert to parents to the drug danger. "This just hit us right square between the eyes," recalls Mr. Conti. "We had no idea this was was going on here."

VISITORS UNWELCOME

The Montgomery County War on Narcotics League had much the same beginning. It was hammered together last spring by Malcolm Lawrence, the former commercial attache to the U.S. embassy in Switzerland, who had just returned to the Washington area with his nine children. When two of his children reported they had been offered marijuana during their first week of school, he jumped into action.

In a seven-point plan of attack, his group last month urged the Montgomery County Board of Education to censor "mind-bending" literature and dismiss teachers who counsel known drug users instead of turning them over to police. Other proposals include: Closing the school ground to unauthorized persons, compelling students to remain at school for lunch (on the theory they might meet a pusher if they walked home) and closing down the school smoking area (Mr. Lawrence believes it is difficult to tell what students are smoking).

So far, the board has taken no action. It has its own advisory committee, which has just concluded a survey of student attitudes toward drugs. That group is headed by a professor of government at Georgetown University and counts a number of doctors, psychiatrists and educators, plus three students, among its 17 members.

It was a similarly prestigious committee composed of a state district court judge, an attorney, a physician who has worked with narcotic addicts, a Methodist minister and a 17-year-old high school student, that proposed blood and urine tests in Smithtown, N.Y. The tests, which would cost about $3.50 each, wouldn't detect marijuana or LSD, two of the more popular drugs among students. But they could spot use of barbiturates, amphetamines or morphine derivatives.

Although the New York Chapter of the American Civil Liberties Union has threatened to sue if any child is forced to take these tests without his parents' permission, John V. N. Klein, Smithtown supervisor, contends the committee's stand has been well received in his Long Island suburb. Another of the recommendations calls for a speakers bureau to ferret out and condemn any voices in the community that say marijuana isn't a dangerous drug or that minimize the drug problem.

The hard-line Smithtown approach contrasts with the increasingly lenient view of marijuana use being taken by a number of national health officials and narcotics experts.

"A youngster who smokes one marijuana cigaret isn't a dope fiend," Dr. Stanley F. Yolles, director of the National Institute of Mental Health and associate administrator of the Department of Health, Education and Welfare, told a Senate subcommittee hearing in September. "It is extremely unfortunate," he added, "that by the continued exaggerated emphasis on the supposed dire evils of marijuana smoking, we make it extremely difficult to tell people what the real risks of use of specific kinds of drugs are."

POLLS UNDERSCORE CONCERN

A few community groups share this attitude. At United Community Services of Metropolitan Boston, which advises several local drug committees, staffer Marion Freeman tells member groups: "You must distinguish between drug use and abuse. If you preach total abstinence, forget it." She suggests that "safe" drugs be approached the same way alcohol usually is, stressing temperance and sensible use. "I'm not saying you must teach the pleasures of drugs, but at least you must be honest in explaining their dangers," she adds.

But such views apparently aren't widespread among adults. In a nationwide poll in September, Sindlinger & Co., an opinion research firm, found 91% of the public is concerned over teen-agers' use of marijuana, 85% oppose its being legalized and 84% express the fear that marijuana is very harmful to the user. (By contrast, only 33% view alcohol as very harmful.) Similar findings were uncovered in a Gallup poll in October.

"I'm positive that a hard-line approach is the best way," says Rexford Hall, a retired lumber dealer and the former president of the school board for the Grossmont High School District in California, where 342 students have been expelled in the past two years for using drugs. Although the public supports the school's policy of automatic dismissals, a committee of teachers and professionals in the area has asked the board to reconsider and to distinguish between youthful experimenters and hardened pushers.

The major weapon in most drug committee arsenals is education—and they aim it at parents as well as students. Chemicals that smell like marijuana are burned at PTA meetings so parents can tell whether that odor in their son's room is really pot. Booklets are prepared cautioning mothers to keep tab on their children's belongings—a lost transistor radio or misplaced clothing may

have been exchanged for drugs—and to be alert to changes in their offspring's personality or behavior.

CHANGES IN CURRICULUMS

Some teachers fear the groups are overdoing it. After reading one group's booklet describing the effects of various drugs, a Maryland teacher exclaims: "My God, after a day in class with these kids, I've got all the symptoms—tiredness, depression, red eyes, hypertension. . . ."

Parent groups in nearly every state are clamoring for changes in school curriculums. Most seek improved drug education classes and the introduction of such classes at the junior high or elementary level. But other groups are criticizing courses they feel are too explicit.

For example, schools in several California and Arizona cities have come under attack for courses exploring why students use drugs. Opponents contend such courses encourage students to make individual choices instead of relying on the traditional values of church and home. Teachers in other systems have been berated for prying when, to illustrate the positive as well as negative aspects of drugs, they asked students to list items found in their family medicine chests.

There is some justification for this uneasiness. Consider this question being asked fifth-grade students this fall in Saratoga Calif.: "A person should never try LSD . . . (A) With others present (B) Without an older companion present (C) In the morning (D) All of the above. The answer listed as correct is B.

OUT OF CONTEXT?

The question was drafted by Raytheon Co., the Lexington, Mass., Defense contractor, which has branched into educational publishing. Company spokesmen contend the question is taken out of context from material dealing with safeguards for those youngsters who are going to use drugs regardless of their harmful effects. "We certainly don't favor indiscriminate use of this material—it's pretty straight-forward—but we don't believe you should keep kids ignorant and hope for the best, either," a spokesman says.

Daniel Ungaro, superintendent of the Saratoga schools, says that some of the Raytheon questions are "terrible" but that the material comes on film strips and it isn't easy to edit out sections without destroying the continuity. Also, he says, the company's material in general is far better than much of what is being passed off as drug information today. "Some of the stuff we've seen makes (drug) trips look so good that the kids would be eager to take them," he says.

To help combat erroneous material, the National Institute of Mental Health is supplying schools and drug committees across the country with reams of factual material on drug use, which it claims is neither "screechy nor preachy." Armed with an $800,000 appropriation, the agency has handed out some 11 million pieces of literature and thousands of posters, radio spots and TV scripts since March. A volunteer committee of businessmen in Washington, D.C., stuffed more than a million pieces of NIMH material in utility, bank and business billings last month.

The NIMH program is aimed at the suburban teen-ager. A psychedelic poster asks this question about drugs: "Will they turn you on, or will they turn on you?" And a radio commercial with an acid rock beat strikes chords of idealism by reminding youngsters they can change what's wrong in the world if they keep their heads—straight. A separate campaign for ghetto youths plays on black pride by depicting heroin as "slavery, 1969."

A number of parents' groups have gone beyond education to attack what they believe to be the root cause of drug use. A committee formed by Lenape Regional High School, Medford, N.J., has just opened a phone line, manned by trained volunteers who will listen to student gripes, complaints and problems on any subject. "We're finding that those who use drugs often have no communication with their parents," a leader of the organization says. "If we give them someone to tell their troubles to, they'll be less likely to turn to drugs."

PESTICIDE CONTROL

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, I was delighted to find the editorial which follows in the Meriden Journal of December 8.

The promptness with which this newspaper responded to my statement advocating greater control over pesticides clearly shows the public support in this country for legislation directed at this goal.

Since the editorial speaks for itself I simply append it to my previous statement for the information and illumination of my colleagues:

MONAGAN FOR PESTICIDE CONTROL

U.S. Rep. John S. Monagan has joined the battle for more rigid control of pesticides. He is drafting legislation that would grant to the Secretary of Health, Education and Welfare authority to ban or limit the use of pesticides whenever their use presents a potential health hazard. The bill would also give the Secretary of the Interior authority to cancel the registration of pesticides if they constitute a danger to fish or wildlife, or to environmental contamination.

Monagan in a recent speech claimed the Department of Agriculture ignored a total of more than 1,600 objections registered by HEW to proposed registrations on grounds of health and safety. He said the department had consistently failed to take prompt cancellation action in cases of this kind. Monagan, chairman of the Special Studies Subcommittee of the House, accused USDA of a "public be damned" attitude in failing to establish procedures for warning pesticide purchasers of potential hazards.

The Federal Insecticide, Fungicide and Rodenticide Act provides that before pesticides can be sold in interstate commerce a manufacturer must register his product with the Department of Agriculture and attest to its safety and efficacy. Up to now, more than 45,000 pesticide formulations, involving more than 900 individual compounds have been registered.

Monagan has raised his voice with special emphasis in a cause that needs strong support. The recent moves against DDT have made the public aware of dangers which have been too poorly comprehended. But DDT still has its defenders, and they command strong influence in Washington. They would like to take shelter under the wing of the Department of Agriculture, for most of them are farmers. Evidently the department has listened sympathetically to their complaints.

SURVEY FAVORS LICENSING OF OPERATORS OF RECREATIONAL BOATS

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, on December 8 I introduced H.R. 15140, a bill to provide for a coordinated boating safety program. In my remarks following the introduction, I stated that the growing popularity of recreational boating had brought with it many problems. These, I noted, were the increasing number of deaths due to carelessness in the operation of these boats; increasing numbers of personal injuries, increasingly costly property damage, and a host of problems for the U.S. Coast Guard, as well as for States having recreational boating programs.

If enacted, I stated that the provisions in my bill could substantially ameliorate many of the problems now plaguing the sport of recreational boating. I further stated that one of the benefits which I hoped would result from passage of my bill would be the certification of all operators of recreational boating—that this one factor alone would amply reduce the present high death and accident rate on our waterways.

I am encouraged now to see that certification of operators of recreational boats is recognized by boaters themselves as a necessity for safety on our waters. In a survey of 10,000 boat owners recently undertaken by Boat Owners Association of the United States, 69.9 percent favor licensing or certification of all boat operations.

This BOA survey received eminent attention by Mr. Dick Handler, whose excellent column, "Sportsmen's Corner" is a regular feature of the Waterbury-American of Waterbury, Conn. Because I believe all persons interested in recreational boating should have an opportunity to see the BOA survey as it appears in Dick Handler's December 4 column, I include the column in the RECORD:

SPORTSMEN'S CORNER

(By Dick Handler)

Over two-thirds of the nation's boating public surveyed in an extensive poll has virtually asked for licensing of all recreational boat operators, according to results of the survey taken by the Boat Owners Association of the United States.

The results of the nationwide survey of 10,000 boatmen across the country show that 69.9 per cent favor licensing or certification of all boat operators. The Boat-U.S. Survey results, which were made at five major boat shows during 1968 and a mail poll of members of the survey organization, conflict directly with previous industry-sponsored surveys and the views of a number of state and federal boating administrators.

The report categorized the 10,000 replies into four major classifications: Geographical region, operator experience, size of boat and power boat vs. sailboats. In each instance the report shows a majority of boatmen heavily favoring the licensing of operators.

According to the survey, the attitude of boatmen toward licensing appears to be fairly uniform throughout the various geographical boating regions. The margin by which all areas favored licensing was in the 60 percentile range, except for the New York Area (New York, Connecticut, New York, Connecticut, New Jersey), which showed a high of 73 per cent.

The Boat-U.S. report cites the operator's license to be the strongest apparent influence on attitude toward licensing. Of boatmen with three or more years of experience, 67.6 per cent favor licensing, while those with less than three years experience favored licensing by 81.4, by far the largest plurality in any category.

The survey results indicated the owner of the larger size boat is less inclined toward licensing than the smaller boat owner. Although owners of boats 26 feet and over reported to be 65.4 percent in favor of licensing, owners of boats under 26 feet voted a significantly higher 71.2 per cent in favor.

Sailboat and power boat operators showed little difference in opinion on the licensing issue. A total of 71.1 per cent of the sailboat operators voted in favor of licensing as did 68.2 per cent of the power boat operators.

The results of the survey show an unexpected endorsement for the most stringent control alternatives presented in the survey. The report indicates 78 per cent favor licensing ALL boat operators rather than limiting licensing to only certain age groups or certain types of boats. In addition, 52 per cent report favoring a licensing program, administered by states under standards set up by the federal government rather than by either the state or federal government alone.

Another surprising result of the survey is the attitude of boatmen about the qualifications for an operator's license. The highest vote, 46 per cent of those surveyed, favored a written and operating test, while 38 per cent called for the completion of an approved course as the qualification for an operator's license.

Geographically, the licensing or certification for operators of pleasure boats was favored by 62.6 per cent in the Northeast (Rhode Island, New Hampshire, Vermont, Massachusetts, Maine); 66 per cent in Mid Atlantic (Pennsylvania, Maryland, Delaware, Virginia, Washington, D.C.); 67.3 per cent in Southeast and Gulf area (North and South Carolina, Georgia, Alabama, Mississippi, Louisiana and Texas); 65.4 per cent in Florida; 68.3 per cent in Midwest area (Illinois, Wisconsin, Michigan, Minnesota); and 62.9 per cent in all other states.

In licensing, 81.4 per cent of those with under three years experience favored it, 67.6 per cent in the three or more years group, and 75.9 per cent of those who did not specify their experience.

Favoring licensing were 71.2 per cent of the owners of boats under 26 feet, 65.4 per cent in the 26-foot and over group and 69.9 of those who did not specify the size of their boat.

In the power vs. sail group, 68.2 per cent of the power owners favored licensing while 71.1 per cent of the sail favored it. Another 69.9 per cent of the boat owners who did not specify their type of boat favored licensing.

On the question of who should be licensed, 77.6 per cent said all operators, 8.9 per cent said certain age groups and 13.5 per cent said certain boat types. On the subject of what qualifications, 38.4 per cent said complete approved course, 13.8 per cent said written test, 46.2 per cent said written and operating test and 1.6 responded "other."

Asked whether the state or U.S. government should do the licensing, 23.2 said federal government, 24.6 said states, and 52.2 said states under federal standards.

The survey was taken by mail within the Boat-U.S. Organization, an almost-10,000-member group, and at the five major 1968 boat shows: New York, Boston, Suffolk Downs, Washington and Chicago.

A uniform 8x5 inch preprinted poll card was used. Each card listed the questions. Each completed poll card was checked for duplication. More than one card received from the same person, or member of a family (same surname and address) were excluded from tabulation. All poll cards collected or received by mail were turned over to an independent auditor for data reduction and compilation.

The survey corroborates the results of a sampling involving 1,600 responses conducted by Boat-U.S. in 1967. In that poll, 67 per cent of the respondents favored licensing.

THE ANNUAL BOXCAR SHORTAGE CRISIS: NEW PROPOSAL FOR AN OLD PROBLEM

(Mr. MIZE asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MIZE. Mr. Speaker, India and the other developing nations suffer from chronic distribution and storage equipment shortages at harvest time. Much of the crop in those struggling lands is lost each year to rat and insect infestation, weather damage, and the other hazards that grain is vulnerable to when not properly protected.

Storage facilities must be available throughout the year in widely diverse locations, but transportation facilities must be kept in reserve—or used for other purposes—during the growing seasons to be called upon at harvest time for fully responsive, efficient, and timely movement of produce to major terminals and processing centers.

Our technicians have so advised agribusiness and government representatives in the third world.

Regrettably, the United States suffers from the same infirmity and the situation in our case is wholly inexcusable.

Mr. Speaker, at this moment millions of bushels of grain are lying out on the ground in the Middle West, exposed to the elements and subject to substantial losses. This distressing condition is caused by a chronic boxcar shortage which has escalated to crisis proportions in the western regions.

This annual loss, this example of national inefficiency, must be countered and overcome before the next harvest season.

A NEW PROPOSAL FOR AN OLD PROBLEM

The solution to this technically complex and heretofore baffling problem may have been devised at last. The proposal has come—not from the shippers and producers or from the Interstate Commerce Commission—but from the affected railroads themselves. It is the culmination of an intensive 4-year study commanding the best brains in the business.

The plan realistically acknowledges that railroads, when it becomes economically advantageous to "hoard" boxcars belonging to other lines and pay assessed per diem rates, will do so rather than return them to their owners.

The harvest season brings with it huge localized transportation demands for limited periods of time. It should be clear that no system of regulating the distribution of boxcars is acceptable unless it has the ultimate effect of inducing eastern and southern lines to return cars to the Midwest and Far West during the harvest season. This new proposal takes positive steps to achieve the essential flow of cars to points of critical need.

Per diem rates for control of foreign boxcars are to be increased to realistic levels, and the destructive "mileage" requirement is to be eliminated. Mileage payments have the effect of discouraging the very result most hoped for, for lines will pay the lower per diem rate while awaiting cargo to move in the direction of the boxcar's destination.

Workable incentive rates may be imposed by the ICC in cases of localized shortage, to effectively require a flow to the area of most critical need.

Together these various penalties and per diem assessments, based entirely on "time held" and not on "mileage traveled," will encourage railroads to divest themselves of foreign cars when those cars are desperately needed elsewhere. Railroads will further be encouraged to increase their own inventory of rolling stock.

In 1966, I was a cosponsor of legislation which was designed to eliminate localized boxcar shortages. The bill became Public Law 89–430, but the ICC reported that it could not implement the system of incentives contemplated in the act. Needless to say, the problem did not go away.

Therefore, I am today introducing legislation to implement the plan that I have been discussing. It establishes per diem rates and permits the ICC to impose additional penalties for boxcar hoarding. It has been devised by those who must live with it—the railroads that have been frustrated year after year in their efforts to provide top-flight service to their customers.

This legislation is the result of an exhaustive study, and I join thousands of shippers and millions of producers in the sincere hope that it will solve this embarrassing problem. It is particularly embarrassing since the western lines have looked to Government to assist them in solving it for so many years and they have looked in vain.

I urge the earliest possible hearings and prompt action by Congress on this legislation, for we must insure that effective steps are taken before the annual period of crisis rolls around next year.

PASSPORT OFFICE

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, the other body has added to the supplemental appropriations bill, H.R. 15209, the amount of $310,000 for the Passport Office of the State Department. In view of the recommendation of the Director of the Office that a passport issuing facility be established in Connecticut, this addition is good news for our State.

Since this bill has already passed the House, it is not possible to effect any change in the original bill but I want to express the hope that the conferees will leave this item in the bill during their discussions of the different versions of the two bodies.

The critical nature of the passport problem in Connecticut needs no further advertising and the need for action is obvious. If this addition, which was made through the efforts of Senator DODD, can be retained in the bill it will help to provide in Connecticut the type of service that should be made available to applicants for passports.

RECESS

The SPEAKER. The Chair declares the House in recess subject to the call of the

Chair. The bells will be rung 15 minutes before the House reconvenes.

Accordingly (at 3 o'clock and 2 minutes p.m.), the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 5 o'clock p.m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate agrees to the support of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2577) entitled "An act to provide additional mortgage credit, and for other purposes".

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2543. An act to prohibit the movement in interstate or foreign commerce of horses which are "sored," and for other purposes.

CONFERENCE REPORT ON S. 2577, LOWERING INTEREST RATES, FIGHTING INFLATION, HELPING SMALL BUSINESS, AND EXPANDING THE MORTGAGE MARKET

Mr. PATMAN. Mr. Speaker, I call up the conference report on the bill (S. 2577) to provide additional mortgage credit, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 18, 1969.)

Mr. PATMAN (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with, since the report is available now and is printed.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. GERALD R. FORD. Mr. Speaker, reserving the right to object, will the distinguished chairman of the committee or other members of the committee take some time to explain the conference report for the benefit of the membership?

Mr. PATMAN. Certainly.

Mr. GERALD R. FORD. Mr. Speaker, I withdraw my reservation of objection.

Mr. PATMAN. And adequate time will be yielded to the minority.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER. The gentleman from Texas is recognized for 1 hour.

Mr. PATMAN. Mr. Speaker, the conference committee on the disagreeing votes of the two Houses on S. 2577 met in conference yesterday and agreed to the following conference language:

First, regarding the extension of regulation Q, the House insisted upon and prevailed in its position that regulation Q authority be extended to March 22, 1971, in place of the Senate provision which would have provided an extension of this authority only to September 22, 1970.

Second, the language in both bills concerning extension of rate control authority to nonfederally insured financial institutions was almost identical. The provisions contained in the House and Senate bills on this subject were adopted without objection in both Houses and affect only the State of Massachusetts. The language adopted in the conference provides temporary authority to extend Federal deposit rate control over nonfederally insured financial institutions where State officials lack comparable authority and only in those instances where noninsured savings deposits in the State exceed 20 percent of total savings deposits. It is anticipated that the State authorities in Massachusetts will move immediately to extend their authority over these noninsured institutions as soon as the State legislature can consider this matter.

Third, the language contained in the House bill which would have established a secondary market authority for the Federal Home Loan Bank System was adamantly disagreed to by the Senate and the conference report does not contain this provision.

Fourth, the language in the House bill over which there was no disagreement and which would simplify the premium structure of the FSLIC and make additional funds available for housing was accepted by the Senate conferees.

There was little difference between the language of the House and Senate which would provide authority to the Federal Reserve Board to establish rate regulations and reserve requirements for commercial paper issued by banks or bank holding companies. The House language prevailed in conference.

The language in both bills was identical concerning the establishment of authority for the Federal Reserve Board to establish reserve requirements on Eurodollar borrowings.

The House-passed bill changed the law for national banks and would have allowed them to make mortgage loans up to 90 percent of the appraised value of the property and permit maturities up to 30 years, instead of the present limit for maturities up to 25 years. There was no similar language in the Senate bill. This language was deleted in conference based on the reasoning that there had been no indication whatsoever that national banks wanted or would take advantage of this liberalized authority to make loans on home mortgages.

Regarding the FDIC and FSLIC insurance, the House bill provided for an increase in the maximum insurance protection for commercial banks and savings and loan deposits from the existing $15,000 to $25,000. The Senate bill contained no similar language. The Senate conferees agreed with an increase in principle, but insisted and prevailed in their view that the amount should be increased from $15,000 to $20,000, and not to the $25,000 as contained in the House bill.

The House bill provided for Presidential standby authority to request the Federal Reserve to institute selective credit controls when necessary to curb inflation. Comparable Senate language provided for the suspension of our antitrust laws to permit reinstatement of the Korean war-type of voluntary credit control agreements. The conferees decided that both provisions should be included in the legislation, based on the rationale that the President should have all necessary powers and discretion to fight inflation, including both standby credit control authority and the right to encourage voluntary agreements to restrain credit. Therefore, the conference report before you contains both the House and Senate language on this subject.

The House amendment provided authority for the use of $70 million of direct lending for the Small Business Administration in its small business investment company loan program. The Senate conferees agreed to accept the House language with an amendment so that any possible constitutional question would be eliminated. The conferees, however, it should be noted, were insistent upon the principle contained in Title III of the House bill, namely that the $70 million of funds be made available immediately for the small business investment company program out of the business loan and investment funds.

Finally, the Senate bill contained language which amended the Federal Home Loan Bank Act to provide authority for the purchase by the Secretary of the Treasury of Home Loan Bank obligations in an amount of an additional $3 billion. The Senate amendment also amended the provision of this section relating to the terms and conditions of such purchases.

The House insisted upon the addition of a further amendment to make sure that the additional borrowing authority would be of some practical assistance to the housing industry and thereby accepted the Senate language with an amendment to the effect that this new authority contain a direction as to the circumstances of its utilization. The determination of whether and when these circumstances arise involves the exercise of judgment and the responsibility for this decision as contained in the proposed agreed language would rest ultimately with the Secretary.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Speaker, I would like to ask the distinguished chairman of the committee this question: There is some concern in Texas that this application of Federal regulations to uninsured savings and loans or uninsured banks would affect a bank in Texas. Does the gentleman understand this to be the situation?

Mr. PATMAN. It is my understanding that it applies exclusively to Massachusetts and to no other State.

Mr. DE LA GARZA. And the legislative

history is such that the amendment is drafted so as to make the letter of the law applicable only to the State of Massachusetts. Is that correct?

Mr. PATMAN. That is right.

Mr. DE LA GARZA. I thank the gentleman.

Mr. PATMAN. Next is the creation of a secondary market for conventional home mortgages through the Federal Home Loan Bank System.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Iowa.

Mr. GROSS. Is the gentleman now dealing with section 206?

Mr. PATMAN. Yes, title II of the House bill. We agreed to accept both, I will state to the gentleman from Iowa—one which the House passed with reference to it and also the voluntary one passed by the Senate, the Korean war title.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Ohio.

Mr. BOW. In the House bill as it passed, as I recall there was a provision providing that if there were insufficient funds appropriated, that the Small Business Administration should immediately advise the executive branch and the executive branch should clear the item so as to provide the funds. I see by the report that the gentleman is filing that that language has been stricken; am I correct in that?

Mr. PATMAN. That is correct.

Mr. BOW. I thank the gentleman and, in my opinion, that action helps to improve the bill considerably.

Mr. Speaker, I will now yield such time as he may consume to the gentleman from New Jersey (Mr. WIDNALL).

Mr. WIDNALL. Mr. Speaker, our chairman has accurately described what took place in the conference, and actually many of the things that were in the motion to recommit are now embodied in the bill. I think the one point that caused a great deal of controversy on the House floor was the question of controls, and the conferees in their wisdom decided to accept both the Senate version and the House version, and give the option to the President if he felt controls were necessary to be invoked, even controls as were voluntary controls during the Korean war period that were embodied in the Senate bill, and the ones embodied in the House bill.

We feel that this is a satisfactory solution to the impasse that we had reached within the conference.

The other measures that have been taken have eliminated some of the high points of the controversy when the bill was on the House floor, and while the three minority members on the conference did not sign the conference report, this was because we had not seen it in final form as drawn up, and there was some question of some language that we felt had to be resolved in our own minds.

This has been resolved, and I believe that all three Republican conferees—or minority conferees—will vote for passage of the measure and I would urge adoption of the conference report.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, I thank the gentleman for yielding.

Let me see if I get this straight on the subject of authority for institution of credit controls: section 205 of the House bill, there was no change in that; is that correct, insofar as the House version?

Mr. PATMAN. No change in that part. The only change we added on is the authority to institute voluntary controls.

Mr. GROSS. Was there any change in section 206, the extent of controls and the eight paragraphs contained therein which delegate in my opinion unconscionable power to the President to invoke controls? Was there any change in this?

Mr. PATMAN. Well, of course that is a matter of opinion, but we do not think it is unusual. The President does not have to use this. You know, in controls, if you wait until they must be put on right then, it causes much more trouble than if you anticipate the possibility of controls in advance, and give that power to the President. Knowing that power is there, it has some effect by itself, and then later on if the President wants to apply the controls to a part or all of the economy it is up to him to do it.

Mr. GROSS. I have no desire to prolong this here this afternoon—this was pretty well debated the other day, the extent of these controls—but the gentleman is saying to me categorically that there was no change in section 206, extent of controls?

Mr. PATMAN. In section 205 there is no change.

Mr. GROSS. I beg the gentleman's pardon?

Mr. PATMAN. There is no change in section 205.

Mr. GROSS. There is no change, they remain the same? What about section 206?

Mr. PATMAN. I have not gotten to section 206. The gentleman asked me to yield, and I went back to the particular question the gentleman asked, but there was a little change in section 206.

Under (10) the Board, upon being authorized by the President under section 205 and for such period of time as he may determine by regulation:

(10) prescribe maximum ratios, applicable to any class of either creditors or borrowers or both, of loans of one or more types or of all types.

(A) to deposits of one or more types or of all types.

(B) to assets of one or more types or of all types.

(11) prohibit or limit any extensions of credit under any circumstances the Board deems appropriate.

Then the gentleman is saying, you added two more paragraphs to the nine that are enumerated in the bill; is that correct?

Mr. PATMAN. That is correct.

Mr. GROSS. The gentleman mentioned September 22, 1970, I believe, as being too close to an election. Since when has the gentleman from Texas become gun shy with respect to an election or to politics?

Mr. PATMAN. It is not the politics of it so much as the fact that Congress probably would not be in session at that time. It would be a deadline at a time when Congress would not be in a position to give much consideration, and that is really the argument that persuaded us in this respect.

Mr. GROSS. Let me take this opportunity to compliment the gentleman from Texas as being the greatest optimist in the Congress and in this country, if he thinks that this Congress is not going to be in session next September 22. This is beyond comprehension—here we are almost on Christmas eve and we are in session. I hope the gentleman is right, but I fear that even with his long experience here, he is misjudging the situation that may prevail next year.

Mr. PATMAN. I am hopeful that we will get through earlier next year and oftentimes that does happen in an election year.

Mr. BARRETT. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. Mr. Speaker, just 2 days ago the House passed S. 2577 after substituting the language of H.R. 15091, as amended. Passage was by a vote of 259 yeas to 136 nays. As I said on Wednesday, this bill is vital to those in need of decent housing and a protection to those who are paying exorbitant interest rates, and also in the best interests of the country as an anti-inflationary measure. The action of the House on Wednesday was a display of responsibility and a manifestation of congressional concern over the tight money policies of our Government and the continuing inflation of our economy.

We now have before us the conference report on that measure, reconciling the differences between the House and Senate. This measure reaffirms the congressional desire and intent to take action against the inflationary pressures in our economy. It provides several methods to supply much-needed funds to the home mortgage market under conditions which it is hoped will tend to lower home mortgage interest rates. One of these is an increase in the insurance of savings accounts in federally insured banks and savings and loan associations from $15,000 to $20,000.

The measure also provides much-needed funds to small business through the SBA. And from the viewpoint of credit restraint provides the authority and tools for selective areas of control.

I strongly urge its adoption by the House.

Mr. MADDEN. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Indiana.

Mr. MADDEN. Mr. Speaker, I want to commend the chairman and the ranking member as well as the members of the Committee on Banking and Currency for this conference report which possibly may be the most outstanding piece of legislation we have passed in this session of the Congress so far as get-

ting the country back on the track economically.

I want to call your attention to the Wall Street Journal of this morning in reference to a statement by Arthur F. Burns, the chairman designate of the Federal Reserve Board. I quote from the Wall Street Journal:

BUSINESS AND FINANCE

Easier credit is a possible goal after the contents of the tax bill and budget proposals are known, Arthur F. Burns, chairman-designate of the Federal Reserve Board, told a committee before his Senate confirmation. He said he hopes resolving of doubts about the Nixon Administration's fiscal policy will lay the foundation for easing credit "within the next two to four weeks." His comments buoyed stock prices, with the Dow-Jones industrial average spurting 13.86 points to 783.79, on volume of almost 16 million shares.

Mr. Speaker, I think this Congress in passing this bill by a big, substantial majority last week gave notice to the White House as to how the Congress felt about loosening up and opening up and getting some industries operating and helping small business and making a drive toward reducing interest rates.

This piece of legislation, I think, is what spark-plugged the statement by Mr. Arthur F. Burns. Of course, you read the statement in this morning's paper along the same line where the headline is "Burns Confirmed for Fed, Hints Easier Money Policy."

So, Mr. Speaker, your committee really got the economy of this country moving in the direction of an upward trend.

I have in my hand a letter which I received this afternoon. It comes from the Bank of Indiana, 575 Broadway, Gary, Ind. I shall read one paragraph and then ask to have the remainder of the letter printed in the RECORD:

While our own SBIC cannot benefit, we urge your approval as being beneficial to the country as a whole.

Mr. Speaker, I ask unanimous consent that the entire letter may be printed in the RECORD at this point.

The SPEAKER pro tempore (Mr. DELANEY). Is there objection to the request of the gentleman from Indiana?

There was no objection.

The letter is as follows:

BANK OF INDIANA,
Gary, Ind., December 16, 1969.

Hon. RAYMOND J. MADDEN,
House of Representatives,
U.S. Congress,
Washington, D.C.

DEAR RAY: It has been brought to my attention that H.R. 15091, which contains a directive to the President to release the sum of Seventy Million ($70,000,000) Dollars in direct loans for Small Business Investment Companies, may come to a vote on Wednesday or Thursday of this week.

I was unable to reach you by phone and hope that this arrives in time for you to give serious consideration to a vote of approval.

Both Ray Daly and myself have been closely associated with the program for a number of years, both in its infant stage as well as on its current ripening stage, and we are firmly convinced that its horizons and benefits are unlimited.

While our own SBIC cannot benefit, we urge your approval as being beneficial to the country as a whole.

Best personal regards.

T. J. RADIGAN,
Vice President and Trust Officer.

P.S.—For your information, negotiations are again underway to effect a sale of the Hotel Gary. Steve Divich is interested.

Mr. PATMAN. Mr. Speaker, I yield 5 minutes to the distinguished majority leader (Mr. GERALD R. FORD).

Mr. GERALD R. FORD. Mr. Speaker, I appreciate the gentleman from Texas, the chairman of the committee, yielding this time to me. I would like to yield at this time to the gentleman from Ohio (Mr. STANTON) to make some comments, and then I shall follow his remarks.

Mr. STANTON. Mr. Speaker, I appreciate the minority leader yielding. I shall take only a minute or two to explain to the minority Members, who, unitedly on Wednesday night stood in opposition to this bill, what has occurred. As you will remember, it was our side of the aisle that felt that the Senate-passed version, S. 2577, was far superior to the bill that was presented before the House at that time. As a member of the conference, I am proud to tell the minority Members that the conferees did not change more than one or two sentences of the entire S. 2577, the Senate-passed version. That was our motion to recommit.

So I would like once again to impress upon the Members the fact that as we look forward to fighting inflation and creating more housing in this country in the immediate future, that we do not lose track of what the President said, that the most necessary thing we can do in this Congress at this time in this country is to curtail spending in this particular Congress.

Mr. GERALD R. FORD. Mr. Speaker, first, I thank the gentleman from Ohio for laying out the factual situation in relation to the conference report, the bill that went from the House to the conference, the bill that was offered as a motion to recommit by those of us on our side, the bill that came from the committee, and the bill that was passed in the House, which a good many Members on our side thought was an inflationary proposal. We believed then and we believe now that the motion to recommit which we offered, which was virtually the Senate bill, was good legislation. It almost passed. I think the vote was 206 to 193. I am delighted that the final version of this legislation as it is in the conference report more nearly reflects the original Senate version and the motion to recommit. The net result is that we have good legislation and not the kind of legislation that left the House and was rammed through the House several days ago.

Mr. PATMAN. Mr. Speaker, I yield to the gentleman from California (Mr. HANNA) such time as he may consume.

Mr. HANNA. Mr. Speaker, I thank the chairman of our great committee for yielding to me. I commend the committee on making available to the country one piece of legislation which I think will have more effect in 1970 than almost anything else the Congress has done, if the President see fit to use all the power made available in this legislation.

I suggest to the Members that, absent constructive changes, we are going to see in 1970 an upward movement in economic activity and a downward movement in the gross national product. An upward movement in price and in unemployment and a downward movement in the standard of living. I suggest the tight money policy standing alone would have kept us in this kind of posture. I am hopeful the administration will see fit to use and will know there are other tools that have to be brought into effect if we are not going to continue to have a depression in those sectors of the economy involving the people least capable of handling it, those people in small businesses, the poor people, the builders, the construction workers, and the people looking to the Government for assistance in the many programs which have helped us since the last depression.

Mr. Speaker, I compliment the chairman and the members of the conference committee for the work they have done.

Mrs. SULLIVAN. Mr. Speaker, as a conferee on the part of the House on S. 2577, I join in urging House concurrence with the conference report. When constituents ask us during the holiday period, Mr. Speaker, what we are doing, or have done, about high interest rates and the unavailability of mortgage funds for the purchase of homes, this bill can be cited a responsible and effective answer. This bill provides the tools to the President of the United States to combat inflation, and to channel credit into those areas of the economy which the national interest dictates.

Instead of big businesses continuing to borrow all of the money they need at whatever interest rate—conscionable or unconscionable—they are asked to pay, necessary funds could be channeled instead into loans for housing, into State and local bond issues to build schools or provide essential needs, into loans for small business, and so on.

The bill before us represents largely a consensus of Democratic members of the House Committee on Banking and Currency. Not all of us were in favor of every single provision, but we all joined in cosponsoring or endorsing a Democratic approach to the serious problem of inflation. I am sorry the minority party conferees from the House decided not to sign the conference report. Eventually, I think they will join us in deciding that the powers we are now giving to the President in this bill will be of tremendous help to a Republican President in saving this country from a continuation and worsening of the credit inflation we are now in.

A BILL TO FIGHT INFLATION, HELP HOUSING AND SMALL BUSINESS

Chairman PATMAN, of the Committee on Banking and Currency, has explained the provisions of the bill as agreed to in conference. The Treasury is being authorized and instructed to lend up to $4 billion to the Home Loan Bank Board, on request of that agency, to lend in turn to savings and loans for home mortgages. We add $70,000,000 of funds to the small business investment companies. We control the inflationary use of Eurodollars now being lent in this country at

very high interest rates. We provide clarification of Federal Reserve Board powers in regulating commercial paper issued by banks and their affiliates—which represents about 10 percent of all commercial paper now being issued. Another part of the bill deals with the much broader problem of commercial paper issued by nonbank sources, which is probably one of the most inflationary trends in the entire economy.

We extend until March 22, 1971, instead of September 22, 1970 as provided in the Senate bill, the power of the regulatory agencies to control interest rates paid by banks on savings accounts, or by savings and loans on share accounts. This authority—regulation Q—expires at the present time at midnight December 21.

FEDERAL INSURANCE ON DEPOSITS

Two of the major provisions of the bill as finally agreed to in conference originated in separate bills I had introduced earlier this year. One is the provision raising the limit of Federal insurance on bank deposits or savings and loan accounts from $15,000 to $20,000, as my bill, H.R. 14836, had provided. In committee, this figure was raised to $25,000, and the House agreed to that. But at the request of the Senate conferees, who had no comparable provision in their bill, we compromised at $20,000. This should bring more money into bank deposits and savings and loans from investors with substantial resources, who are reluctant to keep on deposit in any one account more than the amount covered by Federal insurance.

STANDBY POWERS FOR SELECTIVE CREDIT CONTROLS

The most far-reaching provision of the conference bill is the title of the House bill authorizing standby, selective controls over any or all types of credit. This title is taken from a bill I introduced on November 24, H.R. 14954. We added to it in conference a provision agreed to in the Senate to permit the President to institute a system of voluntary credit controls such as were in effect during the Korean war, including a period during that war when we also had compulsory credit controls over consumer credit and real estate credit.

In conference, we felt that the authority for voluntary controls, involving suspension when necessary of the antitrust laws, gives the President an additional resource to choose from in taking appropriate steps to fight a credit inflation. We do not attempt to dictate what form of credit controls he should seek to impose, if any; the powers are left to his discretion.

TRUSTING THE PRESIDENT WITH BROAD POWERS

The powers conferred upon the President by this legislation cannot solve present inflation problems unless the President chooses to use those powers. It will be up to him. He will have a wide choice of weapons to use in fighting high-interest rates, the mortgage money famine, the curtailment of small business expansion, and the distortion in credit supply.

With the power, of course, goes the responsibility to use the power responsibly. We are willing to trust the President of the United States with broad powers in the credit field, as we do in so many other fields. But if he refuses to use those powers effectively when the economic situation urgently requires their use, then the political responsibility can be clearly placed—and that, too, is important in a democracy.

But we did not write this bill in order to embarrass the President. We wrote it in order to give him the tools a President should have in order to cope with inflation danger. Undoubtedly there will be pressures upon him to use these powers, or some of them, when he thinks they should not be used. Any man who has been given the responsibility to lead this country as President must have the fortitude to resist pressures he deems are not in the public interest; he must also have the courage to use his great powers when the public interest requires, even when the exercise of Presidential power in the public interest is sometimes unpopular. The burdens of the Presidency are many, including the necessity of sometimes doing unpopular things.

But I think the people of the United States would firmly support this President, or any President, in taking courageous steps to stop an inflationary spiral gripping this country, and in getting funds into the housing area where this step is desperately needed, even if that means temporarily courtailing some unnecessary credit expenditures by business or consumers.

WHAT ARE THE RIGHT PRIORITIES IN USE OF CREDIT?

We are blessed with a dynamic, expanding economy which, at the present time, is expanding much more actively in some directions than in others. The question confronting our society is: in what direction do we now need more expansion than in others? Rich as we are, we cannot afford to indulge every economic wish. Should we use the weight of Government to revive the housing industry? It is dying for lack of credit. Should we use the weight of Government to assure expansion of our educational system, our public facilities and equipment, our attack on environmental hazards, and for many other purposes essential to the survival of our way of life? Periodically, in periods of tight money, the things we are obligated as a Government to accomplish are defeated by diversion of capital and resources to less essential purposes.

On November 24, when I first introduced the bill which is now incorporated into this legislation to provide standby authority to the President and the Federal Reserve Board to impose selective controls over any or all forms of credit, I had no idea that this proposal would so quickly find its way into a bill presented to both Houses for a final vote, although I said I would try to have it considered with the legislation then pending to extend regulation Q. I believe it is the first time credit controls of this far-reaching nature have been brought before Congress. The authority to control consumer and real estate credit was first given to Government in World War II by Executive order of President Roosevelt under wartime powers. In 1950, Congress wrote similar powers into the Defense Production Act, after the start of the Korean war. In 1951, Congress repealed that power, and we have never had it available since then. In 1966, the House Committee on Banking and Currency accepted an amendment to the Defense Production Act sponsored by Congressman REUSS and I to restore standby authority for consumer and real estate credit. It was defeated on the House floor. Now we are voting on a bill which extends similar authority not only over consumer and real estate credit but over all forms of credit. On Wednesday, the House upheld this proposal. In conference yesterday, the Senate Conferees agreed to this idea, along with the proposal the Senate had passed suspending the antitrust laws to permit voluntary agreements by the credit industry to ration credit.

The House conferees from the majority side were willing to accept this Senate provision when the Senate conferees agreed at the same time to accept our proposal for broad powers to regulate credit. We did not instruct or order the President on which form of credit controls or regulation he should use—we give him the power to use both types, or either, or none at all.

BACKGROUND OF CREDIT CONTROL TITLE OF BILL

Following, Mr. Speaker, is the press release issued on November 24 on the introduction of the bill which became title II of this measure dealing with standby credit controls.

As will be noted, there is no compulsion on the President to act. But there is an expectation that, as President, he will weigh carefully and with an objective mind the need for using these powers when the necessity arises.

The news release referred to follows:

MRS. SULLIVAN INTRODUCES BILL FOR STANDBY POWERS TO REGULATE ALL FORMS OF CREDIT, INCLUDING BUSINESS CREDIT

Within hours after Secretary of the Treasury David M. Kennedy was quoted as believing standby controls over consumer credit "may be necessary", Congresswoman Leonor K. Sullivan (D-Mo.) today introduced a bill to authorize the President to order the regulation not only of consumer credit terms but of all business credit, too, including so-called commercial paper.

The regulatory powers could be exercised only after the President made a finding that they were needed "to prevent or control inflation generated by the extension of credit in an excessive volume." The Board of Governors of the Federal Reserve System would administer the controls, at the President's direction, deciding the maximum amount of loans, minimum down payments, maturity periods, and the rates which can be charged.

"Secretary Kennedy's statement in the papers this morning that standby credit controls 'may be necessary' had nothing to do with my decision to introduce the bill," Mrs. Sullivan declared. "But it is interesting to me that he recognizes now the possible need for such legislation. I tried to get him to endorse the idea during hearings of the Banking and Currency Committee months ago, but he would not do so at that time. My new bill has been in preparation for many weeks, and was finally delivered to me by the Office of the House Legislative Counsel on Friday afternoon, so it was my intention to introduce it today in any event."

Congresswoman Sullivan, a ranking Member of the Committee on Banking and Currency and Chairman of its Subcommittee on Consumer Affairs, has tried for three years

to get standby consumer credit controls enacted into law. An amendment agreed to in the Banking Committee in 1966 to restore such powers to the Defense Production Act of 1950 was defeated in the House Floor.

She revived the effort in 1967 in the original version of the bill which became the Consumer Credit Protection Act of 1968, which includes the Truth in Lending Act, but the consumer credit controls provision was dropped in Committee for lack of support at that time.

During hearings of the Banking Committee in June of this year on the increase in the prime rate, Mrs. Sullivan again brought up the possible need for standby controls over rates and terms of consumer credit transactions, and also raised the question of a need for regulatory powers over the terms of business credit. She pointed out then that so-called commercial paper, issued by banks and finance companies to raise short-term funds from corporations and big investors, was not subject to Federal regulation of any type.

Federal Reserve Board Chairman William McChesney Martin conceded at those hearings that commercial paper could be inflationary and contribute to the increase in interest rates generally. He said the possibility of Federal regulation of such credit should be studied.

Under the Sullivan bill introduced today, the President could authorize the Federal Reserve to "regulate and control any or all extensions of credit, for such periods as the President directed. Among other things the Board could:

(1) require registration or licensing of credit grantors;

(2) prescribe the maximum amount of credit which could be extended in connection with any loan, purchase, or other extension of credit;

(3) prescribe maximum maturity, minimum periodic payments, and maximum periods between payments;

(4) set rates;

(5) obtain injunctions;

(6) institute actions for both civil and criminal penalties for violations. Maximum penalties would be $1,000 fine and 1 year in jail.

The bill is entitled the "Credit Control Act."

Congresswoman Sullivan declared: "A predominant part of the Administration's fight against inflation seems to be devoted to the effort to tighten availability of credit, through higher and higher interest rates. This effort has had the effect of pricing moderate cost housing, small business, and state and local agencies, out of the market for credit. It has not stopped inflation.

"Rather than continue to ration credit by price alone, I think the American people would be glad to have the burden of fighting inflation spread more evenly across all elements of the economy, by requiring reasonable restrictions on those forms of credit which are most inflationary. Obviously, there is far greater demand for credit than funds available, and under those circumstances, the big corporations which can afford to pay whatever rate is charged are getting all of the credit they need, while the home buyer, and the small businessman, and governmental subdivisions are out in the cold.

"Selective credit controls, which this bill would authorize, could be utilized to channel credit into those activities which best serve the national interest, rather than, as at present, those which return the highest profit. I am sure everyone in the home building industry will welcome this approach, and so will every citizen whose living costs have risen so sharply because of the high cost of borrowing money."

Mrs. Sullivan said she will try to have her bill considered either as part of other legislation now before the Banking Committee dealing with interest rates paid by banks and savings and loans to depositors, or as a separate measure.

Mr. PATMAN. Mr. Speaker, I find it rather strange that our minority friends are now embracing the conference report on S. 2577 as if it were their bill. This is our Democratic bill. No one will be mislead by the vote on the conference report on this legislation. One need only look at the conference report to see who signed the report. It will be noted that the Democrats from both bodies signed the report, but no House Republicans did. This should make the facts evident and the play by our minority friends obvious.

Mr. GROSS. Mr. Speaker, if this conference report is approved without a rollcall vote, I want the RECORD to show that I am opposed to it as I was 2 days ago when it originally passed the House.

This legislation provides untrammeled power to the President to delegate to the Federal Reserve Board, a private financial institution, life and death control over the credit of this Nation and its citizens.

This without even the declaration of an emergency.

Mr. Speaker, this is the kind of power of which dictators are made.

It is provided, for instance, that "transactions or persons or classes of either to be registered or licensed."

Literally interpreted, this means that it would be illegal for one person to make a loan or extend credit to another unless he or she was licensed or registered.

It is also provided that the Federal Reserve Board would have the authority to "prescribe the maximum rate of interest, maximum maturity, minimum periodic payment, maximum period between payments, and any other specification or limitation of the terms and conditions of any extension of credit."

These are only two of a long list of the most drastic restrictions conceivable.

Mr. Speaker, had this legislation provided that the President "upon the declaration of an emergency" could proceed to invoke such controls upon the people of this nation I would have been constrained to support it. No such condition is imposed.

As I said in debate on this measure 2 days ago, "this is unconditioned power No President should seek and should refuse if granted to him."

I realize that this country is in financial trouble. Through the years I have warned of the consequences that would flow from the wild spending in which this Government has indulged. I have warned, too, that a financial breakdown would unquestionably result in unholy delegated powers being vested in the Executive of this huge Central Government.

Here is another warning, written into the law of the land, for all to see.

Mr. PATMAN. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

Mr. GERALD R. FORD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 360, nays 4, answered "present" 2, not voting 67, as follows:

So the conference report was agreed to.

The Clerk announced the following pairs:

Mr. Moss with Mr. Lipscomb.
Mr. Pucinski with Mr. Brock.
Mr. Rees with Mr. MacGregor.
Mr. Conyers with Mr. McCarthy.
Mr. Kluczynski with Mr. Landgrebe.
Mr. Fallon with Mr. Hastings.
Mrs. Griffiths with Mr. Morse.
Mr. Hébert with Mr. Hall.
Mr. Edwards of California with Mr. Powell.
Mr. Fisher with Mr. Ashbrook.
Mr. Carey with Mr. Reid of New York.
Mr. Whitten with Mr. Reifel.
Mr. Clay with Mr. Tunney.
Mr. Lowenstein with Mrs. Chisholm.
Mr. Anderson of Tennessee with Mr. Cunningham.
Mr. Andrews of Alabama with Mr. Burton of Utah.
Mr. Clark with Mr. Cederberg.
Mr. Abbitt with Mr. Lukens.
Mr. Alexander with Mr. Latta.
Mr. Baring with Mr. Kleppe.
Mr. Fulton of Tennessee with Mr. Watkins.
Mr. Eckhart with Mr. Pelly.
Mr. Hays with Mr. Martin.
Mr. Gallagher with Mr. Berry.
Mr. Hicks with Mr. Cahill.
Mr. Diggs with Mr. Kirwan.
Mr. Corman with Mrs. Sullivan.
Mr. Long of Louisiana with Mr. Montgomery.
Mr. Pepper with Mr. Rostenkowski.
Mr. St Germain with Mr. Sisk.
Mr. Stephens with Mr. Miller of California.

Mr. BRAY and Mr. BROWN of Michigan changed their votes from "nay" to "yea."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. PATMAN. Mr. Speaker I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to and to include extraneous material.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

CONFERENCE REPORT ON S. 3016, ECONOMIC OPPORTUNITY ACT AMENDMENTS OF 1969

Mr. PERKINS submitted the following conference report and statement on the bill (S. 3016) entitled "An act to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, to authorize advance funding of such programs, and for other purposes":

CONFERENCE REPORT (H. REPT. No. 91–778)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3016) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, to authorize advance funding of such programs, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

That this Act may be cited as the "Economic Opportunity Amendments of 1969".

TITLE I—EXTENSION OF THE ECONOMIC OPPORTUNITY ACT OF 1964 AND RELATED PROVISIONS

EXTENSION OF ECONOMIC OPPORTUNITY ACT

SEC. 101. (a) Section 161 of the Economic Opportunity Act of 1964 (redesignated section 171 by section 201 of this Act) is amended (1) by striking out "for which he is responsible", and (2) by striking out "three" and inserting in lieu thereof "five".

(b) Sections 245, 321, 408, 615, and 835 of such Act are each amended by striking out "three" and inserting in lieu thereof "five".

(c) Section 523 of such Act is amended by striking out "two" and inserting in lieu thereof "four".

AUTHORIZATION OF APPROPRIATIONS

SEC. 102. (a) For the purpose of carrying out the Economic Opportunity Act of 1964, there are hereby authorized to be appropriated $2,195,500,000 for the fiscal year ending June 30, 1970, and $2,295,500,000 for the fiscal year ending June 30, 1971.

(b) Notwithstanding any other provision of law, unless expressly in limitation of the provisions of this section, of the amounts appropriated pursuant to subsection (a) of this section for the fiscal year ending June 30, 1970, and for the next fiscal year, the Director shall for each such fiscal year reserve and make available not less than $328,900,000 for the purpose of local initiative programs authorized under section 221 of the Economic Opportunity Act of 1964, and the remainder of such amounts shall be allocated, subject to the provisions of section 616 of such Act, in such a manner that of such remaining amounts so appropriated for each fiscal year—

(1) $890,300,000 shall be for the purpose of carrying out parts A and B of title I (relating to work and training programs);

(2) $46,000,000 shall be for the purpose of carrying out part D of title I (relating to special impact programs);

(3) $20,000,000 shall be for the purpose of carrying out part E of title I (relating to special work and career development programs);

(4) $811,300,000 shall be for the purpose of carrying out title II, of which $398,000,000 shall be for the Project Headstart program described in section 222(a)(1), $90,000,000 shall be for the Follow Through program described in section 222(a)(2), $58,000,000 shall be for the Legal Services program described in section 222(a)(3), $80,000,000 shall be for the Comprehensive Health Services program described in section 222(a)(4), $62,500,000 shall be for the Emergency Food and Medical Services program described in section 222(a)(5), $15,000,000 shall be for the Family Planning program described in section 222(a)(6), and $8,800,000 shall be for the Senior Opportunities and Services program described in section 222(a)(7);

(5) $12,000,000 shall be for the purpose of carrying out part A of title III (relating to rural loans);

(6) $34,000,000 shall be for the purpose of carrying out part B of title III (relating to assistance for migrant and seasonal farmworkers);

(7) $16,000,000 shall be for the purpose of carrying out title VI (relating to administration and coordination); and

(8) $37,000,000 shall be for the purpose of carrying out title VIII (relating to VISTA).

If the amounts appropriated pursuant to subsection (a) of this section for any fiscal year are not sufficient to allocate the full amounts specified for each of the purposes set forth in clauses (1) through (8) of this subsection, then the amounts specified in each such clause shall be prorated to determine the allocations required for each such purpose.

(c) In addition to the amounts authorized to be appropriated pursuant to subsection (a) of this section, there are further authorized to be appropriated the following:

(1) $14,000,000 for the fiscal year ending June 30, 1971, to be used for the Special Impact programs described in part D of title I;

(2) $34,700,000 for the fiscal year ending June 30, 1971, to be used for the Special Work and Career Development programs described in part E of title I;

(3) $180,000,000 for the fiscal year ending June 30, 1971, to be used for the Project Headstart program described in section 222(a)(1);

(4) $32,000,000 for the fiscal year ending June 30, 1971, to be used for the Legel Services program described in section 222(a)(3);

(5) $80,000,000 for the fiscal year ending June 30, 1971, to be used for the Comprehensive Health Services program described in section 222(a)(4);

(6) $112,500,000 for the fiscal year ending June 30, 1971, to be used for the Emergency Food and Medical Services program described in section 222(a)(5);

(7) $15,000,000 for the fiscal year ending June 30, 1971, to be used for the Family Planning program described in section 222(a)(6);

(8) $3,200,000 for the fiscal year ending June 30, 1971, to be used for the Senior Opportunities and Services program described in section 222(a)(7);

(9) $15,000,000 for the fiscal year ending June 30, 1971, to be used for the program of assistance for migrant and seasonal farmworkers described in part B of title III; and

(10) $50,000,000 for the fiscal year ending

June 30, 1971, to be used for Day Care projects described in part B of title V.

PARTICIPATION OF CHILDREN IN HEADSTART PROJECTS

SEC. 103. Paragraph (1) of section 222(a) of the Economic Opportunity Act of 1964 is amended by adding at the end thereof the following new sentences: "Pursuant to such regulations as the Director may prescribe, persons who are not members of low-income families may be permitted to receive services in projects assisted under this paragraph. A family which is not low income shall be required to make payment, or have payment made in its behalf, in whole or in part for such services where the family's income is, or becomes through employment or otherwise, such as to make such payment appropriate."

AMENDMENTS WITH RESPECT TO LEGAL SERVICES PROGRAM

SEC. 104. (a) Section 222(a)(3) of the Economic Opportunity Act of 1964 is amended by striking out "counseling, education, and other appropriate services" and inserting in lieu thereof "legal counseling, education in legal matters, and other appropriate legal services".

(b) Section 222(a)(3) of such Act is amended by adding at the end thereof the following: "Members of the Armed Forces, and members of their immediate families, shall be eligible to obtain legal services under such programs in cases of extreme hardship (determined in accordance with regulations of the Director issued after consultation with the Secretary of Defense): *Provided*, That nothing in this sentence shall be so construed as to require the Director to expand or enlarge existing programs or to initiate new programs in order to carry out the provisions of this sentence unless and until the Secretary of Defense assumes the cost of such services and has reached agreement with the Director on reimbursement for all such additional costs as may be incurred in carrying out the provisions of this sentence."

EMERGENCY FOOD AND MEDICAL SERVICES

SEC. 105. Section 222(a)(5) of the Economic Opportunity act of 1964 is amended to read as follows:

"(5) A program to be known as 'Emergency Food and Medical Services' designed to provide on an emergency basis, directly or by delegation of authority pursuant to the provisions of title VI of this Act, financial assistance for the provision of such medical supplies and services, nutritional foodstuffs, and related services, as may be necessary to counteract conditions of starvation or malnutrition among the poor. Such assistance may be provided by way of supplement to such other assistance as may be extended under the provisions of other Federal programs, and may be used to extend and broaden such programs to serve economically disadvantaged individuals and families where such services are not now provided and without regard to the requirements of such laws for local or State administration or financial participation. In extending such assistance, the Director may make grants to community action agencies or local public or private nonprofit organizations or agencies to carry out the purposes of this paragraph. The Director is authorized to carry out the functions under this paragraph through the Secretary of Agriculture and the Secretary of Health, Education, and Welfare in a manner that will insure the availability of such medical supplies and services, nutritional foodstuffs, and related services through a community action agency where feasible, or other agencies or organizations if no such agency exists or is able to administer programs to provide such footstuffs, medical services, and supplies to needy individuals and families."

NEW SPECIAL EMPHASIS PROGRAMS AUTHORIZED

SEC. 106. Section 222(a) of the Economic Opportunity Act of 1964 is amended by adding at the end thereof the following new paragraphs:

"(8) An 'Alcoholic Counseling and Recovery' program designed to discover and treat the disease of alcoholism. Such program should be community based, serve the objective of the maintenance of the family structure as well as the recovery of the individual alcoholic, encourage the use of neighborhood facilities and the services of recovered alcoholics as counselors, and emphasize the reentry of the alcoholic into society rather than the institutionalization of the alcoholic. Of the sums appropriated or allocated for programs authorized under this title, the Director shall reserve and make available not less than $10,000,000 for the fiscal year ending June 30, 1970, and not less than $15,000,000 for the fiscal year ending June 30, 1971, for the purpose of carrying out this program.

"(9) A 'Drug Rehabilitation' program designed to discover the causes of drug abuse and addiction, to treat narcotic and drug addiction and the dependence associated with drug abuse, and to rehabilitate the drug abuser and drug addict. Such program should deal with the abuse or addiction resulting from the use of narcotic drugs such as heroin, opium, and cocaine, stimulants such as amphetamines, depressants, marihuana, hallucinogens, and tranquilizers. Such program should be community based, serve the objective of the maintenance of the family structure as well as the recovery of the individual drug abuser or addict, encourage the use of neighborhood facilities and the services of recovered drug abusers and addicts as counselors, and emphasize the reentry of the drug abuser and addict into society rather than his institutionalization. Of the sums appropriated or allocated for programs authorized under this title, the Director shall reserve and make available not less than $5,000,000 for the fiscal year ending June 30, 1970, and not less than $15,000,000 for the fiscal year ending June 30, 1971, for the purpose of carrying out this program."

TECHNICAL AMENDMENT REGARDING TIME OF APPROPRIATIONS OBLIGATION

SEC. 107. (a) Section 242 of the Economic Opportunity Act of 1964 is amended by inserting after the first sentence thereof the following new sentence: "Funds to cover the costs of the proposed contract, agreement, grant, loan, or other assistance shall be obligated from the appropriation which is current at the time the plan is submitted to the Governor.".

(b) All obligations under the Economic Opportunity Act of 1964 which have been heretofore recorded substantially as provided in the amendment made by subsection (a) of this section are hereby confirmed and ratified.

AMENDMENT OF RURAL LOAN PROGRAM

SEC. 108. Section 302(a) of the Economic Opportunity Act of 1964 is amended by striking out "such families, and" and inserting "such families, or".

APPLICABILITY TO TRUST TERRITORY

SEC. 159. Section 609(1) of the Economic Opportunity Act of 1964 is amended by striking out "and title II" and inserting ", title II, title III–A, and title IV".

AMENDMENT TO PROVIDE INCREASED FLEXIBILITY IN USE OF FUNDS

SEC. 110. Section 616 of the Economic Opportunity Act of 1964 is amended by—

(1) inserting after the phrase "10 per centum" the first time it appears in such section, the following: "for fiscal years ending prior to July 1, 1970, and not to exceed 15 per centum for fiscal years ending thereafter;" and

(2) striking out "but no such transfer shall result in increasing the amounts otherwise available for any program or activity by more than 10 per centum" and inserting in lieu thereof the following: "but no such transfer shall result in increasing the amounts otherwise available for any program or activity by—

"(1) more than 100 per centum in the case of any program or activity for which the amounts otherwise available are $10,000,000 or less; or

"(2) more than 35 per centum in the case of any program or activity for which the amounts otherwise available exceed $10,000,000".

ADEQUATE LEADTIME

SEC. 111. (a) Part A of title VI of the Economic Opportunity Act of 1964 is amended by adding at the end thereof the following new section:

"ADVANCE FUNDING

"SEC. 622. For the purpose of affording adequate notice of funding, available under this Act, appropriations for grants, contracts, or other payments under this Act are authorized to be included in the appropriation Act for the fiscal year preceding the fiscal year for which they are available for obligation."

(b) In order to effect a transition to the advance funding method of timing appropriation action, the amendment made by subsection (a) shall apply notwithstanding that its initial application will result in the enactment in the same year (whether in the same appropriation Act or otherwise) of two separate appropriations, one for the then current fiscal year and one for the succeeding fiscal year.

CREDITING SERVICE OF A VISTA VOLUNTEER

SEC. 112. (a) Section 8332 of title 5, United States Code, is amended as follows:

(1) in subsection (b)—

(A) strike out "and" at the end of clause (5);

(B) strike out the period at the end of clause (6) and insert in lieu thereof a semicolon and the word "and"; and

(C) add at the end thereof the following new clause:

"(7) a period of service of a volunteer under part A of title VIII of the Economic Opportunity Act of 1964 only if he later becomes subject to this subchapter."

(2) in subsection (j)—

(A) after "1956," in the first sentence, insert "the period of an individual's services as a volunteer under part A of title VIII of the Economic Opportunity Act of 1964,";

(B) before "volunteer or volunteer leader" in the second sentence, insert "volunteer under part A of title VIII of the Economic Opportunity Act of 1964 or as a "; and

(3) before the period at the end of the last sentence, insert a comma and the following: "and the period of an individual's service as a volunteer under part A of title VIII of the Economic Opportunity Act of 1964 is the period between enrollment as a volunteer and termination of that service by the Director of the Office of Economic Opportunity or by death or resignation".

(b) Section 833 of the Economic Opportunity Act of 1964 is amended by—

(1) striking out in subsection (a) "subsection (b)" and inserting in lieu thereof "section 8332 of title 5 of the United States Code, and subsections (b) and (c) of this section"; and

(2) adding at the end thereof the following new subsection:

"(c) Any period of service of a volunteer under part A of this title shall be credited in connection with subsequent employment in the same manner as a like period of civilian employment by the United States Government—

"(1) for the purposes of section 852(a)(1) of the Foreign Service Act of 1946, as amended (22 U.S.C. 1092(a)(1)), and every other Act establishing a retirement system for civilian employees of any United States Government agency; and

"(2) except as otherwise determined by the President, for the purposes of determining seniority, reduction in force, and layoff

rights, leave entitlement, and other rights and privileges based upon length of service under the laws administered by the Civil Service Commission, the Foreign Service Act of 1946, and every other Act establishing or governing terms and conditions of service of civilian employees of the United States Government: *Provided*, That service of a volunteer shall not be credited toward completion of any probationary or trial period or completion of any service requirement for career appointment."

(c) The amendments made by subsections (a) and (b) of this section shall be effective as to all former volunteers employed by the Unitde States Government on or after the effective date of this Act.

USE OF CLOSED JOB CORPS CENTERS FOR SPECIAL YOUTH PROGRAMS

SEC. 113. (a) Notwithstanding any other provision of law, the Director of the Office of Economic Opportunity shall establish procedures and make arrangements which are designed to assure that facilities and equipment at Job Corps centers which are being discontinued will, where feasible, be made available for use by State or Federal agencies and other public or private agencies, institutions, and organizations with satisfactory arrangements for utilizing such facilities and equipment for conducting programs, especially those providing opportunities for low-income disadvantaged youth, including, without limitation—

(1) special remedial programs;

(2) summer youth programs;

(3) exemplary vocational preparation and training programs;

(4) cultural enrichment programs, including music, the arts, and the humanities;

(5) training programs designed to improve the qualifications of educational personnel, including instructors in vocational educational programs; and

(6) youth conservation work and other conservation programs.

(b) To achieve the objectives of this section, the Director of the Office of Economic Opportunity shall consult with, elicit the cooperation of, and utilize the services of the Administrator of the General Services Administration, and the Secretaries of Agriculture, of the Interior, and of Labor.

PROVISION WITH RESPECT TO DIRECTOR'S AUTHORITY TO DELEGATE FUNCTIONS

SEC. 114. The authority of section 620(d) of the Economic Opportunity Act of 1964 shall not apply to the Legal Services program authorized under section 222(a)(3) of such Act. The Director of the Office of Economic Opportunity shall not delegate the program authorized under such section 222(a)(3) to any other existing Federal agency.

AMENDMENT WITH RESPECT TO WITHHOLDING CERTAIN FEDERAL TAXES BY ANTIPOVERTY AGENCIES

SEC. 115. Upon notice from the Secretary of the Treasury or his delegate that any person otherwise entitled to receive a payment made pursuant to a grant, contract, agreement, loan or other assistance made or entered into under the Economic Opportunity Act of 1964 is delinquent in paying or depositing (1) the taxes imposed on such person under chapters 21 and 23 of the Internal Revenue Code of 1954, or (2) the taxes deducted and withheld by such person under chapters 21 and 24 of such Code, the Director of the Office of Economic Opportunity shall suspend such portion of such payment due to such person, which, if possible, is sufficient to satisfy such delinquency, and shall not make or enter into any new grant, contract, agreement, loan or other assistance under such Act with such person until the Secretary of the Treasury or his delegate has notified him that such person is no longer delinquent in paying or depositing such tax or the Director of the Office of Economic Opportunity determines that adequate provision has been made for such payment. In order to effectuate the purpose of this section on a reasonable basis the Secretary of the Treasury and the Director of the Office of Economic Opportunity shall consult on a quarterly basis.

TITLE II—SPECIAL WORK AND CAREER DEVELOPMENT PROGRAMS

SEC. 201. Title I of the Economic Opportunity Act of 1964 is amended by redesignating part E as part F, by renumbering section 161 (as amended by this Act) as section 171, and by inserting after part D the following new part:

"PART E—SPECIAL WORK AND CAREER DEVELOPMENT PROGRAMS

"STATEMENT OF PURPOSE

"SEC. 161. The Congress finds that the 'Mainstream' program aimed primarily at the chronically unemployed and the 'New Careers' program providing jobs for the unemployed and low-income persons leading to broader career opportunities are uniquely effective; that, in addition to providing persons assisted with jobs, the key to their economic independence, these programs are of advantage to the community at large in that they are directed at community beautification and betterment and the improvement of health, education, welfare, public safety, and other public services; and that, while these programs are important and necessary components of comprehensive work and training programs, there is a need to encourage imaginative and innovative use of these programs, to enlarge the authority to operate them, and to increase the resources available for them.

"SPECIAL PROGRAMS

"SEC. 162. (a) The Director is authorized to provide financial assistance to public or private nonprofit agencies to stimulate and support efforts to provide the unemployed with jobs and the low-income worker with greater career opportunity. Programs authorized under this section shall include the following:

"(1) A special program to be known as 'Mainstream' which involves work activities directed to the needs of those chronically unemployed poor who have poor employment prospects and are unable, because of age, physical condition, obsolete or inadequate skills, declining economic conditions, other causes of a lack of employment opportunity, or otherwise, to secure appropriate employment or training assistance under other programs, and which, in addition to other services provided, will enable such persons to participate in projects for the betterment or beautification of the community or area served by the program, including without limitation activities which will contribute to the management conservation, or development of natural resources, recreational areas, Federal, State, and local government parks, highways, and other lands, the rehabilitation of housing, the improvement of public facilities, and the improvement and expansion of health, education, day care, and recreation services;

"(2) A special program to be known as 'New Careers' which will provide unemployed or low-income persons with jobs leading to career opportunities, including new types of careers, in programs designed to improve the physical, social, economic, or cultural condition of the community or area served in fields of public service, including without limitation health, education, welfare, recreation, day care, neighborhood redevelopment, and public safety, which provide maximum prospects for on-the-job training, promotion, and advancement and continued employment without Federal assistance, which give promise of contributing to the broader adoption of new methods of structuring jobs and new methods of providing job ladder opportunities, and which provide opportunities for further occupational training to facilitate career advancement.

"(b) The Director is authorized to provide financial and other assistance to insure the provision of supportive and follow-up services to supplement programs under this part including health services, counseling, day care for children, transportation assistance, and other special services necessary to assist individuals to achieve success in these programs and in employment.

"ADMINISTRATIVE REGULATIONS

"SEC. 163. The Director shall prescribe regulations to assure that programs under this part have adequate internal administrative controls, accounting requirements, personnel standards, evaluation procedures, availability of in-service training and technical assistance programs, and other policies as may be necessary to promote the effective use of funds.

"SPECIAL CONDITIONS

"SEC. 164. (a) The Director shall not provide financial assistance for any program under this part unless he determines, in accordance with such regulations as he may prescribe, that—

"(1) no participant will be employed on projects involving political parties, or the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious worship;

"(2) the program will not result in the displacement of employed workers or impair existing contracts for services, or result in the substitution of Federal for other funds in connection with work that would otherwise be performed;

"(3) the rates of pay for time spent in work-training and education, and other conditions of employment, will be appropriate and reasonable in the light of such factors as the type of work, geographical region, and proficiency of the participant; and

"(4) the program will, to the maximum extent feasible, contribute to the occupational development and upward mobility of individual participants.

"(b) For programs which provide work and training related to physical improvements, preference shall be given to those improvements which will be substantially used by low-income persons and families or which will contribute substantially to amenities or facilities in urban or rural areas having high concentrations or proportions of low-income persons and families.

"(c) Programs approved under this part shall, to the maximum extent feasible, contribute to the elimination of artificial barriers to employment and occupational advancement.

"(d) Projects under this part shall provide for maximum feasible use of resources under other Federal programs for work and training and the resources of the private sector.

"PROGRAM PARTICIPANTS

"SEC. 165. (a) Participants in programs under this part must be unemployed or low-income persons. The Director, in consultation with the Commissioner of Social Security, shall establish criteria for low income, taking into consideration family size, urban-rural and farm-nonfarm differences, and other relevant factors. Any individual shall be deemed to be from a low-income family if the family receives cash welfare payments.

"(b) Participants must be permanent residents of the United States or of the Trust Territory of the Pacific Islands.

"(c) Participants shall not be deemed Federal employees and shall not be subject to the provisions of law relating to Federal employment, including those relating to hours of work, rates of compensation, leave,

unemployment compensation, and Federal employment benefits.

"EQUITABLE DISTRIBUTION OF ASSISTANCE

"SEC. 166. The Director shall establish criteria designed to achieve an equitable distribution of assistance among the States. In developing those criteria, he shall consider, among other relevant factors, the ratios of population, unemployment, and family income levels. Of the sums appropriated or allocated for any fiscal year for programs authorized under this part not more than 12½ per centum shall be used within any one State.

"LIMITATIONS ON FEDERAL ASSISTANCE

"SEC. 167. Programs assisted under this part shall be subject to the provisions of section 131 of this Act."

And the House agree to the same.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3016) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, to authorize advance funding of such programs, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a new text. The conference report recommends a substitute text for both the Senate bill and the House amendment. Except for minor technical and clarifying differences, this statement describes the actions of the conferees insofar as they recommend changes in the House amendment.

PROVISIONS WITH RESPECT TO LEGAL SERVICES PROGRAMS

The Senate bill provided that none of the funds authorized to be appropriated as additional amounts for carrying out legal services programs during fiscal year 1971 may be used to pay lawyers who are disbarred or suspended from the practice of law. The House amendment contained no comparable provision. The Senate recedes.

The Senate bill prohibited the Director from delegating his authority to carry on legal services programs to other Federal agencies. The House amendment contained no comparable provision. This provision of the Senate bill is retained in the conference substitute.

The Senate bill provided that, in the case of legal services programs, the Governor's veto would apply to any "portion of any contract, agreement, grant, loan, or other assistance" and that the power to override that veto would be a nondelegable power of the President. The House amendment contained no comparable provision. The Senate recedes.

The House amendment, unlike the Senate bill, limited the types of "counseling, education, and other appropriate services" which could be provided under legal services programs to "legal counseling, education in legal matters, and other appropriate legal services". The Senate recedes.

The House amendment contained a provision, which had no counterpart in the Senate bill, which provided that members of the Armed Forces and their families would be eligible to obtain legal services under legal services programs in cases of extreme hardship (determined in accordance with the Director's regulations issued after consulting with the Secretary of Defense). It provided that the costs of providing these services would be reimbursed by that Secretary. The agreement reached in conference retains the provisions of the House amendment in this regard except that it deletes the provision for reimbursement of costs by the Secretary of Defense and inserts in lieu thereof a statement that nothing in this new provision will be construed to require the Director to expand or enlarge existing programs in order to carry out this new directive unless the Secretary of Defense assumes the costs of these services and has reached an agreement with the Director on reimbursement for all such additional costs as may be incurred in carrying out the new provision. The conferees recognize that servicemen, qualifying under legal services guidelines, are presently eligible for such services and are receiving help and representation. No inference is to be drawn that such assistance is to be curtailed or eliminated. It is the understanding of the managers on the part of the House that the Department of Defense is considering developing its own programs to provide these legal services. The inclusion of this new provision is not intended to supplant this effort but rather to offer an alternative which it is hoped the Department will consider.

HEADSTART AND FOLLOW THROUGH

The Senate bill continued in effect the present provisions of law under which Project Headstart programs and Follow Through programs are carried on. In contrast the House amendment repealed the provisions of present law which authorize the Director to carry on Project Headstart and Follow Through programs, and substituted therefor, in a new title IX, provisions for special comprehensive preschool programs and programs providing for intensive Follow Through education for primary school children. The conference agreement adopts the organizational approach of the Senate bill in this regard, so that Project Headstart and Follow Through programs will be carried on, as they are today, under section 222(a)(1) and (2).

The Senate bill amended the existing provision of law relating to Project Headstart programs to provide that under regulations which the Director could prescribe, children who are not members of low-income families could be permitted to receive the benefits of the Head Start program. It provided that a family which is not of low income could be required to pay for these services. The House amendment did not contain this provision. The substitute agreed to in conference adopts this provision but requires, rather than permits, families which are not of low income to pay, or that payments be made on their behalf, for these services.

Headstart regulations presently permit as much as 10% of an individual class to exceed the poverty level with respect to income. The managers on the part of the House, feel that participation in programs carried on under this Act by persons who are not of low income makes a positive contribution to such programs, but feel that the costs of their participation should be provided other than through OEO funds. The managers wish to make clear that the programs are to continue to have a poverty focus and that the very poor children are to have a distinct preference. Participation of higher income children should not be permitted where it might deprive low-income persons of the benefits of these programs. Where their participation is permitted their families should be required to make appropriate payments on account of the benefits they receive or payment should be made on their behalf. This view of the conferees is consistent with the position taken by the Congress with respect to other programs authorized under the Act, such as the comprehensive health services program, that while the very poor should have preference, access to program benefits need not always be limited solely to those below the established "poverty" line.

NARCOTICS AND DRUGS

The Senate bill provided for a new special program to be called a "drug rehabilitation program" and also provided a new special program for Alcoholic Counseling and Recovery. The House amendment provided a somewhat similar program to be called a "Narcotic Addict Recovery Program," but contained no provision comparable to that in the Senate bill relating to the Alcoholic Counseling and Recovery program. The Senate bill reserved $10,000,000 for fiscal year 1970 and $15,000,000 for fiscal year 1971 for the Alcoholic Counseling and Recovery program, and reserved $5,000,000 for fiscal year 1970, and $15,000,000 for fiscal year 1971, for the Drug Rehabilitation program. The conference substitute adopts these provisions of the Senate bill, but it should be noted that the reservations of funds for these programs which are retained in the conference substitute are made subject to the prior reservation of funds for local initiative programs carried on by community action agencies.

SPECIAL WORK AND CAREER DEVELOPMENT PROGRAMS

The House amendment added a new part E to title I of the Act which provided a new authorization for special "Mainstream" programs involving work activities directed at the needs of chronically unemployed poor, and a special "New Careers" program to provide unemployed or low-income persons with jobs leading to new career opportunities. The House bill authorized the appropriation of $110,000,000 for this purpose for fiscal year 1970 and such amounts as may be necessary for the fiscal year 1971. The Senate bill contained no comparable provision. The conference substitute adopts the substance of this provision of the House amendment. However, it deleted the separate authorization of appropriations, and in lieu thereof added to the general section dealing with authorization of appropriations in the amount of $20,000,000 for the fiscal year 1970 and the first fiscal year 1971. The managers on the part of the House are fully aware that the Director has delegated to the Secretary of Labor authority to carry on programs similar to those provided for in this new part. The conferees agreed that those existing programs could continue to be carried particularly, but not exclusively, in connection with the concentrated employment programs, and that the scope of their activities not be reduced by reason of the enactment of this additional provision. It had been the plan of most of the House Managers that the Director would be directed to retain, rather than delegate, this new authority.

They did not insist, however, that he do so; but they do insist that these programs and other manpower and job programs be carried on as originally conceived and designed by the Congress, that there be no reduction in their magnitude, that recent

limitations on eligibility (such as those dealing with older workers) be removed, that the "New Careers" program retain real substance and not be limited to public service activities, that substantive efforts such as those going on at the University of Minnesota be encouraged to improve and continue. In short, the managers on the part of the House will insist that the policies and purposes enunciated by the Congress be adhered to. It is their expectation that under this part special emphasis will be placed on single purpose programs, that programs of limited size and scope will be carried out, especially in rural areas, and that the rural poverty areas will receive an equitable share of the assistance being provided. The Director and/or his delegate administrator of this part will be expected to report to the committee on the policies and progress of these programs biannually beginning six months after the enactment of this Act. The Managers on the part of the House reemphasize and redirect the attention of the Secretary of Labor to the language on page 7 of the House Report (91-684) dealing with manpower programs.

EMERGENCY FOOD AND MEDICAL SERVICES

The House amendment contained a provision, which had no counterpart in the Senate bill, which added a new title X to the Act under which the Director would carry out intensive programs to eliminate hunger and malnutrition. The amendment also repealed the authority in the existing law which provides for an emergency food and medical service program as a special emphasis program to be carried out under section 222(a). The amendment authorized the appropriation of $92,000,000 for the fiscal year 1970 and such amounts as may be necessary for fiscal year 1971 for carrying out this new program. The conference substitute does not contain all of the provisions of the House amendment, but instead substitutes for the existing authority in section 222(a) for carrying out emergency food and medical services the substantive language contained in the House provision, with a minor amendment to assure that the services will be provided only on an emergency basis. The substitute also deletes the requirement in the House amendment that particular emphasis be given to programs which serve the elderly and the extremely young. The conferees wish to emphasize their desire that the Director should encourage the employment of elderly persons as regular, part time, and short-term staff in programs carried on under this paragraph.

AMENDMENT OF RURAL LOAN PROGRAM

The House amendment made an amendment to the provisions of the Act governing the rural loan program. This provision, which had no counterpart in the Senate bill, is retained in the conference report. The managers on the part of the House expect that, with the adoption of this amendment, the Farmers Home Administration will consider applications for loans under this Part to elderly people for the purpose of making repairs and improvements to their homes.

APPLICABILITY TO THE TRUST TERRITORY

The House amendment contained a provision, which did not appear in the Senate bill, to ensure that the benefits of titles III-A and IV of the Act are available in the Trust Territory of the Pacific Islands. The Senate recedes.

ADVANCE FUNDING

The Senate bill provided that appropriations for grants, contracts, or other payments under the Act are authorized to be included in the appropriation Act for the fiscal year preceding the fiscal year for which they are available for obligation. This provision authorizing advance funding had no counterpart in the House amendment. The advance funding provision is retained in the conference substitute.

TIME OF OBLIGATION OF APPROPRIATIONS

The Senate bill provided that funds to cover a contract, agreement, grant, loan, or other assistance shall be treated as obligated at the time the plan is approved by the Office of Economic Opportunity and submitted to the Governor for consideration as required by section 242 of the Act, and also ratifies past practices of the Office of Economic Opportunity which is in accord with this provision. While the House amendment did not contain this provision, the House committee in its report recognized the problem and approved the practice, and the managers on the part of the House agree that it should be included in the conference substitute.

CREDITING SERVICE OF A VISTA VOLUNTEER

The Senate bill provided that service as a VISTA volunteer would be credited as if it were Federal service for purposes of determining retirement benefits under Fedral law. The House amendment did not contain this provision. The House recedes.

AUDIT REQUIREMENT

The Senate bill provided that the Comptroller General shall have access "for the purpose of audit and examination to any books, documents, papers, and records that are pertinent to the financial assistance received by any agency under this title". The House amendment did not contain this provision. The Senate recedes.

USE OF CLOSED JOB CORPS CENTERS FOR SPECIAL YOUTH PROGRAMS

The Senate bill provided that facilities and equipment of the closed Job Corps centers will, where feasible, be made available for use by State or Federal agencies and other public or private agencies, institutions, and organizations, for conducting programs, especially programs providing opportunities for low-income disadvantaged youth. The House amendment did not contain this provision. The House recedes.

AMENDMENT WITH RESPECT TO WITHHOLDING CERTAIN FEDERAL TAXES BY ANTIPOVERTY AGENCIES

The Senate bill provided that, upon receipt of assistance under the Act, the recipient must set aside a portion of the amount received sufficient to satisfy expected liability under the Federal Insurance Contributions Act and the Federal Unemployment Tax Act. It also provided that, upon notice from the Secretary of the Treasury, when any person otherwise entitled to receive funds under the Act is delinquent in paying these taxes, or in depositing withheld income or social security taxes, the Director must suspend payments and provide no further assistance, until the Secretary of the Treasury notifies him that the recipient is no longer delinquent or that adequate provision for payment has been made. The House amendment did not contain this provision. The conference substitute makes major changes in this provision. It does not include the requirement that recipients of assistance under the Act must set aside the amount necessary to satisfy its expected liabilities for taxes under the Acts referred to above. It also provides that when a delinquency occurs the Office of Economic Opportunity, instead of suspending all further assistance, will suspend only so much of the assistance as may be necessary to satisfy the delinquency. Further, it provides that new assistance may be given when the Director determines that adequate provision has been made for paying any delinquency which is outstanding. The conference substitute includes a further provision which states that, in order to effectuate the purposes of the section on a reasonable basis, the Secretary of the Treasury and the Director of the Office of Economic Opportunity must consult on a quarterly basis.

AUTHORIZATION OF APPROPRIATIONS

The Senate bill provided authorizations of appropriations for the fiscal year 1970 of $2,048,000,000. The House amendment in contrast authorized the appropriation for fiscal year 1970 of $2,343,000,000, of which $1,563,000,000 was authorized for carrying on programs for which the House did not make separate authorization of appropriations. The bill agreed to in conference authorizes the appropriation of $2,195,500,000 for the fiscal year 1970.

For the fiscal year 1971, the House amendment authorized the appropriation of such sums as may be necessary. The Senate bill authorized the appropriation for that year of $2,148,000,000, but, in addition, authorized the appropriation of the following:

(1) $14,000,000 for Special Impact programs under part D of title I,

(2) $240,000,000 for Project Headstart programs,

(3) $32,000,000 for Legal Services programs,

(4) $80,000,000 for Comprehensive Health Services programs,

(5) $150,000,000 for Emergency Food and Medical Services programs,

(6) $3,200,000 for the Senior Opportunities and Services programs,

(7) $15,000,000 for assistance for migrant and seasonal farm workers under part B of title III, and

(8) $50,000,000 for Day Care projects under part B of title V.

The conference substitute authorizes $2,295,500,000 for the fiscal year 1971 and authorizes the additional amounts which were authorized by the Senate bill with the following exceptions: (1) an additional authorization of $15,000,000 for family planning programs; (2) the additional amount for Headstart is reduced to $180,000,000; (3) the additional amount for Emergency Food and Medical Services is reduced to $112,500,000.

ALLOCATIONS

The House amendment did not provide allocations to specific programs of amounts appropriated, except to the extent the separate authorizations contained in the House amendment for special work and career development programs, special preschool and Follow Through programs, and intensive programs to eliminate hunger and malnutrition constituted a separate allocation of appropriations.

The Senate bill in contrast provided special allocations for a number of the programs carried on under the Act. These were the following:

(1) $890,300,000 for work and training programs under title I.

(2) $46,000,000 for special impact programs under part D of title I.

(3) $1,012,700,000 for community action programs under title II, of which $338,000,000 would be for Project Headstart programs, $60,000,000 for Follow Through programs, $58,000,000 for legal services programs, $80,000,000 for comprehensive health services programs, $25,000,000 for emergency food and medical services programs, $15,000,000 for family planning programs, and $8,800,000 for senior opportunities and services programs.

(4) $12,000,000 for rural loan programs,

(5) $34,000,000 for migrant and seasonal farm worker programs,

(6) $16,000,000 for administration and coordination under title VI,

(7) $37,000,000 for carrying out VISTA.

The conference substitute adopts the plan of the Senate bill with a major change. As adopted by the conferees, $328,900,000 must

be reserved and made available for each of the fiscal years for local initiative programs carried on under section 221 of the Act, and only the remainder of the appropriations for each such year would be allocated in the prescribed manner. The amount so reserved is not subject to transfer under Section 616 of the Act. The allocations described above are retained in the conference substitute, except that a new allocation of $20,000,000 is made for carrying out the new part E of the Act. It should be noted that the provisions of the Senate bill requiring pro rata reductions in allocations where appropriations are insufficient to make such allocations in full are retained in the conference substitute, but, of course, the funds reserved for local initiative programs would not be subject to such reductions. It should also be noted in considering these allocations that the conference substitute retains the provisions of the Senate bill which require the Director to reserve and make available not less than $10,000,000 for the fiscal year 1970 and not less than $15,000,000 for the fiscal year 1971 for carrying out the new Alcoholic Counseling and Recovery program and to reserve and make available not less than $5,000,000 for the fiscal year 1970, and not less than $15,000,000 for the fiscal year 1971 for carrying out the new Drug Rehabilitation program.

TRANSFERS

Section 616 of the Act authorizes 10 percent of the amount appropriated or allocated from any appropriation for carrying out any program or activity under the Act to be transferred and used for carrying out any other program or activity under the Act, but no such transfer can result in increasing the amount otherwise available for any program or activity by more than 10 percent. The Senate bill amended this provision to permit the transfer of 15 percent of the amount appropriated or allocated for a program or activity for the fiscal year 1970 and 20 percent thereafter. It also deleted the provision which limits the amount which may be transferred to any program or activity. The conference substitute modified the Senate language to provide that no more than 10 percent of the funds appropriated or allocated for one program or activity may be transferred to another program or activity during fiscal 1970 and no more than 15 percent may be so transferred thereafter. With respect to the limitations on the transfers resulting in increases in the amounts available for any program or activity, the conferees agree that for activities or programs for which $10,000,000 or less is available a maximum of 100 percent could be added. For any program or activity for which more than $10,000,000 was available no more than 35 percent may be added.

It should be noted that in at least two respects the agreement of the conferees underscores the overwhelming determination by the House of Representatives on Friday the twelfth of December that title II and the programs authorized thereunder are and must remain Community Action Programs. The elimination of the Murphy amendment relating to the governor's veto power over legal services programs and the provision of a special reservation of funds for local initiative programs underscore the intention of the conferees that the community action program was, and is intended to be, a program locally designed and locally administered. The managers on the part of the House encourage the Director of OEO to explore, along the lines previously mentioned in the House committee report, the opportunities for increased State involvement in poverty programs. It must be quite clear, however, that State domination over program planning, conception, or administration is not intended. Any changes in policy or regulation that would establish a preference for State rather than local determination and local control of community action programs will be inconsistent with the intention of the Congress.

Managers on the Part of the House.

APPOINTMENT OF CONFEREES ON H.R. 15209, SUPPLEMENTAL APPROPRIATIONS, 1970

Mr. MAHON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 15209) making supplemental appropriations for the fiscal year ending June 30, 1970, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Texas? The Chair hears none, and appoints the following conferees: Messrs. MAHON, WHITTEN, ROONEY of New York, BOLAND, FLOOD, and STEED, Mrs. HANSEN of Washington, and Messrs. BOW, JONAS, CEDERBERG, and RHODES.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 15209, SUPPLEMENTAL APPROPRIATIONS, 1970, UNTIL MIDNIGHT TOMORROW

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tomorrow night to file a conference report on H.R. 15209, making supplemental appropriations for fiscal year 1970, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 13111, DEPARTMENTS OF LABOR AND HEALTH, EDUCATION, AND WELFARE APPROPRIATIONS, 1970, UNTIL MIDNIGHT TOMORROW

Mr. MAHON. Mr. Speaker, on behalf of the gentleman from Pennsylvania (Mr. FLOOD) the chairman of the Subcommittee on Labor and Health, Education, and Welfare of the Committee on Appropriations, I ask unanimous consent that the managers on the part of the House may have until midnight tomorrow night to file a conference report on H.R. 13111, making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies for the fiscal year ending June 30, 1970, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. GERALD R. FORD asked and was given permission to address the House for 1 minute.)

Mr. GERALD R. FORD. Mr. Speaker, I take this time for the purpose of asking the distinguished majority leader the program for tomorrow, if he is able to give us that now.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, we will not ask to go over, so we will meet at 12 o'clock tomorrow.

We have outstanding, as the gentleman knows, conference reports on three appropriation bills—for foreign aid, for Labor-HEW, and the supplemental—and on the following bills:

Economic Opportunity Act amendments, Export Control, and Environmental Quality as well as the tax bill. Of course, we know we will not get the tax bill tomorrow, but we will take up as many as possible, hopefully all of these six conference reports, the three appropriation ones and the other three tomorrow, if they are ready tomorrow.

Mr. GERALD R. FORD. Mr. Speaker, I thank the gentleman from Oklahoma.

RESEARCH NEEDED ON MARIHUANA

The SPEAKER pro tempore (Mr. GIAIMO). Under a previous order of the House, the gentleman from Connecticut (Mr. MONAGAN) is recognized for 20 minutes.

Mr. MONAGAN. Mr. Speaker, I have recently urged the establishment of a commission to determine the character or marihuana and the effect of its use in order to provide a firm factual basis upon which to found decisions as to its regulation.

I have said that the facts are not completely known and this is true insofar as ultimate conclusions are concerned. However, there are a few undisputable facts and I should like to set them out here.

Up to the present there has been little research performed relating to the effect marihuana—dihydrocannibol—has on human users and, in turn, the users' impact on our society. Much of the completed work suffers due to methodology. Further, the completed research and other available data has not been adequately pulled together or evaluated.

The active drug compound found in the various forms of marihuana is dihydrocannibol. The quantity of dihydrocannibol present varies with the form of marihuana as grown in different areas of

the world. Thus, the pharmacological and psychological action varies with the type of marihuana that the individual uses. As with any drug the dose-response differs with each individual user. Thus there is a different response to American marihuana, Mexican marihuana, Indian marihuana, Vietnamese marihuana, Turkish marihuana, or hashish, in the individual user. Also, within the past few years dihydrocannibol and some of its active isomers have been successfully synthesized so the problem has been further compounded.

The administration has not moved as fast as it should in taking constructive steps regarding drug abuse. The administration's Control of Dangerous Substances Act of 1969 calls for the delegation of authority to the Department of Justice to classify drugs and to conduct drug research. True, Justice does not have the primary authority to conduct drug research but the Department of Health, Education, and Welfare's Public Health Service and its component units already have the statutory delegation to conduct drug research including marihuana—dihydrocannibol. Justice's proposed legislative authority would be concurrent with existing Department of Health, Education, and Welfare authority. The National Institute of Mental Health of Public Health Service's Health Services and Mental Health Administration—HSMHA—has a Narcotic Addiction and Drug Abuse Addiction Division. The President's Commission on the Causes and Prevention of Violence in its recent report, "Challenging Our Youth," stated:

> We recommend that the National Institute of Health, working with selected universities, greatly expand research on the physical and psychological effects of marijuana use.

The National Institutes of Health—NIH—is another component of the Public Health Service other than HSMHA of which the National Institute of Mental Health is an integral part. It is obvious that the present legislative authority is more than adequate to conduct extensive marihuana—dihydrocannibol— research but what is needed are the necessary ingredients of leadership, direction and funding.

In the recent past we have attempted to discover or create nonaddictive drugs. We were told about the nonaddictive wonders of meperidine—Demerol—vis-a-vis morphine only to discover it, too, was addictive. Later eminent scientists informed the world that other compounds such as phenazocine and pentazocine were nonaddictive. Again with adequate use phenazocine and pentazocine were proven to be addictive—producers of drug dependence. Twenty years ago Food and Drug Administration officials told us that the artificial sweetners, dulcin, and P–4000, were harmful but that the artificial sweeteners, cyclamate and saccharin were considered safe for food and drug use. Did we know better at that time?

But one thing that was clear—there was inadequate research and knowledge available at that time to make a reliable judgment—for within the past months the Food and Drug Administration and other governmental and scientific bodies decided that cyclamates are, in fact, potentially harmful to the user. It is probable that many of these compounds could have been determined to be harmful originally if their sponsors and responsible individuals had performed the necessary research. However, it appears that they, too, were committed to their statements of safety, nontoxicity or nonaddiction to become involved in needed research of the drug's effect on humans.

In the past the terms, "potential analgesic," "narcotic," and "addicting" were equated. The term "narcotic" now has more than scientific significance but our professional scientific spokesman before the Congress does not adequately make this distinction. The American Medical Association, National Academy of Science-National Research Council, and World Health Organization have adopted the general term "drug dependence" with an appropriate modifier designating a specific type, to cover all kinds of drug abuse. We should be aware that individuals may become dependent upon a wide variety of chemical substances that produce central nervous system effects ranging from stimulation to depression. What must be determined is the drug's potential for inducing dependence in certain individuals. Some individuals are more likely than others to abuse or overuse the drug of use and, under certain conditions may develop a dependence. It is in this context that we must act now to conduct research, evaluate the research and reach legal conclusions as to the drug, dihydrocannibol—more commonly used and referred to as marihuana.

In 1960 the authorities arrested 1,700 youths on the grounds of possession and/or use of potent analgesic drugs and/or marihuana. Last year, 1968, 33,000 youths, including 6,000 girls, were arrested for this reason—an increase of nearly 2,000 times in less than 10 years. At present, one out of four major crimes—felonies—are committed by youths under 18 years of age—another large increase of youth participation.

Thus we need to know, if it is possible, just what is the relationship of the increase in drug abuse and use by youth to the increase in crime due to youth.

Basically, this means, therefore, that we must have a scientific basis in reaching conclusions about the effect of marihuana. It is to this end that my bill, H.R. 14981, is directed since it would create a commission for this very purpose. With this commission and with the studies made under its aegis, we would expect to have the knowledge which would enable us to deal intelligently with this drug as in contrast with the emotional, uninformed, and contradictory action that we find today.

QUESTIONS AND ANSWERS IN A LABOR NEWS CONFERENCE, NOVEMBER 11

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. DENT) is recognized for 60 minutes.

Mr. DENT. Mr. Speaker, I thought you would be interested in the questions and answers brought out in a recent Labor News Conference, on November 11. For that reason I am taking the liberty of presenting them to you. They are as follows:

LABOR NEWS CONFERENCE

A top union officer today called for multination agreements to curb the export of jobs and import of products that are having a growing adverse effect on both U.S. workers and industries.

"Soft goods, ceramics, plate glass and steel" are among the industries hard hit by U.S. owned plants along the Mexican border and "in other low-wage countries, particularly in the Far East," said Howard D. Samuel, vice president of the Amalgamated Clothing Workers of America, AFL–CIO. Samuel appeared on Labor News Conference an AFL–CIO produced public affairs interview broadcast Tuesday at 7:35 p.m. (EST), on the Mutual Broadcasting System.

He said that some 200 such plants have been built just south of the Mexican border in the last few years, where wages range as low as "30 cents an hour" for the 20,000 workers they employ. He said that in addition to substandard wages, tax breaks granted by the Mexican government and U.S. "tariff benefits" encourage manufacturers to set up foreign assembly plants.

"Now 'assembly' is a fairly broad word," Samuel stressed, pointing out that it includes "putting together all the components of a television set or a radio . . . or most of the operations in making a shirt, or suit, or a ladies' garment." But, he noted, Mexican consumers get no "benefit out of the manufacturing operations that are being set up there," for "even when things are made within its borders (by U.S. companies), they have to be shipped out."

Samuel said that U.S. textile and apparel imports are "growing 70% a year" in general, and as much as 400% to 500% on some items, but that American consumers gain no advantage in either quality or price. He pointed out that "garments coming from European countries, where the wage levels are considerably lower than wage levels in the United States, are sold for the same or higher prices than American-made garments of the same quality."

"The beneficiary is not the consumer, it is the retailer," he declared, and the retailer "is doing very well, indeed."

Samuel was questioned by Lloyd Schwartz, Washington bureau chief for the Fairchild Publications, and Neil Gilbride, labor correspondent for the Associated Press.

LABOR NEWS CONFERENCE

(Mutual Broadcasting System, program 29, series 9, November 11, 1969.)

Subject: Mexico's Border Industrialization.

Guest: Howard D. Samuel, vice president of the Amalgamated Clothing Workers of America, AFL–CIO.

Reporters: Neil Gilbride, labor correspondent, Associated Press; Lloyd Schwartz, Washington bureau chief, Fairchild Publications.

Moderator: Frank Harden.

MUTUAL ANNOUNCER. The following time is presented as a public service by this station and the Mutual Broadcasting System.

HARDEN. Labor News Conference. Welcome to another edition of Labor News Conference, a public affairs program brought to you by the AFL–CIO. Labor News Conference brings together leading AFL–CIO representatives and ranking members of the press. Today's guest is Howard D. Samuels, vice president of the Amalgamated Colthing Workers of America, AFL–CIO.

A major problem for U.S. workers has been created by policies of both the U.S. and Mexican governments that have encouraged a large number of U.S. companies to set up

plants just south of the Mexican border. Goods produced at shamefully low wages flow into the United States to compete with products made under U.S. labor standards and at U.S. wages. The AFL–CIO is convinced that non-union plants, evasion of Mexican laws and cheap labor production for the high-priced U.S. market, build neither friendship between the two nations, nor economic development on the Mexican side of the border. Here to question Mr. Samuel about the border-jumping problem which is symptomatic of a broader, international problem, and what organized labor believes can and must be done to meet it, are Lloyd Schwartz, Washington bureau chief for the Fairchild Publications, and Neil Gilbride, labor correspondent for the Associated Press. Your moderator, Frank Harden.

And now, Mr. Schwartz, I believe you have the first question?

SCHWARTZ. Mr. Samuel, the Mexican border problem seems to be symptomatic of an even broader issue—growing import competition. Just how serious is this, and what are its dimensions?

SAMUEL. Well, the competition of imports is very serious, and has been growing more serious in the past few years.

It has affected a number of industries, particularly those in the soft goods. It has also affected such industries as ceramics, plate glass, steel.

These imports come not only from Mexico—with the impetus of the Mexican Border Industrialization Program—but also, from many other countries, particularly, the low-wage countries of the Far East.

GILBRIDE. Mr. Samuel, can you put some kind of money figure on that—how large it is—the imports and, perhaps, how many jobs it may be costing American workers?

SAMUEL. I would not know that for all industries, and I am not even sure that those figures are readily available. We know that in Mexico, for example, in the last few years, about 200 plants have been erected under the industrialization program.

Workers there are getting 30 cents an hour—and there are approximately 20,000 of those workers.

Now, I can't say that there have been 20,000 jobs lost. It is not a one-for-one relationship. But, we know that many thousands of jobs have been lost. In some cases, we have been able to trace them directly—on nearly a one-to-one-basis.

GILBRIDE. How does the Mexican border program work?

SAMUEL. The Mexican Government put it into operation about five years ago.

They offer tax benefits. And, the United States offers a tariff benefit. These apply to a company that goes down there and only assembles goods, rather than produces them.

Now, "assembly" is a fairly broad word. It would include, for example, putting together all the components of a television set or a radio set.

It would also mean most of the operations and making a shirt, or suit, or ladies' garment.

The products must then be sent back to the United States—they cannot be sold in Mexico. So, the Mexican consumer does not get any benefit out the manufacturing operations that are being set up.

GILBRIDE. What's the theory behind them not being sold in Mexico?

SAMUEL. Well, Mexico has a very closed border. It is not even a member of the General Agreement on Tariffs and Trades—GATT. Mexico has very restrictive import policies—it permits practically nothing to be imported.

So even, as in this case, when things are made within its borders, they have to be shipped out.

GILBRIDE. Is this making of products at cheap wages and sending them back here, exclusive to Mexico?

SCHWARTZ. This particular policy is, and, of course, it depends a good deal on the fact that Mexico is along our border. This offers a tremendous advantage to companies. Shipping costs are negligible.

SCHWARTZ. Mr. Samuel, traditionally, organized labor has been free-trade-oriented, and opposed to trade barriers. Now we find them sort of in the protectionist corner. Does this make you uncomfortable, or, is there justification in the economics aspects—the loss of jobs, for example?

SAMUEL. Well, I think that some of the old bromides of the 30's really can't be maintained in our current world-wide economy.

I don't think the term "'protectionist," for example, really has much meaning any more, and, I am not sure that the term "free trade" has much meaning any more.

Really, we have to look at imports—international trade—as a major part of our economy. And, we have to apply to it the same kind of planning and programming that we apply to practically every other part of our economy.

SCHWARTZ. Are you willing to accept some voluntary restrictions by other countries—restrictions geared to the growth of our Gross National Product, for example?

SAMUEL. Well, what we are asking for, for example, in our own industry—apparel manufacturing—is voluntary agreements on a multi-national basis. In other words, all countries participating.

These agreements would recognize the growth of our own population and our own consumption. But, they would add an element of regulation to the increasing level of imports, which are at the present time, increasing without any regulation.

SCHWARTZ. Is there any possibility for developing and adopting international labor standards, so that there wouldn't be this disparity in wage scales?

SAMUEL. Number one, I am not sure that there is really much possibility of developing international labor standards. And number two, even if you had them, you wouldn't really get rid of the disparity.

In Korea, for example, the average wage in our industry is 8c an hour. Now, how can you establish minimum wage standards in Korea that would be reasonable in the Korean economy—which would not still maintain a tremendous differential between Korea and the United States?

In other words, you could double and triple the wage in Korea, and it would still be a fraction of what we pay in the United States. So, international wage standards would be good for the people who would benefit from them—the working people—but they would not solve the international trade problems.

GILBRIDE. Well, Mr. Samuel, how can you possibly hope to combat this low-wage competition without, what I think you would call, "protectionist"—that is, I suppose, high tariffs on imports—and quotas?

SAMUEL. Well, as I suggested before, we hope to achieve, in our industry, agreements among all nations, regulating imports among all nations. Incidentally, this would not only regulate imports to the United States. For example, Japan, which has a higher living standard and higher costs than Korea, would also have some kind of regulation to protect it against overwhelming imports from Korea, or the Philippines, or India, which have even lower standards than Japan.

In other words, all nations would be bound by these ties, which would add an element of planning and programming to imports for all countries. Without this, the country with the highest standards of living—which is the United States—is the target of imports from all over the world.

As a result, our imports are climbing, on a generalized basis, at something like 70 percent a year—in apparel and textiles—and on some individual items, as much as four to five hundred percent a year.

Now, this rate of increase is too much for us to support.

We can support a rate of increase which is more moderate. But, we cannot support a rate of increase which is not regulated at all.

GILBRIDE. What is this 70 percent a year gain in imports doing to the industry in the United States and to the workers in that industry?

SAMUEL. Well, as far as textiles and apparel are concerned, we believe that in the last four to five years, we have lost, probably 200 thousand jobs in our industry, largely due to the import factor.

Imports have been particularly harsh in the textile area. But, they are also climbing now in various items of apparel. For example, the knitted sweater industry in this country is almost out of business. Gloves have been very hard hit. Shirts are coming in in tremendous numbers. So are slacks.

Almost every item has been hit to some extent.

GILBRIDE. Well, this certainly seems to be very tough on that industry and the workers in it in this country. Does anybody benefit? Does the average American consumer benefit, through lower prices for imported goods—those made in Japan, or Formosa, or somewhere else?

SAMUEL. Not generally, on a quality basis. We have found—and of course, I can't speak for every garment that is brought into this country, because many manufacturers and many countries are involved—we have found that in many cases, the garment brought here from another country is made under somewhat inferior standards, because the labor is relatively inexperienced and low-paid. There is not much incentive for craftsmenship.

But, even more important, generally, the retail store is benefitting from a much higher mark-up. For example, garments coming from European countries, where the wage levels are considerably lower than wage levels in the United States, are sold for the same, or higher prices than American made garments of the same quality.

The beneficiary is not the consumer, it is the retailer. He is doing very well, indeed.

SCHWARTZ. Mr. Samuel, isn't this low-wage competition just as severe a problem for business as it is for labor? And if so, what is business doing about it? Are they cooperating with labor on this? Is it a joint effort?

SAMUEL. There is no question about the effects on industry. There are limits of course, to joint efforts. But, the textile and apparel industries are working very hard—and generally, in the same direction that the labor movement in those industries is working—that is, to achieve multi-national agreements.

SCHWARTZ. What happens if you don't get these agreements—if Congress does not pass quota laws? What happens to the industry and the jobs?

SAMUEL. I think the industry will probably change radically. It won't disappear, but it will change so radically that the present state of the industry will disappear. It will take some other form. I am not sure what it will be.

I don't think incidentally, that the projections you suggest will happen. I think that if we cannot achieve multi-national agreements on a voluntary basis, Congress will pass a law. There is no question in my mind that some action will be taken.

SCHWARTZ. Is there any evidence that this industry is uneconomic and perhaps just cannot compete, and therefore, is expendable?

SAMUEL. No. As a matter of fact, just the opposite.

There are several reasons why it is useful to have imports. One obvious advantage is that in some industries there isn't much competition among companies and prices rise

immoderately. Imports have a leveling effect on prices in those cases. But, this is not true of textiles and apparel, which are among the most competitive industries in the nation. Prices there, generally speaking, have been below—until at least the very last few months—far below the rate of increase prices of other types of products manufactured in this country.

Secondly, imports can be justified, because they bring in some unusual products that are not made here. Again, this is not true in textiles and apparel. There are foreign designers, it is true, who have unusual design ideas. But, they are immediately hired by American firms.

Our firms can make the same kind of dashing, modern suit that a French firm makes, obviously. There is no special skill involved in that.

Thirdly, there may be some degree of foreign efficiency. That isn't particularly true either, in apparel, because in both cases, the capital requirements are very modest—the sewing machines, cutting tables, cutting machines. Neither foreign nor American firms have any special efficiencies, as far as manufacturing is concerned.

So really, the only benefit that the international trade in apparel and textiles has is that the foreign countries have much lower wage rates.

This is one area where we can't compete. And I don't think this country wants us to compete.

Now, the danger to us is very specific. These industries—apparel and textiles—employ about 2½ million people. It's the largest manufacturing employment of any industry in the country. Many of these employees are women—many are members of minority groups.

Generally, the industry has moderate skill requirements. So, if there is a more severe decline in employment, or a threat of unemployment in our industry, the people who are going to be hurt are Negroes, Puerto Ricans and Mexican-Americans, particularly. They are going to be women. Many of them really don't have great access to other industries—don't have very many skills. I think this is exactly what this nation does not need at the present time.

We are spending a great deal of money, through our poverty programs, manpower training welfare, and so forth to try to make sure that these people—women and members of minority groups—become a part of the labor market. If we continue to allow major imports in these areas, it is going to have just the opposite effect.

GILBRIDE. I take it, Mr. Samuel, that you have discussed this problem with United States government officials, such as, I suppose, the State Department. What kind of answers do you get from these people on this question?

SAMUEL. Well, the Administration, as you probably know, has committed itself to the effort to reach multi-national agreements with other countries. This starts at the White House.

The major job of bringing about these agreements has been entrusted to Secretary Stans, of the Commerce Department. Secretary Stans is in full agreement with these goals. The industry, and labor in apparel and textiles, are working very closely with the Secretary.

The Labor Department also has a certain amount of input and is involved in this.

I would say, in all candor, that in these matters, the State Department is always likely to bring up the rear.

GILBRIDGE. Why is this? Do they want to maintain friendly relations—is that the basic reason?

SAMUEL. I think the State Department is still motivated by the Cordell Hull kind of international trade theory, which was valid back in the 1930's. I think it is less aware of the economic problems that face our country, and really is inspired, almost entirely, by a desire to have smooth and easy relations with other countries.

And, I think it overlooks economic problems at its own doorstep.

GILBRIDE. Well, in trying to get some kind of agreement with another country—what would be the motivation for instance, for Japan to agree to such a thing, if they suddenly found a good market here for their goods?

SAMUEL. Well, Japan, to a certain extent, will serve its own self interests, to a certain extent.

Japan, as I mentioned before, is now beginning to suffer from the pressures of imports from even lower-wage countries. Japan is not a particularly high-wage country, by the way. There, you have something around 35¢ or 45¢ an hour.

But, as I said, Korea is at 8¢—and some other countries are at 10¢ and 15¢. And they are beginning to threaten Japan.

So, if a world-wide agreement is worked out, Japan can also look forward to a good deal more stability.

However, I would point out that Japan, like most countries—except the United States—when it comes to industries such as these, which are vulnerable to international trade—most countries are much, much more—if I may use the word—"protectionist" than we are. It is only the United States that has relatively open doors. The other countries, perhaps learning by our example, have not done this. What we are trying to do, really, is open all doors, including those to countries like Mexico and Japan, which don't permit imports of apparel to some moderate level of imports.

SCHWARTZ. Mr. Samuel, men's and boy's clothing prices are continuing to rise. Apparently, there is another round yet to come. Won't this aggravate the competitive pinch and give foreign made merchandise even greater appeal and advantage in the U.S. market?

SAMUEL. Well, there is a question of fact here. There has been some rise, which was long overdue. And I must say, I represent the union in the men's clothing industry, and the industry does not need me to defend its pricing policies.

But, the fact is, we know that for a long time, the men's apparel, and I think a major segment of the ladies' apparel industry also, lagged behind the price levels of most consumer goods. In the last few months or year, some of those price levels have been forced up. They simply couldn't manage without at least some kind of price increase.

I suppose it would have some effect in our struggle against imports. But, no pattern has appeared as yet. As a matter of fact, the prices of some imports are going up also.

SCHWARTZ. Do you see any sign that manufacturers in your industry and others are prepared to become more competitive by producing lower-priced merchandise or perhaps lower-quality goods?

SAMUEL. I read, in a publication called the Daily News Record, that some manufacturers are looking forward—perhaps, next season—to opening up lower-priced lines—yes.

GILBRIDE. Are some of them, Mr. Samuel, tempted to take their own operations overseas—I think, we call those "runaway companies?"

SAMUEL. Yes. A great many are tempted. Those under contract with the Amalgamated cannot, because they are bound by a union contract that requires that all their production be made under union conditions—Amalgamated's union conditions.

Some non-union companies have taken their production abroad. And some, of course, are now moving into the Mexican border area, which we discussed earlier.

GILBRIDE. Does the United States government seem to encourage this kind of thing, in any way?

SAMUEL. Generally, I think the policy of the United States government is not to encourage it. It is not against the law, however.

There is nothing to prevent a company that does not have a union contract, for example, to, in effect, runaway.

I consider this a very crude form of export of jobs.

I don't think there is any possible benefit to America, when a country closes a plant here and opens it up across the Mexican border, or in Hong Kong, or in Jamaica.

That simply means, we have lost "X number of jobs," and those countries have gained them—at a much lower wage level.

SCHWARTZ. Mr. Samuel, the State Department and the Administration take the position that boycotts of imports are unwise because they interfere with foreign policy. Do you agree with this? Or, is your union waging boycotts or planning to wage some against import competition?

SAMUEL. Yes—the Amalgamated has, Mr. Schwartz. We have instituted several demonstrations—not boycotts. We have done it in New York; we have done it in Chicago, and Los Angeles, and are planning several in other cities. We've done this for several purposes.

First of all, to help concentrate our educational efforts in a single area—to dramatize our policies. And we have received of course, a certain amount of public attention.

We also want to put a little extra bit of pressure on the various agencies of our government—agencies which have the responsibility for carrying out Administration policy, in trying to achieve multi-national agreements.

We are trying to show our government, and the country with which they are bargaining, that there is real feeling and real concern in this country about this issue.

GILBRIDE. Mr. Samuel, isn't there a federal program to help American workers who are displaced by imports?

SAMUEL. There is a section of the Tariff Act which does provide adjustment assistance. I think that until recently—and I have just seen an early article and haven't read the whole thing yet—there had never been a case approved.

The Act is so rigid that it has never been able to be applied. It has been, in effect, simply non-functioning.

GILBRIDE. Well, has no one ever been helped?

SAMUEL. Oh, there have been many applications. All have been turned down. The law is such that, in effect, an industry would have to be wiped out—and some direct connection established between the fact that it was wiped out by imports.

At any rate the rules are so rigid that it has been non-functional.

SCHWARTZ. Mr. Samuel, would you agree that industry generally has been lax in developing export markets? It is claimed that there are large markets for the taking, but that industry has shown little interest in getting into them.

SAMUEL. Well, I can't tell you about all industries. I suppose it is true that in some areas, some industries could be more aggressive

In our industry, it really isn't easy. In the first place, as I indicated before, an awful lot of countries in this world do not permit imports. We are the only ones that really have that wide open door. That is one of the reasons everybody is victimizing us.

You can't export garments to Japan, for example—nothing.

You cannot export any garments to Mexico.

These are two of the great violators of our borders, as far as imports are concerned. And this is true of many other countries. So, you can be just the most aggressive manufacturer, Mr. Schwartz, but there are many borders that you simply can't cross.

SCHWARTZ. Why doesn't this country insist

on a proportional treatment for our own merchandise?

SAMUEL. Well, that is exactly what we are trying to accomplish with the multi-national agreements—that is exactly what we are trying to accomplish.

GILBRIDE. I think, Mr. Samuel, that many people are under the impression that we do have some kind of quota system to limit imports. Is that true in just some industries?

SAMUEL. Yes—it is true, in some instances. I should have mentioned it before, Mr. Gilbride. It is true that we do have the precedent of a multi-national agreement in cotton. The problem is, as soon as the agreement was signed, because it did not include woolen apparel, or textiles, or synthetics, or man-made apparel and textiles, much of the imports began to flow into those areas.

So, what we are, in effect, asking our government is to close the loophole.

We now have an agreement that is working reasonably well in cotton. Now we have to expand it to embrace these other two major areas of textiles and apparel.

SCHWARTZ. Mr. Samuel, would improved industrial technology, for example, help close this competitive gap? How about higher productivity per man-hour?

SAMUEL. Well, in our industry, productivity is pretty well assured, because it is almost entirely piecework. In other words, the worker earns more the faster he works—obviously, under very strict controls, to avoid exploitation. But the fact is, productivity is built in—incentives are built in.

As far as improvements in technology, it is very difficult—in apparel, the least.

Basically, we have not found a way of avoiding two hands and a sewing machine.

In textiles, there has been a tremendous increase in technology. And, I think that will continue.

HARDEN. Thank you, gentlemen. Today's LABOR NEWS CONFERENCE guest was Howard D. Samuel, vice president of the Amalgamated Clothing Workers of America, AFL–CIO. Representing the press were Neil Gilbride, labor correspondent for the Associated Press, and Lloyd Schwartz, Washington bureau chief for the Fairchild Publications. This is your moderator Frank Harden, inviting you to listen again next week. LABOR NEWS CONFERENCE is a public affairs production of the AFL–CIO, produced in cooperation with the Mutual Broadcasting System.

MUTUAL ANNOUNCER. The preceding program time was presented as a public service by this station and the Mutual Broadcasting System. The opinions expressed are solely those of the participants.

ACTIVITIES AND ACCOMPLISHMENTS OF THE JOINT COMMITTEE ON ATOMIC ENERGY IN THE 91ST CONGRESS, FIRST SESSION (1969)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. HOLIFIELD) is recognized for 30 minutes.

Mr. HOLIFIELD. Mr. Speaker, as chairman of the Joint Committee on Atomic Energy, I have directed the preparation of a summary of the activities and accomplishments of the Joint Committee during the first session of the 91st Congress.

The Joint Committee has completed its 23d year of carrying out its legislative and "watchdog" responsibilities of the U.S. atomic energy program. As a charter member of the Joint Committee, I look back with pride at the developments of atomic energy in the past 2 decades. We have seen our defenses strengthened and we have seen the peaceful atom come of age.

This summary report shows, I believe, that the Congress and the Joint Committee have again contributed significantly to the continued leadership of the United States in the peaceful and military applications of atomic energy. The functioning of the committee clearly demonstrates the ability of the Congress to deal effectively in the oversight of this great energy source which portends so much for the future.

I wish to thank all the members of the committee for their close cooperation in the committee's work.

Additionally, at this time, I believe it is worthwhile to provide a general outline, at least as I see it today, of the tentative scope and magnitude of the Joint Committee review of atomic energy matters to take place in the forthcoming second session of the 91st Congress.

As in previous years the committee plans to give priority attention to the fiscal year 1971 authorizing legislation. Hearings on the authorization bill normally begin shortly after it is submitted by the administration.

The Joint Committee plans to schedule public hearings during the week of January 26, 1970, in continuation of its study of the environmental effects resulting from the siting and operation of nuclear, hydro, and fossil fueled electric powerplants. We plan to receive testimony from representatives of State governments, environmental groups, private industry, and the public at large. Testimony was received last fall from Federal agencies having responsibility in this field. The final record, which will result from these hearings will constitute an up-to-date compendium on all effluents from electric powerplants.

It is expected that the initial executive hearing of the Joint Committee will be its annual briefing by CIA on intelligence matters with particular reference to the nuclear capabilities of Communist China and the U.S.S.R.

Also the committee plans to receive an executive briefing early in the session from the Director of the Arms Control and Disarmament Agency on progress and proposed plans relating to the strategic arms limitation talks—SALT—now going on in Helsinki.

Other topics which will probably be considered by the Joint Committee include:

First, a review of the AEC's breeder reactor program. Frankly, as I have already stated in the public record, I am not satisfied with progress in this vitally important endeavor. The committee has noted that this is the highest priority program in the AEC's civilian nuclear power program. The Joint Committee during its review of the 1971 AEC budget, will stress the importance of vigorous pursuit of goals which have been established by the AEC and approved by this committee.

Second, continuing close scrutiny of the matter of the ownership and operation of the AEC's gaseous diffusion plants which supply the enriched fuel needed by the rapidly expanding nuclear power industry. We expect to consider this matter primarily in the context of the committee's review of the AEC's proposed fiscal year 1971 budget request although certain aspects, such as prices for enriching services and antitrust considerations, may be treated separately.

Third, the so-called practical value legislation, which would have the effect of requiring all, or virtually all, applications for a license to construct a nuclear powerplant to undergo a prelicensing antitrust review by the AEC in consultation with the Department of Justice, will also be examined. Affected Federal agencies have already testified on the bills relating to this matter. Next year during our deliberations we plan to hear from representatives of private industry and members of the public.

Commercial Plowshare services legislation, which has already been subject to extensive hearings, will also probably receive legislative consideration.

The committee also plans to review the U.S.-controlled thermonuclear research program, particularly in light of the recent advances in this field made by the United States and the Soviet Union.

In the military field the committee will look carefully into the matter of the need for advanced nuclear-powered submarines to keep pace with the ever-increasing efforts by the Soviet Union in this field.

The committee also expects to analyze the impact of fund reductions on the so-called four safeguards which were instituted at the time of the signing of the Limited Nuclear Test Ban Treaty in 1963 to insure that our national security would not be endangered as a result of compliance with the terms of this treaty.

There are numerous items of proposed legislation now pending before the committee. Executive agency comments on all of these bills have been solicited. Comments on some of the measures have been received; as to others we are still awaiting the views of affected or interested agencies. Depending upon the comments received from these agencies, and depending also on the committee's overall schedule, a number of these bills will be scheduled for hearings during the coming year with a view to committee action thereon during the second session of the 91st Congress.

Consideration may be given to holding hearings on the development, growth, and state of the atomic energy industry.

In the world today atomic energy, which was virtually unkown three decades ago, touches almost every facet of life in America from the missiles that defend us to the civilian power production so vitally needed to take care of our burgeoning population. The impact of the atom ranges from the moon where the nuclear generator, SNAP–27, powers experiments placed there by the Apollo 12 astronauts, to the research and development aimed at placing a small nuclear battery near the heart to permit life to continue which might otherwise be snuffed out.

Mr. Speaker, I include the Joint Committee's summary report of its activities and accomplishments during the first session of the 91st Congress in the RECORD:

ACTIVITIES AND ACCOMPLISHMENTS OF THE JOINT COMMITTEE ON ATOMIC ENERGY IN THE 91ST CONGRESS, FIRST SESSION, 1969

FOREWORD

It has been the practice of the Joint Committee on Atomic Energy at the close of each session of the Congress to submit for the information of the Congress, the Executive Branch and the public a report of its activities. (The report for the second session of the 90th Congress was printed in the Congressional Record of October 11, 1968, S-12585.)

The Joint Committee on Atomic Energy was organized on August 2, 1946. It consists of nine members from the Senate and nine members from the House of Representatives. No more than five from each body can be members of the same political party. The chairmanship alternates between the Senate and the House of Representatives with each Congress.

Present membership is: Chet Holifield, California, Chairman; John O. Pastore, Rhode Island, Vice-Chairman; Melvin Price, Illinois; Wayne N. Aspinall, Colorado; John Young, Texas; Ed Edmondson, Oklahoma; Craig Hosmer, California; John B. Anderson, Illinois; William M. McCulloch, Ohio; Catherine May, Washington; Richard B. Russell, Georgia; Clinton P. Anderson, New Mexico; Albert Gore, Tennessee; Henry M. Jackson, Washington; George D. Aiken, Vermont; Wallace F. Bennett, Utah; Carl T. Curtis, Nebraska; Norris Cotton, New Hampshire.

Congressman William H. Bates of Massachusetts, a most esteemed and valued member of the Committee since January 19, 1959 died on June 22. Representative Catherine May of Washington was appointed on July 24, 1969 to fill the vacancy created by his death.

The Joint Committee is one of the few committees established by statute, rather than by rule of each House and is unique in several respects. For example, it is the only Joint Committee of the Congress with legislative functions, including the receipt and reporting of legislative proposals. The committee is also charged by law with legislative responsibility as "watchdog" of the U.S. atomic energy program. As part of its responsibilities, the committee follows closely the classified activities of the executive agencies, including the Atomic Energy Commission and the Departments of Defense and State, concerning the peaceful and military applications of atomic energy.

In all these activities, the Joint Committee on Atomic Energy, representing the Congress and the public, seeks to assure the implementation of the following statutory policy expressed in the Atomic Energy Act of 1954:

"The development, use, and control of atomic energy shall be directed so as to make the maximum contribution to the general welfare, subject at all times to the paramount objective of making the maximum contribution to the common defense and security * * *."

During the 91st Congress, first session, the Joint Committee met on a total of 52 different occasions, 38 of which were public and 14 of which were executive meetings.

A total of 17 publications consisting of hearings, reports, and committee prints were published or are in the process of being printed by the Joint Committee in its first session of the 91st Congress. These publications include testimony taken in executive session with classified material deleted before printing.

A list of the publications follows: (1969 (91st Cong., first sess.)):

AEC Authorizing Legislation, Fiscal Year 1970:

Part 1: Hearings April 17 and 18.

Part 2: Hearings April 24 and 25.

Part 3: Hearings April 29 and 30.

AEC Report (H. Rept. 91-315; S. Rept. 91-244): June 17 and 18, 1969.

AEC Omnibus Legislation 1969:

Hearings: September 12, 1969.

Report (H. Rept. 91-691; S. Rept. 91-553): November 24, 1969.

Atomic Energy Legislation through the 91st Congress, 1st session: Committee print, December 1969 (available when printed).

Current Membership of the Joint Committee on Atomic Energy, Committee Print, February.

Environmental Effects of Producing Electric Power: Hearings October 28, 29, 30, and 31, November 4, 5, 6, and 7, 1969 (Available when printed).

Future Ownership of Gaseous Diffusion Plants: Hearings July 8 and 9, August 5, 7, and 8, 1969.

LaCrosse Boiling Water Reactor Project: Hearing May 4, 1967.

Naval Nuclear Propulsion Program: Hearing April 23, 1969.

Nuclear Explosion Services for Industrial Applications: Hearings May 8, 9, and July 17, 1969.

Preliminary Antitrust Review of Nuclear Powerplants: Hearings November 18, 19 and 20.

Radiation Standards for Uranium Mining: Hearings March 17 and 18.

Selected Materials Concerning the Future Ownership of AEC's Gaseous Diffusion Plants: Committee Print, June.

Selected Materials on Environmental Effects of Producing Electric Power: Committee Print, August.

I. LEGISLATIVE ACTIVITIES

A. Atomic Energy Commission Fiscal Year 1970 Authorization Act (Public Law 91-44): The review by the Joint Committee of the Atomic Energy Commission's request for authorization of appropriations for fiscal year 1970 was delayed until the incoming Nixon Administration had submitted its budget. The Johnson Administration budget submission was made January 15 and the Nixon revised budget was submitted April 15. The Joint Committee convened its hearings on the AEC request on April 17 to consider the proposed authorization bill (H.R. 10130, S. 1884) and held 14 sessions during the succeeding 8 weeks. Two hearings, to consider the nuclear weapons and naval propulsion programs, were held in executive session because a review of classified data was involved. The record of the public hearings was published in three volumes entitled "AEC Authorizing Legislation, Fiscal Year 1970." A declassified record of the hearing on naval reactors was published under the title "Naval Nuclear Propulsion Program—1969."

Following its deliberations on the proposed measures, the Joint Committee voted to file "clean bills." On June 16, Representatives Holifield, Price and Hosmer introduced H.R. 12167 and Senator Pastore introduced S. 2416. These measures were favorably reported on June 17 (H. Rept. 91-315) and June 18 (S. Rept. 91-244) respectively.

The reported authorization bill, which recommended an increase in authorization of appropriations of $6.232 million over the Administration's revised request, passed the House without amendment on June 24. The Senate passed the bill on June 26 after amending it by reducing the total authorization to the level of the Administration's request. On July 1, the House acceded to the amendment and passed the bill as amended by the Senate. On July 11 the President signed the Act into law (Public Law 91-44). The law authorizes appropriations to the Atomic Energy Commission for fiscal year 1970 in the amount of $2,448,052,000 as follows:

Operating expenses	$1,967,050,000
Plant and capital equipment	481,002,000
Total authorization	2,448,052,000

Among the highlights of the Joint Committee report, which accompanied the authorization bill, were the following:

The committee expressed its continuing concern about the *Naval Nuclear Propulsion Program* and restored to that program $4 million which had been cut during the Administration's budget review process. The committee set out the facts as to advance by the Soviet Union in the improvement of their submarine capability and urged support of a vigorous research and development effort to assure technological superiority in the face of Soviet numerical supremacy. The committee also expressed strong support for a nuclear surface warship development and construction program.

In the field of *reactor development and technology*, the committee increased requested funds by $7.3 million for *civilian power reactors* and $3.0 million for the *cooperative power reactor demonstration program*. The former evidenced the Committee's support of alternate reactor concepts—high temperature gas-cooled reactor (HTGR), gas-cooled fast reactor (GCFR), and molten salt reactor (MSR)—while the latter indicated the view of the committee that the project definition phase of the liquid metal fast breeder reactor (LMFBR) program should proceed with the necessary involvement of several participants employing various approaches.

The Plowshare program received the largest monetary boost from the committee with the addition of $10.5 million to the requested funds. The committee made clear its dissatisfaction with the funding level of this program over the past five years. In the view of the committee the promise for domestic commercial applications and the international obligations embodied in the Nonproliferation Treaty demand substantially increased financial support. The committee believes the potential of this technology for improving natural gas and other mineral resources reserves cannot be realized without an efficient and adequately funded research and development program.

B. Legislation requiring prelicensing review of competitive and environmental effects of nuclear power plants (S. 212, H.R. 8289, H.R. 9647, S. 1883, S. 2768): On November 18–20, the Joint Committee held hearings on legislation (S. 212, H.R. 8289, H.R. 9647, S. 1883, and S. 2768) relating to the prelicensing review of nuclear powerplants from the standpoint of their competitive and environmental effects. The principal bills involved are commonly referred to as "Practical Value" legislation, inasmuch as they would abolish the present provision under the Atomic Energy Act requiring the prelicensing of antitrust review of only those types of nuclear powerplants determined by the AEC to have achieved "practical value." As a result of this legislation, all or virtually all nuclear powerplants would be subject to such prelicensing review.

The first phase of hearings featured testimony by representatives of Government agencies with an interest in the legislation. Testimony was received from officials of the Departments of Justice and the Interior, the Atomic Energy Commission, and the Office of Science and Technology. At the conclusion of the hearings on November 20, it was announced that due to the heavy floor schedule in both Houses of Congress and the end-of-the-session workload of the Joint Committee, the committee would not be able to hear the testimony of private industry, special interest groups, and the general public on

these measures prior to the close of this session of Congress. It is expected that such hearings will be scheduled relatively early in the next session of Congress.

The record of the first phase of these hearings is being prepared for publication and distribution to the public prior to scheduling the second phase of the hearings. The printed record will appear under the title "Prelicensing Antitrust Review of Nuclear Powerplants."

C. Legislation to authorize industrial plowshare services (H.R. 477, S. 1885, H.R. 10288): On May 8 and 9 and July 17 the Joint Committee held hearings on H.R. 477, S. 1885, and H.R. 10288, bills which would authorize the AEC to make peaceful nuclear explosion services available on a commercial basis, both domestically and abroad, as various applications of nuclear explosive devices for peaceful purposes achieve commercial feasibility. H.R. 477 was introduced on January 3, 1969, by Representative Hosmer for himself and Representatives Holifield, Price of Illinois, Aspinall, Young, Bates, Anderson of Illinois, and McCulloch. S. 1885, an identical bill, was introduced on April 18, 1969 by Senator Pastore, for himself and Senators Anderson and Bennett. A third bill, also identical, was introduced on April 21, 1969 by Representative Edmondson.

During the May 8 and 9 hearings, the Joint Committee heard testimony on this legislation by representatives of Government agencies with interests and responsibilities in connection with domestic and foreign Plowshare applications. Witnesses who testified represented the AEC, the Departments of the Interior, State, and Health, Education and Welfare, and the Arms Control and Disarmament Agency. All generally supported enactment of the legislation.

Subsequently, on July 17, the committee heard the views of non-Government witnesses who expressed an interest in testifying on the legislation. Representatives of the Atomic Industrial Forum, the International Nuclear Corp., the OER Geonuclear Corp. and El Paso Natural Gas Co. testified in support of the legislation.

The record of these hearings was published in December 1969 under the title "Nuclear Explosion Services for Industrial Applications." It is expected that the Joint Committee will convene during the second session of the 91st Congress to consider reporting this legislation, possibly with certain modifications suggested on the basis of the committee's extensive hearings. Hearings on similar legislation in the 90th Congress, on which no final action was taken by the committee, were published in 1968 under the title, "Commercial Plowshare Services."

D. 1969 Omnibus Legislation: On September 12, the Joint Committee held a hearing to consider a number of bills to amend various provisions of the Atomic Energy Act. Those bills were:

H.R. 9644 and H.R. 9648 introduced by Chairman Holifield (by request) on March 27 and their companions S. 1879 and S. 1882 introduced by Vice Chairman Pastore (by request) on April 18;

S. 1878 introduced by Senator Pastore on April 18; and

H.R. 12697 introduced on July 9 by Chairman Holifield (by request) for himself and Representative Price of Illinois.

The committee met in executive sessions on September 12 and November 18 on these measures and voted to file "clean bills." H.R. 14925 was introduced on November 20 by Chairman Holifield (for himself, Representative Price of Illinois, and Representative Hosmer) and S. 3169 was introduced on November 21 by Vice Chairman Pastore. On November 24, the committee voted to report those bills and reports (H. Rept. 91–691 and S. Rept. 91–553) were filed on that date. The bill passed the Senate without amendment on December 1. The House approved the bill on December 15.

The bill fundamentally accomplishes four amendments to the Atomic Energy Act of 1954, plus technical amendments to assure consistency and clarity in the Act. The principal amendments would:

1. Extend for an additional 5-year period (to September 1, 1974) the authority of the AEC to compel licensing of patents found "affected with the public interest" in accordance with applicable requirements of the Atomic Energy Act.

2. Increase, from five to ten years, the maximum term of imprisonment for unauthorized diversion of special nuclear materials and related offenses.

3. Remove from four sections of the Act, pertaining to penalties for crimes committed with intent to injure the United States or to secure an advantage to a foreign nation, the authority to impose the death penalty and the language which restricts the imposition of imprisonment for life to those cases wherein the jury so recommends. Such restrictive language has been found by the U.S. Supreme Court to be unconstitutional in both the Federal Kidnaping Act and the Federal Bank Robbery Act.

4. Provide authority for the AEC to impose civil monetary penalties for violation of the licensing provisions of the Atomic Energy Act or any rule, regulation, order or license issued thereunder. The amount of the penalty is limited to $5,000 for any single violation and $25,000 for all violations occurring within any period of 30 consecutive days.

II. AGREEMENTS FOR COOPERATION

A. Civil: Under the provisions of the Atomic Energy Act of 1954, as amended, proposed agreements for cooperation in the peaceful uses of nuclear energy between the United States and other nations must be submitted to the Joint Committee and a period of thirty days must elapse while Congress is in session before such agreements become effective. In accordance with such procedures, five civil agreements, with the approval of the President were submitted to the committee by the Department of State and the Atomic Energy Commission during 1969.

Two of the submitted agreements were for research activities only. One effected amendments to the existing agreement with Iran and the other superseded the agreement with Portugal. The remaining agreements included power production activities as well as research functions. Of these, the agreement with Venezuela was to be amended while the agreements with Argentina and Austria were superseded. All of the new agreements reflected the updated provisions for private ownership of special nuclear materials provided in the 1964 legislation as well as application of safeguards inspection procedures by the International Atomic Energy Agency (I.A.E.A.) to assure that material is not diverted to other than peaceful purposes.

In addition, the U.S.-I.A.W.A. bilateral agreement for Application of Safeguards to U.S. Reactor Facilities was extended by mutual agreement, for a six month period to expire on January 31, 1970. That program assists the International Agency in developing and improving its safeguards competence.

B. Military: Under the Atomic Energy Act of 1954, as amended, proposed agreements for cooperation with another nation or with a regional defense organization involving development, utilization and control of atomic energy for military purposes in the interest of mutual defense and security, are required to be submitted to the Joint Committee for a period of sixty days while Congress is in session before becoming effective.

On March 10 the committee held hearings in executive session on an amendment to the Agreement between the United States and the United Kingdom for Cooperation on the Uses of Atomic Energy for Mutual Defense Purposes of July 3, 1958.

The amendment which would provide for the transfer of nuclear fuel for the United Kingdom's submarine program prior to December 31, 1979 was submitted to the Congress just prior to adjournment in November 1968.

The representatives of the Atomic Energy Commission and the State Department agreed to make arrangements with the U.K. to insure that the negotiating record with the U.K. indicates that the uses that may be made by the U.K. of the materials to be furnished by the U.S. are clearly understood. This has been accomplished.

The 60 days ended March 13, 1969 and the amendment became effective on March 28, 1969.

III. INFORMATIONAL HEARINGS

A. Environmental Effects of Producing Electric Power: On October 28, 29, 30 and 31 and November 4, 5, 6 and 7, the Joint Committee held Phase I of its public hearings on the environmental effects of producing electric power from all types of electric powerplants. During this phase testimony was received from the Federal agencies and organizations having responsibility in these matters, namely: Science Advisor to the President, the Federal Power Commission, the Atomic Energy Commission, the Department of the Interior, the Department of Health, Education, and Welfare, the Federal Radiation Council, and the Department of Agriculture.

Information was received with respect to the policies of the Executive Departments on matters of air and water pollution, thermal effects, adequacy of radiation criteria and standards and related matters. The Joint Committee print of this hearing record, entitled "Environmental Effects of Producing Electrical Power, Part I." to be published in early January 1970, will contain a compendium of information on chemical effluents, thermal discharges, and radioactive liquid and gaseous releases from conventional and nuclear powerplants, which is without parallel.

Phase II of these hearings is scheduled to be conducted early in 1970 and will afford an opportunity for representatives of State governments, private industry, environmental groups, and the public-at-large to present testimony furnishing their own views as a well as commenting upon those already presented by the Government agencies during Phase I of the hearings.

B. Radiation Standards for Uranium Mining: On March 17 and 18 the Joint Committee's Subcommittee on Research, Development, and Radiation held hearings on the subject of radiation standards for uranium mining. The committee looked into the requirements that the uranium mining industries would be expected to meet, the epidemiological studies forming the basis for the radiation standards, and the reasons for delay in Federal Radiation Council action toward arriving at a standard. Subsequent to these hearings the Secretary of Health, Education and Welfare appointed a special review committee to perform a continuing review of the situation regarding uranium mining standards. In addition, the Secretary of Labor, after meeting with representatives of uranium mining companies, developed a revised guideline for the processing of "variation requests."

C. Future Ownership of the AEC's Gaseous Diffusion Plants: During extended hearings which began on July 8 and 9 and continued

on August 5, 7 and 8, the Joint Committee considered the question of future ownership and operation of the AEC's uranium enrichment facilities. These plants are presently the only available means for the provision of uranium enrichment services required by the rapidly expanding U.S. private nuclear power industry, and constitute the one significant link in the nuclear fuel cycle remaining under Government ownership and operation. The production facilities, which are located at Oak Ridge, Tennessee; Paducah, Kentucky; and Porthmouth, Ohio, represent a Government investment of approximately $2.3 billion.

Witnesses who testified during these hearings represented the Atomic Energy Commission, the General Accounting Office, American Public Power Association, Atomic Industrial Forum, Consolidated Edison Company of New York, Consolidated Enrichment Corporation, Edison Electric Institute, National Coal Association, National Rural Electric Cooperative Association, and the Tennessee Valley Authority. Mr. Philip Sporn, testifying on his own behalf, also appeared as a witness. The record of these hearings was published in December under the title "Future Ownership of the AEC's Gaseous Diffusion Plants."

Testimony during these hearings indicated a diversity of views as to whether the plants should be transferred to private purchasers, a government corporation, or some other form of ownership, or should remain within the AEC. There were also varying views as to the timing of any such transfer.

Subsequent to the hearings and after consultation between White House officials and members of the Joint Committee, President Nixon announced on November 10 that he was requesting the AEC to continue to operate the enrichment plants, but under a separate Directorate within AEC. The President expressed the view that the Federal Government's responsibility for uranium enrichment should eventually be ended; however, AEC operation of the enrichment facilities should continue until such time as "various national interests" would best be served by the sale of the facilities to the private sector. In the interim, the President said, the AEC is to "carry on the AEC's businesslike management of plant operations and establish separate accounts fully reflecting commercial criteria for financial accounting."

On November 10, shortly after the President's announcement the Chairman of the Joint Committee issued a statement in which he generally applauded the President's plan to retain the plants under Government ownership until the day arrives—"assuming the day does arrive," he added—that they can be sold to industry "under circumstances that fully protect the public interest. . . ." Chairman Holifield expressed disappointment that the Presidential announcement set forth no specific plans to fund needed improvements to the enrichment plants. In this regard, Representative Holifield said:

"President Nixon has not yet faced up to the urgent need for starting construction for plant improvements needed to provide the additional enrichment capacity to fuel the nuclear plants which will come on line in the late 1970's.

"Reliance on present enrichment service sales without a definite commitment on the part of the Administration to support an appropriation of at least $130 million in the fiscal 1971 budget introduces an element of uncertainty which I fear will affect new acquisition of nuclear plants by electric utilities. If the Administration decides it cannot make such a budgetary commitment in the near future, I think it should advocate a self-funding Government corporation, so that assurance of funding can be arranged without further delay." [1]

In light of the Presidential announcement, the AEC is now reexamining its enrichment service charges to determine whether any change in pricing policies is required as a result of the proposed new operating procedures. In view of the potentially critical importance of this matter to the entire nuclear industry, the Chairman of the Committee has requested that the AEC submit the results of its review to the Committee immediately upon completion, and keep the Committee fully and currently informed of all significant interim developments in this connection.

D. The Antiballistic Missile Program: On March 4, the Joint Committee held two hearings in executive session on ABM. Representatives of the Department of Defense and of the Atomic Energy Commission presented testimony concerning aspects of the U.S. ballistic missile defense program including concept, capability, reliability, vulnerability, and command and control functions.

In early 1968 the Joint Committee announced that it had asked the General Accounting Office to maintain a surveillance of the actions being taken in connection with the proposed ABM system. The Committee has requested the GAO to continue such a review and analysis of this important program.

On August 6, 1969 the Senate defeated by a vote of 51–49 an antideployment amendment concerning the SAFEGUARD ABM system, and on December 8 the House voted to appropriate funds for initial deployment.

E. Safeguards Under Limited Test Ban Treaty: The Joint Committee has continued to maintain a careful scrutiny of the Department of Defense and the Atomic Energy Commission activities in support of the four safeguards established in connection with the Limited Nuclear Test Ban Treaty.

In 1963 during the debate on the Limited Nuclear Test Ban Treaty the Senate was assured by the Executive Department that our national security would not be jeopardized if the Treaty were signed because four "safeguards" were being instituted to insure that the United States would not be taken by surprise if the terms of the Treaty were violated. These safeguards are:

(1) the conduct of a comprehensive, aggressive underground nuclear weapons testing program;

(2) the maintenance of modern nuclear weapons laboratories;

(3) the maintenance of the necessary personnel and facilities to resume atmospheric testing on short notice in the event of an abrogation of the Treaty by the Soviet Union; and

(4) the improvement of our capability to monitor the terms of the Treaty, to detect violations and to maintain our knowledge of Sino-Soviet nuclear activities.

During the AEC FY 1970 authorization hearings on April 17, the Chairman of the AEC stated:

"The fiscal year 1970 estimate for the off-continent test readiness program will permit maintenance of essential elements of the current readiness capability while we embark on certain new activities related to the attainment of the goals of the new national nuclear test readiness plan."

On October 30, the Chairman of the Joint Committee was informed by letter from the Deputy Secretary of Defense that because of budget restrictions the Joint Task Force charged with maintaining atmospheric test readiness would be disbanded, although a small planning office would be attached to the Washington Headquarters of the Defense Atomic Support Agency.

The Joint Committee is concerned that safeguard provisions adopted in 1963 are being eroded. In the event that the Treaty is abrogated the United States may find itself in the same difficult position it was in 1961 when the USSR broke the "informal" moratorium on nuclear testing in the atmosphere. In this connection the Chairman of the Joint Committee requested the Chairman of the AEC to provide certain classified information which the committee will evaluate prior to proceeding further.

F. Naval Reactor Program: On April 23, the Joint Committee held hearings in executive session on the naval nuclear propulsion program. At these hearings three extremely important issues were discussed: (1) the rapidly expanding Soviet naval threat, (2) the need for a vigorous nuclear submarine development and construction program, and (3) the need for upgrading our nuclear powered surface naval striking forces.

It is clear from Admiral Rickover's testimony and the testimony of other Department of Defense, Navy and Central Intelligence Agency officials to various committees of Congress that the Soviet Union is embarked on a program which reveals a singular awareness of the importance of seapower and an unmistakable resolve to become the most powerful maritime force in the world.

The Joint Committee concluded its hearings on this matter by reaffirming in the Foreword to these hearings that the Congress must take the initiative to insure that the new warships we build for our first line naval striking force will have nuclear propulsion, and to insure that the program for improving and building nuclear submarines is aggressively pursued. The hearings entitled "Naval Nuclear Propulsion Program—1969" were published in June 1969.

G. Food Irradiation: During FY 1970 authorization hearings on April 17, testimony showed that the AEC had asked the Bureau of the Budget to include in the AEC FY 1970 budget request a total of $1,450,000 for the two food irradiation programs, $700,000 in Eulogy and Medicine program, and $750,000 in Isotopes Development Program. Subsequently when the proposed AEC budget was submitted to the Congress, the entire $1,450,000 had been deleted and the AEC's food irradiation program was eliminated.

The Joint Committee, in its report on the authorization bill, recommended that $750,000 be restored to the budget for the purpose of conducting the Division of Isotopes Development's low dose radiation preservation studies. While no appropriations were approved for this program for FY '70, both Houses did indicate in their respective reports, that the program should be continued by using other available program funds.

The Joint Committee believes that this program has the potential for achieving far-reaching benefits and expects to continue to support work in this field.

H. Confirmation Hearings: The Senate Section of the Joint Committee met in public session on May 22 to consider the nomination of Theos J. Thompson to be a member of the Atomic Energy Commission for the remainder of the term expiring June 30, 1971. The Senate confirmed the nomination on May 26. Theos Thompson replaced Gerald F. Tape.

On August 7, the Senate Section of the Joint Committee met in public session to consider the nomination of Clarence E. Larson to be a member of the Atomic Energy

[1] The full texts of the President's, AEC and the Joint Committee's November 10 announcements are printed on pages H 11161–H 11163, November 19, 1969 Congressional Record.

Commission for the term of five years expiring June 30, 1974. The Senate confirmed the nomination on August 8. This position was held by Francesco Costagliola whose term expired on June 30, 1969.

IV. CLASSIFIED ACTIVITIES

A. NATO: The Joint Committee continues to follow closely developments in NATO particularly the plans and programs promulgated by NATO's Nuclear Planning Group for possible response to aggression from the East.

An associated matter of concern to the Committee is the protection of classified information in NATO. In the past several years there have been significant security leaks in NATO. The most recent incident involving apparent compromise of classified information was revealed to the public by the arrest last August of a French national employed by NATO. He was charged with a "grave breach of security."

B. Intelligence Briefings: Representatives of the Central Intelligence Agency, the Department of Defense and the Atomic Energy Commission have presented briefings to the Committee on intelligence matters with particular reference to Communist China and the USSR.

C. Strategic Arms Limitation Talks (SALT): On November 17 the United States and the Soviet Union began talks on strategic arms limitation in Helsinki, Finland. In connection with these talks, the Chairman of the Joint Committee has exchanged correspondence with the Secretary of State and the Director of the Arms Control and Disarmament Agency. The Committee believes that these discussions bear significantly on U.S. national security and expects to follow very closely developments in this vitally important area.

D. AEC Rocky Flats Plant Fire: On May 11, a major fire occurred at the Rocky Flats Plant of the AEC. The plant, which is 21 miles northwest of Denver, Colorado, produces plutonium parts for nuclear weapons. The facility is operated for the AEC by the Dow Chemical Company. The fire, which caused an estimated $45 million damage, occurred in Building 776–777. Several million more dollars will be required to recycle the plutonium involved in the fire and for decontamination of the building. Very little of the plutonium in the fire will not be recoverable for reconversion from the oxide to metal.

The Joint Committee sent a staff representative to the scene to provide the Committee with a first hand report on this matter. Subsequently the Joint Committee strongly urged the AEC to re-evaluate practices and procedures at Rocky Flats and other AEC installations with particular reference to improving fire prevention and fire protection.

V. OTHER ACTIVITIES

A. IAEA: A representative of the Joint Committee on Atomic Energy participated in the 13th General Conference of the International Atomic Energy Agency (IAEA) which began September 23. The Conference representatives stressed the importance of developing effective world-wide safeguard inspection procedures to insure that nuclear material is not diverted from peaceful purposes to nuclear weapons development. It is expected that Euratom and IAEA will be discussing in detail ways and means of working out mutually acceptable inspection procedures to implement Article III of the NPT following the signature by West Germany of the Treaty.

B. Nuclear Test, Amchitka, Alaska: Congressman Chet Holifield, Chairman of the Joint Committee, was present at the control point on the island of Amchitka, Alaska, when a nuclear device of about one megaton was detonated underground on Thursday, October 2. Preceding the test, despite the assurances of the Atomic Energy Commission and its consultants that the test would be safely conducted, there were numerous groups and individuals both in and out of Alaska who opposed the test because of fear of possible aftershock and tsunami problems as well as concern for possible effects on the ecology.

In a statement on the Floor of the House (Congressional Record of October 6, 1969, p. 28714) upon his return, Mr. Holifield reported," . . . the test was successful in every phase . . . the explosion's register on the Richter scale was exactly as predicted . . . There was no release of fission products to the atmosphere . . . There was no deleterious effect upon the ecology that could be traced to that event . . . The particular test on Amchitka Island has been watched closely by the Joint Committee since it was proposed some 3 years ago. We have been aware of every state of its development. We have approved the program as being essential to the national security."

C. National Accelerator Laboratory: The President's FY '70 budget requested $96 million for construction for the National Accelerator Laboratory and the 200 BeV accelerator now under construction at Batavia, Illinois. This sum was reduced to $64 million by the House and increased to $70 million by a House-Senate Conference. A study made earlier in the year by the AEC had indicated that to keep construction on schedule and to produce a first proton beam by July 1972 would require a minimum of $89 million for FY 1970 construction funds. It was estimated that funding below $89 million, for example, at the $50–60 million level would result in a one year delay and an increase in costs of $30 million above the estimated total of $250 million.

A major concern of the Joint Committee is that the scientific experts now assembled to design and supervise construction of the accelerator will become discouraged and seek employment elsewhere; thus, the 200 BeV could be delayed further. Should this happen, the United States would remain in second place in the field of experimental high energy physics, behind the Soviet Union which now has a 76 BeV accelerator at Serpukhov. At present the largest U.S. accelerator operates at about 33 BeV.

D. Nuclear Power on the Moon: The Apollo–12 astronauts left on the Moon four experiments, a central data processor and a radio system for data transmission. This Apollo Lunar Surface Experiment Package (ALSEP) is powered by a nuclear generator which uses the heat of decay of plutonium 0238. The heat is applied to one side of a series of thermoelectric devices which generate electricity directly. This nuclear electrical generator, which has no moving parts, is the Space Nuclear Auxiliary Power System. It is the sole source of power for ALSEP.

The experiments, which are expected to record data for at least a year, are a passive seismic experiment, a lunar surface magnetometer, a solar wind spectrometer, and suprathermal ion detector. The SNAP–27 generator should be functioning normally significantly longer than a year. A complete description of the moon experiments powered by the SNAP–327 nuclear power supply was placed in the Congressional Record of December 8, page 37746, by Chairman Holifield.

Two other nuclear electrical generators are also powering systems in space. The SNAP–19 is providing most of the power for the Nimbus weather satellite and the SNAP–3 navigational satellite, launched in 1961, is still operating.

E. Medical Advances: The Joint Committee has for several years encouraged the clinical research program of Dr. George C. Cotzias and his colleagues at the AEC's Brookhaven National Laboratory in the use of L-dopa for the clinical treatment of neurological diseases, with primary emphasis on Parkinson's disease. L-dopa also significantly helps miners with chronic manganese poisoning. The latest use has been against another neurological disease—dystomia musculorum deformans—which seriously affects children by twisting its victim's limbs and sometimes by making them writhe uncontrollably from head to foot.

Dr. Cotzias was awarded the Albert Lasker award in November 1969 for having developed the protocol which demonstrated the effectiveness of large daily doses of L-dopa in the treatment of Parkinson's disease. Dr. Cotzias' efforts were described by the New England Journal of Medicine as "the most important contribution to medical therapy of a neurological disease in the past 50 years."

TRIBUTE TO HON. DOMINICK V. DANIELS

(Mr. PERKINS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PERKINS. Mr. Speaker, on June 3 of this year our distinguished colleague from New Jersey (Mr. DANIELS), as chairman of the Select Subcommittee on Labor, initiated what I believe are monumental hearings on legislation to encourage States to improve their workmen's compensation laws and to assure adequate coverage and benefits to employees injured in the mining industry. The specific legislation under consideration at that time was H.R. 11476.

Mr. DANIELS, as chairman of that subcommittee, diligently covered the field of workman's compensation law in intensive hearings throughout the month of June, concluding on July 15. It was largely due to the work of that subcommittee, under his leadership, that the benefit payment provisions to miners suffering from black lung disease and to the widows of miners who have died due to this disease were incorporated in the provisions of the Federal coal mine health and safety legislation which this Congress has just cleared and sent to the President for signature.

Mr. DANIELS' subcommittee, in executive session and in many meetings with staff and experts in the field, worked on all aspects of the problem of providing benefits to miners and their families where the miner, because of his exposure to coal dust, was no longer able to support his family. It is a great credit to his ability as a legislator, as a lawyer, and as a person sensitive to the needs of a group of citizens of this country who have long been ignored that title IV of the Federal Coal Mine Health and Safety Act of 1969 will soon be law. I would not want the first session of the 91st Congress to conclude without having made these observations. The monumental forward step taken in assuring healthy and safe working conditions in mines may have obscured the equally monumental legislative accomplishment that is represented by the final clearance

by the House and Senate of title IV of this act.

CONTROVERSIAL MRS. MITCHELL

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, for a while the gaucheries of Mrs. John Mitchell were good for a laugh.

But when she sees fit to ridicule Swahili, the lingua franca of much of Africa, a language which an increasing number of young black Americans are studying, it is time for some one to say: Enough.

Apparently, the Attorney General is amused by it all. Then, perhaps the President should politely but firmly ask Mrs. Mitchell to mind her manners.

The following article appeared in the Washington Post for Tuesday, December 16:

MARTHA MITCHELL SPEAKS UP

(By Dorothy McCardle)

Attorney General John N. Mitchell's popularity has slipped to second place at the Justice Department when it comes to mail and requests for speeches.

"The Justice Department mail is overwhelmingly for my wife these days," he said last night. "Everybody writes to her.

"I used to get a lot of requests for speeches, too. Not any more. They all want my wife."

The Mitchells returned to the Washington party scene after a holiday in Florida, which followed Mrs. Mitchell's controversial statements on television and to the press. She caused a sensation when she called peace demonstrators "liberal Communists."

The Mitchells were among the 70 guests entertained at the George Town Club by Robert Keith Gray, former Secretary to the Cabinet in the Eisenhower Administration. Former First Lady Mamie Eisenhower came down from Gettysburg for the party, which was given in honor of Secretary of Defense and Mrs. Melvin R. Laird.

Martha Mitchell, who has been variously reported as under "house arrest" and "gag rule" by her husband, was beaming, and he was beaming proudly her way. Both were full of fun and laughter over all the talk she has stirred up.

"Gag Martha?" quipped Mitchell. "That would be impossible."

Will she make these speeches?

"Yes, indeed, just as soon as she learns to speak Swahili," he quipped.

In fact, she is ready for plenty more interviews, her husband said, "so long as they are conducted in Swahili."

"Want to hear some Swahili?" quipped Martha Mitchell, and she squeaked her tongue in and out as everybody laughed.

She was wearing a beige evening gown, heavily encrusted in brilliants, by Harvey Beren. She said a waiter had spilled ice cream down her back first time she wore it in New York.

"I always try to create a little fun wherever I go," she said. "The one trouble about Florida was that there weren't any Washington newspapers with all those stories about me."

The Attorney General said he had enjoyed comedian Bob Hope's comments about his wife at the White House Sunday night.

The Attorney General never stopped smiling until talk turned to his own job.

"I've got a terrible job," he said. "But it's a job that needs to be done, and I'm here to try to do it for the President."

Mr. Speaker, it is of course possible that Dorothy McCardle's account was inaccurate or unfair. If so, then a public correction and apology should be made.

Do I make too much of the incident? A brilliant writer, Nicholas von Hoffman, writing in today's Washington Post, suggests that I do not. As Mr. von Hoffman points out, the Attorney General and his wife, who are reported very fearful of revolutionary activity in this country, ought to reflect on whether their behavior could be contributing to the very thing they fear.

Mr. von Hoffman might have reminded his readers of another high society lady who reportedly said: "If they have no bread, let them eat cake."

I call attention particularly to the penultimate paragraph of Mr. von Hoffman's article:

[From the Washington Post, Dec. 1, 1969]

REVOLUTION

(By Nicholas von Hoffman)

It is impossible to date a mood, a psychological era. But if the beginning are lost it is retrospectively obvious that some time in the middle years of this decade we began to feel differently about ourselves. We began to relish and cultivate a sense of doom and revenge; we spoke of the Fire Next Time and we liked the feelings the thought of fear induced in us; we spoke of Armageddon and Apocalypse like people who wanted what the rest of mankind dreads.

We ascended the helix of violence, crime, confrontation, counter-confrontation, riot, arson and assassination as though we were going through a sexual experience. We enjoyed it. We proclaimed ourselves the sick society with a necrophiliac delight in the pathology of pathology. After each act of bloodletting we were not content with seeing it on the TV screen; we had commissions to dredge it up again, show us the killing in new lights and use the analysis of the latest acts of savagery as grounds to predict yet more. Our violence commissions and their reports never lead to legislation—their function is to soothsay the doom we delight in hearing prognosticated.

In the last months new elements have become discernible in the mood. The first is suspicion. There are now millions of people who believe their phones are being tapped. Congressmen, senators, high government and business officials presume it in their belief that the government is increasingly in the hands of spies and blackmailers. In the most unlikely and exalted places there is talk of repression and concentration camps.

The second is the talk of revolution. Six or seven years ago only paranoid reactionaries gabbled about revolution. For everybody else the subject was laughable. Now the word is used everywhere and all the time, and not merely as metaphor or hyperbole as in the Dodge Rebellion or the Sexual Revolution.

People say the word again and again, meaning they expect in some vague, indefinite, but not too far future time, a violent, political upheaval will come to pass. The word is tossed around thoughtlessly but with the connotation that it will solve our problems, take care of everything, make us well. If you try to pin people down as to how this last and most awful political act is going to make anything better, you don't get answers; you get emotional expectations. Their words in reply suggest that a great welling up and solidifying of masses of people will provide a purging, a burning and a purification of the great, collective, social soul. They talk like people drained of energy who see the revolution as a dynamo of massive, undifferentiated human force which recharges and revives them.

Such talk centers among the rich and the near rich. It began among the young but it's spread to the parents and the grandparents so you can hear dowager millionairesses drop casual remarks about the revolution.

The prevalency of revolutionary talk has sprung up in two or three years. Maybe it's simply a fashion and, like bell-bottom trousers, people will tire of it, but that's not certain. We don't know much about revolutions, but what we do know makes it impossible to shrug off the conversations as having no consequence.

It has been observed that no government or master class has ever been overthrown from below. They've committed suicide. (We're speaking of true revolutions, not putsches, coup de'etats or CIA palace takeovers.) The rulers, the rich, the people with presumably the most stake in the status quo lose faith in themselves and belief in the goodness and worthwhileness of both their duties and their heritage.

The revolutionary talk isn't coming primarily from blacks or white factory workers or Mexican farm labor but from the top, from people with money and people with means to broadcast their ideas and convince others. It is this fact that makes it highly unlikely that, the Constitution aside, the government will indulge in the wholesale political repressions that are forever being predicted. The government isn't going to put its own children in jail. Black Panthers, of course, are a totally different question.

This rage for revolution, so common in the western world, derives from feelings and beliefs that are often admirable and courageous. When you see a Sarah Lawrence or a Yale boy working on a production line to start a revolutionary cadre, it's hard not to salute them for their selflessness, but their altruism doesn't make what they're doing less reckless or badly thought out.

"We know to our sorrow that freedom has been better preserved where no revolution ever broke out, no matter how outrageous the circumtsances of the powers that be, and that there exist more civil liberties even in countries where the revolution was defeated than in those where the revolutions have been victorious," writes Hannah Arendt in one of the few good books on the subject (*On Revolution*, Viking Press, N.Y., 1965, $1.65).

But people with the revolutionary rage in them take freedom and civil liberties for granted in their justifiable anguish over such questions as racism, war and poverty. What they forget is that there is no reason to think pulling down the formal, governmental structure of the country can solve these problems while there is every reason to believe a revolution will add new ones.

The great problem a revolution would bring with it would be the establishing of any other kind of government that the American people could accept as legitimate. It doesn't matter how much good can be said for it; the fact is that every revolutionary government goes through the tortures of the damned trying to achieve the legitimation and acceptance which bring stability and the possibility of going forward with any kind of social or economic program.

The legitimation of the American government is the Constitution, a document which we revere with considerably greater and realer piety than we do our various religions. We do it not only because it actually is an amaz-

ing political creation but because it is nearly 200 years old, and we believe in it in a sense that is more than patriotic, more than governmental. It cannot be replaced by something better because we believe in it, our Constitution, nobody else's, and it is this which gives the system legitimate authority, stability and therefore the possibility of quiet and humane improvement and perfection.

One of the most alarming aspects of the kind of talk we're getting now is a discrediting attack on the Constitution's authority. Arendt puts it this way, "Revolutions always appear to succeed with amazing ease in their initial stage, and the reason is that the men who make them first only pick up the power of a regime in plain disintegration; they are consequences but never the causes of the downfall of political authority . . . The loss of authority in the powers-that-be, which indeed precedes all revolutions, is actually a secret to no one, since its manifestations are open and tangible, though not necessarily spectacular; but its symptoms, general dissatisfactions, widespread malaise, and contempt for those in power, are difficult to pin down since their meaning is never unequivocal."

That's where we are now. The Constitution, our stabilizer, our continuity, our guarantee of freedom for those who have it and our promise for those who don't, is suffering authority drainage. But as Miss Arendt says, the picture is equivocal. The revolutionary enragees bring the final and binding laws into contempt, but so does the Attorney General who is reported smiling while his wife runs off at the mouth at parties making tasteless, racist imitations of somebody speaking Swahili.

If you think you're a revolutionary, know what you're getting all of us into, and if you're not, don't talk like one.

THE FUTURE OF MICRONESIA

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, yesterday, in the course of two special orders, my able colleague, the gentleman from New York (Mr. CAREY), and I discussed the situation in the Trust Territory of the Pacific Islands, now known as Micronesia. The gentleman from Arizona (Mr. UDALL) also contributed to the discussion. I refer to pages 39858 to 39866 of the RECORD.

During the colloquy between the gentleman from New York (Mr. CAREY) and myself, some difference of opinion emerged as to the degree to which the United States may proceed on its own, without the approval of the U.N. Trusteeship Council and the Security Council, to make arrangements for the self-determination of the Micronesians to which we are committed. My friend and colleague suggested that, because Micronesia is characterized as a "strategic trust territory" under the U.N. Charter, the United States has wider latitude in this regard than was true of the other states administering trust territories. I must record my disagreement.

A strategic trust territory is different from others mainly in that the administering authority may establish bases and station forces there, and in that the Security Council, rather than the General Assembly, is the U.N. body which has jurisdiction.

Of the 11 original trust agreements, nine have been terminated after a process of self-determination under procedures approved by the appropriate U.N. bodies. I have never before heard it suggested that the procedure in this regard would be any different for a strategic trust territory.

In order that the Members of Congress and other readers of the RECORD may be reminded of the degree to which our administration and the ultimate disposition of the Trust Territory of the Pacific Islands is subject to the United Nations Charter and U.N. procedures, I insert herewith the text of the trusteeship agreement and the relevant articles of the U.N. Charter:

TRUSTEESHIP FOR FORMER JAPANESE MANDATED ISLANDS—AGREEMENT APPROVED BY THE SECURITY COUNCIL OF THE UNITED NATIONS APRIL 2, 1947

Approved by the President of the United States of America July 18, 1947, Pursuant to Authority Granted by Joint Resolution of the Congress of the United States of America July 18, 1947

Entered into Force July 18, 1947

PREAMBLE

Whereas Article 75 of the Charter of the United Nations[1] provides for the etsablishment of an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent agreements; and

Whereas under Article 77 of the said Charter the trusteeship system may be applied to territories now held under mandate; and

Whereas on 17 December 1920 the Council of the League of Nations confirmed a mandate for the former German islands north of the equator to Japan, to be administered in accordance with Article 22 of the Covenant of the League of Nations; and

Whereas Japan, as a result of the Second World War, has ceased to exercise any authority in these islands;

Now, THEREFORE, the Security Council of the United Nations, having satisfied itself that the relevant articles of the Charter have been complied with, hereby resolves to approve the following terms of trusteeship for the Pacific Islands formerly under mandate to Japan.

ARTICLE 1

The Territory of the Pacific Islands, consisting of the islands formerly held by Japan under mandate in accordance with Article 22 of the Covenant of the League of Nations, is hereby designated as a strategic area and placed under the trusteeship system established in the Charter of the United Nations. The Territory of the Pacific Islands is hereinafter referred to as the trust territory.

ARTICLE 2

The United States of America is designated as the administering authority of the trust territory.

ARTICLE 3

The administering authority shall have full power of administration, legislation, and jurisdiction over the territory subject to the provisions of this agreement, and may apply to the trust territory, subject to any modifications which the administering authority may consider desirable, such of the laws of the United States as it may deem appropriate to local conditions and requirements.

ARTICLE 4

The administering authority, in discharging the obligations of trusteeship in the trust territory, shall act in accordance with the Charter of the United Nations, and the provisions of this agreement, and shall, as specified in Article 83 (2) of the Charter, apply the objectives of the international trusteeship system, as set forth in Article 76 of the Charter, to the people of the trust territory.

ARTICLE 5

In discharging its obligations under Article 76(a) and Article 84, of the Charter, the administering authority shall ensure that the trust territory shall play its part, in accordance with the Charter of the United Nations, in the maintenance of international peace and security. To this end the administering authority shall be entitled:

1. to establish naval, military and air bases and to erect fortifications in the trust territory;

2. to station and employ armed forces in the territory; and

3. to make use of volunteer forces, facilities and assistance from the trust territory in carrying out the obligations towards the Security Council undertaken in this regard by the administering authority, as well as for the local defense and the maintenance of law and order within the trust territory.

ARTICLE 6

In discharging its obligations under Article 76(b) of the Charter, the administering authority shall:

1. foster the development of such political institutions as are suited to the trust territory and shall promote the development of the inhabitants of the trust territory toward self-government or independence, as may be appropriate to the particular circumstances of the trust territory and its peoples and the freely expressed wishes of the peoples concerned; and to this end shall give to the inhabitants of the trust territory a progressively increasing share in the administrative services in the territory; shall develop their participation in government; shall give due recognition to the customs of the inhabitants in providing a system of law for the territory; and shall take other appropriate measures toward these ends;

2. promote the economic advancement and self-sufficiency of the inhabitants, and to this end shall regulate the use of natural resources; encourage the development of fisheries, agriculture, and industries; protect the inhabitants against the loss of their lands and resources; and improve the means of transportation and communication;

3. promote the social advancement of the inhabitants, and to this end shall protect the rights and fundamental freedoms of all elements of the population without discrimination; protect the health of the inhabitants; control the traffic in arms and ammunition, opium and other dangerous drugs, and alcohol and other spirituous beverages; and institute such other regulations as may be necessary to protect the inhabitants against social abuses; and

4. promote the educational advancement of the inhabitants, and to this end shall take steps toward the establishment of a general system of elementary education; facilitate the vocational and cultural advancement of the population; and shall encourage qualified students to pursue higher education, including training on the professional level.

ARTICLE 7

In discharging its obligations under Article 76(c), of the Charter, the administering authority shall guarantee to the inhabitants of the trust territory freedom of conscience,

[1] Treaty Series 993, 59 Stat. 1031.

and, subject only to the requirements of public order and security, freedom of speech, of the press, and of assembly; freedom of worship, and of religious teaching; and freedom of migration and movement.

ARTICLE 8

1. In discharging its obligations under Article 76(d) of the Charter, as defined by Article 83(2) of the Charter, the administering authority, subject to the requirements of security, and the obligation to promote the advancement of the inhabitants, shall accord to nationals of each Member of the United Nations and to companies and associations organized in conformity with the laws of such Member, treatment in the trust territory no less favourable than that accorded therein to nationals, companies and associations of any other United Nation except the administering authority.

2. The administering authority shall ensure equal treatment to the Members of the United Nations and their nationals in the administration of justice.

3. Nothing in this Article shall be so construed as to accord traffic rights to aircraft flying into and out of the trust territory. Such rights shall be subject to agreement between the administering authority and the state whose nationality such aircraft possesses.

4. The administering authority may negotiate and conclude commercial and other treaties and agreements with Members of the United Nations and other states, designed to attain for the inhabitants of the trust territory treatment by the Members of the United Nations and other states no less favourable than that granted by them to the nationals of other states. The Security Council may recommend, or invite other organs of the United Nations to consider and recommend, what rights the inhabitants of the trust territory should acquire in consideration of the rights obtained by Members of the United Nations in the trust territory.

ARTICLE 9

The administering authority shall be entitled to constitute the trust territory into a customs, fiscal, or administrative union or federation with other territories under United States jurisdiction and to establish common services between such territories and the trust territory where such measures are not inconsistent with the basic objectives of the International Trusteeship System and with the terms of this agreement.

ARTICLE 10

The administering authority, acting under the provisions of Article 3 of this agreement, may accept membership in any regional advisory commission, regional authority, or technical organization, or other voluntary association of states, may co-operate with specialized international bodies, public or private, and may engage in other forms of international co-operation.

ARTICLE 11

1. The administering authority shall take the necessary steps to provide the status of citizenship of the trust territory for the inhabitants of the trust territory.

2. The administering authority shall afford diplomatic and consular protection to inhabitants of the trust territory when outside the territorial limits of the trust territory or of the territory of the administering authority.

ARTICLE 12

The administering authority shall enact such legislation as may be necessary to place the provisions of this agreement in effect in the trust territory.

ARTICLE 13

The provisions of Articles 87 and 88 of the Charter shall be applicable to the trust territory, provided that the administering authority may determine the extent of their applicability to any areas which may from time to time be specified by it as closed for security reasons.

ARTICLE 14

The administering authority undertakes to apply in the trust territory the provisions of any international conventions and recommendations which may be appropriate to the particular circumstances of the trust territory and which would be conducive to the achievement of the basic objectives of Article 6 of this agreement.

ARTICLE 15

The terms of the present agreement shall not be altered, amended or terminated without the consent of the administering authority.

ARTICLE 16

The present agreement shall come into force when approved by the Security Council of the United Nations and by the Government of the United States after due constitutional process.[2]

Certified corrected true copy.

For the Security Council Affairs Department.

D. PROTITCH,
Director in Charge of Security Council Affairs Department.

CHAPTER XII—INTERNATIONAL TRUSTEESHIP SYSTEM

ARTICLE 75

The United Nations shall establish under its authority an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements. These territories are hereinafter referred to as trust territories.

ARTICLE 76

The basic objectives of the trusteeship system, in accordance with the Purposes of the United Nations laid down in Article 1 of the present Charter, shall be:

a. to further international peace and security;

b. to promote the political, economic, social, and educational advancement of the inhabitants of the trust territories, and their progressive development towards self-government or independence as may be appropriate to the particular circumstances of each territory and its peoples and the freely expressed wishes of the peoples concerned, and as may be provided by the terms of each trusteeship agreement;

c. to encourage respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion, and to encourage recognition of the interdependence of the peoples of the world; and

d. to ensure equal treatment in social, economic, and commercial matters for all Members of the United Nations and their nationals, and also equal treatment for the latter in the administration of justice, without prejudice to the attainment of the foregoing objectives and subject to the provisions of Article 80.

ARTICLE 77

1. The trusteeship system shall apply to such territories in the following categories as may be placed thereunder by means of trusteeship agreements:

a. territories now held under mandate;

b. territories which may be detached from enemy states as a result of the Second World War; and

c. territories voluntarily placed under the system by states responsible for their administration.

2. It will be a matter for subsequent agreement as to which territories in the foregoing categories will be brought under the trusteeship system and upon what terms.

ARTICLE 78

The trusteeship system shall not apply to territories which have become Members of the United Nations, relationship among which shall be based on respect for the principle of sovereign equality.

ARTICLE 79

The terms of trusteeship for each territory to be placed under the trusteeship system, including any alteration or amendment, shall be agreed upon by the states directly concerned, including the mandatory power in the case of territories held under mandate by a Member of the United Nations, and shall be approved as provided for in Articles 83 and 85.

ARTICLE 80

1. Except as may be agreed upon in individual trusteeship agreements, made under Articles 77, 79, and 81, placing each territory under the trusteeship system, and until such agreements have been concluded, nothing in this Chapter shall be construed in or of itself to alter in any manner the rights whatsoever of any states or any peoples or the terms of existing international instruments to which Members of the United Nations may respectively be parties.

2. Paragraph 1 of this Article shall not be interpreted as giving grounds for delay or postponement of the negotiation and conclusion of agreements for placing mandated and other territories under the trusteeship system as provided for in Article 77.

ARTICLE 81

The trusteeship agreement shall in each case include the terms under which the trust territory will be administered and designate the authority which will exercise the administration of the trust territory. Such authority, hereinafter called the administering authority, may be one or more states or the Organization itself.

ARTICLE 82

There may be designated, in any trusteeship agreement, a strategic area or areas which may include part or all of the trust territory to which the agreement applies, without prejudice to any special agreement or agreements made under Article 43.

ARTICLE 83

1. All functions of the United Nations relating to strategic areas, including the approval of the terms of the trusteeship agreements and of their alteration or amendment, shall be exercised by the Security Council.

2. The basic objectives set forth in Article 76 shall be applicable to the people of each strategic area.

3. The Security Council shall, subject to the provisions of the trusteeship agreements and without prejudice to security considerations, avail itself of the assistance of the Trusteeship Council to perform those functions of the United Nations under the trusteeship system relating to political, economic, social, and educational matters in the strategic areas.

ARTICLE 84

It shall be the duty of the administering authority to ensure that the trust territory shall play its part in the maintenance of international peace and security. To this end the administering authority may make use of volunteer forces, facilities, and assistance from the trust territory in carrying out the

[2] Approved by the Security Council of the United Nations, Apr. 2, 1947; and by the Government of the United States of America, July 18, 1947.

obligations towards the Security Council undertaken in this regard by the administering authority, as well as for local defense and the maintenance of law and order within the trust territory.

ARTICLE 85

1. The functions of the United Nations with regard to trusteeship agreements for all areas not designated as strategic, including the approval of the terms of the trusteeship agreements and of their alteration or amendment, shall be exercised by the General Assembly.

2. The Trusteeship Council, operating under the authority of the General Assembly, shall assist the General Assembly in carrying out these functions.

CHAPTER XIII—THE TRUSTEESHIP COUNCIL

COMPOSITION

Article 86

1. The Trusteeship Council shall consist of the following Members of the United Nations:

a. those Members administering trust territories;

b. such of those Members mentioned by name in Article 23 as are not administering trust territories; and

c. as many other Members elected for three-year terms by the General Assembly as may be necessary to ensure that the total number of members of the Trusteeship Council is equally divided between those Members of the United Nations which administer trust territories and those which do not.

2. Each member of the Trusteeship Council shall designate one specially qualified person to represent it therein.

FUNCTIONS AND POWERS

Article 87

The General Assembly and, under its authority, the Trusteeship Council, in carrying out their functions, may:

a. consider reports submitted by the administering authority;

b. accept petitions and examine them in consultation with the administering authority;

c. provide for periodic visits to the respective trust territories at times agreed upon with the administering authority; and

d. take these and other actions in conformity with the terms of the trusteeship agreements.

Article 88

The Trusteeship Council shall formulate a questionnaire on the political, economic, social, and educational advancement of the inhabitants of each trust territory, and the administering authority for each trust territory within the competence of the General shall make an annual report to the General Assembly upon the basis of such questionnaire.

VOTING

Article 89

1. Each member of the Trusteeship Council shall have one vote.

2. Decisions of the Trusteeship Council shall be made by a majority of the members present and voting.

PROCEDURE

Article 90

1. The Trusteeship Council shall adopt its own rules of procedure, including the method of selecting its President.

2. The Trusteeship Council shall meet as required in accordance with its rules, which shall include provision for the convening of meetings on the request of a majority of its members.

Article 91

The Trusteeship Council shall, when appropriate, avail itself of the assistance of the Economic and Social Council and of the specialized agencies in regard to matters with which they are respectively concerned.

WHO IS TO BLAME

(Mr. GIAIMO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. GIAIMO. Mr. Speaker, yesterday's Washington Post carried a letter to the editor from my friend and colleague, the distinguished chairman of the Committee on Appropriations. This letter is particularly significant because it describes accurately and impartially some of the reasons for this year's disgraceful delay in the appropriation process.

While the administration has blamed the Congress for much of this delay, and vice versa, Chairman MAHON stated correctly that the blame for this extraordinary delay must be shared by all those responsible for recommending amounts and appropriating them. The chairman also points out that one of the key reasons for delay in this process is the requirement that "enactment of authorization bills must precede appropriations."

The efforts of our colleagues on the various authorizing committees are worthy of our praise, for these committees are examining more programs—most of which are extremely complex—than ever before. This close scrutiny of our programs is vital if we in the Congress are to fulfill our responsibility to the taxpayers of this Nation. There comes a time, however, when we must stop scrutinizing and start funding.

In order to expedite passage of appropriation bills, my colleague from New Hampshire (Mr. WYMAN) has introduced House Resolution 557, which provides that after the beginning of each fiscal year appropriation bills may be considered even though their authorizations have not been enacted into law. As a cosponsor of this measure, I want to emphasize that this resolution is not intended in any way to dilute the powers or duties of the authorizing committees.

The Committee on Rules is now considering proposals to change the dates of the fiscal year. I strongly support such proposals. It is obvious that the present July 1 to June 30 fiscal year—a relic from the days when Congress was in session for only a few months each year—is no longer adequate for our complex federal system.

As we conclude this session of Congress under threat of a special session, the time has come for us to seriously contemplate changing the fiscal year and changing the rules under which appropriation bills are considered. Only by making these and other changes can we supply the people of this Nation with the modern, efficient, economical Government which they will need in the 1970's and beyond.

In order to clarify this situation and to make it clear what we must do to remedy it, I wish to include at this point in the RECORD the letter of Chairman MAHON to the editor of the Washington Post:

HOUSE APPROPIATIONS CHAIRMAN'S REVIEW

Your editorial of Dec. 11, "The Money Bills for Christmas," makes sharp reference to the delays in enactment of the appropriation bills, apportioning the blame among the administration and both houses of Congress. But the record will clearly show that the House Committee on Appropriations has not been the major stumbling block.

I agree with much of your editorial, but I must say that, in my judgment, it is not quite on the qualitative par of your editorial of Oct. 31, "Appropriations Logjam," which I thought was so perceptive and well balanced that I inserted it in the Congressional Record.

Even allowing for some extenuating circumstances—which you do—I would agree that neither the administration nor the House or Senate has done acceptably well in regard to processing the money business this year.

Next year, many of the delays inherent in setting up a new administration will not beset the executive team. This will be of inestimable value to Congress. Moreover, as chairman of the Appropriations Committee, working in cooperation with the leadership on both sides of the aisle, we have definite plans for doing a much more expeditious job.

Your editorial of Dec. 11 departs in a significant and, to me, disappointing way from the underlying assessment that blame for late appropriations can be shared generally by all those responsible for their processing. You say that much of the blame for this logjam belongs on the House side, the House leaders allowing "the managers of the money bills to amble along at their own pace instead of fixing a date for the reporting of each bill." I include a statement of the Majority Leader made on the floor of the House on Oct. 29, 1969:

"Mr. Albert . . . Further, Mr. Speaker, I want to compliment the gentleman from Texas (Mr. Mahon). Every year he has come in with a schedule or agenda of bills from his committee. He has followed it, I believe, as religiously as any committee in the House has been able to follow an agenda, and he has done an outstanding job. He has been thwarted time and time again by the lack of authorizations and by matters beyond his control . . ."

I would be deeply grateful if you would print for your readers the following facts which seem the most pertinent, since they involve the six regular appropriation bills still pending in Congress. You point out that "enactment of authorization bills must precede appropriations."

Taking the bills one by one, here is the record:

1. *Defense.* The underlying authorization bill passed the Senate Sept. 18; the House Oct 3; cleared Congress Nov. 6; signed into law Nov. 19.

The Committee on Appropriations reported the appropriation bill Dec. 3; the House passed it Dec. 8. Now in Senate.

2. *Military Construction.* Authorization bill passed House Aug. 5; the Senate Nov. 11; cleared Congress Nov. 21; signed into law Dec. 5.

The Committee on Appropriations reported the appropriation bill Nov. 12; passed House Nov. 13; passed Senate Dec. 8. Now in conference.

3. *Foreign Assistance.* Authorization bill passed House Nov. 20; on Senate floor today (Dec. 12).

The Committee on Appropriations reported the appropriation bill on Dec. 8; the House passed it Dec. 9. Now in Senate.

4. *District of Columbia.* The D.C. revenue authorization bill passed the House Aug. 11;

the Senate Oct. 13; cleared Congress Oct. 30; signed into law Oct. 31.

The Committee on Appropriations reported the appropriation bill Nov. 20; the House passed it Nov. 24; the Senate passed it Dec. 11. It is now in conference.

5. *Labor-HEW.* Despite absence of enacted authorization bills for the antipoverty program and several other programs normally funded in this bill, the Committee on Appropriations reported this bill on July 24 and the House passed it on July 31. It is now in the Senate.

6. *Transportation.* When we reported this bill on Nov. 13 and passed it on Nov. 18, it was necessary to adopt a rule making it in order despite the lack of enacted authorization bills for the urban mass transportation and traffic and highway safety programs.

This bill is still pending in the Senate.

In closing, let me commend you for your generally fair and well intentioned statements on what is perhaps the most important single business of the Congress.

GEORGE MAHON,
Chairman, House Committee on Appropriations.

WASHINGTON.

FOREIGN ASSISTANCE APPROPRIATIONS, 1970—CONFERENCE REPORT

Mr. PASSMAN submitted the following conference report and statement on the bill (H.R. 15149) making appropriations for foreign assistance for the fiscal year ending June 30, 1970, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 91–779)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 15149) "making appropriations for foreign assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7, 9, 11, 14, 23, 25, 26, 29, 30, and 42.

That the House recede from its disagreement to the amendments of the Senate numbered 10, 12, 20, 27, 32, 33, 34, 35, 36, 37, 38, 39, 40, and 41, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$353,250,000"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$166,750,000"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$81,500,000"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$105,000,000"; and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert: "$13,000,000"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13; and agree to the same with an amendment, as follows: In lieu of the matter proposed by said amendment insert: "American schools and hospitals abroad (special foreign currency program): For assistance authorized by section 214(d), $3,000,000 for the University of North Africa, Tangier, Morocco; $1,000,000 for the Vocational School for the Underprivileged in Israel; and $500,000 for the Merkaz Lechinuch Ichud, Israel, in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States."

And the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$395,000,000"; and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$12,500,000"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$255,000,000"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$300,000,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert: "$37,500,000"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$51,000,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$3,700,000"; and the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$404,500,000"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,000,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 6, 8, and 31.

STATEMENT

The managers on the part of the House at a conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 15149) making appropriations for foreign assistance and related programs for the fiscal year ending June 30, 1970, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

TITLE I—FOREIGN ASSISTANCE ACT ACTIVITIES

Funds appropriated to the President

Economic Assistance

Amendment No. 1.—*Technical assistance:* Appropriates $353,250,000 for technical assistance instead of $313,800,000 as proposed by the House and $396,870,000 as proposed by the Senate. This amount will be distributed as indicated in amendments numbers 2, 3, and 4 below.

Amendment No. 2.—Appropriates $166,750,000 for Worldwide technical assistance instead of $150,000,000 as proposed by the House and $183,500,000 as proposed by the Senate.

Amendment No. 3.—Appropriates $81,500,000 for Alliance for Progress technical assistance instead of $75,000,000 as proposed by the House and $90,750,000 as proposed by the Senate.

Amendment No. 4.—Appropriates $105,000,000 for Multilateral organization technical assistance instead of $88,800,000 as proposed by the House and $122,620,000 as proposed by the Senate.

Amendment No. 5.—Provides that not less than $13,000,000 shall be available only for the U.N. Children's Fund instead of $14,000,000 as proposed by the Senate.

Amendment No. 6.—Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment.

Amendment No. 7.—Restores limitation proposed by the House and deleted by the Senate to preclude transfers between the three different technical assistance appropriations contained in amendments 2, 3, and 4 above.

Amendment No. 8.—*American schools and hospitals abroad:* Reported in disagreement. The managers on the part of the House will

offer a motion to appropriate $26,050,000 instead of $24,050,000 as proposed by the House and $24,550,000 as proposed by the Senate. The increase of $1,500,000 above the Senate bill is the result of action taken on amendments 9, 10, 11, 12, and 13 below.

In connection with this program the Committee of Conference agrees that if A.I.D. finds that any institution contained in these amendments is an institution that has received funds under this bill under another name, it shall not be eligible to receive the funds provided by this appropriation. In addition, the Committee of Conference is agreed that funds provided for the various unbudgeted institutions shall be of a "one-shot" nature and the Appropriations Committees will not consider providing funds for any institutions unless there is a budget estimate submitted by the Executive requesting funds for such institutions.

Amendment No. 9.—Appropriates $3,000,000 for the Weizmann Institute as proposed by the House instead of $2,500,000 as proposed by the Senate.

Amendment No. 10.—Appropriates $1,400,000 for Merkaz Lechinuch Ichud as proposed by the Senate instead of $1,900,000 as proposed by the House.

Amendment No. 11.—Appropriates $5,000,000 for Hadassah (expansion of medical facilities in Israel) as proposed by the House instead of $4,000,000 as proposed by the Senate.

Amendment No. 12.—Appropriates $1,200,000 for Beth Yaacov Avat Girl's School, $800,000 for the Educational Center of Galilee, and $500,000 for a hospital in Chemke, Nigeria, as proposed by the Senate.

Amendment No. 13.—*American schools and hospitals abroad (special foreign currency program)*: Appropriates $4,500,000 in in excess foreign currencies for the following institutions, $3,000,000 for the University of North Africa, Morocco; $1,000,000 for the Vocational School for the Underprivileged; and $500,000 for the Merkaz Lechinuch Ichud as proposed by the Senate. The Committee of Conference deleted local currency funds for the Weizmann Institute and for Hadassah in view of its action on Amendments 9 and 11.

Amendment No. 14.—*Prototype desalting plant:* Appropriates $20,000,000 as proposed by the House to finance planning, design and specifications only. No part of the recommended appropriation is to be used for constuction until the proposed project has been reviewed by the appropriate committees of the Congress.

Amendment No. 15.—*Supporting assistance:* Appropriates $395,000,000 instead of $300,000,000 as proposed by the House and $414,600,000 as proposed by the Senate.

Amendment No. 16.—*Contingency fund:* Appropriates $12,500,000 instead of $10,000,000 as proposed by the House and $15,000,000 as proposed by the Senate.

Amendment No. 17.—*Alliance for Progress, development loans:* Appropriates $255,000,000 instead of $200,000,000 as proposed by the House and $337,500,000 as proposed by the Senate.

Amendment No. 18.—*Development loans:* Appropriates $300,000,000 instead of $265,000,000 as proposed by the House and $350,000,000 as proposed by the Senate.

Amendment No. 19.—*Overseas Private Investment Corporation, reserves:* Appropriates $37,500,000 instead of $75,000,000 as proposed by the Senate.

Amendment No. 20.—*Overseas Private Investment Corporation, capital:* Appropriates funds (estimated to be $20,000,000 in fiscal year 1970) as proposed by the Senate for use as a revolving loan fund to make dollar loans for high priority development projects in the developing countries.

Amendment No. 21.—*Administrative expenses, A.I.D.:* Appropriates $51,000,000 instead of $50,000,000 as proposed by the House and $51,125,000 as proposed by the Senate.

Amendment No. 22.—*Administrative expenses, State:* Appropriates $3,700,000 instead of $3,500,000 as proposed by the House and $3,730,000 as proposed by the Senate.

Military Assistance

Amendments Nos. 23, 24, 25 and 26.—*Military Assistance:* Insert appropriate section numbers; appropriate $404,500,000 instead of $454,500,000 as proposed by the House and $350,000,000 as proposed by the Senate; and restore language deleted by the Senate earmarking $54,500,000 for the Republic of China.

General Provisions

Amendment No. 27.—Deletes language proposed by the House and stricken by the Senate prohibiting the furnishing of economic assistance to any country which furnishes economic assistance to Communist China.

Amendment No. 28.—Makes available not more than $9,000,000 for research under Sec. 205(a) of the Foreign Assistance Act of 1961, as amended, instead of $8,000,000 as proposed by the House and $10,000,000 as proposed by the Senate.

Amendment No. 29.—Restores language proposed by the House and stricken by the Senate regarding the withholding of economic assistance to any underdeveloped country which purchases sophisticated weapons systems.

Amendment No. 30.—Conforms section number.

Amendment No. 31.—Reported in technical disagreement. The managers on the part of the House will offer a motion to restore the language proposed by the House with an amendment conforming certain section numbers in this bill to appropriate section numbers in the Foreign Assistance Act of 1969.

TITLE II—FOREIGN MILITARY CREDIT SALES

Amendment No. 32.—Deletes language proposed by the House and stricken by the Senate providing funds for expenses of foreign military credit sales.

TITLE III—FOREIGN ASSISTANCE (OTHER)

Amendment No. 33.—Conforms title number.

Peace Corps

Amendment No. 34.—Appropriates $98,450,000 as proposed by the Senate instead of $95,000,000 as proposed by the House.

Department of the Army—Civil Functions

Ryukyu Islands, Army, Administration

Amendment No. 35.—Appropriates $18,790,000 as proposed by the Senate instead of $14,000,000 as proposed by the House.

Amendment No. 36.—Makes available for administrative and information expenses $3,151,000 as proposed by the Senate instead of $3,100,000 as proposed by the House.

TITLE IV—EXPORT-IMPORT BANK OF THE UNITED STATES

Amendment No. 37.—Conforms title number.

Amendment No. 38.—Makes available $3,427,413,000 for program activity as proposed by the Senate instead of $2,537,343,000 as proposed by the House.

Amendment No. 39.—Makes available $2,420,000,000 for equipment and service loans as proposed by the Senate instead of $1,972,200,000 as proposed by the House.

Amendment No. 40.—Makes available $5,548,000 for administrative expenses as proposed by the Senate instead of $5,280,000 as proposed by the House.

TITLE V—GENERAL PROVISIONS

Amendment No. 41.—Conforms title number.

Amendment No. 42.—Deletes language proposed by the Senate prohibiting expenditure of appropriated funds in excess of those authorized to be appropriated for the fiscal year 1970.

OTTO E. PASSMAN,
JOHN J. ROONEY (except as to appropriations to two of the institutions on page 3 of the bill),
JULIA BUTLER HANSEN,
JEFFERY COHELAN, (except as to No. 25),
CLARENCE D. LONG,
JOHN J. MCFALL,
GEORGE MAHON,
GARNER E. SHRIVER,
SILVIO O. CONTE (except as to No. 25),
DONALD W. RIEGLE, JR.,
FRANK T. BOW,
Managers on the Part of the House.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 2543. An act to prohibit the movement in interstate or foreign commerce of horses which are "sored", and for other purposes; to the Committee on Interstate and Foreign Commerce.

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and a joint resolution of the Senate of the following titles:

S. 740. An act to establish the Cabinet Committee on Opportunities for Spanish-Speaking People, and for other purposes; and

S.J. Res. 54. Joint resolution consenting to an extension and renewal of the interstate compact to conserve oil and gas.

BILL PRESENTED TO THE PRESIDENT

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee did on December 18, 1969, present to the President, for his approval, a bill of the House of the following title:

H.R. 14916. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1970, and for other purposes.

ADJOURNMENT

Mr. JONES of Tennessee. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 7 minutes p.m.) the House adjourned until tomorrow, Saturday, December 20, 1969, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1424. A communication from the President of the United States relative to the appropriations for fiscal year 1970 for the Department of Health, Education, and Welfare, the Department of Labor, and the Office of Economic Opportunity (H. Doc. No. 91–206); to the Committee on Appropriations and ordered to be printed.

1425. A letter from the Comptroller General of the United States, transmitting a report on U.S. assistance programs in Ethiopia; to the Committee on Government Operations.

1426. A letter from the Deputy Secretary of Defense, transmitting a report of real and personal property of the Department of Defense as of June 30, 1969, pursuant to the provisions of the National Security Act of 1947, as amended; to the Committee on Armed Services.

1427. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing); transmitting notification of the location, nature, and estimated cost of certain facilities projects proposed to be undertaken for the Air Force Reserve, pursuant to the provisions of 10 U.S.C. 2233a(1); to the Committee on Armed Services.

1428. A letter from the Deputy Under Secretary of the Army (International Affairs); transmitting the index of the legislation enacted during 1969 by the Legislature of the Government of the Ryukyu Islands; to the Committee on Armed Services.

1429. A letter from the Comptroller General of the United States, transmitting a report on the effectiveness and administration of the comprehensive health services program under title II of the Economic Opportunity Act of 1964, Chicago, Ill., Office of Economic Opportunity; to the Committee on Education and Labor.

1430. A letter from the Assistant Secretary of Defense (Comptroller), transmitting the annual report of the Department of Defense relative to its disposition of foreign excess personal property located in areas outside of the United States, Puerto Rico, and the Virgin Islands for fiscal year 1969, pursuant to the provisions of section 404(d) of title IV of the Federal Property and Administrative Services Act of 1949, as amended; to the Committee on Government Operations.

1431. A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to amend the Federal Food, Drug, and Cosmetic Act to establish a code system for the identification of prescription drugs, and for other purposes; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DAWSON: Committee on Government Operations. Marketing of Federal obligations participation certificates (16th rept.) (Rept. No. 91–772). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. Government rejected consumer items (17th rept.) (Rept. No. 91–773). Referred to the Committee of the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. Procurement of 2.75-inch aircraft rocket launchers (Rept. No. 91–774). Referred to the Committee on the Whole House on the State of the Union.

Mr. DAWSON: Committee on Government Operations. Accident and injury data (Rept. No. 91–775). Referred to the Committee of the Whole House on the State of the Union.

Mr. POAGE: Committee on Agriculture. H.R. 11832. A bill to provide for the establishment of an international quarantine station and to permit the entry therein of animals from any other country and the subsequent movement of such animals into other parts of the United States for purposes of improving livestock breeds, and for other purposes; with amendments (Rept. No. 91–776). Referred to the Committee of the Whole House on the State of the Union.

Mr. EVINS: Select Committee on Small Business. Report on the position and problems of small business in procurements financed by the Agency for International Development (Rept. No. 91–777). Referred to the Committee of the Whole House on the State of the Union.

Mr. PERKINS: Committee of Conference. Conference report on S. 3016 (Rept. No. 91–778). Ordered to be printed.

Mr. PASSMAN: Committee of Conference. Conference report on H.R. 15149 (Rept. No. 81–779). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CUNNINGHAM:

H.R. 15355. A bill to amend the Small Business Act to authorize assistance to small business concerns in financing structural, operational, or other changes to meet standards required by Federal law or State law enacted in conformity therewith; to the Committee on Banking and Currency.

By Mr. FEIGHAN (for himself, Mr. RODINO, Mr. DOWDY, Mr. EILBERG, Mr. MESKILL, and Mr. DENNIS):

H.R. 15356. A bill to amend the Immigration and Nationality Act to facilitate the entry of certain nonimmigrants into the United States and for other purposes; to the Committee on the Judiciary.

By Mr. FREY (for himself, Mr. HALEY, Mr. CRAMER, Mr. ROGERS of Florida, Mr. BURKE of Florida, and Mr. CHAPPELL):

H.R. 15357. A bill to provide for the establishment of a national cemetery in Florida; to the Committee on Veterans' Affairs.

By Mr. GIAIMO (for himself, Mr. BOLAND, Mrs. HANSEN of Washington, Mr. MCDADE, Mr. PATTEN, and Mr. REIFEL):

H.R. 15358. A bill to amend the National Foundation on the Arts and the Humanities Act of 1965, as amended; to the Committee on Education and Labor.

By Mr. JARMAN:

H.R. 15359. A bill to prohibit certain uses

of the names of members of the Armed Forces who have died as a result of combat actions, and for other purposes; to the Committee on the Judiciary.

By Mr. McMILLAN:

H.R. 15360. A bill to amend the District of Columbia Minimum Wage Act to provide an exemption from the overtime provisions of that act for certain motor carrier employees whose hours of service are subject to regulation by the Interstate Commerce Commission; to the Committee on the District of Columbia.

By Mr. MEEDS (for himself, Mr. DANIELS of New Jersey, Mr. PERKINS, Mrs. GREEN of Oregon, Mr. THOMPSON of New Jersey, Mr. DENT, Mr. BRADEMAS, Mr. CAREY, Mr. HAWKINS, Mr. WILLIAM D. FORD, Mr. HATHAWAY, Mrs. MINK, Mr. SCHEUER, Mr. BURTON of California, Mr. GAYDOS, Mr. STOKES, Mr. CLAY, Mr. POWELL, and Mr. ESCH):

H.R. 15361. A bill to establish a pilot program designated as the Youth Conservation Corps, and for other purposes; to the Committee on Education and Labor.

By Mr. MEEDS (for himself and Mr. BLATNIK, Mr. KASTENMEIER, Mrs. HANSEN of Washington, Mr. ADAMS, Mr. FOLEY, Mr. DINGELL, Mr. HICKS, Mr. HOWARD, Mr. SAYLOR, Mr. PELLY, Mrs. MAY, Mr. WYATT, and Mr. SANDMAN):

H.R. 15362. A bill to establish a pilot program designated as the Youth Conservation Corps, and for other purposes; to the Committee on Education and Labor.

By Mr. MIKVA (for himself, Mr. LEGGETT, Mr. HALPERN, Mr. HARRINGTON, Mr. ROYBAL, and Mr. PODELL):

H.R. 15363. A bill to create an Office of Defense Review; to the Committee on Armed Services.

By Mr. MIZE:

H.R. 15364. A bill to amend the Interstate Commerce Act in order to give the Interstate Commerce Commission additional authority to alleviate freight car shortages, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. REID of New York:

H.R. 15365. A bill to provide that Federal Assistance to a State or local government or agency for rehabilitation or renovation of housing and for enforcement of local or State housing codes under the urban renewal program, the public housing program, or the model cities program, or under any other program involving the provision by State or local governments of housing or related facilities, shall be made available only on condition that the recipient submit and carry out an effective plan for eliminating the causes of lead-based paint poisoning; to the Committee on Banking and Currency.

H.R. 15366. A bill to provide Federal financial assistance to help cities and communities of the United States develop and carry out intensive local programs to eliminate the causes of lead-based paint poisoning; to the Committee on Banking and Currency.

H.R. 15367. A bill to provide Federal financial assistance to help cities and communities of the United States develop and carry out intensive local programs to detect and treat incidents of lead-based paint poisoning; to the Committee on Interstate and Foreign Commerce.

H.R. 15368. A bill to require labeling of certain packages transported in interstate commerce containing alligator hides or products made therefrom; to the Committee on the Judiciary.

By Mr. SCHNEEBELI:

H.R. 15369. A bill to amend title II of the Social Security Act to eliminate the reduction in disability insurance benefits which is presently required in the case of an individual receiving workmen's compensation benefits; to the Committee on Ways and Means.

By Mr. THOMPSON of Georgia (for himself, Mr. COLLINS, Mr. BROYHILL of Virginia, Mr. EDWARDS of Alabama, Mr. FISHER, Mr. GRIFFIN, Mr. JARMAN, Mr. KUYKENDALL, Mr. MONTGOMERY, Mr. PERKINS, and Mr. RIVERS):

H.R. 15370. A bill to prohibit public officials from operating dual school systems, and from requiring racial balance in school systems, and for other purposes; to the Committee on Education and Labor.

By Mr. WOLD:

H.R. 15371. A bill to amend the Interstate Commerce Act in order to give the Interstate Commerce Commission additional authority to alleviate freight car shortages, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ANDREWS of North Dakota:

H.R. 15372. A bill to establish a Joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. BROWN of California (for himself, Mr. BURTON of California, Mr. CARTER, Mr. DENT, Mr. HECHLER of West Virginia, Mr. HELSTOSKI, Mr. HOWARD, Mr. MIKVA, Mrs. MINK, Mr. OTTINGER, Mr. PODELL, Mr. POLLOCK, Mr. THOMPSON of New Jersey, and Mr. WOLFF):

H.R. 15373. A bill to provide for the establishment of not less than seven regional law enforcement academies, and for other purposes; to the Committee on the Judiciary.

By Mr. CELLER:

H.R. 15374. A bill to amend section 355 of the Revised Statutes, as amended, concerning approval by the Attorney General of the title to lands acquired for or on behalf of the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. COHELAN (for himself, Mr. REUSS, Mr. BINGHAM, Mr. CAREY, Mr. BRASCO, Mr. TIERNAN, Mr. CONYERS, Mr. PEPPER, and Mr. HATHAWAY):

H.R. 15375. A bill to establish a Commission to study and investigate incidents of alleged mistreatment or other misconduct directed against citizens of South Vietnam by U.S. troops operating in Mylai 4 Hamlet, Quang Nai Province on or about March 1968; to the Committee on Armed Services.

By Mr. CONTE (for himself, Mr. BROYHILL of North Carolina, Mr. BUTTON, Mr. HORTON, Mr. KLUCZYNSKI, Mr. STANTON, and Mr. WIDNALL):

H.R. 15376 A bill to amend the Small Business Act; to the Committee on Banking and Currency.

By Mr. CONYERS (for himself, Mr. WHALEN, Mr. BINGHAM, Mr. BROWN of California, Mr. BUTTON, Mr. GILBERT, Mr. HELSTOSKI, Mr. MIKVA, Mr. PEPPER, Mr. PODELL, Mr. REES, Mr. REID of New York, Mr. ROSENTHAL, and Mr. ROYBAL):

H.R. 15377. A bill to establish a national program to provide income supplements to every family in need thereof; to the Committee on Ways and Means.

By Mr. FEIGHAN:

H.R. 15378. A bill to establish a joint Committee on Environmental Quality; to the Committee on Rules.

By Mr. HANSEN of Idaho (for himself and Mr. McCLURE):

H.R. 15379. A bill to amend the Military Personnel and Civilian Employees' Claim Act of 1964 to permit the settlement of claims for personal property loss suffered by members of the uniformed services occupying offbase quarters if such loss is attributable to a major disaster; to the Committee on the Judiciary.

By Mr. HOGAN:

H.R. 15380. A bill to exempt FHA and VA mortgages and loans from the interest and usury laws of the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. McMILLAN:

H.R. 15381. A bill to amend the District of Columbia Income and Franchise Tax Act of 1947 with respect to the taxation of regulated investment companies; to the Committee on the District of Columbia.

By Mr. PERKINS:

H.R. 15382. A bill to amend the Watershed Protection and Flood Prevention Act of 1954, as amended; to the Committee on Agriculture.

H.R. 15383. A bill to provide for orderly trade in bicycles; to the Committee on Ways and Means.

By Mr. SCHEUER:

H.R. 15384. A bill to amend the Tariff Schedules of the United States to increase the exemption from duty to $300 in the case of residents of the United States returning from South America, Central America, the Caribbean, and certain other areas; to the Committee on Ways and Means.

By Mr. SIKES:

H.R. 15385. A bill to establish a Joint Committe on Environmental Quality; to the Committee on Rules.

By Mr. TIERNAN:

H.R. 15386. A bill to authorize the U.S. Commissioner of Education to establish educational programs to encourage understanding of policies and support of activities designed to enhance environmental quality and maintain ecological balance; to the Committee on Education and Labor.

By Mr. BOB WILSON:

H.R. 15387. A bill to provide additional penalties for the use of firearms in the commission of certain crimes of violence; to the Committee on the Judiciary.

H.R. 15388. A bill to amend the Internal Revenue Code of 1954 to provide for correction of inequities respecting losses of retired pay sustained by certain individuals who retired from the Armed Forces before June 1, 1958; to the Committee on Ways and Means.

By Mr. FINDLEY:

H.J. Res. 1037. Joint resolution to amend Middle East Resolution; to the Committee on Foreign Affairs.

By Mr. GROVER:

H.J. Res. 1038. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. HARRINGTON:

H.J. Res. 1039. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 or rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. O'NEILL of Massachusetts:

H.R. 15389. A bill for the relief of Nicolas Mitidieri; to the Committee on the Judiciary.

By Mr. TAYLOR:

H.R. 15390. A bill for the relief of George W. Sharman; to the Committee on the Judiciary.

By Mr. ZABLOCKI:

H.R. 15391. A bill for the relief of James E. Porter; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

359. The SPEAKER presented a petition of the City Council, Danville, Va., relative to activities of the American Electric Power Co., which was referred to the Committee on Interstate and Foreign Commerce.

EXTENSIONS OF REMARKS

PLIGHT OF THE FOOTWEAR INDUSTRY

HON. JAMES A. BURKE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. BURKE of Massachusetts. Mr. Speaker, may I bring to the attention of the Members of the U.S. Congress a speech made by Joseph M. Corcoran, president of Jones & Vining, Inc., of Brockton, Mass., on November 14 at the Statler Hilton Hotel in Boston.

Mr. Corcoran is an outstanding businessman in my congressional district, and is highly respected by those in the footwear industry. I thought because of the nature of his remarks the Members would be interested in what he had to say.

The speech follows:

REMARKS OF JOSEPH M. CORCORAN

I think that I ought to say at the outset that we are all not only in the same industry but, considering the stormy weather we're sailing through, we're all in the same boat.

But as suppliers to the shoe industry, perhaps our perspective is a little bit different, and so I'd like to look at the problem that we all face and see if our different perspective can't help us all to chart a new course.

The basic problem, of course, is imports. Everything else springs from it, it would seem. And even if imports are not the essential problem itself, at least they are the focal point from which stem a great many other problems which can be identified.

The industry is doing some remarkably fine work in attacking the problem. A great many committees and individuals are working very hard and very sincerely to apprise Washington of the seriousness of the import situation. I would like to say at this point that I stand one hundred per cent behind every effort being made to solve this problem.

But the wheels of government, as the textile people and others have discovered, are a long time turning. By the time the tariff situation is resolved, most of us may be long gone from the shoe industry.

In the meantime, we must do something about our immediate situation before it gets any worse. Like the bee, who couldn't wait for aerodynamics to figure out a way for him to fly, we have to get off the ground right now in order to save the domestic shoe industry.

In view of this, perhaps the different perspective I mentioned can offer yet another line of attack on the problem to supplement the industry's efforts in Washington.

Retailers aren't placing *all* of their orders overseas. It's just the *initial* orders that are going to the foreign manufacturers. For reorders they come to us.

After the initial styles and sizes are sold—or almost sold—to the public, and the retailer knows which ones have caught the buyer's fancy, do they rush through more orders for these items from Europe?

They do not. They show their belated confidence in us, and their dependence upon us, by telling us to go ahead and duplicate the most popular European shoes immediately.

They tell us to go ahead full speed, tool up fast, get the machines going and the people work. We then recruit additional help through frantic, costly advertisements and other promotional tools. When the people come in, we have to train them fast, because the ones we trained last season have gone off to higher-paying, steadier jobs in other industries. To meet delivery dates, we have to pay plenty of overtime, of course.

We get the orders out. Then what happens? We have to shut down the machines and watch the help go off to other jobs while we wait for the next big rush. Today, with lower unemployment and higher pay outside the shoe industry, we've lost this season's workers and any opportunity to teach them our skills.

Another factor is the problem of cash. Now, we must have operating cash to exist. But the retailer can't pay us immediately because he's used up his cash paying on the line for European shoes. As a result, the domestic manufacturer waits anywhere from 90 to 120 days for his money.

We understand the retailer's problem. He's got a right to conduct his business to make a profit, too. But we also know that, in all American industry, there were 800 business failures last year, predominently attributable to the fact that suppliers couldn't hold on until they collected on their accounts receivable.

Today, most people are paying around 12 per cent for their money, if you average it out. If a way could be found to force the foreign factories to pay interest on the money tied up in shoes manufactured for American distribution—instead of demanding and receiving cash—it could make a difference of 25 per cent or more in their charges to our retailers. This would go a long way towards offsetting our necessarily higher costs. Narrowing the mark-down would cause the retailers to take another look at the disadvantages of purchasing abroad, because they know we produce better products faster.

They know, but they forget. We haven't told them lately. We haven't gone over with them the basic advantages of long-term savings over short-term bargains.

Footwear News, in its October 16th issue says, and I quote:

"A Footwear News check of women's shoe manufacturers found most had noticeable delays in receiving orders. But retailers' reluctance to commit themselves for spring also is attributable to uncertainty about the economy, tight money and previous commitments on imports."

Note the phrase "previous commitments on imports." If the retailers had such previous commitments on domestic orders, they'd have no such reluctance—they know us, and they know we're both flexible and dependable and we shouldn't let them forget it. We should also remind them—and ourselves—that any kind of upheaval in Europe—economic, political or war—induced—would put this country in a terrible spot if we didn't have a healthy domestic shoe industry. We can't let it go down the drain, for the retailer's sake as well as our own.

Now, you may have the impression somewhere in the back of your minds that as a representative of the last makers I'm talking to you from the sidelines—viewing your troubles from the point of non-involvement.

This isn't the case at all, but you cannot be faulted for gaining such an impression in view of some of the advertisements for foreign shoes.

You've seen ads reading "Shoes from Italy made on American lasts." "Shoes from Spain made on American lasts." "Shoes from Japan" and so forth.

These statements are just not true. I know of no foreign shoes made on American lasts. They decide on the style, make the last model here, and send it to Europe where the lasts are made in foreign factories. No domestic last manufacturer I know is producing lasts for Europe. And I know of none who are planning to.

Like you, we get into the act later, when you ask us for a rush re-order of an initial order which neither you nor we had anything to do with. We send you more of what we never sent you in the first place, just as you do with the retailer.

So we all get into the act after the retailer has found out what the public wants, based on what the foreign manufacturers gave him to sell. And we wait for our money just as you do. In fact, we wait for the same money you wait for, when you come right down to it, like the PT boats in World War II, our factories and our people are considered just as expendable as yours.

The people part is the most tragic part of any economic upheaval. Because the shoe field is a low-paying industry by American standards, we find it difficult to attract young people. What kind of long-term security can we offer them to offset the higher wages in other areas, if we're going to have to lay them off between orders?

We're certainly not going to attract these youngsters, or convince retailers and the consumer of the advantages of American-made shoes with the impression we're giving now. We are putting forth an image of an old and tired industry—a picture of old people, old factories and practically no marketing sense—in the greatest marketing nation in world history, by far.

This must make the importers happy—they don't have to do much to hasten our doom. We've made a do-it-ourselves project out of the situation.

Now, I'm not going to go any further about our problem without proposing a solution. It's basic, and it can be acted upon right away. It takes work, of course, but it's the kind of work we know how—or used to know how—to do better than anyone.

You may remember that the Last Makers Association wholeheartedly recommended the adoption of the Battelle Institute's report on sizings and gradings. We did this because we felt strongly that the substitutions of over-all standard grades would eliminate the specific size tariff problem and not sacrifice fit or fashion.

This alone would offer the retailer a major advantage. The Europeans leave him stranded with no inventory of the most popular sizes and styles, and foist on us the chore of producing them on the double.

We can forecast the styles and sizes which will be most in demand. We know what Europe is doing as soon as they know, if not before. And we can produce a variety of sizes so that the retailer will have the ones he needs most, the ones he won't be stuck with. The less called for sizes will still be available to him and he will be able to reorder the ones that are in demand from the supplier he ordered them from in the first place.

Here is our opportunity to restore our rightful place in the market. But we have to let the retailer know that we are wide awake, not old and stodgy. We've got to reflect confidence in ourselves and our tradition as the greatest marketing nation in the world. We're not kids on our first date—we're not asking for the order, we're insisting on it, because we know we can produce. We want the retailer to know it.

We should begin immediately to concentrate on better marketing programs—from the actual person-to-person hard sell through all the ancillary back-up of the most sophisticated promotional, display and advertising material.

We've got to convince the retailer that we can anticipate the shoe styles and sizes that will sell, just as well, if not better than the Europeans can. We know what Americans want in other fields—why not in footwear?

The Europeans, as I said, are producing from our basic last models. We can certainly make lasts and shoes from our own basic models. We can produce them faster, deliver them faster, handle re-orders immediately, and turn out a better, more durable all-around product.

That leaves the problem of costs. The Europeans can undersell us. Can this be solved? I believe so.

Starting with domestic manufacturers from the beginning is going to give the retailer advantages which will outweigh his apparent big mark-up on foreign shoes.

We should remind the retailer that, with us—as he's undoubtedly learning now—his shoes will be delivered, if we are the initial manufacturers, when he wants them. This goes for both his first orders and his re-orders. With the domestic manufacturer already tooled up, re-orders can be handled speedily, efficiently and with no worry about time-lag, during which the consumer can change his mind about styles, or simply become impatient and decide to wait until next year to buy any but the most basic shoes out of necessity.

And—through us, or because of us—the retailer's commitments, which later become previous commitments, are completely flexible, as opposed to rigid, non-cancelable orders placed overseas.

Still on the American vs. European cost differential, we must show the retailer that it is inefficient as well as expensive to go abroad on a one-shot deal. He finds out that style XYZ is a runaway popularity winner. Then, knowing that the Europeans will only accept cash for re-orders, to be delivered sometime or other, he must wait for the new shipments to cross the ocean. So he comes to us and has to wait anyway. This simply wouldn't be the case if he had ordered from us in the first place. When he pulls us in after the barn door is closed, he can't reasonably expect fast production.

I believe we can show the retailer why they should order from us in the first place. I suspect that we've been beefing about a problem whose practical aspects could well unravel the whole situation. Have you reminded a retailer lately that with us he doesn't have to tie up cash immediately, as he does abroad. That he doesn't have to limit his quantities in case a style or grade doesn't sell? That with us he doesn't have to gamble on a suddenly-popular shoe not being produced immediately to meet the demand?

You might call this hard-sell. But it's at least selling facts. Or you might call it "Hard-Reminding", telling the retailers facts they once knew, before the so-called mark-up advantages blotted out all other considerations.

We must radiate more confidence; confidence that we can produce and reproduce in a hurry, especially if we're in on the job from the beginning, which we should be. We must show the confidence that we have the talents to provide variety and style in shoes, just as we do in clothes and automobiles and food and thousands of other products.

And, every once in awhile, we must keep inserting the thought that they don't have to tie up their cash when they're dealing with us.

Nobody believes that the Europeans are better marketers than we are. But they have taken chapters from our marketing texts and used them to sell our retailers. And they've done it in a hurry—they're quick studies. As recently as 1960, when the only imports in any quantity were coming in from England, their "packaging" consisted of two shoes tied together with shoelaces—no attractive wrapping or point-of-sale back-up promotion.

Unless you believe that all our marketing know-how and marketing experts have left our shores for Europe, you have every reason to believe that we *can* still take advantage of American creative promotional expertise.

Basically, what I'm saying is that while we should keep pounding on the doors in Washington, we can't wait for the portals to open if we are to survive.

We must understand that our position against imports is soundly based in economics, and we must make the position clear to the retailer. We must organize our facts, and sell hard to show the retailer that *his* future—not just ours—resides in a sound domestic shoe industry, and not in blinding short-term gains.

The story is as old as Faust. You get a lot now, but you give away your soul for it tomorrow. And we'd better sell hard on this point, because if we don't sell it, we've lost the right to survive. We've got to be the vigorous industry we once were, or we've lost the right to ask for anything.

We reflect confidence when we breathe slowly, instead of gasping. And we'll all breathe easier when it dawns on us that we can get back to the business of building a strong shoe industry in America.

We can build such an industry if we do our job right. And an important part of this job will be done if you merely point out one major truth to your customers.

That truth is this: a strong basic shoe manufacturing industry is as vital to the retailer's existence as it is to ours.

Because, if we go by the boards, the European manufacturer will have a stranglehold on the American retailer—what will mark-ups mean then?

And, if the domestic shoe manufacturing industry passes into limbo, why can't the European manufacturer, in addition to raising prices as high as he likes, also start his own retailing chains in America?

The caption under a recent cartoon in Leather and Shoes reads:

"I always bought my shoes cheaper from Franklin Discount, and I'd be right there today if they hadn't gone out of business."

That's what I mean. Thank you.

FAILURE TO PASS EXTENSION OF VOTING RIGHTS ACT OF 1965

HON. DOMINICK V. DANIELS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. DANIELS of New Jersey. Mr. Speaker, last week the House, by a margin of only a few votes failed to support the extension of one of the most important and effective legislative endeavors in the long struggle for civil rights—the extension of the Voting Rights Act of 1965.

When the act was first passed in 1965 we were convinced that it would take at least a decade to correct the injustice which had developed over the past century. Political expedience, however, required that the 1965 act have a lifetime of only 5 years.

I shall not go into the statistical evidence of the success of the 1965 act except to note that in the six States fully covered by the act, Negro voter registration rose in 3 years from 877,000 in 1965 to 1,617,000 in 1968. In the one State not fully covered, Negro voter registration rose by 60,000 in the same 3 years. It had been hoped that another million Negro voters, who had until now been afraid to vote, could be registered.

The 1965 act was basic in that it not only recognized the constitutional right to vote but enforced the means to obtain and retain the right as well.

Some of us too often forget that the Constitution is meant to be followed in all cases and all circumstances. By so doing the American system will prosper.

The Constitution was not meant to be followed only when convenient or when following it does not cause us discomfort or hamper our ambition. By so doing the American system will fail those who keep the faith as well as those who misuse it. The consistent deprivation of rights of one particular group of citizens, whether they are black or white or poor or old is a cancerous weakness in any democracy. It will infect even the healthiest portion of the body politic.

I have now considerable concern about the radicalization of an increasing number of middle-class working Negroes who are just now coming into the "establishment." These people, believing that their own hard work and the support of their rights by the Government have put them within reach of success and true equality, may lose faith in the system and join the radical fringes if they become convinced that the Congress will not protect their guaranteed rights.

GALLUP, N. MEX., HONORS OUR SERVICEMEN

HON. ED FOREMAN

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. FOREMAN. Mr. Speaker, every community in this great Nation has servicemen who have served, or are serving, in Vietnam. We are very proud of our young American servicemen. This week in the city of Gallup, N. Mex., the community is recognizing the dedication of one of their servicemen. Sp4c. Santos Abeyta is an example of our outstanding New Mexico residents in the Armed Forces—young men we can be proud of because of their dedication to the American cause of peace and freedom.

Specialist Abeyta has just returned from Vietnam. He distinguished himself by exceptional service and was awarded the Bronze Star Medal for meritorius service, and the Army Commendation Medal with the Oak Leaf Cluster.

In awarding just one of these medals Army officials stated:

Private First Class Abeyta distinguished himself by exceptional heroism in connection with military operations against an armed hostile force in the Republic of Vietnam on 30 May 1969 while assigned to Company C, 4th Battalion, 12th Infantry, 199th Light Infantry Brigade. On that date, Private First Class Abeyta was participating in a reconnaissance in force operation when his unit came under intense hostile small arms fire. As his squad maneuvered to protective cover, Private First Class Abeyta exposed himself to the withering enemy fire long enough to draw their fire and determine their exact location. Having determined the enemy's po-

sition, he and his squad leader assaulted the concealed position and succeeded in neutralizing it. His alert and aggressive actions contributed immeasurably to the defeat of the enemy force with no casualties among his fellow soldiers. Private First Class Abeyta's valorious action and devotion to duty were in keeping with the highest traditions of the military service and reflect great credit upon himself, the 199th Light Infantry Brigade and the United States Army.

As the residents of Gallup and radio station KGAK honor Specialist Abeyta and his family, I know the Members of Congress will want to join me in expressing appreciation to our dedicated servicemen and wishing them and their loved ones a peaceful, happy holiday season.

WALK FOR DEVELOPMENT

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. ERLENBORN. Mr. Speaker, there is a project called Walk for Development, which is sponsored by the American Freedom from Hunger Foundation, 1717 H Street NW., Washington, D.C. 20006. This project raises money to help poor people and, more important, gets young people involved in the problems of their less fortunate contemporaries.

In order to make his walk useful, each participant must first persuade one or more adult sponsors to contribute to the charities, which have been announced in advance. Sponsor contributions vary. Some pay 25 cents a mile, some a dollar. Some young people walk for one sponsor, some for a hundred, some for even more.

One of these Walks for Development was held last May in DuPage County, Ill.

The difficulties of organizing this walk were described in an article which appeared in a recent issue of Good Housekeeping magazine. Because of some legal technicalities, which were troublesome but altogether proper, the money was impounded by the attorney general of Illinois for a time.

It was released, however, in time so that more than $77,000 could be turned over at Thanksgiving time to help people in Illinois, in Mississippi, in India, and in Biafra.

This is a time when many young people have been misled into violence, destruction and hate. In such a time, it is refreshing to hear of 5,000 youngsters and a few adults who would undertake a 30-mile walk. None has ever known real hunger or poverty, but their impulses are toward kindliness, wholesomeness, and charity.

Mr. Speaker, I insert the following excerpts from the Good Housekeeping article in the RECORD:

THEY WALK TO FEED THE HUNGRY

(By Charles and Bonnie Remberg)

Just the day before, 3,000 young people had invaded tiny Zap, North Dakota. In a drunken orgy of window-smashing and fire-setting, they had roamed the streets and left the helpless village in shambles.

Now, more than 800 miles away, the early Sunday-morning stillness found some 5,000 teen-agers massed on a high school football field in the tranquil Chicago suburb of Villa Park, Illinois.

Tense excitement crackled through the crowd as speakers shouted from a platform to deafening cheers. Suddenly, the mob broke from the field and surged into the street. Those in the lead were running. Filling the pavement curb-to-curb, the teens headed for a middle-class residential section, where many families were still asleep.

Gleefully, a handsome eighteen-year-old named Chuck Steinbach, the driving force behind the youthful throng, leaped to the platform for a better view. "My God!" he shouted. "There's no stopping them now." For, as far as he could see, a mighty human river rolled resolutely forward. . . .

Startled homeowners who stumbled, still in nightclothes, to their picture windows may have felt apprehensive at first. But before that day last May was over, adults in Villa Park and surrounding communities realized that these young people stood in sharp contrast to their peers at Zap and other sites of recent adolescent destructiveness. Instead of hell-raising, these teen-agers were on a "Walk for Development," peacefully giving their energy to help fight widespread and growing human hunger.

Such walks began in this country about a year ago, under the auspices of the American Freedom from Hunger Foundation in Washington, D.C., a private, nonprofit organization supported by leaders in business, labor, social welfare, agriculture and education. Since then, an estimated 150,000 largely-middle-class young people, from 35 communities, ranging in size from Aurora, Iowa (population 600) to Los Angeles, have turned their "sole power" into dollars for the needy.

Each walker recruits "sponsors" to pay him, from a few cents to several dollars, for every mile he hikes over a charted 26- to 32-mile course. So the youngsters not only draw public attention to the problem of hunger but earn hard cash for a variety of imaginative self-help anti-poverty projects in the United States and abroad. Thus far, youthful walkers have raised almost $1,000,000, with more walks scheduled for this fall.

* * * * *

The Villa Park, Illinois, walk was started by high school senior Chuck Steinbach. The son of a television repairman, Chuck is a soft-spoken young man with sideburns and a Bobby Kennedy mop of brown hair, a mind keen enough to put him on the dean's list, and a personal magnetism that made him student-council president at Villa Park's sprawling Willowbrook High School. Although he grew up amidst the flowering trees and comfortable homes of Chicago's western suburbs, he has what friends call "exceptional sensitivity" for the less fortunate. "When Chuck looks at a picture of a starving kid in Biafra," says Richard Cargill, the student council's faculty adviser, "I think he *feels* hunger."

During the summer of 1968, with Biafra much in headlines, Chuck grew increasingly aware of hunger as a mounting world crisis. He read expert predictions that within the next three decades, as the world's population doubles, millions will die of famine. Already seven persons every minute are dying worldwide from malnutrition and starvation, and one child in three now living will carry for life the irreversible effects of food deficiencies. Even in the United States, the most affluent nation on the globe, government researchers estimate that at least 10,000,000 impoverished men, women and children suffer from inadequate diets. "I could see that hunger is linked to a whole range of social problems—war, racism, political chaos, poverty," Chuck recalls. "But like most other people, I didn't see how I could help."

Then at a church youth conference, he heard about the Foundation's walks. Curious, he drove to Madison, Wisconsin, and on November 16 joined in one with 5,500 other hiking youngsters.

"It was one of the most moving experiences of my life," he remembers. * * *

By early last February, Chuck Steinbach had formed a "core committee" of thirteen enthusiastic students from eleven suburban high schools and colleges to organize a Walk for Development in Villa Park and adjacent communities.

On the surface, the group seemed almost hopelessly diverse. One was a boy who spent nearly all his spare time at the library; a few had been involved in such activities as voluntarily tutoring ghetto children; several were style- and popularity-conscious youngsters whose main interests were parties and school-sponsored events, and another was a boy who had compiled one of the worst disciplinary records at his high school.

All, however, were committed to a single philosophy. Explains Tom McDermott, a freshman at Elmhurst College: "We wanted to show other students that it's possible to help improve society without being disruptive and destructive. And we wanted to wake up the adult community to the problem of hunger and to communicate that kids can be responsible when given a chance to do something meaningful."

With May 11, Mother's Day, agreed upon as the walk date, the committee began attacking the problems of organization, coordination and troubleshooting, all the while scrambling to stay abreast of school obligations and part-time jobs.

From the Foundation, they obtained a long list of carefully researched foreign self-help projects needing assistance. They chose two to help: an institute in Lucknow, India, that teaches young farmers literacy and new agricultural methods, and a center in Biafra which is establishing a weaving industry for displaced persons. As part of their learning process, however, committee members themselves were to ferret out deserving domestic projects.

For more than two months, a subcommittee headed by Jan Wallinder, seventeen, followed leads supplied by social agencies, church groups and antipoverty organizations in the Chicago area. To their surprise, they discovered that hidden among the affluence of their own DuPage County (where, in Chuck's words, "Most of us equate hunger with not having a second dessert") was considerable hard-core poverty. Census statistics revealed that at least 4,300 families in the county fall below the poverty line, including some who live nineteen to a two-bedroom apartment or who exist on beans and bread in flooded basements and rat-run shacks.

Certain that publicity about such need so close to home would shock the uninformed, Jan and her group kept digging until they discovered a newly formed organization called Project HOPE. It had been started by concerned citizens in nearby Wheaton to buy and rehabilitate homes with volunteer funds and rent them cheaply to welfare mothers and their children. Then, through personal counseling from HOPE members, families could learn to utilize their own talents and resources to shake off the yoke of poverty.

As the second domestic beneficiary, the committee chose the Delta Ministry, an interfaith program aimed at making unemployed Mississippi fieldworkers economically self-sufficient.

As word of the walk spread, students from more than eighteen high schools and six colleges from throughout the western suburbs wanted to join in, so schools chairman Tom McDermott took on the massive job of organizing subcore committees in each school to handle publicity and walker registration. Other committee members tracked down amateur radio operators and rescue squads to operate a communications net-

work on the day of the walk. Still others persuaded adults to man the thirteen checkpoints that would be set up every few miles along the route where sponsor cards could be stamped to show the mileage covered. In addition, there were hundreds of "Sole Power" lapel buttons to be made and sold to cover organizing costs; press releases to be written and news conferences conducted speaking engagements about world hunger to be lined up during a whirlwind visit by Wolf and a United Nations food expert; bank accounts to be opened; tax receipts to be distributed to contributing sponsors; toilet and food facilities for 5,000 to 10,000 walkers to be arranged.

Just laying out the 30-mile route mushroomed into a logistics nightmare. Chuck and route chairman Jill Feldmann, seventeen, spent hours driving suburban streets before settling on a course that began and ended at Willowbrook High School and twisted through five suburbs. They spent long nights poring over law books to be certain that their plans conformed with village ordinances because, as Chuck explains, "The idea was to work within the law and walk within the law." They appeared before village boards to explain their cause and persuade city officials to grant parade permits, and then they had to confer with police officials to coordinate manpower deployment and traffic control for the walk day.

Not everything went perfectly, however. "We were always fighting the fear people have of kids," Jill says. "It seems that when they think of students getting together these days, they usually think of riots." Also, the teens discovered, in some suburban areas many persons still oppose efforts to aid the poor and the sending of money overseas. Policies at some schools prohibited publicizing walk plans. Trustees on one village board delayed nearly a month before finally granting a walk permit; another town refused to okay the solicitation of sponsors. When the committee wrote to 150 area churches asking for help in making sandwiches for the walk and in spreading information about world hunger, only twenty responded. "Some kids who had never been involved in anything before were discouraged by all the doors that closed," says nineteen-year-old Cathy Johnston, who served as Chuck's coordinator. "But they learned to keep going until they found doors that opened."

By the time the walk was just ten days off, students were eagerly pursuing sponsors. Enthusiasm was high.

Then trouble surfaced that made earlier problems seem like minor annoyances.

Right-wing elements in the western suburbs suddenly began issuing a barrage of false accusations. The Foundation was a Communist front, the extremists charged, and the teen-agers were trying to "undermine a fundamental American institution" by hiking on Mother's Day. Some of the proceeds would be pocketed by the kids instead of being given to the poor, some opponents asserted, and the Foundation would keep at least 65 percent of the money raised. One critic even saw evidence of a diabolical plot in the fact the the line of walkers would temporarily block off residential driveways. A "newsletter," filled with innuendo and insinuation, was widely distributed and a telephone campaign was launched to urge parents to withdraw permission for their children to walk and sponsors to cancel their pledges.

"After all their work, the kids were pretty shook at first," recalls Mrs. Linda Eller, a suburban youth leader. "But they realized they had a responsibility to fulfill, and in the face of this intense hostility they forged ahead."

On the Friday night before Mother's Day, the committee held mass sandwich-making parties with bread, cheese and peanut butter donated by local businesses. Saturday they put up route markers and tied up scores of loose ends. That night, Chuck was so exhausted he couldn't sleep. "All that work," he kept thinking, "and tomorrow is it."

Mother's Day dawned to a cloudless sky, and by 6 A.M. young people were starting to gather on Willowbrook's grounds. White kids in hippie garb and blacks with Afro hairdos milled together with girls in bell-bottoms and sandals and boys with hiking boots and knapsacks. Kids whose parents had dropped them off in expensive cars stood talking to a boy who had walked in from Aurora, Illinois, 25 miles away. Whole families, including grandparents, stood hand in hand. Many teens had brought younger brothers and sisters. Ministers who were sponsored by their congregations, and teachers sponsored by their students, arrived to walk. One boy flashed sponsor cards bearing almost 250 names. High school track teams and college fraternities and sororities had challenged each other, and some carried hand-lettered signs reading, "30 miles on a dare, show the world how much you care." A young woman in a wheelchair and two retarded youths waited quietly for the walk to begin.

By eight o'clock, a crowd of more than 5,000 filled the school's athletic field. When core committee member Jay Lyons climbed onto a platform and shouted, "How many are going 30 today?" the responding cheer was ear-splitting.

Then a state legislator began calling out the names of schools represented. The mob was fired into action. The six track teams broke from their positions and ran into the street, with the walkers surging after them. The Walk for Development was under way.

After the initial two and one-half miles, the curb-to-curb tide of walkers reached the first checkpoint. As they swarmed around the tables where volunteers from women's clubs and civic organizations were stamping sponsor cards, the committee presented a daisy to each mother among the walkers.

By the third checkpoint, three and one-half miles away on the shore of a lake in suburban Glen Ellyn, the dropout rate was beginning to show. Relays of "toe trucks" were picking up those who could not continue, and the thinned line kept mostly on sidewalks now. Men in radio communications cars estimated that the walk stretched for more than six miles.

By the lake, many youngsters, already blistered, tied their shoes around their necks and went barefoot. A father led his two sons in leg relaxing exercises. One eager hiker, an eight-year-old girl, admitted, "This sure gets my feets sore. But," she grinned, "I'll keep going 'cause I'm worth 70 cents a mile."

It was nearly noon when the trickle of walkers arriving at the fourth checkpoint, nine miles along the route in Wheaton, swelled to a stream. Hundreds of sandwiches were served out of new garbage cans, taped with signs that said: "We're walking because some people still have to eat from these." The walkers, many limping with pain, slumped wearily to the ground to eat. A volunteer nurse applied bandages to blistered feet.

Slowly the sky darkened, and a cool rain began. Still the walkers pushed ahead.

On the way to checkpoint six, a middle-aged housewife opened her home as a rest-room stop. By early afternoon, 150 kids an hour were trooping into her two bathrooms. "It's a wonderful way to spend Mother's Day," she declared. "We can all learn something from these kids. They're showing the good that can come if every person just does what he can on every need he meets."

At checkpoint eight, ten miles from the finish line, a rock band was on hand to boost morale. But, one hiker observed as he bandaged his numb and bleeding feet, "We're on automatic pilot now. The only thing that keeps us going is sheer will."

"Kids didn't even want to stop to rest," co-coordinator Cathy Johnston remembers, "because they knew their legs would tighten up and they wouldn't be able to walk." Along the way, grade-school children who wanted to help set up free water and fruit juice stands.

The track teams, running the full course, had arrived back at Willowbrook before one o'clock. At five, the rain over, walkers started limping in. Many had worn through their shoes and the soles of their socks.

After eight, as darkness fell and the temperature dropped, Chuck dispatched trucks to pick up those walkers still on the route. Not one would accept a ride.

The last walkers reached the edge of the school grounds at nine. Some students were carrying others whose legs had given out. One father was in the group with his seven-year-old son, and the eight-year-old girl with "sore feets," whose older sister had dropped out earlier, had walked the distance. One teen-age girl crossed the finish line and collapsed, sobbing, "I made it, I made it!"

That evening, the school had been rented to an adult theater group. As one of the playgoers arrived, he looked disdainfully around at the exhausted young people sprawled in his path. "Why don't you get these kids out of here?" he complained to officials. "People are coming here to see a drama."

It never struck him that his statement was the ultimate in irony.

In all, in this area where in Chuck's words, "people get in their cars to go across the street to the mailbox," 1,800 youngsters had crossed the finish line.

In the days that followed, the walkers hobbled back to their sponsors, displayed their stamped cards and collected more than $60,000.

Even more important than the money, potentially, was the human concern the walk had awakened. Some adults, alerted for the first time to poverty in DuPage County, are working to establish branches of Project HOPE in their own communities. Teachers are begininng to integrate studies of world hunger and the effects of malnutrition into their courses. Teen-agers are looking for other ways they can help combat poverty, and Chuck Steinbach and his committee are drafting a list of projects in the Chicago area that need volunteer aid. "There is a lot that Americans can do," says Bill Kokontis, a student from Maryknoll Seminary. "We have a lot of wealth—not just money, but healthy people with energy who can think and work."

Other towns, too, have found walks to be the catalysts for a wide variety of community involvement. In Eugene, Oregon, the mayor was so impressed with the responsibility of young people that he established an active youth-advisory council to his office. In Minneapolis, school curricula have been changed to deal more realistically with poverty and other social issues. In Buffalo, adult leaders have laid plans for working with teen-agers on a full range of community projects. In Denver and other cities, some teens, because of their walk experiences, have decided to pursue careers that deal with social problems.

At the next-to-last checkpoint on the Villa Park walk, a long-haired girl sat bandaging her feet.

"Do you thing we're going to make it?" her boy friend asked.

"Of couse we're going to make it," she answered. "I've got a feeling we're going to make it for a long time to come. Maybe tomorrow is going to be better, after all."

ALLEGED MASSACRE AT SONGMY, IN VIETNAM

HON. ALAN CRANSTON

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Wednesday, December 17, 1969

Mr. CRANSTON. Mr. President, the Far Eastern Economic Review, a widely read political and economic weekly published in Hong Kong, editorialized on December 4 about the alleged massacre at Songmy, in Vietnam. The editors cogently commented on that tragic incident. I believe their remarks are worthy of the attention of all Senators. I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A DIRTY WAR

When American enquiries have unearthed all the available facts about the massacre at My Lai, the name might rank with Pearl Harbour, Lidice and Hola Camp as symbols of the depths to which anger, violence frustration can reduce man. The evidence so far suggests that a unit of combat soldiers were driven to breaking point in a war against an elusive enemy who has, by terror or persuasion, won the co-operation of a sizable proportion of the population the Americans are trying to defend. For the GI in Vietnam, every civilian is a potential guerilla.

Most of the South Vietnamese people he meets are either the dregs of a de-moralised society (the pimps, the prostitutes, the blackmarketeers) or the badly-trained and poorly-led ARVN. For him, the war makes little sense; it has no obvious connection with America's national interest; it seems impossible to win on the battlefield, and it has done little to create a strong, free society in the South which could provide a viable alternative to communist domination. A war fought for lost ideals must sour the souls of the men conscripted to defend South Vietnam from external agression, in which they find the foe so difficult to distinguish from the friend. Saigon claims that at My Lai the Americans defeated a "communist stronghold". It says much about the character of the war that defenceless old men, women and children could be so described.

If the massacre took place it was unforgivable, but it can be understood. The brutality of both sides is sickening. Hanoi's propaganda about My Lai and other alleged massacres comes ill from men whose hands are stained with the blood of the mass murders at Hue (the only difference between that and what purportedly happened at My Lai being that the NLF and the Vietcong were not indiscriminate, and were better able to distinguish between acceptable compatriots and "collaborators"). The most repulsive communist dictator, Walter Ulbricht, has of course joined in the worldwide cries of horror, and too many organs of opinion in those countries which are committed to the rule of law have joined in the chorus which has prejudged the issue.

Too many people have forgotten the real import of the horror of My Lai—that the US has not hesitated to open investigations or to bring criminal proceedings against those alleged to be responsible. It is unthinkable that a communist state would publicly accuse members of its armed forces of acts of barbarism, but American standards demand that justice be done, whatever the cost to the nation and to the morale of its soldiers. If a massacre did take place, the impending revelations can only increase doubts about the war in the minds of the American public and will deepen that nation's continuous soul-searching. This, too, is a factor in the strength of America: the nation may be divided over the war, but its democratic structure can withstand division while ensuring that responsible men are held up to constant public scrutiny. Opinion may be swayed by revulsion over My Lai and thus have great impact on the future conduct of the war. But what the American people must ask themselves is whether a war which can reduce men on both sides to the level of animals can realistically be regarded as a crusade to defend those values for which American civilisation stands.

PENNSYLVANIA SOLDIER GIVES VIEWS ON VIETNAM

HON. J. IRVING WHALLEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. WHALLEY. Mr. Speaker, I have received recently a letter from a Pennsylvania soldier, fighting in Vietnam, outlining his thoughts on various aspects of the Vietnam war. Sp6c. David C. Cavaness, serving with the 19th Engineer Combat Battalion at Bao Loc, Vietnam, stated his concern for the "future of Southeast Asia," and I think his letter deserves national recognition. The text, printed by one of our local newspapers, the Windber Era, is as follows:

SOLDIER GIVES VIETNAM VIEWS

DEAR CONGRESSMAN: I and many others have patiently waited a long time for results for America from all the compromising to the enemy in Vietnam. The elimination of air raids has just enabled more men and material to come south to kill more Americans, Allies and civilians. Everyone can now see that the Paris talks have just been used by the Communists as an extension of the battlefield. The pull-out of our troops adversely affects the war, both directly and morale-wise—particularly in the largely VC-held Delta region. Also, why are we pulling vital troops from here when we still have combat units in the Dominican Republic? (Why are they there?)

The Administration's consideration of antimilitary proposals by the "peace-niks" and their supporters has just cost us more lives, time and money. We cannot just tell the ARVNs to take over the war because the South Vietnamese simply are not capable, either now or in the near future. Korea showed that you can't turn a mass of Asian peasantry into a modern military machine quickly, or even in several years: it has taken two decades to make the Korean Army as competent and battlewise as it is today.

The american people are rightly disgusted by the present handling of the war and a "No-Win" policy. However, it is just a vocal few (including the American Communists) who want us to pull out unilaterally. I hope you are not being influenced by the few rabble-rousers conducting the current anti-war riots in U.S. cities. I'm sure the great majority of our loyal citizens want a successful solution to the war; a great many of us want to WIN. War without victory is still un-American.

Our military leaders must be allowed to use the full potential of our tremendous air and sea power and other weaponry as needed to put an end to this endless war. Who is the Administration afraid of? The subversive peace-niks? Red China? The Soviet Union? None of the Communist powers could do any more in Vietnam than they already are doing. Atomic weaponry is not needed. For example, the enemy is mostly dependent on the port of Haiphong which can be easily blockaded or destroyed.

Dictator Ho Chi Minh's recent death automatically leaves a large power vacuum in North Vietnam. The time to win the war is NOW. The enemy is losing the war and we must now press on for total VICTORY and not surrender any Vietnamese to the evil Communists. The Communists can be defeated; the civil wars in Malaya, Bolivia, Greece and Korea are examples.

I am vitally concerned for the future of Southeast Asia: a great mass of the world's population is here. What are you doing to help win the war? Are you going to casually let the Communists win Vietnam? (Remember how the U. S. Government, through the influences of just a few subversives, wrongfully permitted the Red takeover of mainland China?)

Sincerely yours,

Sp6c. DAVID C. CAVANESS,
Hq. Co., 19th Engr. Bn (Combat).
BAO LOC, VIETNAM.

DEATH OF GORDON LOGAN, JR., ANACORTES, WASH., IN VIETNAM

HON. HENRY M. JACKSON

OF WASHINGTON

IN THE SENATE OF THE UNITED STATES

Wednesday, December 17, 1969

Mr. JACKSON. Mr. President, recently in Anacortes, Wash., a fine young soldier from my home State was buried. He lost his life in Vietnam. Gordon Logan, Jr., only 20, was the new generation of a family that served this country in the Army in the Civil War, World War I, World War II, and now Vietnam.

The loss of this young man was a terrible blow to his family and to his community. His father, Gordon W. Logan, Sr., served in city government in Anacortes and is now in Aberdeen, Wash., employed by that municipality.

Mr. Logan recently wrote to me expressing his thanks for my comments which were read at the funeral of his son. He also sent along the recorded thoughts of his daughter, Margo, which was written just after learning of the death of her brother.

Her remarks about her brother and our country are worthy of the attention of all the readers of the CONGRESSIONAL RECORD. I ask unanimous consent that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

TO THE PEOPLE

November 12, 1969 is a day that will never be forgotten by me. My brother, Pfc. Gordon W. Logan Jr. was killed in Vietnam. It's a terrible, frightening time for me. I feel really alone knowing I can never talk to him or laugh with him again. He had so much going for him, now everything is wiped out and Gordy is laying somewhere in Vietnam waiting to come home to his friends and family one last time.

I can't help thinking about the War Moratorium last month. Maybe if they hadn't had it, my brother would still be alive. After the moratorium I got a letter from my brother, telling me how the Communists had started a new offensive. Up until then things had been fairly quiet with little Communist activity.

The North Vietnamese and the Viet Cong probably feel that the Americans don't really care if they kill their guys and that they aren't a proud people. Quite a few don't act like they are proud.

Maybe the people who want us to pull out all the troops immediately think after that we'll feel good and all the other nations of the world will smile at us and say once again America is a great country. Don't count on that for long. If we pull out right now and the Communists do take over and really mess up the rest of Southeast Asia, all those countries that patted us on our backs will turn around and condemn us for leaving.

My brother had ideals. Gordy was proud to be an American. Many people act like it's not right to be proud of this country because of its problems. And don't try to blame the government for all the wrongs in this country. If you want things in this country to be right, you have to do right yourselves. And that sometimes takes courage.

Gordy believed in freedom. Maybe that's why so many people are against the war. They might not truly believe in freedom. Ask yourselves how you would feel and act if a black family moved next door to you. After you have answered that truthfully then ask yourselves if you truly believe in freedom.

I don't want Gordy to have died in vain. I will always try in any little way I can to make this a better country. I am proud to be an American and I'm very proud of my brother. Gordy will always be a guide in my life and anything I try for in life will be for him.

MARGO LOGAN,
His sister.

SOCIAL SECURITY AMENDMENTS

HON. SIDNEY R. YATES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. YATES. Mr. Speaker, I want to give my wholehearted approval to the bill passed, earlier this week which provided a 15 percent across-the-board increase in social security payments. Since the last benefit increase the cost of living has risen by 9 percent, so this latest boost does little more than hold the line. It is important that we recognize that this increase, though it is substantial and badly needed, is merely a stopgap measure that cannot substitute for an overall change in policy regarding our Nation's responsibilities to its older citizens.

The 15-percent increase, which is the same amount I suggested in my bill H.R. 13914, is still not enough. The increase will leave millions of annuitants still in poverty, unable to provide for themselves the basic necessities of a dignified existence. It is important to note that this increase amounts in many cases to only $9 per month, a little more than 30 cents a day. We would be deluding ourselves to think that 30 cents a day is going to go very far in alleviating the burdens of those living on fixed incomes.

Many of my constituents are retirees and they write me often to explain their difficulties in making ends meet. The situation has been unchanged for several years now, and as long as periodic increases in benefits do no more than take up the inflationary slack, it is difficult to hold out much hope that things will be improved.

I have offered legislation which would modify the retirement test by allowing annuitants to earn $2,400 annually without suffering a loss in benefits. The present earnings ceiling of $1,680 is no longer acceptable. It requires many retires, even if they are able to work, to live on less than $2,400 per year, well below the poverty level. There is much useful work that citizens over 65 can accomplish and it is surely not in the national interest, to say nothing of their personal interest, to discourage them from doing it.

We lose sight of the fact, I think, that the elderly citizens of our country are an invaluable national resource that must be protected so that we can all share the fruits of their accumulated experience and wisdom. In recent years the United States has been called "the country of the young," but at the same time life spans have increased so that we have more people than ever over the age of 65. With the current emphasis on youth we tend to ignore the special contributions to be made by our Nation's senior citizens. The older citizens in my district are a constant source of inspiration and amazement to me. Theirs has been a major and magnificent contribution to the greatness of America. We must not let them down.

VETERANS' DAY ADDRESS BY ASSISTANT SECRETARY OF THE NAVY JAMES D. HITTLE

HON. ROBERT W. PACKWOOD

OF OREGON

IN THE SENATE OF THE UNITED STATES

Wednesday, December 17, 1969

Mr. PACKWOOD. Mr. President, I ask unanimous consent to have printed in the Extensions of Remarks an address delivered by Hon. James D. Hittle, Assistant Secretary of the Navy for Manpower and Reserve Affairs, at the Veterans' Day luncheon in Roseburg, Oreg., November 11, 1969.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

REMARKS BY HON. JAMES D. HITTLE, ASSISTANT SECRETARY OF THE NAVY (MANPOWER AND RESERVE AFFAIRS), AT THE VETERANS' DAY LUNCHEON, ROSEBURG, OREG., NOVEMBER 11, 1969

INTRODUCTORY REMARKS

It is for me a real honor and pleasure to be with you at this gathering of veterans on this Veterans' Day.

I bring to you the good wishes of our Commander-in-Chief, President Richard M. Nixon, who personally knows of your celebration today, and greetings from the Secretary of Defense, the Honorable Melvin R. Laird, and the Secretary of the Navy, the Honorable John H. Chafee. As you know, in my position my principal responsibilities are matters pertaining to people. And I am glad to report to you that these three leaders are people who care about people.

One of the reasons I'm glad to be here is that I can join with you in honoring the veterans who have served our Nation since its birth and whose services have been indispensable to our Nation's growth, progress, and most certainly its survival.

One of the reasons our Nation has survived and our freedoms have flourished is that whenever our Nation or our way of life has been threatened by alien forces each generation of veterans, in its turn, has shouldered arms and marched toward the sound of enemy guns. One thing that we veterans know, as each generation of veterans before us well knew, is that our survival will be guaranteed by brave men who serve on the firing line, not by protesters in the placard picket-line.

But Veterans Day is not only for remembering past generations of veterans who have done their duty and marched on. It is also a day for honoring today's fighting men who are facing up to the obligations, responsibilities, and—yes, the high privilege—of citizenship that of wearing the uniform of the United States Armed Services.

They are the latest generation of American veterans. Having been repeatedly to Vietnam since the early days of the struggle, I can tell you that today's fighting man is fully measuring up to the example you set in terms of patriotism, professional skill, and unquestioned valor. And, let me say right at this point that anyone today who has serious misgivings about the character and the patriotism of American youth should go to Vietnam—and those misgivings will be dispelled.

Officers and NCO's who have commanded in World War II, Korea, and now in Vietnam, are high in their praise of today's young American fighting men. They say without exception that the young serviceman today is by far the best we've ever had in the Armed Forces.

Of course, the reference to the magnificent services being performed by young Americans serving in Vietnam brings us squarely face to face with probably the most important single issue facing our Nation.

It is the issue of supporting our Nation and our Commander-in-Chief—The President—in this difficult time.

It is the natural role of responsible and understanding American citizens to make it crystal clear, through a show of patriotic solidarity that the protesters, the dissenters, and the faint-hearted are *not* the majority of the American people.

During my last visit to Vietnam, I was repeatedly told by our fighting men, many serving their second tours of duty there, that they hoped that the President would be supported fully in his Vietnamization policy and the resulting properly timed measured withdrawal of U.S. forces. They said that if he gets this backing from the American people—as I am sure he will—their efforts in South Vietnam will come out successfully.

I know that I need not tell you veterans the danger of the proposals for a precipitant withdrawal of U.S. forces from South Vietnam.

The President of the United States clearly set forth the pitfalls of such a dangerous policy when he spoke in clear terms to the American people a few nights ago.

As the President so well pointed out, such a precipitant withdrawal would allow the Communists to repeat the massacres which followed their takeover in North Vietnam 15 years ago. At that time the Communists murdered more than 50,000 people and hundreds of thousands more died a slow death in the slave labor camps.

And, of course, our precipitant withdrawal would endanger well over a million Roman Catholic refugees who fled to South Vietnam when the Communists took over in the north. These are people who value freedom of religion and the desire to worship God in their own way above all worldly possessions. They left their farms, their homes, their personal possessions and fled south, often with little more than their Bible.

On one of my recent visits to Vietnam I had the opportunity to talk with one of these

Catholic refugees from the north. We sat in a quiet corner of a side street tea-room in Saigon. He has, today, a very modest job—but enough to provide food and some sort of roof for his family. Yet, he has, he said, freedom. I asked him what would happen if the Communists should take over South Vietnam. He thought for a moment and said, "The answer is simple. There would be nothing but torture and death for my family and myself."

Are those who are today advocating a precipitant pull-out willing to sacrifice a million people, such as this man and his family. Apparently, such sacrifice is acceptable to some of the protesters, demonstrators, and placard carriers.

Just because the bloodletting and torture would take place on the other side of the world doesn't make it acceptable to you veterans from the moral standpoint.

You know that freedom is indivisible, and that the destruction of freedom anywhere means the destruction of some freedom everywhere.

A precipitant withdrawal from South Vietnam would mean also, as the President so pointedly stated, that it would be the first defeat in our Nation's history and that would end worldwide confidence in American leadership.

As veterans, you and I know full well that no nation can survive and reach the fulfillment of its destiny by letting down its friends, breaking its word, and running scared before the oppressor.

If history teaches anything, it is that nations, like people, cannot with impunity break their pledge or shirk their responsibilities.

I am confident that we all shared a sense of reassurance and new confidence when the President told the Nation on November 3rd that he was not going to take the easy way out; he was not going to endanger the quest for peace by such a precipitant withdrawal. That he would not, in effect, preside over a retreat that would trigger a disaster of immense magnitude.

By leading us in a policy of standing firm by our word, by our pledge, to our allies and friends, and being faithful to ourselves, the President also is moving toward the goal that veterans, perhaps more than any other group, so devotedly hope for. That goal is a firm and honorable peace. Veterans know war. Therefore they treasure peace. But we know that peace at any price is the easiest thing to get. All we have to do to get that kind of peace is to surrender. We also know that peace at any price is not really peace. It's the silent peace of the concentration camp—the blood splattered wall—the mass graves. But achieving an honorable peace is not a unilateral endeavor. After listening to the President's point-by-point account of the actions he has initiated in his quest for peace, one can only come to the simple but inescapable conclusion that failure to achieve peace in Vietnam rests firmly with Hanoi and not with the United States and our allies.

In his search for the end to the conflict, the President has adopted the policy of Vietnamizing our efforts. This effort, as the President so well stated, is a key to "The search for peace."

I would like to talk to you for just a few minutes with respect to the matter of Vietnamization of the struggle in South Vietnam. It means to shift gradually the responsibilities of peace winning to the South Vietnamese.

Of course, the protesters, the demonstrators, and the fainthearted who criticize our stand in Vietnam against oppression say that the South Vietnamese won't carry their own load and that they won't fight. Well, let me say that this is nothing but sheer falsehood and vicious propaganda.

Let me give you a few facts about the lie that the South Vietnamese won't fight.

As you veterans well know, the number of battle-dead is a good indicator of the willingness of a people to fight. So let's take the matter of South Vietnam's military combat dead. Since 1961, about 96,000 South Vietnamese troops have been killed defending their country against Communist aggression. This by any count is a heavy toll in combat dead. Yet the real significance of war casualties is in relation to the proportion of total population.

If we project South Vietnam's 96,000 combat dead into our U.S. population, which is about 13 times that of Vietnam, we can better appreciate the impact of the war on the Vietnamese.

The South Vietnamese combat dead total is the equivalent of 1,200,000 combat dead for the United States.

This means, in turn, that on a percentage of population basis, the total of military war dead suffered so far by Vietnam is: More than 13 times our combat dead in World War I; over three times our combat dead in World War II; about 33 times our combat dead in the entire Korean War.

And what about the civilian population? They, too, have bled and died. Since 1961, 71,600 civilians have been killed or kidnapped as a result of deliberate Communist terror. In terms of percentage of the South Vietnamese people, and the ratio to the U.S. population, it is the same as if close to 900,000 Americans civilians were killed or kidnapped in a reign of terror. To bring it even closer to home, it is the same as if the entire metropolitan area of Seattle—every man, woman, and child—were killed or kidnapped.

Therefore, when judged on a relative basis with what our own nation suffered in our great struggles against oppression, South Vietnam measures up extremely well.

South Vietnam has, in terms of percentage of its population killed in combat, set a high example of opposition to communism, sacrifice, devotion to freedom and determination to keep it.

What South Vietnam has paid and is paying in blood to stay free deserves the commendation, not the condemnation, of freedom-loving people.

And still the South Vietnamese are fighting and dying to turn back Communist aggression. And what is more, they are fighting better all the time. I can report this to you based upon comparisons I have personally made in repeated trips to Vietnam over the last five years. In these visits, I have been to every major combat area from the DMZ to the Delta.

Just about a year ago, I began to sense that something new and dramatic and encouraging was happening in South Vietnam. Time and again, U.S. fighting men, both officers and NCOs, told me that the least understood development taking place then in South Vietnam was the tremendous improvement in the South Vietnamese forces. One battalion commander in the northwest highlands, who had been fighting alongside a South Vietnamese unit, told me indignantly that the improvement in the South Vietnamese Army was then the most important untold story of the war.

I was in South Vietnam again a little over a month ago. On that occasion, the improvement in the fighting ability of the South Vietnamese was increasingly evident. In the Delta, for instance, the U.S. Navy has turned over close to half of our river patrol craft to the South Vietnamese Navy. These are the boats that have been fighting the tough, close-quarter war in opening up the waterways that are the arteries of commerce and the pathways to security in the rich Delta area.

I can report to you that the South Vietnamese Navy has assumed this responsibility willingly. It is continuing the operation of the river patrol craft, and it is conducting operations skillfully.

You are all aware that the policy of shifting the burden to the South Vietnamese as they gain in strength has resulted in the President's programed withdrawal of over 60,000 U.S. fighting men.

But there are other hard, clear indicators which to me have been the measure of success of our efforts in South Vietnam. For instance, roads that 18 months to two years ago were virtually impassable due to enemy action are today opened for normal day-time traffic. Villages are being brought back to the mainstream of political and economic life. A big start, in terms of a war-torn nation, has been made in establishing a constitutional form of government. And this is no mean accomplishment for a nation fighting for its very survival against an enemy attacking from without and within.

Even the railroad running north along the coast from DaNang to Hue is now operating with amazing regularity. Two years ago, when I was in the northern part of South Vietnam the railroad was not, from the practical standpoint, even functioning.

Probably one of the best summations of this whole farsighted policy of Vietnamization was expressed to me by a battle experienced lieutenant colonel who is on his second tour of duty in Vietnam. He said, "All of the investment in lives, blood, money, and material that the United States has made in the last five years is just now beginning to pay the big dividends in South Vietnam's increasing combat ability."

And so at this critical juncture of history when we have started to move across the threshold of success in this long, bitter conflict, it should be abundantly clear that the precipitant withdrawal which to many loud protesters are urging is nothing but a blueprint for surrender.

As veterans well know, to pull out in the face of an aggressive and vicious enemy is an invitation to disaster. You and I know, too, that regardless of how a precipitant withdrawal is described in flimsy theory, it really means pulling down the Stars and Stripes, running up he white flag, and everybody running down to the beach to get aboard a ship for home. You and I know that is not the American way. And, as the President of the United States told us, it's not going to be his way.

I'd like to relate to you just a few of the remarks made to me by our fighting men in Vietnam.

Soon after the decision was made to openly enter the Vietnamese conflict, I visited Vietnam. The Marines had gone ashore from the Fleet at the strategic coastal location of Chu Lai. I arrived there while the Marine operations were still continuing against surrounding enemy units, and while the Seabees were still constructing the expeditionary aircraft runway. I wanted to know what our young men in Vietnam who were doing the fighting thought about the anti-war picketing and protesting back home. I asked one young Marine, about 20 years old, in embattled Chu Lai what he thought of those carrying placards "We won't fight in Vietnam."

He said: "I wish I had one of those smart protesters here. I'd like to take him with me on outpost duty tonight. There's a V.C. (Viet Cong) sniper who's been trying to get me for the last three nights. But I haven't been able to nail him yet." He paused and smiled. "I'd sure like to get him in my foxhole when that sniper starts working on us. I want to see how much that protester will wave his placard then."

His speech finished, he trudged through the sand back to his platoon. In a few hours he'd be back on outpost duty, trying to "nail" the Communist Viet Cong sniper before the sniper could get him.

Recently, while flying to a conference at Pearl Harbor, I noted a young corporal a few rows back from me in the plane. During the flight, I walked back and sat down and

told him that I had served in the Marine Corps and started chatting with him.

He was, he told me, on his way to Vietnam. I asked him, "Is this your first time out" He said, "No, I'll be going in to my second extension." I said, "Why have you served one full year, extended for one six-month period, and now are extending for another six months?" He said, "Well, the first time I extended I did it because some of my close friends had been killed in action, and I wanted to get even. I got it, but I also, during that added six months, realized how necessary and important our job is that we are doing in Vietnam, and I wanted to keep on doing more of it."

But probably the best and most memorable explanation of duty I have ever heard came from a young Negro Army sentry on a lonely observation post overlooking Cam Ranh Bay. I stopped in the course of a visit to talk with him. I asked him if he had a family. He said "Yes, I'd just been married a few months before I came out here again." I asked, "What does your wife think of your coming to Vietnam a second time?" He said, "She agreed when I told her that I believed I should be back here. I volunteered for a second tour." I said to him, "Why did you volunteer in spite of the fact that you had been married only a few months?" He thought for a moment and said in very simple language, "I think that it's every American's duty to do what he can to help his country when it is in trouble."

But, if there's anybody who has earned the right to complain about fighting in Vietnam, it is the man who has been wounded in that fighting. He has paid for that right with the high price of his blood and, too often, his limbs.

I can report to you now on the basis of personal knowledge that if you want to hear gripings, complaints, and criticisms about our Nation standing against Communism in Vietnam, then don't go to the hospital wards and visit the wounded from the Vietnam Battlefront. Those who have borne the brunt of battle are not the ones who are beefing about it.

A few months ago in Pearl Harbor I visited the battle casualties who have been flown in for treatment in Tripler General Hospital. Among the wounded I talked with was a young corporal. One leg was in traction, an arm was in a cast, and he had machinegun holes in his stomach.

I stopped and chatted with him. I asked him how long he had been in Vietnam before he was hit. He said he had been there almost two years. I asked him why almost two years, as the required tour was one year. He replied that he had twice voluntarily extended his duty. I asked him "why did you do that?"

He replied, "I was assigned to train and fight with a local village militia platoon in the northern hill country." He continued, "I found out how much these people wanted to be able to defend their villages and their families against Communism. I knew what I was doing was important, and I wanted to keep on doing it." And then he added, "I believed that those village militia men would stand and die rather than let me be captured. I found out I was right. I would have been killed or captured if they hadn't stood by me. When we were hit by a big V.C. unit, two were killed in defending me when I was wounded."

A few months ago, I visited the Vietnam casualties at the Great Lakes Naval Hospital just outside Chicago. Above the bed of every Vietnam casualty was a United States flag. Each wounded fighting man, when he leaves the hospital can take the flag from over his bed with him. And, they do. And, when a new casualty comes in, he wants a flag over his bed without delay. This, again, is a reflection of the genuine patriotism, devotion, and inherent goodness of those who know what it means to defend their flag and what it stands for.

I strongly suspect that the attitude of some of these men would not get a very high grade from some of the dreamy theorists who pose as moralists in protesting against our Vietnam policy. However, I for one stand in admiration and respect for the kind of spirit reflected in their statements. It reflects the kind of courage, toughness, and determination that helped carry our Nation from the Atlantic across the mountains, rivers, prairies, to the Pacific. It is the kind of spirit that made our Nation free and made it great. And we can be glad that this spirit still exists in our youth.

At a Naval hospital in the south, I was talking to a young Army corporal. He had been sent to a Naval hospital because it was near his home. I noted that he had lost a leg below his knee. I asked him about the action in which he was hit. He said he was on Hamburger Hill. That was just about the time the critics of our Vietnam policy were engaged in the Monday morning quarterbacking and saying that it was a battle that should not have been fought. I was curious about the corporal's reaction to such opinions. I said that since he had been on the Hill and lost a leg there, what was his reaction to those who were saying that he should not have been there in the first place. He thought for a few moments and said, "This war isn't going to be won by the protesters back in the U.S. It's going to be won by the guy with the rifle who takes the high ground."

And, I'd like to tell you about a young sergeant I spoke to recently. He had lost his left leg near the hip and his right arm had been shattered by a shell fragment. The arm was in a cast and he still faced a number of operations. He was a red-headed lad who looked like he had shaved only a couple of times in his life. I asked him what he thought about the protesters, the demonstrators, and the placard carriers. He said, "Well, I'm going to get out of here one of these days and if I happen to see any of those people stomping on the American flag or holding up the North Vietnam flag, somebody had better grab me quick, because I am going after their throats."

And finally, there was the Marine corporal who had lost both legs. In the course of my chat with him, I asked him what he was going to do when he was discharged to civilian life. He said he was going to college. I asked him what he was going to take. He said he was going to be a teacher. I said that is certainly a most commendable objective, but I was curious as to why he wanted to be a teacher. He looked at me and said, "Well, I think I've earned the right to tell the youngsters what this country is all about."

So, in conclusion, I thank you for the privilege of joining with you in honoring those who have fought and who are fighting in the defense of America and freedoms in which we believe. And, I am sure that you will join with me in admiration of today's American fighting men who are demonstrating that courage, devotion, professionalism, soldierly virtues, and patriotism are still in abundant supply. We can also be sure that America's destiny is not going to be decided by placard-carrying demonstrators in the streets who urge surrender, sacrifice of our friends, and disgrace for ourselves.

Rather, we join today in the reassuring realization that we face our destiny under the leadership of a President who has taken the Nation into his confidence and in so doing has placed his faith in the courage and common sense of the American people;—a President who has chosen the right way rather than the easy way.

MRS. GLADYS COFFEY HARPER, RECIPIENT OF 1969 DAISY LAMPKIN AWARD BY PITTSBURGH NAACP

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. MOORHEAD. Mr. Speaker, Mrs. Gladys Coffey Harper, of Pittsburgh was this year's recipient of the Daisy E. Lampkin award for major contributions in the field of human rights. Mrs. Lampkin was the first field secretary for the NAACP and a member of the national executive board when she died.

Nothing I could say could possibly add to the fine tribute Mrs. Harper was paid by the Women's Auxiliary of the NAACP on the occasion of this award in Pittsburgh, November 8, except that, in the tradition of Mrs. Lampkin, she has that rare combination of intellect, ingenuity, drive, and devotion to the service of others, which uniquely qualifies her for this honor.

The tribute to Mrs. Harper is included herewith in the RECORD for the attention of my colleagues:

GLADYS COFFEY HARPER

Gladys Coffey Harper, awardee of the 1969 Daisy E. Lampkin Award for major contributions in the field of human rights.

A native Pittsburgher, Mr. Harper, the second of eight children spent her early years in the Hill District. The daughter of a self-employed sign painter, she attended Miller Elementary School then Baxter Junior High as her family moved from the Hill District to Homewood.

She was graduated with honors at the age of sixteen from Westinghouse High School where she majored in academic studies. Gladys was a senior athletic leader at Westinghouse, the first black senior leader in the City of Pittsburgh.

Working after graduation as a sales clerk she managed to save enough money to open her own business by the age of 20. Called Budget Exchange, the store on Herron Avenue provided linens and clothing at discount prices to low-income families. When customers did not have enough money to pay for badly needed clothing she often let them have it free.

At night, Gladys attended Wharton's School of Beauty Culture. After she passed her State Boards and was licensed under the Department of Public Instruction, the Exchange was converted to Glady's Beauty Salon. Underlying this venture was a childhood desire she always cherished—to be able to fix her own hair.

After visiting Kane Hospital and discovering the lack of adequate facilities and personnel to provide beauty care for black female patients, Mrs. Harper realized that blacks and the poor were being shortchanged by their government. At this point she became interested in politics. Determined to change this inequity Gladys discussed this situation with responsible public officials and the inequity was corrected. A black beautician was employed for the first time in Kane Hospital. Gladys realized that blacks suffered in many instances because they were not an integral part of the political system. A close friend of the late Councilman Paul F. Jones, she brought to his attention many similar complaints about governmental inadequacies.

Gladys Harper credits the late Councilman Jones and former County Commissioner Howard B. Stewart for her decision finally to give up private enterprise entirely and to build a career instead in public service.

She joined the Allegheny County Health Department to work in the Bureau of Biostatistics in 1958. After successfully completing training in the IBM School of Education, she was promoted to Supervisor. During this same period Gladys ran successfully for Democratic Committeewoman in the Hill District and served in that capacity for five years. In 1963 when her Health Department position came under Civil Service and she had to forego formal political activity she resigned as committeewoman. During her tenure, however, she managed to effect many civic improvements including street paving, the first Dempster-Dumpster installation for trash disposal in her district, salt distribution for icy sidewalks, door-to-door fire safety inspections of homes and summer recreation programs for the youngsters. The aged and handicapped also were helped through her efforts.

Despite her busy schedule, Gladys found time to be a group worker in the Anna B. Heldman Center where she organized the first neighborhood-based health clinic, coordinating her contacts and work in the Health Department with her efforts to build a better community. Working with block clubs on Lincoln and Roberts Street, she was instrumental in bringing hundreds of adults and children to the clinic for free chest x-rays, blood tests, immunizations and counseling provided by the Health Department.

In 1965 she was named Chief of the OEO Health Services Bureau in the Health Department where she trained a fulltime staff of neighborhood-based health and sanitation aides to help carry on her work in the community. When the federally funded OEO program was taken over by the County, she was named Chief of the Bureau of Health Referral Services.

Last Spring as Special Consultant For Community Affairs, Gladys consolidated her work with community groups and intensified efforts to identify community health needs. Paramount among these was the need to develop a program to prevent drug abuse among young people.

For almost two years she has visited public and parochial schools throughout the County, lecturing and presenting films on the problems of drug abuse. She also has lectured on prevention of drug abuse to civic organizations and church groups as well as at correctional institutions for teenage boys and girls.

Gladys was the recipient of a scholarship to Rutger's University where she completed a special course on alcoholism. At Columbia University Teacher's College, she attended a special training program on drugs. This spring she will get her BA Degree as a Sociology Major from the University of Pittsburgh and has arranged for independent studies toward her master's degree.

The wife of Attorney Thomas A. Harper, Gladys is a life member and a former Board member and Youth Council Advisor of the NAACP. Under her direction and leadership the Pittsburgh Youth Council was cited twice for State honors. In 1967 Mrs. Harper won the Isabelle Strickland Award for outstanding Youth Advisor in Pennsylvania. She also developed a tutorial and supportive services program for Freedom Unlimited, Inc., to help underachievers in public schools. When time permitted she served on the negotiating teams of UNPC and the NAACP for employment opportunities.

As a member of the Anna B. Heldman Society, Gladys helped in the repair and distribution of toys to needy youngsters. The group now focuses attention on purchasing shoes for needy children.

Mr. Harper is a member of the Business and Professional Women's Club; one of the Commissioners and Treasurer of PACE (Persons Aiding Citizen Enterprise); Chairman of the Civic Action Committee of Wesley AME Zion Church; and a charter member of the League of Community Health Workers, Inc. She serves on the Urban League's Health Committee and the Narcotic Advisory Committee. She is a member of the American Society For Public Administration, The American Public Health Association and the Royal Society of Health, London, England.

Because of her success in the development of training programs utilizing indigenous neighborhood-based health workers, she served as Technical Assistant Specialist in the Health Division in the Office of Economic Opportunity under Theodore Berry, Director.

To her credit are also three publications.

LOCAL VFW ASKS SUPPORT OF PRESIDENT

HON. G. ELLIOTT HAGAN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. HAGAN. Mr. Speaker, I am proud to call to the attention of my colleagues the article which appeared in the First District newspaper, the Dublin, Ga., Courier-Herald, October 13, and which is the same text that was broadcast on the local Dublin radio station, WMLT, three times daily on October 13, 14, and 15.

I certainly share these same views expressed by the 400 members of Veterans of Foreign Wars, Post No. 6544, of Laurens County, Ga., The article follows:

LOCAL V.F.W. ASKS SUPPORT OF PRESIDENT

Veterans of Foreign Wars Post 6544, of Laurens County, today urged that all citizens speak out in support of the President of the United States and the efforts of the United States government to stem the flow of Communism in South Vietnam.

Speaking on behalf of Post No. 6544, Commander Madden said: "The delegates attending the V.F.W. National Convention in August in Philadelphia, Pa., unanimously urged that our government continue to seek victory in Vietnam and that all of our citizens lend their full support to the men on the fighting front.

"Frankly, we are sick and tired of listening to a very vocal minority undermining the bargaining position of our President and in so doing endangering the lives of our men on the fighting front. It is my belief that the time has come when the much talked about silent majority should speak out. We must let the men on the battlefield know that they have the support of the people at home and we must let Hanoi know that the President has the support of the people in this country.

"It is my hope that the people of this area will speak out on this issue and that other patriotic, civic and fraternal groups will join with us in this crusade. I am firmly convinced," Commander Madden concluded, "that if we fail to speak out now, the vocal minority in this country will most certainly take over all that is meaningful in this land of ours. No one seeks peace more urgently than the Veterans of Foreign Wars, but we will not seek peace at any price which is what the vocal minority is calling for today."

TRIBUTE TO MR. HUGH T. BENNETT, SR.

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. JONES of Tennessee. Mr. Speaker, recently, tribute was paid to one of Tennessee's leading citizens, Mr. Hugh T. Bennett, Sr., by one of the Eighth District's fine newspapers, the Milan Exchange, and the Humboldt-Courier-Chronicle. The article, entitled "Mr. Gibson County," was written as a special assignment by Mr. and Mrs. A. H. Williams of Humboldt, Tenn.

Squire Bennett, I am happy to say, has been a close personal friend of mine for many years, and I have often looked to him for guidance and counsel. Since Mr. Bennett has served as a noble inspiration to me and to countless other Tenneseeans throughout his 88 years, I call attention to the article which I am inserting in today's RECORD.

"MR. GIBSON COUNTY"—ESQUIRE HUGH T. BENNETT, SR.

(By Mr. and Mrs. A. H. Williams)

Esquire Hugh T. Bennett is the next Man of Eminence the Milan Exchange is delighted to present in this series of stories relative to personages living within the boundaries or natives of Gibson County. Years ago he attained the "Title" which he still proudly, modestly bears—"Mr. Gibson County." He is a friend—a close personal one—to countless thousands of persons not only in his home and native county, where he has lived all his 88 and a half years within a radius of six miles from his present home near Fruitland, but throughout Tennessee and a wide portion of the Mid-South. He served nine six year consecutive terms as Magistrate in Gibson County from the Third Civil District—a tenure longer than any man in history. He, during the time, served one two-year term (1909–10) as Representative in the General Assembly of Tennessee; three two-year terms (1923–25–27) as State Senator from the county; was Clerk of the State Senate for the sessions of the two-year terms of 1915–17–19–21; served on the Gibson County Democratic Executive Committee from 1910 'til 1924; was for several two-year terms an Eighth District member of the State Democratic Executive committee; serving for two terms as West Tennessee Chairman of this important group.

Mr. Bennett was appointed Examiner for the Inheritance Tax Division of the Tennessee Department of Finance and Taxation in 1930 his territory being officially all of West Tennessee outside Shelby County (but we understand from reliable sources that he had special assignments in 90 of Tennessee's 95 counties), retaining this position until his retirement 20 years later in 1951.

Of the many records Esq. Bennett must have set during his long period (54 years) of unselfish service to his county as a member of the County Court there are two of which we are as positive as human investigation makes possible: he was the youngest member ever elected to the court (23 years of age when first chosen) and held this record for the first 12 years of his membership in the body; and when he declined to permit being qualified for his 10th consecutive term on the County Court the Magistrates unanimously elected him as Honorary Magistrate for Life, the only such honor ever received. Another unusual thing about Mr. Bennett's services

as Magistrate—at the time of his retirement he had served under every County Judge Gibson County had to that date, because prior to 1905 the County Court was presided over by a chairman. Mr. Bennett, therefore, succeeded his father, the late W. N. Bennett, who had served on the court for several years, becoming a member of the first Court under its first Judge.

While it may be a fact, and it is, that his homestead during 'squire Bennett's entire life has veered only a half dozen miles from its present spot in south-central Gibson County just a wee bit north west of Fruitland (an attractive snow-white frame dwelling, nestling among giant oaks and poplars whose century-old anniversaries have long since past) he has taken under his affectionate care the entire 600 square miles of "his domain"—living about the same distance from two of the larger towns (Humboldt and Trenton, five miles from each) and only some 10 or 12 miles from the other towns and communities of the county, growing steadily in beauty and size (and the "doings and sayings" of "Mr. Gibson County") throughout the State and other areas of the nation were responsible in no mean measure for the present surge of development of the County—they predicted the 1970 census of population for the area will be larger than 10 years ago, even though there has been throughout the country an exodus of people from rural areas to the larger cities).

But this "county-wide affection" of Mr. Bennett's took in the central and northern part of the country as well or as we may properly say "in more ways than one", really, because his lovely wife whom he says "has stood by me for 67 years" is the former Miss Ethel Yandell of Rutherford (and the light of love that beamed from Mrs. Bennett's eyes as she heard her bridegroom of 1902 speak, spoke more than words for the "many years" task of "standing by" her distinguished husband). . . .

Then there was the time that Mr. Bennett campaigned with Bob (Robert Love) Taylor in this area. He accompanied him to Milan, after speaking in Humboldt, for a major speech in one of the famous Taylor appearances when seeking high office (among other things he was Governor of Tennessee 1887–1891 and again in 1897–99; U.S. Senator from Tennessee 1907–12. His opponent at times was his brother, Alfred A. Taylor as staunch a member of the G.O.P. as was Bob a Democrat. The "War of the Roses" between these two brothers, one choosing the white rose, the other the red, as a symbol of his platform, is one of the most heated sessions of politics in Tennessee history.) In the latter days of Bob Taylor's political life, when Mr. Bennett was associated with him, he became more kindly toward his brother as he was at the Milan gathering when he said "I've reached that time in life when I even have a kindly feeling toward the Republicans . . . did you know I have a brother who is suffering the same disease?"

Another picturesque and famous statesman and politician with whom Mr. Bennett had close personal association was the great Presidential aspirant, William Jennings Bryan. The Gibson County "Squire" says he will never forget the momentous trip he made with other Gibson Countians on the Bryan train through Gibson County to Union City and on through West Tennessee and Middle Tennessee to Nashville. . . .

For the last two or three years Esq. Bennett has been having trouble with his voice. It has weakened somewhat and seems to trouble him quite a bit. One doctor (a good friend) told him "Don't worry, you've talked enough already." And, to tell the truth, Mr. Bennett has had to do a lot of talking during his life to render the service to and accomplish the many things for his constituency—but "not enough" as far as the elderly Squire was concerned.

Another doctor told him "all boys' voices change." Neither did this do him any particular good.

Therefore he decided to go to a specialist for a general checkup deciding to go to one of the "name doctors" in Memphis, who had not only an office but most of one floor of a large building at his disposal. After a few hours of thorough examination "from head to toe" according to Mr. Bennett, the doctor called him into his office, with his son who had driven him to the offices, and after they were all seated the doctor said, "Mr. Bennett we have examined you thoroughly (this was less than two years ago) and we are unable to find one single thing wrong with you." To which Mr. Bennett smiled in his usual gracious manner and said, "now that is mighty fine. . . . what do I owe you? and when the doctor replied, "fifty dollars" the radiation of the Bennett smile shaded just a bit. The son consoled him, a bit perhaps, when he said after they left the office, "why dad, I'd give $100 for that kind of information." Mr. Bennett still "laughs out loud" about this trip—but he prefers, if either, the $50 figure. . . .

"Statesman . . . one skilled in public affairs and art of government; a person of great ability and prominence in politics." So says one of these writers' "book-helpers" whose facts are taken more literally than too many people accept the undeniable facts of the Holy Bible. And to us the term truly (statesman) applies to our "Mr. Gibson County", Esquire Hugh T. Bennett. He served without flaw or blemish and without opposition at the polls with one exception when he overwhelmingly defeated his opponent.

The only time Mr. Bennett was opposed in an election was when a would-be magistrate linked his name (Mr. Bennett's) with the late Malcolm R. (Ham) Patterson in the earlier days of Mr. Bennett's career at a time when Mr. Patterson was in partial ill repute in the state, even among some of his Democratic associates. At that time Esq. Bennett was thought to be "sticking with Ham" and his one and only political opponent in nine races for the County Court thought this assumption-of-fact might swing the election away from the ever-undefeated Bennett. But how wrong he was. Esq. Bennett won hands down and never afterward had to electioneer for the position—except out of the sheer love of meeting his Gibson County friends and learning their problems. An interesting sidelight on this episode. When Gov. Patterson realized that for a time circumstances got so bad that it was expedient for him to take himself out of the political limelight for a time. Later he unexpectedly showed up at the Statehouse in Nashville and when he was discoverd in the executive chambers of the Capital he was given an ovation. In response he arose and addressed the large crowd: "Ladies and gentlemen I'm still a Democrat—about the stillest Democrat in the state." But not so with Mr. Bennett. Throughout his long, active political life—and even after he retired, or tried to leave the public eye—he was anything else but a "still Democrat." Once in 1924 his name was on the ballot three times, without an opponent as was customary, for the offices of Senator, Magistrate and County Democratic Committeeman. He withdrew as candidate for Committeeman, saying, "Three times is too much for one man's name to appear on the same ballot."

Esquire Bennett's community service has not been restricted to politics. Since 1912 he has served as Elder in the Presbyterian Church, U. S. (Southern) in Fruitland, his hometown and hometown church which is 144 years old—one of the oldest religious organizations of the said-to-be oldest denomination in West Tennessee. He has served his church state-wide and nationally, attending the General Assembly of his church a number of times, the first being in Jacksonville, Fla. in 1926. On the occasion of the Centennial of the General Assembly (which is the church's highest court) Esq. Bennett was chosen to represent the Western District Presbytery of Tennessee and one of the lasting regrets of his life is that illness in his family prevented his making this particularly important session of the group. The three oustanding loves in this great citizen's life, after a lifetime of acquaintance and observation, are his wife and family, his church and his politics—Democratic, that is, as we have intimated.

To begin with, a man having traveled the very high and long road, as he has, of statesmanship, finance, politics, church administration and various other top-rated endeavors, is of necessity a naturally erudite person, "topped off with considerable 'book learning', as he was, and is. Mr. Bennett received his formal education, after his first years in public school, at the old Southern Normal University in Huntingdon, Tenn., one of the strongest institutions of learning in the Mid-South where the "three R's" meant what they implied. It was considered to be one of the South's finest schools of its day with students from practically every state in the Union. "One thing for certain" Mr. Bennett well remembers, "there were no 'demonstrations.'" We asked Mr. Bennett what his attitude might be on the current series of demonstrative marches, property damage and other confusions on the college campuses and elsewhere which are alarming the nation and he said with emphasis "Why it's awful-terrible" and he shuddered briefly and there was an added flush on his pleasant, handsome countenance. He also attended the University of Tennessee, Knoxville. . . .

Even though he "retired" in '51 from daily-grind activity (and he loved every minute of it) he was called on in 1956 to again serve on the State Democratic Committee. And he complied, serving as vice-president from West Tennessee on that body. . . .

Something else Mr. Bennett fondly remembers and enjoys recounting is the unusual story of his faithful mule "Old Joe" who lived to the ripe age of 32 years, serving not only for a long while as his owner's Modus Operandi of transportation and a "watch dog" about the home. "Old Joe", reminisces Mr. Bennett, "was purchased as being just an extra-good, young work mule, an essention on the farm of the early days . . . but quickly it was found that this beautiful animal was a trotter and a fast one at that, having almost, it was declared, a 2–40 gait, top-speed for a race horse . . . besides this he developed into a "watch dog" about the home and in his own manner advising the household when intruders were on the premises."

But Old Joe's main purpose in the beginning of Mr. Bennett's spectacular political career was to pull the candidate about the county in a spick and span shinning buggy. It was said of the shrewd Mr. Bennett that he used Old Joe instead of his sleek "buggy horse" in order to keep the voters ever mindful that he was a farmer. Old Joe was a help in other ways, too. In one of the county campaigns there was another candidate for a different office who was making the same circuits as was Mr. Bennett (Mr. Bennett, by the way, made the rounds, even though he had no personal opposition, to keep informed of his peoples' problems). This non-competitive politician happened to drive a frisky young mare to his speaking appointments, sometimes arriving there ahead of his friend, Mr. Bennett. Now it so happened, says his owner, that Old Joe "fell in love" with this mare and by his antics when he and Mr. Bennett approached a speaking engagement platform the driver could tell whether or not the other speaker had already arrived

and consequently gage his speech accordingly.

This faithful mule and friend was finally retired to the family pasture for a well-deserved good old-age of rest. But all too soon a younger animal kicked the old retiree, broke a leg, necessitating his being "put to sleep." There was much sadness at the Bennett place when the faithful, four-legged servant was wrapped in sheeting and buried at a revered spot on the farm.

Among the many honors that came his way, Esq. Bennett says he feels that probably the greatest was his being chosen as a delegate to the State Constitutional Convention in 1953 (the county just wouldn't agree to his full retirement). It was during that session that Tennessee's Constitution was amended for the first time since 1870. And who was the Secretary of that Convention? Why, of course, it was our own "retired", Esquire for Life, Bennett.

Money doesn't seem to have ever been a special bother to our lovable and liked "subject" of the past two weeks. Most of his life he has been, apparently "well-to-do" financially. In fact he learned the value of a dollar early in life as a boy on his father's farm where he worked in season "from dawn 'til dark", setting the pace for all the farmhands, white and black, who were at his side—and his dad saw to it that the "pace" wasn't a slow one (and he has kept that pace throughout life).

Young Bennett and his friends on weekends would hie to the Pea Ridge Community or to the old Gibson Wells resort for dancing until at least the latest hours of the evening. Mr. Bennett was a pronounced expert at the favorite dance of the day "The Weaverly Wheat."

The only thing "money-wise" thought of or discussed was a choice 1867 nickel he found as a boy, lost it by dropping it through a knot hole in the floor of his home, recovered it much later when his home was torn down and the ancient coin returned, and now kept as a valuable relic—how valuable he does not know because he has not investigated and it is not for sale at any price.

'Squire Bennett recalls with his infectious smile . . . the celebration of his Golden Wedding Anniversary while his loyal and lovely wife of 67 years, the former Miss Ethel Yandell of Rutherford, beams adoring approval. This affair took place at the home of one of his sons, Willis Bennett, and Mrs. Bennett who with the other two sons and their wives, Mr. and Mrs. Hugh Taylor Bennett Jr. and Mr. and Mrs. W. F. (Billy) Bennett were hosts. . . .

Mr. Bennett was not what would be termed a "marrying magistrate", his records showing the uniting of only 110 couples during his long tenure as a member of the county court. "That's due principally" he says "because the state got a little strict on its rules and the 'run-away-couples' went to Mississippi. . . .

The late T. H. Alexander, noted newsman during the time Mr. Bennett was serving as State Senator from Gibson County, puts in a few words the general feeling of Mr. Bennett's state and county about him: "Senator Hugh T. Bennett of Fruitland is the very salt of the earth. I expect he is the most popular member of the Senate. Loyalty to his friends is one of his predominating traits but when it clashes with his sense of duty I suspect it would be a very painful situation to him but his course would be clear . . . Senator Bennett was one of the most useful and efficient members of the last Senate . . . he ought to be sent back to Nashville without the formality of opposition" (and he was). . . .

Our last glimpse of Mr. Bennett on the day of our fine visit with him and Mrs. Bennett was to see him, walking briskly about his beautiful lawn, holding the walker at about a 45 degree angle in the air and making "better time" in his late afternoon constitutional than these writers would ever attempt.

BIPARTISAN INTERN PROGRAM

HON. CARL ALBERT

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. ALBERT. Mr. Speaker, last summer the Democratic and Republican House leadership appointed a bipartisan intern committee to provide a program for the many young students who work each summer in Members' offices. As a part of the program inaugurated by the bipartisan intern committee an intern seminar program was developed by two members of the committee, Mr. Mark Talisman of the staff of Representative VANIK and Mr. Francis O'Gorman of the staff of Representative MCDADE.

The seminar program scheduled 57 separate seminars. Over 60 speakers from every branch of government and private endeavor participated in presenting material on 25 different subjects chosen in advance by the students themselves. The chairmen of the seminar program committee have prepared a report on that program. Because of the great interest in it which has been expressed by a great number of students and by a number of colleges and universities, I include the report:

REPORT TO THE SPEAKER OF THE HOUSE OF REPRESENTATIVES, THE HONORABLE JOHN W. MCCORMACK, ON THE SUMMER INTERN SEMINAR PROGRAM FOR 1969

INTRODUCTION

There were over 950 interns working in offices of Members and Committees of the United States House of Representatives during the summer of 1969. They were a most diverse group, representing every state in the union, almost every college and university and dozens of high schools. The interns ranged in age from 17 to 26 years old, and had varied and extensive interests.

For some ten weeks during this summer, 1969, Congressional summer interns observed first hand the operation of the Congress and the duties of each member. They were a most impressive group of young people, well educated, articulate, hard working, and curious. Idealism, not partisanship, was at the heart of their poltical philosophy. Most Members detected in their youthful employees a healthy spirit of inquiry, of the sort that all Americans proudly affirm as the first necessity for good representative government. These young people possessed strong critical faculties, in the best tradition of our democracy. Debate, discussion and dissent have rarely been more fruitful than this past summer in the Congress.

The Leadership of the House of Representatives—Hon. John McCormack, Speaker; Hon. Carl Albert, Majority Leader; Hon. Gerald R. Ford, Minority Leader—sponsored the Bi-Partisan Intern Program in order to organize activities for this group of young Americans working in the House.

These young people had come from all over the United States. They wanted to meet and talk with each other. They wanted to listen to and question the Legislators who were also their bosses. They wanted to be exposed to the political currents and the Nation's leaders that only the Capital can offer.

The members of the Intern Program decided that an appropriate forum for the discussion of ideas about government and about our government today might be a series of informal seminars.

DESCRIPTION OF SEMINAR PROGRAM

With no goals more specific than those previously stated, and with an abiding commitment to the "bi-partisan" in the name, the "Seminar Committee' was constituted an integral part of the Bi-Partisan Intern Program.

Two members of the program—Mark Talisman, Administrative Assistant to Representative Vanik, and Frank O'Gorman, Administrative Assistant to Representative McDade—agreed to serve as Co-Chairmen. Gerry Simons, a member of Mr. Vanik's staff, was appointed Staff Director, and assigned to run the seminars on a day-to-day basis.

The Seminar Committee was created in order to achieve several related purposes: (1) provide on a continuous basis for discussion of some vital issues related to the Ninety-First Congress; (2) enlarge the understanding of the legislative process; (3) present the views of experts on issues of national and international consequence; (4) encourage the exchange of ideas among Members of Congress, Congressional staff and the large delegation of young men and women serving as summer interns.

A serious effort was made to involve the interns in determining the shape of the seminar program. They chose, by ballot, twenty-five topics for seminars. They preferred to limit attendance in order to keep the size of the seminars small and to preserve the informal atmosphere.

The House interns expressed a clear desire to study "substantive" over "procedural" problems of the Congress. For example, "Urban Programs" and "ABM" were overwhelming choices, while a very small number evidenced interest in "Parliamentary Procedure" and "Legislative Drafting." Nevertheless, the final list did contain several titles related to the internal structure and function of the Congress, including "Tactics on Controversial Legislation," "Lobbying," "Investigations and Hearings," "Committee System," "Ethics," "Congressional Reform," and "Freshman Member." We are left merely to speculate about how this group's tastes may have changed during the course of the summer. The complete seminar title list will be inserted at the conclusions of these remarks.

The Committee, while continuing to solicit the opinions of the interns, proceeded to invite a substantial number of what were considered the most capable, responsible, and articulate spokesmen on the various issues. Every reasonable effort was made to obtain the opposing views represented in the Congress on all these problems. There were some rejections, but on the whole the response was most favorable.

It seemed natural to draw most heavily on the greatest intellectual and political resource in the Congress: the Members themselves. However, the guests also included a large number of staff and outsiders, most of whom either currently or formerly were connected with government service.

How well did the program measure up to the bi-partisan nature of the enterprise? Very well, it is agreed among members. With significantly few exceptions, the broadest possible range of opinions were aired. There were occasional panel discussions. The usual practice was to have several speakers in different sessions on the same topic. Perhaps the next factor which most assured a balanced presentation was the intellectual responsibility shown by the speaker himself toward the controversial nature of the discussion. The speaker frequently was careful to separate his political judgments from historical facts.

Discussion was on an "off-the-record" basis, a fact appreciated by more than a few of the principals. It is agreed that this situation helped make their remarks more candid, complete, and original.

Where possible, the interns received in advance readings suggested by the speaker. Reading material usually consisted of speeches, bills, or articles in the Congressional Record. A general reading list on the

Congress, compiled with professional assistance, was also made available.

The Seminar Committee endeavored to maintain a flexible posture—where it was unfortunate to lose a scheduled speaker, more often than not a qualified substitute was successfully engaged.

The objective was to conduct, where feasible, a series of small seminars on each topic—the length and scope of each series to be determined by the amount of interest sustained by the participating interns. As a result, there were, for example, several seminars on "Congress and the American University", "ABM" and the "Committee System", and only one on "View From the Court" and "Ethics."

There were fifty-seven seminars with a total of sixty-six speakers on twenty-five topics.

At first, each participating intern (650 out of 950 official interns signed up for the seminars) was asked to choose eight areas in which to specialize: he was guaranteed admission to all the seminars in the eight fields.

Each intern received a small card that served as notification of a seminar and as his ticket of admission. Certain problems—the work involved in printing the cards, limitation of attendance to allow each participant as close a view of the speaker and subject as possible, and the stated preference of some guests for a larger audience—caused a modification in the system. A general schedule was published every two weeks. The interns were requested to attend only those seminars for which they were registered, unless special permission was obtained. Certain programs, at the discretion of the Committee, were opened to all interns.

The results were very satisfactory. Attendance was sustained at a high rate throughout. When the program was operating fully, three or four seminars per day was a common occurence.

The seminars were held in House committee rooms, subcommittee hearing rooms, on the Senate side, and occasionally in the Coolidge Auditorium of the Library of Congress. Many perfessional staff members in Congressional offices and committees were extremely cooperative in obtaining use of various rooms in which the seminars were held. This high level of support contributed significantly to this program's success. The Seminar Committee has already indicated its grateful appreciation to those who cooperated in this way, but also wishes to do so publicly.

Each seminar was planned for an hour in duration. Most speakers prepared opening remarks. There was always a lengthy question period. Many speakers encourage comments as well as inquiries, and, at times, it seems fair to say, the discussion reached the elvated level of real "dialogue."

At the recess in mid-August the interns were given a questionnaire to complete. It was designed to help the Committee review and improve the seminar program. A copy of the questionnaire is included in the Appendix. Some of the results are as follows from the 169 respondents:

1. What was the quality of the seminars? High *67.5%*. Medium *37.5%*. Low *0%*.

2. How did you find the choice of speakers? Excellent *62.8%*. Satisfactory *37.5%*. Poor *.2%*.

3. Was there enough variety to the program? Yes *79.7%*. No *20.3%*.

4. On balance, do you feel that opposing views were adequately represented? Yes *60.4%*. No *39.6%*

5. Did your Member and Administrative Assistant approve you attending these seminars? Yes *88.3%*. No *11.7%*. Sometimes *0%*. Objected *0%*.

The average intern attended many of the seminars, felt he learned a great deal from the program, would like to receive college credit in the future, and feels confident that work performed in the seminars would not conflict at all with office duties.

The interns suggested the need for many administrative changes in the summer program which in the opinion of this committee could be easily implemented to improve measurably the operation of this program. Among those criticisms and suggestions presented by the interns were the need for better and speedier notification of meetings, more discussions and debate and less question and answer and formal presentation by speakers, better regulated scheduling of seminars to allow more seminars at the beginning than at the end of the program.

Some additional suggestions were as follows: that the seminars aim even deeper into the topics; that the seminars stress the political process, that is, the problems of writing and enacting legislation; that more speakers represent views outside the Congress (some preferred lobbyists, minorities, powerful groups); that Executive-Legislative interrelationships be explored at greater depth; that the interns themselves can make a greater contribution to the program, by doing suggested reading; that more time should be available, in conjunction with this kind of a program, to observe "Congress in action," particularly the committee process, floor action; that the best sessions were those with small numbers of participants; that informal get-togethers with Congressmen would be appreciated; that debates might elicit more meaningful discussion of issues and help listeners compare the merits of differing presentations; that college credit could and should be arranged for participation in the seminar program.

Some typical reactions to the seminars from the interns from every part of the country were as follows: "The seminars were generally excellent and usually well coordinated," Margaret Maxwell, Phoenix, Arizona; "Make sure Members know the merits and strong points of this program so they will be more inclined to vote for funding of the intern program," David Edinger, Whittier, California; "The intern program should definitely offer college credit for interns. The exposure it has given me taught me more than I can say," Patti Klamecki, Milwaukee, Wisconsin; "All in all a real good program. I sure wish I could have attended more," Frank Sullivan, South Bend, Indiana; "Many students, vitally interested in the machinery of government, will be unable to become interns if pay is not given. I urge you to seek a change in this situation," Robert Sacknovitz, Philadelphia, Pennsylvania; "The best aspect of this program was the opportunity to make first hand value judgments about the personalities involved in National Affairs," Jesse M. Liebman, New York, New York; "The best seminars were ones concerning the political life of the speaker. Rehashing of current issues, while at first interesting, became boring as people repeated things," Christopher Kurs, Springfield, Virginia: "I feel that with stronger Congressional support, the program can develop into more dynamic proportions by presenting more speakers and activities." Jonathan T. Holt, Cheshire, Connecticut; "I am grateful to the Intern Committee for working so hard to keep us busy and contented with the seminars," Beverly Bradford, Birmingham, Alabama; "As an overall assessment, I thought the whole program was well organized, and the greatest, I don't know how anyone could cut it down, I consider myself lucky," Chery Guess, Casper, Wyoming; "I feel an attempt should be made to keep seminar size as small as feasible without restricting who may or may not come," Dave Mangham, Florence, Alabama.

It is the hope of the Committee, supported by the interns' views, that college credits can be granted for seminar work next summer, if this program is continued. Through an arrangement that, it has been assured, could be worked out with a local university, interns who write a substantive paper on a topic chosen at the beginning of the summer would be eligible, upon favorable review of their work, to receive course credit.

Several universities from different parts of the country have already expressed an interest in participating in such a program. In such a program the intern might be able to use an office project as the basis for his paper.

Another suggestion being actively considered foresees an editorial board of House interns and university scholars which would publish a periodic journal on public policy affairs composed of the papers written by the summer interns.

There are numerous unexplored directions which the seminar concept might go based upon the great success enjoyed by the program this summer.

It is the sincere hope of the Seminar Committee that it be allowed to continue its program during the summer of 1970 based upon the outcome of this year's program.

It would be the hope of the Intern Seminar Committee that the Congress see fit to reinstitute its financial support which it had previously given.

The high degree of participation in the seminar program by a great majority of the summer interns produced a fine atmosphere of learning, debate and discussion which should be maintained during the coming summer. It would indeed be unfortunate to reduce, impair, or neglect to cultivate the great educational opportunities which clearly are available in the Congress and can easily be exposed by the Intern Seminar Program.

It has been a sincere privilege for us to serve in this program. We are grateful to the Speaker of the House of Representatives, the Honorable John W. McCormack, to the Majority Leader, the Honorable Carl Albert and to the Minority Leader, the Honorable Gerald R. Ford for unstinting support of our endeavor. We hope we have, through this program, met their minimum expectations.

FRANK O'GORMAN,
MARK E. TALISMAN,
Co-Chairmen.
GERRY SIMONS,
Staff Director.

1969 SEMINAR PROGRAM

July 1—Hon. Allard Lowenstein, Hon. W. E. Brock, Students and Politics.

July 10—Hon. Shirley Chisholm, Freshman Member/Urban Problems.

July 11—Hon. John Brademas, Hon. William A. Steiger, Congress and the American University.

July 15—Hon. Chet Holifield, Committee Chairman.

July 15—Hon. John Gardner, Urban Problems.

July 15—Hon. Richard Bolling, Congressional Reform.

July 17—Hon. J. Glenn Beall, Jr., Hon. Thomas Eagleton, Freshman Member.

July 17—Mr. Russell Hemmenway, The Committee for an Effective Congress.

July 17—Hon. Paul Douglas, Hon. Sam Gibbons, Hon. Charles Vanik, Politics of Tax Reform.

July 22—Mr. Argyll Campbell, Lobbying

July 24—Dr. Alton Frye, MIRV.

July 25—Dr. Jeremy Stone, ABM.

July 25—Hon. William Proxmire, Defense Spending and National Priorities.

July 28—Hon. George Mahon, Committee Chairman.

July 28—Hon. Clifford Case, MIRV.

July 29—Hon. Abraham Ribicoff, Urban Problems.

July 29—Mr. Samuel Halperin, Tactics on Controversial Legislation.

July 29—Hon. Paul Nitze, ABM.

July 30—Mr. Mark Talisman, Politics of Tax Reform.

July 31—Hon. Averell Harriman, East-West Relations.
July 31—Hon. Birch Bayh, Electoral College Reform.
August 1—Hon. Wilbur Cohen, Social Welfare Programs.
August 4—Hon. Karl Mundt, Vietnam.
August 4—Hon. Paul McCloskey, Hon. Thomas Rees, Congressional Reform.
August 4—Hon. William McCulloch, Electoral College Reform.
August 4—Hon. Peter Dominick, ABM.
August 5—Mr. Mark Talisman, Running a Political Campaign.
August 5—Hon. William S. Moorhead, MIRV.
August 5—Mr. Richard Kaufman, Investigations and Hearings.
August 6—Mr. John Sontag, East-West Relations.
August 7—Hon. Brock Adams, Congressional Reform.
August 7—Hon. Paul Findley, Agricultural Programs.
August 7—Mr. Peter Hart, Running a Political Campaign.
August 8—Mr. Boris Davydov, East-West Relations.
August 8—Mr. M. Rasgotra, View from the Embassy.
August 8—Mr. George Vincent, Jr., Running a Political Campaign.
August 11—Mr. John Swanner, Ethics.
August 11—Hon. Robert Packwood, Freshman Member.
August 11—Hon. Allard Lowenstein, Students and Politics.
August 12—Hon. Emory Swank, East-West Relations.
August 12—Mr. Andre Baeyens, View from the Embassy.
August 12—Mrs. Evelyn Dubrow, Mr. Clarence Mitchell, Lobbying/Tactics on Controversial Legislation.
August 13—Hon. James Allen, Congress and the American University.
August 13—Mr. David Broder, The Press on Capitol Hill.
August 13—Hon. Samuel Stratton, MIRV.
August 14—Mr. Nasir S. Batayneh, The Middle East.
August 14—Mr. Amitai Etzioni, Defense Spending and National Priorities.
August 14—Mr. Dean Costin, Tactics on Controversial Legislation.
August 15—Mr. Asher Naim, The Middle East.
August 15—Mr. Jack Anderson, The Press on Capitol Hill.
August 15—Mr. Robert Wagner—Urban Problems.
August 18—Mr. Patrick Kennedy, VISTA.
August 19—Hon. A. S. Mike Monroney, Congressional Reform.
August 19—Mr. Jaroslav Zantovsky, View from the Embassy.
August 19—Mr. Jack Schuster, Congress and the American University.
August 20—Mr. Joseph Califano, View from the White House.
August 21—Dr. Howard Penniman, Prof. D. B. Hardeman, Dr. Stephen Horn, Assessing the Role of Congress.

The following persons were invited to participate in the Seminar Program under the listed topics, but for various reasons were unable to appear:

Hon. Edith Green, Congress and the American University.
Hon. H. R. Gross, Congress and the American University.
Hon. Willard Wirtz, Urban Problems.
Hon. Charles Goodell, ABM.
Hon. Gale McGee, ABM.
Hon. Stuart Symington, ABM.
Hon. John Sherman Cooper, ABM.
Mr. Alexander Barkan, Running a Political Campaign.
Mr. David Mixner, Running a Political Campaign.
Hon. Henry Jackson, Defense Spending and National Priorities.
Hon. Robert McNamara, Defense Spending and National Priorities.
Hon. Charles Percy, Defense Spending and National Priorities.
Hon. Byron R. White, View from the Supreme Court.
Hon. Warren E. Burger, View from the Supreme Court.
Hon. Thurgood Marshall, View from the Supreme Court.
Hon. Potter Stewart, View from the Supreme Court.
Hon. J. W. Fulbright, Vietnam.
Hon. Albert Gore, Vietnam.
Hon. John Tower, Vietnam.
Hon. Frank Church, Vietnam.
Hon. Eugene McCarthy, Vietnam.
Mr. William Timmons, View from the White House.
Hon. William B. Spong, Social Welfare Programs.
Hon. Llewellyn Thompson, East-West Relations.
Hon. Dean Rusk, East-West Relations.
Mr. Ray Denison, Lobbying.
Mr. Paul Duke, The Press on Capitol Hill.
Mr. Joseph Kraft, The Press on Capitol Hill.
Mr. Neil MacNeil, The Press on Capitol Hill.
Mr. James Reston, The Press on Capitol Hill.
Mr. Richard Valeriani, The Press on Capitol Hill.
Mr. Ralph Nader, Investigations and Hearings.
Hon. John W. Byrnes, Politics of Tax Reform.
Mr. Walter Reuther, Politics of Tax Reform.
Mr. George Wilson, MIRV.
Hon. Joseph Clark, Ethics.
Hon. Louis Stokes, Freshman Member.
Hon. Harold Hughes, Vietnam.
Hon. William Saxbe, Freshman Member.
Hon. Emanuel Celler, Electoral College Reform.
Hon. Walter Hickel, Environmental Problems.
Hon. Russell Train, Environmental Problems.
Hon. Stewart Udall, Environmental Problems.
Hon. John Freeman, View from the Embassy.
Hon. Walter Washington, Urban Problems.

BORN FREE

HON. EARL F. LANDGREBE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. LANDGREBE. Mr. Speaker, Pfc. Kenneth McDaniel, 21, of Lowell, Ind., was killed in action in Vietnam on August 13. Although there are many Americans who question our role and commitment in Vietnam, Private McDaniel is an example of a dedicated young American, serving his country bravely, who knew why he was in Vietnam and was willing to stand up, yes, and to give his life for the principles on which his country was founded. I think my fellow colleagues will be interested in reading the words he wrote in a letter to his parents just a few days before his death:

BORN FREE

The sky is dark and gray
As a young soldier gets down to pray.
O Dear God, hear my prayer this day
For I have a feeling that I will pass away
Before battle comes another day.
And if it is to be, O Lord, then hear what I have to say.
Some people think I'm wrong for being here
Fighting proudly for country dear
But no matter what they say
Here I am and here I'll stay.
Many friends of mine have come and gone
And many more will come to fight on
For we are fighting to keep our country free
From Communism and in its place put Liberty
Our forefathers before us fought this cause
And now we stand and pause—
And think quietly to ourselves should we be here
Yes! for now we too stand proudly for country dear.

ONE-FIFTH OF MEMBERS NOW BACK ENVIRONMENT COMMITTEE

HON. DONALD G. BROTZMAN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. BROTZMAN. Mr. Speaker, today I am reintroducing my proposal to establish a standing Committee on the Environment in the House of Representatives. I am gratified by the support my proposal has received from other Members. With today's additions, 88 Members have joined me in cosponsoring the resolution to create the Committee on the Environment.

Support for this committee is broad-based. There are Republicans and Democrats supporting the resolution, and I think I can safely say that all philosophical shadings of our two great political parties are represented. In addition, support comes from all parts of the country. Forty States are represented as are all of the 21 standing committees of the House.

Mr. Speaker, I feel my proposal is particularly timely in view of the speculation that the quality of the environment and the need to protect the Nation's land, water, and other physical resources is to be a dominant theme in President Nixon's upcoming state of the Union message. The committee would have jurisdiction over most of the environmental crises which today beset the Nation and the world, including water pollution, air pollution, weather modification, waste disposal of all kinds, the use of pesticides and herbicides, and acoustic problems. At this point, I am inserting an article from the front page of the December 7, 1969, Washington Post in the RECORD:

[From the Washington Post, Dec. 7, 1969]

NIXON TO PRESS IMPROVEMENT IN QUALITY OF 1970 ENVIRONMENT

(By Carroll Kilpatrick)

The quality of the environment and the need to protect the nation's land, water and other physical resources is now expected to be a dominant Nixon administration theme next year.

The President began work several weeks ago on the State of the Union address—his first—which he will deliver to a joint meeting of Congress next month.

As the message began to take shape, the environment was the major domestic theme, officials said last week.

Mr. Nixon himself pulled aside the curtain a bit when he told the nation's governors and their wives that when he speaks to them next, in February, it would be on how to challenge young Americans "to move forward on the whole subject of the quality of life in America," including environment.

Earlier this year, Mr. Nixon established the Environmental Quality Council and has met a number of times with it.

In addition to attacking air and water pollution, the President said that the emphasis should be on "how we can move forward on all fronts so that life in this country in addition to being very rich and very strong can also have that extra dimension of idealism" that caught the imagination of the world at the time of the birth of the Republic.

A high official said that one example of what the President was talking about was a $15-billion Interior Department plan to attack water pollution.

Secretary of the Interior Walter J. Hickel has proposed a plan whereby the federal government would cooperate with the states and local communities in attacking this serious problem. It would be a 20-year, pay-as-you-go plan with the federal government guaranteeing the principal costs and the local governments guaranteeing the interest costs on the necessary bonds.

Hickel has estimated that it would cost $10 billion to protect the rivers and lakes from the discharge of sanitary sewers and $5 billion from the discharge of storm sewers. He said storm sewers can be almost as polluted as sanitary sewers.

Hickel has argued that a "national commitment" must be made, with the federal government providing guidance and the capital investment and local communities doing the work.

This fits the President's concept of the new federalism, Hickel believes. The pay-as-you-go feature amortizes the huge cost over a period of years, making it possible to launch the program without large initial expenditures.

Hickel also has recommended the establishment of a new Cabinet department, that would be known as the Department of Natural Resources and Environment, to take over much of Interior's work and other environment work scattered in other departments.

If the House of Representatives is going to meet the environmental challenges of the seventies, it is imperative that our committee machinery be revised as I have proposed. Despite the excellent work which has been done within our existing committee structure in some environmental areas, generally speaking, our approach has been fragmented and sporadic when a unified, hard-driving approach is sorely needed.

Mr. Speaker, I am pleased to announce that 26 Members today joined in sponsoring resolutions identical to House Resolution 375 which I introduced on April 28, 1969. They include Messrs. ADAIR, ARENDS, BEALL of Maryland, BRADEMAS, BUSH, BUTTON, DANIELS of New Jersey, DEVINE, ESCH, FRELINGHUYSEN, GOODLING, HASTINGS, KUYKENDALL, LUKEN, MCKNEALLY, MATHIAS, MATSUNAGA, MORSE, NELSEN, PELLY, POLLOCK, SANDMAN, SCOTT, SHRIVER, STOKES, THOMSON of Wisconsin, and TIERNAN.

The 61 Members who previously joined me in sponsoring resolutions identical to House Resolution 375 include Messrs. ADDABBO, ANDERSON of Illinois, BIESTER, BLACKBURN, BROYHILL of North Carolina, BUCHANAN, BURKE of Florida, BURTON of Utah.

Messrs. CAHILL, CAMP, CARTER, DON CLAUSEN, CONTE, COUGHLIN, COWGER, DENT, DINGELL.

Messrs. FISH, FOREMAN, GUBSER, HALPERN, HANSEN of Idaho, HECHLER of West Virginia, Mrs. HECKLER of Massachusetts, Messrs. HOGAN, HORTON, HUNT.

Messrs. KLEPPE, KYROS, LLOYD, LUJAN, MCCLORY, MCCLOSKEY, MCDADE, MANN, MAYNE, MIKVA, MOLLOHAN.

Messrs. PIKE, PODELL, QUIE, REID of New York, RIEGLE, ROONEY of Pennsylvania, SAYLOR, ROTH, SCHEUER, SCHNEEBELI, SEBELIUS, STANTON, STEIGER of Arizona.

Messrs. TAFT, TALCOTT, TEAGUE of California, WHITEHURST, WILLIAMS, WOLD, WRIGHT, WYATT, and WYMAN.

A LESSON IN REALISM

HON. JACK EDWARDS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. EDWARDS of Alabama. Mr. Speaker, President Nixon made a major impact on the Nation in his recent televised press conference.

The Birmingham News of December 10, 1969, called it "a lesson in realism." Attached is the full text of the News editorial:

A LESSON IN REALISM

Throughout President Nixon's news conference Monday night, whether he was talking about Vietnam or feeding the hungry or tax policy, one got the feeling that here was a man who is tough-minded, disciplined and determined to reintroduce the word "responsibility"—fiscal responsibility, legal responsibility and social responsibility—into the American vocabulary.

On a steady diet of pie-in-the-sky, we have grown flabby; listening to wishing-will-make-it-so philosophers has made us reluctant to stand eyeball to eyeball with hard reality.

* * * * *

Mr. Nixon seemed to be saying to the nation:

Sure, you want peace in Vietnam. So do I. But there is no magic wand to wave, there is no cheap and easy peace. A real peace may require Americans to endure the agonies of war for yet a little longer.

Sure, you want to end poverty and to insure that no American's stomach need go empty. So do I. But such proposals as the one by the just-adjourned national conference on hunger—that the federal government guarantee a minimum income of $5,500 a year, a program that would cost $70 to $80 billion annually—are patently unrealistic and do more to set back than to advance serious efforts to aid the poor.

Sure, you want your taxes cut. So do I. But the hard fact is that your government has obligations which must be met, and these must be balanced against revenue; and I, as President, have a responsibility to consider the impact of fiscal measures on a dangerously overheated economy—so that you, the consumer, won't have to bear the brunt of still another round of inflated prices.

* * * * *

All of this, it seems to us, shows a resoluteness of purpose of the sort the nation has needed in its chief executive. We hope that Mr. Nixon will continue to be firm in his determination and candid in his messages to the American people.

Americans can do whatever is necessary for their own and their country's good, their history proves, if they understand what it is. One of the most useful services the President can perform is to inspire, by personal example, a renewed sense of responsibility in citizenship.

There are no panaceas, no easy, instant answers to the tough problems confronting us, and those who encourage belief to the contrary do no favor to anyone.

RED CROSS TO THE RESCUE

HON. LIONEL VAN DEERLIN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. VAN DEERLIN. Mr. Speaker, for many years, Charles L. Israel, of San Diego, has served the American Red Cross, both as a professional and as an unpaid volunteer. During World II, he was a field director in the military welfare division; and in the years since, he has continued his work with the organization, primarily in its disaster relief program.

Recently, he was called upon to serve in the Louisiana-Mississippi area, after the devastation caused by Hurricane Camille. Leaving his family and his real estate business behind in California, Mr. Israel spent a month in Mississippi, helping people dig out from the ruins of the storm and seeking ways to mend their broken lives.

At this point, I include with my remarks a letter from Mr. Israel to his wife, concerning his experiences in Mississippi. I urge my colleague to read it, for I feel it provides new insight into the vital work being done by the American Red Cross and its volunteers.

The letter follows:

Red Cross is doing a job and without the assistance given, the families here would be so emotionally upset it would take years to recover from the shock of the enormity of the situation.

The fortitude of the people, the victims of the hurricane, is something to behold. The winds, waves, knew no race, religion, or color; it struck all, the rich, the poor, the middleman.

All need help and the Red Cross is on the job giving immediate assistance to meet all emergency needs, and the case processors are on the job assisting families plan and helping families financially. When the family has done all it could for itself, Red Cross steps in to meet the needs and fills in the gap.

Certainly without this assistance a goodly section of the country would be years in recovering from the effects of this hurricane.

So it is only through the help of all the people in this land of ours assisting with funds channeled through the organization, with the know-how, the American Red Cross, that a community so hard hit can come back and start life anew.

To help our fellowman is a privilege and should be embossed upon the minds of our fellow countrymen. The "Oh Wells," they can do it all themselves, they should become obsolete.

For my part I am glad I came to help. It is good to see a smile come to the faces of the victims of the hurricane when help is given

and an encouraging word is spoken and they know their fellow Americans do care.

The story just has to be told and retold until all of the people know the worth of the American Red Cross and all the people of our land become part of the Red Cross program just by opening up their hearts and their purses or giving of themselves.

A disaster can strike anywhere in this land of ours and one never knows when he too, may need assistance. It would be comforting to know that a great humanitarian organization such as the American Red Cross has the backing of all the people and will be able to step in to do the job of alleviating suffering caused by castrophic situations.

When disaster strikes it should be a privilege to help and not a duty. The Amercan Red Cross is charged by our government to do the job and needs the help of all the people of this great nation of ours.

CHARLES L. ISRAEL.

THE GATE CITY OF THE SOUTH

HON. FLETCHER THOMPSON

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. THOMPSON of Georgia. Mr. Speaker, as Congressman from Georgia's Fifth District which includes most of Atlanta, I have a great pride in Atlanta, her progress, and her history.

Many Members of this body who have flown through Atlanta recently have been impressed with her airport facilities, and others who have visited the city recently have been amazed at the growth and revitalization of her business district. Still others know of Atlanta regretfully only through having read Margaret Mitchell's "Gone With the Wind" or seen the movie version.

Atlanta has a great history, dating back to 1836 when the first log cabin was built. One of my constituents, Mr. Hubert F. Lee, editor of Dixie Business magazine, recently sent me a copy of the Lone Scout magazine of February 10, 1917, which contained an article he wrote about Atlanta's history. So that other Members may become acquainted with our city's background, I insert in the RECORD the article from Lone Scout about Atlanta. The article follows:

THE GATE CITY OF THE SOUTH

(By Lone Scout Hubert F. Lee)

ATLANTA, GA.—The Gate City of the South was not always known as Atlanta. Because some Lone Scouts are interested in how my city got its name I am going to write the history of Atlanta.

In 1836 Mr. Hardy Ivy built the first log cabin on the site of what is now Atlanta. One year later the Western and Atlantic Railroad selected this place for its terminus and the place was called "Terminus."

The second house was built by John Thrasher in 1839, and the first business firm, Johnson & Thrasher, opened a little store. In 1842 the settlement had six dwellings, and a daughter was born to Mr. and Mrs. Carlisle. That same year the first train ran from Terminus to Marietta, and the first two-story house was erected, and the first real estate auction took place.

In 1843 Terminus was incorporated under the name of Marthasville, in honor of the pretty daughter of the Governor of Georgia. At this time Marthasville had a railroad office, a sawmill and two stores.

In 1847 the legislature changed the name to Atlanta. The town had 500 inhabitants. Three years later the population was 3,000, and was 6,000 four years later.

About this time there were sixty stores, a courthouse, and a theater. The annual trade was $1,500,000.

One year later the city was lighted with gas, and the Atlanta Medical College was established.

The "boom" period began in 1859. The population was 11,500. In that year twenty brick stores were built, four hotels, four machine shops, two planing mills, four tanneries, one large rolling mill, one clothing factory and fifteen churches. The panic in 1857 did not hurt Atlanta. The first directory, in 1859, showed that the city had three fire departments, seven Masonic lodges, one Odd Fellows society, two temperance societies, seven newspapers, five hotels, fifteen manufacturing concerns.

Up to the Civil War period the mayors of the city were Moses Ferminalt, Benjamin Borar, W. Buell, J. Norcross, G. O. Gibbs, John Mims, W. M. Butte, A. Nelson, John Glenn, William Eyzard and Luther J. Glenn.

The above is true and I hope to see it in "Our Dear Old Lone Scout."

YEAR OF APOLLO—1969—U.S. SPACE ACCOMPLISHMENTS

HON. JAMES G. FULTON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. FULTON of Pennsylvania. Mr. Speaker, the National Aeronautics and Space Administration has outlined the U.S accomplishments in space in 1969. It is a pleasure to set out for the American people the fine progress which is the result of cooperation of everyone in our space program with our competent astronauts. Their news release of December 20, 1969, follows:

NEWS RELEASE No. 69–161

The year of the Apollo Moon landings—1969—the year of close-up studies of Mars and, closer to home, a year when communications satellites, space weather observation and scientific examination of the Earth's environment from orbit continued with increasing sophistication.

Following the Apollo 9 and 10 readiness missions, the first lunar landing mission was launched July 16 and man set foot on another celestial body for the first time four days later.

"That's one small step for a man, one giant leap for mankind" were the words of Apollo 11 Commander Neil A. Armstrong as he swung down from the Lunar Module to the dusty Sea of Tranquility at 10:56 p.m. EDT July 20.

Exactly four months later Apollo 12 Commander Charles "Pete" Conrad led a second two-man exploration team to the Moon, this time in the Ocean of Storms.

The era of manned exploration of other planets had begun—bringing to fruition the ten-year effort of the government-industry-university complex in which 400,000 Americans had brought about the first major milestone in unlocking the secrets of the universe.

Two unmanned spacecraft, Mariners 6 and 7, flew by Mars in July and August revealing it to be different than—rather than resembling—either the Moon or Earth.

Results of the flyby in which 200 photos of Mars were taken confirmed earlier data received from Mariner 4 in 1964 that there are numerous craters and the atmosphere is roughly equivalent to that of Earth at about 100,000 feet altitude.

But the unprecedented clarity of the new pictures showed numerous craters including one about 300 miles in diameter as well as one vast stretch of over 1,200 miles with almost no craters. The only identifiable cloud was a very thin streak hanging 20 to 30 miles off the edge of the planet.

Ice cap temperatures were measured to be very similar to that of dry ice although one experimenter believes there may be water ice at the edge of the cap.

In the meteorological satellite area, Nimbus 3 was placed in polar orbit. Shortly after launch, it was apparent that not only the cloud cover photos being returned were of excellent quality, but a new step forward in meteorology had been taken. A weather bureau official called it a breakthrough as significant to meteorology as the launch of the first satellite.

He referred to the vertical temperature measurements, air pressure, vapor content and wind speeds taken at numerous locations around the world on a daily basis.

NASA also launched a regular meteorological operational satellite for ESSA, ESSA 9, in February, and four communications satellites were launched for Communications Satellite Corp. One of the four, Intelsat III F–5 failed to achieve orbit because of a launch vehicle malfunction.

Two more Orbiting Solar Observatories, OSO's 5 and 6, were launched by NASA during the year to continue the study of the Sun and another Interplanetary Monitoring Platform, IMP–G, and an Orbiting Geophysical Obesrvatory, OGO–6, were launched to study the medium near Earth and out to more than 100,000 miles in space.

Other launches for outside organizations included an ionospheric sounding satellite, ISIS 1; ESRO I–B and German Research Satellite–A, both scientific satellites, and a communications satellite, Skynet–A, for the British Ministry of Defense.

Another important flight during the year was Biosatellite 3. This was the first mission involving a primate and though it was aborted far short of its scheduled flight of one month, results from the flight were important.

New knowledge about the structure and behavior of cancer cells was a surprise 1969 research dividend. Researchers at the NASA Langley Research Center, Hampton, Va., developed a microscope technique that permitted time-lapse photographs of cell division mechanisms in healthy and cancerous tissues.

In aeronautical research, the promising NASA super-critical wing concept moved from hand-crafted, wind tunnel refinements into preparation for full-scale flight tests. The concept, also originating at Langley, has stirred unusual interest because of its potential for enhancing both the cruise performance and the operational economics of subsonic jet airliners. Flight tests will be made with such a wing mounted on a modified jet fighter acquired by NASA from the U.S. Navy.

The goal was to get data on how space radiation might affect cellular growth. What they discovered and recorded was that cancer cells split, but remain connected by thin, stretchy linkages and that one cancer cell could cause connected cells to divide in sequence by sending a sort of chain reaction-stimulus through the linkages.

Double success twice rewarded NASA's efforts in tracking and data acquisition in 1969, with the successful lunar landing flights of Apollo 11 and 12, and the two Mariners flying close to Mars.

The Manned Space Network performed virtually without flaw in maintaining contact on two flights, with two Apollo spacecraft at once—the Lunar Module stationed on the Moon, the Command Module continuing in lunar orbit. The 85-foot antennas of the major stations at Goldstone, Calif.;

Canberra, Australia, and Madrid, Spain, used main and wing, or backup, antennas to carry out this long-range double-track task. In addition, with 210-foot antennas at Goldstone and Parkes, Australia, they provided live television direct from the Moon to an audience estimated, for Apollo 11, in the hundreds of millions of persons over many modern nations.

The Mars feat attracted the interest of astronomers because the cameras of Mariners 6 and 7 returned 200 high quality photos of the planet in a period of some 12 hours—a gross gain from the technology possible with Mariner 4, in 1965, when 22 Mars pictures were transmitted in 175 hours. Last July 31 and Aug. 5 Mariner 6 and 7 passed within 2,000 miles of Mars to scan two different faces of the planet, and transmitted photo and other data to Earth over a distance of 60 million miles.

NASA's international program broke new ground in 1969 with an agreement with India for use of a synchronous communications satellite to broadcast TV directly into 5,000 Indian villages for such program objectives as population control and agriculture improvement. The year also saw the successful launching of three scientific satellites in cooperative programs with Canada, Germany and the European Space Research Organization (ESRO).

More than 50 foreign countries continued to obtain daily meteorological data directly from NASA and ESSA weather satellites by means of inexpensive automatic picture transmission (APT) ground receiving stations. The cloud-cover photographs received contributed widely to improved weather forecasting and storm advisories.

NASA continued to transfer to industry, small business and the scientific community the new technology coming out of space-related research and development activity. Most of this technology comes from NASA field centers where specialists review research and development projects for promising new ideas. NASA contractors, also, are required to report inventions, discoveries, innovations and improved techniques they develop in work for NASA.

MAJOR NASA LAUNCHES IN 1969

Date	Name	Launch vehicle	Launch site	Mission	Results

GOOD GUYS

HON. LOWELL P. WEICKER, JR.

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. WEICKER. Mr. Speaker, in this era of raised voices and angry confrontation, I would like to call my colleagues' attention to a group of quiet men who mirror the true Christmas spirit.

About 4 years ago in Bridgeport, Conn., in my district, Mr. Joseph Mastronardi, Jr. and Mr. Jules J. Bues organized a reunion of classmates and friends whom they grew up with in the North End of Bridgeport. As Mr. Mastronardi notes, the men who attended the reunion were all "good guys," the type of guys you would be proud to call your friend.

From this reunion stemmed the North End Good Guys, a group of guys who quietly share their friendship with the sick, the underprivileged, the poor, and any family in their community in distress. There are now about 300 members in the North End Good Guys of Greater Bridgeport who help their neighbors and spread good will without publicity or fanfare.

This group of Good Guys is constantly active throughout the year, but during the holiday season they are particularly active. Last year they distributed more than 1,000 toys to youngsters and plan a similar project this year. There are many needy families who will have a Christmas dinner, thanks to the Good Guys.

When you know that there are men in this world like the North End Good Guys, who truly love their neighbor, the meaning of the phrase "Christmas Spirit" certainly has greater depth.

TRANSPORTATION AND THE ELDERLY

HON. HARRISON A. WILLIAMS, JR.

OF NEW JERSEY

IN THE SENATE OF THE UNITED STATES

Wednesday, December 17, 1969

Mr. WILLIAMS of New Jersey. Mr. President, within recent months the U.S. Senate Special Committee on Aging and several of its subcommittees have taken testimony on the "Economics of Aging: Toward a Full Share in Abundance."

Our witnesses have given us much information about generally inadequate retirement income, and they have given us example after example of the drains upon that income: inflationary health care costs, rapidly rising real property taxes, and inflation in general.

There is another, less obvious drain: the extra living costs that arise when transporation is inadequate, too costly, or even nonexistent. At one recent hearing, for example, we heard about an elderly woman who was trying to earn a few dollars doing housework. But it costs $1 for carfare each day she works. And so she walks 15 blocks each way to cut down the fare she must pay.

It seems to make little difference whether the committee is taking testimony in rural or urban areas. At a recent hearing in Appalachia, one witness told about a 78-year-old woman, with a monthly income of $85, who had to pay a neighbor $5 once a month to take her into town so that she could purchase food stamps. There was no other way to get there, and her neighbor was almost as poor and old as she was.

Transportation has been mentioned so often at our economics hearings that I decided on December 6 to conduct an information session in Paterson, N.J., solely on that subject. Paterson was selected because it has an active Office on Aging, because transportation studies have been conducted there within recent years, and because it has a large population of elderly residents.

Much valuable information was gathered, and I ask unanimous consent that three statements given at that time be printed in the RECORD. These statements provide useful insights, as well as proposals for change.

Further grassroots testimony was provided by a panel of elderly residents of Passaic County. Mrs. Minnie Barrow of Totowa, Mrs. Florence Baum of Paterson, Mrs. Mary Donkersloot of Clifton, Mrs. Violetta Hill of Wayne; and Mrs. Odessa Owen of Paterson.

Their expert testimony was that of the older person who finds it increasingly difficult to go shopping, to visit friends in the hospital, to go to centers for recreational events, and to go to their own doctor or to a clinic.

One woman said that it costs her 70

cents and she must make a transfer to travel only about 2 miles in order to reach the city center on aging. Another said that it takes 2 hours and costs more than a dollar to visit friends in a hospital.

Shopping problems were described: It is too difficult to carry heavy bundles while attempting to board a bus—when a bus can be found. Many elderly persons, it was reported, stay at home most of the time simply because it is too expensive and too much trouble to use whatever public transportation may be available.

It is clear, from their testimony, that the Senate Committee on Aging should look deeper into the problems described in Paterson. We should, for example, learn more about the probable effects of reduced fares for the elderly during nonrush hours. Asked at the hearing whether such an arrangement would be acceptable and helpful to them, the panel of elderly residents emphatically said yes. The committee should also look further into the question of design barriers that make public transportation inaccessible or unattractive to the elderly and also to the handicapped. As the author of mass transit legislation now before the Congress, I might add that I will do all possible to assure that accessibility is built into transportation systems of the future.

Fortunately, there is reason to think that there is growing awareness of transportation problems encountered by the elderly.

Representatives of the U.S. Department of Transportation and the Administration on Aging were on hand at the Paterson meeting, and they described new research efforts which should shed light on relevant subjects. In addition, a representative of the New Jersey State Department of Transportation described the potential usefulness of a "Dial-a-Bus" proposal which would provide on-call service in urban areas.

The people of Paterson and others at the December 6 meeting, have my thanks for providing weighty evidence about the need for closer attention to the transportation problems of the elderly.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

TESTIMONY BEFORE THE SENATE HEARING ON "TRANSPORTATION ASPECTS OF THE ECONOMICS OF AGING," PATERSON, N.J., DECEMBER 6, 1969

(By Mort Schwartz, chairman, Passaic County Council on Aging)

The county office on aging was established in 1968 by the Freeholders of Passaic County as a result of their recognition of the growing problems of the aging.

May I emphasize the last few words of that opening statement—*the growing problems of the aging*. We have come to recognize in recent years that the normal problems associated with old age are being compounded day after day by the evolutionary course of our social and economic habits of living.

Concern for health as we grow old, although still the paramount consideration, is accompanied by fear of financial insecurity, and apprehension as to the difficulty of continuing active and mobile.

Senior citizens on fixed incomes are being strangled by an economy that each year experiences a significant rise in the cost of living.

Senior citizens who, as their residential needs diminish, relocate to smaller or less elaborate housing, often find themselves isolated from friends and relatives in suburban or rural areas in which transportation is not readily available.

Appropriately, this hearing is entitled, "Transportation Aspects of the Economics of Aging." The subject of transportation cannot be isolated with respect to the senior citizen. The capability to be active and mobile after retirement is more often than not dependent on individual economic considerations.

The senior citizen scrutinizes expenditures in a different light than his younger neighbors. A bus trip to New York City costing a dollar is often equated with a meal. Unhappily, the dollar fare cuts into the amount of money allocated for food in many budgets.

Although they are worth repeating, the comments I have just made pertain to the aged in general, and the situations are well-known to all of us here. Let us then be specific with respect to conditions in our local area.

Passaic county, with a population approaching one-half million, has approximately 50,000 senior citizens distributed throughout its 16 municipalities. Almost 90% of the total population is concentrated in the lower half of the county, and three cities: Clifton, Passaic and Paterson account for almost 70%.

In size, the county has 194 square miles of land and eight square miles of water. More than two-thirds of this total area is still rural. Three municipalities in the upper half of the county: West Milford, Ringwood and Wanaque comprise 60% of the total square mileage.

The transportation situation within this configuration is briefly as follows:

The only existing major highways are routes 46, 3 and 21 which all barely skirt the very southern tip of the county, and Route 23 which moves from south to north along the county's western boundaries. Three additional limited access highways are now being built in bits and pieces with long delays. These are the new routes 80 and 287, and the existing route 208 in Bergen county which is being extended northward.

In the upper half of the county, only two roadways: county routes 511 and 513 provide arteries of any consequence, and both primarily allow north-south flow.

Two existing railroads—Erie Lackawanna and the New York Susquehanna & Western—are given over almost entirely to carrying freight, and the few commuter trains still available all terminate at the Hudson tubes in Jersey City.

Local intra-county bus services are considerable in the lower half of the county where population is dense. Local bus service is extremely limited in the upper half of the county, but a few lines do link Paterson with some of the northern municipalities.

Several major inter-state bus lines provide service to New York City from both the upper and lower halves of the county.

What does all this ad up to? The conclusion that current transportation development in Passaic County leaves much to be desired with respect to the senior citizen.

Bus and train schedules, as well as road construction, are designed for the commuter or the inter-county traveler. Little or no improvement has been realized in public transportation on a local basis. Major attention for the future is focused on highways, rather than municipal and county roads or means of expanding public conveyances.

In addition to the present shortcomings, a projection of population trends indicates a requirement for much study and planning concerning local transportation needs, and most important a change of emphasis is necessary.

More and more families are relocating to suburban and rural areas as current population booms continue. In Wayne, for example, where my family resides, the population has increased almost four-fold in the past 20 years. It is now anticipated that populations will increase 50% in such northern municipalities as West Milford and Ringwood during the next 10 years.

Senior citizen ratios throughout the county now range from 5 to 15% of local populations. It is probable that these ratios will remain fairly constant as families relocate.

From a recent study of national social security statistics, it was determined that the population of retired persons in New Jersey is growing faster than the national average; and that those 65 and over leaving the State are of higher than average income, while those of the incoming migration are in lower income brackets.

These statistics warn us that transportation problems will degenerate to the critical stage unless some positive, constructive steps are taken.

Before embarking on some concrete suggestions to improve transportation for the senior citizen, I would like to take a few minutes to outline some basic philosophy.

The word "retirement" is defined by Webster's Dictionary as "withdrawal" or "seclusion." My own definition includes this qualification: Retirement is withdrawal from full-scale daily labor for income. Retirement does not mean withdrawal or seclusion from society or social activity.

Key words for the senior citizen are those mentioned at the beginning of my remarks: activity and mobility. Both are essential to the maintenance of mental and physical well-being.

Consider these illuminating facts:

(1) The average person at retirement is in good health.

(2) The majority of senior citizens live alone, not with families.

(3) The onset of senility is associated closely with immobility and isolation.

One aspect of the need for activity and mobility for the retired person is not personal but is his value to the community. Where transportation has been provided, he has proved his worth in volunteer service. Staten Island is an outstanding example. In an experimental project there, 450 senior citizen volunteers assisted day care centers, youth serving organizations and hospitals with countless hours of service.

Now, for some constructive ideas which perhaps are worth investigation. First of all, with respect to public conveyances, it is suggested that both buses and trains initiate special reduced rates for senior citizens before and after peak hours of commutation. Perhaps this objective could be realized by Federal or State subsidy. Presently, huge sums of money go into construction of highways which often are obsolete before completion by virtue of congestion. Funds might better be used for mass travel to move large numbers of people faster and more safely.

It is further suggested that some transfer method be implemented to allow senior citizens to move from one public conveyance to another without cumulative charges. In most cases, intra-county travel involves transfer from one bus line to another to reach outlying destinations. Again, Federal or State subsidy may be required.

On a local level, it is suggested that individual communities, particularly suburban and rural, utilize existing school buses for the purpose of short haul jitney service. Most school buses, whether privately-owned or operated by boards of education, see limited daily service. Before and after school openings and closings, these vehicles could be dispatched on scheduled runs to and from hospitals, shopping centers, housing develop-

ments, recreation areas, etc. In this case, local subsidy by municipal government may be necessary.

To avoid impending road traffic problems by alleviating already congested arteries, county and State officials should make every effort to expedite construction of Routes 287, 80 and 208.

In closing, may I expound a strategy of daily living that is difficult to follow, but extremely beneficial if exercised. The ability to act at the outset of a problem, rather than the alternative of reacting when the situation becomes critical. It is possible that we have already arrived at the critical stage concerning the plight of the senior citizen. If this is not so, let us all strive to act together to prevent future hardships.

TESTIMONY BEFORE THE SENATE HEARING ON "TRANSPORTATION ASPECTS OF THE ECONOMICS OF AGING," DECEMBER 6, 1969, PATERSON, N.J.

(By Constance Midkiff, executive director, Paterson, N.J., Office on Aging)

It is with inordinate pleasure that I welcome this hearing to Paterson today. Since the Paterson Office on Aging opened in February 1967, transportation for older citizens has been one of our major concerns.

Paterson, with a population of approximately 150,000 has an estimated 18,000 citizens 65 years of age and older. Ten years ago a survey of aging—their numbers and needs—was made here in cooperation with Mrs. Eone Harger and the State Division on Aging.

At that time the 65 and over population was 14,000. Of these 46% were men, 54% women; 46% of those interview were single—most of them widowed. 14% lived alone. 8½% lived in cold water flats. 54% were dependent upon Social Security. About 6% were living on Old Age Assistance. 9% were still working. 8% depended upon their children for support. 28% had not seen a doctor within the year. 22% had been sick during the week in which they were interviewed. 6% were bedfast. 17% said they had no one to care for them in sickness. 20% had no opportunity to meet other people their own age.

In commenting on this survey, Mrs. Harger, who had worked closely with the Survey Committee, stated that many of the results were anticipated but what shocked the Committee was the intensity of the needs revealed. The statistics gave a picture of too many older people living alone, shut in and shut away from a full life—a profile of isolation which gave breath and blood to the statistics and pointed out directions that Paterson must explore in order to add a measure of security, comfort and companionship to the lives of its older residents. "What the people of Paterson plan to do about the conditions of the survey is up to them," Mrs. Harger concluded.

This challenge went virtually unmet for six years. During this period the 65 years and over population increased by about 4,000 and the percentage increase in all areas of need indicated by the survey was proportionate.

Five low income Senior Citizen housing projects were built during this period by the Housing Authority with a total of 590 units, but other than this very little was done.

Mayor Lawrence F. Kramer was made aware of Paterson's neglect of its older citizens and one of his campaign promises in 1966 was to do something about the problems of aging if elected Mayor. Creation of the Office on Aging was Mayor Kramer's first official act. Again through the cooperation of Mrs. Harger and the State Division on Aging, funds for the office were obtained under Title III of the Older Americans Act.

A Council on Aging widely representative of the community was organized in March of 1967. Goals set by the Council were community awareness and involvement of the total community in the problems of aging.

The Council has worked diligently and with some success in the areas of health, housing, nutrition, recreation, education and social activities. This is the end of the three year pilot project in Paterson and the City, with the Office on Aging and the Council, is evaluating the project and making permanent plans for meeting the growing needs of older citizens.

I have gone into this background to indicate that even though Paterson was made aware of the situation facing its older people by a scientific survey made by a group of concerned citizens, nothing was done to prepare for the growing needs of an expanding older population until Mayor Kramer involved himself in these problems and identified himself with Paterson's older people. My pleasure in this hearing today is that Senator Williams through investigation of various aspects of the economics of aging is involving himself and the country in the problems of aging. I think it is abundantly clear that the community and the so-called establishment must move together in order to prepare for the growing needs of this growing segment of the population. Transportation for the aging has been one of the major concerns of the Paterson Council on Aging from the beginning. We have been concerned not just with transportation to and from special events such as concerts, theatres, the State Fair, etc. The Council has extended its interest to consultation with transport companies and to the State legislature. Special effort has focused on:

1. Cost—which limits mobility for those on limited fixed income. This relates to employment for those who need a little extra work to supplement social security payments, participation in education, recreation and social events, visiting family, friends, clinics, physicians, hospitals, shopping, etc. We have proposed reduced fares during the non-rush hours which we believe would create greater movement and increase business as well as relieve some of the isolation existing among older people. Even with permissive legislation now in existence, we have been unsuccessful in our efforts to reduce cost.

2. Schedules—during week-days and Sundays long waits are necessary involving time and exposure especially dangerous to health in bad weather.

Many people are deprived of work and opportunity to worship in their own Churches because they have no way to get there.

3. Routings—involving two fares are an extra drain on the pocket book and limit older people to their own living areas or neighborhood.

4. Lack of safety in the loading and unloading zones is often reported. Many complain of the difficulty of getting on and off busses. The handicapped are virtually isolated because of this problem.

Paterson has much to offer in its shopping areas, parks, library, its agencies and institutions, but her older people who helped to build the city are now deprived of their use through forced immobility. It has been said that the United States is the only country in the world that consults its teen-agers on world affairs and tells its older people to go out and play.

Even if the older citizen accepted this admonition, he cannot afford the expense of getting to the playground.

TESTIMONY BEFORE THE SPECIAL COMMITTEE ON AGING ON "TRANSPORTATION ASPECTS OF THE ECONOMICS OF AGING", DECEMBER 6, 1969, PATERSON, N.J.

(By Gene Weltfish, Ph.D., professor of anthropology, director of the project)

As part of a project titled "The Study of Transportation as a Factor in the Lives of Low Income Individuals and Families" (State of New Jersey, Dept. of Community Affairs, Trenton: Grant, Title I, Higher Education Act of 1965, Public Law 89-329, Community Service and Continuing Education Programs, through the Office of Special Projects, Fairleigh Dickinson University):

Three statistical surveys were conducted in the city of Paterson and surrounding areas in the past year, two of them now being computer-processed, one covering 1600 households, the other about 1000 businesses in and around Paterson, obtained with a view to getting an insight into the transportation problem within the varying functional contexts. They were conducted by Professors Bishr and B'Racz, economists of Fairleigh Dickinson University who are here today to answer questions. People of all ages including the elderly appear in the study.

Our findings show that the transport system in the city of Paterson resembles that which prevails in a number of cities, developed prior to World War I; only some of these have been modernized:

(1) The bus lines originate in the outlying towns and come into the central city; they are owned by various private companies in those several towns.

(2) Their service orientation is transportation from town to city and back to the town of origin; they have very few stops in Paterson itself.

(3) Their franchises insure that no one of them takes the same route.

This means that any transfer from one line to the other involves paying another full fare and walking from one to the other, a process that is both costly and time-consuming.

For the elderly it certainly excludes any freedom of travel economically or physically. They are severely confined.

Suggested Remedy: Conditional on the development of a fully-coordinated transport system in Paterson, there is need for a *Senior Taxi System*, since reduced fares on the present bus system can hardly serve to take the people where they want to go. The elderly could be provided with a limited number of coupons for rides, possibly between certain hours. There is a Veteran's Taxi Service in Paterson that might be enlisted for this purpose. Possibly less sturdy machines than those in ordinary taxi service could be utilized.

As in most of this country, the majority of Senior Citizens of Paterson live throughout the community and this transportation is of great importance so that they can enjoy normal and complete lives; there are also 6 or 7 homes for the aged in Paterson which represents a concentration of people who could conveniently be served in these terms, supplemented by older but still usable school buses for group occasions.

I fully believe that with a modicum of mobility, the Senior Citizen will think of ingenious ways to help himself and others of the community to the lasting benefit of all of us. There is a lot of talent going to waste.

I want to thank you for the interest you have shown in this community and in this very vital issue and hope for a successful outcome.

RESULTS OF QUESTIONNAIRE

HON. JOHN E. MOSS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. MOSS. Mr. Speaker, late in September I sent questionnaires to my constituents to determine their views on the major issues pending before the Congress, 15,455 questionnaires were answered and returned to my office and have been tabulated by computer. The

questions and the percentages of responses follows:

THIRD CONGRESSIONAL DISTRICT QUESTIONNAIRE

1. Which one of the following do you believe should be the policy of the United States in Vietnam?

a. to reduce the level of fighting while the Paris peace negotiations are in progress—14.1.

b. to continue military operations at the present level regardless of developments in the Paris peace talk—7.1.

c. to immediately withdraw unilaterally all our troops from Vietnam—34.2.

d. to discontinue negotiations and step up military operations to attain a military victory—17.1.

e. to urge a coalition government in South Vietnam, based on U.N. supervision of national elections—27.5.

2. What policy should the United States adopt for assuring peace and stability in the Middle East?

a. A formal alliance with Israel that would assure our intervention in the event of an Arab attack—2.1.

b. Inclusion of Israel into NATO that would assure our intervention in the event of an Arab attack—4.8.

c. Press for a negotiated settlement through the United Nations—47.8.

d. Join with the Soviet Union to guarantee formally the terms of a peace settlement—10.1.

e. Closer ties to Arab nations notwithstanding objection of Israel—2.9.

f. Insistence on direct negotiations between Israel and the Arab nations—32.4.

3. Should the President obtain approval of Congress before United States troops are committed to fight in foreign countries? Yes, 86.9. No, 13.

4. Should our government build an anti-ballistic missile system? Yes, 47.1. No, 52.4.

5. Which of the following do you support?

a. Retaining the Electoral College system as it is—3.7.

b. Elect the President and Vice President by direct popular vote of the people—79.6.

c. Revising the Electoral College voting to reflect proportional strength actually won by a candidate in each state—16.7.

6. Do you favor lowering the voting age of Americans to 18 years in Federal elections? Yes, 47.6. No, 52.4.

7. Which one of the following proposals concerning the draft law do you prefer?

a. The present system, which defers full-time college students—7.9.

b. A random-chance lottery system, with no student deferments for men at the age of 19 years only—25.4.

c. A professional, all volunteer military—35.9.

d. Universal conscription for national service, e.g. Peace Corps, Domestic Services, as well as the Armed Services—22.9.

e. Deferments for post graduate college students in critically import fields—8.

8. What position would you favor regarding cigarette advertising?

a. Ending all cigarette advertising—48.

b. Permitting the cigarette industry to continue all forms of advertising without restriction—12.2.

c. Stipulating that a tobacco health warning must accompany all forms of cigarette advertising promotion—39.8.

9. Do you favor President Nixon's 1970 budget cut of 18 per cent in traffic and highway safety funds? Yes, 33.3. No, 66.7.

10. Would you favor Federal legislation to guarantee comprehensive warranty protection on consumer products? Yes, 85.3. No, 14.7.

11. Do you favor retaining the surtax on incomes? Yes, 21.7. No, 78.3.

12. If inflation continues, should Congress enact wage and price controls? Yes, 74. No, 26.

13. In light of the recent moon landing, would you favor:

a. Continued funding of our space program at its present level of $3.8 billion a year—28.

b. Reduce spending for space exploration and spend more for community development—65.9.

c. Increase allocations for space exploration—3.4.

d. Phase out the space program—2.7.

14. Do you favor:

a. increasing Federal aid to education—54.3.

b. reducing allocations of Federal aid to education—13.2.

c. maintaining Federal aid to education at its present level—32.5.

15. If you favor an increase in Federal aid to education, in which area should it be distributed?

a. elementary education—40.1.

b. secondary education—24.7.

c. college education—35.1.

16. Regarding foreign aid, would you prefer:

a. Reducing the foreign aid program—41.8.

b. Continue it at about the current level (1.7 billion—1969)—9.2.

c. Restrict foreign aid to non-military aid only—34.1.

d. Assisting only the developing nations—14.8.

17. Would you favor a program of Foreign investment guarantees in Latin America and other underdeveloped countries which would utilize the resources or recipient countries thus producing maximum benefits for minimum American dollars? Yes, 69.8. No, 30.2.

18. What should the Federal Government do about the increasing crime rate?

a. Increase anti-poverty community action expenditure—30.2.

b. Increase Federal assistance to local police, for higher salaries, improved training and better equipment—30.1.

c. Provide stiffer penalties for all crimes—31.4.

d. Establish a Federal police force—1.8.

e. Enact more stringent laws controlling firearms—6.5.

19. Do you feel that the Federal Government is doing enough to combat air and water pollution? Yes, 6.5. No, 93.5.

20. Would you favor the Federal Government enacting more stringent regulations with regard to air and water pollution? Yes, 94.5. No, 5.5.

21. Would you favor the Federal Government taking a more active role in assisting family planning? Yes, 61.6. No, 38.4.

22. If so, indicate your preference as to method:

a. Tax credits for smaller families—23.7.

b. Creation of family planning centers for the distribution of population-control information—56.1.

c. Nothing, Federal involvement would constitute an invasion of privacy—19.6.

INFORMATION ON THOSE RESPONDING

Sex: 68.7 percent male; 31.3 percent remale.

Age group: 1.2 percent under 21; 27.8 percent, 21–35; 34.1 percent, 36–50; 25 percent, 51–64; 11.9 percent, 65 and over.

Education level: 3.98 percent, grades 1–8; 22.1 percent, high school; 36 percent, some college; 37.8 percent, college graduate.

Family income bracket: 12.62 percent, under $5,000; 30.74 percent, $5,000 to $10,000; 34.20 percent, $10,000 to $15,000; 22.41 percent, over $15,000.

Voting preference in last election: 51.39 percent, Democratic; 40.99 percent, Republican; 1.74 percent, independent; .59 percent, American Independent Party; 5.26 percent, Peace and Freedom Party.

Did you vote in the last election: 92.68 percent, yes; 7.31 percent, no.

STUDENT GROUP GATHERS TO HELP, NOT PROTEST

HON. RICHARDSON PREYER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. PREYER of North Carolina. Mr. Speaker, we have had an example in my State recently of the most positive aspects of "youth power." At a time when the image of our young people often suffers because of the activities of a few individuals, it is particularly impressive to learn of projects such as this North Carolina student task force. I am particularly pleased with their approach to anticipating problems of student unrest in our high schools before they occur and I am proud that the leadership of this effort includes two students from the district I represent in Congress: Lyn Bundy of High Point, and DeWitt McCarley of Greensboro. The following press release and editorial tell about this most commendable program:

STUDENT GROUP GATHERS TO HELP, NOT PROTEST

RALEIGH.—High school students representing all sections of North Carolina gather in Raleigh November 24 to discuss student unrest with State Superintendent Craig Phillips and members of his staff. Their purpose, however, was not protest. They came to formulate plans to involve high school students in positive school activities that will help to eliminate unrest.

The students are members of the Task Force on Student Involvement, created last summer by State Superintendent Phillips. The group is composed of two representatives of each of the State's eight educational districts.

The Task Force serves as a liaison group with State education administrators and will meet monthly in Raleigh to discuss student problems, human relations, and involvement plans, said Miss Debbie Sweet, coordinator of youth activities for the State Department of Public Instruction. Members will also act as speakers to present student views to local groups, and each representatives will be responsible for organizing a smaller task force in his district, according to Miss Sweet. Walker Reagan, a student at Enloe High School in Raleigh, is student director of the group.

We must tap the creativity of students themselves to solve the problems of our schools, said State Superintendent Phillips. To date the group has been highly successful, and I have great confidence that it will continue to produce significant results, he said.

Members of the Task Force attending the meeting were Jennie Baird of South Mills, Camden County High School; Eric Vernon of Greenville, J. H. Rose High School; Lannie Merrick and Jeff Plummer of Wilmington, New Hanover High School; John Speller of Louisburg, Scotland High School; DeWitt McCarley of Greensboro, Grimsley High School; Lyn Bundy of High Point, Andrews High School; Suzanne Allen of Locust, Concord High School; Bertram Hogue of Charlotte, North Mecklenburg High School; Wilson Cherry of Salisbury, Boyden High School; Barton Suddereth of Hickory, Claremont Central High School; Danney Fisher of Candler, Enka High School; Anne Martin of Asheville, Asheville High School; Valerie May and Walker Reagan of Raleigh, Enloe High School.

[From the Raleigh (N.C.) News and Observer, Nov. 27, 1969]

WORTH LISTENING TO

Whoever had the idea of setting up a youth task force on student involvement and high school problems in North Carolina—and apparently it was State School Supt. Craig Phillips—can take a bow and should get applause from all Tar Heels while doing so. This group held its first meeting on Monday in Raleigh. It was enough to show the state that it can learn a lot by listening to the young people in its public schools.

The session was a marked contrast to the image of youth so prevalent today in America. The 15 students assembled to discuss ways of heading off high school unrest spoke realistically, creatively and responsibly. They were critical, but constructive about it. They singled out various wrongs about student organizations, but are determined to seek ways to right them. They displayed, overall, an impressive insight into various problems.

Only one example of that insight was the comment of a panel member that student government councils and committees are the province mostly of a minority of top students and cannot be really effective at self-government until they are made to "include the ones who don't get along with the principal, too—not just the ones who are always up in the principal's office." It may be that these students have a better awareness than many in their parents' political parties about the importance of rank-and-file participation.

This task force has a bundle of projects in mind, including studies of student councils and election processes with an eye toward making student government more accurately represent student bodies. It also will ponder the feasibility of holding community meetings where students, parents and businessmen could get to know each other better. One wishes the student group well in all these efforts. Phillips commented Monday that his department puts "a great deal of faith" in what the task force can accomplish. If Monday's meeting is an accurate indication, the faith is very well placed.

AFDC IN CALIFORNIA—FACT AND FICTION

HON. JEROME R. WALDIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. WALDIE. Mr. Speaker, there is a profound need in my own home State of California for long-overdue changes in the aid for families with dependent children—AFDC—program. Perhaps out of deference to taxpayers already heavily burdened with tax obligations, California has not provided the AFDC program with badly needed increased benefits.

A recent study by the California Assembly Committee on Health and Welfare revealed that malnutrition among children in California is reaching alarming proportions. The committee also concluded from testimony before it that malnutrition among children from infancy to age 3 is a casual factor in mental retardation.

A constituent of mine, Mr. Donald H. Fibush, of Walnut Creek, Calif., was sufficiently moved by the above information that he prepared a fact sheet on AFDC in California.

I believe that it is in the interest of the Members of the Congress that I insert this fact sheet into the RECORD.

FACT SHEET CONCERNING AFDC

Today almost 800,000 children in California receive AFDC (Aid for Families with Dependent Children). This is over 11% of all children in the state. Of these, approximately half or 400,000 are in families which have no other income than AFDC.

The present amount of money provided for these 400,000 children is the amount which was determined to meet minimal needs in 1957. The only increase since then is $3 per month which was provided by the Federal government. In the 13 year period since 1957 minimal need costs have increased more than 26%.

ERRONEOUS CONCEPTIONS CONCERNING AFDC

1. That most of the caseload involves parents who are unemployed and don't want to work.

Correct information: The number of AFDC families involving unemployed parents (AFDC–U) varies from 20,000 to 30,000 maximum (the fluctuation is due to seasonal employment). Thus, this represents a very small percentage of the children mentioned above. Also, less than half of those referred to the California State Employment Service for enrollment in the WIN program have been enrolled by CSES and less than a fifth have been placed in employment.

2. That parents would rather remain on AFDC than work.

Correct information: The maximum AFDC payment for 1 adult and 1 child is $148 per month; 1 adult and 2 children, $172; and 1 adult and 3 children, $221. These amounts are supposed to provide food, clothing, shelter and all the necessities of life, even the $1 per month which is allowed for a child to take public transportation to school. The result is that children go hungry and without proper clothing or safe, healthful housing. This increases school drop-outs and delinquency, as well as many health problems. In contrast, individual adults receive the following per month: Blind, $200; Aged, $194; Disabled, $165.

3. That women are having many children out of wedlock in order to receive more AFDC money.

Correct information: The average number of children for AFDC families in California is almost exactly the same as that for all families in the state. The additional amount allowed for each successive child per month after the first is $24, $49, $42, $37, $30, $25, $18, $13, $6.

4. The AFDC families are perpetrating frauds by misrepresenting their assets and income.

Correct information: Every survey that has been made has indicated that this constitutes a small number. No one knows how much fraud there is. In any event, we pride ourselves as Americans in helping others in need and we should not force hundreds of thousands of children in California to go hungry because of the acts of the adults who are the parents of some of them.

5. That most AFDC recipients are negro.

Correct information: Two out of three are white.

Hundreds of thousands of children are going hungry because of these misconceptions!

ADDITIONAL INFORMATION WHICH MIGHT BE HELPFUL IN DISCUSSING AFDC

What we are really trying to say in the attached material is that we should establish some *real* priorities in our demands upon the state treasury and that the top priority should be to see that children are not hungry and without proper clothing and decent, healthful shelter. This is more important than education, mental retardation, mental health, physical health, etc.—hungry kids have health problems, mental problems, learning problems, and social problems in all areas. This cannot wait for the Federal Government and the State government to try to change our entire welfare program even though everyone agrees that has to be done too!

ADDITIONAL FACTS NOT COVERED IN THE ATTACHED MATERIAL

The property taxes in the counties for all welfare (general assistance, adult, blind, aged & disabled, and AFDC) represent only about 5% of the total real property taxes. They represented 10.6% of the state general fund budget in 1968. AFDC represented 4.0% of the latter.

Approximately 30% of all the people in our penal institutions are former AFDC children.

Low cost public housing (subsidized) is exceedingly small in relation to the need and demand. For example, in Contra Costa County there are 2700 families on the waiting list and the waiting list is increasing at the rate of 150 per month.

The WIN job training and placement program which is comparatively new and is operated by the California State Employment Service by Federal mandate and to which all eligible AFDC recipients are referred by the Welfare Departments of the Counties is ridiculously underfinanced for the job it is intended to perform. The result is that a small percentage of those referred are in training and a much smaller percentage have been placed in jobs. For example, in Contra Costa County for the first year of the program which just ended 3,000 referrals have been made of which only 491 have been placed in training and of these only 131 have been employed.

The failure of the state since 1957 to increase the amount of AFDC payments in which they will participate with the counties (which yields 1½ Federal dollars for each state dollar) has resulted in counties having to provide many additional "special need" dollars with the attendant *increase in property taxes* in the counties. For example, in Contra Costa County this has more than doubled from approximately $236,000 to approximately $573,000 in the past two years. The $236,000 would have yielded an additional $1,180,000 state and federal money if the state had participated.

WHEN IS INFLATION NOT INFLATION

HON. CARL ALBERT

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. ALBERT. Mr. Speaker, it is clear that the economic policies of the administration are of increasing concern, not only to Members of Congress, but to people throughout the country. In that regard, I would like to call the attention of my colleagues to an article which appeared recently in the December 1, 1969, issue of Floor Covering Weekly. The article, by Mr. Larston D. Farrar, entitled "When Is Inflation Not Inflation?—When the Nixon Cabinet Interprets It to the Nation," follows:

WHEN IS INFLATION NOT INFLATION?—WHEN THE NIXON CABINET INTERPRETS IT TO THE NATION

(By Larston D. Farrar)

Obviously, we are entering a strange, new period in U.S. life, and particularly in the economic field, when the administration is acting on the belief, expressed in *Reflections Of A Bachelor*, that "the only time most people can save money by not spending it is when they haven't got any."

It also is a time when members of the Nixon cabinet are going around the country predicting a "gradual cessation" of "inflation" meaning higher prices) because there are going to be more higher prices!

Incredible? Not a bit of it. Here are excerpts that Maurice H. Stans, Secretary of

Commerce, gave on Oct. 29, 1969, before the 1970 Business Outlook Conference of the Los Angeles Area Chamber of Commerce. If he is not saying that "inflation" is being stopped by higher prices, then you can call us a monkey's uncle and even put a rope around our neck, start grinding an organ and watch us jump for peanuts and coins that the people may throw on the sidewalk.

Mr. Stans started his speech by pointing out that the total increase in prices this year (1969) would be about 5%. Parenthetically, some economic authorities say 6%, but we will leave Mr. Stans' assertion alone.

Then he stated that the Nixon Administration's "program of fiscal and monetary restraint has forestalled the boom conditions that would have made an economic bust inevitable."

And then he declared:

"Our forecast suggests that the real rate of growth in the economy will continue at a slow pace into 1970, followed by a modest pickup in the growth rate in the last half of the year.

"For 1970 as a whole, Gross National Product is expected to reach about $980 billion, a gain of 5%, most of which will be the result of price increases. This 1970 gain would be less than now expected for 1969, when GNP will probably advance by about 7.8% to $933 billion, with slightly less than 3% in real output.

"Private forecasts of capital spending in 1970 indicate an advance in the range of 5 to 9%. Taking into account probable higher prices (another forecast of continued inflation, in different words!) . . . these estimates suggest little rise from 1969 in real terms."

There you have it clearly. There is a claim that the program of fiscal and monetary restraint has forestalled inflation, and, in the same breath, a forecast that inflation (higher prices) will continue all next year.

"With the moderation in overall economic growth, personal income is expected to grow more slowly," Mr. Stans continued. "In turn, this is likely to lead to a slowdown in consumer spending at retail stores . . . But expenditures for services should continue to increase in line with the recent trend (which, of course, has been toward higher and higher service fees for little or no comparable service, which is inflation in a different way)."

In short, even here, Mr. Stans both is predicting a slowdown in business and a rise in inflation (higher prices) in 1970, whereas the Government's "war," if there really is one, is supposed to be on price rises, and not an economic activity, as such.

As Mr. Stans knows, labor unions this year have been averaging about 6% in increased benefits through collective bargaining, threatening to strike, or actually striking. He thinks it is terribly crass of labor unions members to win as much in pay increases as they have been losing through inflation (higher prices), and so he suggested to the businessmen that they should take a harder line against labor unions in 1970.

"With the economy growing at a slower rate in early 1970, it is necessary that collective bargaining be conducted on a more realistic basis, and that wage increases not be as large as in 1969."

This is the Nixon Administration line to businessmen. If you want to hold your profit margins, don't revolt against the banker's 10% on money you must borrow, or against the higher machinery or supplier costs, but take a firm stand against your labor and, if necessary, undergo a strike, which may cost you more, not only in money and lost production, but also in worker goodwill and even customers (who will be shopping elsewhere while you are on a strike).

Such a "program" as this one—which apparently was built by the same men who made up the administration's war on crime, which has achieved nothing—in the economic field can be termed with only one word: *chaotic*.

The labor unions have proved through long years that they are invincible when they get to the strike weapon. Well-organized unions, beyond doubt, *can* impose their will on employers, or shut the company down tightly, or make life so miserable for the company there can be no denying the laborer whatever he reasonably demands.

At a time when prices already are going higher—due to all the "normal" costs going up, from the wages of money to the rents paid to landlords—the White House apparently wants to see more and more millions of workers engaged in strikes. These workers not only will suffer, in terms of less income (while the strikes are in progress), so will the merchants in the strike-hit communities.

And, as has been proved even by the General Electric strike, while one company is being hit by labor difficulties, another takes advantage of it (Westinghouse) by announcing price increases on all its products that compete with GE appliances, radios, TV sets, etc., in the marketplace. The consumer will pay, and pay dearly, for the Nixon Administration policy, if it is pursued, and if it is followed by many big business units.

The Secretary of Commerce was correct in telling the businessmen—all except the bankers among them—that they face a bleak profit picture in 1970. The bankers, of course, are expecting more profits in 1970 than they made this year, for bank profits have risen every year since 1952, when the last President who had any inclination whatever to joust with them was in the White House.

Total interest income has gone up from $11.7 billion a year in 1952 to close to $60 billion this year, or a hike of more than five times in 17 years. If labor income had gone up comparably during the same period, the minimum wage would be $5 an hour, instead of $1.60 an hour.

In other words, if a TV repairman who charged you $15 to tinker with your set in 1962 had raised his prices as fast as the bankers have raised the price of money, he would now blithely charge $75 anywhere in the United States for a single visit to your home to repair the set, plus parts.

This reporter has lived a long time (54 years) and has read many fanciful speeches made by "responsible" men, but he honestly never dreamed he would see such a speech as this one by a Secretary of Commerce, both boasting about "cooling off" the economy and lessening inflation (price hikes) while blithely predicting just as much of a price increase for an upcoming year as the nation already is experiencing. This is having your cake, eating it, and then acting as if it is still on the table. This time next year, Mr. Stans, if he can get away with this, still will be fighting a mythical "war" against inflation, and if there are people who believe this one, then there likely will be many who will believe that he is still in there fighting a year from now.

FLOOD CONTROL—VITAL TO LOS ANGELES COUNTY

HON. CHARLES E. WIGGINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. WIGGINS. Mr. Speaker, few areas of this Nation are secure from the ravages of periodic flooding. Fortunately, most areas susceptible to flooding lie in broad rural river basins where the potential for loss of life is minimized.

The unique topography of the southern California basin, coupled with its dense urban and suburban population, makes it especially vulnerable to "killer" floods. Few people are more familiar with the critical nature of this problem, or have been more intimately involved in its control, than the longtime supervisor for Los Angeles County, Frank G. Bonelli.

Since the control of flood waters in the southern California area is a cooperative effort between the U.S. Army Corps of Engineers and the local flood control district, the succinct account of this partnership effort, written by Supervisor Bonelli, which appeared in Los Angeles area papers, may be of interest to all Members.

Supervisor Bonelli's article follows:

FLOOD CONTROL—VITAL TO LOS ANGELES COUNTY

(By Frank G. Bonelli)

PART I

Floods—and the threat of floods—are nothing new to Los Angeles County. They go back to the days of the early Mission padres and probably well before that. Early settlers in the basin lived in constant fear of heavy winter rains and the resultant damage to ther crops and homes as well as the threat to their lives. It wasn't unusual for citizens to get into row boats rather than hitching up their teams when visiting friends or family in other parts of the County in the early days.

Two primary factors are responsible for creating a situation which prompted one observer to describe the Los Angeles Basin as "one of the most flood prone areas for its size and density of population in the entire country." A shallow plain some 25 miles in depth from the ocean is encircled by the San Gabriel Mountains which rise rapidly to heights of ten thousand feet. From October to April, intense storms frequently arrive from the Pacific depositing heavy amounts of precipitation along the mountain range. Runoff attains a high velocity and poses a recurring threat to life and property.

These two factors—geography and uncertain weather patterns—have produced damaging floods which have been recorded since 1815 and, in a period of less than 100 years, have altered the courses of the Los Angeles and San Gabriel Rivers many times. Since 1862, over 20 storms have produced major floods in the County.

In the predominantly agricultural setting characteristic of the area until 1889, floods were frequent but did not cause appreciable property damage or casualties. However, between 1889 and 1914 there was a significant population migration into the Los Angeles Basin. Many of the new settlers were unaware of the latent flood potential and were unprepared for a flood in 1914 which caused property losses of over $10 million, isolated thousands of citizens, and took many lives.

This disaster crystallized the need for a comprehensive, basin-wide flood control program and mobilized public opinion in its support. It was also apparent that any such undertaking should be closely correlated with the conservation of flood waters.

An act of the California State Legislature established the Los Angeles County Flood Control District on June 12, 1915. Its boundaries include all of the County except part of the Antelope Valley and the islands off the coast, comprising approximately 2,700 square miles.

This legislation vested direction of the District's programs in the Los Angeles County Board of Supervisors who sit in an "ex-officio" capacity as the agency's governing board.

Initial efforts of District engineers involved collection and interpretation of data needed for preparation of an overall master plan. Early bond issues helped finance construction of major flood control and water con-

servation reservoirs built by the District as well as a portion of the channel improvements.

A comprehensive plan for flood control and water conservation was officially adopted by the Board of Supervisors in 1931. It has been used by the District and U.S. Army Corps of Engineers in developing the Federal government's participation in the local program.

Engineers have used a variety of techniques in implementing the plan. Flood control reservoirs have the primary job of absorbing flood peaks, retaining debris carried by flood waters, and controlling the release of relatively silt-free waters through channels to their outlets. The District has constructed 14 dams in the major watersheds of the County as the front line in the flood fight.

The steep slopes of the San Gabriel Mountains frequently trigger the rapid movement of large amounts of gravel, boulders and other debris during intense storms. This problem is all too often compounded by late season watershed fires which lead to the age-old "fire-flood" sequence.

To meet this problem, the District has constructed over 60 debris basins near the months of some of the smaller canyons. Their function is to retain debris and allow waters to be released in downstream channels. Removal costs are considerable but far less than the damage which might result if the materials were allowed to flow uncontrolled downstream.

Reaching out below the District's dams are miles of channel which must transport water released from reservoirs and debris basins as well as runoff from lowland areas. Over 400 miles of channels have been constructed to harness flood waters and assure their orderly flow to the District's water spreading grounds or the ocean.

As the comprehensive plan has moved from the drawing board to the completion stage, greater protection is afforded the citizens of the County. It forms the backbone of a system designed to prevent "killer" floods from threatening the lives and properties of seven million County citizens.

PART II

The long battle to control flooding in Los Angeles County has enlisted all levels of government. Development of a comprehensive plan by the County Flood Control District back in 1931 was the catalyst that brought local, State and Federal agencies into the fray.

Congress, in 1936, enacted legislation authorizing Federal participation in various flood control projects throughout the nation, including Los Angeles County. Prosecution of the program was assigned to the U.S. Army Corps of Engineers and the Flood Control District was designated as the responsible local agency to cooperate with the Federal government in carrying out this assignment locally.

District participation includes providing rights of way and bridge relocation or reconstruction costs as well as operating and maintaining the facilities upon completion. Under terms of the State Water Resources Act of 1945, the District is eligible for reimbursement of funds expended on the Federal flood control program.

The Corps of Engineers has constructed permanent channel improvements on the Los Angeles River, San Gabriel River, Ballona Creek, Pacoima Wash., Rio Hondo, Compton Creek, and on many of their tributaries. Besides constructing its own phase of the program. The Flood Control District operates and maintains the Federal channels upon completion.

In addition to channel work, the Corps has built five major flood regulating reservoirs which, by Congressional action, it also operates and maintains.

Significant contributions to flood control in the County have also been made by the U.S. Department of Agriculture. Joint erosion control projects consisting generally of temporary or permanent channel improvements have been developed by the Soil Conservation Service and the Flood Control District.

Close collaboration between the District and the U.S. Forest Service has fostered the development of watershed stabilization programs along the San Gabriel Mountains. These involve upstream check dams which are engineered by the District and built by the Forest Service. This program is particularly significant because of the rising cost of flood protection in the County.

Up to this point in our discussion of flood control in Los Angeles County, we have concentrated upon the development of a comprehensive system with the essential task of reducing the threat of catastrophic floods endangering lives and property. Since World War II, the explosive growth of Los Angeles County emphasized local drainage and street runoff problems characteristic of intense residential and commercial development.

Rapid urbanization accentuated the urgent need for correcting ponding at intersections and in low-lying areas during heavy storms.

It was obvious in the early 1950's that a program of storm drain construction to carry surface waters from local areas to improved channels was sorely needed but imposed too heavy a financial burden on individual municipalities. On the recommendation of this League of California Cities and the Flood Control District, the Board of Supervisors authorized presentation to the voters of a $179 million storm drain bond issue at the November, 1952, general election.

The program called for design of the individual projects to be performed by the cities where they were to be located and by the County Engineer for unincorporated areas. Flood Control District engineers review plans, prepare specifications and administer contracts under competitive bid procedures. The District also operates and maintains the facilities upon completion.

Approval of the 1952 bond issue and subsequent programs of $225 million in 1958 and $275 million in 1964 have gone a long way in meeting the critical need for local drainage in burgeoning Los Angeles County. All of the problems have not yet been solved and additional programs will have to be undertaken in the future to assure the safety and health of all our citizens.

PART III

Fortunately for latter-day citizens of Los Angeles County, the men and women who worked to put together the legislation which created the Los Angeles County Flood Control District in 1915 were extremely farsighted. They recognized the area would continually be plagued by a water problem and the District Act directs the agency to conserve as well as control the flood waters falling in the basin.

In carrying out this responsibility, the District in the early 1930's began constructing a series of spreading grounds adjacent to streams and channels.

The mountain topography of Los Angeles County makes it possible to furnish only limited storage for water in surface reservoirs. However, porous deposits of sands and gravels permit the percolation of surface waters into large underground basins for later pumping and use.

Spreading grounds consist of a series of shallow, levied areas composed of materials which allow percolation into subsurface basins.

The need to save as much water as possible is graphically illustrated by the fact that although we import water from the Colorado and Owens Rivers, the County still depends upon its underground resources for about 40% of its daily needs.

Seawater encroachment into fresh water underground basins adjacent to the coastline in Southern California has become critical in recent years. This occurs whenever the water table is drawn below sea level and a path exists between the sea and the groundwater reservoir. To meet this threat, the Flood Control District has developed three "barrier" projects to protect vulnerable regions.

A series of "recharge" wells are situated near the coast and are used to create a "mound" or barrier of fresh water to block further sea contamination. One project is located along the west coastline of the County from near International Airport to the Palos Verdes Hills, another is in the Alamitos-Seal Beach area in east Long Beach, and a third is situated in the Dominguez Gap region of Wilmington.

To further augment water for its reservoirs and spreading operations, the Flood Control District, in cooperation with a private consulting firm, has engaged in a cloud seeding program for several years. Although it is generally agreed that no way has yet been found to make it rain, this program is designed to coax additional moisture from certain types of storms as they pass over the area.

The extra precipitation falls in an area controlled by District reservoirs, adds to the runoff into those structures and is eventually transported downstream for spreading as a conservation device.

In summing up this series on the flood control program in Los Angeles County, I would be remiss if I didn't mention the storm operations activities of the District.

Certain staff members of the agency are given specific duties relating to the protection of life and property and when rain begins falling over the Los Angeles Basin, these personnel are on the job, both in the field and office, assuring that the complex flood control and water conservation system operates to its maximum efficiency. This operation continues on an around the clock basis throughout the storm and for a number of days thereafter.

Looking back over the years that the flood control program has been developing in Los Angeles County, it is obvious that we are the beneficiaries of a long line of devoted citizens and public servants who came to grips with the problem and charted a course for its solution.

Last January and February, the Los Angeles Basin was subjected to a series of intensive storms. Except for areas such as Glendora and Azusa which were hard hit because of massive watershed fires late last summer and communities still needing additional protection, region came through the prolonged inundation with relatively little damage. Experts at the Corps of Engineers estimated that existing flood control works prevented $1.5 billion in property damages alone—and there is no way of telling how many lives were saved.

Which amply underscores the title of this series—flood control *is* vital to Los Angeles County.

THE IMPACT OF CUBAN REFUGEES ON THE ECONOMY OF SOUTH FLORIDA

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. PEPPER. Mr. Speaker, one of the outstanding representatives of the Cuban refugee community in my congressional district in Miami is my close personal friend, Dr. Bernardo Benes, vice presi-

dent of the Washington Federal Savings & Loan Association of Miami Beach. Dr. Benes is a distinguished graduate of the University of Havana where he obtained his education as an attorney and as an accountant, was a partner of one of the most distinguished Cuban jurists before becoming legal consultant to the Cuban Treasury Department. He is the author of two books including one on capital corporations which won him first prize in the competition sponsored by the Cuban Bar Association. He fled Castro's Communist terror in Cuba in late 1960 and began as a $65-a-week employee of Washington Federal Savings & Loan. He has now advanced to the position of vice president in charge of all branch operations, savings operations, accounting, security, and all mortgage activity for Latin American customers. His success story in the United States has been featured in Fortune magazine as well as in other publications but he considers his U.S. citizenship, obtained August 20, 1969, one of his greatest achievements. Dr. Benes recently spoke to the Economic Society of South Florida on the impact of Cuban refugees on the economy of south Florida. I would like for my colleagues to have the benefit of Dr. Benes' remarks and I am inserting them in the RECORD at this point:

[Speech to be delivered before the Economic Society of South Florida, Inc. on "The Impact of the Cuban Refugees on the Economy of South Florida" in Miami, Florida. September 17, 1969]

BY: DR. BERNARDO BENES, VICE PRESIDENT—WASHINGTON FEDERAL SAVINGS AND LOAN ASSOCIATION OF MIAMI BEACH, FLORIDA

I have been present at many talks such as this and I have noticed that one of the ways in which a guest speaker would start his talk is by making one or two jokes; however, with your leave, I am not going to follow this custom which seems to be proverbial in the United States, but I will begin with an idea which I consider very serious and which, unfortunately, is lost in the struggle of everyday life.

I wonder how many of those here present have thought of the similarities between Berlin, in the old continent, and South Florida, in this continent. The Wall of Berlin, an artificial barrier created by man, divides Berlin in two. On one side East Berlin, which has gone backwards, has declined under a communist regime. On the other side, West Berlin, which has set an example of what a group of men receiving foreign support were able to do for the economic, political and social recovery of a nation.

As you may all know, this caused late President John F. Kennedy to make, a few months before his assassination, one of the finest speeches the World has heard, when he invited those who thought that a totalitarian and materialistic regime could do more for its citizens than a group of men living under a democratic regime to come to Berlin.

The Straits of Florida, created by nature, separate our beloved Cuba from this progressive and beautiful area of Florida.

In Cuba, for the last decade, a dictatorial and materialistic regime has made its people suffer miseries and tragedies beyond human understanding. . . . On this side, 225,000 Cubans have reorganized their lives, both economically and socially, and today they can give you and the World an example of what most qualified independent sources have considered to have been a great contribution to South Florida and to the country . . . achieved through liberty, love and dedication.

The same analogy exists when comparing the motivation of the Germans in East Berlin and the Cubans who live in Cuba, when the former, risking their lives, jump over the Wall of Berlin where many fall dead from the bullets of the guards, and the latter who, in the most unbelievable and rudimentary rafts, try to cross the Straits of Florida, only to die, in many instances, from the bullets of the communist patrols, or are drowned at sea; however, some of them, Germans and Cubans eventually reach their ultimate objective: to live in freedom. . . .

The words of President Kennedy may be repeated . . . with the proper geographical change.

It would be immodest on my part to try to impress you with numbers and statistics which may tire you this afternoon, but I do want to make it known clearly and emphatically that nothing of what we have been able to do in this area would have been achieved without the great sense of humanity, support and comprehension of the majority, not to say all, of the community of South Florida.

We are not too many; we are not too few. We are not all wealthy. Many of us are really poor. But few or many, rich or poor, all of us freely acknowledge the debt we owe to not just America but to the people of America. It is a debt we have begun to repay with our hearts, with our minds and with our labor.

In order to analyze the contribution made by Cuban refugees to the economy of Miami we have to explain that, unlike the majority of other groups of immigrants who have contributed to the formation of this great country, Cubans have come to the United States, and to this area, for political reasons, and, therefore, we have been political exiles. As years have gone by, Cubans have been assimilated by the community and have gradually changed their initial status of political exiles for that of immigrants.

Regardless of the fact that independent sources establish a number of between 2,500 and 6,000 Cuban businesses in Dade County, we consider that the major contribution which we have offered the U.S., and the Miami area specifically, has been the human resources which we have supplied. We find, for example, Cuban doctors practicing in Miami who may very well be compared, as far as their qualifications are concerned, with their American counterparts. To mention only one example, Dr. Manuel Viamonte, a Cuban doctor, less than 40 years of age, is the Chairman of the X-ray department of the University of Miami, Jackson Memorial Hospital and Mt. Sinai Hospital, and is considered one of the most prominent men in the field of radiology.

Another example is the student Rafael Peñalver, who was designated by the "Outstanding American Foundation" as the most outstanding youth in the U.S. How much these human resources have contributed to the economic development of South Florida I leave to your judgment.

I will now like to refer to some of the specific areas to which Cuban refugees have greatly contributed.

1) The opening in this area, especially in the Coral Gables area, of offices of national companies doing business in Latin America is directly due, in addition to the geographical factor, to the existence of bilingual technical and secretarial personnel, which these companies need and are presently hiring.

2) Latin American tourists today come to Miami in greater numbers since the language barrier, which would be a handicap in other cities, does not exist in Miami. It is this fact, and not only its geographical position, which makes the city of Miami the true "gateway" for Latin America.

3) I shall not go deeply into the facts governing the hotel business in Miami and Miami Beach, but I want to mention only that more than 50% of all personnel in hotels are of Cuban extraction.

4) The extraordinary growth experienced by the garment industry, which according to information published by the New York Times, now ranks as second or third in importance in the United States. The same growth applies to the boat manufacturing industry.

5) The import and export business, not only as regards Latin America, but also with the Far East and Europe, has made of this area a great electronic center as well as an important shoe distribution area.

6) In the building industry, the contribution of Cuban manual workers as well as contractors has been outstanding. We can assure you that foremen who arrived from Cuba only a few years ago are now small contractors and some of them may even show a net worth of more than a quarter million dollars.

7) I won't elaborate on the special sense of identity of Latin culture which our coming has given to the city of Miami, but I do invite you to visit a "mini-gallery of oil paintings which is located on 8th Street between 22 and 23 Avenues, occupying a space 46 inches wide, listen carefully: 46 inches wide by 19 feet deep, where Cuban artists sell their paintings to North Americans and Cubans alike. Any time you pass by this place you may see what I have just explained.

Another example of what our coming has given to this area is in the Restaurant business. In the Supper Club "Les Violines", where clients from cities as far away as London, Los Angeles and New York make their reservations well in advance, you may spend an evening as if you were in one of the major capital cities of the World. There are truly approximately 10 Restaurants with this cosmopolitan flavor in the area.

8) Going back to our 8th Street, I wish to tell you that the United Fund has on record a list of 386 retail businesses existing on this NEW avenue, and I say "new" comparing it to what it was at the beginning of this decade.

9) In the financial field, most local Banks, Insurance Companies and Stock Brokers are always on the lookout for Cuban personnel at managerial level. We have two Cubans who are Presidents of local banks.

We could go on and on mentioning examples such as these, but it is not my intention to tire you with them. Today the income of the Cuban population is over $350 million a year, which is higher than the income of all residents of at least 10 Capital cities in Latin America.

I remember my very dear friend Marshall Wise, then Director of the Cuban Refugee Program, and an outstanding civic and community leader, when he said in October 1966: "The criers of doom of the community in 1962 said that the influx of Cubans to this area would:

"take away jobs from needy Americans,
increase the crime rate,
affect South Florida tourist industry,
create slums and depress the real estate market,
affect our school system and slow up the education of our own children".

History, and the records of different public and private entities prove that it was not true then and is not true now . . . and I add: if it was not true in 1962 and in 1966 when Marshall Wise said it, it is even less of a fact today in 1969.

What the future will be, only God knows. . . . In the meantime, we can only see the projections of the Dade County Planning Department on population increase in Dade

County. By the year 1980 the population of Miami will have increased by 450,000 from today's population, or 40,000 a year. If this is true, Dade County will be the first county in the history of this country, at least in the last century, where the majority of the population increase will be represented by foreigners: CUBANS.

The best proof of the impact of the Cubans on this community is the number of politicians who are actively seeking the support of the Cubans in this community. Five years ago we hardly knew the name of the politicians in this county. Today, some of them are so popular with us that sometimes we feel that we have known them all our lives, and we still believe that politicians have a 6th sense. They cannot be wrong.

There is no admission charge to enter into the United States. No one has ever had to buy his way in. And no one has ever really been asked to make any kind of repayment for being allowed to come in. And this has gone on for three and a half centuries since 1619.

But in those 350 years, everyone who has come—all of the refugees from all of the places—has made some significant contribution to forming the kind of country in which all of us are privileged to live today.

This is the real repayment—and it is the only one that means anything at all. If you will look around you at just this one community, I think that you will see your Cuban neighbors are making this kind of repayment—to Miami, to Florida and to America.

And I, as an individual, will continue to do everything within my power to work for the betterment of this community, America, and of all mankind.

INDIANA GIVES VOLUNTEERISM A BOOST

HON. EARL F. LANDGREBE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. LANDGREBE. Mr. Speaker, the failures of the Federal Government in trying to solve all the Nation's ills, large and small, have been often noted. But realistically, we must also realize that if big government is not the answer to everything, we must look for the solution elsewhere.

In my home State of Indiana, we have found a way. Many people have given mere lipservice to the late John F. Kennedy's words, "Ask not what your country can do for you, but ask what you can do for your country." In Indiana, we have believed in this principle long before they were spoken by Mr. Kennedy.

A column in last night's Washington Star written by Chicago Sun-Times Reporter Charles Bartlett provides two excellent examples that have been highly successful in Indianapolis, the examples of two responsible ladies, Mrs. Margaret Moore and Mrs. Mattie Coney. I would only add that the spirit of self-help prevails throughout the State, not merely in our State capital. This spirit is exemplified by our Governor, Edgar D. Whitcomb, whose creative approach to solving the State's problems without bankrupting the State's taxpayers has been an example we would do well to follow in Washington.

Mr. Speaker, I submit for inclusion at this point in the RECORD the column of Mr. Bartlett:

[From the Washington Evening Star, Dec. 16, 1969]

INDIANA GIVES VOLUNTEERISM A BOOST

(By Charles Bartlett)

INDIANAPOLIS.—When President Nixon finally begins his campaign to inspire languid Americans to become volunteers, he can draw heavily on this city where the spirit of self-help is running strong.

In fact the pace of volunteerism among the Hoosiers is so lively that Nixon's efforts to date appear languid by comparison. While the Nixon campaign has been grounded in disagreements on how to stimulate private citizens to tackle public problems, various people here have taken on some tasks with impressive results.

Indiana's new governor, Edgar Whitcomb, is making the most of this Hoosier spirit to get done some of the things which need to be done without running up the budget. For example, he is asking 60 Indiana corporations to assign socially minded junior executives to work for a year at setting up day care centers in counties where they are needed.

Whitcomb, an innovative Republican who wants to keep his credentials as a fiscal conservative, is leaning so hard on volunteers that the success or failure of his administration is likely to depend on their response. His initial experience has been auspicious.

A group of private companies was persuaded last spring to find a large number of summer jobs for college students. Another businessman's committee has come up, at Whitcomb's request, with 632 recommendations for cutting the cost of state government.

The volunteer spirit is flowering at this conservative crossroads because the Hoosiers are increasingly disposed to believe they can more effectively do for themselves many things for which they have relied in the past upon bureaucrats. Their self-confidence stems in part from the recent achievements of two unusual women.

Mrs. Margaret Moore, a 59-year-old newspaperwoman with deepset eyes and a strong chin, has transformed feminine indignation against crime into a crusade that has enlisted an army of local women in a gamut of activities directed at the root causes. The ladies have executed some original initiatives so effectively that they have won the enthusiasm of police officials who were once wary of their intrusion.

Since 52 percent of the juveniles who commit crimes are school dropouts, the ladies seek out youngsters who leave school and try to persuade them to go back. They claim to have succeeded with 2,000. Since the courts are part of the problem, two ladies sit in every court every day. "It's amazing," says a police officer, "how much the atmosphere is changed by the presence of those little ladies with white gloves and beaded hats."

The ladies have invaded every area where they might have a constructive impact, even to the extent of staging receptions for each graduating class of police recruits. "Battling crime is women's work," says Mrs. Moore, "because we have the time. We have had no trouble getting the volunteers we need."

One offshoot of the crusade against crime is the success of a forceful Negro, Mrs. Mattie M. Coney, at forming over 1,000 block clubs to struggle against the deterioration of character and environment in poor neighborhoods. "If you learn to live where you are," says Mrs. Coney in her evangelizing way, "you'll know how to live when you move."

Mrs. Coney is frankly engaged in persuading poor blacks to shoulder their own problems and correct their own habits instead of putting the blame on the whites. She is organizing them to cooperate with the establishment for their own advancement, and she claims the mood is running with her.

The experiences of both ladies have obvious applications in other cities and they are both in heavy demand for speeches. In fact, Mrs. Moore described her work at a 1968 luncheon for "doers" that Mrs. Lyndon Johnson gave in the White House, but Eartha Kitt stole the headlines with an outcry against the war.

The test of Nixon's leadership in volunteerism will be his ability to transform achievements like these into national stimuli. The evidence here is that the people are ready to be rallied into joining constructive initiatives. The President can light the torch and show the way.

THE ATTORNEY GENERAL'S PHILOSOPHY OF LAW ENFORCEMENT

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. MIKVA. Mr. Speaker, the December issue of Judicature, the Journal of the American Judicature Society, contains an article based on the remarks of Attorney General John N. Mitchell to the American Bar Association's annual dinner meeting on August 13, 1969. The article is quite revealing about Mr. Mitchell's philosophy of law enforcement.

Mr. Mitchell claims to be simply following a middle-of-the-road policy; playing the "reasonable man" in adjusting the competing claims of law enforcement efficiency and civil liberties. He says:

> The mark of the "reasonable man" is to balance the interests; to strike a bargain between the perfect and the possible; to adhere to a moral ideal where that adherence is compelling. But, in general, to negotiate a practical middle-of-the-road solution.

This philosophy raises the interesting question of what the compromise is between a moral course of action and one which is immoral—perhaps a course which is only a little immoral.

More specifically, Mr. Mitchell elaborates his philosophy of wiretapping and preventive detention. He talks first of wiretapping against organized crime—which of course avoids the problems raised by the sweeping wiretapping authorizations in the 1968 Omnibus Crime Act. That act authorizes wiretapping if it "may" lead to information on such notorious organized crime activity as "interstate transportation of stolen property." For State and local officers it goes even further and authorizes taps when they may provide information on such vicious organized criminal activity as crimes "dangerous to life, limb, or property" and punishable by 1 year in jail.

Mr. Mitchell indicates that he is merely following the precedent set by his predecessors in authorizing wiretapping without seeking judicial warrants in national security cases—perhaps not realizing that Supreme Court decisions in 1968 clearly established that wiretapping is now subject to the fourth amendment's

ban on unreasonable searches and seizures and its specific warrant requirement. As of my last reading, the fourth amendment contained no exception for national security cases.

Finally, the Attorney General indicates the considerations which underlie the administration's preventive detention proposal. Mr. Mitchell states that there are two goals which money bail is expected to achieve:

They are: first, to insure a man's appearance in court; and second, to insure that, being under the jurisdiction of the court, he will be law-abiding during the period of his release.

This version of the purposes of bail contrasts interestingly with the Supreme Court's interpretation of the eighth amendment in *Stack* v. *Boyle*, 342 U.S. 1 (1951), the leading case on the subject:

The right to release before trial is conditioned upon the accused's giving adequate assurance that he will stand trial and submit to sentence if found guilty . . . Since the function of bail is limited, the fixing of bail for any individual defendant must be based upon standards relevant to the purpose of assuring the presence of the defendant.

Obviously Mitchell on the U.S. Constitution is totally self-supporting and is an unprecedented improvement of that revered document.

I believe the Attorney General's remarks need little more elaboration. They speak for themselves in delineating his philosophy of law enforcement.

The article referred to follows:

WIRETAPPING AND PRETRIAL DETENTION—BALANCING THE RIGHTS OF THE INDIVIDUAL WITH THE RIGHTS OF SOCIETY

(By John N. Mitchell)

(NOTE.—This article is based on an address by Attorney General Mitchell to the Annual Dinner Meeting of the American Bar Association on August 13, 1969, and includes only those portions of the address which pertain to judicial administration.)

I have now been in office almost seven months. And I think that, perhaps, I have a professional obligation to describe to the American legal community the philosophy that has prevailed and will continue to prevail during my tenure as the 67th attorney general.

As you know, the attorney general is the president's lawyer and takes presidential guidance as to the type of America—the type of "ordered liberty under law"—that this administration wants for our citizens.

Thus, permit me to remind you of some of the principles enunciated by President Nixon in his inaugural address: "The laws have caught up with our conscience. What remains is to give life to what is the law."

"For all of our people," the president added, "we will set as our goal the decent order that makes progress possible and our lives secure."

I believe that the great majority of Americans want "to give life to what is the law" by having their laws reflect "decent order" with "progress."

"The life of the law," as Mr. Justice Holmes said, "has not been logic; it has been experience. The felt necessities of the time, the prevalent moral and political theories, intuition of public policy, avowed or unconscious, even the prejudices which judges share with their fellow men, have a good deal to do with the syllogism in determining the rules by which men should be governed."

The great developments in the law over the last decade have properly attempted to serve, as Mr. Justice Holmes said, "the felt necessities of the time." In general, we have attempted to equalize the public benefits available to all our citizens—the poor defendant with the rich defendant, the minority group student with the majority group student, the minority political party member with the majority political party member, the city dweller with the rural dweller, and the presumably innocent accused with the prosecutorial powers of the state.

As lawyers, we all should be proud of these developments.

But having laid these great foundations, it is, perhaps, only historically natural that, at this time, we take the opportunity to reflect upon and evaluate our recent progress.

It is undeniable that some of our new concepts have areas of error which ought to be corrected. Minor adjustments do not imply an abandonment of a principle but rather a dedication to making that principle work.

But—who is to make the decision as to which adjustments are necessary and how they will be implemented?

THE "REASONABLE" POLICY

As the attorney general, I have the burden of making many of these decisions and my guide is the ancient common law guide of the "reasonable man" whom our forefathers established as the enlightened compromiser in a pluralistic society.

The mark of the "reasonable man" is to balance the interests; to strike a bargain between the perfect and the possible; to adhere to a moral ideal where that adherence is compelling. But, in general, to negotiate a practical middle-of-the-road solution.

That is our over-all policy approach in the Justice Department.

It is, I grant you, not very glamorous to be a "reasonable man." But it is the reasonable men of this world who have studied new concepts, who have adopted those which were compatible with progress, who have funded them and make them work.

One of the most difficult problems today is that the misrepresentation, the posturing, and the extravagant rhetoric of the last few years have offered promises which cannot be delivered, and have set as immediate goals programs which will take a decade to complete.

For example, there are those who expect crime or racial discrimination to be eliminated tomorrow.

It has, for this reason, become fashionable to argue that many legal issues of the nation must be cast rigidly as a right of the individual or a right of society. I do not wish to argue semantics. But individuals make up society.

When a guilty man is acquitted, it is not a vague amorphous group called society which is damaged. It is you, individually, who are damaged, because that man may assault or mug you.

Conversely, when society convicts an innocent man, individual rights are again sacrificed—not only the individual right of the defendant but the individual right of each one of you who could some day be placed in the dock. And you have a right to condemn a society which fails to accept the task of insuring that, under our Constitution, the guilty are convicted and the innocent are acquitted.

It is a question of balance and moderation in order to solve problems and, perhaps just as importantly, to ward off more extreme solutions which may be demanded.

In this context, permit me to cite a few examples of some of the difficult decisions that have been made since January 20, and, in so doing, to explain to you how we attempted to balance the equities so that the best constitutional interests of as many individuals as possible would be served.

The first example I would like to cite is the current controversy over wiretapping—as it applies to organized crime and national security intelligence gathering and prosecutions.

The basic constitutional and moral controversy stems from the conflict between the individual citizen's right to privacy in his home and his office versus the individual citizen's right to demand that his government properly investigate those persons whose criminal activities pose a substantial danger to the general welfare and thus to the personal security of each citizen.

PRIVACY AND WIRETAPPING

The Fourth Amendment to the Constitution establishes the right to privacy by protecting each citizen "against unreasonable searches and seizures."

Because the right to privacy has never been viewed as absolute, the right of government officials to conduct searches and seizures in appropriate circumstances has never been questioned.

Thus, the Fourth Amendment ban against unreasonable searches must be read in the light of the purposes for which our Constitution was adopted: "to promote the general welfare and to secure the blessings of liberty" to this nation.

It is undeniable that organized crime presents a substantial threat to our "general welfare."

Operating over a long period of time with relative immunity from the judicial process, the nationwide syndicate of organized gangsters corrupts our political institutions, intimidates the legitimate businessman, subverts the ideals of the trade union movement, flourishes on the victims of poverty, and, in a very real sense, undermines the foundation upon which our constitutional protections stand.

Most recognized law enforcement experts have repeatedly stated that wiretapping is our most useful tool in obtaining information about this organized criminal syndicate.

Because wiretapping is an invasion of privacy, a judgment must be made as to whether it is "reasonable" to wiretap in a particular case in order to obtain information that is necessary to combat organized crime.

Congress addressed itself to this issue in Title III of the Omnibus Crime bill of 1968. It authorized the Department of Justice to install electronic eavesdropping devices on organized racketeers by application to a court and upon a showing of probable cause.

We decided to use Title III to authorize wiretaps of organized gangsters because we believe that the statutory requirement of probable cause by warrant provides substantial assurance that the privacy of innocent persons will not be unreasonably invaded.

Furthermore, I also insisted—and continue to insist—that each application and full supporting papers be personally presented to me for my evaluation.

The result to date has been satisfactory. There have been authorized, as required by the circumstances in each case, a limited number of electronic eavesdropping devices which have proved, so far, to be highly productive.

I have refused to authorize a number of application which, upon inspection, posed more dangers to personal privacy than would be warranted, in my opinion, by the information which the tap was designed to collect.

As one could have predicted, the department has been criticized by both sides—by those who want massive wiretapping on the 5,000 known members of organized crime, and by over-sensitive civil libertarians who claim that any wiretapping is an invasion of privacy.

But as lawyers, I ask you to consider the problem and to make your own judgment as to whether our middle-of-the-road position—although not compatible with either extreme—is not "order with progress" in the area of organized criminal investigations.

NATIONAL SECURITY

The other aspect to the wiretap controversy is the non-court authorized electronic surveillance for national security purposes.

Here again, we were faced with constitutional polarities. There are those who believe that every search conducted by government under any circumstances must conform to the Fourth Amendment requirements of a warrant issued by a magistrate.

And there are others who believe that, on the slightest pretext of national security, the executive should be able to conduct searches free from any court ordered showing of probable cause.

When I became attorney general, I was informed that every attorney general for the past 25 years has authorized electronic surveillance as a means of gathering foreign intelligence information and intelligence information concerning domestic organizations which pose a serious threat to the national security.

This power has been exercised under the constitutional prerogative of the president to protect the security of the nation upon the belief that the courts would accept the attorney general's determination that the search was necessary.

Thus, I decided that, as the president's lawyer, it was right and proper for me to defend the actions of my predecessor attorneys general who acted on behalf of their respective presidents. We have submitted this matter to the courts for their decision and we will, of course, abide by their rulings.

As a safeguard against abuse, a complete review of every existing national security wiretap was instituted. Each application must be presented to me personally with full supporting documentation. The result has been a restricted use of non-court authorized electronic surveillance.

We have used this approach of compromise and moderation in other areas of the criminal law where extremists argue for absolutes rather than policies carefully tailored to the problems to be solved.

PRETRIAL DETENTION

For example, the nation is well on its way—and rightfully so—to eliminating money bail as a pre-condition for release in non-capital cases. The money bail system, as it was practiced until the early 1960s, made an accused's pretrial freedom depend upon his bank account.

The Eighth Amendment bars excessive bail. We had always assumed that reasonable bail was quantitative in relationship to the crime. But, as our social consciences became more aware of poverty in America, we began to look at bail qualitatively, i.e., what is reasonable bail for the financial circumstances of each defendant. Using this approach, we first examined the goals which money bail was expected to achieve.

They are: first, to insure a man's appearance in court; and second, to insure that, being under the jurisdiction of the court, he will be law-abiding during the period of his release.

Initial studies showed that the best guarantors of a man's appearance were his ties to the community and his employment record. Initially, we took the view that the type of crime charged and his prior criminal record were of no consequence and that his good behavior, while out on pretrial release, would be assumed.

After four years of bail experiments and a careful re-evaluation of the facts, we have concluded that a prior criminal record, and the type of crime charged, are very relevant as to whether an accused will be law-abiding when he is released.

The latest FBI statistics show that 82 percent of all persons arrested in 1968 had a previous arrest, that 70 percent were previously convicted, and that 46 percent had been imprisoned under a prior sentence.

In addition, the FBI report shows that 67 percent of accused burglars, 71 percent of accused auto thieves, and 60 percent of accused robbers had been arrested in the previous 7-year period.

In the District of Columbia, in 1968, of 557 persons indicted for robbery, 63.7 percent of those released prior to trial were rearrested for additional crimes while awaiting trial.

Thus, we decided that an adjustment was necessary to protect those innocent members of our society who might be victims of an accused criminal whose character and background showed high recidivist tendencies.

The adjustment we have proposed to Congress is an amendment to the Federal Bail Act which would establish selected pretrial detention on a limited basis with strong safeguards against abuse.

Our bill would hold for pretrial detention only those persons who appear to be so "dangerous" that their release pending trial would probably result in a crime.

We have provided for a full hearing, permitting the accused to be represented by counsel, to present witnesses on his own behalf and to cross-examine the witnesses against him. There is a right to appeal promptly and the right to be tried within sixty days or to demand release.

The main criticisms against our bill are that it penalizes presumably innocent persons by imposing pretrial imprisonment and that it is impossible to predict, with complete accuracy, whether a particular arrested person will commit a crime.

The answer to these criticisms is that even under the money bail system, presumably innocent persons were denied their freedom, and that we are establishing a much more careful method of determining who should not be released.

We believe that in the limited number of cases where pretrial detention will be used, the right of the individual member of society to be protected from a crime will be carefully balanced against the right of a presumably innocent person accused to be given his freedom pending trial—a freedom that will only be limited if there is the most overwhelming evidence that he may commit a crime while released.

I know that there are those who argue that no arrested man should be denied his freedom until he is convicted, and I know that there are those who argue for more extensive pretrial detention on the grounds that society needs even more protection than we have proposed.

But we have selected a moderate course—a course that is constitutionally consistent and is adjusted to the realities of the crime problems of the day.

ORDER WITH PROGRESS

And so you see that in critical decision-making areas—wiretapping and pretrial detention as in other areas—this administration has tried, and will continue to try, for the decent order with progress that all reasonable men must want for our nation.

We will continue to resist extremism and over-reaction, and I suppose we will continue to receive the most virulent criticism from both ends of the spectrum.

We live in difficult times where moderation is frequently rejected—where the practical and progressive reasonable man, seeking a common-sense solution, is drowned out by the cries of extremism.

But if the reasonable men of this nation do not come together now in a sincere attempt to hear our differences and improve our institutions—both in the law and in other areas—I feel that we may be headed for even more tragic times.

APOLLO 12—NEW ERA FOR SCIENCE

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. TEAGUE of Texas. Mr. Speaker, a recent editorial in Aviation Week and Space Technology by Mr. Robert Hotz, discusses the importance of postlunar landing exploration of the moon and its contributions to a better understanding of the earth and solar system. Mr. Hotz points to the depth of management capability developed in the Apollo program and the applicability of this resource to other national problems. He further analyzes the significance and value of man in accomplishing the many and varied experiments on Apollo 12. Mr. Hotz points also to the contributions man may be expected to make in future scientific exploration of the moon on future Apollo flights. I commend this editorial to your reading:

APOLLO 12—NEW ERA FOR SCIENCE

(By Robert Hotz)

Apollo 11 ended man's long-cherished dream to plant his feet on the moon. Apollo 12 opened a new era of scientific exploration that promises to finally yield many of the secrets of the solar system and the universe beyond.

Apollo 12 was an extremely fruitful mission in many ways. Among its major achievements are:

Management depth. Many of the stars of the superb Apollo management team departed or were shifted to other posts in the interval between the success of 11 and the launch of 12. The Apollo 12 mission was managed largely by the NASA second and third teams. Their excellent performance revealed what depth of unusually high-quality management the Apollo program has developed. This is a resource that should be applied widely to other national problems.

Systems reliability. The Apollo system has gone to the moon only four times and landed only twice. Yet it has proved its reliability as a dependable space transportation system. The journey to and from the moon has become routine in less than a year. Only the landing on and the ascent from the moon still pose some problems that require more experience for final solution. This does not mean that peril has disappeared from lunar exploration. There are still points at which failure of some component, such as the ascent stage engine, means disaster. Opportunity for human error is always present. Lunar explorers will still be braving dangers as serious as those that faced the 15th Century explorers of the earth's oceans and the pioneers of flight. But Apollo has provided them with a more-reliable vessel than anybody dreamed possible when Sputnik first beeped.

Value of man. All the Apollo lunar missions have added increments of evidence on why man is essential for the fullest exploitation of a space transportation and scientific exploration system. But Apollo 12 provided evidence that will begin a diminuendo of the unmanned vehicle chorus to a barely audible moan. Without man aboard, Apollo 12 would have never reached the moon. Without man aboard, it could not have provided such a rich harvest of scientific data. When lightning-like discharges blew the primary electrical power systems barely half a minute after launch, it took the cool analysis

and action of the crew with help from Mission Control to recycle the inertial platform and enable the flight to continue. The fate of Atlas 13–B in early 1959 provided a clue to the probably alternative. It was launched similarly through a heavy cloud layer. On burning through the top, all telemetry and other signals were lost permanently. Its ultimate fate is still unknown. Man in the spacecraft loop is expensive in dollars and payload. But it is an investment that pays tremendous dividends.

Scientific exploration. Apollo 12 demonstrated for all the world to hear, if not see, what the purpose of the Apollo program really is. It dispelled completely the myth that Apollo was simply a technical tour de force with no meaning beyond the lunar landing. It demonstrated in a startling variety of ways that the main goal of Apollo is to enable man to explore the moon and search for the secrets of our existence.

First, there was the erection of the nuclear-powered scientific station. Without man to implant then properly and to adjust them, even scientists now concede, these instruments would not be sending back the stream of exciting new data now being received on earth. The SNAP-27-powered complex of scientific measuring instruments now functioning on the Ocean of Storms is the pioneer prototype of permanent manned scientific working stations that will appear on the moon before the end of the next decade.

Second, there was the incredible activity of man himself as an explorer and geologist during a total of 16 hr. on the lunar surface. Certainly no other period in the history of science has yielded so much data per hour. Apollo 11 proved that man could survive and work on the lunar surface. But Apollo 12 provided some of the surprising parameters of just how long, how hard and how productively he really can work there. With moderate modifications to the present EVA equipment, there is every indication that these parameters can be extended far beyond any original hopes.

Third, there was the astounding demonstration of the ability to link the geological expertise of the scientific panel gathered in Houston's Mission Control room with the space engineering and operational expertise of Pete Conrad and Alan Bean some 250,000 mi. away on the moon. This scientific exploration by remote control in real time—instant science—is an achievement that will take some time to penetrate the scientific community fully.

It is revolutionary watershed for science. It is going to force scientist to change their methods of research, analysis and publication. There will no doubt be some now-distinguished names that will cling desperately to their hoary traditions and stubbornly resist these revolutionary changes. But the great scientific names of the future will be those who recognize the unprecedented opportunity the manned space flight program provides for a massive attack on the frontiers of knowledge. The future belongs to those scientists who learn quickly how to work with the space engineers either by remote control or inside the orbiting laboratories that will certainly be a part of the next generation of manned spacecraft.

Finally there was that reverberating echo of the impact of Intrepid's ascent stage on the lunar surface that does not fit any prior theory on the composition of the moon. There are the surface pictures showing the surprisingly firm and gentle slope of the Surveyor crater; the green rocks in Conrad's sample bag; the varying color and texture of the lunar surface dirt, and the strange geyser-hole type mounds.

All of this is new and untraditional knowledge of the moon. Man's initial exploration of the moon has perforated many long-held theories and raised more questions than it has answered. But a great new era of scientific exploration opened with Apollo 12. Eventually, all of the answers will be forthcoming.

LUNAR ATMOSPHERE

HON. GRAHAM PURCELL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. PURCELL. Mr. Speaker, the Apollo 13 astronauts have now finished their postflight quarantine and the United States is again reaping the scientific knowledge of another successful trip to the moon.

One of the most important devices which the astronauts set up on the surface of the moon during this last flight was the LAD, the lunar atmosphere detector, which was developed by the University of Texas system.

We have generally accepted the fact that there is no atmosphere on the moon, and until the opportunity came up under which this could be looked at first hand, no one gave much thought to the possibility. The LAD has been left on the lunar surface in hopes of finding a "lunar atmosphere" which some scientists believe exists. The University of Texas is providing the means of finding out, and I would like to take this opportunity to commend these men for their work. I would like to insert in the RECORD at this point, a copy of a news release from the University of Texas at Dallas which explains this particular project in detail:

"THERE ISN'T ANY" MOON ATMOSPHERE; BUT THE UNIVERSITY OF TEXAS, DALLAS/MSC TEAM WILL SEND MEASURING INSTRUMENT VIA APOLLO 12

DALLAS.—The most common description of the Moon's atmosphere is: There isn't any.

That's a good-enough conclusion for many purposes, some of them scientific. But two scientists, from Dallas and Houston, will be in NASA's Manned Spacecraft Center Experiment Mission Control room on Wednesday, Nov. 19, to see their experiment begin to measure what's really there.

About 2 o'clock that morning, Apollo 12 Astronauts Charles (Pete) Conrad, Jr., and Alan L. Bean will deploy an instrument package on the lunar surface, 300 feet away from their "Intrepid" module.

The whole ALSEP package (Apollo Lunar Surface Experiments Package), its weight reduced from an on-Earth value of 280 pounds down to 48 pounds in the Moon's gentler gravity, will include five scientific experiments.

Possibly the last item, and the smallest, to come off the bar-bell equipment pallet will be an instrument that looks a lot like a camera in a two-tone case. It will be placed about 55 feet beyond the ALSEP data center and power generator.

This is LAD, for short, Lunar Atmosphere Detector, for long. It is has also been known as a cold cathode gauge experiment.

It was suggested to NASA/MSC four years ago by Acting President Francis S. Johnson of The University of Texas at Dallas, who was then professor and head of space sciences at UTD's private predecessor, the Southwest Center for Advanced Studies.

Co-investigator for the moon-atmosphere experiment is Mr. Dallas Evans of Manned Spacecraft Center's Lunar Surface Program Office.

Project manager and engineer at UTD is Mr. James M. Carroll of Garland, Texas.

LAD will be literally connected to the Lunar Ionosphere Detector (LID) as the two units stand close together on the Moon's surface. LID, which has also been identified as a suprathermal ion detector experiment (SIDE), will be furnished by Dr. John W. Freeman of Rice University. The two related experiments were "mated" there before the entire ALSEP package was brought together in Houston and transferred to Cape Kennedy.

MOON ATMOSPHERE IS ALMOST TOO THIN TO IMAGINE

The Johnson-suggested experiment is designed to sense variations of atmospheric pressure at the lunar surface by producing an electric discharge in the ionization gauge—which is open to the lunar atmosphere—and measuring the electric current in the discharge.

As Doctor Johnson says, the idea that there isn't any atmosphere on the Moon is "generally acceptable, because escape processes exist that can remove it."

But, he also says—in a briefing paper prepared for discussions with Astronauts—"observations made so far, such as the refraction or bending of starlight and radio waves when the Moon comes between us and a star, don't rule out the presence of an atmosphere with a pressure of about 10 millionths torr."

(Atmospheric pressures are measured in torr, after Galileo's pupil, Evangelista Torricelli, who found in 1643 that the weight of all the air above a point on the Earth's surface equals the weight of a column of mercury about 30 inches tall) .

Without worrying about decimals that have 10 zeroes followed by the numeral 1, a 10 millionth, this amount of pressure can best be called a very good vacuum.

But some gas particles are there. In Earth's nitrogen-oxygen atmosphere, the molecules are about one 10 millionth of an inc hapart. On the Moon, they would be 1/100th of an inch apart.

(If oxygen and nitrogen molecules could be enlarged 220 million times, they'd come out about the size of baseballs. On that scale, an inch equals 3,500 miles. The molecules would be one yard apart on Earth, but in the vacuum of space they would be most of 50 miles apart. This example doesn't apply to the Moon's atmosphere directly, but illustrates a very good vacuum).

An atmosphere at pressure of 10 millionths torr is still a significant atmosphere, says Doctor Johnson. The questions about it, after pressure is determined by LAD's activity, are: What kinds of gases are present on the Moon, and what are their sources?

MOST CERTAIN MOON-ATMOSPHERE SOURCE: THE SOLAR WIND

"The most certain source of lunar atmosphere is the solar wind, which strikes directly on the Moon's surface," says Doctor Johnson in the briefing paper. "The wind, which is ionized or electrically charged, should become neutralized on the lunar surface and be released as a neutral gas.

"The gas may be trapped on the lunar surface itself for some time, but the rate of release from the surface must be equal to the rate at which solar wind particles strike the surface. The gas concentrations, or atmosphere, that result from the solar wind depend on the loss processes from the atmosphere, and this is by escape from the lunar atmosphere to space."

The solar wind is no gentle zephyr. It's a million-mile-an-hour stream of charged particles coming from the Sun in a thin plasma, or gas mixture.

Moon-surface atmospheric physics isn't like that on Earth, where the solar wind is blocked off by a strong magnetic field. Near the lunar surface, "an ionized gas particle, formed from the neutral atmosphere by ionization due to the utlraviolet sunlight, is first 'kicked' at right angles to the flow of the solar wind by the wind's electrical field," explains Doctor Johnson.

As the ionized particle gains velocity, the magnetic field of the solar wind turns its mo-

tion back to the same general direction as the wind's flow.

"Some of the particles are directed back into the lunar surface, where they undergo neutralization—electrons from matter rejoining with ions—and are restored to the atmosphere."

Many of the particles don't strike the surface, but are carried away by the solar wind.

"The average atmospheric particle lifetime, for the heavier gases, depends mainly on the time required for solar radiation to ionize one atmospheric gas particle," says Doctor Johnson. "It's about 10 million seconds." This is about 115 days.

"The lifetime of gases on the Moon should be expected to be about that length of time for neon and heavier gases, and less for gases lighter than neon, because there is still more effective loss mechanism for the lighter gases."

PREDOMINANT GAS FROM SOLAR WIND SHOULD BE NEON

"The predominant gas of solar origin to be expected on the Moon is neon," says Doctor Johnson in the briefing paper. "Lighter gases, such as hydrogen and helium, should be less prevalent because of more rapid escape due to thermal motion, and heavier gases less prevalent because they are not so abundant in the solar wind." Among the heavier gases are argon, krypton, and xenon.

The solar wind is not an oxygen-carrier. The conditions that produced oxygen molecules on Earth involve water, solar energy, and early life itself, and are not matched on the Moon or the Sun.

There may be some small input to the lunar atmosphere as meteors strike the surface and release gases by vaporization, says Doctor Johnson. He calls this a "possibly significant source."

LAD may be able to detect gas intermittently released from vents on the lunar surface, he says, if such a release occurs—which would infer possible volcanic action, or below-surface heat. Some short-time luminous events have been recorded on the Moon by astronomers, and these have been interpreted as possible intermittent gas release. But the illuminations have not been satisfactorily explained.

"Atmospheric measurements will have greatest significance if it turns out that measured gases are of internal origin, related to the geochemistry of the Moon," says Doctor Johnson.

"But the real significance in this case will emerge only if the composition of such gases is measured, and this is something that can't be done with the Lunar Atmosphere Detector, or ionization gauge."

A mass spectrometer is needed to measure gas composition, and one is already being tested in the space physics laboratories at UT Dallas. Joining with Investigators Johnson and Evans, Assoc. Prof. John H. Hoffman of UTD's Atmospheric and Space Sciences Division faculty has completed the design of a "high-sensitivity, miniaturized magnetic sector mass spectrometer" and is evaluating its suitability for use on the lunar surface, under a separate NASA/MSC contract with UT Dallas.

The later-generation instrument "has the additional powerful advantage that it can recognize a significant but small presence of a particular gas in the presence of a large amount of other gases that are less significant," says Doctor Johnson. This will be especially important if contaminating gases are present in large amounts.

APOLLO 12 WILL CREATE "AIR POLLUTION" PROBLEMS ON MOON

There certainly will be "pollution" of the Moon's ultra-thin atmosphere from Apollo 12 rocket engines and surface operations, says Doctor Johnson. About 10 tons of volatiles will be released near the lunar surface during "Intrepid's" descent, surface, and ascent operations.

The amount of contaminating gas molecules will be about equal to the amount of solar wind particles striking the entire lunar surface in about three hours.

"The critical question is: How quickly will the contamination clear up?"

LAD's entrance aperture—the part that resembles a camera's lens—will be turned away from "Intrepid" when the ALSEP package elements are placed on the surface. With LAD some 350 feet from the lunar module, this will avoid come pressure and backscattering effects, especially at takeoff.

More important in the contamination problem, says Doctor Johnson, is probably the adsorption of exhaust gas on the lunar surface, and its slow release. The proportion of the 10 tons of exhaust gases that will "soak" into the surface, and the time needed for its release are not yet known.

If gas retention time at the surface is short, contamination may not be significant after one day. If it is long, three hours or more, the rate of improvement may be much slower. "Contamination could prove to be a problem for several months" in that case, says Doctor Johnson.

LAD was constructed from an improved version of a laboratory ionization gauge furnished by National (now Norton) Research Corporation of Cambridge, Mass., with associated electronics by Marshall Laboratories (now Time Zero Corporation) of Torrance, Calif. The gauge was tested at UT Dallas, and transferred to the Houston assembly point, where Bendix Corporation has been the prime contractor to bring the ALSEP hardware together.

ALSEP for Apollo 12, in addition to the lunar ionosphere detector from Rice, and LAD, will include a new seismic experiment prepared jointly by Columbia University, Massachusetts Institute of Technology and the University of Hawaii; instruments to measure the Moon's magnetic and electrical fields, jointly by NASA-Ames Research Center and Manned Spacecraft Center, and an experiment to measure the direction and intensity of the solar wind, furnished by Jet Propulsion Laboratory, California Institute of Technology.

ALSEP's electrical power, for both the experiments and the radio transmitters that will beam date back to Earth, will come from a nuclear generator, the first ever carried to another space body from Earth. Fueled by Plutonium 238, it is designed to keep ALSEP operating around the clock for at least one year of 14-day lunar days and nights.

CONGRATULATING GOVERNMENT EMPLOYEES

HON. G. ELLIOTT HAGAN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. HAGAN. Mr. Speaker, in these times when there is seemingly so much ingratitude in our society, it is indeed refreshing to receive a letter from one of my fine constituents which portrays real appreciation to the Federal Government. Many times the fine services of a Federal agency, like the Veterans' Administration, are taken for granted and unheralded.

This letter, I am sure, will let these dedicated Government employees know that the performance of their duties and untiring efforts are appreciated.

Mrs. Shackelford's letter is as follows:

DUBLIN, GA.,
December 10, 1969.

Hon. G. ELLIOTT HAGAN,
House of Representatives,
Washington, D.C.

MY DEAR MR. HAGAN: Your recent expression of sympathy following the death of my husband, Sidney C. Shackleford, in the VA Center at Dublin, Georgia, was very kind. Hearing from you has prompted me to direct these words to you with the request that you please redirect them as you think appropriate.

My huband, a service-connected veteran of WWII, had long had contact at intervals with officials of the Veterans Administration. Their desire seemed always to render every service available to him and was accomplished with courtesy that permitted and encouraged his dignity. This in itself warrants my resolve to communicate appreciation.

When I mention to you that his death was preceded by a three year period during which he was hospitalized in each of the four VA Hospitals in Georgia so that every resource and facility of modern medicine be offered him in his fight for life as good as he could have for as long as he could have it, you begin to see, I am sure, the dilemma of one small voice trying to thank so many for so much. I must say that his excellent care was matched by courtesy and at times almost unbelievable concern for him and his family.

Surely, pride in such an Organization that functioned so untiringly and so well in my husband's case is justified among those who direct it. Please accept the gratitude of his family.

Very truly yours,
(Mrs. S. C.) OLENE SHACKELFORD.

Having served for a time on the Veterans Committee of the House. I am well aware of the dedication of these people. Mrs. Shackelford has performed a service herself by bringing this to the attention of her Congressman and the general public. I am sure my colleagues will agree that her sincere letter of appreciation is indeed refreshing.

COWINNERS OF LANE BRYANT VOLUNTEER AWARDS

HON. F. BRADFORD MORSE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. MORSE. Mr. Speaker, some 21 years ago the Lane Bryant Volunteer Awards were created with the objective of seeking out and calling public attention to those Americans who were making significant contributions to their fellow man through positive, volunteer action against massive social problems.

Since 1948, the first year in which the awards were given, 38 domestic awards and six international awards have been made. The recipients have represented all walks of life but one common demoninator characterizes them all—the encouragement of self-help through mutual involvement. Each provided aid and support to those in need but in addition they did what in the end is far more important—they taught others how to begin working toward a life of self-reliance and dignity.

The purpose of the Lane Bryant Volunteer Awards is to bring the work of

these unrecognized people to public light and public acknowledgment. As founder Raphael Malsin said of the awards:

They serve as a kind of X-ray into the inner workings of our society. They illuminate the trouble spots, they highlight the symptoms, they show us the best and the worst. They are a kind of laboratory where we can see healing ideas being tested. They are a tribute to the power of individuals, the best kind of individuals.

This year four Lane Bryant Volunteer Awards were made at a ceremony at the Department of State on December 4. It is my privilege to have known and admired one of the recipients, Sam Greene, for many years. He is a truly outstanding and unique American.

So that my colleagues may share in the appreciation of the fine work which these people are doing, I insert at this point in the RECORD, a brief description of the contributions which each of the award winners has made. It makes for very heartwarming reading, Mr. Speaker, and I know my colleagues will want to join me in extending our thanks and our congratulations to these truly selfless Americans.

HUGH DOWNEY, COWINNER, INTERNATIONAL AWARD

In a remote province of Ethiopia 3,500 feet above sea level, a 28-year-old native of Kansas City, Missouri labors in the hot, arid terrain. He is working to help people who are fighting not only the natural enemies of poverty and disease, but the human hostilities that exist in the unsettled areas as well.

Hugh Downey came to Ethiopia as an enlisted man in the United States Army. A chance meeting with a priest introduced the young soldier to the poverty of the remote villages. From that moment he was committed to teach the villagers how to help themselves in every way possible.

After Mr. Downey's discharge from the Army in 1965, he only returned home long enough to marry his childhood sweetheart and to seek support from among his friends and family for the people of Ethiopia. Then the Downeys returned and, despite tremendous obstacles, have recorded an impressive list of achievements.

Through their efforts, 10 schools, currently educating 1,000 pupils, have been built, equipped and staffed. Ten brick making machines, imported from the United States, have been loaned to villages to transform grass hut structures into sturdy, clean homes. One village has a church, council hall and many residences and, as a reward for its progress, has been presented with a gasoline powered generator for electricity.

An orphanage of five buildings, designed free of charge by an American architectural firm, houses 100 orphans. A school connected with the orphanage is open to an additional 100 day students from poor families in the area. Its scholastic standing is recognized as among the best. A public library of over 5,000 volumes was established in Keren. It was so popular that the municipality has taken over its operation.

The Downeys personally combatted two serious malaria epidemics, obtaining quantities of medicines, organizing and supervising a distribution system. They have organized and taken part in medical safaris, carrying aid into remote areas never before having the benefit of modern medicine. They continually minister to the sick and afflicted in a large area surrounding the town of Keren. Presently, they are building a 75 bed hospital in Keren, a modern structure designed by an American architectural firm. Joining with the officials of Keren, the Downeys have helped establish an obstetrical clinic which is nearly ready for use.

With all this incredible activity, the Downeys have also managed to maintain a home, providing room, board and tuition for secondary school students who otherwise would be unable to continue their education. They have financed young native businessmen in establishing trades for which they are suited. In addition, Mr. Downey has conducted small, but successful agricultural experiments.

These accomplishments have taken their toll. Mrs. Downey lost her first baby in Keren and was once wounded in the leg by a stray rifle shot. Happily, the Downeys welcomed the birth of their son, Hugh Michael, on March 3, 1969.

Mr. Downey has been commended by His Imperial Majesty Emperor Haile Selassie. H. H. Ras Asseratte Kassa, Governor General of Eritrea, stated that even more important than Mr. Downey's physical accomplishments, is his moral force. Governor Kassa pointed out that he is a man of peace and of much creative ability, compassion and intelligence. Hugh Downey conveys to the people the need for the commitment to self-government, the need for hard work in a spirit of sacrifice and growth. He actively trains Ethiopian citizens to take over the various projects he initiates, and inspires others to start similar projects on their own.

Praise for Hugh Downey does not come from high places alone. A river near Keren has been renamed. . . . The River Hugh.

SAM GREENE, COWINNER, INTERNATIONAL AWARD

Uncle Sam, to the people of Guatemala, is not the United States Government, but a retired New York businessman, Sam Greene. Mr. Greene might have been content to live in leisure at his comfortable home on the shore of Guatemala's beautiful Lake Atitlan, but his keen sense of obligation to help his neighbor, his sadness at seeing the poverty stricken hopelessness of many highland Indians, and his ever active practical mind prompted him to take action.

The late President Kennedy once said: "One man can make a difference." Sam Greene proves this to be true, but would have added: "The biggest bank in the world is the pair of hands of a poor man." For Sam Greene has altered the philosophy of volunteerism and community action with a startlingly simple thesis: If you loan a poor man money *in terms he can understand* (a penny a day), he would prefer to borrow the money and build for himself.

The Fundacion del Centavo, or Penny Foundation, was Sam Greene's unique penny-a-day program for rural community improvement. In 1962, he interested 70 Guatemalan businessmen in establishing a revolving fund from which loans are made to village groups for social programs they themselves choose. The people do the work and they pay for the materials and administrative costs plus interest in terms of a few cents a day, an idea which can be grasped by even the illiterate. In one case a pure water system immediately reduced high medicine costs, providing a saving even while paying off the loan. Each successful project not only gives a community self-respect and hope, but also it brings the traditionally isolated Indian into the economy as a consumer, saver, and taxpayer.

Reimbursement on projects has been over 90%. The Penny Foundation now has capital of $200,000 including a matching grant from the Agency for International Development. The Pan American Development Foundation and the Inter-American Development Bank have used Sam Greene's help in establishing similar programs in Ecuador, the Dominican Republic, Mexico, Colombia, and Chile. Formation groups are meeting in Nicaragua, Honduras, Venezuela, and Peru.

Because ill persons cannot easily help themselves, Sam Greene at age 76 rides horseback into remote villages to make lists of needed medical equipment for isolated clinics. Then he helps find the necessary supplies. During recent epidemics he was instrumental in obtaining $160,000 in polio vaccine and $17,000 in vaccine making equipment. He is helping to form an integrated immunization program for all of Central America. He raised $50,000 for a non-profit fund used to finance young doctors and dentists who wish to establish a practice in rural areas, most of which have one doctor per 100,000 people.

Mr. Greene also developed the first low cost life insurance program, designed to keep poor families from going into debt when a family member dies. This is important when one remembers that interest rates of 10% per month are common in Central America. He has begun a private sector land reform program whereby a sharecropper can buy his land, work it, and pay for it. He developed for the Ministry of Education an arrangement for rural education by television.

One of his favorite programs is based on the idea of leverage. Funds that stay in the United States are used as guarantees for loans made by Latin American banks for social development. The result is that United States capital is not exported but is used to help the Latin Americans to do their own development financing.

"Don't say I'm a philanthropist—I'm not," emphasizes Sam Greene. "I'm a good organizer." Whatever the terminology, his programs produce direct results at the grass roots level. His ideas on the use of money bring the pride of accomplishment, the pride of not begging, and the pride of paying one's way.

The Guatemalans think so too—they awarded him the Order of the Quetzal, the country's highest honor. He is the only American to have received it.

BRONSON GENTRY, WINNER, NATIONAL INDIVIDUAL AWARD

On a Monday morning in Detroit, young children cross at the once dangerous corner of Kitchner and Jefferson—safely. They might have been killed or seriously injured, as others had been, while the community was unable to secure a traffic light.

On a Tuesday evening in Detroit, parents attend a "coffee conference." They speak informally with their children's teachers—gaining valuable insights—bridging the generation gap. They might have been sitting at home, asking one another where they had failed.

On a summer day in Detroit, a group of youngsters swim in their recreation area's new pool. They might have been out vandalizing a supermarket.

On Thanksgiving day in Detroit, a woman serves her fourteen children a fine turkey dinner, though they had been living on meager funds. They might have had very little to be thankful for.

The outlook for many Detroit citizens might have been very bleak . . . if it were not for the efforts of Bronson Gentry.

The city of Detroit, like many others, has experienced its share of restlessness, disorder, vandalism and crime. With his strong belief in community self-help, Bronson Gentry organized his neighbors into groups able to take action against these social ills.

As scoutmaster of a troop he founded, Mr. Gentry guided his young men in an exhibition aimed at curbing vandalism. In addition, he sponsored a program on crime and vandalism for local merchants and churches, and was instrumental in organizing and directing a citizens' vigilance committee to maintain discipline on school buses.

An urban renewal program elsewhere in the city resulted in a housing shortage in

Mr. Gentry's neighborhood, as well as overcrowded schools and increased crime. Mr. Gentry took action. He petitioned City Hall for the improvement of Maheras Field, a recreational facility that had deteriorated to the extent that it was no longer safe for children. As a beginning he requested the construction of baseball diamonds, to be followed by a new field house, and finally, a swimming pool. The city's initial response was good. However, when the next fiscal year arrived, the money was suddenly diverted elsewhere. But not for long. Mr. Gentry went to work once more, and the money was reallocated for Maheras.

Bronson Gentry waged an unrelenting campaign for neighborhood conservation, undertaking an ambitious battle to have dangerous and dilapidated houses torn down. He offered reasonable plans for the use of lots left vacant, organized alley cleanups, improved street lighting, initiated more frequent garbage pick-ups and regular police patrols. He saw to it that traffic lights were installed on busy street corners where they were desperately needed and worked to rid the streets of abandoned and junked cars.

A leader in the volunteer anti-crime patrol which keeps a watchful eye on the city, Mr. Gentry went "into the streets" with a large group of men to "cool things down" when a summer disturbance threatened to erupt into a riot. As a result of his activities in this area, he recently received the Police Citizen Award in recognition of his outstanding contribution to police-citizen cooperation and understanding. The *Detroit News*, originator of the award, felt that Mr. Gentry displayed a unique sense of the individual's obligation to the community.

Recognizing the problems of overcrowding in the schools, Bronson Gentry led the fight for the construction of a new school. As head of a Project Advisory Committee, he prepared educational specifications for the new facility, which is now located next to Maheras Field, affording the area's children a place to play after school without having to cross dangerous intersections. Another first for the school is a community kitchen-lounge for informal parent-teacher conferences.

Bronson Gentry has demonstrated an unusual rapport with neighborhood youngsters. One of his most successful undertakings has been his work with boys involved in vandalism or petty theft. Paroled in his custody and "sentenced" to a few weeks of work in his basement, they spend every free hour working with saws and lathes, learning how to build, to create, to spend time constructively. Youngsters rarely want to leave when the "sentence" has been completed.

As chairman of the Youth Recreation committee of the Riverview Community Council, Mr. Gentry leads the area's boys and girls in projects designed to benefit needy families. Among their yearly activities is the distribution of Thanksgiving baskets to large families, widows and senior citizens.

Bronson Gentry is not a professional; he is a janitor in a local factory. He is concerned about his community, and is an indomitable force in its preservation. With his help, the future just might be a great deal brighter for the citizens of Detroit.

SCOTLAND COMMUNITY DEVELOPMENT, INC., WINNER, NATIONAL GROUP AWARD

Ramshackle houses on rutted dirt roads, surrounded by junked cars, mountains of rubbish and other debris of poverty. Shanties without indoor plumbing, running water, electricity, modern heat or trash removal. Crumbling homes. Helpless squalor. This was the community of Scotland in Montgomery County, Maryland.

An enclave of 50 Negro families whose median income of $80 a week had to be stretched to cover the expenses of families of six, seven, eight or more. These were the residents of Scotland.

A fast-growing, progressive county, where affluent white suburbanites enjoy lovely park lands, expensive new homes and one of the highest median incomes in the nation. This is the rest of Montgomery County.

Since the turn of the century, the residents of Scotland, mainly descendants of slaves, heeded the advice of their ancestors and held onto their land even when they had nothing else. But, in 1965, the roots of their rural community were severely strained by land speculators who sought acreage to house Washington's upper middle class. The future was indeed bleak for Scotland's citizens, who had no resources for relocation. The Save Our Scotland (SOS) Committee was set up by county, civic and church leaders, as well as some sympathetic Bethesda neighbors, to investigate avenues of action for the area. SOS moved the county to repair the town well and extend water and sewer services to the local church, and organized an ambitious clean-up campaign. As the community began to take on more and more responsibility for itself, the Scotland Community Development Corporation (SCDC) was formed.

The basic concept behind SCDC was that the local residents pool their combined land holdings, sell some of them, and build new housing on the remaining acreage. Then began the tortuous process of title-searching. Volunteers uncovered extremely complicated systems of ownership, to the extent where one resident was found to own 1/108 of his quarter acre plot. As the process of land buying progressed, model communities were designed, with the main requirements drawn by Scotland's citizens to conform with their own life-styles. An example is the inclusion of front porches on the townhouses, a rarity today. The final result is a plan which includes six basic types of townhouses, ranging in size from two to five bedrooms.

With the aid of a Housing and Urban Development (HUD) grant of $78,400, the 100 units are now being completed. As they become ready, families will take possession, and their old shacks will be demolished, thus avoiding the trauma of forced relocation. Seventy-five of the units will be low rental, the others will be for sale through the life insurance industry's billion dollar housing fund.

Residents who owned land in Scotland have traded it for equity in housing. Others, such as Melvin Crawford, president of the SCDC, can gain equity in their homes through their own labor. Mr. Crawford, a maintenance man with a wife and seven children, spent 42 years in a "dilapidated four room house not fit to live in." He and his family have chosen their new three bedroom home in the development—with available room for expansion.

Along with the task of building new homes, the SCDC has accomplished many other goals. Anticipating some of the problems of the first year of residence, they held a benefit which raised over $8,000 to hire a full-time social worker. They have instituted such services as tutorials, community newsletters, emergency legal help and a highly successful furniture drive. The Scotland Teen Health and Beauty Workshop, instituted this past year, offers girls a variety of activities dealing with fashion, dieting, cosmetics, creative exercise and modeling. A "mod fashion tour of Georgetown" and a tea with informal modeling are highlights of their activities to date.

The Scotland Community Development, Inc., saw a problem, studied it, and went into action. Using their own resources, hundreds of people from diverse backgrounds worked together to create in Scotland a climate of opportunity in which individuals can become economically and socially viable citizens—all within the familiar and comfortable surroundings of Montgomery County. *This* is the Scotland of today . . . and tomorrow.

AMERICA FOR AMERICANS—OR COMMIES?

HON. JOE SKUBITZ

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. SKUBITZ. Mr. Speaker, I think that my colleagues would be extremely interested in a hard-hitting editorial written by Fred Krueger, editor of the Baxter Springs Citizen, on our Vice President, SPIRO AGNEW.

Mr. Krueger's editorial sums up the feelings of the people in the Fifth Congressional District of Kansas. Fred Krueger is one of our fearless Kansas editors who calls them as he sees them.

AMERICA FOR AMERICANS—OR COMMIES?

I am departing from my regular column format today for what we believe is a very important reason . . . to publicly state the position of our newspaper in regard to recent events taking place in America.

First of all, we strongly support the speech given by our Vice President the other evening concerning national television network news broadcasting.

For sometime now we have been extremely concerned over the way all three national TV networks have dredged the depths of insignificance to bring the anti-American philosophies, the hippies and the Stokley Carmichaels into national prominence.

As if by preplanned pattern, national TV news has become a direct tool for the salesmanship of communism, "the new culture", and every other cause aimed either at hate for America or the surrender of America.

Americans are now watching and hearing on TV exactly what the elite few want us to see and hear in a powerful attempt to sway public opinion.

We are pleased that our Vice President had the "guts" to stand up for us the way he did . . . but, we also note with utter disgust a few politicians who are as usual placing their personal ambitions above the good of our great country by publicly denouncing this stand. We challenge All Americans irregardless of their politics to unite by placing America first and politics second in these times of crisis.

Secondly, we want to go on record supporting our President as our team quarterback in regard to the terrible war in Viet Nam.

We all know the so-called Peace Moratoriums were originally organized and principally financed by Peking, Moscow and Havana for the sole purpose of bringing about the total surrender of America by enlisting Americans to do their impossible job for them.

Of course North Viet Nam's next move will be to take the war directly to wherever Americans are located in Viet Nam in order to make the sting of future peace moratoriums more effective.

It all boils down to one basic fact . . . The Communists are still determined to use every means at their disposal to overthrow our government and bury us all as they have threatened they will do from the beginning.

It is up to "the great silent majority", representing over 90% of the American people, to Speak Up Now! Let the networks (not our local stations) hear from you. Let your congressman know how you feel!

Just remember . . . Russia also has a "great silent majority" representing 90% of the Russian people, but their silent majority remained silent too long and Russia is now ruled with an iron fist by the 10% who call themselves "Communists".

Do You believe it can't happen here . . . ?

BIG TRUCK BILL

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. SCHWENGEL. Mr. Speaker, my editorial for today is from the Columbia, S.C., State Record. The editorial follows:

PRO, CON TRUCK TESTIMONY PILES UP

WASHINGTON.—Testimony for and against bigger trucks on federal interstate highways piled up before a House subcommittee last week with opponents outnumbering advocates in contrast to the preceding week.

Those stating their opposition to the proposal or portions of it included the American Automobile Association, the American Association of State Highway Officials, the General Federation of Women's Clubs and the Iowa director of highways.

Coming out in favor of it were Rep. Al Ullman, D-Ore., and William W. Owen, president of the Dayton, Ohio, City Transit Company.

It is the industry position that wider, heavier and in some cases longer buses and trucks would be safer and more comfortable and actually easier on the nation's highways than those presently in use. Critics dissent vigorously.

The bill would increase weight limits on a single axle from 18,000 to 20,000 pounds, on tandem axles from 32,00 to 34,000 pounds and raise the present gross weight limit of 73,280 pounds to as much as 108,000 pounds on a nine-axle truck.

It would permit widening of trucks and buses from eight to eight and one-half feet and impose a 70-foot length limit. There is presently no federal limit, but all but three states have limits of 65 feet or less.

The measure also contains a grandfather clause allowing states that now permit vastly larger trucks to continue to do so indefinitely.

The highway officials' association said this provision would "provide the opening for the encouragement of further escalation and liberalization of weight regulations."

But Ullman told the subcommittee on roads of the House Public Works Committee that the clause is essential, at least for Oregon which permits operation of mammoth triple-unit trailer combinations as much as 105 feet long.

George F. Kachlein Jr., executive vice president of Triple A, called the measure "an antisafety bill almost identical with the big truck bill which failed of passage last year."

Kachlein declared "we cannot ask 100 million drivers to be guinea pigs by increasing the sizes and weights and then researching the effects. The research should be done first."

Owen testified in behalf of the entire bill but said the width increase is essential to the bus industry. Presently, he said, many large cities already have the eight-and-one-half-foot-wide buses but they cannot leave city limits.

John Gunther, executive director of the United States Conference of Mayors, said the conference does not object to the wider buses but is against other provisions in the bill.

Douglas B. Fugate, vice president of the highway officials association testified a study by the association shows that "an increase from the 18,000-pound to the 20,000-pound load can result in an average loss of the result in an average loss of the remaining life of (highways and bridges) between 25 to 40 per cent. To increase it to "2,000 pounds can result in the loss of pavement life of close to 60 percent . . ."

CONGRESSMAN DURWARD HALL ADDRESSES GROCERY MANUFACTURERS OF AMERICA

HON. DAN KUYKENDALL

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. KUYKENDALL. Mr. Speaker, recently our colleague, Congressman DURWARD G. HALL delivered an important address before the Grocery Manufacturers of America in New York City. Because Congressman HALL discussed some very vital issues concerning the relationship between Government and industry, I take this opportunity to include his remarks in the RECORD.

Congressman HALL's address follows:

SPEECH BY REPRESENTATIVE DURWARD G. HALL

Mr. Chairman, it is indeed a pleasure for me to be here today, to get away from the "self-characterized, effete corps of impudent snobs", and dine with a group of those hardy Americans who still have courage enough to mix their drinks with Fresca!

I can't begin to tell you how good it is to occasionally take rest and recreation leave from the Nation's Capitol, described by some as a domed psychiatric center, and to my knowledge, the only institution in the world that's run by its own inmates.

I am happy to report, that things in Washington are about the same as usual—

Adam Clayton Powell is still out of town; Judge Haynsworth is still on trial; Dr. Knowles is now developing his own foreign policy, and Speaker John McCormack's pay telephone has been disconnected.

The Congress has even found time to pass some legislation. For example: The Congress has—

Doubled the Presidents salary; raised its own pay by 40 percent; enhanced their own retirement; hired more office personnel, and last week voted to add to (and consolidate) its equipment (office, that is!).

Now those are the major items, But, believe it or not, the House of Representatives has come up with some constructive legislation too—

We have passed and sent to the Senate a good tax reform measure; we have started the wheels rolling toward election reform; we have passed legislation aimed at equalizing the draft; we have produced a strong military preparedness bill, including the ABM, and my Assistant Secretary of Defense, health matters!

We have helped insure the safety of the Nation's coal miners by enacting the Coal Mine Safety Act; we have passed the Housing and Urban Development Act of 1969 (against my vote, I might add), and we have passed the air transportation bill.

There is much more to be accomplished in the 91st Congress. Legislation yet to be enacted, but now on the drawing boards include:

Postal reform; farm legislation; sex-oriented mail; and amendments to the Social Security Act.

As of now we have so far held off on authorizing any legislation for poverty and foreign aid!

There is much to be done, but in the words of John Randolph, the principles of free government in this country have more to fear from over legislation—than from any other cause.

A few years ago, I got tired of trying to make sense out of all the double talk that was going on, and I coined the phrase "credibility gap," before the Southern States Industrial Council—in two words I said "a mouthful"!

Today, I'm going to be even more efficient with my words—

If you take the "cr" out of credibility gap you'll have the topic of my speech. I want to say a few words about the "edibility gap."

And whether these two words are also a mouthful, depends on whether the Federal health officials still give a "politician," the option to eat his own words if somebody thinks they're unhealthy.

This audience knows better than anyone (that I can think of), what I mean about edibility gap. I'm talking about food additive safety. I'm talking about cyclamates and monosodium glutamate—unpronounceable technical terms a year ago, but household words today. I'm talking about salt and sugar and caffeine and modified starches and saccharin—and anything else that man decides is fitting to stuff rats with. Food supplements, drug additives, insecticides, the Delaney amendment and its need for changes. In short, edibility and your responsibility.

I don't like to eat my own words, or anything else that might be unhealthy. But, as Chairman Dunning's introduction pointed out, I'm from Missouri. And you all know what that means. You'll have to show me! I'm also a family physician, a hillbilly surgeon, and called the "Ridge-Runner Doc," so I know a little about what is healthy and what is not healthy. Old enuff to lived through the cholesterol scare three times!

Being from Missouri and being a medical doctor, I don't take kindly to anybody trying to scare me into protecting my health, or the health of my constituents. I want the facts first. Then I'll listen. And if I have to act to protect the public's health, I'll act quickly!

Nowadays, it has become fashionable to mix fact-finding with fact-telling.

The fact that the press reports the fact that someone is trying to prove something, leads to the fact that the public gets concerned. This leads to the fact that industry, government agencies, and Congress get concerned. And, more often than not, this leads to the fact that the world becomes concerned. (Shades of silent springs!)

But, everybody has a fact tolerance—you give people too many facts and they get confused. And that's the point. We've got to do a lot more fact-finding and a lot less fact-telling.

The Federal Government can't always do this! The last administration came to us with a bill to raise the debt limit and at the same time awarded a significant grant to the University of California to study comic strips to promote our understanding of them.

If we need Federal aid to understand comic strips, we can never hope to understand the effects of ingesting cyclamates and monosodium glutamate, or the use of L-dopa, as it's called, for limited and experimental prescription of Parkinson's disease.

As you are very much aware, the Secretary of Health, Education, and Welfare ordered food and drug manufacturers to cease using cyclamates, due to tests in which a large dosage of a cyclamate mixture resulted in findings of cancer in several rat bladders.

Also, very much in the news lately, are some controversial tests with MSG and baby mice. Injections of high dosage of MSG were reported to have resulted in brain damage to baby mice.

A young lady acquaintance of one of my staff members called a regional office of a Federal Government agency. As a consumer who likes gravy and can afford to eat it, she asked a Federal functionary to explain what the problem was, with "MSG." He answered that MSG was found to have caused cancer in baby mice when given in doses ten times as great as a human baby would normally receive. Shades of passe mother's milk and cute efficient filtering processes.

He has gotten his mice and his rats and his cyclamates and MSG confused. Worse, he had spread his confusion. Maybe you can't

blame him, with all of the facts about food safety that are being thrown around these days. But this is how the "edibility gap" widens and confidence in industry and government breaks down.

Let's look at history for a minute—Surtoyona—

The first recorded case of concern over food safety involved a gentleman named Adam who took a bite out of an apple. We may presume that the apple contained no pesticide residue. But ever since that bite, man has been emotionally and economically concerned with food purity, and other problems!

Food, like the air we breathe, is a necessity. But unlike the air, food became a medium of commercial exchange. The simple trading of agricultural crops, evolved into a primitive network involving "specialists" who could take foods from producers and get them to consumers in pretty and efficient packages—for a profit.

Students of the Middle Ages know that the slightest suspicion of food adulteration by a merchant of those times resulted in his meeting with some of the cruelest punishment, then conceived by man.

Historically, one of the first and most certain methods of testing food safety was strictly empirical. If some one died or got sick from eating a particular food, the people in his community, stopped eating that food. This was a rather hit-and-miss method that used human beings as test animals. You all recall the kings "tester", as well as jester!

Some of you will recall that in the early 1900's scientists got very interested in feeding food to animals to trace its effect on the body. One of the major discoveries arising out of these comparative anatomy experiments was identification of vitamins. One of the major effects of these efforts was a public interest in nutrition and food purity.

Naturally, Congress became involved. In 1906 it passed the predecessor of today's Food, Drug and Cosmetic Act. This act contained a strong provision on food adulteration.

Meanwhile, great technological feats were being performed by private industry, competition and the open market place of risk, service and investment!

Enterprising businessmen realized the value of offering food that was consistently good. They produced more and more packaged goods. They increased their quality control. They used more food additives and supplements. They built up consumer confidence, and brand loyalty. But they also raised questions in consumers' minds—how was all this magic being done? Are these new foods safe?

Again, congress responded! In 1938, the Food and Drug Act was completely revitalized. Authority was given to the food and drug administration to issue definitions and standards of identity for foods, to assure that they met proper scientific criteria. Food additives were recognized as beneficial, if used properly.

In 1956 Congress passed the Food Additives Amendment to the Food and Drug Act, it resulted in a detailed system for recognizing as safe some additives that were presently being used, and for Federal approval of other additives before they were used in foods.

The 1958 amendment recognized the growing public concern over "food additive" safety. It also recognized another great concern of that time, as now—cancer—one of the four horsemen of human disorder, of unknown etiology but all the more universally feared by people!

A clause was inserted into the amendment that, among other things, directed the Secretary of Health, Education, and Welfare to disapprove as unsafe, any food additive on which the permarket tests showed that it caused or was presumed to abet cancer in man, or animal.

Note the steady encroachment of centralized government—at least as a third party intervenor.

Now your president, George Koch tells me that ever since Grocers Manufacturers of America was incorporated in 1910 (the great year of my birth), one of its corporate articles has been, and I quote: "To preserve a high standard of purity of the articles dealt in, by its members."

Extensive industry testing of foods and particularly food additives has been the actual practice for many years. Cyclamates is a case in point. I'm told by experts that more safety tests have been run on cyclamates than on any other additive. A couple of weeks ago, one of these tests—done for a GMA member—resulted in a finding of bladder cancer in several of the hundreds of rats used in the two year study. I'm an expert on rats, famous for being against the Federal Government's "War on Rats."

These few, I am told, were among rats fed extremely high doses of a cyclamate mixture for their entire lives. Upon verifying the results, the company involved (in which I proudly profess to own a few shares over twenty years), immediately reported the findings to the Food and Drug Administration. The probable effects of acting responsibly and reporting these findings were well known to the company—even though they knew that the tests bore no reasonable relation to the amount of cyclamates a human being could ever consume. The tests had resulted in a cancer findings.

You all know what happened.

Public announcement of this action caused shudders in the food industry, and panic among diabetics. Physicians in my district are writing for my advice—what should they tell their patients, how are their patients going to be protected? If, as the FDA says, some cyclamate products will be available for use under a physician's direction, does this mean that prescriptions will have to be issued for the products? And will the products have to be sold by a pharmacist?

Even though the FDA says that it will allow some cyclamate products to be sold as drugs, some additional and very disturbing questions come to my mind: Will the costs be boosted so high that diabetics, and people suffering from obesity won't be able to afford them? Will the market become so small that you people sitting in this audience won't be able to economically and profitably produce them?

No one has answers to these questions yet. The situation and those affected by it are in a state of confusion. Many Monday morning quarterbacks, nervous Nellies, Harbingers of Doom, have found this time of confusion a ripe one for publicizing their own pet theories about the safety or lack of safety of other food additives. In politics we call it demagoguery, to use the nicest term, and it is not foreign, I might add.

Secretary Finch, in ordering cyclamates off the market, stated, and I quote "my decision to remove cyclamates from the list of approved substances in no sense should be interpreted as a 'lifesaving' or emergency measure."

The Secretary also stated that there was no evidence that cyclamate could cause cancer in human beings. But if there were any showing of cancer in tests on the substance, he said, the law required him to prohibit its use.

Perhaps this is the time for Congress to take another look at a law which allows anyone to perform any test—no matter what base or how relevant it is—that could result in depriving consumers of a product, that might be perfectly safe or essential in certain circumstances. Perhaps we should ask the national academy of sciences to give us their opinion of the scientific validity of this law!?? The new attorney general? The expected counsel for the Congress, if we reorganize?

We have also seen a great deal of publicity about MSG lately. Monosodium glutamate has been used, they tell me, since the Ming dynasty. It is a natural ingredient in most proteins, and the human body itself produces it as part of the digestion process. In fact, if you want to get technical, MSG is derived from glutmatic acid, one of the amino acids that are the building blocks of protein. Are we to bar the south Vietnamese Nom Hoa from U.S. citizens overseas?

All of the fuss about MSG started when a psychiatrist injected massive doses of MSG into baby mice and later found evidence of brain damage. Many experts challenged these results on the basis of their being founded on injection, rather than oral feeding, and because of the absence of certain controls thought necessary for a toxicological study.

Now, I can leave these almost jurisdictional arguments to the toxicologists and psychiatrists, but what bothers me most about these studies was the way they were publicized. On the basis of his studies, the researcher publicly questioned the safety to unborn babies, whose mothers ate foods containing MSG. Further, he replied to criticism of his studies by saying that the burden was not on him to establish their relevancy to human safety. Those who advocate the use of MSG had the burden of proving his studies without relevance, he said. (Shades of thalidomide!) Fright survives, and happiness retreats before the muse!

As a man of science, this disturbs me! It is one thing to do inventive basic research. It is entirely another thing to pose, publicly inventive and alarming questions based on this research, then shift the responsibility for carrying the tests to their logical conclusions.

It's sort of like a man yelling "fire!" in a crowded movie theatre, but depending on everybody else to make sure way for him, before they run out. If he's seen a flame, I'd like to know about it, but I'd also feel a lot better running toward that exit if I were sure he knew what a flame looked like.

As a matter of fact, the whole food additive question must seem like that movie house to the average housewife. A man in the front row yells "fire!" and the usher yells back, "I don't see any fire!" But you know that housewife is going to leave the theatre— either because she doesn't want to take even the slightest chance;—or if a rare serene type, just because she can't enjoy the picture, with all that crazy yelling going on. And you, my good audience, own the theatre!

I thank you for your attention, and I appreciate the opportunity to appear before you today. I encourage you to involve yourselves in the mechanics of good government. If not as an organization, then as a responsible individual citizen. Call on your Congressman, write letters to your Congressman, make your views known, testify before your congressional committees—you have a George that will do it for you and not to you! This is the essence of good representative Government in a Republic. Remember, in this Republic, even the votes of the vicious and the stupid count! But under any other system they might be running the whole show.

WINNING PUBLIC SUPPORT

HON. JAMES A. McCLURE

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. McCLURE. Mr. Speaker, on December 5, I had the pleasure of attending

the 60th Western Forestry Conference in Spokane, Wash. It was my good fortune to be present for an address by Mr. Ernest J. Hodges, president of the American Forestry Institute. I was particularly impressed with his description of the ways in which foresters are helping to maintain our environment. In these days when our concerns are focused on the quality of our environment it is refreshing to see the positive contributions of an industry pointed out as Mr. Hodges has done.

When many point their fingers in wrath at the forest industry for the conditions which accompany logging operations, I am glad to see someone so justifiably point out that trees absorb the carbon dioxide fouling our air and replace it with oxygen, forests protect our waters and provide a place of quiet beauty to soothe harried souls.

The entire speech is thoughtful and challenging and I include it in the RECORD at this point:

WINNING PUBLIC SUPPORT

In these meetings you have spent time on subjects of great importance to us all. The care with which you have been looking at the problems of forest utilization, yield and management should be encouraging to thoughtful men in our industry.

I am also encouraged at the theme of our discussion today. You have put a 60-year frame of reference of these events. You have shown by this that you are thinking far ahead as you must.

My subject this morning is: Winning Public Support.

I am sure you will be relieved to hear that I think we have nothing very much to worry about in that—especially if we use our 60-year time span.

Winning public support is easy. That is, under proper circumstances, winning public support is easy. As in growing trees, there are certain steps which must be taken if we want to be successful. If we try shortcuts, or neglect our homework or look for lazy ways, we will probably not succeed. Just as in silviculture. You men are wise in the ways of nature and you know your jobs very well. You know that nature can be capricious, nature won't be rushed and yet can be built upon if properly approached.

On the other hand, people are part of nature, too. We speak of "human nature"—usually meaning that man has certain built-in characteristics, which are not always noble, not always wise—so we say "it's human nature" when he is fractious. However, people can be nourished and cultivated and brought along, so today let's take a look together at this process.

In my trade of communications we have a jargon, certain trade terms that are understood within the working group. Words such as motivational, attitudinal, opinions, publics and so on. We do campaigns to reach thought leaders or, as some call them, "influentials." We break our media and other means of reaching people down into their parts just as we segment the broad mass of the public itself into parts. That is our vocabulary, just as you have your vocabulary. So this morning, let me borrow from your vocabulary a little as we discuss winning public support.

As I said earlier, winning public support is easy. But step one of winning public support is tough—step one is gaining their attention. That is the slow, very tough part.

It is tough to gain the attention of the public. We will explore that in greater detail in a moment—because step one in winning public support should be taken only after a lot of preparation. Note, I am beginning tc borrow from your vocabulary. Preparation—Just as in growing trees, there are certain procedures which must be logically and patiently followed.

First is research. It's such an obvious thing that we should have "people research laboratories," just as we research tree species, site preparation, genetics, soil conditions, rainfall and bugs—and yet it is often overlooked. These kinds of opinion research and attitude evaluation cost no more than any other research we routinely do. But I am sure you will agree with me that it requires a certain amount of discipline not to have instant attitudes about what people think and will be interested in. I am sure you will agree that we often have to change our minds when "nature's humans" don't react as we want them to.

So, in my trade, as in yours, we must do the site inspections, determine the soil conditions, plan our approaches. We have to determine what kind of seed will have the chance for survival.

We all know that people are bound up—each of us with our own bundle of prejudices. Some are so full of this that they will prejudge us without opening their minds at all. They are seemingly impervious to any fact which might cause them to change their emotional position. So when we are doing our research, analyzing our mental sites, we must find out as well as we can, which groups can be made to listen to us without prejudging or, at least without their prejudices blocking our attempts entirely and then we must get their attention.

Some groups judge us in Emerson's terms. You recall the quote, I am sure:

"What you are stands over you . . . and thunders so that I cannot hear what you say to the contrary."

There are groups, or publics, who feel that way about our industry. They have an image of us that prevents them from hearing us. And therein lies a great irony. It is enormously ironic that our industry has a reputation for doing exactly the opposite of what we are doing. Why? You must ask yourselves that question.

But it is ironic, indeed, that large groups of people—fortunately not all the people—think that we plunder, we rape, we despoil and we leave an ecological barren stripped of trees, devoid of plant life, empty of game and the song of birds. Some even foolishly believe that the soil is left lifeless, never to produce growth again.

This is the mistaken image which "thunders" at people when we try to reach them with the true story of resource management, of wildlife conservation, of the renewal and restoration we practice.

Gentlemen, our image is that of the "spoilers," even "plunderers," yet, in modern times, we should be known as the "growers" and even "conservers."

And that is what winning public support is all about.

But let's get back to how this can be changed, how public support can be won.

We do our research, our homework. We make our plans and decide where we can hope to get relatively unprejudiced reception. We decide what seeds to try to plant and what tools we shall need. It is surely educational material of all sorts, it will include editorial material and advertising. None of these tools cost any more used in selling ideas than they do in selling a product. Accomplishing it may be a little harder—the advertising may have to be a little better and we may have to use more of it—for longer periods—because changing a mind, altering an emotional position, is somewhat harder than making someone want and buy a piece of beautiful plywood panelling. But it can be done. (Unless we do the first we might not be able to do the latter.)

So you have located your site for growth, you have done your studying and you plant your seeds. You don't wait for them to fully germinate, because fertilizer should be applied promptly in the form of reinforcement of the ideas you have planted. This may take the form of television and radio and movies, but again, this costs no more than it does to use the same tools, the same media, to sell lumber.

Now as ideas sprout, you continue the nourishment, you prune and thin, practice mensuration, and refine your methods. You take the time, have the patience to let them mature and succeed.

Success!

You have won public support. As I said earlier, it is easy if we take all the right steps and the time to do the job properly.

Is now the time to try to do this?

Yes, for it is already late. We may be overwhelmed by more attention than we expect Before we are, we should ask—

Have we done a good job?

Do we have the right kinds of seeds to plant, can we tell a good story?

You bet your sweet bippy, we can. Brand X doesn't have the story we do. In fact, we can make claims no other brand can make.

For example:

Automobiles foul the air and the auto industry has "consented" that it tried to avoid the day they had to do something about this.

But our trees absorb carbon dioxide and replace it with fresh, pure oxygen.

Some industries stain the water used in manufacturing but in the meantime, our forests protect watersheds and regenerate pure, clean streams.

Billboard industries create ugliness, you create beauty.

The aircraft industry creates noise, our forests muffle and absorb sound.

The mineral industries can only extract but you replace. You replace not only with a better crop but with the fish and the fowl and the beasts so beloved of those wildlife lovers who should be supporting us with all of their passionate vigor. Another irony.

You see, we have what Rosser Reeves, a well-known advertising man, called The Unique Selling Proposition. We have something different and something better to sell than others do. As I said before, it is toweringly ironic that our benefits are not seized upon and trumpeted for us. But that is not the nature of things when human beings are involved.

Here I must be critical. The irony is that while we are deserving of much praise, we have failed in one important aspect in trying to plant seeds in the minds of the public. We have committed the cardinal sin in the field of communications, and in agriculture as well. We have tried to plant the wrong seeds. We have tried to tell the public only about what interested us—jobs, economics, input to gross national product and the abstracts of how much they need us to supply them with growth and materials. We have sounded self-serving and we have come over to them as proprietary.

"It's ours and we know best," has been heard.

As a result, we got little attention and a low quotient of belief.

All the public seems to know about us is that we "leave holes in the sky," and barren earth below. The fact of regrowth has not been offered to the public minds in terms they care about or even notice or believe.

When we think in terms of gaining the first attention of the public we must think about what a tough job that is to do. And it is even tougher to keep their attention, to let an idea fully take root.

An example we might ponder. After the excitement and pride and curiosity of watching the first man take the first step on the moon, how many of us would have dared to predict that the second time would not be very interesting to the public. But that is the fact—and after all that preparation and the

millions of miles in silent space, Commander what's his name, may best be known to history for accidentally pointing that TV camera at the sun. The public can indeed be fickle. But it can be won, public support can be gained.

We in the forest industries must not fail in our attempts to win public support because of impatience. That is why your time-frame of 60 years is important. It will not take 60 years to win public support but it will not be lastingly done in one year. We make tremendous investments in a long-term crop which requires calm confidence. If we just as calmly set about the long-term job of assuring public support, we shall succeed.

But let us all remember that image I spoke of. That was a long time building and it will take time to change it. We shouldn't join the angry, the impatient, the ones who want instant love and immediate acceptance.

As we think of studying our problem and the publics who in their segments make up the general public, we must keep that time span and patience in mind.

For an example. How about this public segment. If we think in terms of instant acceptance, this is one we might well ponder. I will read a quote from someone whe describes it pretty well:

"There are persons who constantly clamor. They complain of oppression, speculation, pernicious influence of wealth. They cry out loudly against all banks and corporations and the means by which small capitalists become united in order to produce important and beneficial results. They carry on mad hostility against all institutions. They would choke all the fountains of industry and dry all streams."

You see, we have some making up to do, for that quote was voiced 131 years ago on the floor of the United States Senate by Daniel Webster. That is a clue to how long business itself has been suspect to a portion of the public. There are a few who will damn us just because we are business.

But there may also be another factor in our favor despite our business role.

That is the current concern for environment which is sweeping like a wildfire across this country. I know you are seeing this, too—but from my vantage point I can see it spreading and becoming a crown fire. It is gathering speed and power at a nearly unbelievable rate.

Curiously this is encouraging to me—even a cause for confidence. It means that winning public support may be easier—if we do our job, as a responsible industry. When people are genuinely concerned about something they are much more likely to pay attention. So that may make an important part of our job easier—or harder, depending on how we go about it.

If we do not convince the public that we have a sincere concern for the environment and are doing something about it, they will go right on perpetuating the ironies of which I spoke earlier. They will mistake our role entirely, as some already have. They will make false assumptions. They will be easy converts to the myth that we leave holes in the sky and nothing useful or beautiful below. As an industry we cannot long survive on those terms. This country no longer has patience for such.

Gentlemen—we need not let this happen. We *can* win public support because we can demonstrate that we do care. We can gain attention and harvest lasting, meaningful support, but there are no short-cuts—there is no natural generation here for *we* are the seed trees. There are none yet on the site and re-generation will come later if we do our planting well now.

Have we the will? Can we come together—north and east—west and south? Can we come together regardless of the species of our particular interests? Can we come together to plan the plans, to take the time, to do the work required in winning public support? Can we stay together to re-seed, to perpetuate the growth of good will we gain?

Gentlemen—those are the questions for you to answer—for I cannot.

If you have the will to do these things, the American Forest Institute is dedicated to helping. But you are the keepers of the future of our industry—AFI can only support you. You must make the promises—we can only help you keep them.

Thank you.

NEBRASKA WOMAN'S THERAPY HELPS NEEDY IN WORLD

HON. GLENN CUNNINGHAM

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. CUNNINGHAM. Mr. Speaker, at this time of the year it is refreshing to learn of the many ways people are helpful to their fellow man.

A story in the December 4 issue of the Burt County Plaindealer tells of the efforts of an 88-year-old great-grandmother, Mrs. Julia Gilbert, of Tekamah, Nebr. For the past 12 years, Mrs. Gilbert has made a baby quilt each week for the interdenominational Church World Service relief drive. She does this as therapy to help ease her arthritis.

Mr. Speaker, would it not be wonderful if we had more people like Mrs. Gilbert? The article follows:

"IT'S THERAPY"—ARTHRITIS HELPS SEW 500 QUILTS

Mrs. Julia Gilbert doesn't claim to be Tekamah's champion quilt maker. In fact, she's quite modest about the 50 baby quilts she has completed during the last year for the interdenominational Church World Service's relief drive.

"It's therapy," the 88-year-old great-grandmother says. It helps ease my arthritis."

She turns out a three-foot-square baby quilt at the rate of about one each week. She pieces the quilt tops from scraps of cloth, then adds lining and a back to each one.

Whenever her arthritis starts to pain, Mrs. Gilbert said, she goes to her 50-year-old sewing machine for a session of "therapy." The exercise her fingers receive through handling of the articles helps to control the arthritis pain.

For many years her machine was a treadle type, operated by foot power. She finally consented several years ago to have the venerable sewing companion converted to electric power.

Mrs. Gilbert began quilting regularly when she was 76. During those past 12 years she has completed more than 500 quilts for tots. All have been distributed around the world through charitable organizations. No two quilts have been identical.

Church work is another activity which Mrs. Gilbert considers as therapy. She is the oldest—and one of the busiest—member of Tekamah's Baptist Church. She seldom misses a Circle or prayer meeting and she is a regular member of the church's adult Sunday school class.

At 88, Mrs. Gilbert has more energy than some women half her age. She concedes, however, that the arthritis in her knees has slowed her down somewhat.

She hasn't stopped, though. After her 88th birthday last month, and after she had delivered her year's production of quilts for overseas shipment, she began anew. So far she has already finished seven quilts for next year's drive.

THE INDIANAPOLIS NEWS—A CENTURY OF PUBLISHING HISTORY

HON. WILLIAM G. BRAY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. BRAY. Mr. Speaker, on December 6, 1969, the Indianapolis News marked 100 years of publishing. As Thomas Hardy wrote in his "The Newspaper Soliloquizes":

"Yes, yes; I am old. In me appears
The history of a hundred years.
Empires', kings', captives' births and deaths;
Strange faiths and fleeting shibboleths;
Tragedy, comedy, through my pages
Beyond all mummed on any stages;
Cold hearts beat hot, hot hearts beat cold,
And I beat on."

May the heart of the News beat on for another century. Following is the letter of congratulations from President Nixon to the publisher, Mr. Eugene C. Pulliam, and the lead editorial from the News on its 100th birthday:

THE WHITE HOUSE,
Washington, November 22, 1969.

Mr. EUGENE C. PULLIAM,
Publisher, the Indianapolis News,
Indianapolis, Ind.

DEAR GENE: As The Indianapolis News celebrates a century of service to its readers, I am proud to be among those who applaud its distinguished reputation.

Published on December 6, 1869, a day before its inception in order to cover a message delivered to the Congress by President Grant, this fine publication has continued to be a sensitive, responsive and faithful chronicler of current events. As it has grown, it has also extended its adherence to journalistic integrity and to the highest principles of the free press. And it has never lost sight of the responsibility that cherished freedom incurs.

On this auspicious milestone in its history, I want to applaud your unshakable tradition of sound, prompt, reliable reporting. Your staff and readers have my warm congratulations and my hope that your high ideals may accompany you across the threshold to of current events. As it has grown, it has

Sincerely,

RICHARD NIXON.

[From the Indianapolis News, Dec. 6, 1969]

THE NEXT 100

Today The News celebrates a century of publishing history—a century in which it has lived and grown with the burgeoning city of Indianapolis.

Dec. 7, 1869, was the scheduled publishing date of Vol. 1, No. 1, under youthful publisher John H. Holliday—although, with typical enterprise, Holliday actually came out with his first paper the previous day to give his readers a full report on a speech by President Ulysses S. Grant.

In the century which has elapsed since then, The News has expanded continually and changed its physical location to accommodate the requirements of growth. It has dealt with major happenings at the local, state, and national levels alike. The paper has lived through an era of enormous changes in America, and has attempted to portray these fully and accurately to its readers.

Amid this change, The News has tried to play a consistent role—of service to our state and community, and to the principles which undergird the American republic. It has taken its stand in behalf of liberty and limited power, integrity in the political process, the

rule of law and justice at all levels of government.

In attempting to serve these ends, we believe the freedom of the press is of the utmost importance and have tried to speak out forcefully in its behalf. The News has contended that the public can best be served by a press which is vigilant to maintain the fundamental values upon which America was founded. It has attempted to use these values as guidelines by which to judge the issues.

As freedom of the press is important for the well-being of the nation, so is a general regime of freedom essential to the liberty of the press. We have contended that all American freedoms depend upon the restraint of power and adherence to the rule of law. The free press and the free society are mutually interdependent.

Those have been the standards by which The News has been guided in the past. On the occasion of this centennial, we reaffirm our dedication to these standards, and trust that in the 100 years to come The News, our city, and the cause of freedom will all be able to flourish together.

SERVICEMAN IS HUMAN

HON. RICHARD L. ROUDEBUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. ROUDEBUSH. Mr. Speaker, Mr. James Neal, editor of the Noblesville Daily Ledger, has written a superb column about a marine veteran's experiences and views on Vietnam.

The television networks and liberal press in the East have chosen to all but ignore the hideous torture of American soldiers.

For some reason the liberal media seems to always choose the side of the story most derogatory to America, and most favorable to the Communist enemy.

More truth can be found in the daily newspapers of the Midwest than in any of the Eastern press which are little more than sounding boards for Hanoi propaganda.

Every Member of Congress should examine this account by a former marine. The article follows:

SERVICEMAN IS HUMAN

(By Jim Neal)

A Marine, wounded in action in Vietnam and now living in Noblesville, has come to the defense of GIs allegedly involved in a massacre of women and children at My Lai.

Martin A. Vincel, 21, now on the temporary disability, retired list, struck out at critics who, he says, "don't know what they are talking about."

"The serviceman is only human," he said. "We had orders to shoot if we saw anything. If anything moved, you shot it. You didn't ask who was there."

Vincel, who is currently unemployed because he is carrying shrapnel in both legs below the knees, claims the public only hears what the government wants them to hear.

"What gets me is all these people sit back and voice opinions and they don't know what they are talking about.

"I feel the public has been misinformed.

"I think it is right we are over there, but you can't win a war when you can't stop their supplies coming into South Vietnam.

"How can they pull out all these troops and let our guys die for nothing.

"South Vietnam won't be able to hold them back. They're not organized enough. We could never depend on them. If anything happened they ran."

Vincel was with the 3rd Marine Division. He enlisted from Ft. Lauderdale, Florida, after graduating from high school there. It was October of 1966.

He was on a search and destroy mission, platoon size, when he stepped on a booby trap and was wounded. The date was Jan. 18, 1968. He was treated at Guam for three weeks and finally was hospitalized in a Navy installation at Key West, Fla. He was only 19 when he was released on July 24, 1968.

Since then he has married a Noblesville girl, Sandra Shell, has a 5-months-old baby, and is currently seeking employment.

Getting a job is difficult because Vincel can't stand on his feet very long. He also claims that places are reluctant to hire him because they do not want to assume any responsibility for his disability. Although Richard Mallery, Hamilton County's Veteran Service Officer, points out that there is no responsibility, most employers are dubious anyway.

Vincel, whose mother is Ida Mae Blakley of Noblesville, was employed in Ft. Lauderdale briefly and later worked part time here at Warner Commercial Body Co.

"People stick up their noses when they hear I've been in Vietnam," he said.

"I never saw any massacre. If they shoot at you, you've got to shoot back. If they say don't shoot until they shoot at you, they're crazy.

"You don't know who to shoot at. They (Viet Cong) don't wear uniforms.

"The kids sell you cokes with poison in it. They throw grenades at you.

"Nobody likes to shoot a kid, but you learn when you first get over there you don't trust nobody.

"They call it booby trap heaven around Da Nang.

"If you've seen one village, you've seen 'em all.

"I've met a lot of villagers and talked to them. Some could speak English. The people don't want war, but they don't want to be ruled by the Communists either.

"They've been fighting for a long time to get freedom.

"All South Vietnam is doing is what we did in America. They want some help to get their independence.

"But they (war critics) are turning the American people against the serviceman. It's wrong. Without a military we aren't going to have a country.

"Sure, I saw some dead children. They were killed by mortar or artillery fire.

"I also saw this guy hanging up in a tree, skinned. He was a GI.

Vincel was a Corporal. He was a team leader, which means he had three men working under him. His unit received a Presidential citation and he received a Purple Heart. He didn't get a good Conduct ribbon. He hadn't been in service long enough.

COMMUNITY MENTAL HEALTH CENTERS

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. BOLAND. Mr. Speaker, on December 16, the House passed significant new legislation—legislation that would extend for 3 more years the program of matching grants for construction and staffing of community mental health centers. The bill, still further, would extend for an equal period of time the matching grants program for specialized services in the treatment of alcoholism and narcotics addiction.

The need for such legislation is plain—indeed, conspicuous. The bleak and forbidding State hospitals to which the mentally disturbed are routinely committed are simply not adequate. Startling reports—indeed, chilling reports—have indicated just how inadequate many State psychiatric institutions have become. In many cases, they offer little more than the most cursory custodial care and virtually no therapy. New community mental health centers—where psychiatric patients can receive treatment in their own communities, where early counseling will help prevent the kind of severe phychosis that demands hospitalization—are one of this country's most pressing needs.

Continued programs for the treatment of alcoholism and narcotics addiction would answer a need of equal urgency. Alcoholism—despite the spate of publicity about marihuana and LSD—remains the most alarming drug problem in the United States. And addiction to opiates—heroin, for example, or morphine—gives rise to about 40 to 50 percent of the violent crime rate in any major city despite the fact that narcotics addicts are far fewer in number than alcoholics.

The legislation will carry on one of the few successful Federal programs that offer hope to the mentally disturbed and to those addicted to drugs.

OFFICE OF ECONOMIC OPPORTUNITY

HON. EARL B. RUTH

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. RUTH. Mr. Speaker, as a cosponsor of the bill to continue the operation of programs by the Office of Economic Opportunity through June 30, 1971, it was with regret that I was forced to vote against the bill.

I joined in introducing the bill, H.R. 12321, on June 23, 1969. But the bill as reported out by the Committee on Education and Labor had little appearance to the original measure which still shows my name as a sponsor. I voted against the bill in committee and voted for recommittal in the House.

The circumstances that have forced me to oppose legislation which I cosponsored is really not so difficult to understand. The original purpose of H.R. 12321 was to give the agency's Director another 2 years to put its house in order. This bill, in fact, was only 14 lines in length.

On the other hand the bill sent by the committee to the full House covered 16 pages, added three new titles loaded with new programing, and increased the administration's budget request for the agency by about $300 million.

The agency Director, Donald Rumsfield, had committed himself to a more orderly and efficient operation of the program, tightened administration, a more rational allocation of resources, and a general improvement of the program.

This is a worthy endeavor on his part. But when the Nixon administration states it needs lower funds to operate the agency it just does not make sense for Congress to add a whole host of new projects to clutter the function of an expensive operation. I simply could not vote for the new bill. It was no longer the bill I cosponsored.

A MOUNTAIN OF A MAN

HON. JOHN WOLD

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. WOLD. Mr. Speaker, the very nature of our civilization seems to carry the seed for the destruction of traits that make man human. Our vast cities and densely crowded ghettos mitigate against the development of independence and self-sufficiency in our children. But these are still character habits that are just as necessary as ever.

In my district, the great State of Wyoming, we like to think people take on the rugged characteristics of our magnificent mountains. Honesty is the rule rather than the exception. Self-sufficiency and independence are traits imposed on us by the elements which still make the efforts of man seem puny.

We are proud of our State and, although wanting it developed, we hope to keep it relatively unsullied by the hand of man. We also want to share its bounties with other Americans. We hope their visit will give them a sense of the elemental forces of nature.

This week Life magazine carried a story about a fellow Wyomingite, Paul Petzoldt, of Lander, who even there is a "mountain of a man." He is an iconoclastic, rugged individual dedicated to preserving the beauties of nature and to teaching Americans to enjoy the wilderness without the trappings of our mechanize dcivilization. "Our students hunger for reality," Petzoldt told the Life interviewer.

They can find it with Paul Petzoldt in the mountains of Wyoming at the National Outdoor Leadership School which he operates in conjunction with the University of Wyoming and Kansas State Teachers College.

I recommend that my colleagues take the time to watch the first "Aloca Hour" special of the 1970 television series during the week of January 18. It will feature Paul Petzoldt and the National Outdoor Leadership School.

Our civilization is so complex we tend to lose sight of reality even though its harshness and beauty surround us every moment. Paul Petzoldt encourages Americans to sample the reality of nature and from that experience gain new inspiration for our more mundane lives.

THE LEFT AND THE MORATORIUM

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. ASHBROOK. Mr. Speaker, in the CONGRESSIONAL RECORD of October 16, I inserted extensive remarks on the "fall offensive," the program that brought thousands of protesters to Washington in October and November and which involved four organizations: The Vietnam Moratorium Committee, the Student Mobilization Committee, the New Mobilization Committee, and the SDS. The purpose of the fall offensive was to pressure the administration into an immediate, unilateral withdrawl of American troops from Vietnam regardless of the consequences to the security and safety of the people of South Vietnam. Although extensive treatment of the radical nature of the fall offensive appeared at various times in the CONGRESSIONAL RECORD, comparatively little appeared in the press concerning the involvement of extremist influences in the program. A notable exception was the comprehensive series of articles released by the Copley News Service on December 1 entitled "The Left and the Moratorium" which probed into the character and operations of the four organizations mentioned above.

The six-part series was authored by Francis J. McNamara, formerly staff director of the House Committee on Internal Security—until recently known as the House Committee on Un-American Activities—whose experience in the investigation of internal security matters extends over a period of 20 years. Through his intimate knowledge of the past performances of these radical groups and buttressed by a review of their literature and interviews with representatives of some of the groups, Mr. McNamara provides a valuable insight into a campaign which duped countless sincere Americans regarding its aims and radical motivation.

Since the fall offensive activities, the Student Mobilization Committee, the New Mobilization Committee, and the Vietnam Moratorium Committee have made public plans for future projects. In light of this, the Copley News Service and Mr. McNamara have rendered a valuable service in alerting the public to the true nature of these organizations. To help further in disseminating this information, I include the six-part series of the Copley News Service entitled "The Left and the Moratorium" by Francis J. McNamara at this point in the RECORD:

THE LEFT AND THE MORATORIUM

NATIONAL PERSPECTIVE I: MORATORIUM LEADERSHIP HAD COMMUNIST, NEW LEFT TINGE

(EDITOR'S NOTE.—On two occasions this fall, the Vietnam Moratorium signaled mass protests against U.S. involvement in Vietnam. In most instances, the moratorium movement sought what they termed "immediate withdrawal" of U.S. forces. Who was behind the organization of the moratorium? Most participants sincerely objected to the war and were non-Communists. But Francis J. McNamara, former staff director of the House Committee on Internal Security, has written six articles which disclose the extent to which New Left and Communist organizations were closely involved in coordinating planning for the Oct. 15 Moratorium Day and the demonstrations of Nov. 13 through Nov. 15. He shows how some moratorium leaders misrepresented the stated purposes of the moratorium, after leading antiwar "dove" figures had given their names to the cause.)

(By Francis J. McNamara)

WASHINGTON.—The nation's capital is quiet and orderly again. The rioting and violence have ended. The Nov. 13–15 anti-Vietnam demonstrations are history.

The American taxpayer will foot the bill for the damage to public property and the cost of the extra police, the National Guard and thousands of federal troops moved into Washington to preserve the peace.

He is comparatively lucky. Some Washington businessmen will pay twice—both taxes and immediate cash outlays to repair damage to their property.

Yet everything is as normal in Washington as it ever can appear to be in the capital.

But things have changed and in ways that can't be seen on the surface.

In mid-October, people all over the world heard that 500,000 Americans joined in a "moratorium" to oppose the U.S. military involvement in South Vietnam.

A month later, they heard reports that the largest "antiwar" demonstration in the history of the United States, staged for the same purpose, took place in Washington itself; that the American flag at the Department of Justice was pulled down and—if only briefly—replaced by the flag of the Viet Cong.

On the same day, Nov. 15, anti-U.S.-in-Vietnam demonstrations took place in many nations.

This was no coincidence. It was all carefully coordinated and, aided by the international Communist propaganda machine. The desire was to project to the world the image of "people" everywhere assembling to protest, often with violence, U.S. intrusion and war-making in Vietnam.

The United States has suffered a defeat as a result of this campaign. It's not only that Washington was damaged as a city, but that America was damaged as a nation, with all that that implies in today's world.

Who was responsible? As one might expect, many are blaming it all on the SDS Weathermen, the Yippies and a handful of other small revolutionary groups.

That is oversimplifying. They couldn't have done it by themselves. And even if their members alone were responsible for every single act of violence and destruction in Washington, it would be unfair to place all the blame on them for the real and important damage done—even though they desired it. They merely did "their thing" when handed the opportunity on a golden platter.

The Washington "peace" rally and the violence that followed it comprised the most successful Communist united front operation to take place in the United States in many years. It was the result of months of careful planning and cooperative effort on the part of four organizations engaged in what they termed the "Fall Offensive Against the War in Vietnam."

The four groups are the New Mobilization to End the War in Vietnam (New MOBE) and its co-working Student Mobilization Committee (Student MOBE), Vietnam Moratorium Committee (VMC) and Students for a Democratic Society (SDS).

The New Mobilization Committee, technically the sponsor of the Nov. 15 Washington demonstrations, made many statements that it decried violence and wanted only a peaceful, orderly demonstration. The Student Mobilization did the same thing. The Moratorium Committee has always taken that position. SDS also promised it would not "instigate" violence.

But all the while they were making these statements, these groups were collaborating in an operatioin that would almost surely end in violence—largely because certain of their leaders wanted it.

David Dellinger, long the top official of New "MOBE," is a Hanoi-Havana visitor and served as the national coordinator of MOBE's No. 15 Washington-San Francisco demonstrations. He made an inflammatory speech to more than 200,000 people at the Washington rally and then urged them to join in marching on the Department of Justice—where, as had been announced, an "attack" was to take place.

The power spots in New MOBE are saturated with Communists and Hanoi sympathizers. If either of these Communist capitals said, "No violence," there would have been none—at least not without a feud in MOBE that would have generated such heat the issue would have come to public attention. As it is, the contending (and cooperating) Moscow and Trotskyist Communists in the group had squabbled over lesser issues, such as program speakers.

By keeping the Oct. 15 moratorium peaceful to create the impression of belief in law and order, additional innocents were enticed into the climactic Nov. 15 action. Rioting and destruction in Washington itself following the huge rally would have far more worldwide propaganda value than the quiet fading away of a quarter of a million people.

The Nov. 15 demonstrations, climax of a three-day series of antiwar activities, were a Communist-engineered operation designed to serve the most important of today's Communist objectives—an immediate, unconditional pullout of U.S. forces from Vietnam so that Communists can take over the country.

In retrospect, the most important fact about the demonstrations was the revelation of a weakness in U.S. ability to deal effectively with internal Communist subversion.

The plans for the Nov. 15 and earlier related demonstrations have been a matter of public record for almost five months. There has been no secret about the organizations involved, their nature, objectives, leadership and past records. Yet there was no revelation of Communist involvement until the time of the Oct. 15 moratorium when a few senators and representatives presented facts which indicated that Communists were deeply entrenched in the Fall Offensive.

Even then these facts went largely unreported.

But the October and November demonstrations became two of the most widely reported events of the year. Yet in few accounts did the word "Communist" appear.

Antiwar and anti-draft demonstrations, on a smaller scale, took place four years ago. President Johnson publicly expressed concern at the time that well-meaning Americans might have been the victims of Communist exploitation.

He gave full support to a Department of Justice investigation to determine the role of Communists in the demonstrations.

The results of the investigation were never made public.

After MOBE's October, 1967, assault on the Pentagon, House Democratic floor leader Carl Albert said the marchers included "every Communist and Communist sympathizer who was able to make the trip." He also charged that the demonstration had been "basically organized by international communism."

Republican floor leader Gerald Ford then revealed that at a White House meeting President Johnson had read to him and other Republican leaders a secret report revealing that the demonstration was organized by international communism. He asked that the report be made public.

Attorney General Ramsey Clark visited Ford and said the report could not be revealed without compromising sources of information and creating a new wave of "McCarthyism." This claim was also made by Secretary of State Dean Rusk.

Ford argued that the American people were mature enough to receive such information without reacting hysterically.

He got nowhere. The report was not released.

The results of suppressing the truth about the Pentagon demonstration were seen in November. Thousands upon thousands of idealistic, well-meaning young Americans turned out to support another operation by the same outfit—an operation designed to injure the United States and help its enemies, who are also enemies of all that the overwhelming majority of the demonstrating youngsters believed in. Thousands of adults were similarly misled.

The files of the Federal Bureau of Investigation, Central Intelligence Agency, congressional committees and local police departments bulge with information about Communist involvement in the Nov. 15 and related demonstrations.

Compromising sources of information is a minor problem in this case—there's much that can be revealed without injury to any intelligence operation.

It would have been different if Sens. Eugene McCarthy, George McGovern and Charles Goodell had organized a rally of true dissenters, making it clear that they vehemently opposed, and also would condemn, the Communist Viet Cong revolution in South Vietnam and North Vietnam's aggression against the south.

But instead of this, the senators gave their indorsement and support to a demonstration which was corrupted with communism.

Just how deeply the radical left and Communists were involved, however divided they may be on various issues, can be documented?

NATIONAL PERSPECTIVE II: MORATORIUM BACKERS PROVE CONTRADICTORY AS TO MOTIVES

WASHINGTON—Millions of words have been spoken and written about the Vietnam Moratorium.

It has been the subject of television network specials, numerous editorials and columns and extended straight news coverage.

The first phase came on Oct. 15. Many people again stopped "business as usual" Nov. 13–15 to demonstrate against the war. And David Hawk, one of the four initiators of the sponsoring Vietnam Moratorium Committee (VMC), also told this writer that it is a "safe assumption" there'll be still another moratorium in December.

The Vietnam Moratorium Committee's original announced plan was to hold a moratorium every month that the war continues, extending it by one day each month. Then, if the war does not end by May, 1972, it would call for a complete shutdown of America. No one would do anything but protest the war, day in and day out, until every last American was pulled out of Vietnam.

This, of course, will never happen—and the VMC knows it.

Meanwhile, argument continued for weeks about the statements of the President and vice president on the original Oct. 15 moratorium. There was hot debate about whether it was good or bad, right or wrong, supportable or insupportable. And despite all the words, most people did not have the facts they need to make an informed judgment on the issue.

No one would be in a position to form an intelligent opinion about the Green Bay Packers, for instance, if he looked at the football team in isolation. You have to know something about the game, and the competition.

So it is with the Vietnam Moratorium Committee. The purpose of this series is to give some background information about the VMC, the game it is playing, other teams in its league, and key personalities who might be compared to football stars and coaches.

What Was Moratorium Day For?

A basic issue is the purpose and aim of the VMC and its moratoriums. There's been a lot of confusion about this. To help clarify it, Rep. John Anderson, R-Ill., called David Mixner, another of the initiators and directors of the Moratorium Committee, to get a clear statement of its objective.

Anderson wanted this statement because congressional supporters of the Oct. 15 moratorium had announced their intention of keeping the House of Representatives in session through the night of Oct. 14 in honor of the observance. The great majority of members opposed, and eventually defeated, this move.

Congressman Anderson taped Mixner's answer to his question so that he could quote it with complete accuracy on the floor of the House. This is what Mixner told him: "We want out now, and this is not contingent on anything that Hanoi or the Viet Cong might do."

Has VMC told the public this is its aim? Let's look at the record.

One of its first organizing efforts was a letter addressed to interns working for the government in Washington last summer. The letter said Moratorium Day in October would be held so people could spend the day working "to end the war."

Later, there was a "Student Call For A Vietnam Moratorium" sent to campuses throughout the nation.

The moratorium, it said, was for "taking the issue of peace in Vietnam to the larger community." (In any early mailing of this call, VMC said about 200 student leaders had signed; in later mailings "about 500.")

A Faculty Call, mailed later, said the moratorium was to "further build sentiments for peace" and to express "opposition to the prolongation of the war." Over 60 professors were listed as signing this call. According to VMC, this was only a partial listing of those who had indorsed it.

A moratorium organizing memo, mailed in September, said that participation in the moratorium is "a commitment to intense work and to peace." Another release, "The Vietnam Moratorium," said the moratorium "is an effort to maximize public pressure to end the war."

Then there were three full-page newspaper ads. The first ad said:

"What we are working toward, ultimately, is the largest and broadest antiwar movement ever seen in the United States."

The same statement of purpose was contained in the third ad. The only difference was that the word "ultimately" was left out.

The second ad proclaimed that on Oct. 15 students and faculty would leave classes to talk about "the madness of Vietnam." The big eyecatcher, however, was this large, bold-type legend, "We Support October 15." Under it were listed the names of four senators—Charles Goodell, Mark Hatfield, Eugene McCarthy and George McGovern—followed by the names of 11 other persons of varied prominence. A brief statement by each one appeared under the name. At the bottom of the ad in small print readers were asked to work on Oct. 15 "for an early withdrawal of all our troops from Vietnam."

These ads were reproduced as VMC posters and distributed throughout the country.

A lettersize fold-over brochure prepared for Oct. 15 was the cheapest and therefore probably the most widely distributed VMC promotional item for M-Day.

It included the statement of purpose quoted above from the first ad. It also said:

"The Vietnam Moratorium Committee is an ad hoc group formed solely for the purpose of stimulating and supporting broad-based public action against the war in Vietnam," Note that word, "solely."

Sam Brown, VMC's chief spokesman, was interviewed on "Face the Nation" on Oct. 12, just three days before the first Moratorium Day. Facing a nationwide audience, he made conflicting statements about its purpose. First he said it was "immediate withdrawal," and claimed several times that VMC had "consistently" said this. Later in the program he changed it to withdrawal "as rapidly as it is possible to do so." In answering a subsequent charge that VMC's aim was "vaguely stated," Brown again changed position and said withdrawal "no later than Dec. 1 of next year, and that is not immediate."

Yet the very next day Mixner told Congressman Anderson that the aim was immediate and unconditional pullout. Moreover, VMC has been claiming ever since then that that is and has been its purpose. It is no wonder that even after Anderson quoted Mixner on VMC's aim, other congressmen who supported the moratorium rose to speak for it and made incorrect statements about its purpose.

There was much deceit, in the way VMC promoted its October Moratorium. The VMC wants this country to cut and run from Vietnam—no ifs, ands, or buts about it, and no matter what the consequences. Yet prior to Oct. 15, it never came out and stated this bluntly in appealing to the public to support its activities and donate money.

Hundreds of thousands turned out on the Oct. 15 Moratorium Day in response to the VMC's broad and generalized appeals for "peace in Vietnam," "ending the war" and an "early withdrawal" of U.S. forces.

But how many would have responded if the VMC had honestly stated that Moratorium Day's purpose was to have this country's forces pulled out of Vietnam instantly and unconditionally?

I called the offices of the four senators whose names appeared in the ad (Oct. 8) as Moratorium Day supporters. The same question was asked of each one: Does the senator support, or has he ever supported, an immediate, complete and unconditional pullout from Vietnam? In each case the answer was the same: "No."

Was the October Moratorium Day a success? It was and it wasn't. The successful aspect of it will be treated later.

VMC claimed that "millions" would observe the Oct. 15 Moratorium. Nothing like that happened. Most turnout estimates run to about 500,000, though VMC representatives have been reported as claiming over a million.

"We have not gone into the numbers game, you just can't tell," Hawk told this writer. He gave an example of what he meant, "A university closes for the day. Can you count all the students as supporters? There's a rally on campus and later one in the (nearby) city. Some students go to both. There's duplication."

Regardless of the numbers, however, M-Day was a failure because the great majority who turned out did not support VMC's position and were not converted to it by the day's events.

Ironically, it was the VMC-enlisted big name speakers who guaranteed the failure. They spoke, one after the other, against VMC's objective.

Former Supreme Court Justice Arthur Goldberg called for a "prompt and systematic withdrawal" of U.S. troops. Sen. Edward Kennedy, D-Mass., urged that all combat troops be withdrawn in a year and others by the end of 1972—a far cry from the VMC's demand.

Rev. Ralph Abernathy said that the only things to be discussed in Paris were "the safe exit of the Americans and political asylum for South Vietnamese who want it."

The VMC speakers list for M-Day contained the names of over 175 persons who were scheduled to address observances. It cautioned that "not all" had indorsed the moratorium. Thirteen senators, 35 congressmen and about a dozen persons formerly prominent in government appeared on the list. Few support the VMC position. Most are on record as opposing it—and these were the speakers who attracted the largest audiences.

The nature of many M-Day activities also refutes the claim of its organizers that the day was a roaring success. Numerous observances were completely religious in nature, with no policy content at all. In quite a few cases, the "observances" were gatherings of schoolchildren.

Undoubtedly a number of speakers urged immediate withdrawal. Herbert Marcuse, philosopher of today's advocates of violence, was a scheduled speaker; so were far-leftist writer I. F. Stone, five of the persons now being tried in Chicago for conspiring to incite riots during last year's Democratic Convention, and others with lengthy records of activity in behalf of Communist front organizations.

No doubt, too, 95 per cent of those who favor a complete and unconditional withdrawal turned out on Oct. 15. The 5 per cent who didn't just couldn't make it for some reason or other. But there's every reason to believe that many speakers and the great majority of those demonstrating on M-Day did not favor VMC's position. I asked Hawk for his estimate of how many of the demonstrators actually supported an immediate, unconditional pullout.

"I have no estimate," he said. "I guess the ad was right when it said a lot did not support it."

Hawk was certain, though, that much was accomplished.

But as you read the papers and hear the news each day, you realize a very important point: Hawk is wrong. The pull-outers are a small minority and there are still many points of view on what to do about Vietnam.

NATIONAL PERSPECTIVE III: FALL OFFENSIVE LINKS SOME VIETNAM WAR FOES, REDS

WASHINGTON.—The Vietnam Moratorium Committee (VMC) did not, alone and on its own, turn out hundreds of thousands of people on Moratorium Day, Oct. 15.

Nor did it do so when moratorium, phase II, rolled around in November, and thousands again turned out to protest the U.S. role in the war in Vietnam.

VMC has had a lot of help in its operations and, without this help, nothing like what was seen on Oct. 15—and on Nov. 13–15—would have taken place. Many organizations have not received the recognition due them for such success as has been attributed to VMC's operations.

What groups are these? They are the teams playing in the "Fall Offensive" league with VMC. These other teams are the New Mobilization Committee to End the War in Vietnam, the Student Mobilization Committee to End the War in Vietnam and the Students for a Democratic Society (SDS).

Just what is the Fall Offensive?

It is a series of escalating "actions," as their originators call them, against U.S. involvement in the Vietnam War. Its full name is "Fall Offensive Against the War in Vietnam." The objective of the offensive was to exert such massive and intense pressure on the Nixon administration that it would abandon all effort to assist South Vietnam; it would pull out completely and immediately.

Many persons taking part in the Fall Offensive, unfortunately, did not realize its ultimate aim.

The program, worked out by the four participating groups last summer, was as follows (including minor changes since agreed upon):

Sept. 24—New Mobilization Committee—Chicago Actions in support of the "Conspiracy 8," tried for conspiring to incite the riots during the 1968 Democratic Convention.

Oct. 8–11—SDS—"Bring the War Home" Actions in Chicago.

Oct. 15—Vietnam Moratorium Committee—Moratorium Day.

Oct. 25—New Mobilization Committee—Chicago Actions in support of the "Conspiracy 8."

Nov. 8–15—SDS, —Joe Hill Caucus—Week of local activity to promote Nov. 15 actions.

Nov. 13–14—Vietnam Moratorium Committee—Moratorium Days.

Nov. 13–14—New Mobilization Committee—March Against Death; Washington, D.C.

Nov. 14—Student Mobilization Committee—National Student Strike.

Nov. 15—New Mobilization Committee—Mass Marches and Rallies, Washington and San Francisco.

The Fall Offensive "actions" are not limited to the U.S.—Moratorium Day, Oct. 15, was observed in several places overseas, almost exclusively by U.S. citizens. For that reason, the demonstrations were few and small. But Nov. 15, the climax of the offensive, was different. Communist and radical groups in foreign countries were utilized and demonstrations were held in Paris and the French provinces, Italy, West Germany, Holland, Belgium, Norway, Sweden, Denmark, England, Australia, New Zealand and Chile.

The U.S. organizers of the Fall Offensive did not plan and coordinate all these foreign operations themselves. They do not have the personnel, finances or resources. Outside help was given.

Some of the U.S. leaders of the Fall Offensive could tell you how, who, where and why.

But if you asked, they would profess ignorance or come up with an amazingly simple explanation, such as: "Oh, people all over the world are so incensed about what the United States is doing to the Vietnamese people that, when they heard about our offensive, they decided that they had to do something to help."

Many Communists, America haters, and Moscow, Peking, Castro, Hanoi and Viet Cong sympathizers took part in the Fall Offensive. But the first thing that should be said is that it is not claimed nor implied that VMC, the sponsor of Moratorium Day, is Communist.

But it is true that the Vietnam Moratorium Committee is working with Communists.

Many of the groups working with VMC in the Fall Offensive call themselves "peace" or "antiwar" organizations. They are neither. They are not pacifist. They are not antiwar as such. They have never condemned a Communist "war of national liberation."

But U.S. military efforts, direct or indirect, large or small, to help halt a Communist takeover or some non-Communist nation, immediately arouse their opposition.

Before discussing these groups, let's touch briefly on a bit of recent history. It will help us appreciate the full significance of the Fall Offensive and provide a framework for objective judgment of the Vietnam Moratorium Committee.

On Jan. 23, 1967, then Rep. Edwin E. Willis, who was the chairman of the House Committee on Un-American Activities, warned that "an assortment of Communists of both the Peking and Moscow varieties, fellow travelers, Marxists, radicals, pacifists and professional 'peace' agitators" had launched a "crash program" to undermine and sabotage U.S. resistance to Communist military aggression in Vietnam.

Their stepped-up agitation and propaganda campaign against American Vietnam policy, he said, would culminate in what they had designated "Vietnam Week," the week of April 8–15, 1967. Later, but before the event, the Willis committee published a report, "Communist Manipulation and Con-

trol of Vietnam Week," which revealed how Communists had initiated and controlled this operation.

Vietnam Week, in effect, was the "Spring Offensive" of that year. The April 15, 1967, New York and San Francisco rallies which capped the week's actions were the largest anti-Vietnam war demonstrations held in this country—until Oct. 15, 1969.

With the exception of the newly formed Vietnam Moratorium Committee, the groups which organized Vietnam Week in 1967 are the same groups which organized the Fall Offensive.

NATIONAL PERSPECTIVE IV: MOBE IS RADICALLY ANTI-WAR, ANTI-U.S.

The New Mobilization Committee to End the War in Vietnam, under a variety of names, has been in existence for a little more than three years.

First called the Nov. 8 Mobilization Committee, it was formed in Cleveland in September, 1966, to make opposition to the Vietnam war an issue in that year's election.

It changed its name to "Spring" Mobilization Committee to End the War in Vietnam, while organizing Vietnam Week, 1967. Several months after Vietnam Week it again changed its name and became the "National" Mobilization Committee to End the War in Vietnam, or "National MOBE."

Under that name, it staged the October, 1967, "confrontation" during which the Pentagon was stormed; the 1968 Chicago Democratic Convention demonstration which ended up with large-scale rioting, and also the Jan. 20, 1969, "counter-inauguration" in Washington which also resulted in violence, though on a smaller scale.

MOBE, under its varied names, has been the country's major anti-U.S. in Vietnam war agitation organization. It is an umbrella-type group, serving as the planner, director and coordinator of operations for the groups affiliated with it whose members provide muscle for its operations. Most of these are in the Communist front, Communist-infiltrated and radical-left category; a few are pacifist.

A study shows that at no time since it was formed in 1966 has MOBE published propaganda or agitated on any issue that conflicted with Communist policies. The 1967 Willis Committee report found Communists "dominant" in MOBE when it was known as the Spring Mobilization Committee.

This is also true of New MOBE today.

New MOBE held a "Mass Rally" in Chicago on Sept. 24, the opening day of the trial of the "Conspiracy 8," as those charged with conspiring to foment a riot during the 1968 Democratic Convention have dubbed themselves.

A few hundred staged an all-night vigil the night before the trial and perhaps 500 turned out for the morning rally outside the Federal Building. Later in the day those taking part in a Grant Park rally numbered about 700. It was a far cry from the 5,000 to 10,000 turnout originally predicted. Black Panthers and the various SDS factions were represented.

There was violence, primarily the work of the SDS Weathermen faction. Thirteen persons were injured—two demonstrators, nine policemen and two city prosecutors. More than a score of Weathermen have since been indicted on various charges ranging from mob action to aggravated assault. New MOBE and the other SDS factions renounced the Weathermen violence.

MOBE's special interest in the Chicago trial is based on the fact that six of the eight defendants are key MOBE activists. Dave Dellinger, New and old MOBE chairman, is also coordinator of the Washington and Chicago actions in the Fall Offensive; Tom Hayden, a founder of SDS and of the new, secret Revolutionary Union, was a co-director of MOBE's 1968 Chicago Convention operation; Rennie Davis, also an SDS founder, worked with Hayden in 1968 as the other co-director for Chicago, was coordinator of the Counter-Inaugural and co-director for New MOBE's recent Chicago demonstration; Jerry Rubin, Yippie founder, served as coordinator of MOBE's 1967 Pentagon confrontation; John Froines, assistant professor of chemistry at the University of Oregon, was on the MOBE staff during the '68 convention, as was Lee Weiner, a Northwestern University graduate student working toward a doctor's degree in sociology.

(The other two original defendants were Bobby Seale, California chairman of the Black Panthers, since convicted of contempt of court, and Abbie Hoffman, another Yippie leader. Both have been MOBE collaborators, though not officials.)

New MOBE was the sponsor of the two big events in the Fall Offensive:

The march Against Death at Washington, D.C., and mass marches and rallies in Washington, D.C. and San Francisco.

New MOBE conceived and launched the Fall Offensive Against the War in Vietnam under its former name, National MOBE.

This was accomplished by having a number of its key leaders enlist the cooperation of a few other "peace" activists in issuing a call to a National Anti-War Conference which was held in Cleveland on July 4–5 of this year. The conference was hosted by the Cleveland Area Peace Action Council, a MOBE affiliate and the organization that sponsored the September, 1966, meeting at which the original MOBE was formed.

About 700 people attended the Cleveland meeting, most of them representing groups that had been affiliated with the old MOBE.

The conference ended with formal approval of the Fall Offensive. The Trotskyist Communist newspaper, The Militant, reported that it was generally agreed at the Cleveland conference that the offensive could have "explosive political impact in the fight to end Washington's aggression against the Vietnamese revolution."

Is New MOBE Communist? Not completely—because the Communists don't want it that way. There just aren't enough full-fledged party members in this country—even when you put the Muscovites, the Pekingese, the Trotskyists and all the splinter groups together—to put on a demonstration of such proportions that it could have national and international importance.

The Commnists want "clout," impact. To get that they need two things, respectability and numbers.

How do they get these? By enlisting non-Communists in their operations—many of them: the 100 per cent fellow travelers who can always be counted on to rally to the cause, as well as the lesser fellow travelers who will respond on certain issues; the independent radicals and extremists, the non-party Marxists, the far-out pacifists (particularly useful for "ceace" operations), the malcontents and anyone else they can coax, cajole or hoodwink into working for their cause.

Some of the "respectables" they enlist are always pushed to the forefront of their maneuvers and given impressive titles to provide cover for the more unsavory elements and the Communists, open and secret, who share power in the organization with them.

It should be stressed, however, that New MOBE is not a Communist "front" in the traditional sense of the term.

When MOBE originally was formed, there already were many fronts in existence, some formed for the specific purpose of agitating and propagandizing against this country's efforts to prevent a Communist victory in Vietnam. In addition, the outcome of the Vietnam war is tremendously important to world communism. There's more at stake than just South Vietnam. The issue is so vital to Communists of all types that competing groups (Moscow, Peking, etc.) were willing to forget their ideological and tactical differences to unite for the common good.

Do Communists dominate the MOBE coalition? Consider these facts:

The following are some of the many persons, all identified or professed Communists, who were associated with the Cleveland Anti-War Conference at which New MOBE was ostensibly formed and/or are now serving New MOBE in one capacity or another:

Arnold Johnson, legislative representative and public relations director of the Communist Party, who was imprisoned for conspiring to overthrow the United States, and who has been with MOBE since its founding three years ago; Prof. Sidney Peck of Case-Western Reserve University, a veteran MOBE official; Irving Sarnoff, leader of the Peace Action Council in California, who has served on the District Council of the Southern California CP; Otto Nathan, who was denied a passport by the State Department some years ago on the grounds he had been a party member in Germany and invoked the Fifth Amendment in 1956 rather than tell a Congressional Committee if he was then a party member; Jack Spiegel of the Chicago Peace Council, who has run for public office on the CP ticket; Leroy Wolins, leader of the Veterans for Peace in Vietnam; Dorothy Hayes, active in the Womens International League for Peace and Freedom and Women Strike for Peace; Phil Bart, long associated with the Daily Worker who is now chairman of the Ohio CP; Ishmael Flory of the Afro-American Heritage Association in Chicago; also ILWU official Louis Goldblatt and party members such as Ben Friedlander, Hershel Walker, Orville Leach, Elliot Waxman and Anne Braden.

The Communist Party's youth group, the Du Bois Clubs, are represented by Gene Tournour, their national secretary, and by Jay Schaffner and Marc Beallor.

Dave Dellinger, veteran MOBE official, held the key post of coordinator of the Washington-San Francisco November demonstrations. Dellinger is often described as a pacifist, though he told the HCUA last year he is not one and has stated (in May, 1963) that he is a Communist, but not of the Soviet variety.

The Trotskyist Communists, rivals and generally more radical, are represented by their long-time leader, Fred Halstead, and also by Harry Ring, Lew Jones and Gus Horowitz. Their youth group, the Young Socialist Alliance, has an official voice in running New MOBE through Larry Siegle, its national chairman and editor of the YSA magazine, Young Socialist, also in Peter Vinther, Allan Myers, and Carol Lipman, all of whom serve on New MOBE's steering committee.

Key MOBE leaders, it is important to remember, have been frequent visitors to foreign Communist capitals such as Hanoi, Havana, Prague and Moscow. Examples are Dellinger; Tom Hayden; Rennie Davis and Prof. Robert Greenblatt are two others.

Greenblatt, a New MOBE steering committee member, went to Europe last year where he met with Viet Cong and North Vietnamese agents. He carried with him a note of introduction from Tom Hayden, MOBE's Chicago Democratic Convention project co-director, to Col. Lau of the North Vietnamese army, who was deputy chief of Ho Chi Minh's Paris negotiators at the time. The letter explained that Greenblatt had just returned from Hanoi, that he was a National MOBE coordinator, worked closely with Dellinger and Hayden and would be in Paris for a few days in case there were "any pressing questions" Col. Lau might want to discuss with him. Hayden, who had first met Lau in Hanoi, closed his note to Lau with these words: "Good fortune! Victory!"

"The task before the New MOBE is very clear," says New Mobilizer, the VMC voice; in addition to demanding the "immediate and unconditional" withdrawal of all U.S. forces in Vietnam, it must further insist that there be "no future wars of intervention at home or abroad against oppressed and exploited people who are asserting their rights of self-determination in the quest for human liberation."

Translated from Communist jargon that means: the Communist revolution in Vietnam (aided by North Vietnam, Peking and Moscow) must be allowed to succeed, and the United States must never again intervene to prevent the success of any Communist revolution anywhere—even here in this country.

New MOBE considered Moratorium Day and other Washington actions in the Fall Offensive so important that it moved its national headquarters from New York to the nation's capital to be on the scene and in the best possible position to lend assistance. It rented space in the same building with the Vietnam Moratorium Committee, on the floor immediately above its offices.

What does New MOBE think of the United States?

"American society has become a death machine . . .

"The Death Machine is not a gigantic accident—it has operators and they make a profit. They make a profit from not making automobiles safe, not ending air and water pollution, not feeding the poor, not cleaning up the coal mines . . .

"We must rescue the nation from the warmaker . . . this is only a small part of a long-term effort to create a society committed to Life and Freedom."

For anyone who might be puzzled about what is meant by a society "committed to Life and Freedom," the Communists in MOBE could spell out what precisely those words mean. Obviously, it would not include profit.

NATIONAL PERSPECTIVE VERSUS STUDENT MOBE—SDS PLAY ROLES IN RADICAL ANTIWAR MOVE

The Student Mobilization Committee to End the War in Vietnam, usually referred to as the Student Mobilization Committee (SMC) or "Student MOBE," describes itself as "the national organization of all high school and college students who are united in uncompromising struggle against the war in Vietnam."

Unlike the Vietnam Moratorium Committee (VMC) it does not mince words in proclaiming precisely what it stands for: "Our program is clear and straightforward. We are for the immediate and unconditional withdrawal of ALL U.S. troops from Vietnam."

Student MOBE's prime role in the Fall Offensive was to organize a national student strike against the war on Nov. 14, the second day of the November Moratorium and the same day New MOBE began its March Against Death in Washington.

Student MOBE grew out of a proposal made by Bettina Aptheker of Berkeley Free Speech Movement fame that a nationwide student strike against the war be held in 1966. Daughter of the Communist Party's chief theoretician, she was a professed party member herself at the time and was elected to the Party's National Committee in June, 1966. She promoted her strike concept at the 1966 SDS national convention and in publications and gatherings of the Communist Party's youth group, the W.E.B. Du Bois Clubs of America. Her organizing efforts led to the issuance of a formal "call" to a student strike conference which was held in Chicago in December, 1966.

The conference organizers, Bettina Aptheker and other Communists among them, made no secret of the fact that the full spectrum of Communist groups in the United States was represented at the gathering. To those attending, it was also obvious that the representatives of these groups played key roles in the proceedings.

Among them were: the Communist Party USA and its youth organization, the W.E.B. Du Bois Clubs; the Progressive Labor Party, which represents the Chinese wing of the U.S. Communist movement; the Socialist Workers Party, the Trotskyist Communist organization, and its youth arm, the Young Socialist Alliance (YSA). Youth Against War and Fascism, the youth group of a Trotskyist splinter movement, the Workers World Party, was also present. Students for a Democratic Society and various Communist front organizations were also represented.

Bettina Aptheker's strike proposal failed to win approval at the meeting—primarily because the delegates doubted they were capable of successfully organizing a national strike in the near future. Student MOBE, however, was born at this conference.

Since its formation, Student MOBE has served as the right arm of the name-changing adult MOBE, organizing student support for Vietnam Week, the Pentagon confrontation, etc. It has also undertaken various projects of its own—on April, 1968, student strike against the war, for example, in which it claims (with great exaggeration) that about one million took part.

It boasts of its past harassment of President Johnson. "We demonstrated wherever Johnson went until the antiwar movement forced Johnson to go everywhere unannounced."

Now Presient Nixon is its target. "We have announced our plans to do the same to Nixon. There will be *no peace* for Nixon until all the troops are brought home." (*Italic* indicates bold type in original).

In announcing its "No Peace for Nixon Campaign" on Sept. 29, SMC promised to demonstrate at every public appearance the President made until he directed a complete, immediate and unqualified withdrawal of all U.S. forces from Vietnam.

Students MOBE also promotes antiwar agitation and propaganda within the armed forces. For this purpose, it has formed the GI Press Service, edited by Allan Myers, a SMC member, former serviceman, and a member of the Trotskyist Young Socialist Alliance who also serves on New MOBE's steering committee.

From birth, Student Mobe has been a united front organization, a combine of various groups, many openly Communist, uniting their efforts to draw as many youths as possible into the anti-Vietnam War movement. About a year and a half ago, however, an important change took place. As a result of a long-simmering feud, the CP element walked out in a huff, leaving the young "Trots" in command. As J. Edgar Hoover stated earlier this year, Student MOBE "is controlled by members of the Young Socialist Alliance, the youth group of the Socialist Workers Party."

Carol Lipman, SMC executive secretary, is the key to YSA control of Student MOBE. A leading YSA member, she serves on the editorial board of Young Socialist, the group's official publication. Miss Lipman also serves on the steering committee of New MOBE.

Student MOBE held an antiwar conference in Cleveland on July 6 of this year, the day immediately following New MOBE's gathering. At this conference, according to the Militant, the Trotskyist Communist newspaper, it voted to enter "into building the fall antiwar offensive" which was described as "an ambitious plan to build the most massive and intense series of antiwar actions yet."

An interesting development took place at this conference. SDS has generally kept itself aloof from formal cooperation with the activities of Student MOBE and similar groups in recent years, although it has permitted its local chapters and individual members to participate on their own if they so desire. An SDS delegation appeared at SMC's Cleveland conference, however, interrupted the proceedings by chanting "Ho, Ho, Ho Chi Minh" and "Dare to Struggle, Dare to Win," and then marched up to the podium and took over the microphone.

The SDSers harangued the other delegates for about 15 minutes.

In a more cooperative mood, the Student MOBEers, at the request of the SDS delegation, added an SDS workshop to their agenda.

The Student MOBE conference voted to work on a fall offensive that coincided, point-by-point, with the Fall Offensive approved by New MOBE the day before.

Recounting the action taken at Student MOBE's Cleveland meeeting regarding the various operations in the Fall Offensive, the Militant reported: "SMC will also help build the nationwide moratorium against the war, planned by the Vietnam Moratorium Committee for Oct. 15; leaders of SMC and the Moratorium Committee agreed to cooperate in getting the participation of hundreds of thousands of students."

How strong is Student MOBE? How big a role did it play in turning out students for Moratorium Day? It is difficult to say and no one knows exactly. Carol Lipman has claimed SMC has about 1,500 branches. On the other hand, Don Gurewitz, 23-year-old SMC organizer and Case-Western Reserve grad, has given the number of local branches as 1,000—and that may be an exaggeration.

Student MOBE, like New MOBE, moved from New York to Washington to be where the key action in the Fall Offensive would take place.

Carol Lipman, Student MOBE's executive secretary, addressed two Oct. 15 Moratorium gatherings—the Wayne State University and Detroit citywide rallies. She called the President a liar and added:

"We will force Nixon's abdication like we forced Johnson's abdication. . . . There will be no peace for you, Mr. President, until . . . all our men are home."

She also had a reply to the Vice President's statement that Moratorium leaders and sponsors should repudiate the message of support from the premier of North Vietnam: "No, Mr. Vice President Agnew, we won't repudiate the message. . . . We welcome the message."

If you wonder about the violence that took place in Washington Nov. 14 and 15, consider what one of its own members has said about the nature of the Young Socialist Alliance whose members, as Student MOBErs, turned out en masse for the "actions" on those days.

YSA member Jose Rudder, by his own admission, is a former member of the Du Bois Clubs and their parent organization, the Communist Party. He left them "greatly disillusioned about the whole left." Then he began to read the literature of the YSA and its parent body, the Socialist Workers Party. He came to this conclusion:

"I was a Marxist, a Communist, and I believed in the revolution. . . . The only organization that I could see that was concerned about . . . seeing the revolution take place in this country was the YSA. So I decided to join."

There have been two significant changes in Students for a Democratic Society (SDS) since its informal participation in Vietnam Week, 1967.

First, Communist penetration of the organization, particularly by the Peking-oriented Progressive Labor Party (PLP), has become more and more evident. At the June, 1969, SDS convention, the PLP made an unsuccessful bid to take over the organization.

This led to the splintering of SDS into two factions, the more radical Weathermen group and the Revolutionary Youth Movement II. The PLP element, now known as SDS–PL, was expelled and is now a separate group with its headquarters in Boston.

The second change in SDS has been a marked trend toward violence, particularly destructive by explosives. SDSers in a number of areas have been arrested for bombings and one is now on the FBI's most wanted list for blowing up high voltage towers supplying power to a Colorado plant manufacturing helicopter armor and missile parts.

In the FBI's annual report for fiscal 1969, J. Edgar Hoover wrote: "The militant core of New Left extremism is the Students for a Democractic Society (SDS). During the last year, this group has reflected an ever-increasing Marxist-Leninist revolutionary posture. Several SDS leaders publicly identified themselves as revolutionary Communists. The SDS openly espouses the overthrow of our institutions of free society (called the 'Establishment') through violent revolutionary action. Never before in American history has there been such a strong revolutionary Marxist movement of young people so eager to tear down established authority."

SDS delegations took part in the Cleveland conferences on both New and Student MOBE, where the actions in the Fall Offensive were planned.

An SDS delegation also spent eight days conferring with Viet Cong agents in Havana early last July. The Vietnam war was a major topic of discussion. The delegation came back to this country resolved "to establish another front against imperialism right here in America—to 'bring the war home.' "

The one action SDS was responsible for in the Fall Offensive, the Oct. 8–11 demonstrations in Chicago, were carried out under the slogan "Bring The War Home!" As expected, the action was marked by destruction, violence, injury and scores of arrests. In a brutal attack, one SDSer broke the neck of a Chicago city attorney. He has been charged, among other things, with attempted murder.

The violence was primarily the work of the ultraradical Weathermen faction of SDS. It was denounced by the Revolutionary Youth Movement II and the Black Panthers and Young Lords, who had also taken part in the action.

SDS is a problem to the other Fall Offensive groups. The Vietnam Moratorium Committee, rejecting violence and the concept of revolution accepted by others in the coalition, is naturally wary of SDS and has been denounced by it as "counterrevolutionary."

The dominant Communist elements in both New and Student MOBE are more concerned about SDS' stand-offishness, its refusal to cooperate with other organizations. They are also annoyed by the tendency of the Weathermen faction to engage in what they consider senseless and counterproductive violence.

The CP newspaper, the Daily World, published an editorial "Memo to SDS" shortly after the October Moratorium. It criticized SDS for "looking on from the sidelines" at "the very moment of the greatest mass turnout . . . for peace and against imperialism." It also hit SDS for its useless, damaging, "thoughtless" tactics and closed with these words:

"In the coming struggles . . . the masses of American working men and women could use your help and support. Think it over."

SDS' size has been an important factor in the yearning for its help. It is by far the largest of the New Left groups (claiming 40,000 members in some 250 chapters) and its membership greatly exceeds that of any Communist party or front in the country.

SDS participation in any "mass" Left-Communist demonstration is still important to an impressive showing.

As was true in the case of past MOBE mass demonstrations, individual members and chapters of SDS turned out with a will for the November actions. Even the Weathermen gave their formal cooperation—and promised no violence. Amazingly, their promise was believed by some officials.

For legal and public relations purposes, MOBE officials have always said they want peaceful, orderly demonstrations. They said that about the Democratic Convention last year and repeatedly said the same thing about the Washington-San Francisco November actions this year. Yet they never told SDS to stay away and actually, through the Daily World and Guardian, pleaded for its turnout.

NATIONAL PERSPECTIVE VI: MORATORIUM COMMITTEE SEEN AS NAIVE, VULNERABLE

The Vietnam Moratorium Committee (VMC) is the babe-in-the-woods of the Fall Offensive, both from the point of view of its existence as an organization and the age of its leaders.

It was formed in June of this year. Two of its four leaders are 26-year-olds; one is 24 and another, the lone female, is 23.

Sam Brown has been the group's chief spokesman. His fellow VMC founders and coordinators are David Hawk, David Mixner and Marge Skenclar.

Brown and Hawk are ex-divinity students (Harvard and Union Theological, respectively). Brown, Mixner and Skenclar worked in Sen. Eugene McCarthy's '68 campaign, and both Brown and Skenclar in the "Dump Johnson" movement. Brown, Mixner and Skenclar have held positions with the National Student Association (Brown is currently on its National Supervisory Board). Brown and Skenclar were active in the 1967 anti-Viet war operation called Vietnam Summer.

In his latest book, Theodore White, the recorder of recent presidential campaigns, quotes Brown as saying:

"We've recognized the true nature of the United States. We saw the United States attack Cuba, it attacked the Dominican Republic, it attacked South Vietnam. The Communists are now a fragmented force; the United States is now the great imperialist-aggressor nation in the world."

That is not a pro-Communist statement. It indicates a distaste for imperialism and aggression and, at least indirectly, recognizes that Communist powers have been imperialists and aggressors in the past. Nevertheless it is a demonstrably false statement—a reflection on Brown's knowledge and thus on those who follow his policy recommendations.

More damaging to Brown is a statement made by Dr. Martin Abend (Metromedia TV news commentator), in his Oct. 12 broadcast. Dr. Abend, also a professor of political geography at New Jersey State College, said that Sam Brown favors a Communist victory in Vietnam.

Brown's pro-Viet Cong views, Dr. Abend believes, explain his "keen interest" in having the United States pull out of Vietnam immediately and unconditionally.

As previously mentioned, Brown and Marge Skenclar were associated with the 1967 Vietnam Summer project, another anti-Viet war operation that was supported by a varied assortment of radicals and leftists that included Lee Webb, former national secretary of SDS; Mike Ansara of Harvard SDS, and Richard Fernandez, who has served as sponsor, treasurer and steering committee member of Mobe in various phases of its transition from "November 8" to "Spring," "National," etc.

President Nixon's statement that U.S. policy regarding Vietnam would not be influenced by the Moratorium or other street demonstrations Brown found "deeply disturbing." It was "surely unintended," the President "cannot mean" what he said. It was "distressing . . . the degree of isolation" it reflected, a "rigid stance" and he surely hoped the President would not "further isolate" himself from the American people.

David Hawk, Brown's right-hand man, was an All-American diver at Cornell where he obtained a B.A. degree in social sciences before going on to Union Theological Seminary for a time. He did voter registration work in Hattiesburg, Miss., and also helped organize the Mississippi Freedom Democratic Party which challenged the regular Democratic Party delegation's seat at the Atlantic City convention.

He worked for SNCC again in Georgia in 1966—voter registration work and organizing a tenant's union in a low-cost housing project.

Though Stokely Carmichael was prominent in Students Non-Violent Coordinating Committee (SNCC) at this time and engaged in inflammatory racial agitation, Hawk says he did not know him.

Earlier this year, working on the staff of the National Student Association (NSA), Hawk organized a draft resistance campaign among campus leaders. The result of his work became evident on April 22 with the public release of a letter addressed to President Nixon and signed by over 250 student body presidents and campus newspaper editors from 190 colleges and universities.

The letter proclaimed the signers would refuse to be drafted, even if it meant going to jail. They could see no justification for the war in Vietnam. Therefore their "integrity and conscience" would not permit them to accept military service.

Hawk admitted to me that he had worked on this project on NSA time and using NSA facilities. I asked if there had been formal NSA approval of it. He said there had not been but that NSA had adopted a resolution against the draft three years ago. When I asked if the resolution approved defiance of the draft, he said it did not. "But it clearly gave a mandate for the letter," he claimed. He pointed out that the letter was not illegal—just saying you will defy the draft at some future time is not a crime.

Hawk had been indicted for refusing to report for induction earlier this year. Recently, a pretrial motion to dismiss the charges against him was rejected.

Like Brown, Hawk has a problem seeing integrity or good in the U.S. government. The present draft law admittedly contains inequities. Congress has been wrestling to reform it for years. Yet when the President announced new draft reform measures, temporary draft suspensions, and additional Vietnam troop withdrawals in September, Hawk saw these only as a "cynical and calculated attempt to fool the public."

VMC is against more than the war in Vietnam. It has advocated a general assault on this country's over-all defense organization. Its July 8 letter to government summer interns said that while they worked to build up support for the October Moratorium "other antiwar activities . . . will, of course, continue."

What "other" activities? The letter spelled them out—"against the draft, ROTC, ABM, CBW, counter-insurgency research, and so on."

David Hawk announced on Oct. 9 that VMC would distribute throughout the services a GI Referendum which would ask servicemen this question: "Should the United States bring the rest of the GIs home from Vietnam now?"

The full story of this VMC effort to promote antiwar propaganda and agitation with-

in the Armed Services has not been told. Here it is:

On Sept. 29, the VMC addressed a letter to "GI Newspaper Editors," bringing the Fall Offensive and Moratorium Day to their attention and asking their help in organizing GI participation in a "recurring moratorium." The Oct. 15 demonstration, the letter pointed out, would help build a two-day moratorium in November and give the GIs the chance to focus "legal opposition" to the war on military bases.

"We realize that GIs cannot go on strike," the letter said. It also pointed out that a recent DOD directive banned antiwar meetings as such. Therefore, it suggested, say the directive is not clear and ask permission to hold a basewide meeting to discuss GI constitutional rights in the light of the directive. Ask the commanding officer or one of his subordinates to address the meeting—and put him on first if the invitation is accepted.

"Call Us Collect," VMC said, for legal help and outside civilian support if you have trouble getting permission. If permission is denied, let us know and we will try to arrange an off-base meeting. If a meeting is approved: "We suggest that this meeting be an open forum for ideas on what GIs can legally do to protest the war. Be sure to start by covering exactly what are your rights . . .

"Certainly you will want to discuss the calendar for the 'Fall Offensive' and provide literature about events scheduled in the next two months. We will see that this information and material is provided."

A list of suggested on-base actions followed: pass base resolutions on the war; see chaplain to get a CO application; change insurance beneficiaries to include a "peace" organization; send telegrams to government officials; hold a fast; boycott products of "right-wing," "pro-war" companies (Schick Razor, which has given free razors to servicemen, was named as an example). Finally, there was this suggestion:

"Cancel those damn savings bonds."

VMC's GI Referendum ballots, the letter said, would be returned to Seaman Roger Priest. Priest faces a general court-martial on charges of soliciting servicemen to desert and commit sedition, and promoting disloyalty and disaffection in the armed services. The charges are based on articles published in his "underground" GI newspaper, OM, The Serviceman's Newsletter.

I asked Hawk what GI newspapers the VMC letter had been sent to. Hawk replied, "All of them; as many as there are." What kind of papers? The underground ones. Where did he get the names? Answer: From Carl Rogers, of Servicemens LINK to Peace, "a good friend of ours who works downstairs."

What is Servicemens LINK to Peace? I was told, "it helps GIs in incidents—like the Priest defense, publicity and so on."

Hawk indicated a copy of the GI Referendum ballot pasted on the wall. I noted that it did not have VMC's name on it. Hawk agreed.

Carl Rogers is on the Steering Committee of Mobilization Committee to End the War (New MOBE) as head of Servicemens LINK to Peace, one of MOBE's newly acquired "GI organizations." He is also the head of a group called the Committee for the Presidio '27,' set up to defend military prisoners in the stockade at San Francisco's Presidio who were accused of mutiny. Both of these organizations have their headquarters at 1029 Vermont Ave. in Washington, the same building that houses VMC, NMC and SMC.

The "underground" GI newspapers to which VMC mailed its referendum are not, like the civilian type, largely pornographic. They fall into the "political" and subversive class—filled with antiwar propaganda of the type disseminated in Roger Priest's OM.

Student MOBE's GI Press Service, run by the young Trotskyist, Allan Myers, recently circulated a list of these "GI Antiwar Papers." There were 42 on the list, most of them distributed from post office boxes near military bases. Four were published abroad. Myers is on the New MOBE steering committee with Hawk and Rogers.

It was Rogers who arranged a meeting between Hawk, a score or so of other VMC workers and Sen. Goodell in a New York apartment last Sept. 13. The result: the introduction of Sen. Goodell's resolution calling for the withdrawal of all U.S. troops from Vietnam by the end of 1970. Hawk said he and Rogers were the only New MOBE representatives at the meeting.

On a recent visit to New MOBE headquarters I was told 100 organizations had joined the organization, despite the fact that New MOBE leaders have been reported as claiming only 60.

When I went to see David Hawk I knew that New and Student MOBE had made a big push for Oct. 15.

In addition to the thousands of leaflets, brochures and posters distributed, New Mobilizer had features advance articles on Moratorium Day by VMC leaders such as David Mixner and Marge Skenclar. The Communist Party, the Socialist Workers Party, their youth groups and other Communist organizations affiliated with New MOBE had also gone all-out for Moratorium Day.

Published reports that VMC had its own organizers in the East but had used MOBE organizers in the West and Midwest were mentioned and Hawk was asked how many New MOBE organizers VMC had used.

His reply contradicted his earlier claim that MOBE organizers had not made any difference: "It's not like theirs and ours . . . in the big cities MOBE has the old sectarian left groups . . . a lot of the New MOBE groups are on the Moratorium steering committee and on MOBE's so the same people—Clergy and Laymen Concerned and Women Strike for Peace—are working for the Moratorium Committee . . . Most organizers worked for both."

Hawk said the VMC founders had come to Washington with an organizing list of 15,000—Kennedy and McCarthy businessmen and contacts, people who had worked for causes, etc. They, too, had been used. But it was clear that MOBE organizers and Communist MOBE organizations had played a very important role in promoting the Oct. 15 turnout.

This was emphasized at a later point when Hawk was asked about the question of Communist influence in MOBE and the Fall Offensive. He deprecated the influence of the Communist Party.

"They don't really have any control. That comes from groups that bring prestige, influence, money."

"Which ones?"

"Women Strike for Peace, Clergy and Laymen Concerned about Vietnam, SANE, New Democratic Coalition, Student MOBE . . ."

"You say Student MOBE has prestige, influence, money?" I interrupted.

"They have numbers. They can produce," Hawk replied.

When Sam Brown was asked about VMC association with Student MOBE on "Face the Nation," he replied: "We have no association with the Student Mobilization Committee."

Hawk was asked whether he considered Communists enemies of, or a danger to, this country and if he believed in working with them. He answered:

"We do not recognize New MOBE as Communist, nor is Student MOBE, though it is true that the Communist Party of the U.S., which is defunct and harmless, more conservative than most New Left groups, has one vote on the steering committee of 70 members (of New MOBE). That is the extent of Communist input in New MOBE."

The issue of communism is "irrelevant; it's an attempt to slander the patriotism of those against war."

What about the Trotskyist influence added to the CP, doesn't that concern you?

"Concern, yes, sure . . . But there's much overlap in the group. New MOBE's center of gravity is a bit to the left of us. Some in New MOBE do not believe in electoral politics. Our center of gravity is people who believe in electoral politics."

When talking about Communist influence in the Fall Offensive, I asked Hawk whether he thought the Soviet Union, Red China and North Vietnam were enemies and a danger.

"I don't see any danger from Russia. It's not about to attack us." But he agreed world powers "always compete."

The Moratorium Committee, like New MOBE, has denounced the November violence and said it was not responsible for it.

But this does not clear it of blame for the damages and personal injury to young demonstrators, many of whom were enticed into going to Washington and San Francisco through its earlier Moratorium organizing efforts and subsequent direct appeals.

Immediately after the October Moratorium there were press reports that serious doubt existed about VMC support for New MOBE's November actions because of the presence of "radicals" in MOBE. It was difficult to believe them. There had been such close ties between the groups and VMC owed so much to SMC and NMC for their help that if they did not reciprocate, they would have been denied any further assistance for future moratoriums, which would hurt VMC badly. Not surprisingly, the alleged doubt was resolved by a VMC decision to help MOBE.

On Oct. 28, VMC sent a letter to its organizers, affiliates and "friends" announcing that the November Moratorium would take place on the 13th and 14th. The letter called attention to New MOBE's March Against Death and added that "Many supporters of the moratorium will be participating in this solemn event."

VMC persisted in its support of New MOBE's Washington action even after it became known that the Weathermen faction of SDS and other violence-prone and revolutionary groups would take part in it.

ESTABLISHMENT OF HOUSE ENVIRONMENT COMMITTEE URGED

HON. ANCHER NELSEN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. NELSEN. Mr. Speaker, increasingly, our society is recognizing that the 1970's will be the decade in which we must take action to restore and preserve our environment.

To adequately treat only water pollution will require national expenditures of $30 billion, according to the Federal "Cost of Clean Water" study, and that estimate is just for a 5-year period.

Every year in America we throw away over 30 million tons of paper, 4 million tons of plastics, 48 billion cans, and 26 billion bottles.

It has been stated that if all forms of pollution were to be treated, the combined municipal, State, Federal, industrial, and private expenditures would cost at least $10 billion per year for 20 years or $200 billion by 1990.

The cost will be great and the ener-

gies the Congress must focus on the problem must also be great. For this reason, I am cosponsoring a resolution to establish a Standing Committee on Environment in the House of Representatives. The committee would be vested with legislative responsibility for water quality, air quality, weather modification, solid waste disposal, pesticides, herbicides, and acoustic pollution.

As the House committees are organized today, air pollution is considered separate from water pollution, and other vital facets of our environmental pollution is one great problem with many different aspects. It makes little sense to remove foul chemicals from the air and put them in the water.

The committee system has the great advantage of being able to encourage expertise in specific problems. One of the greatest problems facing us is the maintenance of our ecology, and only a permanent standing committee can adequately and efficiently handle it.

HEALTH CARE

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. OTTINGER. Mr. Speaker, on Thursday, December 4, in remarks in the CONGRESSIONAL RECORD, I called for increases in Federal support for programs of medical research and education and health services to avert a threatened crisis in health care in this Nation.

In that speech I outlined a six-point program which would provide the absolute minimum funding needed at a cost of only $263 million, less than the Nation invested in the one moon shot last month.

Since that time I have received expressions of support from leading health professionals throughout the United States. Each of these underscores the grave damage that the recent Federal cutbacks will do to health programs in this country.

Congress is now in the process of making the final decisions on the funding of the various health programs and I believe that it is important to do so with full awareness of the serious issues at stake. For that reason on December 9 I placed in the RECORD 21 statements that I had received from health professionals. Today I am placing in the RECORD an additional 23 statements, which I commend to my colleagues' attention:

EXPRESSIONS OF SUPPORT FOR PROGRAMS OF MEDICAL RESEARCH

ROBERT J. GLASER, M.D., DEAN, SCHOOL OF MEDICINE, STANFORD UNIVERSITY MEDICAL CENTER, STANFORD, CALIF.

Thanks so much for your thoughtfulness in sending me a copy of the remarks that you are to deliver on the Floor of the House on December 4. I read them with great interest, and found myself much encouraged to know that you are putting forth a major effort to try to convince your colleagues of the need for providing adequate support for medical education and medical care. I think the term "pound foolish" is an absolutely correct one in respect to the present attitude toward the support of medical schools and teaching hospitals. At a time when the health care demands are mounting steadily, it is essential that our medical schools be adequately supported. In fact, at this point in time we are being cut back badly, and unless something is done to rectify the situation, I see grave concern for the future. Even with adequate help in the way of financial support, the task before us is monumental.

JOSEPH R. D'PALMA, M.D., DEAN, THE HAHNEMANN MEDICAL COLLEGE AND HOSPITAL OF PHILADELPHIA, PA.

Your remarks made on December 4th, 1969 concerning "Cut Backs in Federal Health Programs" are most appropriate. The situation in most medical schools with regards to financing is rapidly becoming a bankrupt situation. Unless help comes soon from the Federal Government we will be forced to cut back on our programs. This will mean scientist and teachers out of work, less production of medical personnel and an inferior product. You have my complete endorsement. Keep up the good work.

CAMPBELL MOSES, M.D., MEDICAL DIRECTOR, AMERICAN HEART ASSOCIATION, INC., NEW YORK, N.Y.

I greatly appreciated the advance copy of your remarks made on the floor of the House on Thursday, December 4. I couldn't agree with them more—they were well-done.

MRS. NANCY A. PERSILY, SPECIAL ASSISTANT TO THE DEAN, MOUNT SIANI SCHOOL OF MEDICINE, NEW YORK, N.Y.

Thank you very much for sending me a copy of the speech that you will deliver to the House of Representatives on December 4th, 1969. I regret that my comments will probably not reach you by the time you deliver your remarks, since Thanksgiving weekend must have held up the mail delivery: I just received your commentary: I am most impressed with your analysis of our Health Care crisis and the priorities that you have set in dealing with our health crisis. As a representative of a new medical school, I am of course, very sensitive to the comments that you have made about the need for more money to be channelled into the schools that have begun over the last decade or so. It is most important to emphasize the fact that there was tremendous pressure to build new schools of medicine and other allied health professions. The Federal Government was, of course, the one to put so much pressure on the States and private universities, to build these institutions, and should have assumed a substantial responsibility in supporting these new developing programs. However, just as these new schools were beginning—when their start-up costs were highest, the Federal Government rescinded many of its promises for funding, thus placing them in the critical position they are in today. Your analysis of the need for more allied health professionals and the definitive proposal for more student aid are two exceedingly important things included in your statement. Giving money for teachers to *teach* is by far one of your most important thoughts. Every medical school has had the problem of knowing that the money they receive for research purposes will be going towards teaching purposes. Every school does it, every school knows that every school does it, and even the Federal Government knows that this is true, and still this is the only way that medical schools are able to receive any funds for the purposes of the education of their students. This is certainly an inequity and in many ways indeed a fraud. I think that your statement which puts the cards on the table is indeed a most important one.

SPURGEON B. EURE, O.D., PRESIDENT, ASSOCIATION OF SCHOOLS AND COLLEGES OF OPTOMETRY

I have recently reviewed your remarks entitled "Pound Foolish", and find them to be right on target. Your examples are well taken and certainly are true of all professions under the health care scheme. If the Federal programs were cut back, or in reality, purchasing power of our present grants is reduced, I'm afraid that many professional schools would have to close. This could be the case of Southern College of Optometry, which graduates approximately 20% of all the optometrists in the nation.

MICHAEL E. DEBAKEY, M.D., BAYLOR COLLEGE OF MEDICINE, HOUSTON, TEX.

Thank you for your letter of November 26, 1969, and the opportunity to review the remarks you will make on the Floor of the House Thursday, December 4, 1969, concerning the deplorable cutbacks in Federal programs. This excellent presentation is most convincing.

PIERRE M. GALLETTI, M.D., PH. D., CHAIRMAN, DIVISION OF BIOLOGICAL AD MEDICAL SCIENCES, BROWN UNIVERSITY, PROVIDENCE, R.I.

Thank you for the advance copy of your remarks to be given on the Floor of the House. I congratulate you on your generous and farsighted intervention, particularly in reference to an increase in institutional funding, loans and scholarships, and support for training of health professionals other than physicians.

F. C. PANNILL, M.D., DEAN, THE UNIVERSITY OF TEXAS MEDICAL SCHOOL AT SAN ANTONIO, SAN ANTONIO, TEX.

Thank you for the courtesy of sending me an advance copy of the remarks that you will make on December 4. I wish to congratulate you for your thoughtful and provocative presentation of a problem that has faced medical school administrators for the last several months. As a new school of medicine in its second year of operation, our growth and progress have been seriously inhibited by the curtailment in federal funds which occurred at the same period of time. It is reassuring to have had the opportunity to review your remarks and please let me know if I may provide you with any additional information which might be helpful in pursuing this matter further.

BERNARD J. CONWAY, ASSISTANT EXECUTIVE DIRECTOR, LEGAL AFFAIRS, AMERICAN DENTAL ASSOCIATION, CHICAGO, ILL.

The American Dental Association commends you for your strong statement on the need to expand federal support for health research and health profession education grants. Your remarks in the December 4 issue of the *Congressional Record* present an irrebuttable justification for Congress to appropriate the maximum authorized for educational grants and at least a 10 per cent increase over fiscal 1969 for research grants. The Association recently presented testimony before the Senate on appropriations for dental activities in HEW. I am enclosing a copy of that testimony to illustrate particularly the severe problems facing the dental schools because of inadequate financial support.

CLIFFORD G. GRULEE, JR., M.D., DEAN, COLLEGE OF MEDICINE, UNIVERSITY OF CINCINNATI, CINCINNATI, OHIO

I sincerely appreciated your courtesy in sending me a copy of your remarks to be presented on December 4th. Just as I began to dictate this note to you one of my most respected departmental chairmen called to discuss the devastating impact that federal cutbacks were already having on his department. We are wondering how we will maintain the integrity of some of the teams of investigator teachers that have been so vital in our programs of all sorts in recent years. As a medical educator, I deeply appreciate the position you are taking in speaking out concerning our needs at a time when the nation is demanding increased output of health manpower, and when it should be continuing to demand the type of research out-

put that I consider to be essential to the future.

GARY L. FILERMAN, EXECUTIVE DIRECTOR, ASSOCIATION OF UNIVERSITY PROGRAMS IN HOSPITAL ADMINISTRATION, CHICAGO, ILL.

I am writing to acknowledge with thanks the copy of your speech on Federal support for medical research and health services presented on the floor of the House on December 4, 1969, which you were kind enough to send to us. The presentation is effective and very much to the point of many of our concerns. We are particularly hopeful that Congress will develop a recognition of the importance of developing a profession of hospital administration in order to bring more effective management to these institutions in which the vast majority of the nation's health professionals work. Federal support for hospital and health care administration education is very small at the present time and a further reduction would be contrary to every national effort to improve the management of expensive and scarce health resources. So your interests and efforts are to be commended.

FRANK R. LEMON, M.D., ASSOCIATE DEAN, CONTINUING EDUCATION, COLLEGE OF MEDICINE, UNIVERSITY OF KENTUCKY, LEXINGTON, KY.

I have just finished reading a copy of your remarks to be made on the floor of the House, Thursday, December 4, 1969. You certainly have made a succinct statement of the major problems facing medical education and the imbalance in our national priorities to the approach to the problems of health. I was particularly pleased, as an epidemiologist formerly active in the tobacco and health field, to see your inclusion of remarks regarding the absurdity with which our nation supports the production of this noxious substance as compared with its efforts to eliminate major diseases caused by that same substance. The dispatch with which the government acted in regard to cyclamate, based upon infinitesimal evidence, is in stark contrast. Thank you again. We do need your support. Medicine and medical care is in my opinion going to be irreparably injured unless there is some early change in the bleak financial outlook.

HAMILTON B. G. ROBINSON, SCHOOL OF DENTISTRY, UNIVERSITY OF MISSOURI-KANSAS CITY, KANSAS CITY, MO.

Thank you for sending me a copy of your remarks on the Floor of the House on Thursday, December 4th. I am in complete agreement with the need for full funding in the areas of health manpower. I certainly would not limit this to medical education or even to medical and dental education but to the health manpower throughout medicine, dentistry, nursing and the other health related areas. The Federation of Associations of the Schools of the Health Professions is greatly interested in full funding for the health manpower programs and its current Chairman, Dr. Myron Wegman, so testified at the Senate on December 3rd. On December 2nd I appeared before the Appropriations Committee of the Senate to present the needs in dental manpower and dental health for the American Dental Association and the American Association of Dental Schools. We hope that you will continue your activities on behalf of full funding for health manpower, health research and health services.

EMANUEL SUTER, M.D., DEAN, COLLEGE OF MEDICINE, UNIVERSITY OF FLORIDA, GAINESVILLE, FLA.

Your remarks to be made on the floor of the House on Thursday, December 4 regarding medical research and health services certainly emphasize some of the important omissions creeping into our planning and budgetary processes with increasing rapidity. As do you, I feel our entire system of medical research in education is threatened without offering any constructive alternative solutions. Although we all realize certain things should be done differently, we would only destroy the old structure once a new structure has been planned or implemented. As far as specific recommendations are concerned, I believe they would help to take care of some of the difficulties. In addition, however, it is most important that the Department of Health, Education, and Welfare prepare a well thought out ten-year plan for the development of health services and health education—hopefully reaching the objective established a few years ago of providing first rate and equal health care to all citizens.

RULON W. RAWSON, M.D., DEAN OF MEDICINE AND VICE PRESIDENT, AND ERICH HIRSCHBERG, PH. D., ASSOCIATE DEAN FOR RESEARCH, NEW JERSEY COLLEGE OF MEDICINE AND DENTISTRY, NEWARK, N.J.

Thank you so much for sending us an advance copy of remarks you plan to make on the floor of the House tomorrow, December 4, 1969. We strongly support your efforts to reverse the present trend of cutting back Federal support for medical education and research. The significant decreases in funding in all categories, particularly research grants, student loans, and other operational funds, are particularly damaging to the efforts of the more recently established medical schools, such as ours, which do not have broad endowments or large boards of affluent alumni. It is evident, however, that even in the best established medical schools the current fiscal restrictions at the Federal level present a clear and present danger to the maintenance of the educational and investigative efforts which have in the past led to such significant advances in the solution of major health problems in our country. We are greatly encouraged to have so eloquent and well informed a spokesman fighting the good fight for us in the halls of Congress. We hope your efforts to maintain at least present funding for both medical education and biomedical research receive wide support among your colleagues.

EDMUND J. M'TERNAN, DEAN, SCHOOL OF ALLIED HEALTH PROFESSIONS, STATE UNIVERSITY OF NEW YORK, STONY BROOK, N.Y.

I have just had the opportunity to read the remarks which you made on the Floor of the House on December 4, 1969 relating to the disastrous effects of Federal spending cutbacks in the field of health. I heartily concur with your statements and appreciate your courage in bringing this matter to the attention of the Congress at this point in time. As an educator concerned with the personnel-short and explosively growing Allied Health field, I especially appreciate the fact that you included Allied Health by name in your comments. On January 1, 1970, I will end my term as a member of the National Advisory Allied Health Professions Council. Because of my service on the Council, I have had an opportunity to see, perhaps better than most people, the beginning results of the poorly funded but germinal Allied Health Professions Act of 1966. The ultimate but unfavorable effect of the present Federal spending policy relating to this Act will not be realized for many years and will adversely affect the health care of all Americans for a generation or more. I sincerely hope that your colleagues in the Congress and the Administration heed your remarks and accept your recommendations.

WINSTON K. SHOREY, M.D., DEAN, UNIVERSITY OF ARKANSAS SCHOOL OF MEDICINE, LITTLE ROCK, ARK.

Thank you very much for sending me a copy of the remarks which you made in the House of Representatives on December 4 regarding the crisis in health, research, and medical education. It is very encouraging to us who are deeply involved in these problems to hear a voice in Congress recognizing the problems and insisting that something be done about them. You are appreciated.

R. H. FELIX, M.D., DEAN, SCHOOL OF MEDICINE, ST. LOUIS UNIVERSITY, ST. LOUIS, MO.

"Thank you very much for your thoughtfulness in sending me a copy of your remarks entitled, "Pound Foolish Cut Backs in Federal Programs Threaten Nation with Growing Health Crisis," which you delivered in the House of Representatives on December 4. It is very heartwarming to those of us who are trying so hard to educate physicians to meet the manpower shortage in this country to know that there are members of Congress such as yourself who realize what it takes to do the job and how badly the job needs being done. You merit the thanks of every person in the United States and if I had my way you you would get it.

K. ALBERT HARDEN, M.D., DEAN, COLLEGE OF MEDICINE, HOWARD UNIVERSITY, WASHINGTON, D.C.

Congratulations on your forthright stand upon perhaps the most important issue facing Congress today. Our nation's health and its future would be irreparably damaged by the proposed cutbacks in health care and health education programs.

S. B. GUEBERG, M.D., PROFESSOR AND CHAIRMAN, DEPARTMENT OF OBSTETRICS AND GYNECOLOGY, MOUNT SINAI SCHOOL OF MEDICINE, N.Y.

I thank you for your reply to my letter and for the copy of the excellent speech to the Congress delivered on Thursday, December 4, 1969. I write only to congratulate you on the accuracy of your appraisal of our difficult health situation and the excellence of the presentation of this plight that you have made. I think the emphasis you have placed on the financial aspect of the problem will be very effective for it would appear from recent tendencies in our Society that property is regarded more highly than life. Please keep up the good fight. Health is a major concern of all of us, both professionals and lay persons, and indeed has become a major "industry". Since the retirement of Senator Lister Hill and the death of Congressman Fogarty, there has been a few strong voices in the Congress with deep and primary concern for health care. I welcome you to the ranks of these persons with your broad ranging, in depth analysis of our health needs. You have invited me with courtesy to write to you about problems which may be of concern to me; please believe I shall not do so but only write about problems in which I have not only concern but some authority.

PAUL R. DONNELLY, DIRECTOR, DEPARTMENT OF HOSPITAL AND HEALTH CARE ADMINISTRATION, ST. LOUIS UNIVERSITY, ST. LOUIS, MO.

I want to assure you that I heartily endorse the comments which you make in your statement and hope that if there is any way that I can assist in giving further support to the efforts to increase the priority of health manpower training that you will let me know. As a Director of a Graduate Program in Hospital Administration I am well aware of the acute need for support for all health manpower services, and I certainly appreciate your support of this in the remarks which you prepared.

CLIFFORD GROBSTEIN, DEAN, SCHOOL OF MEDICINE, UNIVERSITY OF CALIFORNIA, SAN DIEGO, CALIF.

I want to express my thanks and to congratulate you for your speech on the House Floor on Thursday, December 4, a copy of which you kindly sent in advance. You have very effectively stated the case on a very important issue. As the Dean of a developing medical school I could not help but note your remarks especially directed to our problems. I shall be very interested in being kept informed as your plans for legislation creating

a special fund for new institutions of health training progress.

LEROY P. LEVITT, M.D., DEAN, THE CHICAGO MEDICAL SCHOOL, CHICAGO, ILL.

I have read your advance copy of the remarks that you will make on the Floor of the House December 4, 1969. It is a clear, succinct, accurate statement of the scene that exists today in medical education, medical research, and the health care and delivery system. On behalf of this institution, I commend you for your forthright stand in these vital issues.

DARK SIDE OF THE MOON SHOT

HON. JERRY L. PETTIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. PETTIS. Mr. Speaker, at a time when some political leaders are criticizing elements of the news media for careless and superficial reporting, it is interesting to note a topflight news executive taking his colleagues in the Nation's press to task for the triviality that marked their coverage of the Apollo 11 moon shot.

I refer specifically to the excellent article in the fall issue of the Columbia Journalism Review entitled, "The Dark Side of the Moonshot Coverage," by Edwin Diamond, a senior editor of Newsweek. This has nothing to do with politics, though one might be inclined after reading the article to accept the validity of the recent Executive criticism of the press.

So that all our colleagues will have the opportunity to read Mr. Diamond's superb critique, I ask that the article be inserted in the RECORD at the conclusion of my remarks:

THE DARK SIDE OF THE MOONSHOT COVERAGE

(By Edwin Diamond, senior editor of Newsweek)

President Nixon, in a burst of egregious rhetoric which must have shaken the Bible Belt as severely as any recent Supreme Court declaration, proclaimed it "the greatest week since the Creation." Elmer Lower, president of ABC News, more modestly called it the "news story of the century" (and assigned 300 men to cover it—considerably more than were needed to launch the Saturn 5 rocket from Cape Kennedy). Indisputably, the 500,000-mile, eight-day flight of Apollo 11 to the moon was the most watched and written about single event in history.

In this country, according to A. C. Nielsen data, 53.5 million TV households (93.9 per cent of everyone owning a set) watched the coverage, an average of fifteen hours, thirty-five minutes—the largest U.S. TV audience ever.

Fifty national networks elsewhere relayed coverage for 230 hours of communications satellite time, exceeding all previous records.

Many American daily and some large foreign newspapers published special sections or extensive features, with the New York *Times* employing the largest headline type it has ever used—96-point, or one-inch high—for the banner lines "Men Land on Moon" and, in the last edition, "Man Walks on Moon."

There was, as has been recounted, much in which the media could take pride. More than for any previous event, the world was indeed a global village. Among large populaces, only the citizens of China and the Soviet Union were denied simultaneous participation.

On a less cosmic level, Apollo 11 also represented one of those major events like a political convention, a war, or an assassination in which competitors meet head to head for audience attention and critical acclaim. Here, almost all the competitive verdicts were clear-cut: most TV critics agreed that tireless and able Walter Cronkite easily trounced the teams of Huntley-Brinkley-McGee on NBC and Bergman-Reynolds on ABC. AP bested UPI, obtaining up to 70 per cent of the page one play in competitive editions during the flight. Among newspapers, the New York *Times* was in a class by itself.

Yet when all the splash and dash of media coverage are subjected to some routine tests of journalistic performance, one feels similarities to the morning after an especially memorable party. NASA had been host to an exciting week-long event, all right; the three astronauts were perfect heroes with whom to spend time—competent, clear-eyed, courageous. But precisely what were all those other people doing there—Steve Allen, Julie Harris, James Earl Jones, Duke Ellington and his band? Though the networks kept insisting on the "epic" nature of the event, they succeeded in turning history into an extra-length Johnny Carson show. The ABC documentary on Apollo, for instance, was narrated by Efrem Zimbalist, Jr., the "star" of an ABC–TV dramatic series. A touch of blatant commercialism is to be expected. But the danger is that media which took so many bows may begin to believe their own press releases.

The networks, according to *Variety*, spent some $13 million (including millions lost on pre-empted time), and the print media had as many years to prepare for the lunar landing as NASA had. Did anyone get his money's or his time's worth? Was there a better way to spend the money and time? More to the journalistic point, were all the essential facts clearly presented? Were the appropriate conclusions drawn from the facts? Was the event placed in context and related to other concerns of the audience? Was the meaning of the moment isolated and elaborated?

Any critical inspection of the dark side of the moon coverage exposes embarrassingly basic weaknesses and structural faults in media performance. According to the usual formulation of the way the media covers a story, TV and radio give the breaking news, and newspapers and magazines provide the background and interpretation. In the case of Apollo 11, the full news failed to get through on TV—the hours of continuous coverage to the contrary; in print, with only a few exceptions, the background context and interpretation never materialized adequately—nine years of preparation time to the contrary. Here we were, Earthmen, ready to set foot on another body in the solar system Earth's satellite—and not, incidentally, a "planet" as several commentators and writers persisted in misnaming the moon. Flank speed, clear out the white space, here is a story that newspapers could really run with. So one might have thought. But the performance of preparing the readers for the event is spotty at best.

The Los Angeles *Times*, for example, must be counted among one of the four or five best papers in the country, but did not offer any distinguished or distinctive material before the flight, though it serves an area that is buoyed up by the aerospace industry. The Washington *Post*, another superior newspaper, has a highly competent science staff but it was confined before liftoff to straight advance stories plus one major Sunday turn. The *Post*'s reporting was superior—if it only had been laid out and illustrated with flair. Even in Houston, home base of Mission Control and the astronauts, the *Chronicle* and the *Post* had to flesh out their largely routine coverage with copy from the New York *Times* and the Washington *Post*-Los Angeles *Times* Service.

The thought of men going to the moon stirred few imaginative juices even in the most committed media space boosters. *Life*, America's foremost picture magazine, has been a showcase of the national space program since a peculiar 1962 financial arrangement gave it the magazine rights to the astronauts' "personal stories" [see box]. Yet despite *Life*'s close partnership in the space program, the magazine's major preparatory effort consisted mainly of a coy farewell to the "old" moon plus twelve pages of color pictures of famous tides around the world (the moon's pull on Earth—get it?). To my knowledge only two newspapers attempted to prepare material equal to the event: the New York *Times* and *Today*, a Gannett paper in the Cape Kennedy area. Taking into account the respective resources available, *Today* did a much better job.

The *Times*' coverage began taking shape last March 10, when, in a memo to his editors, production men, and cartographers, Managing Editor A. M. Rosenthal asked what turned out to be some wrong questions: "Are there people outside the paper whose brains we should start picking for planning and contributions? What special qualities can we give our coverage, because of the talents and techniques available to us, that nobody can match?" The *Times* proceeded to pick brains preponderantly outside the paper, and mostly official NASA brains at that. In fact, the result of Rosenthal's memo—the *Times*' major preparatory supplement, Man and the Moon—resembled more a bland government history than an independent analysis.

The *Times*' own science and space staff has suffered from some defections and a split personality in recent years; the paper had, until a post-flight realignment in mid-September, both a Science News Coordinator and a Science Editor. In the event, the staff writers were outnumbered in the supplement pages by the guest government contributors. Man and the Moon contains a modest fifteen pages of editorial matter, after ads and the cover are subtracted. Of the thirty-one articles in the section, only seven were written by *Times* staff men (including a short feature by television critic Jack Gould). As if to underline the *Times*' own apparent staff limitations, one of the longer stories in the package was by Henry F. S. Cooper, Jr., a staff writer from *The New Yorker*. No fewer than sixteen articles were signed by present or past NASA officials. Most of these were official accounts with all the life squeezed out of them, despite heavy rewriting by the *Times*. Little of the real flesh-and-blood vitality—and human frailities—of the past decade of the American space venture were offered in these accounts.

Among the missing stories, to take only the most obvious examples, were the Cold War beginnings of the space program; John F. Kennedy's search for a space spectacular "that the U.S. could win"; the spurious nature of the "moon race" with the Russians (we raced only ourselves); the separate fiefdoms and the abrasive clash of personalities in NASA; the logrolling politics of space appropriations and decisions that put the Manned Spacecraft Center in Texas and other installations in Louisiana and Massachusetts; the shoddy workmanship of some of the biggest U.S. firms and slipshod Government management procedures that led to the death of three astronauts—in short, the full, as opposed to the official, story of Apollo. Instead of the carefully pruned Government accounts, how much better to have loosed some young tigers—or some old ones—on the *Times* staff back in March. But the *Times* chose, as *Times Talk*, the paper's house organ later explained, to send its Science News Co-

ordinator to NASA headquarters, where he was "promised full cooperation."

At the same time the three American networks were also getting in bed with NASA. This union, however, was a little more natural. Previously in these pages [Summer, 1965], I have observed that the alliance of TV and the U.S. space program was a marriage made in heaven; that the network news organizations need the space program to employ fully their undeniable journalistic muscle during dry news spells between Presidential election years. What I didn't see quite so clearly at the time was the obvious corollary that the space program needs the TV networks. Like Tang, Gulf Oil, Western Electric, Philco-Ford, or any of the other TV advertisers who utilized the tube during the flight to sell their products, NASA must push space spectaculars to win friends, influence Congressmen, and keep the budget appropriations coming in. This public relations factor, as much as abstract doctrines about Freedom of Information and the American Public's Right to Know, accounts for NASA's laudable open-skies information policy.

Less than a decade ago, when the infant U.S. space program was still in the grip of the military, space launchings were clandestine ventures held behind high security fences. Today at Cape Kennedy a media city springs up for each launching. For Apollo 11, a permanent concrete stand worthy of Belmont or Santa Anita held 4,000 pencil reporters, and a babble of foreign voices testified to the international nature of the event. No fewer than fifty-five countries were represented, according to NASA, including Yugoslavia, Rumania, and Czechoslovakia. Alongside the grandstand, a trailer city of radio-TV vans brought the whole drama live and in color to listeners around the world. After the launching, much of the news corps was airlifted by commercial planes to Houston, where NASA public information offices kept them informed twenty-four hours a day.

Most newsmen and even those critics who cast a cold eye on the Government in general have tended to regard the open skies policy as a valued example of reality television—an actual event in actual time—and thus a great boon to the viewer. Yet Apollo 11 demonstrated that this form of reality TV is at best a mixed blessing; there are only thirty to forty minutes of *real* reality TV in a space flight, even one as soaring as the eight-day Apollo 11 mission. There are the last minutes of the countdown, the five or six minutes of liftoff and powered flight within range of the camera, and at the very end the twenty or thirty minutes on the carrier waiting for the spaceship to splash down. That leaves the main events beyond the TV eye. To an extent, NASA has been helpful about these gaps in the pictures: handheld cameras, for example, have been deployed for in-flight telecasts from the past few Apollo missions, and it is common knowledge among the trade that they are done as *media events*.

If NASA was able to oblige the networks with in-flight and on-the-moon telecasts that solved part of the reality TV problem, it was not able to do so much for the visual medium during the rest of the mission, and especially for those thirty-two-odd hours the networks had cleared from Sunday morning, July 20, to Monday evening, July 21. Indeed, news executives at CBS, NBC, and ABC had to convince the money men at the level of William Paley, Robert Sarnoff, and Leonard Goldenson: 1) to cancel regular commercial programming for the hours on the moon; 2) to pay for elaborate sets and moon simulators to enable TV to provide video with the audio; and 3) to sign the checks for such guest talent as former astronaut Walter Schirra, who reportedly has a $100,000 contract with CBS.

Producers began lining up talent for their coverage, matching poet-for-poet (ABC had James Dickey, CBS had Marianne Moore); media-personality-for media-personality (NBC mobilized Barbara Walters and Joe Garagiola, ABC had Steve Allen and the premiere of "Moon Maider" by Duke Ellington, and CBS offered Orson Welles); astronaut-for-astronaut (to counter the CBS coup in getting Schirra, NBC signed up *two* astronauts); scientist-for-scientist (ABC had Robert Jastrow, NBC had Harold Urey); and pundit-for-pundit (Marshall McLuhan and Bill Moyers on ABC, Rod McKuen and Marya Mannes on NBC, Ray Bradbury and Arthur Goldberg on CBS). By launching day, the producers found that they had more commitments and more talent than they could effectively employ. One scientist signed by one of the networks as a commentator said he had a "great sense of sitting around and not being used; the producers didn't seem to have too much understanding of the science of the event."

Before the launching, the single best Apollo story from a journalistic viewpoint was the role of Wernher von Braun and other German-born alumni of Peenemünde. The imposing von Braun had built the Saturn 5 rocket and was always ready when a NASA appropriations bill floundered to appear and win over Congress. The New York Times' Bernard Weinraub sniffed at the edge of the story in an interview with Dr. Kurt Debus, a quiet man with a Heidelberg duelling scar who is now the director of the Kennedy Space Center.

During the pre-launch news conference at Cape Kennedy there was almost a novelistic contre-temps when a West German radio correspondent asked von Braun to answer a question in German so he could record it for his listeners. Von Braun handled the curve ball nimbly, answering first in English. Norman Mailer, special correspondent for Life, took it all in. In fact, Mailer's Life articles, for which he will earn a reported $1 million after book and overseas rights are sold, made von Braun the central figure of the narrative. Mailer saw the subtleties of relationship between the American-born NASA directors and the German-born field leaders ("NASA is sensitive about origins," he wrote); he saw the dialectic of the news conference as von Braun—"sound, sensible, quick as mercury"—supplied the lead for the A.M.s and the overnights while von Braun's co-conferees dawdled and bobbled questions. He observed the fatuous reporters who applauded and gave a standing ovation to the people they were supposed to be questioning.

This adulation was particularly galling. One would think that reporters temporarily check their friendships and even their patriotism at the door of news conferences and go in and ask enlightening questions. Instead, many newsmen apparently see themselves as agents of the subject rather than as his potential adversaries. Thus the president of the National Association of Science Writers, a newspaperwoman who should know better, recently expressed her "thrill" at having had "a tiny role in mankind's historical step"—she had been in Houston covering the flight. And Walter Cronkite, who also should know better, moved out of his critic's seat on the aisle at a New York Sigma Delta Chi meeting, to defend the space program against "left-wing opposition."

Once the astronauts left earth, the coverage—apart from live pickups from the principals—deteriorated. In this second flight phase there were outright errors of fact (APOLLO BREAKS OUT OF EARTH'S PULL, the Houston *Chronicle* mininformed its readers). Armstrong and Aldrin set down on the moon after an agonizing descent during which their computer malfunctioned, their fuel ran low, dust clouds obscured their vision in the final seconds, and Mission Control was at a loss to know where precisely the Eagle had landed. Yet there was little enlightenment from the networks about what was happening. The full story of those final two minutes of the Eagle's descent was not put together until at least four days later—mostly by Richard Witkin of the New York *Times*, a pencil reporter working in New York with his curiosity and his telephone. One of the old hands at space reporting who had another beat at the *Times* and had been drafted for the moon coverage, Witkin had heard along with everyone else Aldrin's cryptic messages about "Program Alarm 1202 . . . Program Alarm 1201 . . . Program Alarm 1203." Curious, after he returned to New York he began phoning various sources at Mission Control. By Thursday afternoon, after the astronauts had splashed down in the Pacific, Witkin had his story. He described how the *Eagle* had landed with "the margin of success . . . much narrower than the world realized." He quoted Lt. Gen. Samuel C. Phillips, director of Project Apollo, as saying: "We came awfully close to having to abort."

Witkin doesn't claim an exclusive; he says that Jules Bergman, the hard-working science editor of ABC, developed much the same material about the same time. Also Rudy Abramson, of the Los Angeles *Times* and Tom O'Toole of the Washington *Post* apparently performed creditably as bird dogs and were the first to get tapes of the touch-and-go phase of the lunar descent.

Especially revealing is a log of NBC's coverage kept by Kenneth Paul, a 1969 Dartmouth graduate who served last summer as a magazine trainee:

"In the first hours after lunar touchdown, there seems to be a failure to keep abreast of breaking news . . . insufficient explanation of the 'minor problems' that arose: the communications difficulties, the landing. . . . Topless showgirls in Las Vegas are shown uncorking champagne at the moment of landing. . . . Ray Scherer report from NBC's European Space Center . . . still more reactions than news. Good feature on the fantastic interest and coverage in West Germany, an unconscious ironic set-up for later talk with von Braun. Cologne experts give frighteningly clipped comments. . . . BBC moon expert Patrick Moore: 'No admiration can be too great. This is obviously a moment that humanity can never forget.' . . . Mrs. Armstrong tells reporters, 'I'm just about as excited as you-all are.' Still more reactions. Rev. Herman Weber in special Wapakoneta (Armstrong's hometown) service. . . . Mrs. Pat Collins with intelligent, sharp rejoinder to the newsman's limp question, 'Isn't Mike a little disappointed up there with the others down on the moon'—'Don't you think he's probably with them in spirit?' Asked if she'd watch the moon walk on TV—what an idiotic question—she came back, 'Oh positively—Is anyone going to bed?' . . . Interview with Sen. Muskie . . . A Truffautesque piece on space pioneer Hermann Oberst and his protege von Braun—the old codger eats cake while von Braun drones on about the old man's visionary contribution. . . ."

When the story returned to earth, there was the same dearth of reportorial digging, on the tube and in newspapers. One blank centered on the astronauts, who had gone into quaratine to protect the world against extraterrestrial germs and, some thought half facetiously, to protect their contract with *Life* and Field Enterprises. A few enterprising reporters such as Evert Clark of *Newsweek* managed to penetrate the isolation barrier by the simple expedient of interviewing on a not-for-attribution basis the official who had been interviewing the astronauts. As a result, much of what the astronauts had to say in their stories in *Life* proved hardly fresh at all.

Another, more serious blank involved the growing dissatisfaction of scientists within NASA over the dominance of the engineers and what scientists considered undue emphasis on public relations. Here was a story of conflict and controversy, the kind on

which reporters are supposed to thrive. Feelings were so inflamed that at one point early in the moonwalk the scientists, fuming at what they regarded as time-wasting planting of the U.S. flag and a telephone call from the President, actually phoned mission control and chivvied them about "civic ceremonies" when the crew was supposed to be collecting priceless rock samples. In fact, the dissatisfactions dated at least from last April, but it was not until the Manned Spacecraft Center's director of science, Dr. Wilmot Hess, announced his resignation on August 1 that anyone developed the story of the "scientists' complaint." And then only one newsman, Victor Cohn of the Washington *Post*, did the story in detail with quotes and background. On August 5, one of the astronaut/scientists, Dr. F. Curtis Michel, resigned—the fourth such scientist/astronaut (as contrasted to pilot/astronaut) to do so; not until September was Michel interviewed extensively about his conviction that NASA discriminated against the scientist/astronauts in flight assignments.

Where had all the reporters gone? Just possibly the constant blaring of the ubiquitous "squawk boxes" in Houston—there are perhaps 250 at the MSC and in rooms and hotels where reporters gather—may inhibit performance of basic news work; it is as if the overload of sensory stimuli by eager information officers at NASA has made "facts" and "leads" effortless to acquire and, in the process the muscles and synopses of the media have atrophied. It may even signify a permanent genetic change in the media, as more Government and private agencies discover that the way to keep newsmen flabby is to spoon feed them steadily with more information than they can use.

Another bobble at Houston involved a sin of commission rather than omission. When the first samples of moon rocks arrived at the Lunar Receiving Laboratory, the hard-core specialists standing by applauded and stamped their feet and sent out lead after lead as successive protective gear came off and the rocks became visible to all. What they largely failed to point out was that an unmanned Surveyor probe had soft-landed on the moon a few years before and radioed back a good deal of the same information that the Apollo 11 rocks were disclosing—at considerably cheaper rates than Apollo. Moreover, the report of the Surveyor findings had been published in the magazine *Science* by Prof. Anthony Turkevich only a few weeks before the Apollo 11 flight; informed—and full—accounts might have at least mentioned that the science of Apollo 11 could be performed by alternate transportation modes.

But is anyone so naive as to believe that science or the quest for knowledge are the motivating forces behind the U.S. manned spaceflights? What then is? This is a question that might have properly been aired. David Satter, a young university graduate and former college newspaper editor, now a Rhodes scholar, watched all of CBS' coverage and came away with the question on his mind. Said Satter:

"I took away the impression that CBS, despite its thorough job of reporting, had missed the point. . . . Everyone from Walter Schirra to Robert Heinlein, the science fiction writer, assumed that it was [significant], that it heralded the beginning of a new age. There was no one to answer questions like, can this feat yield any immediate benefits, and if not, how long will it be before any kind of return—other than a propaganda return—can be gained from this massive investment? It is possible that we do not despite everything have the resources to follow up this project, that we cannot, in fact, finance every project that we are technologically capable of undertaking? And if we are not, how do we choose between projects? What are the differences between this exploration and famous explorations in the past? Does this trip not have a radically different *raison* than, say, Marco Polo's journey to China? It was questions like these that I felt were left unanswered in the adulation heaped on the astronaults, the space project, and the American common man."

In truth, air time and newspaper space were given to the critics of Apollo—who by and large were as simpleminded in their anti-Apollo arguments as the space boosters have been in their blue-sky declarations. It was almost too easy to go, as Jimmy Breslin did, to a New York City *barrio* while the men were walking on the moon and write about all the rats and overflowing garbage cans. That's what football pros call a "cheap shot." Breslin, as much as anybody, knows that the money cut from the space program by any presently imaginable U.S. Congress would not naturally flow into big-city ghettoes. During Apollo 11 the whole space priorities vs. domestic priorities discussion became a kind of surrogate for the Larger Issues of the Nation—to no one's credit. Even on camera Walter Cronkite for some reason felt compelled to boost the program and to slam the young and the disaffected with: "I wonder what all those kids who pooh-poohed this program are saying now?" After listening to Cronkite, radical journalist Andrew Kopkind suggested that if the "kids" had any spirit left they would break into the CBS space simulation center at Grumman Aircraft in Bethpage, Long Island, and scream: "Pooh Pooh!"

"Pooh-pooh" suggests the level of banality reached by both the Apollo advocates and most of its critics. It could have been an elevating and eventually a self-revealing week in the history of man's lurching attempts to understand his world and himself. But no one had the time or the inclination to approach meaningful material in a fresh way, to seriously consider, for example, the proposition: "We go to the moon because we want to, we don't fix the urban mess because we don't want to." The only thing I saw anywhere that came close was the CBS-TV program called *Nearer to Thee*? Physicist William Davidon, sculptor Richard Lippold, and theologian Rev. Theodore A. Gill, among others, met in an unadorned, unhooked-up CBS studio and, for a change, TV had something to say. Lest too many people hear it, it was at 10 a.m. Sunday EDT.

What will save the media from their own inadequacies during the next "story of the century?" Will anyone be prepared to do basic digging and clear interpretation? Who will even care? Certainly not shortsighted editors who offer official histories, or ratings-minded producers who perform as ringmasters for a Big Top on the tube, or reporters bereft of imagination who ask astronauts' wives "how do you feel now?" or journalists who see themselves as participants and allies of the Government. As veteran journalist James Cameron recently pointed out in the English weekly *New Statesmen*, the media used to be criticized for "sensationalism"—blowing up petty matters into big stories. Now, he says after watching the Apollo coverage, the charge is exactly the reverse—the media have succeeded in trivializing momentous stories. "The papers and the telly, confronted with genuinely significant and even vital events, reduce them intuitively to a sort of basic piffle . . . a level of numbing banality."

Few of the reporters who covered the flight in Houston were aware of this accusation. They were hearing somewhat sweeter thoughts from Wernher von Braun: "I would like to thank all of you for all of the fine support you have always given the program, because without public relations and good presentations of these programs to the public, we would have been unable to do it." The final apotheosis of the press: It has made the von Braun-NASA space team, and it is grovelingly grateful.

OEO PROGRAM MUST IMPROVE

HON. JOE SKUBITZ

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. SKUBITZ. Mr. Speaker, there is not any question in my mind that the Office of Economic Opportunity—OEO—needs to be vastly improved because of scandals within some of the agency projects in various parts of the Nation. Unfortunately, we can expect any new program will have growing pains. However, OEO must improve and must do so quickly.

I supported OEO Director Donald Rumsfeld because I have great faith in our former colleague's ability to improve the situation at OEO. I supported his request for more time and funds because I feel that Mr. Rumsfeld is entitled to a chance to make the program work.

From the reports which I receive from my congressional district in Kansas we are fortunate to have an OEO program that apparently has worked well. The enclosed article in the Parsons, Kans., Sun of December 6, 1969, edited by Clyde Reed, sums up the situation very well. I am sure that if the program had marked failures that Editor Reed would have discovered them and reported them in his fine newspaper. The article follows:

SEK–CAP'S REPORT: POVERTY'S HARSH FACTS

PITTSBURG.—The seven-county southeast Kansas community action organization, reported to its constituents here Friday night on the harsh facts of poverty.

More than 3,700 persons received assistance and took part in various SEK–CAP programs last year.

Three thousand of them have incomes which are below poverty guidelines. Only half of them are on social welfare rolls.

SEK–CAP put it bluntly in a report at its first annual meeting:

"Hundreds of families in southeast Kansas are existing on less than $75 a month, in poor housing, are suffering from malnutrition, are doing without proper doctor, dental and medical care.

"Hundreds will do without these services rather than be stripped of their dignity by some welfare representatives."

"We are engaged in a war against the common enemy of mankind—poverty," said a position paper adopted by SEK–CAP's multi-county board and read by James W. Garrison, director to 750 persons.

Surveys made by community organization aides in the seven counties comprising the SEK–CAP jurisdiction—Allen, Bourbon, Cherokee, Crawford, Labette, Linn and Montgomery—found that 2,726 individuals or families are living on less than $125 a month. Of that number, 1,136 are getting social welfare assistance.

The surveys numbered 380 in Allen County, 356 in Bourbon, 458 in Cherokee, 454 in Crawford, 347 in Labette, 192 in Linn and 539 in Montgomery.

SEK–CAP has made "hundreds of referrals" to existing agencies, the report said, such as employment offices and welfare agencies.

"By following up on these referrals, we are finding many people being discouraged or talked out of the food stamp program, medicaid and other services to which they are entitled.

"Our groups are going to take action on changing these injustices. We have already

improved the attitudes of many agencies and we plan to continue in our efforts to make poverty a little easier to bear."

Community-action covers adult and tutorial education, family planning, emergency food and medical services, Head Start classes and other functions.

The U.S. Office of Economic Opportunity provided $810,000 for SE-CAP's budget in 1968–69, while nonfederal costs, principally in the form of contributed services, totaled $218,008.

A breakdown of costs revealed that administrative expenses for the year were $95,409, of which $59,905 was for personnel. The rest was covered in such items as travel, rent and equipment.

SEK-CAP listed 53 professional employes, including 36 engaged in Head Start, and 116 nonprofessional employes, 58 of whom are in Head Start.

Gov. Robert Docking, principal speaker at the dinner, said that SEK-CAP is helping make southeast Kansas a better place in which to live.

"Industry any SEK-CAP can work hand-in-hand to provide this region with a sound economy," the governor said.

"A certificate of merit" from SEK-CAP was presented at the dinner to Clyde M. Reed, editor and publisher of The Parsons Sun, "for demonstrated social concern" and service "beyond the call of civic duty."

Robert H. Booker of Parsons, president of the Labette County Community Action Board, made the presentation in SEK-CAP's behalf.

POW TESTIFIES

HON. RICHARD L. ROUDEBUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. ROUDEBUSH. Mr. Speaker, the liberal media have attempted an all-out smear of an American hero and prisoner of war who has returned home to describe the terrible effects of pro-Hanoi statements made by prominent American leaders.

John Lofton, Jr., has documented this incredible press attack on an American who has dared give Congress the true facts of POW life in Communist North Vietnam.

To the liberal media, an American hero is an object of scorn who must be destroyed, while anti-American statements are given full credibility by left-wing press sympathizers.

Lofton's fine article appeared in the December 10, 1969, edition of the Indianapolis News. For the clarification of the 91st Congress, it follows:

LIBERAL MEDIA MAUL MAJOR ROWE

(By John Lofton, Jr.)

While the liberal media have given full coverage to the alleged U.S. massacre at My Lai hamlet in Vietnam, they have been something less than enthusiastic about publicizing the barbarities of the Communists.

The recent visit to Capitol Hill by Maj. James N. Rowe is a case in point.

Invited to appear before the House Armed Services Committee to tell what it was like to be a captive of the Viet Cong for five years, Maj. Rowe accepted. After hearing his tale, several members of Congress were so impressed they asked the major if he would make individual films with them for showing back in their congressional districts. He agreed.

In the films, the major spoke of what Communists try to do to a prisoner:

"The Viet Cong have actually two goals with an American POW. First, they want to get as much propaganda value from him as they can while they have him. This is during indoctrinations. This is while they're trying what they call thought correction. Their major premise being that you're wrong, politically, socially, anything to do with religious concepts—you're wrong.

"The second goal they have is they want to try and get an American POW [prisoner of war] to violate our Code of Conduct, as they interpret it. They feel as if they can do this, that an American POW, if he is sent back to the U.S., will be punished by the government for violation of the code and once punished by the government, will be alienated and can be picked up by a left-wing organization and used as a propaganda tool for the anti-war movement or whatever they might have right within the United States. This is a far-reaching goal that they have with American POWs."

Maj. Rowe talked of the effect of U.S. anti-war propaganda:

"During this period of time (1963–67) they drew from their own sources: Radio Hanoi, Radio Liberation, etc. Generally speaking, this was ineffective because this was a Vietnamese writing for an American and even the syntax, the way they wrote their ideas were different from ours . . . But in the latter part of 1967, they ceased quoting any of their sources, dropped them completely, and began drawing from American sources, our own news media in the U.S. They started drawing from statements made by prominent individuals within our government (Sens. Mansfield, Morse, McGovern, Fulbright), people of note within the U.S. . . . They were quite free in using this . . . Radio Hanoi was free with their quotes.

"Radio Liberation drew quotes from American sources such as the Associated Press, United Press International, Time, Newsweek, Life, Look, the Washington Post and the New York Times. The political cadre who were in charge of indoctrination began to include these in the context of their lesson plans when they gave us actual indoctrinations so that it was a well-rounded attack and it was being drawn from right within the U.S."

Now, what kind of coverage did Maj. Rowe get on his trip to Washington to tell the Armed Services Committee about life in a Communist prison camp? Following is the lead paragraph from the front-page story in the Washington Post headlined "Major Held Five Years by Viet Cong Wages Fight on Doves in Congress:"

"With the sponsorship of hawkish congressmen and the knowledge of the Pentagon an Army major who is a Vietnam hero is attacking antiwar legislators and certain newspapers and magazines."

Later on in the story, reporter Bernard Nossiter tells us very straightfacedly that Maj. Rowe "poses in reverse the problem raised by servicemen who sign antiwar ads and march in peace parades. One central difference, however, is the high level sponsorship Rowe enjoys." Another central difference is that Maj. Rowe is speaking up for his country. An argument could also be made that those antiwar GIs signing ads and marching in parades also have high level sponsorship but not in this government. But that's another story.

This first Washington Post story appeared on a Sunday. Four days later, the follow-up story appeared, spread across eight columns headlined: "Major's Anti-Dove Activities Are Criticized in Congress."

Bristling at what he called the major's "vicious attacks," Ohio Sen. Stephen Young, labeled Rowe a "puppet of the Pentagon propagandists" and asserted that the major had "unmitigated effrontery" in questioning the patriotism of Sen. McGovern, a decorated World War II pilot.

In any event, it all goes to illustrate what Vice-President Agnew was griping about when he issued his celebrated call for more fairness and objectivity in the media.

At this rate, the only way an American POW is going to be able to get coverage is if it can be proven that he abused his captors.

HOUSE CONCURRENT RESOLUTION 454

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 15, 1969

Mr. PHILBIN. Mr. Speaker, I think one of the most inhumane aspects of the current war in Vietnam is the refusal of our enemies to accord proper treatment as prescribed under the Geneva conventions to prisoners of war.

I recognize the difficult problem presented to our Government by the unfortunate and unhappy situation, but I think Congress must continue to urge the State Department to move in every way we can to seek viable agreements with the enemies, and with the world community, including the parties to the Geneva conventions and the United Nations, to make sure that rules of human conduct, compassion, sympathy, and kindness be substantiated, strengthened, and substituted for the calloused, merciless disregard of ordinary human values and the conventions that have been displayed by Hanoi and its collaborators.

I urge that our State Department continue to give these matters most persistent, dedicated attention, to the end that we may be able, not only, to perfect the Geneva conventions, but search vigorously for ways and means by which they can be respected, considered and enforced by all nations.

It is time that North Vietnam and the National Liberation Front responded to the appeals of other nations to treat American prisoners of war, and all such prisoners, like human beings, and accord them their human rights under international law and existing conventions.

The plight of American prisoners held in bondage by the Hanoi government is a question that must be resolutely handled by this Government. I recognize that efforts have been made, but they certainly must be intensified, concentrated, and exerted in a dedicated forceful manner that will leave no question in the minds of Hanoi or the nations of the earth about our determination to seek and get humane treatment for our prisoners and all other prisoners being held by the North Vietnamese Government.

I recognize that it is very difficult to deal with this Government. We have been trying for several years now to get peace with them and these efforts have been stepped up in Paris during the past year or more, and, yet, our fervent pleas for peace and a world freed of the horrors of war have fallen on deaf ears. Only a stony silence of contemptible, insulting

retorts have been the responses to our many appeals. Yet I urge that we continue to make these appeals and go into the United Nations and every other form that we think can be helpful to get compliance with human laws and rulings of the Geneva Convention regarding Hanoi's treatment of our prisoners. This is a question which we must follow up with special, vigorous attention and unflagging effort.

PLATTSMOUTH BAND "KNOCKS 'EM DEAD" IN CHICAGO

HON. GLENN CUNNINGHAM

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. CUNNINGHAM. Mr. Speaker, the Plattsmouth, Nebr., High School band marched in Chicago's State Street Council Christmas Parade on November 30, making the 500-mile trip by bus.

The Cass County youngsters performed before an estimated 500,000 persons along the parade route. And it was no ordinary performance, according to the Chicago Daily News.

In a story reprinted by the Plattsmouth Journal, the Chicago paper said "the kids from Plattsmouth did indeed knock 'em dead."

Mr. Speaker, that is quite a tribute to my young constituents and I am certain my colleagues join me in extending congratulations for a job extremely well done.

The editorial follows:

THE KIDS FROM PLATTSMOUTH SWING!

A bearded red-costumed visitor from the North Pole was the one who came the farthest to appear in Chicago's 40-block-long Christmas parade.

But far and away the parade performers from next-farthest away were 92 high school boys and girls in royal and Columbian blue band uniforms.

All the way from Plattsmouth, Neb., they had been in Chicago since Friday without ever dropping into the International Amphitheatre to see the International Live Stock Exposition, which runs through Sunday.

"These kids see lots of stock shows," said Jack Herweg, band director.

If not for the stock show, then what did they come for?

What the small-town kids from the 550-enrollment school came for was to knock 'em' dead in the big city—and Sunday afternoon, on State St., they did.

The Air Force Song, The Navy Song ("Anchors aweigh . . ."). The Marine Hymm. The Field Artillery Song. . . .

All marches any band can do.

But all marches, also, that only a really good band can do well.

Before an estimated 500,000 persons who watched the State Street Council's 35th annual parade, the kids from Plattsmouth (Pop. 7,000) did indeed knock 'em dead.

"They love to put on a show for people every time they get a chance," said Hedweg, in explaining his musicians' unprecedented 500-mile journey to Chicago to play fewer than half a dozen songs.

One of eight band members who didn't make the trip was Lynn Munhall, laid up with the flu.

She was to have helped carry the large white-letters-on-royal-blue-background sign reading "Plattsmouth, Nebraska, High School" that preceded the band as it marched smartly southward from Wacker Dr. to Congress.

But another girl (Renee Wilson, normally a bass clarinetist) filled in for Lynn at the last minute. And even without Lynn, the kids from Plattsmouth put on a great show.

PASTOR STREATER DISCUSSES THE PEACE MARCH

HON. L. MENDEL RIVERS

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. RIVERS. Mr. Speaker, Mr. and Mrs. Robert Himm of Daly City, Calif., have graciously brought to my attention a letter from John B. Streater, pastor of the First Baptist Church of San Francisco, to his congregation discussing the peace march in San Francisco.

This is one of the most thoughtful and forthright discussions of this issue that I have seen, and I take this opportunity to have it placed in the CONGRESSIONAL RECORD so that all of the Members of the House may have the opportunity to ponder Pastor Streater's words.

Pastor Streater was in China when the Communists took over there in 1949. He is a man who knows whereof he speaks. His letter follows:

NOVEMBER 7, 1969.

DEAR SIR: I recently received a letter from "Professionals for Peace," soliciting my participation in the so-called "November 15th *Peace March* in San Francisco." I am aware that many clergymen in our city will be participating in that march. However, as Pastor of one of the first protestant churches in California, and the oldest Baptist church in California, I would like to make it clear that the clergymen in that parade, November 15, do not represent me or the church I serve, as well as great numbers of evangelical churches in the bay area.

I disapprove of the November 15 demonstration for the following reasons.

(1) Although people may say that this is an immoral war, in fact, it is just the opposite. The most immoral think I can imagine would be for us to desert the South Vietnamese and let them fall into the hands of the Communist butchers of the North.

I was in China when the Communists took over in 1949, and saw their horrible program of torture, murder and brainwashing. One of the greatest tragedies of our history is that we failed to help the people of China in their hour of need.

(2) Americans have been giving millions of dollars annually, as well as giving their sons and daughters for foreign missions for generations. This effort for foreign missions is for the purpose of delivering people from darkness, slavery and bondage. For clergymen now to contradict this great history of modern missions, and say that there are more important things than protecting the rights of the Vietnamese people, is beyond by imagination. If we should immediately pull out of Vietnam, and that is what these clergymen and the peace protestors are trying to force our Government to do, there would be the greatest slaughter of innocent people that country has ever seen. The only moral thing we can do is to see that the Vietnamese have the right to choose their own form of government.

(3) The action of these clergymen and others in the so-called peace march, is actually prolonging the war by giving the North Vietnamese Communists the assurances that we really are not going to fight through to a just peace, but that we really are going to fake out and let them have what they want.

(4) The so-called peace marchers are actually propagating the old song of the isolationists down through the history of this country. They apparently would have us take the attitude that we don't care what happens to any other nation of people as long as we can be fat and healthy in this country. They are saying it is more important to raise our standard of living than to give the people of South Vietnam the opportunity of living in a free world.

(5) I am against this march, and particularly for clergymen to participate in it because it is unchristian, un-American and inhuman. It is unchristian, for they want us to ignore the rights and needs of the weak. It is un-American, for they want us to disobey our laws and the leadership of our elected officials. It is inhuman because they want us to refuse to hear the cries of the men, women and children in Vietnam whose husbands, wives, children and parents have been slaughtered by the terror tactics of the North Vietnamese.

(6) I am against this so-called peace march and the clergy participants because it belittles and degrades our servicemen, and particularly, those who have died trying to free the Vietnamese.

Finally, I would appreciate very much your help in informing all the people of the San Francisco Bay Area that the ministers marching on November 15, do not represent all the ministers, in fact, only a very few ministers of the Gospel of the Bay Area.

Sincerely yours,

JOHN B. STREATER,

Pastor, First Baptist Church of San Francisco; Immediate Past President, West Bay Ministers Alliance; Immediate Past President, West Bay Committee of National Association of Evangelicals; Member, Board of Directors, Kiwanis Club of San Francisco; Chairman of the Board of Directors of the Scandinavian Seamen's Mission, San Francisco; Vice President, Evangelical Concerns, Inc., San Francisco.

MICHIGAN LOSES AN OUTSTANDING EDUCATOR

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. BROOMFIELD. Mr. Speaker, it is with a mixture of pride and sadness that I call the attention of my colleagues to the appointment of my good friend, Dr. Durward P. Varner, as chancellor of the University of Nebraska.

For the past 10 years, Dr. Varner has been chancellor of Oakland University, an outstanding educational institution located in the 18th Congressioal District of Michigan which I represent.

Under Dr. Varner's stewardship since it began operating in 1959, Oakland University has achieved a national reputation and become one of the fastest growing universities in Michigan.

It has been acclaimed throughout the country for its high scholastic standards and particularly for the excellence of the Meadow Brook Music Festival and the Meadow Brook Theater which

thrived under Dr. Varner's encouragement.

A graduate of Texas A. & M., Dr. Varner was an agricultural economics professor at Michigan State University before being named Michigan State's first vice president in 1955.

During those years, Dr. Varner worked under the Honorable Clifford M. Hardin, our present Secretary of Agriculture, the man Dr. Varner will succeed at the University of Nebraska.

When Oakland University was created from a 1,400-acre estate near Rochester, Mich., Dr. Varner was named to head the new branch by former Michigan State President Dr. John A. Hannah, who is now the Administrator of the U.S. Agency for International Development.

During the past decade, Oakland University has grown from its original enrollment of 500 students to more than 6,000 and is now moving to establish its own graduate programs. Despite its rapid growth, Oakland University has maintained the highest intellectual and academic standards due principally to Chancellor Varner's personal dedication to those ideals.

More than just a top-notch educator, Dr. Varner made outstanding contributions to Michigan and our country as a citizen. He has devoted a great deal of his personal time and energy to country-to-country foreign assistance efforts in which Michigan has been involved and to the encouragement and furtherance of the arts in Michigan.

There is no one in Michigan who will be missed more than Dr. Varner just as there is no one more deserving of the success and high honor he has been accorded.

CATHOLIC PRIEST KILLED

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. LONG of Maryland. Mr. Speaker, I am indebted to Mr. Joseph J. Hess, of Parkville in Baltimore County, for calling my attention to an article in The Catholic Review. Father John B. Buu Dong was found in a mass grave outside of Hue. He is the fifth Catholic priest killed in the Hue area by the Vietcong during the Tet offensive.

At this point I should like to share this article with my colleagues:

BODY OF VIETNAMESE PRIEST FOUND IN MASS GRAVE IN HUE

HUE, VIETNAM.—The body of a Vietnamese priest killed by the Viet Cong during the Tet offensive of February, 1968, was found outside Hue city.

The priest, Fr. John B. Buu Dong, 56, was pastor of a parish east of Hue when he was taken away in February, 1968.

That was the last that was seen of him until his body was uncovered in a mass grave.

During their 25-day occupation of the old imperial city of Hue—starting Jan. 31, and ending Feb. 24, 1968—the Viet Cong launched a reign of terror resulting in the massacre of at least 3,000 people. The bodies of 2,800 have been found and 1,000 are missing.

From the gruesome evidence uncovered in mass graves over the past year and a half, most of the people of Hue do not expect to see any of the missing alive.

With the finding of Father Buu Dong's body, it is now known that the Viet Cong killed five Catholic priests. Fr. M. Cressonier, 60, and Fr. Pierre Poncet, 36, were killed early in the occupation. They were members of the Paris Foreign Mission Society. Fr. Guy de Compiegne, 48, and Fr. Urbain David, 52, Benedictine priests from the Thein An monastery, were also killed.

Father David's body was found bound with seven others. From the position of the bodies it appeared that they were forced to stand in the common grave, which was eight feet deep. Because dirt was found in their mouths, it is thought that some were still alive when the grave was filled.

Two Vietnamese priests are still missing since the days of the Hue massacre. They are 74-year-old Fr. Michael Haynh Ngoc Bung and 61-year-old Fr. Joseph Le Van Ho.

Three Sacred Heart and two De la Salle brothers, all Vietnamese, also were victims of the Viet Cong. The bodies of the Sacred Heart brothers were found last year. The De la Salle brothers have not been found yet.

Three students of the Hue major seminary are still listed as missing.

MAYOR RICHARD LUGAR OF INDIANAPOLIS

HON. WILLIAM G. BRAY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. BRAY. Mr. Speaker, the election of Indianapolis Mayor Richard Lugar as vice president of the National League of Cities carries implications far beyond those immediately apparent.

As the mayor put it in a speech prior to the vote, the question was whether the league would work with other levels of government, or stand outside and constantly criticize.

Following is the full text of the mayor's remarks, and also an editorial from the Indianapolis Star of December 11, 1969:

TEXT OF THE REMARKS OF RICHARD G. LUGAR, MAYOR, INDIANAPOLIS, IND.

The National League of Cities has sounded the alarm and outlined the critical problems of the cities. No one will challenge the fact that all cities will be sorely tested.

The point at issue is whether the National League of Cities will assume primarily a role of incessant criticism of all other levels and forms of government in America or whether we will evolve a constructive and more harmonious relationship with the national administration of President Nixon, the United States Congress, State Governors and Legislatures, and County officials.

I believe that constructive inter-governmental cooperation is vital for the future of cities. I am pleased that President Nixon has initiated a vigorous domestic program and I am certain on the basis of personal experience that the President is eager to work closely with Mayors, Councilmen, and City Managers to reform the governmental structure and the quality of services offered to citizens of cities.

I am equally certain that the President is eager to receive some signs of appreciation from the League of Cities that his efforts are recognized. Similar signs of good will would be appreciated by State Governments.

The luxury of thousands upon thousands of words of condemnation is a luxury we cannot afford.

I am a candidate for Vice President of the League of Cities because I believe that local city governments can and will succeed in meeting human needs. Much of this success will come because we were persuasive in obtaining assistance from others.

Specifically our leadership needs to be compatible and friendly with others who can help us. President Nixon has asked me to serve as Vice Chairman of the Advisory Commission on Inter-Governmental Relations, as a member of his Task Force on Model Cities, as one of four mayors who worked out the mandatory pass-through provision in the revenue sharing discussions with Governors and County officials.

I am optimistic about the 1970's because I have seen and shared in great advances for cities in 1969.

The National League of Cities needs greater strength through the recognition of city councilman and officials of cities large and small. Having gained the benefit of that strength, we need to begin to smile more and frown much less, to express genuine gratitude with as much fervor as heartfelt complaint.

We need to begin to look and to act like winners and stop sounding like pitiful candidates for charity.

I am taking this unusual step of actively seeking the office of Vice President of the League of Cities because I am certain that I can present the case for cities to the President, to the Congress, to State Governments and gain new allies for the great cause of better cities. All Americans want to help us. Our task is to point the way, to thank those who help, to win those who now wait for our leadership.

MAYOR LUGAR'S VICTORY

The victory of Indianapolis Mayor Richard G. Lugar over New York Mayor John V. Lindsay for vice-president of the National League of Cities has significant aspects.

It portends increased national stature for the Indianapolis mayor who had already received nationwide attention as a guest on network television programs and more recently as vice-chairman of the Commission on Intergovernmental Relations, to which post he was appointed by President Nixon.

The vote is generally regarded as a setback to Lindsay's future as a national political leader. He was a persistent critic of the Nixon administration's policies on urban affairs.

A few hours before the vote Lugar said, "The point at issue is whether the (league) will assume primarily a role of incessant criticism of all other levels and forms of government in America or whether we will evolve a constructive and more harmonious relationship with the national administration of President Nixon, the United States Congress, state governors and legislators, and county officials."

The league represents 14,600 municipalities, most of them small or suburban. In the past, large-city mayors headed the league and stressed issues pertinent to huge metropolises. Lugar's trumph is being assessed by league observers as being the result of a revolt of the membership and also as a sign that smaller cities and incorporated suburban communities may be closer to the Nixon administration's policies than to those expressed by Lindsay and other chief executives of bigger cities. Lugar clearly stated that he was running on a pro-Nixon platform, adding that he was "certain that the President is eager to receive some sign of appreciation from the League of Cities that his efforts are recognized."

In essence, Mr. Nixon maintains that, to a large extent, cities must solve their own affairs. Lindsay's pronouncements indicate

that most urban ills should be cured by mass infusion of Federal funds.

Besides eliciting the normal feelings of pride that come from having the "hometown boy" win, Lugar's victory appears to strengthen the concept that municipal problems can't be solved simply by demanding more Federal funds. Anything that makes that truth more evident is a plus—for Indianapolis and for all other municipalities.

MEET PRESIDENT ROGERS

HON. CHARLES H. GRIFFIN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. GRIFFIN. Mr. Speaker, the current issue of Banking magazine has an interesting article on Mr. Nat S. Rogers, president of the American Bankers Association.

Mr. Rogers is one of the most dynamic business and financial leaders in the Nation. Personable and popular, Mr. Rogers made many contributions to the economic and cultural life of Mississippi before moving on to newer and larger responsibilities as president of the First City National Bank in Houston earlier this year.

I commend the following article to the attention of my colleagues:

MEET PRESIDENT ROGERS

(By Richard L. Kraybill)

During 1969 Nat S. Rogers has moved from the presidency of the Deposit Guaranty National Bank of Jackson, Miss., to the presidency of First City National Bank of Houston, Texas. And in this same year he has moved from the vice-presidency of The American Bankers Association to the office of president. Nat Rogers has been aptly described as a man on the move.

His first move occurred 32 years ago when, as a lad of 17, he left his home town, New Albany, Miss., to attend Millsaps College in Jackson. After graduating in 1941 with a BA degree, he joined the U.S. Navy in which he served for the duration of World War II.

His next move was to Cambridge, Mass., after the war where he attended the Harvard Business School as a George F. Baker Scholar. He earned his MBA degree there in 1947 and then returned to Jackson to carry on the family banking tradition by joining the credit department of the Deposit Guaranty National Bank.

Although Nat Rogers remained in Jackson from 1947 to 1969, he continued to be a man on the move during those years. He rose through numerous position in that bank, each involving increased responsibilities. In 1958 he was elected a director and, later that same year, he was named president. He was appointed the bank's chief executive officer in 1966.

Not content with serving just his own bank. Nat Rogers has worked diligently for the entire banking cmmunity in his state, in the area, and throughout the nation. His vigorous participation in the activities of the Mississippi Bankers Association led to his election as president of the Junior Bankers Section and later to the presidency of the MBA, an office his father had held just 25 years earlier.

Besides serving the state organization, he was also very active with Robert Morris Associates holding the titles of Southeastern President, National Director, and National Membership Chairman. He is on the board of trustees of the Foundation for Full Service Banks and has served as vice-chairman of the Region Eight Advisory Committee to the Comptroller of the Currency on Banking Policies and Practices. In addition to this he found time to serve as a lecturer at the School of Banking of the South at Louisiana State University from 1957 through 1960.

President Rogers entered A.B.A. activities with his customary enthusiasm when he was appointed to its Committee on Credit Unions in 1961 and he rose to the chairmanship of that committee in 1964–65. That same year he became a member of the Executive Committee of the A.B.A. Savings Division. The following year he was elected vice-president of the Savings Division and in 1966–67 he was chosen the Savings Division president. He has also served as the Mississippi representative on the Executive Council of the A.B.A.

The new president is active in other areas as well as in the field of banking. As a man on the move he has been president of the Jackson Civitan Club and the Jackson Chamber of Commerce; he was both chairman and president of the United Givers Fund; he was president of the Andrew Jackson Council of the Boy Scouts of America; and he has served the American Red Cross at the local, state, regional, and national levels.

MANY OTHER INTERESTS

His varied outside business interests are reflected in the many directorships he has held, which include those of the Mississippi Valley Title Insurance Company; the First Mississippi Corporation; Standard Life Insurance Company; Mississippi Steel Corporation; Mississippi Chemical Corporation; Coastal Chemical Corporation; and the Mississippi Power and Light Company. These are in addition to his directorships in the First National Bank of New Albany; the Merchants and Planters Bank of Tchula; and the Rankin County Bank.

Nat Rogers has always displayed a keen interest in education. He has served as a trustee of the Mississippi Foundation of Independent colleges. He has also retained close ties with his alma mater having served her as chairman of the Development Committee and chairman of the Finance Committee, as well as being president of the Millsaps College Alumni Association. In 1960 he was named Millsaps College Alumnus of the Year.

Clearly Nat Rogers is a man on the move, and a man who will continue to move. But even more important, he is a man who moves with care and consideration. Before accepting the position of president of First City National Bank last February, for example, he made sure that it would not prevent him from continuing his work with the A.B.A. In discussing his move at that time he said, "A paramount condition of my acceptance has been the complete and wholehearted willingness of the First City National Bank for me to accord the highest priority to the duties of my A.B.A. office."

While his activities as vice-president of A.B.A. took about a quarter of his time last year, he recently estimated that he will be spending about twice as much time this year to fill his role as president. As he moves into this new and challenging position, he brings energy, experience, and executive ability that will provide a sound basis for the continued growth of the A.B.A.

ACCENT ON PLANNING

Nat Rogers is a man with complete faith in the future. His only fear is complacency; and he believes that the best weapon to use against complacency is planning. He has cautioned bankers, "Unless we develop the will and skill to project our thinking into the future, the past will someday return to haunt us as financial has-beens."

To illustrate the importance of planning, he cited the MICR program as an example of what can be accomplished by anticipating future needs. "When it was started back in 1954," he explained, "annual check volume was only 8-billion, yet even this was beginning to put a strain on our capabilities. Today we are able to process almost triple that number." By way of contrast he added, "Without this planning effort, we might well have found ourselves in the same position as the securities industry."

As a sidelight to his statements on planning, it was gratifying to note that the new A.B.A. president is well aware of the problems that face the smaller banks. "There is a tendency to overlook the fact that half the nation's banks fall in the $7,000,000 and under bracket," he acknowledged, "but smallness is no reason for failure to plan ahead." He then listed some things the small bank could do to prepare for the future.

Nat Rogers, a man of firm convictions, leaves no doubt about his attitude toward the dual banking system. He has clearly stated, "Those of us who are steeped in the traditions of American banking believe unreservedly in the dual banking system. It is unnecessary to point out that to think otherwise would be a banking heresy—especially since we have the record of more than a century that demonstrates its efficacy in serving the great American free enterprise economy."

He went on to point out that the 1970s will be a critical decade in the history of American banking with the industrial and social transformations that will occur. Not the least of the many problems we face, said Nat Rogers, is the development of influences that could "sweep away the dual banking system unless it retains a functional efficiency to respond to the needs of the new day." He will do all he can to support the vitality of a dual banking system and help it to retain such a functional efficiency.

Although he is fully in favor of the dual banking system, he does not approve of establishing still another system by permitting nonbanking institutions to expand into the field of commercial banking. He admitted that there may be instances where avenues of conversion should be opened. However, he insisted, there is no reason for allowing nonbanking institutions to "assume the powers and prerogatives of commercial banks, but avoid paying the price in terms of regulation or taxation."

EMPHASIS ON EDUCATION

While he may be a man on the move, Nat Rogers is never so hasty that he overlooks the obligations of the banking industry toward others. It was typical of him to say, "One of the most serious problems facing the business community today is training the undereducated worker to fill a useful role in our highly technical society. The banking industry must accept this challenge on a broad front, and improved training programs will go a long way toward helping it to discharge this obligation."

Education is a subject of great interest to Nat Rogers and he discussed its importance to banking. He pointed out that banks are finding it necessary to place stronger emphasis on training and education than on experience as a principal criterion for advancement. Among the reasons for this he lists the tremendous growth in banking, the high turnover, and the career disruptions of World War II that created an age gap between today's senior management and the men who will move ahead as replacements.

"Banker schools are essential, but they cannot fully meet the needs," he said as he called attention to the problem of the smaller banks that find it difficult if not impossible to send a key man to a resident school. One answer to this problem, he explained, is in the cooperative effort of banks, mainly on the local level, working within the framework of A.I.B. to develop programs for senior management.

Like most men on the move, the new A.B.A. president keeps an eye on the road as he advances. He is always looking toward the future and evaluating today's actions in terms of their effect on the future. In considering the many recent changes that have occurred, he had this to say, "The tradition of America has always been progress, but change has usually been accomplished through a relatively slow evolutionary process.

"Today we see that the increasing rapidity of change necessitates an accelerated transformation in our society. We can no longer meet change by direct confrontation, solving each problem as it comes up. If we are to maintain a viable society, we must anticipate change. We must be ready with the solutions before the problems occur. And the proper concern of banking must extend beyond the marketplace to the community at large."

Perhaps his whole philosophy on this subject was best expressed in the succinct statement, "The first rule for the future in banking must be involvement." It is his firm opinion that the bank and the community must join in working toward full employment opportunities, decent housing, and top educational facilities. Ever conscious of the needs of smaller banks, he added, "Our social problems are not exclusive to the large city nor to the big city banks."

On the subject of the one-bank holding company, Nat Rogers disagrees with those critics of banking who see this trend as being in direct conflict with the public interest. He said, "This restrictive view of the proper role of banking seems to ignore the fact that our industry is already one of the most closely regulated in the country." He went on to say that banks must have the opportunity to evolve, to change with the times. "Otherwise, they will lose the solvency and soundness required to perform their traditional functions in our economy. An enlightened approach on the part of the regulatory agencies is definitely in the public interest, for restrictive interpretations of existing regulations could well bar banks from evolving with today's dynamic economy."

On the truth-in-lending bill Nat Rogers was very optimistic. "If it is successful in making people more conscious of credit costs, it can't help but bring more business to banks," he maintained. The average borrower doesn't pay close attention to rates; his main care is whether he can meet payments. This attitude, said Nat Rogers, leads to irresponsible credit commitments which favor competitors who charge higher rates than the commercial banks.

The tight money situation is of special concern to Nat Rogers not only because it limits the ability of banks to participate fully in the revitalization of our society, but also because of the erroneous belief by some that banks have created the situation or benefit from it. On the one score he has said, "It is imperative that we bankers recognize the ramifications of tight money and that we exercise discretion in our banking policies to promote stability and encourage real growth."

Concerning the other aspect of tight money he said, "Equally important is informing the public that bankers have not created tight money, nor are they the beneficiaries of the stringency. The fact that banks are catalysts serving to equate supply and demand in today's strained market isn't generally appreciated by most people. Never before has the need been so urgent that this story be told simply and convincingly to all the people."

In pursuing this theme he pointed out that bankers must "communicate particularly and persuasively with the political establishment and with the public. This process is essential to the understanding and support which banking must obtain to meet its challenges."

To A.B.A.'s man on the move, these challenges are opportunities to exercise initiative. In meeting these challenges Nat Rogers can be counted upon to use that initiative and to plan for change rather than merely react to it.

ECONOMIC OPPORTUNITY ACT

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. MURPHY of New York. Mr. Speaker, it has often been said: "To be a little poor is to die a little each day. This truism, unfortunately, sums up the unfortunate plight of many Americans in this land of plenty.

I have always been committed to the eradication of poverty and human misery. As the record will show, I have always supported by vote and action the aspirations of the war on poverty.

Yet, it is ironic but true, that poverty has become a big business with the poor and the hungry being exploited by certain cults. Poverty is still a national disgrace despite the opportunity—the hope—offered by Congress more than 5 years ago when it passed the Economic Opportunity Act of 1964. Mistakes have been made, glaring ones, but the Office of Economic Opportunity has subtley given the poor a voice and a chance to shape their own destiny.

On Friday, December 12, the House of Representatives voted overwhelmingly 276 to 117 to extend over the next 2 years the life of the Office of Economic Opportunity. Heated debate preceded that vote, which included a 231-to-163 vote against recommitting this important legislation. I, of course, voted against the recommital move and for the extension. I unqualifiedly opposed an offered amendment that would have gutted the OEO by giving State governments a veto power over OEO activities. The substitute would have created an administrative nightmare and done little to further the goals of a national commitment toward eliminating poverty and injustice.

I remarked earlier that mistakes have been made in the well-intentioned drive to once and for all erase the specter of poverty. There have, as the record will show, been instances of exploitation by opportunists.

For example, I have recently unearthed evidence that New York City tax dollars were funneled through the Human Resources Administration to send 30 busloads of protesters to Washington last April for demonstrations against proposed cuts in the antipoverty program. For this, I have been called a liar, despite conclusive evidence provided by the General Accounting Office.

I have since learned that an antipoverty employee was instrumental in recruiting New York high school students to participate in the November 13 to 15 antiwar moratorium here. Poverty officials have again denied the charge despite documentation. I have asked the mayor of New York to order the HRA to cooperate with the GAO in a Federal probe to determine whether antipoverty funds are being diverted for harmful and meaningless extravaganzas like the above-mentioned demonstrations.

I will continue to battle the waste of hard-earned tax dollars. I will continue to unearth and correct malfeasance in public office. I will continue to insure that funds appropriated by the Congress for the poor and the underprivileged go to the poor and the underprivileged and not into the pockets of "instant politicians."

The poverty bill extension that recently passed the House does not include in its provisions a credit card for unauthorized use of payrolls and salaries. There is no language in the act that can possibly be broadened or construed to allow the tainted jiggling of funds for such miscarriages as those mentioned above.

My commitment to the poor is a continuing one as is my commitment to justice and integrity in the administration of programs designed to best help the poor.

DOUBLE TALK ON CIVIL RIGHTS

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. CORMAN. Mr. Speaker, with all due respect to the Vice President, it is not only the eastern establishment press that is concerned about vital issues facing the country. The Los Angeles Times today frankly and succinctly comments on the strange game the Nixon administration is playing with the issue of civil rights.

On the one hand, as we have seen in recent weeks, Secretary Finch has opposed restraint in carrying out the Supreme Court's October 29 mandate that "every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools." Yet, the Attorney General of the United States just a few days ago shifted enforcement of school desegregation cases in the South away from its own Civil Rights Division and made them the responsibility of U.S. attorneys in the South, who are known to have little sympathy for the policy to finally terminate all dual school systems.

The Attorney General's action, a spokesman for the Justice Department said, was due to a lack of personnel in the Department—that they just do not have enough attorneys to do the job. Yet, the Attorney General saw to it that the extension of the 1965 Voting Rights Act was defeated on the floor of the House last week and that his substitute bill was passed. Surely, the substitute bill, calling for enforcement in all 50 States, as opposed to the few States covered in the defeated bill, would need many more attorneys than the Department now has, since it is obviously short on attorneys and cannot enforce school desegregation cases. Double talk, again?

And again, when the House acted on the voting rights bill, the "Dear JERRY" letter from the President obviously played a big part in making possible the passage of the Attorney General's substitute bill. But the next day, when the House acted on the OEO bill, no "DEAR JERRY" letter was received, and the simple extension of the OEO bill passed, even though there was an obvious effort by the Republican leadership in the House to scuttle the OEO programs.

Mr. Speaker, the administration's doubletalk to enhance its "southern strategy" politics is a dangerous game to play.

The Los Angeles Times' editorial on the subject is worth the attention of every Member of the House, and I place it in the RECORD:

DOUBLE TALK ON CIVIL RIGHTS

The mood of Congress is running against civil rights.

Last week the House voted to dilute the Voting Rights Act of 1965.

And, last week and this, Democrats and Republicans alike unexpectedly deserted the cause of civil rights in certain crucial Senate votes on the proposal to remove from the Department of Health, Education and Welfare the power to deny federal funds to racially segregated schools.

It was gratifying to see Robert H. Finch, secretary of health, education and welfare, declare the Nixon Administration is "unalterably opposed" to the restriction. The federal government's power to cut off federal funds is the most effective tool it has for enforcing the Supreme Court's mandates.

But public opinion polls show that most of the white majority in this country think the black man has gained enough.

Congressmen read the polls. So does the Administration.

And the Nixon Administration has not been speaking with one voice on the subject of school desegregation

While Finch presses for positive enforcement of the law, Atty. Gen. John N. Mitchell engages in what is at best a kind of negative enforcement. His Justice Department lawyers go into court to ask for delays in implementing the Supreme Court's recent rulings that "deliberate speed" is no longer a viable approach in desegregating Southern schools. He shifts the burden of school desegregation cases away from the Civil Rights Division of the Justice Department and gives it to the local U.S. attorneys in the South, who can be counted on to tread lightly.

The process of desegregation in the South cannot, of course, be stopped. As fast as the Justice Department asks for delays, the Supreme Court says again there won't be any. Meanwhile the President has promised, as of course he must, to enforce the law.

That is not quite the point. The Southern Regional Council argues persuasively that "the false hopes engendered by the Administration have laid the seed for new resistance in the South."

And why are those seeds being sown? A "southern strategy" for the Republican Party, probably; also probably, the President's reading of where his majority lies, among northern whites as well as southern whites.

The kind of ambivalent politics the President is practicing with the constitutional rights of black Americans is, we suggest, short-sighted politics.

It can only, as it already has, dishearten and embitter black Americans, with all portents for future disorder which such a mood entails. It can only encourage Americans who are not black to think that our racial problems will be solved more easily than they, in fact, can be.

CONGRESSMAN WILLIAM D. FORD OF MICHIGAN ADDRESSES INTERNATIONAL EDUCATORS

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. BRADEMAS. Mr. Speaker, recently, my distinguished colleague on the Education and Labor Committee, the gentleman from Michigan (Mr. WILLIAM D. FORD) was honored by being invited to be the keynote speaker at an important international education conference in Athens, Greece.

Congressman FORD spoke at the 16th Annual Conference of the Near East-South Asia Council on International Schools. The council represents administrators from 24 countries in the Near East and South Asia, which serve the children of Americans stationed abroad.

Few persons realize the scope of this huge overseas school system, which is responsible for educating nearly a quarter of a million American children.

Mr. Speaker, the Athens Conference was attended by teachers and administrators representing American schools in a wide range of nations, including Afghanistan, Austria, Colombia, France, Greece, India, Israel, Jordan, Kuwait, Lebanon, Nepal, Pakistan, Saudi Arabia, Switzerland, Turkey, and the United Arab Republic.

Congressman FORD, in his excellent address, put into perspective some of the many problems faced by those who are entrusted with the task of educating the children of our servicemen and civil servants who are serving our Nation in other lands.

Mr. Speaker, I insert the text of Congressman FORD's talk in the CONGRESSIONAL RECORD at this time and commend it to the attention of our colleagues:

REMARKS OF THE HONORABLE WILLIAM D. FORD

At the outset I would like to make the very obvious observation that I am happy to have this opportunity to return to Greece.

This is my third visit to Greece, and unfortunately, like my preceding visits, will be all too short, but I am sure you will agree with me that we could not be in a more interesting or appropriate place for the purpose of discussing education.

I would like to thank the Near East-South Asia Council on International Schools and your President, Mr. Tom Johnson, for inviting me here to speak on American education at home and abroad.

It is my privilege to serve in the House of Representatives on the Education and Labor Committee, and particularly as a member of the General Education Subcommittee of that Committee having primary responsibility for writing federal legislation affecting elementary and secondary education.

As we say in the House, I should like to associate myself with the remarks of the gentleman from Indiana, Representative John Brademas, who is my colleague on the Education and Labor Committee and who spoke to an education group here in Athens in September of 1967. He said at that time, and I quote him:

"It is, I think, most appropriate that we discuss education here in Athens—it was the Greeks, after all, who were the first genuine educators of the western world—the first to raise profound questions about how to educate both children and men. But even as the ancient Greeks criticized their educational system, we too—modern Americans and modern Greeks—must answer serious questions about our own systems of learning and teaching."

I have been asked to speak briefly with you today of the progress in American education both at home and abroad with particular emphasis on what I view from the Washington scene as the Federal government's concern for, and commitment to, this progress.

AMERICAN QUALITY EDUCATION ABROAD

I certainly hope that during my brief say here at your Conference I will have the opportunity to exchange ideas, through direct personal discussions, with those of you attending this Conference as administrators, school board members, sponsors and professional educators directly involved in providing "American-quality" education to American dependent school children in the many countries represented here today. I know that such an exchange will add to such experience as I have gained during the past five years as a member of the Education and Labor Committee. We are truly eager to actually learn and know of our overseas schools in the many nations we serve around the world.

Most of you in attendance at this meeting are directly involved in the administration of programs of elementary and secondary education for American children living with their parents in the Near East and South Asia.

You are the people with the direct responsibility for operation of what, for want of a better term, we refer to as "American-sponsored" elementary and secondary schools.

The stated purposes of the Federal assistance program for these schools are to help the schools to provide adequate education for U.S. government dependents and to demonstrate to foreign nations the philosophy and methods of American education.

I need not tell you what a tremendous challenge this is when measured against the unique circumstances under which you operate.

At the present time the Federal government is involved in the direct and full financing or the partial support of a worldwide education system comprising approximately 438 schools in well over 100 countries. The rough breakdown of the distribution is as follows: 215,073 students attend these schools in elementary and secondary grades including 181,348 Department of Defense Dependents and 33,725 non-Department or civilian dependents and approved foreign nationals in the case of schools such as those you represent here.

This worldwide school system now employs 12,452 teachers and administrators with 7,839 in the Department of Defense School System and 4,613 in schools supported by the government through the State Department.

Although this year's budget for this educational system is more than $177 million and this system of schools if located in any State in the continental United States would be one of the largest in our country, most American citizens and even some members of Congress are barely aware of your existence or purpose.

We would like to think that the hearings and investigative trips undertaken by the Special Subcommittee of the Education and Labor Committee headed by Congressman John Dent of Pennsylvania which was begun by a Special Resolution adopted by the House of Representatives in 1965 and has carried forward ever since, has contributed to a greater understanding within the Congress of the need for support for this great worldwide system of schools and their educational product.

THE FEDERAL EFFORT IN EDUCATION

It was my privilege in January of 1965 to be assigned to the General Education Subcommittee of the Committee on Education and Labor in the United States House of Representatives at the very beginning of one of the most exciting periods of activity that the Committee has ever experienced.

Our Committee wrote the Elementary and Secondary Education Act of 1965 which was hailed by President Johnson as the greatest breakthrough in Federal support for public education in 100 years. More importantly, however, this signaled a new awareness in the Congress of its responsibility to American education.

I need not recount to you the great difficulty encountered by the friends of education over the past 50 years in attempting, without success, to bring the Federal government into partnership with the States and local school districts for the support of elementary and secondary schools and for assistence to our institutions of higher education as well. The first real awakening of the Federal establishment to its responsibility for the support of education in our country really came toward the end of the Eisenhower administration and in the beginning of the Kennedy administration. I am sure that you have heard the now famous statement of the former Commissioner of Education, Francis Keppel, who said he thought perhaps the greatest breakthrough for Federal aid to education in the United States came from Sputnik. You will remember that when the Russians successfully orbited the earth with Sputnik, the American public suddenly came face-to-face with the realization that we were not keeping up with other major countries in the world in the support of the institutions necessary to provide the trained persons needed by a country such as ours in a very complex and rapidly changing and shrinking world. Although somewhat sudden, this increase in American commitment to education was, I believe, best characterized by President John F. Kennedy when he said:

"Education is both the foundation and the unifying force of our Democratic way of Life—it is the mainstream of our economic and social progress—it is the highest expression of achievement in our society, ennobling and enriching human life. In short, it is at the same time the most profitable investment society can make and the richest reward it can offer."

EDUCATION AS A NATIONAL RESOURCE

Lest I mislead you, I should not like you to think from what I have just said that we are any place close to the goal of a full commitment of the magnitude which many of us believe to be absolutely necessary at the Federal level. The Congress has passed more pieces of legislation affecting education in our country and providing greater support from the Federal level than ever before in the history of our country. However, we have not yet had a forthright and unqualified commitment by Congress to the proposition that the level of education of Americans is a national resource entitled to the massive commitment of national resources to its development and support in the same measure as any other essential national resource.

With all the legislation we have passed, including the Elementary and Secondary Education Act of 1965 and the many additional programs that have followed it, we find our Federal contribution to elementary and secondary schools within the United States at the present time to be something less than 8% of the annual expenditure for education at this level from all sources. In my own state of Michigan, for example, the current rate of Federal expenditure from all programs is less than 5% of the total expenditures for elementary and secondary education in the state. It seems clear, therefore, that the Federal Government's present commitment to education in our country, though significant, still falls far short of the commitment of national resources necessary to reflect our willingness to have the Federal government become a full contributing partner in the effort to provide quality education in all parts of our nation.

Recent events in Washington have, however, been most encouraging, and I see the American education community as well as the American public awakening to the realization that the Federal government will have to make a much greater financial contribution to the assistance of our state and local school systems if we hope to keep pace with the ever-increasing demand being made on those systems by a growing, energetic, mobile and ever-urbanizing American population. It is clear that the events of the past few years have brought home to Americans, more than ever before, a realization that our position as a leading country in the world depends upon our ability as a people to educate ourselves to compete successfully not only in technology but in every other way if we are to remain a leading nation of the world.

CUTBACKS IN EDUCATION FUNDS

This year we were dismayed when the outgoing President recommended an education budget that would have spent more money than we have spent before but which would not even keep pace with the increased costs being absorbed by ongoing programs. We viewed with even greater dismay, however, the budget of President Nixon who cut back the recommended appropriations for education on almost every front and recommended no money at all for some of our most successful ongoing programs. During the campaign of 1968, Mr. Nixon stated, on many occasions, his strong support for the commitment of the Federal government to support of education at all levels. Just some of his quotes—

"American opportunity begins in the classrooms of this nation for young and old alike:"

"When we talk about cutting the expenses of government—either Federal, State, or Local—the one area we can't shortchange is education:"

"Education is the area in which we must keep doing everything that is necessary to help achieve the American dream:"

And then finally he said on many occasions—

"We call on every citizen to join with us in an action program for education."

However, after taking office, the President, not content with the cuts in education proposed by the Johnson Administration budget, proceeded to slash programs to the extent that some would be entirely wiped out. Here are a few examples:

Mr. Nixon proposed only 39% of the authorized amounts for Title I of the elementary and secondary education programs—the program for deprived children and youth: 20% of the authorization for vitally-needed supplemental education centers and services: 37% of the authorized money for strengthening state education departments: only 15% of the money earmarked for educating the handicapped; 25% of the authorization for bi-lingual education; and just 30% of the funding necessary for school operating expenses in areas with high concentrations of Federally-connected children—the "Impacted Areas" program which has been almost fully funded since its inception in 1950.

Having said this—why am I encouraged by recent happenings in Washington? The education community of America responded to the challenge presented by this shortsightedness on the part of both a Democratic and a Republican administration. Those of us who have been advocating a greater financial effort found support coming to us from across the country in our efforts to broaden the Federal commitment and participation.

THE REASONS FOR OPTIMISM

In a totally unprecedented move, the House of Representatives earlier this year overthrew the recommendations of the powerful House Appropriations Committee by the adoption of a package of amendments now known throughout the country as the "Joelson Amendment," which added one billion one hundred and twenty million dollars to the appropriations recommended by the President in his budget. This billion dollar-plus increase was passed in the House of Representatives by an overwhelming majority.

This didn't just happen. It didn't happen because of brilliant speeches or brilliantly-executed parliamentary maneuvers on the part of the friends of education who are members of Congress.

More realistically, it happened because the education community brought itself together in a concerted effort to impress the Congress with the urgency of their needs in the America of 1969.

A tremendous effort was put forth by organized groups of people interested in education ranging from the American School Boards Association, through the American Association of Libraries, the National Education Association, the Great Cities Schools Association, the AFL–CIO and many others who have been friends of education. This resulted in a coalition of over fifty organizations which early this year began a massive action program to impress their representatives in Congress with the need for immediate and meaningful action in the more adequate funding of the many educational programs we had previously authorized.

One member of the House, who was obviously piqued at the success of our efforts to overturn the Appropriations Committee and add this money to education, characterized these people from the education community as the new "Educational-Industrial Complex," and in a speech on the House Floor warned ominously that they might be a greater threat than the much-talked about "Military-Industrial Complex."

The Senate subsequently supported our efforts and in fact indicated its willingness to go even further than the House had gone in increasing the Federal commitment to Education.

These efforts and the results produced, in my view, signal an era when education and educators are coming into their own as a political force to be reckoned with. This may indeed be the great breakthrough that will make it possible for us to set a goal for education like landing on the moon; then to set out to do whatever is found to be necessary to accomplish that goal.

In short, I would like to say that from my vantage point on the Education and Labor Committee, where we have the unique opportunity to hear and to learn from people in all phases of education from throughout all parts of the country, it appears that although education is facing the greatest challenge it has ever before faced in America, it is now moving more rapidly than ever before to meet that challenge. I believe that we are in one of the most exciting periods of change and growth ever experienced by institutionalized education in our country.

THE INVESTMENT PAYS OFF

Although the proliferation of new educational programs supported by Federal funds is not ambitious when measured in Federal dollars, against dollars of annual expenditures for education by other units of government, the effect of these Federal programs and expenditure of these funds from the Federal level has been very dramatic.

Through categorical aid, the Federal government has placed at the disposal of experienced and imaginative leaders at the state and local level funds which cannot be swallowed up by the building pressures and increasing costs that go on each year outside of the effective control of school administrators. In other words, an administrator attempting to develop programs for the special needs of educationally-deprived children in a big-city ghetto or in the hills of Appalachia has been able to develop these programs with Federal aid without having to fight to take the funds from the general school budget.

Local school administrators have done what I believe to be an outstanding job of using their funds for innovative programs which in many instances are proving to be so successful that local pressure has developed to appropriate funds from local and state sources to expand these programs to the many students not reached by the Federal categorical aids.

In spite of all of the publicity given to the alleged taxpayer revolt in our country, people are voting to increase taxes for the purpose of financing education at the local and state level in greater amounts than ever before. The American citizen is communicating his concern for quality education for American children to his local school board, his county and state officials and now to his representatives in the Congress and in the Executive Branch. The school teacher, the school administrator and the school board member have all discovered that they can and must organize themselves as a special interest group with what we sometimes refer to as "political clout." The "special interest" is of course quality education available to every young American without regard to where or under what circumstances he attends school—what greater and more worthy special interest might one serve?

AMERICAN-SPONSORED SCHOOLS OVERSEAS

Now what about the American student, at the elementary and secondary grade level, who by virtue of the temporary residence of his parents in a foreign country while in the service of American government or American private enterprise does not have access to the American public school system of which I have been speaking?

The numbers of these pupils in our overseas schools and the importance to our nation of their parents being in the countries where they are found dictate the urgent need for serious concern for the quality of education available to them.

Lacking a clearly defined national policy with regard to the responsibility of the United States Government for the educational opportunities afforded these children, the Congress has nevertheless recognized its responsibility for the education of the dependents of military and civilian employees of the United States Government through development of school systems such as the D.O.D. school system or the payment of education allowances to offset the unavailability of American Government provided facilities. A responsibility for supporting the presence of private citizens employed by American private enterprise has also been recognized by our government.

In 1965 when the Select Committee of the Education and Labor Committee made its trip to foreign countries inspecting the schools attended by defense dependents, we more or less stumbled across the American-sponsored schools because of the number of D.O.D. dependents attending them on a tuition-basis. Since that time the Committee has had an increased interest in and growing concern for the American student attending such schools.

During the past years we have gathered a substantial amount of material through closer contact with Mr. Ernest Manino, Director of the Office of Overseas Schools in the U.S. Department of State; Mr. Gordon Parsons, and former teachers and administrators in such schools who appeared before our Committee from time to time. The Dent Committee has made on-the-spot inspections of facilities and held discussions with faculty, administration and students as well as parents in a substantial number of countries where the schools are located.

The Committee has visited American-sponsored overseas schools in Europe, Africa, Central America, South America, the Near East and South Asia, and East Asia.

Because the American-sponsored overseas schools are not Government owned or controlled, (I know of no one on our Committee who advocates that they be Government owned or controlled) we have been somewhat reticent in our recommendations for administrative modifications of the programs we saw. People here from the Department of Defense schools will recognize that some of the greatest progress made since the Committee began working with those schools has been made by the administrative changes evolving from criticisms and suggestions emanating from the Committee.

COMMITTEE RECOMMENDATIONS

The basis for our recommendation that the Federal government do more to support the overseas schools was started in the first report that the Dent Committee made to the Congress and has been repeated many times by the Committee and its members in many places.

All Committee members recognized almost immediately the salutary effect the activities of the State Department's Department of Overseas Schools has had on the "American-sponsored" schools and the need to increase this activity at every level. The Dent Committee said in its report to the 90th Congress:

"It is apparent that resources of the United States Government available for the improvement of educational opportunities for American Children should also be made available to American-citizen children living overseas. Their parents are serving the interests of the United States abroad: They are in danger of becoming educationally-disadvantaged youth if resources which would be available to them at home are denied them while their parents serve abroad."

Bear in mind that the Committee report went on to say to our colleagues in the Congress that we were generally favorably impressed with the quality of education offered, the curriculums, and most definitely, the facilities of the various schools visited. We nevertheless developed some areas of concern and directed our attention toward them in subsequent years.

We are convinced that there is much more that we need to know about your schools and your problems but that there is much to be done on the basis of what we have encountered. The Committee has already made some general and some specific recommendations to the Congress and to the Federal agencies which might implement them by Executive action, and we do have some specific legislation pending.

In the area of legislation the Committee has recommended some things which might be done: (1) Review all existing Federal aid to education legislation with a view to providing extension of the benefits of such legislation to students, teachers and school systems overseas. For example:

(a) Tailoring the provisions of the International Education Act of 1966 to provide funds for training programs for staff employed in these schools to be held within or outside the United States and not limited to United States citizens;

(b) Amending the National Defense Education Act to include the Overseas Schools under the loan provisions of Title III for equipment and remodeling and under the teacher institute provisions of Title XI to provide for institutes to be held outside the United States again not limited to United States citizens;

(c) Amending the Higher Education Facilities Act or other appropriate construction legislation to permit overseas schools to borrow under long-term, low-interest rates for academic construction and remodeling with such loans contingent upon the recommendation of the Office of Overseas Schools; and other appropriate agencies such as the U.S. Office of Education.

(d) Extend coverage under Title II, III and IV of the Elementary and Secondary Education Act of 1965 to children enrolled in overseas schools.

I should say here that some of these recommendations have already been implemented with regard to the D.O.D. school system and some legislative attention has been focused on attempting to do the same for "American-sponsored" schools. You might be interested in my bill, H.R. 13285 cosponsored by other members of the Education and Labor Committee to extend the Loan Forgiveness features of the National Defense Education Act of 1958 to teachers "in American schools abroad supported by the United States." Although action has not yet been taken on this bill there is considerable sympathy for its purpose among the members of the Education and Labor Committee.

NATIONAL OVERSEAS EDUCATION BOARD

Another bill which you should be interested in even though it does not at the present time include you within its terms is H.R. 10308 introduced by Mrs. Mink of Hawaii and cosponsored by me and other members of the Education and Labor Committee. This bill would establish a "National Overseas Education Board" which would not be an operating agency for overseas schools but would be the one central coordinating agency for all overseas education; that might be calculated to guarantee some semblance of equal treatment for American children overseas through formation and implementation of some identifiable national policy with regard to our responsibility toward them.

Other specific recommendations that have been made include amending foreign aid legislation to permit the lending of P.L. 480 funds for long-term-low-interest construction loans and attempts to loosen up the restriction on the use of counterpart funds for teachers' salaries, textbooks and teaching materials.

We might also review the deductibility of corporate gifts to overseas schools with the purpose of encouraging this practice by American corporations doing business in foreign countries.

In closing, I should like to make some brief observations on some matters of particular concern to me and at least some of the other members of the Committee at the present time. If I may use what may be a nonsequitur—the one thing we found that the American-sponsored elementary and secondary schools overseas have in common with each other is that each one of them is unique.

GENERAL CONCERNS

In expressing some general concerns, I do not intend to imply that they are found in all or even a majority of the schools which you represent here but they have been found by the Committee frequently enough to make them worthy of consideration:

1. The private schools meet an educational need and there is great freedom in the development of the curriculum; however, many of these schools can only provide a very minimal educational program.

2. In some cases, the private schools are established to meet a need of the private companies and the children of United States Government employees are third or last in priority for admission.

3. Sometimes requirements of the Ministry of Education of the host country limits or controls the educational program: For example, in Buenos Aires, the American curriculum is taught in English in the mornings, but the Argentine Government requires that the Argentine curriculum be taught in Spanish in the afternoon.

4. The private schools, generally, have a greater mixture of children and teachers than the Department of Defense schools. In Rome, Italy, the faculty came from some 15 different countries. This can have a very fine and stimulating educational effect, but might not be good for the student returning to a state-side school after a short time.

5. Most of the private schools have financial problems. The schools, generally, must or desire to accept children from host-nation countries. The tuition charged will not provide monies for teachers' salaries and instructional supplies comparable to the state-side of Department of Defense educational programs. Teachers' salaries are generally low and as a result, many teachers are employed who lack formal education and qualifications and have some other principle reason for being in the country.

6. In many cases, APO facilities are not available to the private schools; thus, costs of getting books and supplies into a country are increased.

7. In many cases, influential people on the Board of Governors exercise too much control over the educational program. Sometimes this board is dominated by "old-timers," and semi-permanent members of the business community.

8. There is no uniformity in curriculum offerings or in instructional materials and textbooks being used.

9. In general, the facilities of private schools seem quite adequate. We have some concern about the Federal government providing grants for some facilities and then the children of Federal employees being required to pay the same tuition as others, when their sponsors did not contribute substantially to building costs. It seems that Uncle Sam is paying twice.

As I said, these are generalized concerns and are not offered as a criticism of the "American-sponsored" schools, but merely as an outline of the specific areas in which the Federal government might assist in guaranteeing equal and quality education abroad, as indeed we should at home.

BILL PASSED TO ESTABLISH CABINET COMMITTEE ON OPPORTUNITIES FOR SPANISH-SPEAKING PEOPLE

HON. MICHAEL A. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. FEIGHAN. Mr. Speaker, it is with great pleasure that I call attention to House passage of S. 740, a bill to establish a Cabinet Committee on Opportunities for Spanish-Speaking People. This legislation does more than create another committee. It demonstrates our Government's real concern for those Spanish-speaking people living in many parts of our country.

S. 740 promises to assure that Federal programs are reaching all Spanish-speaking and Spanish-surnamed Americans and it purports to seek out new programs that may be necessary to bring more Spanish Americans into the mainstream of American life. The Committee members will be appointed by the President and will work closely with Federal agencies to focus on the special needs and problems of this group.

It is unfortunate that the situation in our society demands that such a committee be established but the sad facts are true and the committee is indeed necessary. For the last 2 years it has operated as the Inter-Agency Committee on Mexican-American Affairs but the problems dealt with by the committee are not confined to Mexican Americans alone but affect the many Puerto Rican and Cuban Americans who reside in our country. For this reason, the Congress felt that a new committee must be formed which would properly respond to the needs of the large Spanish-speaking population in America.

New guidelines have been formulated for the committee and I look forward to the enactment into law of this legislation so that we may proceed with alacrity to the problems at hand.

THE PHARMACEUTICAL INDUSTRY AND THE CHANGING HEALTH CARE SCENE

HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 17, 1969

Mr. MYERS. Mr. Speaker, I am proud to count the Chas. Pfizer & Co., Inc., among the many outstanding industries in my congressional district. The chairman of the board and president of Pfizer, Mr. John J. Powers, Jr., recently addressed the 95th annual meeting of the National Wholesale Druggist Association. In that address, Mr. Powers explained that commitments in six areas of service have earned world leadership for the American pharmaceutical industry. I would like to share the complete text of Mr. Powers' remarks with my colleagues:

THE PHARMACEUTICAL INDUSTRY AND THE CHANGING HEALTH CARE SCENE

Ladies and gentlemen, I have taken due note of the topic that I was supposed to discuss today, namely, the pharmaceutical industry and the changing health care scene. And frankly, I think a talk on that subject is a bit premature. I don't know anybody who can do a good job on that topic. A lot of us, however, have been devoting a great deal of our time, our efforts, and our thoughts to this subject. And I'd like to talk to you today, if I may, in a rather informal fashion about certain fundamentals of the situation which should engage our attention before we can clearly define the changing scene and begin to work towards shaping the future of the pharmaceutical industry and health care in the United States.

I will start by trying to get some historical perspective. Recall with me, for a moment, that wonderful man, the general practitioner of 35 or more years ago, as most of us remember him as kids. That wonderful man who came to the house and he put his cheek against the baby's cheek to take his temperature. And he had an abundance, in most cases, of the greatest of all drugs—tender-loving care. This is a great man in the history of the health care system. But he had an extraordinarily thin armamentarium, as we say these days—in that black leather bag—very few specifics at all. And since those days, this kind of an audience hardly needs to be reminded of what's happened: the emptying of tuberculosis hospitals; the number of mental health beds going down instead of sharply up as was predicted even fifteen years ago; the killers that were number one on the list back in the days I spoke of—at the bottom or even gone; life expectancy changing from something like 59 or 60 in the '30's to a little over 70 today. You may even know, you may even have checked, as I did to be sure, that it takes the average workman in America less time, less work, to pay for these new drugs today than for those old ones yesterday.

This record of the American pharmaceutical industry is certainly a remarkable one. So how can we be such a subject of attack? To a certain extent this is understandable. We like to knock down the man on top. This is an American game. As kids we all played King of the Hill. And there is something healthy, something good about this attitude—that is, until extremism steps in with its bitter edge, its hostility and its basic irrationalism. Through the '40's and the '50's this was a young, growing, lusty industry—and, like all youngsters, it was vulnerable. It was all too ready a target for the extremism of the '60's—the decade of confrontation. But this type of confrontation does not solve problems. It is basically destructive and in the melee which has ensued in this decade the voices became loud and shrill.

There was discourse, to some extent. There was some dialogue, but it was not thoughtful. Indeed, to me it sometimes seems not entirely clear what the debate has been about. Because there have been three kinds of people with whom we have been confronted. The first and, I believe, the smallest group is comprised of those who have sought to destroy or hobble this and other industries in America simply because they are private industries engaged in making a profit. In the second, somewhat larger group, are those who wanted to make a constructive criticism of this new, young, lusty industry, growing too fast, it was said, for its own good in a rapidly changing world, which perhaps could stand greater discipline. But there has been a much larger number within a third group where unfounded or distorted charges were hurled, and they hurt, not because they were valid, but because they gained the headlines of America and began to build a false legend about an entire industry—an industry which was the envy of the world outside its own country.

I think perhaps I have been most disturbed to find recently some members of the scientific and the intellectual community allowing themselves to be caught up in this tumultuous swell of irrational criticism when we ought to have been able to depend on this community to bring rational thought to such contentious questions and to solve problems—not add to them.

Quite recently, a man who has a reputation of great distinction in medicine said: "The overall system of drug evaluation is chaotic, biased, profit dominated, unscientific, unsafe and often dishonest." This unsupported and untrue statement is basically destructive. He doesn't help with that statement. It is not helpful to men of good will and of reason who seek ways to face our problems, and to make the most of our opportunities to build for America the best possible system of health care. The astonishing thing was that this type of statement was made at all by a man of science.

Second, a truly distinguished scientific publication—to my great surprise—recently carried a typical "good-guy," "bad-guy" kind of article about the pharmaceutical industry. It was out of character. It was shrill. However, in a subsequent issue of that same publication there was a thoughtful editorial

deploring the attack of extremists on this nation's institutions, particularly on industry "just for being private industry." The editor reminds us that the road marked by undue restrictions on the private sector is the road that leads to control by government bureaucracy. This surprised me quite a bit because it is no longer acknowledged quite so much as it might have been ten and twenty years ago that government bureaucracy indeed should have some limitation. Are these second thoughts? Or perhaps even new thoughts for this publication?

Has extremism at least for the pharmaceutical industry begun to run its course as so often it does? Have the shrill voices done their job (if we may grant them that much) by pointing more clearly than perhaps anything else could to the need for men of good will not to confront but to meet together in common purpose to accomplish worthy objectives for this country? I think, I hope, I begin to sense this in today's atmosphere. There are striking evidences of it. Most important among them is the White House statement on this subject, issued on July 10 of this year. It said this about reshaping the health care system: "Much of the burden must be taken up by the private sector, since it has the primary responsibility for the delivery of health care. Unless government and our vast array of private institutions can learn to work together we cannot succeed." And finally the statement said: "We will ask and challenge American business to involve itself in the health care industry, including the creation of new and competitive forms of organization to deliver comprehensive health services on a large scale. . . . What is ultimately at stake," said the statement, "is the pluralistic, independent, voluntary nature of our health care system. We will lose it to pressures for monolithic, government-dominated medical care unless we can make that system work for everyone in this nation."[1] This is language we understand; this is a call for help—a duty, to which we will respond. It's been a long time since we've heard anything quite like that from government in this country on this subject.

I cannot help but select another interesting example of the possibility of a new mood which I think puts the case well. This is an article by Dr. Ingelfinger in the *New England Journal of Medicine*,[2] decrying government regulation which does not improve but may even destroy. This is a fascinating and a thoughtful article. For today's purposes let me quote only from some of his concluding paragraphs, in which he points out that "the inimical confrontations that characterize exchanges between these two bodies (government and industry) benefit no one. . . . In this hostile atmosphere," he says, "extremist accents are vociferous and loud." But he urges that there is no reason why the professions, the drug firms and government should not work together. He said, "Some orderly system must replace the piecemeal decisions, the public hassles, and legal maneuvers that now appear to characterize the making, selling and using of drugs. That the groups involved will have conflicting points of view is inevitable. But their resolution, not their aggravation, will have to be the goal. Extremists identify problems. Sometimes they clearly precipitate them. But solutions must be sought and achieved by moderates."

So let us all begin to look for the solutions. And as far as we in the pharmaceutical industry are concerned, I believe we must once again seize the initiative we lost several years ago and assume our proper share of the responsibility for the shaping not just of our own future, but also of the new world of health care. I think we should begin by recognizing that we are probably the least understood industry in this country, in spite of all the publicity we have received—or, perhaps I should say, because of it. So this is the broad starting point for us in the industry: to be sure we know ourselves and to make ourselves known to others. This means to me objective, third-party studies of who we are, what we are, and how we operate. We have got to straighten the record as a necessary part of beginning to work on the future.

I say this because those of us who are close to this industry see an industry which I sometimes wonder if ever anybody else sees at all. The world of headlines and the real world are far apart. We should bring them together. This is an industry of commitment which—if I may picture this industry to you for just a moment in broad strokes—begins with a commitment to research. This is the raison d'etre of our industry, if anything is. More is spent on research by this industry than its total net income, and it is estimated that government will contribute in 1969 only 1.5 percent—the lowest for any U.S. industry. Research is the principal, though not the sole, source of the great social benefits of life and health to be derived from this industry. Yet, I think it is perhaps the least understood part of our industry, and most strikingly misunderstood sometimes by those who are also in the health care field.

Next is the commitment to development which I distinguish from research because it is in itself an important, difficult, time-consuming kind of work requiring highly-skilled people, complex techniques and equipment. It is often the most important step in bringing something new to the public either through product or process development or both. It was so with penicillin. Penicillin was discovered in 1928, and in 1941 it was little more than a curious laboratory phenomenon when it was brought to America for development. And I am not embarrassed at all to say that I believe there was one company that led in this development effort, and that company was Pfizer, the first developer of an efficient deep tank fermentation process that made penicillin a practical reality. The evidence—it was Pfizer penicillin on the beachhead at Normandy in 1944. This was a development job.

The third important commitment is to manufacture under high standards of quality control. Now this whole business has changed drastically in our generation as completely new types of products and processes have evolved. New techniques have emerged, new methods of assay, new ways to test. And it is sometimes a bit irritating to have the professional critics judge our past conditions by present standards and present knowledge. Look at us as we are today. Our commitment here is complete and it's big and expensive.

And the fourth commitment which I have not too often seen discussed publicly, is distribution. Our products through our wholesalers, our retailers and the hospitals are 100 percent available throughout the United States. Now, Sears Roebuck, I have been told, likes to point with pride—and rightly so—to the fact that it has 85 percent distribution. Why not 100 percent? Too expensive? Probably not worth it. But if a prescription is written tonight in any hamlet in these United States of America, the odds are large indeed that it will be promptly filled by some corner drugstore, or even be already in the doctor's bag. This is a tremendous job of making products available through the wholesaler, the retailer and the hospital, and our detail men are a strong adjunct to this—checking stocks and inventories, seeing that stocks are maintained at adequate levels and emergency needs met promptly. But this process is buried in our published profit and loss statements where it is usually included in a single line that says selling and general administrative expenses. The distribution system of the pharmaceutical industry is, however, a great service to the American public. It is a critical stage in the delivery of pharmaceuticals to the consumer, and in my view, our accounts should be organized so that the role of this essential service can be better measured.

Next among the basic commitments is education. We have an extensive education system. It begins with the detail man, but it is in our literature, in the distribution of reprints from the technical journals, our symposia, our hospital meetings, our films—a tremendous educational network directed towards every physician, pharmacist and hospital. And in every analysis of this system that I can recall even by our critics, one thing we get back clearly from the doctor is that certainly to a significant extent, our activities in relation to them, are truly educational and a true service to the medical profession and, therefore, to the patient.
